We just need to go that extra mile, as we say in English, to be able to have everything ready. I know it's very harsh, we're losing so many people. But you've got to understand, these souls came here to make, to path, to open the path for mankind. (4:04). We've got to look at this in 2 different ways. Why so many, and why so many in one go? What does these numbers bring? Our governments are cannot govern. The kings and the queens are hidden in the palaces and they are not doing anything for their nations. We expect the looting of the palaces in the coming short time, you watch. People are hungry, gold will buy, and these palaces are furnished with gold. Artworks does not feed the stomach of the people. It's a very interesting, very interesting video on the Internet. I received it yesterday through the Chinese Channel. (4:06). I sent it to Wang Lin, I said translate this for me, it's in Chinese. And the interesting part is, as she said, this is in America, past few days. And there are people ransacking a huge, huge supermarket. And you know what is the funny part, if you watch that video. American marines are walking around with submachine guns, just watching people, they can't do anything. You see them, with the machine guns, they're just walking. People passing them, carrying every loot in the supermarket. Who are they gonna shoot. If you want, I can send the video to be shown. Militaries, police are incompetent. (4:06). They don't have the competence, and secondarily, these people are hungry. They loot the supermarkets, they take a few glasses, they take all the food, then the food shops, then the palaces and then the rich people's home.

This is what I said to many of the Keshe Foundation people, cash as much money as you have in the banks at home. When the electronic system drops, computers fail, you have nothing to live. Hold cash, hold something which you can exchange, if you need. It's electronic, has no value when the bank system collapses. Then mankind is getting ready for that change. We lost our trust. We've seen in the picture of churches used as mortuaries. And the strangest thing is... Rick, can you put that picture of the church up somewhere?... if you can reach it, put it on the screen. (4:08). Look at this picture and try to understand one point, one interesting point. (RC) I'm not hearing you, Mr. Keshe. I think the... Not sure it's my audio or yours that's cut out.. (MK) Yeah. (RC) I hear you now
(MK) Yeah. Where is the priest? Where is the man of God, or there is no God? Or is the church renting the spaces for the bodies? Caroline said something very interesting the other day. She said do you know what's good about Corona? Less children go to church to be abused by the priests at least. (RC) I was wondering who's going to pick up those... all those Bibles that are sitting on the benches now? Nobody will want to. (MK) Actually they are needed to burn these bodies, because we cannot bury these bodies. (RC) That's it, the paper to burn the... to burn all coffins... (MK) Because the lies in them has to bury with the bodies. The truth is, where is God? Where is the Creator? Are the man in the coffin suffering the same as the man on the cross above them? (4:10). This is... this is the whole... the absence of reality. (CR) Mr. Keshe, good morning. (Mr. Keshe, can you hear me? (MK) Yes (CR) Just one second please, Can you hear me now? (MK) We could hear you from the beginning.

(CR) Yeah, but I couldn't hear you, because I was on my loudspeaker. You mentioned something which was taking place in Austria, and you explained that when they bring

these kind of infected bodies into a building, you can forget about the building, if you don't decontaminate it from top to toe, you'd better burn it down. Because it's literally is infecting the whole environment, this virus. Because the amino acids are sitting on the woods, on the chairs, on the floors, on the walls, on the statues, everything that humanity ever has or human has ever touched, the virus can survive on it. Is that correct what I understood?
(MK) Yes. So, the house of God will be empty. Nobody will go in, out of the fear of dying. This is one of the biggest problem in... especially we will see this... this will create a massive problem. Saudi Arabia has gone into the dive with this now. (4:12). We are watching the behavior of the Kingdom of Saudi and... I'll explain to you very, very soon why. The... they are gonna enforce the restrictions. As usual with the other places...the... The biggest problems will come in the folding of economies and not finances available to bury or burn these bodies. There are people would look into churches to pay for these burials, as the families have no money to pay. And would the government accept, and be able to do this? Soldiers will not go near, because they know they die. Many, many soldiers died in China, from the Corona. We... we had a rough security estimate about 150-200 thousand soldiers have died in China already, or are suffering and battling with the disease. They were put in the front line, and they had to follow. But nobody followed what happened with that picture afterwards.

Countries like Austria, premature in trying to open, will put their nationals in a huge danger. You will see what will happen in Austria very soon, because they are playing a massive game. But we see the underlying pattern. And they say the numbers are down because they are eliminating a lot of it. (4:14). The Corona with the stomach, with the heart, with skin, are not considered as Corona. So, they... because they... the virus has evolved now, away from the lung. Comes to the lung and then jumps across to the others. We seen it. That finger you saw with the Corona virus... Have you got that picture? This... the thumb. Rick? (RC) Alright, let me re-get that up here. (MK)Put it next to this picture (RC) Okay
(MK) This is the Corona which stays and we monitored this for years to come, but there's a way to solve it. You see the white. This finger, this here, the white, yes. Does anybody want to say who this finger belongs to, this thumb? This is a Corona patient, and it wasn't there before Corona. Anybody wants to claim the thumb?
(SD) It's... it's my thumb. (MK) That's Stefania's. Was it there before? (4:16). (SD) No, no, not at all. And... and I have another picture. Because... It's... Yeah

(MK) It's calcification, it's the calcification of the bone. If that spot, that salt spot appears in the womb, in the ovaries, in the stomach, 6 month time is a cancer. (SD) Not with the GANS. (MK) Not with the GANS. We... we have brought in a new protocol worldwide. We wait till the situation completes with the Iranian government, that it's scientifically put in papers, that it is accepted by Gates and Fox's News cannot block it. It will go through the appropriate channels. That... you will see... You have to follow this procedure for months to come to make sure... As Caroline said, you go to the church to pray, you pick up the new variation of it. These dead bodies in this church will haunt mankind for centuries to come. (CR) Mr. Keshe... (MK) Yes? (4:18). (CR) For people, maybe, who don't understand so easy why you're referring to that it will become a cancer. Would it

not be good to explain, when we went on the MOZHANs, 3-days blueprint? It was explained with Dr. Rodrigo how the seed of the cancer starts in the breast and why it becomes cancerous, and how it becomes cancerous, and how cancer... (MK) Oh, all that education is in Keshe Foundation, they have to go and search. (CR) Yes, but... (MK) We have done it. (CR) ...it would be very good for doctors to be referred to those information's, because they were public.

(MK) Listen, the doctors at the moment are only happy with their income. We had a very interesting situation last night. One of our active Knowledge Seekers who goes everywhere, he was called a week, 10 days ago, by the head of the hospital to speak to. He went there few days ago, they said they're gonna... they... they give... they can give him some patients, said he can test, because the head of the hospital has so many. And the hospital, with the government, have come up with a very, very clever tactic last night... Late last night, or yesterday last... yesterday afternoon... Can you close your microphones, please? The head of the hospital... Can you close the microphone, please? The head of the hospital has called this guy, he says, do you know something, you want to see if it's effective and it works? From Saturday morning, the emergency unit with, (4:20). God knows how many beds, it's a major hospital in the area, is yours. And let's see how many of them you're gonna save. I spoke to our consultant doctors in Tehran. I said, what's going on. He said: there's a problem, you know that? I said: What's the problem? He said, all the ones in these wards are cancer patient, dying. None of them got anything to do with the viruses. They want just to embarrass us. I immediately said to... We only accept the virus cases and the ones which we want in the board, not the cancer. And I said to our guy, if there is no cancer... confirmed Corona cases, we are not handling it. We are not there to save cancers. And they will die. These are the people who have a week, 10 days to die. They are on their life support with cancer, they'll all die. This is the cleverness of the regime in Tehran. But we are wise, we have advisors, we look around. It's not easy the way to overcome these doctors and people who are well covered. We asked for the Corona patients, they said, emergency, they are dying. You go and help, if you can we'll see. If you save one, it's good. But they're all cancer patients, with Corona, some of them. They're already dying. It's like giving you a bunch of rotten fish and say, see if you can save any to eat. (4:22). But, do we have the knowledge to carry on?

(JM) Mr. Keshe? (MK) Yes? (JM) Can I say just something about some doctors behavior (MK) Yeah. (JM) So, I think the... in North Africa some doctors, first when they heard about virus, they are... put themselves in the sick leave, and they closed their cabinet, and they are not active... They are not helping anymore. So they let some, some doctors who are upset, and trying to call them back to hospitals. It puts the situation very, very bad. (MK) We've seen that the same in Iran. The dentists have been called off, there are only emergency dentists. It's the same in New York, I think, the same in America, and all the dentists have nothing to do, because it's a close contact. Many, many doctors took this position, they took leave. Many, many government leaders took a leave, because they were infected, they didn't want to be found out.

We see people recovering in the hospitals. We see their recovery. But, as the Chinese data shows, they'll come back and they die. Or they die of damage to immune system,

(4:24). which then they say it's got nothing to do with Corona. We see damages in the upper, what do you call, femur, where most of the immune system cells are coming out of. They are getting blocked because of the Corona conversion, the same as on the nail. We... we see a lot of things but you have to understand, they put so many penalties on the doctors not to move, that soon the doctors have no patients not to move. I was talking to the doctor in the hospital in Tehran, near Tehran, which has been announced by the government. He says: "Oh, I just have 1 or 2 patients coming in, we handle them and they go. The ward is more or less empty, I have no Corona patients, because they all have their Cups, they are doing it, we're monitoring them at home, they're all okay." No one in the 120 patients or 100 patients which have received the Cups have died in past 10 days in Tehran, in this area. No one. No from their families have come. Cup of Life means a Cup for Life for the whole family. I wrote to the doctor yesterday, the day before, (4:26). I said to him, "Any news?" He says: [Farsi]. He says... It's a response from the doctor, he says: "Hello, there is no news." And it says, "We have 2 people in the hospital, but there is nothing important, and they're all OK." This hospital, who has had 1 or 2 dead a day, and tomorrow we're there 3 weeks. And the doctors, and the nurses which are dying in the hospital. This is the safest hospital in Iran to... to work at the moment. You have no Corona and you have no patients. The doctors are sitting there and are just watching, they cannot leave, the city is lock down.

And many, many Iranian Knowledge Seekers ask "Where is this hospital?" You cannot go to it, it's closed. It's a closed city, they won't let you in. But, the city is safe, and again is thank to the work of Universal Council member Mrs. Azar. Her vigilance and her family took us to this hospital. Universal Council members do amazing things without them knowing, or their souls take them because that's how they operate, to these positions. Her teaching, past 2 or 3 years to her family in Iran, then supporting the many sick people in city of Qom, now they've seen it, it works. Giving a cup to someone from another thing led to this hospital, and through them we got into this hospital. Nobody has died in any of the 100 homes, (4:28). whereas, according to the Chinese the statistics 90 coffins should have been taken out. And according to the hospital itself 1 or 2 a day in 20 days we should have had at least, something around 20 to 40 people dead.

And still, the embarrassing President of Iran says we need data. Because the data allows him to cash the funds in the American banks. There is a very clear policy in Iran, when we'll get through it, but will come out very correct. We sit as the Keshe Foundation directly, directly with Sepah and Iran military forces to protect the nation because we have it, it's in our hand. And it's a clear decision, Ayatollah Khamenei has to override the president who's incompetent, or the president leaves office and let it to be done by the Sepah. There is no 2 other way. We have shown enough. Tens of thousands of lives saved in Iran. The president's bank account is more important than the nation's life. The position of the president in Iran is untenable. We have sent a direct message to Ayatollah Khamenei to make a decision. Because once we start with all the support from Iranian nation we can go cross the world with other nations because they can see it. (4:30). Again we have one incompetent king who has cried the lying sheep, the wolf. And we have a one incompetent president who sits on top of the technology. And the "Crony's" which he has created the same as Belgium.

We need to start movement somewhere that we can stop these churches, to become, not the church anymore to lie and abuse, but the buildings where the new technologies are taught. The knowledge of the Soul of the Man, not the knowledge to rob the Soul of the Man. How many people will kneel on these chairs and hold that book, knowing it has been so close to a dead body with Corona? These books have to be burned, because there is the fat of the hand of many people and Corona is a few millimeters away. Does the guy spray on the book?

This brings back a memory and I tell you exactly what it is. When I got poisoned by the Belgium's to kill, John who came from the Belgian government to kill me and the poison, (4:32). he said to me something really strange. I should have understood it at that time, it didn't click on me. Every time I taught around the table, Armen can tell you, I used to sit and I used to take paper to write on for the Knowledge Seekers to see. He laced the paper with poison, so every time I touched, every time I came from the teaching room, I was getting poisoned. And he told me once, he was telling me exactly how they're gonna kill me but I wasn't aware of that. He said, "Do you know how many, many people in Vatican got killed? They laced the books when they were praying. And every time they touched, they took the poison. The book of God became poison to kill, by the Church. Now with these books, will be the same. Now you understand why I said, these books have to be used to burn those bodies, because they are already contaminated. I've been through it. And how many of you will go to the church with your own book? And how many of you, do you have a Bible at home or you go to the church with the Bible in your head and in your heart and won't accept the lies?

I said to a priest from Vatican once. I said, do you know what the cross is, with the Christ on it? Their cross is their Rome, and the man on the cross is its citizens. And hasn't changed in 2,000 years. (4:34). Does anybody know what's the Vatican death toll in Italy? Has any priest died yet? Or is it confidential? Or do the people need to have a church or a mosque? Or do they carry it in their hearts? We've seen in this, in the Islamic countries. People saying prayer loud across the streets and towns. They don't need to go to the mosque anymore. They've taken the mosque into their hearts and they live with it. There's many videos. The whole city goes into a song for the prayer, they don't need the mosque anymore, because they get infected. They have imprisoned us in our homes and have... but we have freed our soul and that's the beauty of it.

I taught you two things today. One was the true Cup of Man, and second was the freedom of your soul. And that was the promise of Mahdi, and we have completed it. Today is the birthday of Mahdi and it was promised in 2020 we will come. The Sunis expected him on his birthday in Mecca, but the city is too dirty. (4:36). It's tainted with blood. No one will touch me, and no one will have the power to touch our knowledge, except man, when he judges for his own to use it, to save his own life. Those guys you see spraying, if they were so confident that the sprays kill the virus, why are they wearing the mask? None of the Knowledge Seekers wear the mask when they go to save lives, or they give the GANS. We saw it in a picture of the guy, with his brother in the hospital. Or has it become the American green back, "We Trust in God," but we don't know where the God

is so we print it in the paper. Today wasn't to preach. Today was to save mankind. But you have to see who and where and how you stand. There could be no Internet next week, 2 weeks, (4:38). but we had to send a landmark for you to start moving and teaching. And those who think, you got away with it, know and understand the knowledge, and then you will see if you have got away with it.

Thank you very much for today. And I hope we will see each other next week. And I hope and there is still... There is still time to save... And many of man... Mankind is very resilient. Mankind is extremely resilient race. Thank you very much for today and see you next week, if we're still online.

(LI) Mr. Keshe? (MK) Yes? (LI) [Spanish] (MK) Somebody wants to translate? (JW) Yes. Liliana is asking if she can ask a couple of questions. (MK) Yeah. (JW) [Spanish] (LI) [Spanish] (4:40).

(JW) She wants to know if we could protect ourselves from the 5G antennas with the infinity loop and how much time do we have to be between each spraying of the Cup 1 & 2?
(MK) Maybe you can save yourself with an infinity loop. Because we use it, if you are with us, if you've been around Keshe Foundation team, we all carry infinity loops on our own computer, telephone, mobiles. And it has shown it to be effective because I've seen it through German security in the airports, they see it, it absorbs everything. In respect to the Cup 1 and 2 what I suggested to the Iranian family, who were infected by it and they stood out now is... try to do the Cup number 1 in the morning and the Cup number 2 in the evening, that if you have picked up the virus, you will hear... you feel it. But there is a hidden thing in this process, is that now with Cup number 2 we still don't see pain, but suddenly we see the cancer. (4:42). The body call it the virus.

What I... what we are looking at the new protocol is, at least once a week and I said yesterday to the officials as well, for next 3 months, 6 months, you spray your body to see if you have, but at least once a week cover yourself with GANS number 1 in the upper body, the way you saw with it Jamila, and part... lower part with GANS number 2. Then you might see some pain, because we've seen this recently. So have to make it a way of a habit, to do it or do what Caroline does. Fill up the bath with 2 or 3 liters of number 1, 2 liters of number 2 and sit in it, for half an hour, an hour, every day. And she's got our boy to do it. And it's the way to do it, you decontaminate the body. If you don't have a bath and that kind of thing, cover yourself once a week at least, spend 1 or 2 hours saving your own life from pain. Because, it comes in and it sits in, you can... And secondly if there is any calcification this way, the energy's gone, the calcification goes, and reduces the future cancer. Because this virus is everywhere, we don't know where it comes, where it goes. When you speak to Stefania she will tell you. When I spoke to many Iranian men who I speak to, they are very shy to speak about the pain in their testicles. "Oh, I had it for past week." But women are more open about it. (4:44). Stefania, can you explain to us the pain? We have to wait, she is translating. (SD) Yeah, I'm here. (MK) What did you feel?

(SD) Yeah, the pain was very clear like you... you have like electric current. First of all I had like electric shooting pain. And then you also feels like a... a little bit of burning as well. I have to say you give me the instruction to... do you remember, you give me instruction to make sure I was using Cup 1 and Cup 2, but also make sure that the womb get also with the water of the GANS and so I copied the Caroline now. I'm doing the bath. I'm doing the bath now everyday actually. And that one it really, really, kind of helps with the pain and like I said before, very recently I do not have the pain I used to have before, because it was going and coming little bit again. But now, I brought it to a place where it's not there now. So, I'm very happy about it, but I continuous the... the protocol (MK) Yeah, but... but where did you have the pain? In your ovaries or in your womb? (SD) Yeah, I mean, sometimes it felt some... (MK) How did it feel? (SD) Yes, it's definitely womb, and then sometimes was ovaries, couldn't differentiate the two, if it was both, or if it was the uterus. And you remember when I used to... do you remember the yellow things? Yeah so. (MK) Yes. (SD) Yeah so, so... I think I... I don't know, it seems to me was like uterus, for sure, and then sometime, (4:46). I don't know if it was ovaries or if it was the... (MK) But how does it's feel? (SD) It's just feels like... It's very weird because exactly what you said, it feels like something calcified. That is the feelings. And then you have this electric, like currents little bit. And then... Now it feels good, now I'm fine, Now it's much, much better. I'm talk about the past... (MK) Yeah, let me... yeah, but... let me explain to the... especially women, we are very, very open about it... (SD) The feeling was something there, yeah definitely. Like, like something that it's getting sometimes solid...

(MK) The, the, the clear indication Stefania, just touched it and if you didn't hear it. The first time, she put the GANSes on, two... She noticed a discharge of yellow, like a Calcium, coming from the womb. It's a physical thing. (SD) Yeah, very clear, yeah (MK) The body rejects Calcium, which is converted in the womb. It's not infection, it's material. So, we know the calcification happens in the womb. You have to be very vigilant. This can change into the womb cancer, ovarian cancer, and the rest. And because, the cancer will come in such a multiple positions and organs, there is no chance of survival. And one of the reasons, one of the things we're just pushing with Enhancement Units to be spread so rapidly in the coming months, (4:48). to be ready for this, that can change saturation of Calcium in the body. And I've just... asked the... as I said, the Chinese team and the Keshe Foundation team, be ready for the mass productions to come in, much earlier. To be ready, for these cancers to come, because in the Enhancement Unit, we can change it, even if it comes in multiple cases, because there won't be enough chemotherapies, they all die, it's as simple as that. It's not metastasizes anymore, it comes all in one go, liver, kidney, breast, lung, or every organ, because Corona has solidified Calcium. We just need one of them to trigger, the rest will go. When we, give you, information it is as precise and exact as it is.
What's the second question? [Spanish] (JW) Why does the virus calcify?

K- It has the energy. Virus is an energy pack, and in its structure has the energy equal to the Calcium of, salt of Calcium. Which means, it's got a gravitational pull, but it has at the Inertia level... Which means... You see in the world of technology of the plasma, the knowledge is very clear away... (4:50).

(RC) You broke up there, Mr. Keshe. We couldn't hear the last sentence. (MK) White board. I am trying to get my white board back. (RC) Okay, maybe if Flint stops the sharing, it might help. Are you... able there Mr. Keshe (EC) Just wait one second, Rick... Mr. Keshe dropped out. (RC) Yes, I see must have to restart there. Okay bear with us a minute, while we do some reconnecting. I hear Flint has a song prepared for these intermissions, are you going to sing for us, Flint? (FM) A... (AB) Actually Rick, I can answer this question, as I... as much as I know it, until Mr. Keshe, comes. You see, in the Universe if the field of everything exists, you can make from... If you create the field of banana, you can create banana. If you create the field of gold, you can make gold. So, in the center of our cell... (MK) Hello! (AB) In the center of our cell, the energy of Calcium is there. So the field of it, the back... why... what the virus does, virus to create that field change it to the solid Calcium. The inertia of the Earth, create the Calcium. So the virus have become like an entity, who can make Calcium, and it's... the fields are available, just like that. (MK) Yes, I'm back. (AB) Mr. Keshe, I was explaining about the Calcium. (MK) Yes, I'm back. I'm trying to find... I got dropped off from one system to another, and I lost everything. So, I'm trying to find my code down the line, and... What were we talking about? What was the question? Calcium creation in the cell, how it... does it become Calcium in the cell? (MK) Ah, the... The... How Corona brings Calcium, Yeah, just a second. I have to find my... my code somewhere else...

The calcification is very simple. (4:54). If this is planet Earth and... I'll put it this way, if this is the fields of the earth, in the interaction with the fields from the Sun, they create packages of energy. These packages of energy, internally have the characteristics, because they came partially from the earth fields, connection to the gravity and magnetic field of the earth, because they're created from it. It is inside, if you understand the structure of the plasma. They stay... if this is lets say, the boundary of 5 kilometers, they stay as still energy packs. Lets... this is 1000 kilometer in the space. This energy field will pull them in. But don't forget, they had a fingerprint from the interaction of it. Because the plasma works like this (draws a spiral). So fingerprint of the gravitational field of the Earth is already embedded. And then, it has a fingerprint of the gravitational field of the Sun embedded. But now, this is the total, that's the seed, that's the principle. So when, this takes, gets pulled in, to go in... at this point it still, stays as a pack of energy. Here on the surface of the Earth, we have Inertia, which is the gravitational field of the matter of it, plus all the matters, which are built inside it. Because the matter side is very, very small layer, compared to the whole lot, but here is the liquid part and the rest of it. So, the way this... the field of the Earth, (4:56). gravitational magnetical, goes beyond. The strength of the field of the Inertia, which is an atomic mass ratio of the gravity of the matter state, is very, very thin, runs maybe about few kilometers, 2 to 5 kilometers, 10 kilometers, depends on what we gather and the fields it goes up to 25 kilometers in cases.

So once this energy enters this zone, the Inertia of the earth converts it from energy to matter state. Now, here was field strengths of the nitrogen, but when it gets to the atmospheric condition, lingers on and changes, to matter, with the rain comes on, we receive nitrogen. That's why we have the growth of the plants, as they say. So if you are here, you created the magnetic field strength of the sand, of the desert, still stays Inertia,

but here, because the strength is the desert, here falls in, as the sand of the desert. This is how the layers of the earth are created over billions of years. So earth has an Inertia, which converts the energy to matter state.

The same is with Corona. The Corona enters the body, when it comes to the cell, the center of the cell, has by inheritance, Inertia field strength of Calcium, because in the bone were came out, carries it. So this virus now, sitting around it, having that energy, converts this one to a Calcium. In a way, on earth the Inertia sits outside, with the virus energy it sits inside, and it converts it to a Calcium. So simple. (4:58).

We do it on a daily basis on earth, every second, trillions of energies changes to matters. It rains, you say, where do you think the rain comes from, most of it comes from the ground? Most of it is created in the interaction of the fields. And some it radiates back into the atmosphere of the solar system. And so, this thing, has a property to encircle, and the field strength of it, is of the Calcium strength of the field. But this is field. And now, what it does here, it does here in reverse, and calcifies, it becomes matter. And that strength we know Calcium in conjunction with the salt of it, becomes solidified, that's what we have in our bones. So, it has an energy.

This was very easy. the first pictures came out of Chinese to me, I knew exactly where it was, how I had to design the system. But I had to design the system, that it fits into the whole structure of nuclear atomic structure, and the plasma system at the same time, because we're dealing in a matter converter, which becomes matter condition. That's why when you die, your bones stay. And the rest disappear, because it has the capability of Inertia in it. Calcium is the only thing which carries the Inertia of the Calcium to matter state. And we understood, the minute I saw this with the experiments, and the experiences we have from the past, I knew where the Corona is going. And it was calcification, so... We saw it with the lady from Iran, 10 to 15 years ago, how calcification happened, so it was very easy to... to understand it. And to be able to track it and know where it goes and what it does.

When you understand the technology and the knowledge in full, you can relate it very quickly. One of the reasons, (5:00). I explained this to our doctors last night, to our senior doctors in Iran. One of the reasons, if you remember, I said in the Cup of Life I've produced a condition of Magnesium. Do you know why? I explained to you, Magnesium and Calcium. But why did I choose Magnesium? I knew the only way I can isolate, this seed of the, what we call, Corona, when it's calcified, is to isolate it. When you isolate it, it becomes a GANS on its own, the way you do. It's energy, I can extract it.

The knowledge I've given you in this Cup, will take Man thousands of years to understand. When you have a cancer, and the seed of the cancer sits and doesn't grow, it means there is no attachment of, or very small attachment of the Magnesium. Magnesium is a thread which connects things together in the body. And for me, if I could expand this thread, I weaken it, I make it to a GANS. Here, the Calcium is... is a matter state. When I add Magnesium to it, it's on its own, I get it a GANS and I can move it. Doctors don't even understand. Scientists don't even understand this knowledge. This is why you say,

can I mix the CuO from one cup and ZnO from another cup I get the same? No. Because this Cup, I specifically explained the Magnesium. Because you know, your bones, cannot connect to your tissues, your legs, your muscles. They need the ligaments. The ligaments is a tendon which keeps these together. (5:02). This is a cancer, the bone is a cancer and body has developed the technology for it, to hold it, float it, and it pulls Magnesium. I ?? (Azar interrupts..)

(AB) Mr. Keshe, one of your teaching you said the... if the virus, Corona virus is high pack energy, so what really kills it is the Cu GANS. But when we go to space, there, a lower energy pack, with that case with use CH3... So what the Copper GANS... (MK) No, no, we don't use ... Cu GANS. (AB) What the Cu GANS, what the Cu GANS acts like here? I mean what is the purpose of Cu GANS here? What is mechanism of Cu GANS?

(MK) The Cu... the Cu is your cell, is your tissue. It has connection to your tissue. This... this virus does not hang in there on its own. It has connected to a muscle tissue to a cell, which has Cu in it. And in the lung (break in audio..) , .. you have... you see if you understand it in a simple way, you have a Cu plate, you Nano-coated it... Yeah? And then when you, Nano-coated it, you freed it, it became a GANS, yeah? Now we can use its energy, Now you can play as an energy with it here, as a matter state. Corona, makes it to matter state, I go through the same process. I Nano-coat it, I isolate it, I make it into a GANS, and I can take it out. So simple. I go through the process of GANS production in the cell of the body of the man, through different apparatus, different parts of the water you produce. You don't understand this, so it's no use to explain. I dismantle, that's why we keep on telling, you use it every half an hour, because you dismantle, you take out, then there is no more energy for that, you need to take out. (5:04). Millions of cells are converted, not 1 or 2.

Knowledge is very deep, but, you don't have the people 99,999 % of the Knowledge Seekers, don't have, and secondly, there is no... these things needs to be taught over centuries. We came with the knowledge of Creator; this is just a game to play. You go and make the plates and make the GANS, but this GANS needs to play with another GANS. But the Corona has made a matter out of it. Now I have to do the same process of GANS making in the body of the man, so once I do that, I need to create an environment that it is on its own. It's like a water floating. I have to create these tentacles, with Magnesium, to let it float, to keep it there. And then, when it's there, it's an energy. Then I can interact with GANSes I put on. It's very strong, it's a Calcium salt. You carry CuO, ?? carries Zn... The difference is very, very little. But the Calcium salt in a specific condition, is heavier than your Zn. That's why most of you, when you produce the first Cup it's a white Cu. Exactly like Calcium. You have to understand the knowledge.

(AB) That's... that's beautiful Mr. Keshe, that's fantastic. (5:06).
(MK) I know I am beautiful, I know. (AB) Mr. Keshe this is so amazing, you see... You see... You taught us to go from matter to the GANS, to the energy, plasma energy, now here, we're using the same system here, you dissolve the matter to GANS and energy and release it.

(MK) Of course. I'm master in my game
(AB) Mr. Keshe, this is amazing, it's just fantastic, right. (MK) You are a doctor, you understand.

(RC) Let me throw in some other little factoid that I ran into recently that seems to tie into this, which you might find interesting Azar, as a doctor, that only a couple of years ago doctors and scientists have discovered the largest organ of the body. Now we always used to think, we were told that the skin is the largest organ in the body. But no, there's a larger organ of the body than the skin. And it's the, what's called the, interstitial fluid. Which is the fluid in between all the organs, and that flows through the whole body essentially. And it's very critical as to its pH, and is... as to its functions. It's essentially the sewer system or the... the area around the cell that Mr. Keshe shows here. And Mr. Keshe mentioned the removal of these of the toxins, or of the what's left of the virus and so on. So, that would be part of that sewer system you could say that would remove that, and be part of the getting rid of through the kidneys, through the pores of the skin and so on,
(MK) Yeah, but this removal system is a recycling system too. If the...when they take it out, and another part of the body already needs that energy, they know where it goes.
(RC) Exactly, that's... (MK) It's used and this is what... (RC) Mentioned... ... (5:08). this is what we explaining to the Iranian senior scientists yesterday. And he was baffled, they couldn't understand. I said, I take the energy from the virus, when I take from it, and then I use it in the other places. That's why the recovery with this technology is very rapid, because we don't waste. We work exactly the same as the body in this technology. So...

(AB) Mr. Keshe, Mr. Keshe, on the same note, I can...I can ask you this question. You remember when I asked you about the... about the viruses, like the soul is not afraid, you said, what are you afraid of? Think about love, do you feel the love? So, you know, thinking about that and then there was something about... a story about blood putting on the door and... at Roman time. So thinking about that, if we go to space and there are tons of viruses, and viruses are just like, an entities. At the same time in Universal Community, when we go there, whoever needs something, the stronger gives to the weaker, there is give and take. Nobody takes more than what they need. So when you see... when we see the viruses, the pack of energy, maybe we can give them what they need, or they can give us what they (we) need. We live with them. So maybe, we have to learn this here, how to interact with them. That's the beautiful thing we can do.
(MK) You see, I... (AB) Because we can... we can look at it as love. I mean, you don't see the love; I don't see the virus. So, I can interact with it, as just like love.

(MK) In a way I used the word 'love', because it's the easiest way for mankind to understand. Because when we fall in love, we just give, we don't expect to do anything. You know, we go and buy the chocolate. We go and buy... We don't sit in the house, "Oh, I'm in love, come and love me," huh? We go and do things, we cook for the lover, the... what we love. We give everything. (5:10). And when in the terminology of the universe we talk about love, it's not sex and jumping in, and doing what, or wanting something. It's a giving. Is unconditional giving. You take what you need, even you are a virus, you need that, otherwise you won't come to me. And this is what... that's what's many, many,

many, many people around my work, have a confusion with. I adore women. I adore... I love women. But in the essence of knowledge I give, the love I give that, when you love a woman, especially in any shape or form, is, you give to them that they give their knowledge to their offspring's, and they can create that condition.

And we have it within our power, as Messengers, to do this. We enlighten the soul of the creation. You call it love, and whatever else you want to call it, and it has to be given freely, not to be asked to be given. When you ask to be given, you never receive, it's imaginary to you. When you are given freely, and it's accepted freely, it brings the elevation of the soul, and inward, can lead to the creation of the children of the soul, which man cannot understand. This is beyond your understanding at this moment, but maybe if we don't lose the Internet in the coming time, I teach you. Children of the soul does not... physicality... does not need the physicality of the action of the intercourse. They just keep... This is what the virgin birth was explained to. And the maturity comes when they both give, and consent with, and the creation. It's the same as the two Cups. You give two Cups with two soul. What do you see in there? (5:12). The child of that, the support of that soul, that Cup, Cup of Man, is a child, which is the soul of the man, who created it, because he needs it, otherwise he doesn't create it. In a way, you create a condition to save for yourself, "I made thee, that thy might create children, that they may love me. That by loving they give to me, that I can exist." It's the writing of the Baha'u'llah.

So, what do you expect, if you don't understand the theology and the reality? You don't need to create. You can create children of, what we call soul. And then, if the two consent with the acceptance of the... like the Inertia, I explained, can give it the dimension of physicality. It only can be done with the prophets of God, with the Creator, and no other time. And this is what you got to understand. And people are scared, "Teach us the thing, don't talk about theology". Because now you have come, the creation is the soul, is the theology, is what you are created of. And like before you want to deny it? Deny it. It does not go under the carpet, it still carries on and delivers what it's got to deliver. This is what I said years ago, "Hello friends, we meet after so long." The understanding of the creation of the soul, is to give. You are not there to take. This is the worst thing for man, when he understood gravity. He thought it's... he can grab everything. In one of my papers I explained gravity as 'grabity'. Grabbing. Not pulling to come. You have to come as you like. (5:14). But man has changed the world of 'gravity' and 'grabity' together. He grabs everything, kills everything. And that's why he has no soul.

It takes a long time, even for many I can explain, months about just this picture on this table. Man is not ready for the knowledge of the universe. But a few will take a pieces and then they claim they are, whatever. We've seen one in China, he's called Fanzo, he's stolen everything from everywhere, "Now it's my knowledge and everything." And soon, he'll be doomed with it. He'll go with it. And he's one of those, who betrayed the Foundation. You will see what happens to all these people, one by one, follow them. You have to understand many, many, many aspects of creation in the dimension of the universe, then you understand the body of the man is a copy of the it. That's what I keep on saying, we do 5 or 10% in health, or medical, or health application, but through that

percent we understand the work of the universe in 90% of the work. When I have such a universe, and I see all the interaction of the universe, because I understand, and I've seen it all, why should I go and travel the whole universe? I've got this body here, does everything exactly like a universe, a galaxy, and in essence creates the shape of the Creator through its soul. So, what does man understand? Not much yet, and claims to be the king of the creation.

(AB) Mr. Keshe, if... if the med..., if the western doctor understand this knowledge, (5:16). I mean holding the position and the cars and homes, compared what they gain, is million times more beautiful. They become magician of the universe. I mean, can you...
(MK) Aaa, this is why we are teaching you, that no one becomes a magician. (AB) Because you become magician. I mean, I mean... If you remember, if you remember there's a Ibn Sina, the old time? They thought he is a magician, because he had the new knowledge. But this is the... you become magician. I mean, they don't understand you become million times, you go to the kingdom of God, I mean, with this knowledge. It is unbelievable.
(MK) No, the kingdom of God has come to man. Man doesn't understand. (AB) I mean it's so stupid. (MK) It's life. Paperback.

There's something I forgot before I go. I have to check. Is somebody on the screen? Yep, she's still there. Would you like to come and give them the gift, Ella? If she's still awake with the Chinese eyes. (EC) Yes. I will give a glimpse of the gift, and then the gift will come in a bundle. (MK) Yep. Go ahead. Take over. (EC) Yes. But first I would like to just mention one thing. Today will be the second day, when we will have a challenge, that we have created in the Keshe Foundation. This is called the "100 lines" challenge. What does this mean? We are trying to get the words of you Mr. Keshe, from these teachings, as soon as possible out for the people to read them, to translate them. To help the communities to get the materials not only through voice, but also through words written on paper. And so, we are organizing ourselves in a team of Knowledge Seekers and everybody that is willing to contribute is welcomed. It's quite an easy approach. We don't have much rules, let's call them. Everybody can do this work on even their phone. Or they can do it on their computer, up to them. And the challenge is like that. As soon as the workshop finishes, when we have the auto-generated subtitles, we work in a team and we each pick a batch of 100 lines of workshop. And we just correct the words, in those lines, that they are exactly as you have spoken them. And add the pun.. punctuation, because of course this does not exist in the auto-generated subtitles. So, basically last week, we managed to finalize the initial subtitle by Saturday. Early morning Saturday. So, in about 30 hours we managed to do that with 7 beautiful Souls. This week we estimate to have about 12 Souls participating, but if anyone wishes to join, we will just put the link of the Telegram group, where we have this activity. And we are welcoming everybody that wishes to... to participate in this challenge. So, that was just one of the fun things we are trying to make.
(MK) In a way, transcribing using the already automatic translation. Just correcting it to fit the words? (EC) Exactly. (MK) Okay. Where do they go? Where do they go, people who want to help? (EC) Just one second. I will put the link on the group chat. (AB) And Ella, why do you correct it? (EC) This is up to everybody's abilities and capabilities and

systems that they have. So, if you are on the phone, let's say for the Android phone we suggest an application, where you just open the subtitle file, that we drop. You go to the lines, that you said, "I will take, let's say, from 1 to 100."And while you listen to the YouTube recording, you simply correct directly on the file... the portions, that you see that they are not matching. If you are on the computer, you have multiple options. You can do it with subtitle software, which we have links to the proposal of the easiest ones but if you are not the computer savvy and you still consider those very hard to comprehend you can do it in Notepad. So it's basically just opening a text file and just reading while you are listening, and correcting where is needed. Yeah. And in the group we do offer support from those that are already experienced in doing it, support for those that do not know to do it yet and they are willing to learn. So we help each other. Okay, I'm gonna post the link. Just one second. There you go. And this... this group on Thursdays is doing this hundred class challenge. And during the week if... if the persons have time then they also pick one workshop by themselves and then they work at their own pace, on correcting the subtitles... subtitles for that workshop. And then they simply send us back the SRT file as soon as it is corrected. Once we have these files we do pass them to the more experienced Knowledge Seekers, lets say. (5:22). Those that have been with us for years and have a little bit more practice with the subtitles and then there is a final review for the words, just in case that the words were not properly understood and they were corrected in a different manner. In a hurry. But this doesn't stop us because the subtitle we do today will be posted on the... on the YouTube so it will be immediately available to the people. So this fine tuning for timing and for picky words is done a little bit later. But it doesn't stop the process. Okay.

And another surprise is... I know that many of you are asking where is KF Plasma Times? What is happening, what happened with the publication, why don't we see the editions? And we want to apologize for keeping it for so long and not having the time to deliver to you these beautiful magazines. Needless to say we did have a shortage of resources to work on these materials, but... now we have been receiving help from a beautiful team of Knowledge Seekers and we will show you today the new design of the September edition of KF Plasma Times, where we left off. And in the following weeks, probably we estimate, we have good feeling that this month we will just release the whole bundle of the past KF Plasma Times. So, I'm gonna show you the design...

(MK) Where are these people from? Who are helping you. (EC) These beautiful souls are from Iran. It's a team of designers that would like to share the knowledge through inspirational designs. (MK) The journal has taken a totally new image? (EC) Yes, it has become, how we call it, way more professional. (MK) OK, let's go. (EC) OK, I'm going to share the screen, and if I do everything right... OK, let me know if you see screen. (SC) Yes (MK) We can see you. (EC) Yes, thank you (MK) This is a new looking you, is it? (EC) Yes, this is the cover page and we did change a little bit the way we represent also the cover page, the graphics of it. And like I said it is the September edition. We... we did have the articles mostly prepared, it's just that we did not have the time to review it and put it in the design. So this is the process that we are going through right now. OK. So, this magazine the way we decided to make it now it will also be ready for print. So in any case that we would like to share these publications printable we can also do this and it

will be in the proper formatting. (MK) But there is one point, that from this month, April will be issued and one from backlog. So, the every month will go ahead, but the backlog will be covered by four or five months, am I correct? (E) Yes, but anyway we do expect that by the end of the month we finish all of the backlog, so when we will release the new edition it will be just on time. I hope (MK) Yeah. (EC) So I'm just gonna go very fast through, just with the headlines and then when they would be published I will ask the team to inform on all the channels, that people can go and read the full articles. Inside the magazine we have a short introduction about who we are, the team that is working, credits and attributions, and some explanation about why about what articles are... contained inside with the table of contents as well. For those that do not know where to find the back editions we have included also the section where people can go and download all the previous editions that have been published from the KF Plasma Times.

So like I said the last one was August 2019 and you can find the link where you can go to download it. As articles we did keep our categories so you will see articles from the Keshe News, which are mainly taken from the Knowledge Seekers Workshop. And this is why I thank so much for the team of subtitlers that we put together, because their transcript, their subtitling will help us in the gathering the... these articles that we put in the Keshe News, KF News. So we have an article about the announcement of conferences that happened in September because in September we started with the Austrian Conference, the first conference of the series. And... one article that was made regarding the origin... Origin of teaching where Mr. Keshe has explained more in details the process of Creation in... in the Universe, to expand on the knowledge. In the same magazine we also explain a little bit the meaning of the logo of the SSI. As Mr. Keshe also explained it in one of the teachings why it was designed in the way it was designed to represent the Spaceship Institute. And in the section of Question and Answers, as we got used to up to now we are having the questions which we are extracting from the Knowledge Seekers Workshop. Questions that were put by Knowledge Seekers and their answers that were given by Mr. Keshe. A section for KF SSI Education, in which the KFSSI Education team is sending their message regularly to the students, but also to the souls that would like to join us as Knowledge Seekers and as students in the classes. And as you know we did have the... the event conference in Brazil and the event was announced online so we have a section in the magazine for it as well. and in the Media Coverage, we quoted the articles that were published in media about the activities which are happening around KF and other legal entities connected with us. In the Language Community we did have an article regarding certain activities that happen in the Portuguese community with the occasion of the conference that was supposed to happen afterwards. And within the Plasma Scientific Journal, we have 2nd from the series of "Plasma to the Rescue", for the processing of thyroid nodules. And this was done by a Knowledge Seeker in Poland. So we have explained the procedure and the results in this case. In the Testimonials section we have a nice testimonial about the... the Pain Pen and its effectiveness in the application. And in the Join Us page again we are welcoming everyone to submit their plasma scientific articles. And with this occasion I would like to say also for example in the last conference in Mexico conference we did have the pleasure to see in the presentations from the Knowledge Seekers, from the community a lot of work that was done in the Spanish community. So I would like to remind all the participants that were at

the conference, if they would like to submit their work with us and have it published in the KF Plasma Times then please do, because your work was really, really beautiful. And the back cover of the magazine is presenting the electronic versions of Mr. Keshe's books. So if you haven't read them yet, if you don't have them in your collection just follow the link and this is where you will find the... the books with more information about the plasma science. So basically these were just the headlines, the articles are inside and they will be available for reading. And thank you very much for waiting for us.

(MK) Thank you very much Ella. And as we see a new shape, a new dimension, and new groups have added to the foundation. It's become a big family, Chinese are holding one side, Iranian the other, the Americans the other side, the Europeans and collectively we are running a beautiful structure that we are sharing the knowledge and we see how and the way, (5:32). the knowledge is shared; unconditionally and freely. And I hope mankind will reach to this point of maturity. And I hope through it, we'll find peace. And we'll see it and wait for the, what we call, the time to come and that man reaches that point of maturity. Will it come through losses or will it come to a strength or would it become through an uprising of the Soul of the Man. It was... I promised one of the Knowledge Seekers last night, I show you how to... not to depend on the medicine from the pharmaceuticals. And as you know, medicines are becoming short and gradually will become twinkling. And our knowledge has to rise to replace these. And most of the pharmaceuticals products are in a matter state, not understanding the position of it. The way we combine these with the Soul of the Man there should be no remedy mankind cannot make for itself as I always said, we build on the knowledge of the past, we don't destroy the knowledge of the past. Many of you depends on pharmaceutical things that is very advanced, decades of work has been done for a specific condition. Where with putting these medicines in these Cups of Life you transfer them into the plasma condition of them and the knowledge because of your GANS top layer, having the amino acid will convert it to the energy which is needed; and if it's needed and what it needs to adjust within you. (5:34). And then drink from the cup. And most probably if your soul agrees with the condition, you will see remedy. If the change does not come, means the condition is already accepted by the soul. You're trying to change the physicality and there is a reason for it, which it will not happen. Very, very interesting time coming up.

Knowledge of the man is not all useless. It brings many facets to the Universal Community. But man has to understand. Thank you very much for today. And we congratulate those who manage to bring more for us to add to the knowledge. And hopefully... Hopefully if we're still here in time to come, there's a lot in coming times, that we'll share more. Thank you very much. Thank you very much the whole Keshe Foundation team worldwide. And please understand, we are this time in it, all together, without the race, religion, color, nationality, flags and colors of the flag. Virus is touching all of us the same, taking life, dear ones to us, the dear ones to many others. Just remember, try to reach the Soul of the Man, and maybe you don't even need to make the Cup of Life.
Thank you very much. Thank you very much, Rick.

(RC) Thank you, Mr. Keshe, as always. (5:36). OK are there any other announcements before we end today's workshop? We do have the testimonials meeting coming up on Monday at... what time is it? I think it's at 8 pm. Central European Summer Time. So we can look forward to that, so bring your testimonials for that meeting. It's a public meeting of course. People can save their questions that they have here, for the next workshop as well. And we do have the One Nation, One Planet, One Race for World Peace also coming up on Tuesday next week. OK, well thank you everyone for all your questions and participation today. And see you next time around. This has been the 323rd Knowledge Seekers Workshop for Thursday, April 9th, 2020.

324th Knowledge Seekers Workshop April16, 2020

* New Cycle has started for mankind, New dimension of teaching
"Inter-atomic Fusion" soul encircles physicality, Cup of Man vertical
Bloodline of Christ, daughter in France
End of secret rulers, "elites" of planet

ENGLISH TRANSCRIPTION:

(this was copied from computer transcripts rough edited)

(:06). (RC) Hello everyone! And welcome to the 324th Knowledge Seekers Workshop for Thursday, April 16, 2020. This is a broadcast of the Keshe Foundation Spaceship Institute Education Department. And part of the Public Teachings in English. My name is Rick Crammond, I'll be one of the hosts today along with Flint Muhlhausen. And of course we are joined with Mr. Mehran Keshe of the Keshe Foundation. And I believe he's ready to speak in today's Workshop. Hello Mr. Keshe!

(MK) Yes... Good morning, good day to you, as usual, wherever and whenever you listen to these series of Knowledge Seekers Workshops. We welcome the honorable members of Universal Council and Earth Council as we take a new dimension in to the Journey of Man in Space. There is a couple of things from the past which I would like to clean out and then we start a new cycle of teaching. And I'll explain to you step by steps where and how we will go. As you know there is a strong evolution of work in Iran in respect to the Iranian Corona program. (:08). And the Iranian team has made an offer to the world Knowledge Seekers (KS) and those who want to help with their people across the world or in Iran. I sent you a link, a picture, Rick if you can put it up. The KF has appointed this organization in Iran which is direct access to and delivers all the materials for One Cup One Life. This is everything you just add water to the Cup and you start. What we done, is, this is not sold, this is, you make a donation, how many lives you want

to save. Very simple, you decide, I want to save 10 lives, 100 lives, you make a donation, or you make a payment to this company, and the company delivers, with a full history, who received it, the family, the person, and you see the report, from the purchase of the material, to the delivery, to the person. We took this up, because the process across the world is taking shape in a very harsh way, and a lot of people don't have time. You can literally donate a life. This company is independent of KF, but has been supporting a lot of work in Iran and has covered many people. They have the capability between 5 to 10,000 Cups a day, and they can meet the demand. So in a way, this is not the same, if you want to save a life, how many lives, and it's their job. They will do it. We have never done this, for this crucial time in Iran and across the planet, there is a need for, the totality in the shape of as it is. (:10). This is part of the work the KF in Iran has taken up, and this company has supported the work of the F deeply, and in response, they have offered this directly, the material comes from the mines of Iran, that's why .. and they are in the center of what we call the industry in ?? and they can support everything, even Nano coated plates, that can help people to immediately jump up. So you decide how many lives you want to save and you can pay for it, they deliver it to wherever you want, if it is outside Iran ?? packaging has to be paid for, in Iran it's free. On the other hand we go back to the teaching. If you want to remove this it will be okay, Rick.

The whole process of the teaching has come to a new dimension, and I said in the couple of teachings since Monday, Keshe Foundation has laid out and set out, and is going through the, what we call, preliminary stages of delivery into international arena, for what this is, the physical matters of all these conditions, how they can overcome. We announced weeks ago, we saw Corona in the head, in the brain, in the organs and in the skin. And it took the world community to reach some weeks later and confirm it. So, in a way, we are far ahead of the present time. And as we are far ahead, in so many ways, to us, the situation with the Corona is over. (:12).

We are looking what Corona has brought and how we can develop to the next step. Corona showed us our weaknesses. Corona showed where we have not managed to cover ourselves. Corona brought us indication in the lack of education, the knowledge of man, and what they called, "control of the emotion" and the "use of the emotion" to the benefit of some, who wanted to take the nations for ransom. We saw the misconduct of Gates in calling himself, pre-shooting himself, that he'll be the World Leader and he will... uses the vaccination to control the world. We saw the first shout on the bows of his presidency. In a way, as his Excellency President Trump sank his boat. We knew there is a problem, as some 2 or 3 weeks ago the government of United States canceled the 10 billion Microsoft contract. And, on the back of it, we saw the indication of president Trump yesterday, ignoring Bill Gates and his threat, that he'll release the vaccine in November, when he shows he'll become the president on the back of another the president, a "leach life." Then, this comes to as we see legal actions to strip the assets of Gates Foundation, for taking humanity to ransom. This is to become. We will see this. We will not be short of, in 2-3 years time, seeing Bill Gates imprisoned for life with his wife for crimes against humanity, and genocide. This is actually bold, rolled, by what President Trump decided to do yesterday. (:14). In a way the humanity has been taken to

ransom by one criminal organization and they thought they are head, and dictate. We'll shoot another arrow into this ship to make sure that it sinks for good.

Teaching of today looks post-Corona and what this means, is we have given all the knowledge to the governments. It's for them, how they use it, and how the Keshe Foundations around the World will bring it to be used. We have seen the recurrence of Corona in a different shape, "Coroning" millions more lives in China. The statistics and security reports from United States confirms 20 million deaths in China, from Corona. This is not anymore Keshe Foundation data release, but confirmed by the National Intelligence securities of United States that they now confirm, China has and could have lost in excess of 20 million in the first cycle. We expect the second cycle in China to bring another 30 to 50 million deaths on the table. We have curtailed the progress and the death in Iran. And we are supporting all the Iranian Nationals across this planet through the Iranian setup. We have done this, and a number of you have helped Iranians across this planet as they needed help in past few weeks, as the true work of One Nation has taken shape.

On the other hand, what will take shape is very simple, we have to go beyond and look where the pitfalls, (:16). were the mistakes, and where we have to be vigilance, has to come from this incident. We are not looking on the political and geopolitics or financial politics of it. We are looking it, as a human race. If you look and if you understood the totality of the teaching in past few weeks, there is one clear indication, and that indication is, we are all passengers of this ship called, Earth. And in so many ways, as we are the passengers of this ship, our defenses were not strong enough to stand an invasion of the virus called, Corona. This showed a lot of weaknesses in our security structure of this planet. Security structure and apparatus how mankind will protect itself from what we know as an outside external energy source, known, we call, as a virus. In a way, the man's spaceship, the mother ship, has been taken to ransom by an outside man-made or whatever, to ransom. This ship needs decontamination, this ship needs clean up, this ship needs to understand how to handle this virus for it to be able to survive. (:18). There is no difference between this (spaceship) and this (earth) in the space of the universe. We don't look at how our shields of protection, our bodies was opened to this. You are going through a post-mortem to see how we can set systems, that by setting up these systems this will never happen. As in time to come, these spaceship of the man return to the mother ship, they'll bring many Coronas. We have to learn from this how to set up the conditions that this will never happen again. Otherwise every time mankind in the coming months and years sends a ship to outside, can bring many Coronas with it, back in. We have to learn a new way of decontamination. We have to learn a new way of protecting both ships, in space and the motherland. We got to look and where was our weaknesses, what defense technology we can put in with understanding of the new Plasma Technology, that this situation will never happen again. The war of the man uses bullets and guns, the wars of the Space uses viruses and energy packs. This virus showed the body of the man is too weak. (:20). Or man has not learned a way to protect himself from this condition. Man has two choices. To go for a physical protection, like GANSes and the rest. Or man learns the second choice, or the first to us, the transition of the energies.

What does the transition of energy mean? At the moment we have given the technology of the GANS to the man to make some preliminary protections by drinking it and covering itself, but in the space we don't have that facility. In space we do not have such opportunity. In space we have to understand the essence of the creation to be able to stand such an insult on man. These kind of assaults will destroy the humanity, if every time a ship takes into space. I raised this question years ago with the NASA, years ago with the Russian Space Agency, and, in so many ways, has never been understood fully.

We see a hidden rise of viruses since the man took to the Moon the first time. (:22). The cycle of viruses were entered into the Planet through the first Space excursions. Don't forget, man was looking for a dust on Apollo, but viruses were attached independent of the time and space. Introduction of new viruses into the knowledge of the man came with Apollo trips. Now with these new excursion in the deeper space how many more will bring with us? As I said, we are passed, is a post-mortem of Corona for Keshe Foundation, and we are showing you the weaknesses that you find the solutions, that this will never happen. Maybe there was a coincidence, good for man to have the Corona to understand the energies, which he cannot control, to find new ways that makes him ready to become part of the Universal Community. You have to understand, there is a hidden agenda for both side, if you take viruses back into earth, what viruses man has that can damage the Universal Community, and unknowingly man will take with him into space? When the white man went to America many indigenous people died of the simple cold, which the white man brought from Europe. (:24). They never had it, they never had immunity to it, and it killed many. Now we have seen the game one way, what about energy levels that man will take with him without knowing, and he puts in danger the life to the Universal Community?

The post-mortem of Corona brings out many, many facts on the table for human race. In one way, the human race has to make sure he is in total and absolute clean condition, both on exit and entry. Both into mother land and onto the ship. We are not going to travel the space of universe just sitting in a ship. We are going to travel the space of universe by landing, seeing, transferring the soul energy to physicality, and return. And this process, we have to stay clean. Physical transportation will be part of the process of the pleasures of physicality. But in time man will choose in prime conditions and the prime process of the transfer of the Soul of the Man and transfer of the Physicality of the Man. The worse of the physical conditions will force man, (:26). to understand in more depth, about how to protect himself in the physical and the soul level, that on the return, or entry of the virus onto the planet, mankind can protect itself in one go.

In so many ways, the post-mortem of Corona brings Keshe Foundation Knowledge Seekers to one point. And that is, do we put the Soul of Man to be encaged by the Physicality of the Man. Or the Mankind will understand the power of his soul and encircles the physicality through the power of the Soul of the Man? In this process the physical life will not come to an end, as the strength of the Soul of the Man will protect the physicality. As I've said in the recent past, I wrote the paper to explain this years ago, it's called, "Inter-atomic Fusion." (:28). The inter-atomic fusion paper I wrote was not

about the energy, but was about the time to come when man will take the physical condition of his body embedded within the circle and the strength of his Soul, that nothing, no Coronas can ever touch. I wrote the paper years ago, for the time when the man is ready to understand, and now you understand the essence of the paper. That time mankind could not understand, but now you understand why. Extending the strength of the proton, that it brings in the electron, in its boundary through the energy transfer, and protects it as an independent entity. Inter-atomic fusion is in a way, expansion of the Soul of the Man to interact with his atom, with his own confirmation of creation, the physicality of the man to bring him within control. In other word, we call it a mother hug. When a child runs and is scared, the mother opens the arms and protects the child, hugs him and holds him. And in a way, the mother, the Soul of the Man, has to be able to do that with the child which is confirmation of his existence of physicality, which is the body of the man.

The post-mortem Corona brings in a new knowledge. I set this out in a very slow steps some 3-4 weeks ago. Initially, I brought it in as One Cup, One Life. And I showed you this is the Soul of the Man. (:30). Then we brought you the second one Cup of Life, which is to do with the physicality of the man. Because this is only way I could bring you the knowledge, and in a very, very clever, easy way I introduce you the 3rd cup, what we call, the Cup of Man, which brought in the embodiment of the 2, as you thought. But in fact it brought in, the first and the direct evolution in the knowledge of the science of man for evolution of the Soul of the Man. Many of you, you needed a test run, to run your car to see how it runs, to see if it works good and if it can respond. And I gave you the Cup of Man. Because it brought to you, according to your intelligence, something which referred to your physicality and your pride, MAN. So the teaching has become very simple, if you came across and you became part of it. We teach you how to reach your Soul, and in the process, protect your physicality. In a way, they can leach, or you can come across any, any, energy packs. If is within the Soul of the Man's strength, the physicality will survive. But remember, he said, "I made man in the image of Myself," which is that image within the center of the Soul of the Man. And when the soul acts, is an image and the strength of the image of the Creator.

The process now comes how you, as the last man standing, can reach and trigger this. I gave you a test run, and we call it a sandbag, to run, to test. Last week in a very simple way I explained, and in the Iranian Teaching last Monday, and in the Universal Council Teaching on Tuesday, I set the scene for this to come. In this process, we showed you how to connect the physicality's, and how to connect the souls. In so many ways, as I said, partially this... now you have to understand. And in so many ways we have connected the Soul of the Physicality to the Soul of the Man. In so many ways, the Cup of Man is a reference point, that if you can, in a full understanding, connect to its totality or to its individuality, you will find a common strength, which in total will give you what you need. In this process, now the physical body of the man is weak and is vulnerable to forces, which in totality, vulnerable to... very, what you call, abuse.

What do you do? You bring the physicality in the realm of the soul. And you use the Cup of Man as a reference point for the confirmation of physical life when you want to return

back to it. The gravitational-magnetic field of the Cup of Life is your reference point for your physicality and the soul. That once you trust your soul to take dimensions of the existence to overcome, (:38). what we call, the condition of Corona for example, you move out and then by changing the strength of the fields, understanding of the totality, you move back in, and you take a new physical dimension in respect to the reference point you left behind. It takes less than a second to overcome the Corona. And in fact, it takes less than a second to overcome any viruses you might have picked up in the space. It's a washing machine, it's putting you through a laser clean-up of your own soul. In so many ways, you do the same for yourself when you enter a new dimension in the universe that your soul, your physicality, does not become a poison to other races. It's your responsibility to protect them, and it's not their responsibility to be afraid of you. At the same time, if you pick up from them, it's your responsibility to clean your physicality in the condition of the contact, from not bringing the Corona back to Earth, or to your spaceship. You can put, we did with the Chinese, (:40). as you've seen, the sprays, and wash you with GANSes.

But Man has to learn that he is responsible to use the strength of his soul to cleanse his physicality, from criminal activities to viruses. The "Day of Judgment" is with the Soul of the Man, from now on. Every step to protect yourself and to judge what I do, does not harm to my physicality, and to those who I'm responsible to, for the physical and the soul life. How do you do it? Go back to you Cup of Man and it stand in front of it. And in so many ways, you cannot put the Cup of Man this way, and you stand in front of it this way, or you lie down and put the Cup of Man this way. A man has to be a man, to stand the Day of Judgment in front of himself. I explained in the teachings in the past days, (:42). you set the Cup of the Man, in the structure the man. The Soul of the Man and the Soul of the Physicality of the Man. And you stand the man with his soul, and a weak physical condition, and allow the transformation.

As I was explaining to my son, this is different way what you get, when you whip the white of an egg, with a egg, or with the yolk, or without the yolk. And how you mix it, with a fork or with the electric mixer. This is what you have to learn. Stand in front of the Cup of Man, as a man not as a dead man, or try to understand what this means. In so many ways, I gave you the secret to overcome Corona 3 weeks ago, and all I heard was, "produces very, very little GANSes at the bottom, and have you seen the circles around the bottom, have you seen, why it's not producing so much?" Because in reality, (:44). if you look at the ratio of the GANS at the bottom of your water, you'll see an amazing thing which you never understood. For you as human, the amount of the GANS on the bottom it's the amount of physical existence in your physical and the soul body. This is the replication of you, but you have no understanding of it. When you look at the shape and the pattern of the GANSes at the bottom, you see the soul structure, and the pride, and the stupidity of the man in respect to himself. How you are self-centered, how you are a giver. And when I look at the Cup of Man, a man makes, I know the man. You all complaining my Cup of Life doesn't make much, then you look at the structure of your own body. How much of your own physical structure carries any material to confirm his existence… is nothing but water, but liquid, but nothing else.

And then, in that process, understand in the totality of the existence, what you deal in the Cup of Life as physical dimension, and the Soul of the Man. I am the Creator of my own soul. You made the Cup of Man, (:46). and it's in tune and balance with you. Your behavior, your misconduct, and your own existence. You look in the GANS production and look into the behavior of the Soul of the Man. In so many ways, if you know about the magicians who read the coffee cups and tell you your fortune, by looking at the structure of the GANSes in the bottom of your Cup of Man, I tell you about the man. I come from a deep space and my knowledge is beyond your understanding. I come from the Creator and I have created what is on the table in front of you, and your own physical life.

Now, look at your Cups and see if in reality does the physicality wants to have the Corona to get rid of the physical life, or is the soul so generous, that is prepared to give, to bring what you call inter-atomic fusion. And I said before, you cannot run a fast boat vertically on the surface of the water. (:48). It needs to be on its own dimension. And you all set the Cup of Life in a vertical death position of the man, where the separation of the soul and physicality has already taken place. … (MK) So you come to understand exactly where we sit and why and how we have introduced the Cup of Life and the Cup of Man and the two cups of life's.

Now set your cups in the structure of your physicality. And, or, your Cup of Life, (:50). in the structure your death. You decide which side. Many of the Knowledge Seekers have started seeing the separation, seeing and understanding the separation of the Soul of the Man by seeing their own body lying. Where they can see the life in a different way watching down and looking down. And one stupid guy in Isfahan said to the other knowledge Seekers who reached the point of maturity as a family, "Your third eye has opened, and the aliens come to get you." Don't forget, this guy is part of the same group as works with Israelis.

So it comes to one understanding. Many of you will go to the next phase of the understanding where you're aware of leaving your physical body, but in a very generous and kind way. In a way, for the first time you see what happens to you in realm of physicality when you go to sleep. Now that you have elevated the Soul of the Man, and you have elevated the Soul of the Physicality through the use of the GANSes, (:52). gradually the strength of this allows to you to reach the strength that you will see your own soul. You see in a way, your own physicality.

A number of Knowledge Seekers have reached this point in past few weeks. Witnessing their own physical life. This is exactly what happens to you when you die, but now you have the control of it. Now you're learning that I can be out of it, I can fix it, get rid of Corona and go back into it. Because my energy, my power is more in the dimension of the Soul of the Man. Those of you who go to the steps of the flight, very few of you, will reach to the flight to the Creator. In that process you bear a child of the Creator with you, to start a new cycle. And in the process of those of you who see your physical life, you will take the next step. That you learn how to travel the depth of the universe, and at the same time when the need is, to come in and live within the Soul of the Physicality to

protect the soul. Or to stay out to protect the physicality that no one can touch it. In a way, (:54). for the first time as a human race, you can carry the body of the physicality within the structure of the Soul of the Man, that you never see the end, or what you call the death of the man.

In so many ways, there has never been any death, and in so many ways, there is always an end, end of a visit to a position, and to move on. The first time this was explained to man was some 2,000 years ago, on the "crucification" of the Christ, but the man did not understand. Last Sunday was his day of his "crucification." He was put in the physical pain, you call it, the Corona, you learned in that process, to go to his soul and come off the cross and walk as another man, you call Resurrection. Today, I teach you the resurrection. Today, you have been taught about resurrection. It was hidden in the books that the man cannot understand, but now the knowledge of the man after 2,000 years is so much, that he can understand, about the resurrection of the Soul of the Man to the dimension of physicality.

In reality, as I said before, you took the matter, into a Nano, into a GANS, and then you took that GANS in a composition of its structure, and you made the physicality of the any matter which you wanted. There is no difference between this and the resurrection. We took the body of the man, we put it through it's own structure of the pain and energy dimensions, we call it the Corona, or we allow it through the pain to mature, to understand separation of the soul and conversion to any matter state as it needs, according to the space and time.

The man called the Christ walked out at the cross, and became a normal man, and traveled through the land, to the south of France and to Spain, and he lived a normal life as a man. So, for the first time, man in this condition of Corona, has been put through the pain of feeling it, the same as the Christ did, and he took to his soul, and then he manifests himself as a man, who was recognized in the same dimension of physicality by Mary, and they took to the boats and land across the seas, to live a normal life. Soon the daughter of Christ blood will be known to mankind, as he left the same. The bloodline goes through the female. (:58). Now you understand.

The understanding of the Corona was to bring mankind such a process of pain, that he understands the power of his soul, and understand the position of the transition to the matter state. Last Thursday was the birth of Mahdi, and last Sunday was "crucification" of Christ, the day of resurrection, within 3 days. Understand the knowledge, not the magic. Apply the knowledge and don't become a magician. If you understood the Cup of Man, I gave you the Cross. If you understood. Not to crucify the man, but show the position of strength of the man in respect to the operation of his soul in the point of departure. (drawing) (1:00). Where do you want to place it? And how do you want to position it? Do you want to take it to the point of pain for the transformation? Or do you want to go through the point of understanding and elevation to achieve the same. The choice is mankind. And what we see today mankind has chosen the cross, in respect to Corona. And interesting enough the Christ was given a crown of thorn, and Corona means a crown.

If you mature to understand this and the way I've explained it, you mature to apply it. Only those who have committed crime and genocide will be left in the dimension of physicality and they have to answer to your... their own crime. And I know one person who will sure, sure will be there, and the partner in crime (writes: BILL and M). I always call this heaven (writes Hell). One day I explain to you why. She's actually hell, created life so. (1:02).

Now understand why I gave you the Cup of Life, and understand why I gave you the Cup of Man. And understand what the interaction of the two is, understand when you need to keep the two Cups separate, and when is the time and need to bring two Cups to create the Soul of the Man.

Many of you will ask, can I make another cup for another person? Your limitation is the creation of the two Cups, the connection is the decision of their soul. And if you make a Cup of Man for another soul, you are responsible for it through the time of its creation, and created by, in the span of the universe. I brought with me a twin soul when I came, and I declared it to Caroline at a very early stage. And that twin soul has been embedded in two, and they will shine like the stars in the cycle of humanity to come. But you have to decide where you place the two, because you are responsible for it, and you have to answer to it for the time to come. (1:04). If you think, I make a Cup of Life and then a Cup of Man for my father who is sick, has he given you the consent to do so? Can I make many cups for many people? Have you had the consent to interact with their souls? The only ones you are responsible for, and due to, and through the mother who can do, is your own children to the age of their own maturity of their souls, has no age limits, and no physical dimension.

Now understand, and see how many of you are ready to take the journey of what I call, inter-atomic fusion. To fuse your soul of physicality in the trust of the soul of your own entity. Don't forget. Always never forget. This is what man have not understood, that the two souls interact all the time. And in that process, there is a soul of totality. (1:06). And somewhere in between, somewhere in between the physical body of the man in the neck and the structure of the heart, is the position of these field strength. If you feel the love in the heart of the man, or we call the solar, you still understand the measure of physicality. If you feel the love of the Creator or your own soul, you will feel in the center of the Soul of the Man. If you understand that the inter fusion, the totality of the conversion and the balanced fields of the creation, we'll feel in this point. Than you will understand the Cup of Man by its nature has created such a point. And then you understand what would you like to interact and change and cover. Then it comes to one very important point. Do I need to drink or to breathe or to worry about Corona? If you understand this, you should not be worried about anything, even feeding yourself, even warming the dimension of physicality, even manifesting yourself, at any position, anywhere in the universe. (1:08).

If you understand it, it's like a very simple equation, which they have been teaching you in the school. What was of you, who are mathematicians to understand inter-atomic and conversion of the soul in a point of reference. Where A is the Soul of the Man, B is the

Soul of the Physicality of the Man, C is the Soul of your Cup, D is the Soul of your Physical Cup. Now you understand. Anyone suffers, you need to find a balance in the others to bring balance to this side. At the moment, the Soul of the Physicality of the man is suffering through its physical dimension. What do you need to create on this side, that you can support this side? (1:10). Or what do you need to add on this side, that you can keep this side of the equation balanced. When these loses, this needs to give more. And for these to give more, it needs to receive more, equal balance on both side. Or they give for you to keep balance.

If you understand what I've taught today, you have understood the secrets of life anywhere in the universe, in any dimension. Then no one can raise the dead, and no one can walk away from the Cross. What's in front of you is a knowledge of life for man from now in the space. What you will learn from today's teaching is, no one, no magician, no dictator, no Billy, can stop you anywhere in the universe to decide the position, and the condition of your soul. (1:12). In so many ways, the pain of the suffering of the Christ on the cross has been felt by the total humanity, in losing of so many in past few weeks. The pain of loss is not by one, but to be felt by the whole of humanity, and you have responded. And in a way, you have reached the point, that the total human soul was to walk out of that cross and resurrect without any pain, without any Corona. And this is the opportunity we give you. You have the chance to stay on the cross and go to the total demise or collectively as a Knowledge Seekers walk the man off the cross and resurrect.

Then no one anywhere in the universe, can dictate like Billy, or kill you like Corona. The word Corona was chose by so many ways, to crown the death of the man … the end. The same thorn crown on the head of Christ. But this time landed on the empty land with no head, and the only victims of it, those who planned out to put the man on the cross. Now, you decide and you understand. I gave you the solution into every problem of the man, from hunger to food, to protecting the physical life, and to every other dimensions from travel in the depth of the universe, (1:14). and everything else on one screenshot. But what is your intelligence, and how much of it do you understand? Or do you need to have a PhD to be high enough, to be deluded in the knowledge of non-existence? Understand what is on the table. Understand what is on the screen, and if you understood you can meet with the Creator in one second. But none of you will reach that level, very few, and it's gifted to two. Even them, they have to decide, if they have matured enough to take the responsibility. Then you understand the ethos of the Keshe Foundation, we are here to serve, and not to be served. You serve from your soul to your physicality, and do not expect to be served back, because it is not there an intention of the man, is there by the will of the two souls.

In so many ways, the past three weeks has brought the maturity of millions of years to humanity. And in so many ways, what we gave you as a Cup of Man is a gift to humanity to mature. In a way, as we say, you've done a good job, sit down and have a cup of tea. (1:16). That tea is the Cross and the cup is the Cup of Life. You decide, you want to come off the tea, or you want to stay with the Cross. Then, when you send a Cup of Life 1 and 2, you send some extra wires and you explained to them, "You decide". It's very simple, mankind does not need much more to understand the elevation of his soul. Mankind does

not need much more to eradicate every illness from the physical body of the man. Mankind does not need to understand the work of the universe, if he understands the work of his own soul, as his soul is the universe.

In totality, and in 3 months, more or less in 3 months, we have brought the knowledge of the Universe for man to understand. Because we prepared you for years through teachings. Now the understanding is simple. All the ingredients for the cake was brought in and mixed the right way, and everything else was done. (1:18). It was just putting into the oven, and putting the right temperature for it to rise and ready to enjoy the cake. And in so many ways, the temperature came and raised with Corona. Now the cake is ready. Now you understand why we are post-Corona.

Post-Corona has brought mankind a gift. A gift to let the Soul of the Man to join the Universal Community and travel the spans of universe like them. Or choose the path of the hard way and travel through the spaceship. As I said once, mankind has been on the same roller-coaster going around the sun, as he locked his physicality in the dimension of the GANS to his existence on earth. Now you can take that GANS, which is your soul, and travel across the universe and you can literally come off this roller-coaster of physical life on this planet. The roller-coaster will never stop. Is you who has to decide when to get off it, and if you want to be on it, on this planet. The game of running like a mouse around the same circle is over for mankind. It's you who has to decide when to come off this roller-coaster, from now on. And when you want to go back on it, because it had some pleasures when you were on it. The choice of the freedom is given to the Soul of the Man with these teachings, not to the physicality of the Man. (1:20). The physical man is tied up on the roller-coaster. The Soul of the Man has the freedom of the roller-coaster choice, or can walk in this garden of the pleasures of the universe till he decides, or she decides, or the soul decides, which roller-coaster he wants get back onto. And as you know, some roller-coasters need some covers and equipments, and it needs some measures, to be able to enjoy the ride. And that Man will learn, in the span of the universe when he travels.

In so many ways, if you understood the original teachings of the Keshe Foundation, as I explained recently, into and for the Knowledge Seekers, this is your soul, and you remember the magnet? You put some dusts of iron and you saw the iron line. To you, these were magnetic lines. To your soul, these are connections to different strength, to different souls and conditions. If you follow this, you most probably end up here. If you follow this, you most ended in Mars. Or if you go to this, you end up to the soul of your mother. Now you understand, there is no difference between the magnetic field flow what you see, but now you can connect the two ends. When the Soul of the Man has the strength of the line of the travel to Mars, (1:22). man will be in Mars in seconds, not in seven months. As you travel the same strength to your mother, to dream, to talk and communicate. This is the new way of the transportation. If it can be put so simply on the line for you, and if you choose the dimension of the spaceship, you need to find out the strength of this, and find out, on which of these ends, is connected to. With this you go to Mars, and with these you come back to Earth. Instantaneous communication, instantaneous transportation. We have given you the full knowledge. Now, next time

when you play with a magnet and dust of iron, try to measure the strength of these fields, and then you find out, they are very much different, and each one is connected to somewhere, and each one is coming back from the same place.

You have a full knowledge to live on, from now on. I'll be here for a short while to guide you. 21st of March 2021 is the end of contract for me. I walk off the Cross. (1:24). Till that time I can elevate you. (SD) We come with you. (MK) This is the point of reference. This is what you have to understand. The choice is the mankind. You want to choose the painful passage of taken, billions of years, and the current suffering of past 3 months? Or choose the path of freedom of the Soul of the Man from the shackles of physicality?

I don't need no Iranians, and no Chinese, and no Americans to prove who I am and what I do. My job is to elevate the Soul of the Man, that does not live in a dimension of physicality, if he chooses. (1:26). And in so many ways, the job is done.

There is one question left and one point to answer. What do we do with people like Bill and his wife, and those who brought so much pain to man over centuries? Revenge and destruction should not be part of the work of the man. The decision has to be with the soul of them. What does this mean? Man cannot kill, man cannot commit suicide, man cannot end any cycle of life. As I said many times, if you kill, if you separate the Soul of the Man from the Soul of Physicality, you have committed the most heinous crime. Be it of your own, or another. But you can elevate the Soul of the Man, that he realizes the crime he has committed through his own Soul of Physicality, and will not stand to allow this to happen and ends life, separates the two. And this (STM) will take a position in the lowest level of existence, as he accepted the position and the condition of the failures of his physicality. Souls know their own position, according to the behavior of the physicality. (1:28).

So, let's say this to be Billy, and this to be the soul of you, or the soul of mankind, the only responsibility you have, as we have taught you, is to elevate the soul (of Billy). And you'll find out, the decision and point of separation will be made by the soul. You raise the level, to raise of your own understanding. And, as physicality has been so abusive, taking, will decide the separation. Choose the name from Rothschild's, to Illuminati's, to royal families, to the world leaders, and those who thought are elite of the society. I've asked the Knowledge Seekers on Thursday, to bring with them the pictures of the criminals of the world. And for you, is to raise their soul. And in no time, there shall be no more pain from those who have created so much war, and pain on man in the past centuries. Through their bloodlines or through their own, individual eager and ego. (1:30). Dedicate one day, each day, to one of those. Start with Billy and his wife, and their children. And then go for every Rothschild (that) exists, and then go for the royal families on this planet, and then go for those, who thought their wealth dictates, that they can dictate the condition of the man. You will find the peace will return on this planet. And you'll find out, by elevating their souls, collectively mankind will solve the problem of war on this planet. And then, in that process, mankind, through the Cup of Life given, uses a common ground strength to create a new Soul for Man, that would not ever commit no crime, not on earth nor in space.

I have given you the key to freedom of the Soul of Man. From now on is your intelligence, and how rapid you want to go through the transformation, and you want to understand, that you want to accept the transformation, and the intellect that is shared, not only by you, but you share by the others. (1:32). The Day of Judgment comes by the elevation of the soul, not by the execution of the physicality. Let them separate. Don't separate. Now you understand, "how do I turn and how many turns, am I gonna lose a flat plate?" You put the Cup the other way, you understand every turn has a meaning, and every point has a power.

But there's one thing, you cannot abuse it. Mankind will never be able to abuse this power, because it's a point of balance, it's a point of equality. (There it comes my tea. Here please, so I can reach it. Thank you). I received my cup from the one I love so much. I wonder if you can receive your cup, or you can give from your cup to the one you love so much. (RC) Is right at the moment, that you mentioned the words "balance of power". I thought that was appropriate. (MK) It is the balance of power. No Man has more power than the other, if you understand, (1:34). the souls are equal and they are from the same Creator. It's very simple, And it cannot be made more simple than that.

Then you'll understand how we played the game with Billy, in the past 2-3 weeks and how we made him ready to start his own physical demise. As I explained, and some of you were present, his crown, and his joy and his power was to be. And where he thought he had the power and he started the power. And he played the game, in the live teaching within couple of hours, when we exposed his soul to understand, he resigned from board of directors of his point of power. And from that point, his demise started, and from that point we'll see, one by one. In so many ways, do we need to take him to the courts, or do we allow his soul to pass sentence? But this is what you will learn in the space. This is what you'll become good at. You don't judge, you give for the soul of the receiver, (1:36). to judge itself. You will soon understand. And you will soon, will understand more, now that you start gaining the knowledge of universe.

You, through this process will understand the universal language. The universal language is the transfer of the fields of the Soul of the Man, and when it received, has its own meaning and no need for translation. Humanity, from this week on, from today will enter a new phase, you will see elevation of many souls to see their own position in respect to the soul of their physicality. And their guidance, and their support will come only through 2 souls we have appointed. And in time, these 2 souls themselves need to mature, to understand their positions. We have appointed the channels of understanding through the Universal Council, and we have put the roller-coaster for this planet in the hand of the Earth Council members. And in that position we have structured the Universal Organization, not for interaction of the man on this planet, but for understanding of totality within (audio broke ..).

Now you understand why we structured everything over past 2-3 years in a very systematic way. (1:38). We planned, we executed, One Nation, One Race, One Planet. Those of you who signed the Peace Treaty on behalf of your language some 2-3 years

ago, you signed mankind to peace. And those of you who signed the paper to your own soul, you committed your soul to freedom of the universe. And now you understand it, it's your choice to choose. Stay on this planet and enjoy the beauty of it, and in that process, understanding the work of the, what we gave you as you are human, physical, in a Cup of Life to get rid of the sufferings of the physicality, and enjoy a lasting life upon this planet. Create as many things as you like and let it be enjoyed. The beauty of it will come very soon, and the process of the structure we have seen.

Many nations out of nowhere, in past few weeks, have issued checks for their citizens to be able to live comfortable till the crisis is over. How many of these nations will and follow signing these checks for centuries to come, that no man needs to become slave to no one? (1:40). And in a way, the money has no value, but in this process due and through Corona, it showed, that now we go to work, because we love to work. We love to be part of the society, and with it come soon, that the level of income will be set by the governments at that level that everybody lives a comfortable life? And you, as a correct people, what you earn, you say I've earned that much of it, I don't need any. But if I need to give a Cup of Life, I'll take from it. The man will not cheat, and man will work and enjoy the work. He lives to work, and on opposite to what has been going on for past centuries, he works to live. Would the governments change? It's the decision that you have to enlighten through your souls through the leaders.

This crisis has shown mankind, we don't need to work. If you take the factor of Corona away, and look at the governments like Canadians, and the Scandinavians, and other countries, who draw checks for their citizens, shouldn't that be the pattern of life, and not dependent on the Social Security to live on meager life? We've seen with the Canadian government, as its done, providing food and check at least for the time, till it feels secure for the nation. Should that not be the purpose and the work of every nation? But you have to understand, (1:42). now with this knowledge that you have, do you need to feed yourself, that you become the burden of the planet? Do you need to consume energies, and burn and destroy? And do you need to be abusive on the structure of the life of this planet? Life is easy anywhere in the universe. No one, no one ever, anywhere in the Universe goes to work, except on this deemed and doomed planet of Earth. Nowhere in the universe, anyone ever worked to live. Nobody in the Universe, ever anyone killed to survive. What happened on this planet, we don't understand. And now we have put it the right way, the correct way. And it's for the human race to walk out of this by their own will, and in that process, have to understand the strength of the independence of the soul, they become... they become members of the Universal Community. You were waiting for the spaceships to come and take you and go open. You already are in the spaceship of the physicality of the man on the physical spaceship of the Earth. You have to choose when you want to walk out of it, and as they say, when you want to abandon ship. This ship is sank. This ship is sinking. And this ship will sink further in the coming time. (1:44). The point of maturity of the Soul of the Man will come through its citizens, of the souls, not the citizens of its physicality.
Any questions?

(RC) Thank you so much, Mr. Keshe. Very, very good words. And it's absolutely true about Canada now. They're even basically issuing checks to... well, they're trying to cover virtually everybody at this point. And it's... it's amazing transformation that seems to be going on that. People are baffled and people are even complaining that they're... they've worked so hard and now that they... they don't understand what they're working for anymore, sometimes, in some cases. But it's an amazing transformation and it's just the way you were putting it there. It's perfect. (MK) In a way you're receiving a pack of food with it too. Many Canadians have received the first essential food packs. Plus the check. (RC) That could be, yes, and there's differences in the way things are being given out. It's being given out without any strings attached basically, that's the difference, compared to the welfare system which is all about the strings and all about the middleman in between. You know, getting paid 10 times more than the people they're giving the money to and so on. Yeah, it's... it's... (1:46). The whole system has taken a major shaking and it's going through a lot of transformations. So...

(MK) I've seen... Yes, change has come with the situation we've seen in past few days, which the position of... Trump has taken with Bill Gates. It... It does not... if he does not relent, or they do not bring him undercover, we will see the end of Illuminati's. The whole of the banking system will collapse on them. They did not count on this, they will not count on this. And if so many people transfer and understand and, the work of the soul, the banking system which they based all their work, and capturing, and imprisoning and enslaving man, through vaccination and food has collapsed. You don't need to eat. You don't need to consume. You don't need to use any banking system. In so many ways, are there any banks and food stores and supermarkets in the space? No. But all the souls live in the dimension of physicality.

A very strange thing with a lot of you will understand is, you will come to see many passengers of universe in your own shape and color and clothing, but they never work. They are travelers, is like backpackers, when they come across your country they don't work in your country, and they live a good life and travel and they go through it. (1:48). These are the backpackers. They just use the environment of the... your village, your city, your tables, your chairs... and they go through. They look like you, they eat... seems to eat, and do whatever, and they move to the next destination. Then you will understand very soon, especially if you manage to transfer to a strength of your soul, you will see the Universal Community guys being part of your community for a long, long time. A very, very long, long time. But then you'll be baffled, why do they go to work? Why do they do this? Because they want to be here to enjoy the pleasures of physicality, the way is pleasure to, what they want to experience.

We have started a new cycle today, understand and start developing, and start freeing your dimension of physicality from all these pains Corona, and the cronies which comes with it. In a way, if you look at it, the Corona which is shape of a crown, it's the true crown for the souls who have understood and elevated to understanding of the work of the Universal Community. I told you, I take you man, equal, as the others that never become a slave. And that equal-ness is the only way to release and to elevate, (1:50). and for your soul to interact, and not your physicality, because your physicality becomes

slave every magician and you accept every path of belief. But now that we have elevated your understanding to understand the position of your soul, you're a free soul. And in so many ways you carry within you, the knowledge of the Universe, and the knowledge of interaction with the Universal Community. The opening of the Universe for man to join the Universal Community was for him to understand the station of his soul, and no other. If you were waiting for signs, and books, and instructions, and prophets, that is the feeble understanding of the man, through understanding of a physical life, which has been abused so much. We give you the freedom. You choose to be a slave, to what, of what reason, it's your decision.

I could not teach it so easily, so openly, and so beautifully, that I've done in past 3 years. I brought you for you to understand step by step. I brought you to understand every facets of the knowledge. But from now on look inside you, and you'll find you, which is your soul. Need help? Look at the Universal Council. And if you need help beyond, (1:52). shine your light on the 2 souls we have appointed. And they will shine back on you, and you will find the path. Understand the work of your soul, then no one can enslave you for nothing. Not on this planet, not little Billy and not even the blond.
Any other question?

(RC) I've need this stop... stop laughing first with the... the little Billy It's very nice, Mr. Keshe, thank you.
(MK) He was put in to be the sacrificing sheep if it goes wrong, and he's sacrificed. But he sacrificed his soul out of his own stupidity and his wife. I explained in one of the teachings, powerful people bring incompetent wives, trying to pretend to be powerful. And this is a problem of successful men and women. We've seen for example, the Queen of England and the little tall chap, playboy, Philip. We've seen Billy with the incompetent wife, and we've seen the rest. But in so many ways, always they come with, it's part of their package, it brings the balance. (1:54). You see, he stole and he became rich and he thought, it is... what do you call it, it's one of his facets to steal, and be good at it. He stole from the Apple, and created the software. And as his wife said, everything with him is micro and soft, even his brain, and god knows about the rest. And in that process, he saw himself as a god-given right to steal, and he went for stealing the soul and the physicality of the man, but he started with the physicality and now, in so many ways, he never understood.

Those who saw him as a stupid guy, they supported him. They said, if he wins, we all take, if he loses its him. And he lost. But this time, as I said, those who shoot the bullet, and those who design the bullet, and those who paid for the bullet, all get the same service. And that's why you have this. 30 million lives lost and to be added to 100 million through act of this group. And now we wipe them out through their own elevation of the souls. You watch in the coming time, how many of these people, how, and the way they will live, and disappear. There's one thing sure, Rothschild's wealth will be spread to pay for all the damages they've done over centuries, as of today. That's for 100% sure. Those Illuminati's who met with Rockefellers and the 3 families, and the others who planned this, (1:56). you all will be served up to your grandchildren, which means no line of you will ever exist to do such a thing to humanity. Or anywhere else in the Universe. Those

who instigated this from outside, who know... we know who they are... you'll be handled by Universal Community in a very direct way, as of today.

Soon we will see they end of religions, and the leaderships. Soon we'll have a collective consciousness of the souls, who, by their own actions, will create balance for the human race. Try to understand and spread the knowledge, and don't be so feeble, that just because you thought you had a few boys around you, and you can fight, and stand in front of the power of the Foundation, you have finished yourself in no time. We are men and we don't fight, we just love to play with women. And it's them, in their weakness, will make the mistakes, where we do not cause the mistakes. Strong women stay strong, and they bear strong children, and that's why we appointed 2 to carry the human race through this cycle. (1:58).

Remember one point. Mankind from today will go through a new cycle of understanding, maturity and development. This time, the maturity will come through the maturity of the soul and not the physicality. You have burned enough rockets and it got you nowhere except a few inches up. Even... not even inches compared to the dimension of the Universe. With the new understanding, man will be able to travel the whole domain of the Unicose. And it needs to understand its own process of creation. We came with love, we created the love in the heart of the man, and with it, we took what we came here for, the children of the Universe. Soon you will understand.
Any other question?

(RC) Mr. Keshe, Stefania has her hand up. (SD) Yes, yeah. I have the hand up. I've got questions from someone from the Italian community. Now I bring up, I lost the question. I'm gonna bring it up, yeah... so, yeah, I have the question... (MK) The question is, (2:00). is the Vatican going to survive? No. Would we have a... would we have a pope? No, he's already popped.
(SD) The pope will pop.
(MK) He's already popped. (SD) The pope popped. (SD) I've never seen the pope driving a Ferrari. (MK) You've never been inside the Vatican they do a lot of it. (SD) ... we go convertible Ferrari and you teach us the driving lessons of the convertible one. Which is our body... our soul. I... I... I read the question. I'm gonna read it in Italian first because I don't... I'm not know sure we got it translated, gonna have to translated it okay
[Italian]
Okay. Now I translate. It's actually... it's not a question, it's something that want to... they wanted to let you know and... Lara and Ivo. So, Lara and his husband Ivo, they are... they are connected with the Federation Intergalactic....
(MK) Oh, forget about it. Forget about it. Read me a question. Forget about it.

(SD) Okay but they want to thank you, they want to... thanking you (MK) No problem, forget about it. (SD) Okay, okay, they want to thank for your knowledge. (2:02). That was actually the... the only... the only question because Lara, she said to me that she see you in astral level and every time I said to her "Say Hello to Keshe for me" (MK) No problem. (SD) So this was... They have another question, so from what you just taught

now, that means that... that's means... [Italian] There was this question, no, sorry. So they...

so from what you explain today that means that we don't have to drink or... or... or spray the Cup One and Cup Two? That we can do without spray and drink, the Cup One and Cup Two?
(MK) Next question.
(SD) Okay, next question. Lets see. No.
(MK) Thank you very much. Any other question. (SD) Okay.

(RC) We have some questions from Liliana and I was thinking, perhaps, we can get her to speak, rather... She's got like four questions in the Q&A. Lets see I'll have to get her, up here and I think we'll need a translator, but... allow you to speak Liliana, if you would like to ask your questions.
(MK) What are the questions?
(RC) They are... First yes, are the cups necessary to lift the soul?
(MK) That's your decision. (2:04).
(RC) And then she asked... Are there other ways to raise the soul?

(MK) I tell you, educate yourself. We don't tell you anymore what to do or how to do. It's for you to find the path to your own salvation, in any way. There is nobody there. If you understand the teaching. Listen to today's teaching, maybe 100 times, and understand the meaning of it, not understand the preset mind you have. As you'll notice today, I don't refer to anything, to the past. It's from now on. It's what you elevate, what you bring, what you see through your soul. We are not interested how you make your physical body, 2 screws, 1 flat, blond, blue eyes, black hair, skin, or whatever. The twist on your Cu side, or the twist on the turn on your Zinc side, will decide your color of your skin, and the physicality, and the bone, and whatever. And the way you made it, matches with what you have, your physical life. It's now for you to understand the interaction of the fields. How you make attractive, that physical body, or the physical soul, that's your problem from now. We are not interested how you make your Cups. We're interested to understand what you understand, from interaction of the fields. And how you can elevate your soul. Would I increase 2 twists, or would I turn 1 page, or shall I put it vertical, or horizontal, 90 degrees, 40 degrees, that's all on your intellect. (2:06).

Q; (FH) Okay well, my name is Falah from Australia and I'll just have really quick question. Can we make 2 different setup for ourselves?
(MK) Are you a schizophrenic?
(FH) No. (MK) So?
(FH) And can we make the Cup of Man, and then we start getting... if you start getting GANS a few times? (MK) Pardon? (FM) Can you hear me now? (MK) Can you repeat the question? (FM) Yeah, sure. Can we make one... one set up as a Cup of Man, and then we... we're getting the GANS and then take the GANS off and then redo it again? Can we do it a few times? or can... we have to do it only one?
(MK) Did we ever tell you use GANS of Cup of Man?

(FH) No, but I was talking to Dr. Boujaran, and he was saying, you can spray yourself, you can... you can drink from...
(MK) You can... listen. Anybody can interpret what they like. From now the interpretation is your own understanding, you don't need no one to interpret with you.
(FH) Okay. And then I've got one more question. When I was listening to the lectures last week, you was saying... if you're... if you got any of physical issues, you can get the tablet, and then put it in the setup (Cup), so you can see, you know, later on you don't need it. The question is, can we get some verse, you know, (2:08). some words of Koran, and then put it in that water, in the spiritual side, would that help? Or is nothing with this kind of stuff?
(MK) That is... you see, when you go this way, I answer one way. Haven't we elevated your soul beyond the present prophets?
(FH) What do you mean with this?
(MK) The knowledge released to you, is beyond the knowledge ever given to any prophet of the past. Would you like to take yourself to that level and stay at that level? Or become at the level to understand the totality.
(FH) Okay, so you're saying that the knowledge that we have at the moment, it's just way more, than all the other prophets, that they had before?
(MK) The ones they revealed, of course.
(FH) So your words, were just really vague, could you repeat that again please?
(MK) Just, I said, more than they released, more than was revealed to them, and now you understand the totality of it.
(FH) Okay, fair enough. So, I started putting in some verses, this last night, and I did not get any reactions. But since I made the Cup, I started feeling the difference. I started having different dreams, and I can see myself in the dream, and I can talk to myself in the dreams. That happened about exactly, from the day that I made the setup (Cup), and then, that continues every night. I can kind of tell myself where to go in the dream, but last night, I was saying, I need to go to that place, and when I slept, I literally went to that place. And I can see, you know, my spirit going. And sometimes in my dream I'll wake up, and I see everything right in front of me, (2:10). what is happening while I'm dreaming, but my eyes are opened, and I can see it. Would that be related to these, this setup that I made, with the Cup of Man, or that has nothing to do with these?
(MK) Did it happen before you make the Cup of Man?
(FH) No.
(MK) You got your answer.
Next question.

Q: (BM) Hi. Good evening or good morning, Mr. Keshe.
(MK) Where are you from? Well, I'm from Grass Valley California, my name is Bryce, like Bryce Canton.
(MK) Are you still alive in that California, with all the things going on?
(BM) Luckily through about 3 weeks ago, my friend who had been playing with your things for the last 5 years, was listening to a workshop and he called me over, and I knew he was doing things with it. We're still here in Nevada County, we are in a forest, so we're more protected than the city. Given the patterns, it seems to be and... I... I've had a lot of things happen to me, since he introduced me to it right before the day of a

quarantine, when they called in to say, you got to stay home. And for 45 years of my life, I didn't understand why I was on the planet, and I was just grieving the whole time doing, just inner... deep, inner work, if you want to call it that. And then, I realized why I'm here. It's my sole purpose to support the Foundation, (2:12) and I've spent a lot of time and energy just trying to gather, and get ready for this for my county. And I've had many things happen and I'm... I... I... I'm not familiar with the education. But I feel like I'm remembering, and I'm wanting to build a bridge from my own process in the last 15 years, of so many things that have happened to me, epiphanies, and big openings, and why I'm here. And I do have specific mundane questions, but to build a bridge to everything you've said. I've just been focused on realizing that, I'm not me and I'm not... I... "I am that I am." And I've just been one of those souls, that my... my beliefs are what's in the way, and emotions that are stuck in the body, are in the way, and I've had a great teacher to help me with that, in-cellular memory release, and my life makes sense now, with all the things I've done, and getting very real with the darkness inside my own soul, and healing, and transforming, the inner fragments. And seeing how, writing very deep in contrast, as an addict, and things like that. So, I... I... I don't want to dump everything on you, but at the same time, I feel like I have a lot of insights about the situation, and about things, and I'm trying to build this bridge, of what has occurred to me. I called out to you, one night when my friend, my friend I actually thought he was bailing on me. He was gonna... not help me and I got scared and I had a new little puppy. And I was calling out to you from my heart, and I felt guided. (2:14). And I started to make things and... and then I suffered a tragedy with the little dog. I had spilled the lye on the floor, and... and in that second, I was gonna clean it up, and my mind said no, go... you can go... because I... I was being vigilant, trying to hurry, not understanding that I didn't need to be in a hurry. And... I lost my little puppy very tragically, which was a major shock of... of consciousness that really showed me, I'm not my mind. And I'm just my heart, and... I'm wanting to serve my county. And... I started to spend a lot of monopoly money, because I feel for some reason, I guess I have clairvoyance, if that makes sense. I didn't understand it. But... I'd had events happen, where I saw my dad, before he was gonna... before he fell in... He... he died. I actually saw the event 10 minutes prior. I've had a few of those things happen. And I've had someone tell me I have a big pineal gland, and I didn't know. I didn't ask for any of this. I didn't know what this was, but it's all starting to make sense to me. Somehow I have senses for things, and you're teaching them, and you being a teacher is something that is really important to me, right now. And I'm just wanting to do the best I can to... with no fear, to... to embrace this work. And... and I didn't know what I was doing. And I accidentally, inoculated myself with the virus, and so Rick was helping me a few days ago, on Monday. You know, I said, well, I've got to get going, (2:16). I've got to make everything. But I... it's almost like... I don't know why I did that. I just, it was an accident, I put the salted water, that was absorbing the virus, actually in my body, and I felt the radiation and heat throughout my body. And I feel the fields, I feel the magnetic fields. I'm sensitive to the electric fields, so that's another big part... there's... of my existence, that I wasn't aware of, for these years. and I've always been seeking vitality. I've always... I've always asked, there's got to be a simple truth to how all of life works. And it's really simple, and at all levels, I want to understand, all levels of cellular consciousness. And... and so, I've arrived here. Anyway, there's a lot of stuff, I would love to share with you, but I also have important questions. And... and I know there's

other people who have questions. And I'm just trying to find my place here. I was trying to get in touch with you guys. And it was hard to donate money. The website was having issues, but I am... I'm committed to the work and I just want to thank you for being here for me. I don't even know what to say. I just really appreciate everything. And at this point I'm making... I'm making the Cups, the 1st and 2nd Cup, I haven't made the twin. I haven't made the Cup of Man, but I wanted to create like a guidebook for my county. Like really simple. Because the information is wonderful. But I... I... I really have had to pull from a lot of resources. And I wanted to be able to create something simple to hand out to people, as I help them. (2:18). And I didn't know if that was okay to do, or a good idea. I wasn't sure about safety or issues with doing it, but I just wanted to do it. So it was okay. Could I ask several questions very quickly? That are really...

(MK) Ask one at a time, and we'll try to answer you a couple.
(BM) Try to what?
(MK) I said, ask 1 or 2 questions and then we go to the others. They have questions.
(BM) Okay. Your wife or Carolina mentioned that there should be 1 to 2 centimeters of GANS in a liter and I think a name, that George pointed out well, that it depends on the size of the bottle, so I was wanting to get clarity on.
(MK) You see, we don't need to measure what. It just depends. Some of you...
(BM) I was... I was wondering if she was constraining to the size of the mason jar, to the diameter of a mason jar.
(MK) No, it's just whatever it is. You know Caroline. Caroline can get hold of anything and make GANSes in it. As long as can contain water and salt, and something can hang in it. The...
(BM) How thick should be on the bottom, then for...
(MK) No, there is nothing. These are the questions which, we passed a long time ago. We don't need... these things, are questions, it should not be. It's not there. I've had the reminder from the Keshe Foundation China that please use to KF Wiki, Keshe Foundation for any knowledge and the contacts you need, or any questions you might have. And... it is, what we call, understanding of the process. If you need any help, any questions it's been laid out very, very clearly. If you need to.
(BM) I've printed out everything off the Wiki. I've read through everything and I listened to 111. So I... I... when I heard her say, that about the thickness of the layer before you pour the water...
(MK) These things... This is what I said, this is till last week. From this week on we... you... we concentrate and understand and work of the soul, and the transition to a new dimension. We've given you the tools to do it. And every other discussion which we see in the background, how many twists, what color, what measure, what cup, this is all irrelevant to where we are. We are looking at the... This is what I've been telling for weeks to the Knowledge Seekers, look at the fields your systems make, and what interaction you make with it. Many people I've seen they say, "Oh, we made the Cup 1 and it... it... worked for 2 days, or 2 weeks, and then it stopped, or the day I made the second Cup, the first Cup stopped. You got to understand, these Cups are, and within them, there is a cycle of life, there's a soul.
(BM) Yes. I understand.

(MK) And... so the interaction with your soul, (2:22). they decide you need it or not. Is there a need for it or not. We had in the Iranian teaching, Dr. Asadi, last Monday, explained something very beautifully. We... We have a well known, even known in the West, in the Iranian culture, a scientist and he... he traveled all over, whatever, and Dr. Asadi was telling us, whenever he entered a place and saw a rise in the... in the disease, that were prevalent in that city, he looked for the herbs, which are growing in that place and why they're growing so much of it. In a way, the earth was giving the solution, giving the gift to the man, "this is what you need to use for your illnesses, for your weaknesses." In a way, it was a GANS of life, and he used that material, in that place, to... in a way, to cure the people. He understood the ecology of the soul of the planet giving to the Soul of the Man, in that position, which it created. There is something which, that mankind has never understood. (Can you close your microphone please?) There's something mankind has never understood, and that is earth is a living thing, and it looks after its citizens. Is a caring mother, and it gives, it feels every need of every life on it. It's not just man. If you have a dog, if you have a cat, if you have a bird, they go... they're meat eaters. For example a dog, it goes for certain herbs, (2:24). in the garden and he eats from it, at the certain point in his life, of the year. How does that grows there, that the dog needs to know, that is there for him to consume for what he needs?

In so many ways, in the Cup of Man, we have given you, that caring earth, that caring life. In how, it's still, is the same earth, it's the same soil, but it allows the growth to protect, to guide the man to the solution, to salvage or to save his life. It's for man to find the herb, not for the herb to knock on the man, use me, and this is what you've got to understand. The questions that, where do we put things? How do we put it? Do I put a piece of Bible in it? Now or a Koran in, or God knows what in it. This shows that the man still needs something to have, to share on to. We got rid of the statues, but we kept the temple of statue in our heart.

(BM) Mr. Keshe, I go, I've gone out to the forest a lot and I've had alchemy, things happen to me where, I just, my body moves into things and I would just grab things, and put things, and I would do food formulations, like what you talk about just from my heart, just because my body would be like a pendulum.
(MK) You have to be careful you don't pick up the wrong mushroom.
(BM) That's in a good book I read from a guy whose diet I learned, about all this, a lot of stuff. But yes, no, I... I've trusted where I've... I've worked with things, (2:26). and I didn't know why I was doing it, but I, my heart knew... So I... I... I understand what you're saying with, with that.
(MK) Thank you very much. Can we give the microphone to some other people to ask questions? Thank you very much for coming in. Thank you indeed.
(RC) Thank you, Bryce.
(BM) Thank you. (RC) We've got... let me see...

(WL) Hi, sorry, can I ask a question Mr. Keshe? (MK) Hi Wang Lin. (WL) Hi. Hi, Mr. Keshe. Actually some Chinese has question, they asked, they want to know what you're talking about March 21st 2021. He is asking, is that the day you're going to leave, or... ?
(MK) You will understand. soon

(WL) Okay. And, I have, myself have another question. It's like I visited my parents, and I made a Cup of Man in front of my mom, and I have the intention that's, that's... it's the Cup for her, and I, and of course, that's the first Cup of Man I made, and after I finished, I asked my mom to give the best wish to the Cup. So it's... I don't know, is that the Cup of a Man belong to me or belong to my mom.
(MK) You are the creator, so she can choose. But you have to understand, the Cup of Man has to be upright, not flat. The Soul of the Man works vertical, and operates in a vertical, physical condition, but a horizontal soul condition. (2:28). So you have to decide which, and how you want to transform it. And when they choose, especially when you set a Cup of Life, has to be positioned in a position, and a distance according to the position of the "Soul of the Universe," not the Soul of the Man. These will... you'll find very soon. Those who get the, what we call, the measurement right, will see directly into the horizon of the universe. You... you, see the... the religious people, they shake, as I explained this before, rock, to find elevation of point interaction between the Soul of the Man and the Soul of Physicality.

To get into the dimension of the Universal Community, universal dimension, the work is different. There is no vibration. Understanding the position and understanding the expansion of the fields. If you look at the size of a man, the position of the soul, and the position of the heart, you will see the characteristics of the generosity, or the meanness of the man, the behavior. When I see a man, I don't look at the physicality. In an automatic way, I assess the two positions, and I know what man I'm dealing with. Because, if you think of it, in a very simple way, (2:30). … If you think of it and understand it the way I have, the shape of the finger, the shape of the toe, the shape of an arm, gives every knowledge you need to know about a person. The height of the neck, and everything else gives you every indication of, in fact, what kind of person you are dealing with. Mankind, soon will understand this, because your physicality is so important to you. When I see the fingers, the shape of them, the way they do, the way they stand, gives me what person I have in front of me. When you see the space gap between the soul, and the way they bend and they move when they are with you, gives you the intention. Caroline says, it's embarrassing with going out with you anywhere, you know exactly what they think, and what they are, and what they want to do, and you still stand it, and play fool with them.

If you understand this, and now get a Cup of Life, or a Cup of Man, remember the height the position. (2:32). How you centralize it, is it off-center? How you made it, will give every indication what your soul needs to receive, to bring that balance into it. I've given you a copy of yourself, to be built by yourself, with the basic structure of the material of yourself. If you look at the bottom of, (somebody says, do we have sound, yes, I hope so, I can hear myself on the other phone) When you have the Cup of Life, as I said before look at the shape here, it tells you a lot, even if you look at it, you know about the health of your soul. But you're not knowledgeable. And it's "Oh, look at the ring there, look at that, have your watched it centralizes to the top?" Isn't that selfishness? Self's matter? Shouldn't that not to be there? It tells you, your behavior. It tells you who you are. It tells you how you see your soul (? self). And you move this Cup a few millimeters up and down, and you see what happens to you. When you make a Cup and you let them to bless

it, to give their souls to it, it's theirs. (2:34). I lived in China for 2 years, and I haven't seen this elusive mother yet, so I don't know if she exists. But, if you look at it, you gotta see what she makes with that Cup.

When you see people, just... just those of you who've been with me and around me, I always tell you to fist your finger, and then open up. And with one look at your hand, I know what is your expectation of life and me. It's so simple, because it carries everything which comes from the soul. I know your emotions, I know your ... everything which you want for me not to know, I see in the hand, and I see in the soul. And then it tells me how much you're honest with yourself, and how much you are prepared to understand. If you look at hand of a person, you know everything about the person. If... you know she's a lover, she loves to be loved, she's a betrayer, she's a cheat, she's stealing, or she's giving, (2:36). or she's a mother who's good to have children with. The same with a man, because you find the match in so many ways, you understand it.

One of the first things people ever come to me, without them knowing, I look at their hands, the way they stand, and the position of their fingers. I know the desire, walking miles away; what they expect. Nothing is hidden, if you understand it. If you look at the position of the man, the neck, the heart, the brain, the Soul of the Man, you understand the man miles before they come in. But we always say, we know the intention, but we do not interfere with the intention, because there's a purpose in that intention. In the universe we don't follow with the shape, we follow with the soul. You can give any shape to the physicality, because within understanding of that, you can change the shape to what you like. If your partner allows you to.

Mankind soon will fall in love with the souls of the Universe Community. It's the same as what you do here in the physical life of the man. But you'll find out in the Universe, you never lose, your twin love. Because he's made by the link in the dimension of physical life of the man, (2:38). due to the food the man consumes, this changes. In the universe, we are on a balanced fields, never die. You heard the terminology, "diamonds forever?" That exists in the universe when you fall in love. You can invite the love to any dimension you enter, then you have to accept it to shape... take shape in that dimension, if it loves to. This is what we call, the Adam and Eve and the apple. The apple is accepting the position of condition, of the physical confirmation. You put physicality to it. When you take a bite of the apple, it means the soul accepts that condition in that position. Try to understand a lot of things, which has been said in the man's life, and then you understand how much true knowledge has been given to mankind over time by those who've been there travelers of the universe, and they have changed it to things that the man can understand it. We say in English, "Let me translate it for you." It means, I make it the way I like, for you to understand it. Then, you become a prophet, because then, they come with the emotion that you understood. (2:40). As the gentleman said, "Mr. (?) said this," so, now you transfer that knowledge. But if you understand the term of the language, you don't need to.
Any other question?

So what happened to your mom, has she changed since you made the cup?

(WL) Ah, I don't know, but I feel she's more willing to call me, and I feel she's more calm. I don't know.

(MTK) Yeah, because you've got to understand, people find the balance. You see, as I explained before, it's a very simple thing. We... we had two choices with the human race, and this choice was, in a way, to write off this planet, which was considered many times, or find a solution. I spent here 40, 50 years to find that solution, before we applied the final phase, because it's too much mess. And what we found out, over past years is that, the planet is beautiful, it just doesn't have a right base mixture, in so many ways. But this base mixture has interfered with the physical and the soul of its creatures together. We had to find a way to bring that balance, that we could keep the beauty of the planet and its creatures. (2:42). And long time understanding came to, quite simple, we bring a new reference point that everybody starts from. That is in addition to the planetary system, but now, everything is peaceful. This is what we've done. This is what mankind will understand out of my mission on this planet. I brought a new understanding, a new level, that, in that process, you all start from a peaceful being, and through it, you create a new dimension on this planet. In a way, we've made the Corona for this planet, that the surface moves to a new dimension, and that new dimension allows peaceful coexistence, and end of wars. We brought this in very slow steps over the past 10 or 15 years, through many, many ways without you knowing. And this Corona, brought us to release it, but in a way, when you look at it, Corona was, maybe was part of, what would have happened, it was a Corona or something else, to make it as a whole for humanity to start from that zero platform, no crime, no need for money, nothing else as our friend said in Canada, and government in Australia, suddenly found money to keep everybody calm. So we don't need that money, we don't need that to calm us, we have to find a new way of trading, that instead of paying people, we open the shops, people come and take what they like. I enjoy to go in the shop and serve people, I don't want to steal, it's there for you to take, if you need it, if you enjoyed, bring it back when you finished with that item.

So, we found out, this thing here, we had... we had to make a new platform, in a way, (2:44). we have to find a new layer for this planet, that, from this layer, which did not exist, a new existence starts in a peaceful manner. In a way, we had to find a bridge, a gel, something that it gives us that new surface, that new level. It's like when you live on the sea level, you will behave different, when you go to a higher level, in a, in a forest you feel good, you feel totally different and you want to be there. So the fool, what call, the "feel good" factor is the forest level let's say. So we have to find that forest level, that is for every creature on this planet, and we have delivered that in the Cup of 1, and the Cup of 2. So, all of you as human race start with equal platform in solar strength. Once you understand this. From this week it will be spread across the mosques and temples across the world, be it even the churches. By doing this we bring the balance level to the whole of humanity. You will see GANS waters of the Cup of Life, and Cup of Man will be washing the planet by fields, or by matter state. So, we have raised this level. And when you reach this level with the sincerity of the soul of its citizens, then mankind starts a new cycle of peace, prosperity and becomes part of the Universal Community. We took, with all the education we did, all of you do, from Amazon to White House, to

Beijing, to the palaces of Iran and the others, we have brought mankind to one level, (2:46). and we took this animal-ness out of human race.

You will see and you'll change as of today. It will take time, but it's taking shape and it started. Now, because we have satisfied this, many of you enter the dimension of the realm of understanding of your soul. And that's why, I said to you, the teaching from today is post-Corona, because we finished with Corona. We used the Corona for you to understand the pain and the suffering of it, and the faster the human race moves out of it, is their decision and their governments. And this is now, where we see, there'll be no more war, because we raised the soul level to that.

Now, we had to get rid of those who created the war, and you will see the end of Rothschild's. Rothschild's family will be paying so heavy for what they've done. We took the love of God from those who shook hand them, let alone them. No family has done so much crime in this planet, then this lot. We'll make sure the name never exists on the pages of the universe, let alone on this planet, and their cronies like Gates, like Rockefellers, who came through the same path, like the kingdom of England and the rest kings. You have wealth, your wealth has to become a tool to bring peace to the others, not to control. The minute you crossed that line, you'll be served so heavily from now on, that you wish you would, ever could ... never even think of it. We took the punishment away from the physical life of the man, (2:48). and we brought it to be prosperity and peace to the Soul of the Man. This is what all these teachings was about, this is what we came here to do it.

We needed a some certain numbers, to create a certain amount of field that the interaction will create the platform of equal, and the balance, and we achieved it, sometimes, round about January of 2018. We knew we have reached the balance point. The rest was just to strengthen and top it up, strengthen and top it up, that it stands. In June 2019, we reached the point of plus. This is why in 2018 plus, I start teaching about the Soul of the Man in a very radical way. Because now it was, the ground was getting built up. The same in 2019, we started structuring the next step, and with Corona we have reached, now we can bring that elevation of the man to live through his soul. You cannot do it overnight. You have to be able to keep a social structure, a pleasure to live, a pleasure to be at home, and go out if you want to go out and then go and help a little bit in the shop, I'll go and look after some sick people, and I'll come back, not because I need the money, I'm well paid and looked after by my nation. You go to the council, "you gave me all these gifts, (2:50). is there anything you want me to do, I'm a teacher, I'm a doctor where do you want me to serve, because you covered my needs." How many of you Canadians and Australians have done that? How many of you say, "Oh, thank you, now I've got the money, I live," picked up the phone and call your community, says, "you gifted me, your government, what can I do? I'm a scientist, I'm a teacher, I'm a cleaner. Where do you want me to work, where do you want me to give some of my time back to you?" This is how the change of the cycle of life will come, you will see it. There won't be a list of jobless, there will be list of jobs need to be lessened, and then you'll understand. You'll be fighting to get a job to go to do, then fighting a job to get to live. It's the job of the Keshe Foundation Knowledge Seekers in Canada, especially in Canada and Australia. Call your

government, call the American government and ask them, tell them, "you have given me the gift, now I have enough to live, you covered me, what can I do? What do you want me to do? I have a knowledge with a GANS, if you want I can help you, and help the others not to get it. But what, what does the government want me to do?" How many of you have done that? Or you said, "oh, thank you, it was a free gift." They have created a condition for you to live. And this will be the new cycle that you'll see the opening up. What do you think the response from your government will be, when many people come and say, "I want to clean. I'm not looking for a job, but I have something else, I want to do, I have a free time, I can do this. Give me a job. You look after me, (2:52). I want to put back in the society."

The changes have come. You have to be wise to see it. You have to be wise to bring it up for the others to see it. How come out of nowhere, suddenly, so much money appeared? Nothing. It has no value. It's just digits on the computer. And this is what the Rothschild's and Gates did not understand. They thought, those has any value! Anybody, any person who serves, and will serve, or has served under the Rothschild's banner, in any of their companies, organizations, in any shape or form, or any of the Illuminati's, kingdom of England and Belgium's, and other kingdoms. Those who served through Bill Gates, through his clandestine activities. you all will find two points. You start balancing your books, with yours, and your families, and the rest. You created a war, and created loss of a child, look what the souls will set with your child and you. Don't live out of the fear, put the wrongs right, but the right way, not out of the fear. You will see many of the Rothschild's banking and operation will come to an end. People will walk away from it because you elevate their soul. They don't want to be in the position that so much is lost, because they lose. You have to understand. You Canadians, you Australians, call your governments, say, (2:54). "we want to serve, what can we do? You're looking after me, I'm getting paid, I don't need to sit at home. Even it's quarantine, I'm prepared to do it."

I was talking to Dr. Rodrigo, I mentioned that in last couple of days, a few days ago, and Dr. Rodrigo says, "do you know Mr. Keshe, my city is clean we have no Corona cases. I taught everybody in the village, in the town, and we are locked down, but we are safe, we walk around, all happy." He served his community, and now, they see the fruit of it, pleasure of being part of.

We see the same in Iran. We see the same in China, we see the same all over the Keshe Foundation supporters, who literally went out to help out, have helped and set up the seed for the next generation. They have created this platform we've been looking for. If you look into the media of Iran the word 'plasma', in past three weeks, has become like a water, liquid, everywhere comes out plasma. Why? Because the government is ready to announce a breakthrough in the plasma technology, which has been brought by the Keshe Foundation. It will elevate the soul of the Iranians, and elevates across the world as it spreads for the rest of the humanity. We are not looking for a few supporters who run the aids, and the other lines in Iran. We are looking for the souls, which have raised in their level, that raises the soul of the nation, and then the world. No one can take the foundation to ransom. No one. No woman, no man, no child. Because, (2:56). we give it to the soul of the nation, we gave it to the soul of humanity. And those who are feeble

they think they sit in a position of power, they will suffer heavily from theirs, exactly how they build it. But we don't do, we elevate their soul.

I close the Keshe Foundation Corona Farsi section very soon, because it has served its purpose, doesn't need. The nation has gone on to recover. There is no Corona, so why do we need to keep it? Step by step, as you conquer your nations, you serve your nation, we close the Corona section off, all these Chats will disappear. Farsi Corona will be the first one to be done, because now we have reached the point, with the help of those souls who served the Foundation, not souls who came to dominate the Foundation. You will understand.

The same in Italy, in France, in Germany, in America. To you, you're still in tangles of the Corona, to us, the Corona is over, because through it, we have elevated you. We have shown you how to go level up, the flood is on this step, we have told you to stand there, it cannot touch you, We have shown you the elevation of your soul, (2:58). Soul of Physicality will not take a position to be in danger. We've served in a very simple way, without you knowing. In a way, you served without you knowing. All these GANS pots, all these GANS glasses, all these Cup of Life, you forgot this. (Where is it? There.) Your Cup in New York, made of the same Cu and it's connected to the one in Iran, and has the same link as the one in Beijing, and the rest. We have connected you without you knowing, through the "displacion" ?? of Cup of Life. We made our ring. We made a full progress without you knowing. That's why we kept on telling you, make the Cup of Life, make the Cups, make the GANSes. Was the saturation of the fields of the planet, then, with the cups, which you made millions of it, has become saturation of the Soul the Man.

Now we start fresh, we start with a peaceful planet. We start with a new cycle of life on this planet. You see, (3:00). it took something very, very strange for very, very strange people to understand the strange behavior of their government. Rick says, was very strange, suddenly the government of Canadian government looking after everyone, giving the people suddenly so much money to be comfortable. Why? Because the leader of the nation felt the pain of loss, his wife went through it. Gates team deliberately contaminated Prime Minister of Canada's family, to take him to ransom. But it brought him out as a man. He felt the pain, he felt what's gonna happen. You think when you put a prime minister of a country in a room with his wife, not knowing if she survives, what he loves so much. It brings a lot of wisdom. He's... understands the suffering. And you've seen the reaction to his nation. No one should suffer. Now the Canadians understand why they received a gift, because the man on the top understood the feeling of a loss, the pain. No position as a Prime Minister and the wealth, could bring his wife back, and keep the mother of his children. Then he understood and he brought that to his nation. (3:02). Now you know why, suddenly, out of nowhere, Canada came to this position. The other world leaders hid and ran. He had nowhere to run, boxed in the room, watching his wife dying, and then he understood, then reflected that back in his nation. The same you will see in other nations, as they go through this transition. But, at that point, you'll understand more and more.

Something very strange will happen in Europe, main chain stores become the main source of food, for governments to give food to people. Carrefour, Tesco ALDI, LIDL, they'll become government organizations in the bank, to support feeding the nation. Walmart. As Caroline was saying, now we understand why there had so many coffins stored in Walmart warehouses. Gates planned everything immaculately to the end, but, except he get kicked, the way he got kicked 2 days ago. If you go into the archives, (3:04). look few months go, a year ago, people are reporting, why Walmart is keeping so many coffins. Now we know. We saw the same thing before the war in Iraq and 9/11. Long before. In England they start making coffins, body bags in millions.

We saw the wars which the Vatican planned in 2013/14, placing the largest order for gun production in the company known in Italy. Why a church pays for the gun? Why does Vatican has to purchase so many guns, for what? Does God have an army? Or Vatican is a financial organization, organizing wars to make money out of it, which is acceptable and it's correct. Vatican, church of Vatican is not Church of God, is a church of murder. How many wars they have incited? And why should the church pays for arms? Who have they got to fight with? Army of God. Or their own lucrative pedophile activities to be protected? Now you understand. In raising the Soul of the Man to the new levels, (3:06). they will walk out with it, and you will hear a lot of confessions from the priests. John Paul protected the pedophile, the new Vatican will open the books of them. The suffering of children from childhood in the hand of the priests has come to an end. They close the churches. The same in every other path of belief. Because man is wise now, will become peaceful, and in that peacefulness, in you, up to now, went to church to pray for the soul of the Christ, now give to the soul of the priest when you see him, and you'll find out very soon, he'll make the confession, not you. You'll understand soon. You'll pray, the way you pray for Billy soul, once you finish with him, pray and give to the soul of the priests, and Mullahs, and Ayatollahs and the rest. Those who have served the nation will shine. Those who abused the nation and mankind, you will see to their own confession. We don't need to harm no one. Try to understand why we did, and how we did it and what is to come. It will come bright. The future for human race from today is bright, for those who find the path to their own soul and nothing else. (3:08).
Any other question?

(AB) Good morning, Mr. Keshe.
(MK) Good afternoon, Dr. Azar.
(AB) Mr. Keshe, you mentioned that some entities from Universal Community were helping the people involved, like the Rothschild, those... How did that happen? I mean, aren't they supposed to be peaceful and then how did that happen?
(MK) You see, let me... it's very simple, extremely simple. Their support to mankind has not come only in one way, or the other. Didn't come just by the prophets, didn't come just by the scientists. Some of the friends from Universal Community saw the work of the Rothschild's, for example, as a way to help the humanity. The way the Mosses stole the Commandments on the way down the hill to benefit himself, so did the Rothschild's, and people like him. And this happens all the time. We don't come up with knowledge on the table on the streets, and then god knows, markets, we facilitate to elevate. And these people we're done that way. The way Moses saw the light, or the Muhammad, to guide

the Soul of the Man, (3:10). and Moses stole some, because he wanted different thing, Rothschild's went through the same process. They received enlightenment, but they abused the enlightenment. So we serve... when we say we take the love of God from a bloodline, or a person, means we give, we take away from them, what we gave them, and they crumble.

In the recent past, in the history of the Keshe Foundation you've seen it. We brought people, we gave them the Knowledge of Universe, for them to be the mouth of the knowledge, and then they thought they are everything, and they've abused it, and we took it away from them. Have you seen them around in past years? When people come, the souls come to serve the humanity, and we give them the gift, and when they abuse it, we take the gift away. Simple as that, so they go back to crumbles. Where is Dr. Eliya Kostova? What happened to her? We gave the gift, gift was abused, it's taken away. The same where you sit, that cafe where I sit with the king, the gift was given to a woman there, she abused it, was taken away. And I've said to both members, receiving the soul, do not abuse it, understand it, and grow the love of man within it. Mankind needs to be loved, which means to be given. (3:12). Rothschild's were given a gift, the way we saw, like the Canadian government, to create the wealth, to look after the others, to bring prosperity, and they saw it as a point of power. So, we've taken away from them. And those who collaborated with them. You will see. When there is no more war, Rothschild made their base on the war, so they will go, and those who work within it.

It is to understand. Any of you, any human race, or anybody from anywhere in the universe, when you receive so much, you give more. And that's where, what we call, the elevation comes from. Few years ago, I mentioned this somewhere. Few years ago the Iranian government noticed there is a mass movement in Tehran, one of the, what we call, the dealers in the market, in Tehran, having a very small store, dealing in tea and sugar died. Nobody ever knew him, he was a small store man, and by coincidence and his name is Tavakoli. And they saw a lot of people are moving in black, they thought there is a revolution, they followed them, what is going on? But they're peaceful. Thousands of people went to the funeral of a tea man nobody knew. How? What they found out, for national security report, (3:14). was very interesting. This tea man took all his profit and gave to people, for their children to educate, for them to start a business to move out of poverty, for them to have an operation they couldn't afford. And when he helped people, he told them to shop from this one, because he helped the butcher to start a butcher shop. Go to this doctor, because he helped a child to become the doctor. And he built a massive thousands of people, what they call, devotees. Nobody... ([Italian] Excuse me, Rick. These Italians are everywhere again.) And this has become. This is how the man should live. Nobody knew about it, and thousands went to the funeral of the true man. The, the, the funds to live, the thing to live is there. How you use it to elevate the others, and why we come to the point that there is not, because it means we have to learn something from it, there is a point of elevation. Until we don't elevate, that point doesn't move.

Recently we saw a letter written by, what we call, Richard, the guy in Australia, creating a very funny things, written in the name of me and Dr. Rodrigo, saying how we've fallen apart, and this, and that, and all lies, to put out, to show, now that he's... that we have

exposed him, (3:16). that he's a crook, he is a deceptor, and he was building this image to go out with. And I spoke with Dr. Rodrigo, I send him a copy, I said, you see how Richard is in heap of it? He's deviousness, as a name of a fake doctor has appeared, and people are realizing, should not touch him? And it's very interesting when you read that letter he's written, and he's put another name to it, and it's a name of me and Dr. Rodriguez, who he is devoted to helping humanity and works with Foundation so closely. These souls don't have room to exist. And the beauty of it he has addressed it to himself, Richard. That somebody is sent it to me (him). And now we see, the whole of Australian group are cutting off from him, his deviousness, especially in Brazil and in US has opened up, using the name of others to harm people and stealing. And then, the funny thing is, he uses the name of Keshe Foundation. What "closery" ?? You don't even have the ethos of the foundation, let alone the dust and the shoe of the workers in Iran. People like this attach themselves to find, to rob other souls, and you have to be wise and elevate. The problem is not with us, (3:18). the problem is finding a balance between the soul and the physicality, and those whose can't find it, they come up with all devious activities.

We seen it in past few days in the Iranian Keshe Foundation. Ego... Taking... Now that the foundation has become successful in eradicating, by those who the ego has become the more than their shoes. For us it's a push on the button, they don't exist. Man should never be proud of his achievement. Man should be proud in what he has facilitated for the others to achieve, and if mankind understand this, mankind has become true man. Try to understand what Life is about, not for you to exist, for what you create to allow other to exist to enjoy life.
Any other question? (3:20).

(RC) Some people with their hands up here. Alvaro, would you like to go ahead?
(AL) Hi Rick. Hi, Mr. Keshe. Here from Brazil, thank you very much! Mr. Keshe, I would like to ask you about the evolution of this virus situation in the world, especially here in Brazil, since the authorities here are not taking this virus seriously. So I'd like if you can give us a general view of the virus situation, what you foresee in the next couple of weeks if you can, sir? Thank you very much!
(MK) We are in post-Corona. You have to understand what your leaders are expecting, yeah. And what they expect to deliver. Is not that the Brazilian government does not do anything. The Brazilian government has no... I have to be very careful. You see in Brazil your leadership knows about the work of the Foundation, knows how they can do it, know how to apply the GANSes. We met with your ministers, we met with what you call, the officials. (3:22). It's not the lack of knowledge, and we have seen in a very recent past one of your Brazilians who is connected to your structure inside was sick in America, they knew who to call and get support for his Corona. Which was responded immediately by the American Team. So, what we see, we are not concerned, we are more concerned about the post-Corona, which will come in the next few weeks. Because what we've done across the planet will show up itself in the next few days, few weeks that will solve that problem. We have take the governing out of the hand of those who were elected, to the soul of those who are devoted, and this is what you have to understand. How many of you in Brazil are making Cups? How many of you people are delivering it?

How many of you are going in the depth of understanding more of? We have a test, we have a beautiful test, and I look at it as a fantastic test. What Belgians have put on the Internet about us, gives those who have understanding of the bigger picture, and those who are a slave to the humanity, and their pictures and documents. And we see those who understand the serving of the humanity, what it does. Don't care what the smallest nation, the smallest pedophile in the world has ever done. There is a very, very strong old saying and use my language in a very specific way. These people, everything with them is small, that's why they became pedophiles. To prove they are bigger, from the brain and everything else. (3:24).

So it's with the leaders of the nations, everything with them is small, and some of them could not even imagine they could be president one day. The office is big, but the understanding of the man very little, stuck in the time when he was born. The new generation of the world leaders will come from the young, from those who understand, are proactive, and they bring the new condition like the prime minister of Canada. The understanding will come from inside, not from the office. And in Brazil, I've been in Brasilia a couple of times in past few months, and it's very, very clear, isolated, what we call, capital, in the middle of nowhere, which has no interaction with reality. And on top of it you put another person who already had no interaction with reality, you make a dreamland come true, whatever you want to dream, nothing exists beyond my door. Brasilia is out of touch with the rest of Brazil, with reality. And those who run that city, and that country through that city are more far away from the reality. Build up, made-up city in a made-up position, everything about it is fake. The power should live within people, amongst people, not isolated and insulated. (3:26).

In Brazil you have a huge problem, and the problem comes from the way you have structured your capital. There is no point of reality. And then, it goes on the hand of those who understand the reality and the points. And goes down to mainly the Knowledge Seekers who are, so many of them, so many of them and so active. You have one of the most beautiful foundation organizations in the world. With us coming to Brazil it opened up itself and it's shining like a star. Two people took you to ransom and shut it down for them to be, and do you see them, do you hear them anymore? One thinking colonialism was their right, and 20 million can ride 220 million, and the other one thinking, 'access to me, was the thing to put everybody else out.' Where are these people? Have you hear from them anywhere? Brazil, you have a beautiful Keshe Foundation Team, you have a beautiful structure.

Now our company is registered in Brazil, you will see the Keshe Foundation very, very active in the coming weeks. The final stage is completed, and hopefully our team in Brazil, we will return to Brazil once the airports open. Brazil is one of our priorities. Then we'll work through the people. And till that time you, it's your responsible to look after for your people. (3:28). Teach as much as you can, spread as much as you can. Don't get entangled in color and the paints of the Cup or the GANS. You have three things in there, and there can be nothing else, but what we put in there. You have 2 Cu and 1 Zinc, or you have 3 Coppers, what else can you get out of there? So the rest of what

you get, it depends on your emotion and how you made it, because it's a live system, and what materials and what conditions you created inside, finished.

The sooner the Keshe Foundation Chat rooms walks away from showing Cups and wires, and it start talking about the feelings and how the emotion of the Cups comes, and how they can elevate the others, the sooner we move to the other level. We have a very good say, we, we're still stuck in the bend of the street as you called it. [Iranian] They're just, the turn is there, we haven't made the turn, so we can't see the roads, what's ahead of us and the turning. In Brazil you don't need to look outside, look inside. Expand the Keshe Foundation, expand the teachings to the, to the nation, the way you've done in Amazon and the rest of it, and it'll grow on its own. Sao Paulo is busy with the hospital, the, Dr. Adma is there, Dr. Adma and all of you. I see the Brazilian chat Keshe Foundation, you are very busy. You're extremely busy. I look at some 30 odd, maybe plus Keshe Foundation Corona Teams. Yours and Iran is like a bullet. You're very active, you've brought all many people on. (3:30). You even, some time passed the Iranians, because the Iranians have gone to the past Corona, they helped a lot, there's a lot of people there, and in the coming weeks, by next Friday, hopefully, you will see a new dimension in Iran. Not through the government, but through the effort of the Keshe Foundation itself, without any support from the Keshe Foundation team in Europe.

In Iran, we work in 4 or 5 new fronts now, and we don't let no one knows about the other, because in case anything, we're still strengthening the arms. When it's completed, when it need be, we bring everything together. The same as in Brazil. In Brazil you are very active, you're extremely active, and keep it that way, you're doing a beautiful job. Since we took your slave masters as Universal Council member away from you, you start flourishing. You were still enslaved in Keshe Foundation, by those sitting in, in Portugal, and we were told, "they have to listen to us, we own them." And I thought, what? Who owns what? And then a long ride. We had to go to Brazil, to free Brazil from the slavery, and the slave masters, who thought they are slaves. The mentality is so strong, it puzzled me. The air-hostess thinks he runs Brazil kingdom and it's his, and the Brazilians have no understanding, and everything has go to his book. Then I found out the slavery hasn't finished. (3:32). You're doing a good job in Brazil, just keep on teaching, keep on spreading, and keep on working.

Now we, I hope we finish the registration of the company, we start working heavily with your teams and others and Dr. Adma and many, many Brazilians. And hopefully we might get a chance to work with the Brazilian government, which once we get there, it will be too late, because I'm sure the ethos of the Foundation with govern very soon. (AL) Thank you, sir! I'm helping to translate your message to Dr. Adma and she's doing a great job here in Brazil, a really great job. K- I understand, she's working for the nation, not like the others who work for their own pockets. If we expose those who blocked the foundation in Brazil, and they were making thousands and thousands, and using our name, you'll be puzzled what we found out. Dr. Adma was working for the nation and she'll be, she has full support of us. Anywhere we can do but at the moment we have to finish in one place, that we can support many, many doctors across the world. We will issue within next few days certified documents working through Keshe Foundation, will

change a lot of things for you to actively get engaged with your governments. And we're not relying on the Keshe Foundation Farsi Group in Iran. We have started a different structure and we'll bring it through that structure internationally out. (AL) Thank you very much, sir! (MK) You're welcome.

When we finish with the Corona, in Brazil we might change the Keshe Foundation Corona Team in Brazil, (3:34). to the New Space Technology Program, where Brazil has a deep understanding of the Space Program, and we start teaching that side of the technology for the comfort of the nation. Some of the Keshe Foundation Corona links will be converted into development of the new understanding of the soul and technologies and the rest of it. So we use that platform to build a new world structure for teaching. And Brazil is one of them. (AL) I'm looking forward to that, sir. (MK) Thank you very much. (RC) Okay, thank you! Mr. Keshe and Alvaro. We have a couple of more people here with their hands up. Dirk? Perhaps you can go ahead? We allow you to speak there... Hello? (DJ) Hello, Rick. (RC) Yes, hi.

(DJ) Yes. Hello. It's me, I'm Dirk from Germany. Hi Mr. Keshe. Sorry for my bad English. (MK) Sorry about that, we don't speak German. Q: I've only known about your technology for 8 weeks, yes, and I don't think I have enough time to study all your information about your technology. It's... I love it and I want to know so much more about your technology, about methods and the soul, and, but I have CFS, (3:36). chronic fatigue syndrome and Hodgkin's and other diseases, and because of it, I don't have enough power to learn all the day, and... I meditate so much, because of CFS and lay down, meditate. (MK) Where... Where do you live in Germany? (DJ) I live in ?? Greeland. (MK) Where? Where is Greeland? (DJ) Greeland. You know Dortmund? (MK) Mhm. (DJ) Yes, 60 kilometers from Dortmund. (MK) Are you in German group? (DJ) No, I try to come to the private study and make my account there but when I want to upload my... my... my document, the pop-up window don't start and always all the data's are away. (MK) There is something wrong there. Do you know the Keshe Corona German Group. Are you in there? (DJ) Yes. (MTK) Okay. Through there send me a private message, yeah? (DJ) Yes. (MK) Go to my private. I'll help you come out of your CFS very fast. (Dirk) Oh, thanks... Thank you, thank you... Thank you very much! (MK) You're welcome. Because we know the process, we know how to help you. (3:38). We should be able to get you back on the road with it. With Hodgkin's it's the backside of the same disease, and so we should be able to help you, to live a more comfortable life. (DJ) Oh, very much... (MK) I'll show you the way, I'll show you the way what you've got to do, and then you do the rest of it yourself, but I have to understand a little bit more. Send me a private message on that line and then I will respond to you. (DJ) Thank you, thank you very much, Mr. Keshe (MTK) You're welcome. You're welcome.
Any other question?

(RC) We had an interesting question from Florin who maybe represents some other people out there that are healers and so on. He says, "I am not a doctor, but I want to help people to heal, heal people who do not understand your gifts right now, with procedures you offer only to doctors. Can you accept applications from non doctors?"

(MK) No. Especially with Dr. Rodrigo heading the new medical team to Keshe Foundation. Hopefully next couple of months we start, now that the Chinese opened up. And we can get Austria opening up, and then when the teaching of the Keshe Foundation will even be moved away from non-medical trained doctors. We open a new channel and I was talking yesterday, a new headquarters for the center of control for the, what we call, the Enhancement Unit will be set up in Iran, under the leadership and instruction of Dr. Rodrigo. That we will only accept doctors. We start training doctors in a very rapid way, as the Enhancement Units start distributing around the world in May and June. (3:40). And in that process, no, because it's too, too dangerous, and it can get abused. Not technology, it's not dangerous, it's the people who will abuse it.

(RC) Okay, thank you. We have a couple of questions on the elevating of the Soul. Liliana has a question. And I think she can maybe ask it in person, it'd be best. Go ahead Liliana. Do you need a translator? (LI) [Spanish] (MK) Hola. Who do we have here? John? (JW) Yes, I'm here... (MK) Could you translate to us, please? (JW) Yes, I'm ready. (LI) [Spanish]

(JW) Her first question is, is elevating our soul, is the same as elevating our vibration? (MK) Souls work in the level of fields and there is no vibration, there is no frequency to it. When you get a vibration, a frequency, is when you're transferring your fields to a matter state, for manifestation of that field. And it only exists in matter state. We see certain amount of what we call, not resonance but field balancing when the 2 plasmas come together, (3:42). but doesn't work as a resonance, it's just finding the field the strength of it, that they merge together. It's, it's totally different concept and principle. In the matter state the fields tries to get through a given like, so, a given gap, so you call it frequency, till you get itself cut off to go through. In the world of the plasma, the fields juggle till they find their matching couple, strength. So we don't see vibration, we don't see resonance, we see coupling. It's totally different, totally different understanding. For that, there is no.

(RC) I gets right into Nikolai's question, which goes, in elevating the Soul of the Man, does the resulting space gap, which has increased in size between the Soul of the Physicality and the Soul of the Man, dictate the transformation of the entity's behavior? (MK) Doesn't dictate, it brings a new insight. It's very strange, but it does, it works. Let me see where I can pinch a page. I've said that, I was teaching this, I think in the Farsi teaching very recently or in one of the teachings, or one of the public teachings. When you have a man, like our friend with CFS, he will look like this when you see him. The position of the soul is somewhere here, and the position of the soul is somewhere there. And the man will stand very much like this. (3:44). After you elevate the soul, you understand, you teach the man. I always take a picture from them when they come to see me, especially people with CFS and Fibromyalgia and that. I'll ask the gentleman to do that for himself. When you elevate the soul, when they understand the position, when they bring confidence, that their position is what it is, and how they change, the body changes this way, notice the height I put on, yeah. Literally the man stands like this. In strengthening the soul, you see the body shape changes, the standing changes, and to create such a space gap, needs a strong fields. It gives you strength, because the length of

the neck has fixed the position. When you bend it, when you bend the shoulders, you stretch everything down to this. When you elevate it, they stand upward. Yes, it does. And you see so clearly with, with people who you elevate. Just take picture of yourself and go through the process. You stand taller, this way you're hunted. This way you're balanced and correct. The only problem is, (3:46). once you get at this point, don't make somebody else to be there, that you hunt. Then, you'll find out very soon you'll become, do what you were before. You raise the others to stand, the same as you. You don't get hunted, you change your friends, everything in your life. You change suddenly the color of the furniture and everything else which goes with it. Especially with Fibromyalgia, CFS and Parkinson. The posture changes. This is the posture of failure and sickness, this is the posture of strength and health. When the soul grows strong, looks after the body too. We don't strengthen. We strengthen the soul of the physicality, and we strengthen the Soul of the Man. In strengthening, they find they have a big problem, there is a little thing called the neck, which fixes it. So now, the only thing is pull up the rest, that we can accommodate. And it's still not ??.

When you look at the man, look at his neck, you know how he works with his soul and his heart. Deviousness comes always from the man, who are very short, or very little neck, because the soul is not strong enough. Look at the German Chancellors, look at the American Presidents, very tall, with a strong will to power. (3:48). When you look at Prince Charles of England, you know you have a biggest failure, if he comes into power. God forbid he ever takes kingship, goodbye UK. He is one of the most incompetent people, ever, will come into kingship. And I said many times, kingship in England has to skip, if it stays, by one generation. If you look at the Japanese emperor, and before emperors, shows the behavior of the nation, deception. It's the way they walk, the emperor reflects the nation. You see, it is very easy. We analyze the behavior not the name and, what we call, the, what they do. How they behave how they understand, how they position themselves in different conditions. If you look in the Chinese, President Xi tries to be in the press everyday, something is shown of him somewhere in the press, everyday. The body cannot take so much. And when you watch his pictures, (3:50). you understand how the man is, how he feels, and how decisions are made in those days and whatever. There's a very beautiful picture of President Xi marching in front of the army in a, what we call, in Tiananmen square. It's amazing, how remote he is from the nation. And this is just, just after, what we call, the massive problems for him. If you know the problem, then you see the man on the back of the car, the way he is driven marching is, you see it, the man is in problem When you see the President of Iran walking in a what we call, in a march with the world leaders, or when they come to Iran, they have to welcome on them. You understand the devotion to the nation, or lack of it. When you watch the welcoming of the head of a state, by a head of a state, don't get absorbed by the pictures and the sounds, look at the behavior, the standing, the gap between the leaders, how and who carries what. It gives you a lot about the relationship, and about the position of that person in that office. Women are better to disguise it than the man, because their handbag takes a lot of shape, (3:52). and women always hide their emotion in the handbag, as I call it. Where they put the handbag, how do they carry the handbag. If you look at the queen of England carrying a handbag, is something, "I own everything, why do I have to carry this?" Most probably, in it is the dog food for the most favorite dog.

Watch, understand, then you see the reflection of the soul. It's, now that you start learning about the soul understand how the soul behaves in the dimension of physicality. How does it make the physical life to manifest itself. These are what you have to understand. Everyone who'd come across in Chinese Keshe Foundation or in the European or world foundation with Wang Lin they all say, she's so happy, she's always, she's always full of life. And then, you go to Keshe Foundation other groups, you see nothing but troubling, short, misconduct in behavior, and everything else. When you see the 2 ladies heading the foundation in China in worldwide, they are full of life, both of them. And when they are together, It's just, what you call it, "let's give to the world and change it," when you saw them in Malta, together, we see it. We don't need to worry to take, we are there to give, (3:54). and they both have been given unconditionally to the whole. I observe the behavior, and it's amazing what you see.

Observe the behavior of your leaders, and then you see where your nation is going. Then you'll see, does it affect the Soul? Yes it does. But if you misconduct, you lose it. It's the same with this, this, the world leaders have the same problem. Always elevate the soul of your leaders, doesn't matter in what shape or form, you'll find that their conducts will bring a lot benefit in what you raise the soul of, the whole of the nation. Mankind has to learn, not to vote with the ballot box, but to elevate the soul of the leaders, through their soul. You will understand very, very soon, ballot boxes will become a thing of the past, once mankind understands the elevation of the Soul of the Man. This is what I told you, the member of the Universal Council should never explain or say who they are. People will see by the light they carry with them, they see the soul, because they're to solve, to say, to serve. When a person needs to say, "I'm the Universal Council member," you better forget about it. When you're in a meeting and you see the Universal Council members, (3:56). they should be like a shine, shining star. People know where to go, where to be enlightened. When they have to introduce themselves, it means they haven't reached the level of devotion, to serve. You soon will understand. Now that we have entered the level of the Universal Community understanding, you have to train you what to see.

You have the, what did a guy said, "Mr. Keshe you brought the gas chambers, and we work with that, and then you suddenly brought this, and now you brought GANS," and the biggest evolution in the teaching in the life of the Keshe Foundation is today's teaching, now we have introduced you directly to your own soul. This is the evolution, this is what all the teachings has been about, that we built up, and build up. You can't go anywhere there. What GANS do you need, what GANS you need, to elevate your soul, because it came from it, that's why you needed to feed it. Now you understand. From today, there is no GANSes, there is no, "it's a new energy." There is a new system, there is new reactor, is called, your soul. And you have to understand it. You have no choice, otherwise you get entangled in Corona, and you loose it.

The dimension of you having no say, in how and where it will take place. Now you have that knowledge and the freedom, and no fear, because as I said, like a mother with the open arm, when the physicality runs into problem, "come in, darling, I protect you, I'll

clean you and send you outside again." When you go outside and you play, and get dirty, what do you do, you go mama, she washes you, she cleans you, takes all the scratches off, and puts the bandage on it, send you out to play. (3:58). And now the body of the man is in that position, you played outside, the players were rough, you got damaged by Corona, come back in the arm of the soul, get repaired, cleaned up, and put outside. It's not that you're not gonna play football again.

The Corona, or the cronies of the Corona, Billie's, are many Billie's around. You go back in, because you let it in, the mother is you. We don't say, "once you use the GANSses, you are not gonna get anything," it's a fallacy. We tell you, get it and go out and play, you get hurt, there is a shower and a wash. We put you out again. The best players, doesn't matter how many times they get injured, they repair them on the floor, and put them there, because they're the most important players in the game. You're the same, you are the most important player in the game. What I taught you today is a new change, but I brought it so smoothly, that you're all waiting for, 'how the GANSes go, how the things go.' You change your emotion, your change, become honest with yourself, becomes truthful to yourself, and watch the Cup of Life, and watch the Cup of Man, and see how they change. The change in them is a reflection in your emotion and your soul, nothing else. From today we are in a new game, and from today you have all the tools and the knowledge to elevate you souls to free them from your physicality. But how you do it, is your problem.

"Can I drink the GANS of this?" You are still in the dimension of physicality. "Can I use the energy of this?" (4:00). You have entered the dimension of Universal Community. And now it's in your hand. It's totally in your hand. Do you have Parkinson? Why? Because the soul does not accept something? Or the wife is a little bit too old and you had to go to self-service? It's very, very simple, and then, you understand, you cannot let your body be abused. You have to be correct with yourself. And then, when you don't abuse your soul, your physicality, nobody can abuse you. Then you are ready to become, and leave, and come back, you choose. You don't need to die, to separation of the soul, you're now, you're in the seat of control, you never die. But you know, there's accommodation to make. It's very much, from now on, for the man has to be like going to the office. You travel in the dimension of the soul, and you come back to the office and the physicality, to be home with the children. The work is done with the Soul of the Man, and the physical life will be enjoying the existence. Can be done with the physical body of the man.

I have brought you a big change, for those who understand. And I brought you a change for the rest of the life of humanity on this planet. We are finished with the prophets, we have finished with gimmicks of what you could understand. Now you have become in that level to understand, (4:02). and it's your responsibility. As I said, in the Keshe Foundation KFSSI, we never gave a certificate, because it depends when you mature to use the technology, and that time is the point of maturity and your certification. How many of you have been in there, as a KFSSI (Somebody's microphone is open.) for years, and none of you made the GANSes. You're there, dabbling everything, and now, that the Corona has come, like the Italian Universal Council, like the Arab Universal Council,

like many other of you, out of the fear and then the pain of the damage of the Corona, you start learning the GANSes. Now why have you had to learn this, because, if you're in Universal Council and you don't understand how things connect, you had to learn.

Now, what's the next step, how are you gonna use your soul to interact, where you don't need the dimension of physicality? In a way, today's teaching is like the first time we showed the small dynamic balls. Everybody said, "Mr. Keshe, is now? You've changed it from GAS to GANS, we're gonna learn this." Now you know it's dynamic. You know it's housing, is not a ball, but your brain. You know that you have control in the speed of its work, through the heart and soul of physicality, the motor sits in your solar. And then, you understand, "If I shake there, I shake in my soul, I fall in love there, I fall in love with my soul." And then, you understand, now, the game has changed. (4:04).

You don't need from today, to die to walk away from Corona. You embrace it, and extend the soul beyond it, and it repairs, and it comes back. And it's a child, as I said, they'll play, the physicality is so beautiful, you can go and get damaged, and you comeback in. Instead of going to the hospital, just increase the soul, do the repair, back on the street, play the game of life. Otherwise, you're just born and sit in one place till you die. Even if you become the travelers of the space, now that you understand it, how much can you travel, 1,000 years, 5,000 years? And you get it, you miss dimension of physicality's. And you would like to smell the roses, and you'd like to be able to kiss a child, you want to hold a woman, or a man, to enjoy the pleasure of physicality, you come back to Earth, or you'll find another planet like this. As we say, it reminds me of back home. And then you had enough, you pack it up, you take the soul, you travel to the other part of universe. You become travelers of life, not the physicality.

Until you get to that point, man needs to mature and nourish the soul. You can let it happen, to come by natural death, or you can nourish it, and control it, and be a part of it, during the life of the physicality of the man. Because every time you appear and reappear on this planet, (4:06). through the soul travel, you come with new dimension and age, not the age you left. Sorry, you come back in 500 years, back in the same room, same spot, it's been demolished, is an apartment block, and nobody speaks English because they Chinese have moved in. You're lost, so you become a Chinese, and you fit in, and you live on the 400th floor. Now we have to learn to live with the new dimension, the dimension of the Soul of the Man. As of today this is your new tool. We give you a transition point, a point to be able to do it, till you learn. It's like you get a driver, to get a driving license, you're given a car, and then you go and learn driving lessons. Now I've given you, your dummy car, as the Cup of Man, till you learn how to do it, with your own soul.

Simple, a new game, a new beginning, a new life for the mankind. You learn, you want to extend the physicality, or you want to extend the soul, or you want to pack up the tents and move somewhere else. Up to now you did in your dreams, because you didn't know how it happened, now, you do it in reality, with the full control. If you become good at it, you'll be one second here, next second gone, or the next again, is where you wanted to be, in the office. (4:08). Our Topoli has reached that point and he plays, I see him. In the

past few weeks, because now he's totally locked down with us, massive amount of it, and he, at the level of the GANSes, where he walks, he has reached that level. He appears in one place and goes somewhere else, and I enjoy it. I was telling my son yesterday, he was here standing in front of me, and then he was back outside, because he knew he was supposed to be outside, not inside, because mama said he has to be outside, he shouldn't be inside. A few days ago he played another game, does he do it intentionally, but he hasn't realized it? It's a different thing. I said to my son, he was here right in front of me, inside, but he knew, he couldn't be inside because mom wanted him to outside. Immediately, you could see him outside, sitting, waiting for you. If a dog can do it, so can the human race.

You have access to all of it, I have taught you enough. Now you have to understand yourself how to choose the time of your dream, to be where, and to leave. And be open and transparent with it, because otherwise, "thy shall steal," and thy shall not steal.

(4:10). Thank you very much for today. I have opened a new chapter for you, a chapter which mankind has been waiting for thousands of years. And hid it under different names, words, banners, everything else, mosques, and churches and synagogues, and temples. Now you have the freedom of your own soul. Try to understand it, try to understand what suits you, and your soul, not what others want you to do, because if it's correct for them. As long as you ask the question, "is this Cup right, is this color right," it means you have not matured. Sit there, understand what this means to me, and what it brings me, and through what it brings me, elevates me, to serve the others, then you are matured. As long as you see the questions, "my color, my cup, my this," it means he's still in "the bend of the street," as we call it.
(AB) Mr. Keshe we're gonna have soon classes to teach people how to get the soul out, and travel? It's gonna to be easy.
(MK) Are you doing it? I'm not doing it.
(AB) No, I mean, in the future, we should be doing it. I mean, as we start doing it.
(MK) I still got till 21st of March next year to teach you a little bit more.
(AB) Yes. I mean, we're looking forward to that too.
(MK) Let's see. Thank you very much for today, and hopefully, hopefully, I have started a new cycle for mankind, and I hope the man will be kind to his own soul, to see the kindness of the Universe and the Creator. Thank you very much.
(JG) Thank you, Mr. Keshe.

325th Knowledge Seekers Workshop - Thursday, April 23, 2020

(:20). Pay tribute to Knowledge Seeker one of the first ones …
Plays video .. This is a lot of understanding, needs a lot of comprehension, and in so many ways, (:22). what could have been, what could have become, and where we stand on what was foreseen. …
Dirk Laureyssens ; 3/20/1950 to 04/05/2020. (?? Red Circle)

(:24). .. This is the passing of De Laureyssens, we were informed of it last Sunday. In so many ways, he wrote so much, and in so many ways, he took so much. What will happen? We'll elevate his soul, and pray for his elevation. (:26). On the 9th, when it was his burial, during the teaching I came off the teaching and I said to Caroline, "I feel a pain with Dirk, is something wrong?" She said, we don't know. And it was the time when he was burial during the teaching on the 9th. Bless his soul, hopefully he'll find peace ?? as well, ?? his travel through the space of the creation.
Going back to the teaching, and in so many ways, bringing the teaching in line with what is happening internationally. Would you like to take this off please. Is the reality that many things which we said, to be happening with Corona has become reality and in the past weeks we have seen more and more confirmation ?? What we said at KF, (:28). weeks ago of this disaster.

(:30).

(:48). In so many ways, would those who we call black, transfer to the plasma of the soul as they have no layers on them to loose. This is way more of them die, because there have been no exchanges and evolution in their race. Now pieces of the puzzle, and pieces of knowledge coming together.

(:50).

(:56). in the physical structure, would they change in comprehension in the mental …

(1:00). This is now for many of you, who did that genetic test, comes to bare, but his is a ?? which comes by the energy transfer of plasma.

(1:02). … many of the people around the world who survive this will become black. It doesn't matter how many millions turned
,, what is breathed in the air. Every time you breath the chances of you becoming black is strong. There is a very strange feeling, and many of you, must have felt it, must have touched it, and felt it on skin, in your breathing, and everything else. When you go to supermarkets, which is now the only place people can shop, you feel places where you are hit by Corona. (1:04). you feel the change of the field of the shop, you feel the change in the field of the environment you walk in. Then you feel the pain, or the change into what they call, is a Corona condition. This is not anymore what we hoped, that will stay as Corona that will go in my lung, now you feel it as a cloud, you enter it, you feel it.

So when a man with Corona walks in a supermarket, he can leave patches of it, and as you walk in it, you feel it. I have felt this 3 or 4 times in the past week …

(1:06).
.. If you have a human blood you carry it. If you don't have a human blood like me, you can survive some of it. I hope a lot of you know about, what I say, "my blood." When I was poisoned by John to be killed, ..
(1:08).
.. the blood is highly radioactive and can't be absorbed by many things ..

(1:10).

(1:16).

(1:20).

(1:22). .. Posts the text of Farsi talk of Mr. Keshe, translated by Dr. Pares. ..
Rick reads. …
(1:28) .. The original recording has been sent to the head of the KF. It can be recorded that if in the future there is any modifications can …
(1:34) … In a way this is a very, what we call plain explanation we gave to the Iranian doctors and Dr. Pares, has extracted the essence of it in translation to English. (1:36). In so many ways, it goes back to our teaching of last week. …

(1:50). If you are honest enough with your sel-oul, and see not only you imagine, but you actually become. And walk into the dining room with your children there, and you say hello, "mommy is here," and see how many of them will run out of the house. Now you understand, and now you have to comprehend the totality in steps, and in full understanding, this is why I have been telling you for weeks, look at the energies and forget about the Gans's and the Cups. And see how you can graduate into the school of the U. From now on it's you who decides and interacts and becomes a passenger of the U, and no one else, and if you reach that state of clarity of the soul, you will take that journey, if, first of all, your STP is happy, and all those around you allow the transition, because it is them who have to adjust to. So in so many ways, education, (1:52). mass education the way we are doing, become essential. Because we can't keep the man in the emergency room just because he has changed his color, he is not ill.

(1:54).

.. cells, (1:58). in one condition of physicality they'll manifest themselves. They might choose it for thousands of years, just to stay in that position. But you cannot create children just to stay in that dimension, and their soul become ?? soul of universe in the direction of the what we call, love. And in so many ways it has to be understood, where ?? in time mankind will separate the two, and understand the separation of physical love,

physical interaction, children from the physical life, and children from the interaction of the souls. As I said in the teaching last week, mothers are responsible for the children they bring up in the dimension of the soul. And in so many ways mankind will go through this transition, even if it goes to the time that this Corona, or any other virus will take the physical man from this planet, the whole of the race. Those children of the STM will generate themselves in the future time on earth or on the point of destination, as they desire, as they never had, they never involved, the physical interaction, and physical life. In a way, when you go from your STP to your soul and then you choose the travel in the space without physical soul, but with the totality of the power of the STM and then you manifest yourself at the point of desire and destination, (2:00). the physical manifestation, if there need be, that's the gift that you give to the children of the soul as they never will have the dimension of physicality, unless they decide. Mankind be wise to these words. In so many ways, humanity and the knowledge which has been gathered over millions of years will not be lost, but will be added to the knowledge of the universe. And by the dimension of the understanding of the interaction of the fields, mankind will share this knowledge in the space by the total and absolute ?? all which has been created by the Creator, as each one has his own strength fields, and anyone in the U Community can call upon when their field strength, is called upon. Knowledge of the man stays within the boundary of the earth, and limited open of the others, but when that knowledge becomes part of the knowledge of the soul, without the physicality, becomes the knowledge, and added, to what we call the universal knowledge, and the Universal Community. Now you understand how man, gradually is entering into the dimension of the UC by understanding his own participation in it for millions of years. ..
(2:02).

..
Any questions. (2:04).

WL- .. Which kind of changes will the Coronavirus bring to the animals, ?

(2:06).
.. The color change doesn't come in one go. (2:08). it takes days and weeks ..

they can make the journey back ..
(2:10).

It's written to Dr. Azar. …
(2:12).

(2:14). .. in these times of trouble to feed the man, CM

(2:16).

(2:20).

(2:22). We'll go through your people, not through your administration.

(2:26).

(2:30).

(2:34).

(2:50).
(2:52).

(3:00).

(3:04).
(3:06).

(3:08). elevate your own soul .
(3:10).

(3:20).

(3:22). Q: children ..

(3:26).

.. you don't understand that you don't understand him ..
(3:30).
.. is there some instructions for elevating soul ..

(3:32).

(3:36).
.. pictures of world leaders ..
(3:38).

(3:42).

(3:46).
(3:48).
how to improve your soul
sit down ,, be the humble enough ..
(3:50).

(3:52). .. Do you have a close relationship with your wife? Q: Yes. K- Use her as a Cup of Man. .. your partner is your Cup if you are clear enough …

(3:54).
.. you don't listen, I think I can't get you one way or another. ..

(3:56). K- I hope you raise your soul.

E- I'll give you a presentation a month.
We actually introduced 3 ?? products ..
(3:58).

(4:00).
.. E- continues with products …
(4:02).
These pads etc are loaded for pain relief and elevation of soul ..

(4:04).

(4:06).

(4:10).

(4:16). Italian police going for the criminals who stole from KF.

.. Cleaners in Iran allowed to use KF logo when cleaning mosques, etc …

(4:18).

Thank you very much for today, we take the next step. Corona is very serious ..
We have rescheduled Iran for 19th of July …
(4:20).

.. Would like to play the tribute to the man who could see the future but didn't want to be a part of it, the money was too good. (4:22).

(:19).

.. one thing you will see, the emblem of KF, (1:00). and you'll see the KF Iranian flag, and KFSSI and spaceship Institute as one organization.

. the new science and T which feed the man without killing. (1:04). This is what we have to bring it. Rapid development of T which bring energy by its conversion, at the same time, this conversion will create new dimensions, and in the coming years new looking human beings. You got to realize, when you can feed yourself without killing, when you do the digestion, breaking up outside the body of the man, a lot of organs won't be needed…

(1:06).

(1:12). .. Iran will be given satellite system for Corona to clean environment of Iran.

(1:14).

(1:20).
Any Questions.

(1:32). .. if Corona is exhausted into atmosphere of solar system. ..
Any other question.

Q:

(1:36).

(1:40). 90% of all illnesses eradicated ..

(2:00).

(2:08). ..
Any other questions.

(2:10). Spanish .. Q; Can you use Gans in other systems like ?? organite … It's a system created from the little pieces of metal that are shaved, (2:12). and mixed with resins ???

(2:14). K- This is very much what we call Nano T, because it absorbs energy …

.. The knowledge of transfer of energy was known to Mohammad ..
(2:16).
.. Orgone from Wikipedia ..
(2:18). Rick reads
(2:20).
(2:22).
(2:24).

(2:28). .. This is the first time we disclose this, the police officer Delanois is part of the child trafficking in Belgium ..

(2:30). .. pranic feeding

(2:34). … Azar tells about her Indian guru and method to feed from prana ..
(2:36).

.. This is the way it's done, by breathing the function of the whole thing, (2:38). because you control the rhythm of the air you take in, Air is the free flow of energy . mega tons of energy …

get the breathing method here

(2:44).
(2:46).
(2:48).
(2:50).
(2:54).

(2:58). .. I taught you the secrets of the universe. ..
(3:00).

(3:02).

(3:04). importance of breathing ..

.. I haven't shown you anything about Cup of man yet, in reality it doesn't exist. In truth the CM is the man himself. (3:06).

(3:08).

.. I had a gorgeous message from the UC member, Jamilla.
(3:20).
(3:22). Q:

(3:24).

(3:28).
.. seeing people's soul .. know about lying …

(3:32).

.. When what you say and what you think the 2 souls meet, and maybe you understand for the first time, what we call the true soul mate, never lie, think the same, true love giving ..

when you say I love you, everything is giving ..
(3:34).

(3:36). .. Q: Do I have to make the CM? K- you are married you have a man. I think I answered you in a very quick way. Should we call it a day.
Q: It's been bothering me for a long time. When I travel with the soul to another place in the U, what happens to my physical body, … ? K- Usually, I think you haven't understood, usually when you get to that point when you travel your body goes with you. If you want to, you don't need to leave it behind ..

(3:38).

(3:40). Thank you for today. .. if you like to order this new suit, virus suit, please do it as fast as you can, we want to see how you .. maintain and control a lot of things inside the body ..

(3:42).
.. K- Have you lost all the black spots on your body? Yes ..
(3:44).

(3:46).

(3:48).
KF is active 5 days a week …
We'll join the KFSSI to a leading university in the world. (3:50).

(2:12).
.. Those of you who have reached the point of

(2:14).

(2:20).

(2:24).
Any questions?

(2:32). Q: .. How do we transform our bodies into clear light bodies?
K- Enlightenment. .. Enlightenment doesn't come by ?? words. Enlightenment comes by understanding the light of the environment, when you are ?? living, not in the shape of light, but the fields of it. And what we have tuned to receive. Many times in the teaching, I have always said, very simply, if you understand, how you can be enlightened, it depends on the maturity of the soul. 20%, of physical needs. of what you consume comes from the food, by the killing, (2:34). 80% by environment already, this 20% blocks you.

(2:38).
.. it only depends on you, and nobody else.
Any other question?

(2:40). Q: .. New Zealand. The yogis have the sate of Turiya, stay awake while asleep.. ??
K- It depends, is that your ?? key.
Q; When I was a little boy I had trouble going to sleep, the electron going around the proton… .. (2:42). .. sleep on side or on my back ..
K- I don't know it depends on how your soul is set with your physicality ??

(2:44). .. how you mature totally depends on you.
Q: … you said ?? is like a mothers hug, in Italy the mother is more important than the food, so I have a hope. … If the emotion of fear, when you are hungry, and sentimental is an obstacle, how can we .. (2:46). control or deal with them …

(2:48). .. emotion has a strength ..

(2:52).

(3:02).
is it a virus or is it food,
(3:08).

(3:36).

(3:40).
.. you have to elevate the whole STM ..

328th Knowledge Seekers Workshop May 14, 2020

ENGLISH TRANSCRIPTION

(:09): .. As Rick said I have no choice I have to be here. In due course and time, there will be others who will take the Thursday teaching, as we step down .

(:12).

.. When we land in another place in U our soul picks up that language

(:16). .. Earth is not the only place that doesn't have peace., but it is different, not tranquil …

TEACHING Soul:

H and
(:18). Deuterium Helium ..

(:30).

(:32). EU meeting about Nano technology …

(:36). .. signed a contractual agreement ..

.. we can't analyze it, it's too advanced for our machines ..

(:42). We knew this now we had confirmation in physicality

(:44).

(:48). in the intestine .. first part the body absorbs radiation ..

(1:00). (when die if no soul becomes energy of the U)

(1:04).
(1:08).

(1:10). what is a ray of gamma and what is Gans .

(1:20).

(1:32).

.. We entered the world of UC, this is the path we have set for now on. We don't make Gans's now we teach you one thing, where on this do you want to be. (1:34). that it is

you who has to convert the fields of the rays of the Creator through your body to be useful fields of your body and what you do not need you don't touch …
.. don't need to carry storage, don't need to eat etc.. man's appearance will change. .. don't need eye, ears, nose, mouth,
(1:36) . no need for lungs, digestion, kidney, liver

STM is female, STP is male ..
(1:38).

you need the interaction of physicality to create
(1:40).

(1:42). No religion in space, do good, act good, think good.

(1:44)

.. we are going Post-Corona
preparing you for Universal Community

(1:46). . As long as you are residents of this planet, you can carry on with your own tribal behavior, as that brings evolution. But once you enter the dimension of the UC you have to be the same in understanding the strength of the soul of the Creator in all His combinations. So you behave differently in the office, and when you go home you behave differently. ..

(1:48).

(1:56).
Video Creating Peace Dome , Brazil Iran. (2:05:40).

(2:06).
(2:08).
.. We have covered the 2 ends of the planet (Iran, Brazil) , it's up to you to fill in the gaps.

(2:10).
(2:12)
the whole UC is elevating man and themselves. ..

(2:14).
.. Thank you very much for today ..
Any questions?

Q: … Is there any relationship with Swiss Indo they …

K- I don't even understand what this is. (2:16).
.. These are different organizations .. we should not be …

.. This Corona brought a lot of people to thinking. they couldn't be touched. ..

close quarters with the White House who have been infected will get better, (2:18).
follow them for the next 3 to 5 years, they will all die, most of them will die of cancers, and abnormalities due to Corona.

Any other question?

(2:28).

(2:56) Dr. Aserdi, … leading scientist in Iran, within the structure in Iran ..
has in-depth knowledge of both science of the man
it's very much the relationship I established with Dr. Elya Kostova,

(2:58).
(3:00).

(3:04).
Q: abut Cup ?? Zn turned black …
(3:06).

(3:08). .. Cup of Man ..

(3:10).

(3:12). Vegetarians eat more souls…

so we got worse
Q: What can we do? K- Nothing until we tap into energy of the universe .

(3:14).

(3:24).
.. One Nation Tuesday teaching start taking control of distribution of knowledge ..

(3:30).
.. we needed 30 days to be sure ..
we are releasing new T for virus, not for Corona ..

(3:32).
.. Will open airport, if you have a Corona take a flight to Iran ..

(3:34).

(3:40).

(3:44).

(3:48). (Aliens are on the physical level ..)
This has been given to 2 people on this planet ..
(3:50). .

Q: bad forces .. made by the religions. .

(3:52).
.. Because now don't forget when we are on TV, what CNN says must be true. All souls will start elevating. As I said, by putting ban on KF ..

** How life started on this planet, true story of the Cycle of Creation..
The real origins of Man.

ENGLISH TRANSCRIPTION

(:07). .. As usual we start a new cycle a new way of teaching, since the last time and the time before we started talking about after Corona, we have started explaining a lot of things in the background, (:08). what we could understand more last time. But one of the mysteries of mankind has been, "how did we get to this planet," where is the real origin of the man? And we need to know this as we become "Man of Space," we can explain it. We have to know our origin, are we delivered species on this planet, or were we made by this planet, its conditions, by its position, by its love, by its strength, by its beauty, and by its diversity? Is mankind ready to understand the truth about himself. In the last couple of weeks teaching when we started explaining about our origin, our way of thinking, our construction of body and soul and how even Corona managed to get in. What did our body not calculate when it was making itself to live on this planet. Was it isolated and in that isolation looked at the physicality without considering what we call the energy packs on this planet. And is it for this reason, (:10). that mankind has become vulnerable to viruses.

And as we become travelers of the universe, taking steps to leave this planet, as the others do, without all these fancy clothing, and training in swimming pools and everything else, as the old fashioned way, people like NASA and Russian Space Agency do. And we're face to face with the creatures of the universe, what do we tell them, and not being able to handle the viruses through the strength of our physical structure, would this be a vulnerability for us? In the space man cannot be weak, in the space man cannot allow nothing to touch him, and the biggest weakness for man, and we have seen in the past months is energy packs, what we call viruses. So if we pass through unwanted fields of ?? or something slightly different then our strength we are doomed, or if a race in the space out of kindness, loving and kissing and cuddling, cuddles us because our soul of physicality, and transfer their energy, which is in the level of the virus, we are doomed, the kiss of death. So what is important for mankind is to find out why (he) has become so attached to the dimension of physicality, (:12). that the smallest energy pack has become his demise, what we see here with even the Corona, is nothing compared to what mankind will meet outside.

All the religious teaching, all the scientific data only connects man to his physicality, not to his energy, not to understand that energy is built from that interaction of his energy leads to manifestation of his physicality. When I tell you I adore you, I love you, I kiss you, do I kiss the physicality, or do I adore the soul, or the energy, or do I hug which one. Any of these in the depth of universe, as we are men of this planet we love to touch, and kiss, and cuddle, and put everything in our mouth, it will become a doomsday, a space will become a scary place to be in, except we cover ourselves like astronauts in clothing and cloth and everything else, which even in the dimension of energy fields they'll vanish. Mankind has to learn what it means to be in the space. Mankind has to learn a way to use his own immortality to become mortal … not to become mortal .. both is his choice. Mankind has to understand more, otherwise, as they say, you are sick, stay home, you cannot come, and mankind will be forever sick in the space. (:14).

But we have to go to the origin to find out how we became what we are, and not look at the fallacies that we've accepted, "Adam and Eve," and the "Apple" and "ribs." And one belongs to the fruit shop and the other ones to the butchers. As I said the time, how we came to believe in this, because of the "dumbnation" of the man in understanding his power in creating. But we need to go before that, much, much before that, and then look at the different options, now that we understand the science of the creation on this planet. How did we become to be created? Doesn't matter if you say the first man was from central Africa, or in central Australia, or in central or South America, if you put the Pangaea together you'll see they are all connected, and life started on one equator line, just on a certain line. Now we speak about man, which walked, we go far beyond. Rick could you please put the map of earth, or what you call, all the land filled together, on the screen please.

If you look, we are wondering why and how. And if you understand, mankind will come to understand, life started on one level, one line with a very narrow band on this planet. (:16). That narrow band created life, if the structures were there to create. If the structures were there, the materials were there, the positions were there, and everything else that mankind wanted, could have been created anywhere in the universe. But in that process we only became part of, we only created one thing, and if you look at the original Pangaea we all created in one way or another from the same structure, in the same area. And as we broke up, as early developed into breaking up, we spread, we divided and we created exactly the same. So it had an origin, it had a position, it had a diversity of life, and it had in so many ways, understanding of totality. If you look you see, the creation was so simple. So we see life was one, but if you look at the present map, if you look at the map even before this, this was all one piece. So the life did not start … life started on a band where the temperature and composition of materials would allow it to live. (:18).

Then we go back further, even if you go back further before man, before the first life, the conditions had to be created that man could live. Materials had to be created, materials had to be there, materials for life to create the first cell had to be conditioned to be available. What are these materials, and how we came to be as beings on this planet? In the solar system we started as a speck of dust and rays, it take billions of years for these specks to come together somewhere and build the first seed. And as every drop of rain falls back to its life, to its origin, to the center of gravitational field forces of it, as we understand in the world of the science of the plasma now, everything which comes in has to go out. So the sun forever spills out to be able to recycle itself. If you look at it, the sun is a recycling process for itself in the domain of its own in the solar system. And as it spews energies and magnetic fields, as they loose their energy they become into different stages of matter, and when they get to the boundary and become matter, in the dynamic position, they collide, they come together, it's like a crushing system, (:20). it pushes, it's like you put yourself of something in a forge and you turn it, all has to merge, all has to become alloys. And as it becomes alloys it becomes bigger and bigger, and in that position becomes the first seed for structure, it's a solid state, but gradually as he absorbs more and more energy from the sun it gets converted with the material with itself, builds

itself, and becomes huge, but at all times the journey does not stop, because the gravitational pull of the "Mother" pulls in.

From this point as a dust, to this point, as a first, what we call, planet, which always is giant as it collects more gases, takes billions of years. And then the journey starts, as a fast motion, and the slow journey to reach the Mother starts, by rotation, and rotation, and rotation, and rotation, and somewhere here, in the middle of the journey, this planet decided, due to its composition of the material, which was created on the outset, and due to the magnetic field forces of the planet, and its star, to create and turn, and that turning, to position itself, magnetically and gravitationally, respectful to the others in the solar system outside, tilted the earth. (:22). In that tilting, by a few degrees created the present diversity, and in that diversity new materials were absorbed, because now it wasn't mono-energetic facing the sun, it was continuously diverting and creating more. What we know from this diversity and interaction of the fields of the sun and the earth, in an angle, new materials in each level of degree and interactions in different seasons, will started to be attracted. One of the first ones was Na, then others as it became closer and the diversity became changing, we know other materials start appearing.

In a way, now, because of what happened with the field interactions inside, heat started, gravitation took hold, and in taking that gravitation, by reduction in the strength of the gravitation, materials appeared. But don't forget, for materials to appear, the energy of the sun has a say. So slowly what we saw was the creation of the lighter elements in the different angles, which at the same time, because of the diversity and the angle of the planet, heavy materials were produced on the one side, while the lightest were absorbed on the other side. More materials were created as less and less gravitational fields of different strengths were accepted. So this became a combination planet.

This started creating diversity, (:24). hydrogen (H) from one end, while plutonium, and magnesium and the others, and gold, and copper appeared in the other strength. The beauty of this planet is what we call, inclination of the angle in respect to the sun. It creates diversity of the fields, not mono-energetic as most of the planets do. And so in that process, in that energy of diversity, Na, with, in so many ways, connecting itself with H and O, and then by the creation of the C, and everything else created the first cells.

So we have not been delivered from outside, we are the children of this planet in the physical dimension, but in that process many, many things were changed, because as different amount of materials were getting created by interaction of the fields of the planet we saw diversity, and that diversity through balance of energies lead to the creation of amino acid (AA). In the line of what I showed you on the Pangaea this diversity met its match.

In so many ways, the AA became the first diverse energy made by the planet, does not exist anywhere, but as it had the common denominator of everything, it could link up. It linked up with Cu, it linked up with Fe, it linked up itself with everything else, (:26). that it could make as energy, yes, matter, or whatever. It needed a stability that it could progress, it needed a stability that it could make a system that while this planet was

falling back in to its Mother, somewhere in this point the process was completed, and what we saw was the first life. Life meaning, that the cell, the AA could sustain, and due to the energies within the environment, replicate itself, which means now, Mr. COHN could make more of itself. But it realized it cannot become like the sun to receive and give, it needs to create a structure that continuously can receive and give, but in that process hold to some, and than it become very easy. It needed a mechanism, it needed to create a simple system, where as he absorbed energy, it could release energy in any shape or form, but keep its structure on either end, and start attaching itself for the circulation, blood. (:28). it needed to attach itself to blood, because Fe needed to match the magnetic field of the planet to create circulation by different strength in energy of Fe, in conjunction magnetic field of the earth, as Fe is magnetic, it creates the best motion system for it, so cleverly it attached itself to Fe.

It has created intelligence, so intelligence was easy to do. Then it needed physicality, because up to then it was just energy. If we look at it, AA in the space of no gravity, is in reality a virus, but getting involved in living and conditioning to the planet, a very weak one, extremely weak one. If I was AA, Mr. COHN, I would have chosen slightly, one more material to add to myself, that I would have withstood the viruses too, and this is where it did not happen. And this is why the man on this planet is weak, it cannot behave as matter and energy, or what you call it, a soul. But it attached itself and found itself a way to do, to attach itself to energy source by diversity of the interaction of the fields of its own, (:30). it created a new energy pack, that it could stand better than it, and could support it, this is what we call, the Soul of the Man (STM).

So the biggest mistake was made, instead of going all the way through physical condition and attaching yourself, and itself to Cu and Zn and every other metal, it ignored its own essence, and the center of its own creation, the energy pack we call the soul. If, if, AA at the point of the establishment of life on this planet would have learned to work in a slightly different system way, AA would have stayed as an energy pack that could have handled the viruses. So this is the flow in the structure of the man. It should have interacted energy with energy, than energy with matter condition. It went to the energy/matter and left everything in the dimension of the domain of the soul, or the energy center, which had singularity, but not dual purpose. So it can only work, one in the energy level we call soul, and one in the matter soul level, which we call the body of the man.

So if man wants to become a "Man of Space," to live in every dimension, he needs to bring in, to understand, or in a way connect itself to its soul. (:32). That has an energy guardian, energy filtering system, energy condition to be able to survive the span of universe. As man was moving more and more into the dimension of physicality, it created a feeding system which it had to build on its own; circulation with blood, storage the liver, digestive system to be able to use different materials of this planet, lung for air, stomach and digestion system for the liquid and the solid, then it had to create its own filtering system, the kidneys and what we call the large intestine. Then it had to create a condition that only used the earth side as both, cleaning up and absorbing. And then it needed to coordinate the working of all of this in conjunction with sharing of the soul, or

the energy center, and it controlled, control center called brain. So in reality the process of the creation of physical man on this planet came out of the first interactions and then needing systems to guarantee survival, because in the dimension of physicality everything had to be handled in physical dimension, where in the dimension of the soul, it had to be, (:34). only energy or the ?? sun and these two got entangled, and in the process man was born.

From the first interaction to the position of the delivery of the first moving cell with the full coordination, took billions of years. And according to the environment, to the availability of the materials, and in the condition of the position in respect to the angle of the planet, new creatures, new animals, new plants, and new life started, because this planet is rich in diversity of material. And diversity of material on this planet, if you understood, comes from diversity of the energy through the angle of inclination in respect to the sun. And in that process, all animals, those who could absorb more, found easier way to absorb more, they became bigger, they became dominate, but at the same time, even today as we speak this process has not stopped.

In the jungles of Amazon, in the jungles of South America, in the jungles of Africa, everyday, due to change in the strength of the field of this planet, continuously new lives are created. When the scientists tell you they found new species of this and that, most of it doesn't go back billions of years. (:36). Due to the ignorance of understanding the process, of continuous process of creation on this planet, many of them took shape a few years ago. Or many of the new animals we discover in the jungles or in the planet, are the created, new creation in the interaction with the new field and all the poisoning and the pollution and everything else which we have done. These are the children of us, our abuse of this planet. Life doesn't stop, and does not stop billions of years ago, creation of diversity on this planet will last until the last second when it enters the womb of his Mother. When it ?? renews and joins back in the life, of his life with his Mother.

When the rain falls back on earth, the sun returns and receives his own child as earth. Life on this planet as we call it, billions of years is just a temporary trip, a very, very temporary trip, has a window of a span of existence, and soon as we get pulled more and more into it, life as we see it will not exist. The condition of this planet will not allow. The new position is too close to the sun, and closer the hotter. So at this point beyond, and this point within, is only a window of life, (:38). no more and no less. And in this process where we are created, and this process where the whole structure is created, is a flick of a second in the life of the universe. In a way, if you look at it, it's a desert which gets rain and energy, and blossoms and you see life on it for a very short time until the heat of the sun destroys the rest. This is what we are, a short span, a very, very short span, and even in this short span of a few million, we choose a few years of it.

In so many ways, is it worth it to live on this planet, or we use this window and we become passengers of the universe. And even in that dimension, even in that dimension, our lives will be a flick of a finger. And if we can use the step by steps, to become closer to the origin of the light, as even our sun and the galaxies within it, will move towards it, because they are in the same process as we were, as a dust on the edge of the solar

system. We all come from, and we all go back to the Creator. It does not matter if you are a drop of rain, if you are a solar system, if you are a galaxy, or even if you are a universe. Everything is dynamic. (:40). Everything will stand the same course, and everything the same. And what we look at is literally this (goes back to other drawing of Man's formation), what we call our lives, what we call the life on this planet, is a small window of opportunity where the rain has come and the desert has becomes green, and soon will go back to be a desert.

But in this process when we understand that the interaction between the physicality and the dimension of the energy creates what we call, intelligence. It creates diversity of energies, which in that process of life will go back to one point, we can, we have the ability to become energy pack in all dominions to reach the Creator. And in so many ways, it will be the vice versa, as was with the sun, we went out of and we came back to, and in this process if you could understand the condition of what we call, the energy of giving of the Creator, create its own condition to be able to become part of the energy pack of the creation, then the man receives the gift of life, the gift of intelligence on its own level.

A lion is intelligent, as much as a tree, they communicate and they understand, so when we speak about the STM, the creation of the man, and the soul, (:42). which can be a line with the Creator, and us to our level of understanding, is only for us, not the plants, not the animals. Man is so involved in his own hypocrisy, that does not see the truth. And in this process we evolve, depending on position we are created, and how long we last, we take different position and conditions, and we dominate for certain time in that process. Mankind has lost the track of his own existence. So in fact, what has happened in this diversity and interaction of the matter and fields, we became man, or a mammal who could think, and it could use its environment, at the same time to have interaction between his energy pack and his physical pack, we created a dominion, we call it, the brain, we call it the conscious, we call it emotion.

And when the mankind understood this, and when the first creator of the cycle realized this, that it is in the control of its own destiny for the small environment he lives in, it had the intelligence to effect the position and the dimension of the motion of the physicality and his behavior in respect to other energy packs of physicality and energy, man became conscious of correctness. (:44). Then those who understood the dimension of correctness, they understood one thing, they understood this and they understood this (the two drawing done earlier), and when they understood both, then we became conscious, we became human conscious, and that consciousness created 2 things for us, if you understood correctly, we became to believe in what you call the energy which created us, and if we found weakness ourselves, we found intermediaries, statues, religion, and on the other hand the strength and the path of the STM.

The further we became from religion, the more hypocrisy, the more we became to understand the truth ?? between our physicality and the energy, and the energy pack which created us, we became faster to mature, and we did not exist with it. So the first being who understood this, became Mitra, it means understanding the connection

between the energy and the physicality, (:46). and its connection with its creator. But it had to come to that point, because she was a creator herself, she was a mother. The true Mitra, is in reality, the first person who understood this, and saw the beauty in what it creates. Then in the progress of the mankind, by whisper and talk, it became a ?? method. It meant that we had to understand, and if we create a balance connection between the energy, what we call the soul, and the physicality which we call the body of the man, and the Creator where everything comes from and goes back to, you live in harmony. And from then others who understood this, and developed with the more illiterate people created divisions.

So in fact, we are made of what we call the matters and the states of this planet. We came from interaction of the fields of this planet, and in so many ways, we have a very short time on this moving spaceship, we call planet. We have chosen different ways, in so many ways to control the energy or the physicality, and those who created the control of physicality, (:48). went for statues, and those who went creating and controlling the soul, brought what we call religion, both imprisoning, one the physicality, and one the energy.

With this new technology we free man from both, because now you understand. And then in reality, you see through your eyes, what we call the Mitra, the origin, the first thought who understood the balance between the creation, the Creator, and the environment, which has created it. And if you look at it, that's all what Mithraism is, the Creator, the created, and the environmental condition, that it connects the creator to the created. "Talk good, do good, and think good." And if you understood this, then you can travel the span of universe and find a place anywhere, and any point in the universe.

So now the human race has to decide in a simple process. If this is our solar system and we are just about to reach and pass that window gap, do we want to stay there, or do we want to jump in a bigger pool? (:50). and then even then, we jump into the bigger pool, and then in jump in there, we join a pool which we become part of the totality. Where this is the solar system, the galaxy and the universe, and the Unicose, and the Creator. The journey to this will take forever. And now we are teaching for the man to jump to this, and maybe in the very near future to this, and maybe in the distance time to this, and maybe in a much longer time to this (Creator). And maybe, maybe, if you're matured, to the soul of Mitra, make the journey in one go. And in so many ways, in all in what we call the galaxies, the stars, and all the galaxies, and the universes, and the stars in them, and every other aspects, there are lives in every dimension, because every little planet or star has a different animal to his creator. So in fact they create life, but not visible to the eye of the man, (:52). because we don't see that level, we don't see what we call, uniformity in energy, and then if you take these leaps we have to understand the totality of it.

And what we teach is to give you a choice, physical flight in the space of the solar system, physical flight in the galaxy, in the universe and the Unicose, or a combination of both in the energy and physicality, or in the recent past teachings, through the energy pack, because energy pack does not need so much transformation. It needs to be stripped and become of the higher order strength to reach further and further. It's easier to reach in

the ?? rain of the Creator with the energy, than with the physicality. Physicality takes time, physicality needs the space of physicality. The soul and the energy needs none, but of the same strength, zero time communication. As we said in the other teachings it depends what field you want to travel in. Now you understand, you want the physicality of the man, or galaxy, or the universe, or Unicose, or the soul, or the energy of the Creator.

I come from this (Creator) and I'll go back to this, by my own choosing, as I come from it. I have given this gift to 2 women in KF, they have to choose to keep the path, to bring mankind to this dimension, (:54). as they are mothers, and shall become mothers of the creation for the dimension of the AA of the human race and with it the Unicose.

There is one thing that you will understand soon, we teach not for mankind, but we teach for the Unicose, as they can diverse and travel the dimension, so their souls, and the dimension of the strength of the souls will be heard by the totality. The love of Creator does not shine on a ray, it shines in a spherical shape, equal and everlasting as long as the Creator lives. In this process as we taught you before, I want to bring in, what I call, enigma into your understanding. And this enigma, this what I call the puzzle point is for you to sort, and will answer many questions when you ask many times, "are they with us, are they part of us, have they been here, the men of this Unicose and universes to visit us, and have they taken our shape and are we part of them?" In my teachings I tried to explain in a very simple way, especially knowing that we come to this day, that you have to understand. (:56). I brought Alex in a couple of weeks ago to explain to you how he makes the food. There was a purpose for this. I tell you what you understand. This is the salt and the water and the Gans's, and this is the apple and the orange, and in so many ways, different fruits, as they have soul, they have transferred the energy, the taste, and the dominion on the water that you drink. As you yourself are the mixture of Gans's and diversity of the fields. Now you understand one thing more, if this is your planet, and this is its surface and within it we have created so much water, and even the mixture, and even your own body on it as a liquid Gans, and if I am the visitor of this planet, and you was a Gans water, or the sea, what do you think? Haven't you received my soul? In reality, is there any difference between this and this, this being a fruit, and this being a soul of the visitor of this planet.

(:58). So mankind's knowledge comes from diversity of Universal Community and itself. It comes with its energies and beauties, without interference. And if you understand this, this planet soon becomes the Unicose, and soon as messengers of this planet we become that Cup, and we become that orange and apple. This is why we tried to put the physicality and the conduct of the man right, that when the soul, when it becomes the creators of others, it's perfection.

In this process, in this understanding, in this understanding of the totality, we come to one point, and that is, we need to understand, and that it is, we need to be able to comprehend the totality of the process, the totality of understanding, the truth about ourselves and the reason of our creation, and those who have created us through the dimension of the interaction of their fields. Mankind needs to know the truth, the truth about itself, and in

that process, why and how we became, (1:00). and what are we to become. How far and to what extent would we change. How far and to what extent we will become part of, and how far and to what extent we come to understand the reality and the truth?

Maybe, maybe it's time for mankind to understand the whole process, and understand every step, and then you understand in the process of the creation we are little souls, that these souls in time will become, according to the position of their lives, the feeder of information to the others. The feeder of new life, and if you pay a visit to another planet and universe, what would you like this Cup, your Cup to give to that soul you meet, (1:02). war, anger, aggression, or peace, love and care? As I have said in teachings before what would you like the child of your soul to be? Because you become that soul, you become that food, you become that position of the transfer of your emotion.

And in so many ways, if you understand it, what we done with mankind is very simple, the UC has locked you down, for centuries and thousands of years, because present behavior of man is not acceptable. Because if you understand, you infect the universe. In so many ways, you have already infected many times that's why we have brought everything under control. So, instead of you becoming small problems, and a bigger problem in the future, we have come to solve the problem as it roots, as its onset, where it starts. We know where the problem has come in the creation of physicality, and we know where the mistake has happened in diversity of the energies, (1:04). that the 2 needed to come into operation. So in reality, what we are giving to the mankind is both, in both dimensions. Understanding the power of the Soul of the Physicality (STP), and understanding the power of the STM and the energy, that in the space the 2 together become that formidable pair, that they can stand what we call the different field strength of the universe.

It is very hard to break a atom of H, if you understand its work. And it's very easy to create separation for an atom of H, if you know how to introduces new field to create the what we call, "the ?? distance," and if mankind understands this, if mankind understands that it never can kill, it can never destroy, but if it needs be, it can puts its emotion, and feeling in a soul to create the closeness and separation, then mankind will take off with this ethos in the universe that he is available to give, and is available to receive, but does not have the power to destroy, to kill. (1:06).

But, and one big but is, this word, "Mitra", and what is this word "God", and where the difference comes. And in fact, what does the 2 lead to creation of? In so many ways, we can choose any name for this (Mitra), as we can for this (God). And the combination of the 2 needs to be to create life, in order, and with respect, and peace. Up to now, man has been deluded of this (God). And now we put the order back in. Singularity has never worked, because it has to create compromises for it to exist (1:08). Then, you come with anything you like, and anything you want, and any other name in the universe, and then you create a polarity for your own satisfaction in any shape or form, in any dimension in the universe, where there is no control, and the mayhem like on earth creates. The perfection comes from when you create balance in any name from the beginning, then

this will not exist (erases Adam - Eve, etc..), and man will be a man and, and the rest of the creatures will stay the same and balance will be created.

This is the change in the new cycle, not just for man, but the entirety of the creation in the dimension of the universe. In a way, we create a balance on the other end, if you understand, that between the 2 we create the harmony. And mankind should have understood something very simple, in the world of the creation of the Unicose (draws an oval with 2 dots in middle), the earth and its galaxy and its universe sits somewhere here. (1:10). where up to now we had this (draws an oval with only 1 dot in middle). And this new balance, this new understanding will create a balanced field amongst and across the Unicose (draws an Infinity Loop between the 2 dots). Now you understand why such a position, time, and evolution in time of man, at this time, is to move the whole thing into balanced position, and there is a reason for it, which mankind at this moment is not open to understand, and that's what we say, from the interaction of the two, we'll create a new soul, that all becomes in balance in totality.

The problem doesn't sit only with the solar system of the earth for man, the balance up to now sat right across the universe. A proton needs an electron to be able to keep its existence, so now we see the same. Try to understand this phase, and it will be very difficult for many, many human beings to go through this transition. When the same time, the ability of this is, in this process mankind has created many souls who become the stars of this galaxy and the universes and the Unicose.

Now that man is educated and the man will travel the span of universe, as for example you go from England to another country on the continent and you see another Englishman and you say, "oh, you are from England, let's go to the Pub and have a drink." Now in the space you can say, "oh, you are a soul from earth." Because the fingerprint of the AA of the man and the planet is unique. And then you understand this planet has been creating many.

And in so many ways, now that we put the totality in correct conduct, all those who've been misbehaving in the system, shall be in the problem, through the dimension of the interaction of the origin will correct themselves. We've had too many mischievous souls in the dimension of creation, and with this move we put everything right. But understand one thing, mankind AA energy sits in balance with both ends of the soul of the Creator and sub-matter, to man's sub-matter, so you have to be the balance between the two, (1:14). and maybe that's why we choose the earth, and this time, and this place, and this position. We choose the place and the time, and at the same time, Mitra chooses her own.

The balance will come in a short time, but we don't have that much time, in so many ways, to pass this line (when the earth will no longer sustain life). So we have to complete in this window and man is getting very close to this line. Or the earth is getting so close to this line. Once you pass a certain position the falls to this line becomes faster. As I said before, the dinosaurs were created at this point, and the man somewhere here. And even today in the new creation, and animals and plants are created according to the level of the strength of the fields in every way.

If you understand it, if this is our solar system, (1:16). and this is the sun, we started the life from here, and we are forever, every time, every year we are circling it. The time of dinosaurs was there, and the time of the man is here, and line to cross for no life as we know is here. This is why on this end we could see larger animals as the pressure from the sun on earth was not that much, and now the larger, and as we go further in we'll see smaller and smaller animals, even a giraffe will be a giant very soon, as the dinosaurs used to be when we were here. It's the compression of the magnetic fields and in interaction with the pressures from the rays and the fields of the sun which creates this. And it follows the laws of magnetic fields, and plasmatic fields. If you increase the G, the M will change too, because it has to, because it dictates by the absorption of the fields from the center. (1:18).

Maybe today's teaching will open the eyes of many to the reality and to the facts, and as one of the KS said, "it's a shock to understand, everything is different, and Adam wasn't the first thing," in fact Adam couldn't be, because he couldn't create. Adam is a giver, creation of life comes from the one who can create equality and balance that all the cells, as in the womb of the mother grow together in harmony and divide at the same time to create life, and the body of the man, and the man as the giver doesn’t have this ability to be correct, to be just. When you have the cells in the womb of the mother she does not give one to one, and another to the other, she gives equal, because she is the creator, she wants to create and this brings a different mentality, different understanding, justice and correctness. And this is why the behavior in the womb of the mother is the true Mitra, and comes with it, the woman itself.

I warned for many years, and many years before, that the next prophet, the next cycle of generation will be a "womem," and now you understand why, and there is a big difference between these two (womem and womam). It needs a balance within itself to be correct, otherwise it will become arrogant and singularity. It's the same when you put with the God, or the Creator, it needs balance, otherwise it will be the mess we have seen in singularity. It will be very hard for many people to accept, the hypocrisy they have believed in. In so many ways, the situation is very simple, when you enter a new environment, being a planet, being a galaxy, being a universe, look at the interaction of its physical fields and look at the interaction of the energy fields, and then somewhere in-between you'll find life, intelligence and interaction. (1:22).

On earth we have something very strange, in the universe that man enters, will come across another dimension, and this dimension is very different then what we have envisaged. Man will come to know and to live according to this. If you look, man's life in the Periodic Table sits in sub-energy atomic periodic table, which the man does not understand yet, and in what I call, "create a line of the energies" of which man is not aware of, and physicality exists in all strengths in all levels. The physicality of the man has chosen between the lowest part, and the interaction of the middle part, and somewhere a higher part, between the H to Zn, plus any other bits to create the balance. (1:24).

So this gives a very small window, but a diversity of life with intelligence on this planet. In other creations in the universe, which you unfortunately are going to fall into, you have this in one life. Or you have this in another life, which means life will exist in the two extremities, or life exists above the field of the man, because their environment creates this condition, and then you understand how you become a virus to one or the other. You are part of their energy pack, but you are not in their physicality, and this what I explained before, that mankind has to understand, not only his physical positioning, but the energy which he has created, which we call the STM. And this is bigger problem for you, when in part of the universe you get hit by a life which lives in this domain, or in this domain. Or the most disaster for them is, if they live in this domain, (1:26). and now you become a stronger energy pack above, you become their Corona. Now you can understand, and the further you go that way, the more you move towards the Unicose and the Creator. And the further you go this way, it's the time of the re-cycling to go back. In fact, it's what we said, you sit here, and now mankind is here. Then you understand why and how we have introduced, without you knowing, a new dimension, that with this (2 AA NOCH & HCON), you can live the span of both.

The Chinese philosophers understood, the philosophers of China, they called it Yin and Yang, but they could never find a way from Yin to Yang and Yang to Yin, and for the first time in understanding the construction of the life and existence, (1:28). it should be easy for them to unravel and complete the cycle, that their soul can live in all dominions and structures. As they give one to the other, they become and they move to this side (towards re-cycling) , and as they give one to the other, they move to this side (towards the Creator).

I explained this in a hidden way, in the teachings for years, and now maybe, maybe you understand. I said, we start from fields, and interaction of 2 fields gives us a plasma, and interaction of 2 plasmas gives us physics, and interaction of 2 physics gives us chemistry, and interaction of 2 chemistry's gives us biology, and interaction of the 2 biology's gives us the soul, and interaction of 2 souls, and then what you understand this, becomes the Soul of the Universe, and then the Soul of the Universe, (1:30). which is the level of the Creator, and there on to become the same of the two, to become one, and in these there are still different levels. Now you see how it accumulates, and in that process mankind can exist in all dimensions, if he chooses, and chooses the matter state on this end, and the energy state on that end at its maximum use, by one of the two components. Because in fact, what he can do, is the ability to put two of these together (NOCH & HCON) in one package that it interacts. And you know how, it is done in the womb of the mother. By interactions of packages of two, you created the soul, or the energy pack. So man is fully aware of how to move across. And if you understood this, in the universe we can withstand any, any energy of physical dimension.

(end **of Creation Cycle teaching**)
(proofed to here)

And as you'll see, as I was informed by the webmaster yesterday, today, (1:32). that today is the 20th and next week during our teachings or sometime during that day, we'll see the Americans launch back into space after a long time, they fly with exact suits we have given you as Corona suits …

(1:34). ..

.. As I said 2020 is the time of space (1:40). space program compare ..

(1:48).

.. We are moving in one direction, in reality it is to get off before we cross the line (planet gets too close to sun for life). (1:52). That in time we can find somewhere else in this U to find a home and establish
.. many cultures in U don't have homes, planets, they're not nomads, they're highly educated .. you'll be lucky to even see them or communicate with them ..

now you understand where you came from

(1:54). Any questions?

Q: Ruthi. . I am Wang Lyn, I am the head of KF China. I think today your teaching is so amazing. I don't know if the humans are lucky or so unlucky ..
(1:56).

K- I turn the question around, your soul is one of the two which ?? the mankind, which way you decide? The decision and the future of the U,

(1:58).
sits with your soul and the soul of Ella, it's a gift given, you have to decide. It sits in parallel with the soul of the Creator. So I think that's an answer you have to give, not us.

What do you envision for us ..
What is your vision, what does your soul tell us?
Q: I believe it is time to lift humanity .. (2:00).

WL- I can feel there is a kind of exciting,
(2:02).

K- What do you see, you have the Buddhists

(2:04). WL-

K- So how are you going to take us into space with the soul you carry? What is the destiny of mankind? (2:08). As I was saying to some friends, I made a mess of creating

the Man, how are you going to cleanup the mess I made, between you two women? Are you still going to go the path of physicality or do you choose the path of the soul?
WL- I think we'll go the path of the soul. The only way is that.
K- Where is our guideline, as I said you two souls need time to mature to be able to do, and the beauty of it is the innocence and the clarity,

WL- I think all the souls that come to the earth are ready and are united as one to lift us in one go.

K- Where is Ella, is she asleep or awake? .. (2:10).
E- I am awake.
K- What is your vision as the other half of this balance?
E- I can ?? but I can only speak about a recent experience. And that is about when I asked if you can teach about anger and how we can eliminate this from the human behavior to begin with, and instead, the decision was to teach about the world of creation and how we came to be, and actually the answer was in that, the answer to my question was in that, because my ?? old in steps, in human way, fist do this and then ????

(2:12). I don't we can say, okay now we all believe in our souls and the physicality will cease to exist, because in the end every soul can choose to manifest in any point in the U and still convert from ?? and matter to energy, and to have this playful and joyful growth in ??
at least that is what I see at the moment.
K- Will it be interesting for KS to observe in the next few weeks and months, how these two young souls will mature to run, and how the .. mature to guide humanity and the rest to world peace ..

but as two souls
If I ask you a question
(2:14). what is your wish for mankind, because whatever you wish will be done

K- What is your vision, where do you want to take us.

Mankind will change, mankind is a monkey and a sheep, and this should not be ..

WL- Yeah, my wish is humanity really put down arms, (2:16). and became united and peace and then we bring them into the UC and set them free, let souls fly.
K- What do you envision now, what is our future in the hand of you two?
E- At this point I can not say exactly, but until the next time .. just people think before ..

the wish has to also come within all the souls we are guiding ..
K- In so many ways, the humanity will come to adore you, (2:18). for the souls you carry, and I am sure in the soul of the Universe will be with you too.
Mitra means a lot for those of you who don't understand, the creator of the creator.

Any questions from any of the ladies. Don't forget when I step down these 2 ladies become the teachers.

(2:20). Does anybody have any questions, would like them to explain. .. K- which one has a question for the 2 ladies.
Q: Marinez, .. I have question for WL, ?? live passionately, and I think that what makes us different from others in U ..??
(2:22).
K- Are we ready to give completely, is the human race ready to give completely?
Q: Why not. ???

K- In so many ways, it's an honor, ..
(2:24). today we hear more from their physicality then soul ..

K- I think that responsibility.
(2:26).

It's not singularity, which is there to dictate, not accommodate ..
(2:28). twin souls of them will complete the process .. in time you'll understand …
Q: Has there been before in the history of man this kind of ??
K- No,
Q: We are copying the UC?
K- No we are learning to bring the balance in. Any other question.
Q: … I have more of comment .. I love both of these ladies so much as I hear them speak in the past 2 weeks. Form Lynn I get we are ready for the
From Ella I get she would like to see more change in physicality, more kindness.
I was wondering if that is correct?

K- That's why they were chosen this way, one from the East and one from the West.

they have to speak through their soul, not to write and think.
(2:32). Any other questions. Any comments form you Lyn or Ella. In the coming time we'll leave the Thursday teachings gradually to one of the other lady, or the combination of the two with me part of it, that we go through the transition time of the teaching.

Q; Stephanie … (2:34). (Italian) .. she wants to thank you for what you are teaching right now , she finds her place in the ?? When she came to this world she wanted to understand why she is here, and she always felt herself she was different, by listening to your teaching, you give her the tools to make the change. (2:36). .. (Italian ..) She says that since she has been part of the KF she feels .. through all the souls, and really felt unconditionally love for Italian community .. feels this expansion for souls all over the world .. when we elevate the other, like the politicians she really feel that this is happening. (2:38). .. every time she had a birthday she said she will live more then a hundred years, now she has the tools …
K- Thank you .
Q: I think the whole point .. gather the knowledge ..

.. My question is if we use the plasma water will it be the same effect as the Gans?
K- I don't understand. (2:40).
Q:

K- What do you mean?
Q:

(2:42).
K- I still don't understand what you are trying to get at?
Q:
R-

(2:44).

K- No I think you are confusing and mixing too many things, but once you have the source and you take from the source, the source continuously supplies into the fields, but once you take your water from the source, and you give it to the others, it has no source to add to it, it looses its energy, and this we have answered before. You cannot take without a source. This is why ..
changing the new Protocol .
Any other question.

Q: (Spanish) (2:46). .. is the transformation in this new step

K- As we always say, everything in the U even if you become wise enough, even the fields of the Creator has a measurement ..

because if it didn't have measurement the STP would not have been able to capture it, or to encage it. So if mankind understands this, mankind can create a condition to free his soul without anything, without death, because if you can create a field around the … would have been free. It's amazing when I look (2:48).

our soul would have been in the center ..
life like a jelly shape
(2:50).

Chinese have more of the emotion ..

(2:54). Ella comes from the matter state, logical, has to have a meaning in the physical dimension, and if you look at it, we always that position of STP and STM, and if you understand this

(2:56).

(3:00).

(3:02).

.. The game has changed if the mankind understands, but don't forget nobody jumps into one end, it takes time, I .. to bring one step at a time. Those of you who mature to this, you jump. I go in the STM, and I said many, many times, I had this battle many times with Caroline. She said to me, I know what you are doing, don't do that, don't go inside. (3:04). You see them as they are naked, but they don't see what you see. Nothing is hidden to us, but I still play the game otherwise I have nothing left to do. Because I create the condition of environment of your soul, I am in it. I know which president is lying and cheating, do you want me to open up the voice box. But we have to let the coarse, I can't steal but I can witness .. When I sit in the emotion of Ell or WL, I can elevate in 1 sec but that is not my job, because they have to go through the process of giving and taking in the correct way to elevate the totality. I don't need spies, I live within ..

(3:06).

(3:10).
.. it took me a long time to bring the soul here…
(3:12).
you are gradually getting the tools for your soul. ..

(3:14). .. I suffered long enough to bring this soul here ..

I never thought we have such incompetent leader across this planet .
you depopulated yourself.
my job is done, you are not aware what I brought you .. just because there is no man this planet will not continue its beauty ..
(3:16).

I never thought such a stupid leader in American .. you opened your door to mingle, viruses.
Let me explain what is going to happen. The biggest mistake your governments and your leaders have made, and you thought you are free, is this. You know it's a (3:18). typical what you call English school time. You go to school season in September, you have brought all the diseases of where you went in the summer with your cousins and everyone else you traveled around the world …

then you hit Christmas 2 weeks, ..
the April ..
.. Now your leaders are making the same
now they are opening the borders for you to go out and go shopping
(3:20).
get a massive increase of Italian version, Spanish version … then open internationally 40%
worse thing your leaders did was to open up ..

(3:22).
We'll see a massive increase .. not in lung ,
.. will touch the plants and everything else… we're going to get a virgin planet, do you think 30 to 50 years will make much difference. ..

(3:24) . Now you understand what is to come. Your leaders are absolutely incompetent, and on top of it they have a more incompetent person called Mr. Gates ..
.. You thought the "Boat of Noah," was a joke. You have to decide if you want to be the passengers of it. Now the earth is reaching to that point. In the talk of the two you get one message if you go deep enough.
(3:26).

Any other question?

Q: Ike .. We are learning to get to the balance on the onset we diverted from the soul and focused more on the physicality, to get to the balance …

K- What do you mean?
Q: I am not sure how to put it. (3:28).

K- What do you mean by that?
Q; I want to know how to get to the soul quicker .since we are used to physicality.

K- Oh, you are like the others, you want a short-cut. No shortcut you should have learned it billions of years while you were here. (3:30).
Q: So that is the shortcut?
K- That's called the cheating, tell us show. A lot of people would like to know that you had plenty of time to learn that
you abused your soul with physicality ..

even these 2 souls have to learn to accommodate the other in peace and harmony
but mankind decided to cheat. physicality is a leech on the STM ..

(3:32).

(3:36). So how what we take form this planet dictates how we look even if we live in the same place.

Very soon I will show you all how you can feed yourself without ever touching another being. In a way, (3:38). the biggest problem for the man is to feed himself. if we fill the oceans with Gans's Then what would be the ultimate if you are feed ..

(3:40).
would that elevate your soul. in the coming time we'll show you how to do it,

You have to do it with the Gans's , we can't do it, because it's your planet

(3:42). Next question.
Q: .. In reference to a few weeks ago you mentioned the virgin birth , the role of the men on this planet (3:44). ?
K- You have to understand the difference between the virgin birth and physical birth ..
.. you listen to the only part that suits you ..

(3:48).

(3:56).

.. Thank you very for today.
Soon you'll see they'll become mature voices,
I give from my soul to both of them that mankind can elevate

(4:02).

330th Knowledge Seekers Workshop; May 28, 2020

ENGLISH TRANSCRIPTION

(:10). Yes good morning to you, wherever and whenever you listen to these series of KS. In so many ways we are back in, 330th teachings. In so many ways a good break Into the whole structure of the teachings. It will be interesting to be made to 660 and 990, and who will be teaching in those times. The knowledge of the cash Foundation, There's no limit and we have covered every aspect, From knowledge in the space to health to, to agriculture to materials, we have covered in depth, and set up, and have become to be a new science and technology also. All these T all the breakthroughs has been taught by one man, which very unusual. (:12). But when you carry the soul of the Creator, it is easy as you know, knows all and shares all.
In the past week And the week before we start sharing A lot of knowledge about the history of man on this planet. Part of this teaching is embedded in book number 4, The origin of the creation of the solar system . All solar systems create life in one way or another. During their life during their existence they create, different ways of life,

different strengths different approach, What is mankind is not the only creatures, Or the life on this planet is not the only.

In this process, man needs to understand more, and comprehend more, that in the depths of space, everything he sees will be new, but he has to know his limitation. Gastineau what he has and

In so many ways our universe is like Earth, (:14). it has travelers and it has residence, and those who want to know more as we travel around this planet.

In the past year, with what Corona has done to us, it has brought us home we have a weakness. The structure of knowledge, weakness in understanding the process of creation Beyond what we know about physical entity we have a problem even to understand it Comprehended Correct. In some discussions, as is going on we are. Okay it does work if it does work okay all right

(:16). On planet earth we observe dots of light (UFO), some we see
we will travel in Mother ships.. with many races travel together ..
(:18). These ships stand for thousands of years before moving on.

(:20). If we become passengers of U on these ships,
how to extend our lives beyond 50 to 60, 100 years ..

(:22). with nationalism cannot become passengers of these ships..

(:28). .. no division of nationalism, this has to stop .. proud of being One Nation. Sometimes around 21-3- 2021 to have the first interaction with the U Community. It will you who will miss, not the rest of the U. It's a new beginning, it's what we planned and what we'll deliver. (:30). If you understand what I said before(3 3 3 = 9), it's the point of completion, and we start a new life. And in so many ways, we have no choice.

(Soul Teaching about Cycle of Creation continued)

As I said last week, we have to understand how we were created, and then when we go to the next step in this creation we have to understand, as we said last time, the planet earth was made of Pangaea,
and original life was created on this band, because amino acid (AA), the condition for materials, and if you go back to the teaching for he past 7, 8, 10 years you'll understand how even, we came to be split in the brain and the body. Then we go deeper, we understand we created the man, man through accident came, was created, it created his brain, and it created his arms and legs and all the materials in it, to be able to sustain life on this planet.

But as we know, when you bring the diversity of the fields together to be able to operate as a collective one unit, we need to have a central control. And we understand that mankind has 2 central controls, 1 for the total operation in respect to man and the outside, and 1 in respect to his own dimension of physicality. (:32). In that way, in that sense, mankind has no choice but to understand how to operate in these 2, and in the past as man did not know, and did not understand the center of operation of his whole total entity, sits within the center of his brain, where his sun is, that's what we call the Soul of the Man (STM), in so many ways, needs to be understood, that how does this operate and interacts with this one. And the sooner we understand then the sooner we can bring cooperation and collaboration between the 2 parts.

The biggest problem for mankind has been very simple, and those who understood this as a problem for the man, they have abused it, because .. if you have created a central control for the operation of the cells that all can communicate and work with, you have to understand, you created another part, you created what we call interaction between the physical part, and … what we call the mobile part and which is and what we call the body of the man. In so many ways, created, .. by different components, and with it came in different sections, which we call the lungs, the heart, and the operation of the 2 systems, (:34). to be able to collaborate with each other.

In a way the 2 fields have to interact that in interaction between the fields of the physical dimension and the fields of energy, or central control, in where they meet, they create what we call, emotion. And this emotion has been the biggest problem for mankind. The brain of the man runs a physical operation with emotion, and the body runs a system with no emotion, but as a system to get information and transfer back, as information to the soul. So if we understood this, we understand different strength, in different position, in different structure of the brain, gives us different emotions. And one of the reasons man cannot free his soul, is because he has not understood how the emotion is created, and at what strength this emotion works, and how he can remove it where it needs, or initiate it where he needs, to create an interaction between the central point, what we call the STM, and its physicality. You have to go back to the teachings where we explained how the dimension and flow of the, what we call, blood, (:36). creates this magnetic field control, and how it decides, how it penetrates, and what that penetration in the brain, means different emotions. And if mankind starts understanding this, mankind will be able to become travelers of the space, which means you have to understand your emotion, through the strength of the soul, and not the strength of the physicality. Because when you become man of space, instead of your blood, you'll have another entity which has a soul, and the interaction of, between his soul and your soul, gives that emotion, and then we have to understand this, then there is no difference between the emotion of the interaction of the physicality of the man, and any other creature in the U. If mankind understands this, mankind will become, and will be able to travel the depth of the U, with no problem. Recognition of interaction is the same in all dimensions. So when you become passengers of the U, there should be no difference between the structure and the work of your STP and the soul of another entity. At the same time each strength will give an indication to the soul of what are the intentions, (:38). what is the availability, and what is there to be changed and needs to be adjusted.

In so many ways, if mankind moves to understand the interaction of the two fields, of two system, will create given emotion, mankind will start measuring, understanding replicating, and teaching the soul of the man for his dimension of physicality to recognize different emotions in the universe, where this will become the soul of the man, and this become the soul of entity. As on the earth we fix it, and as our systems we can adjust it, we can adjust both systems to understand the color, the field, the emotion, related to each interaction and strength, we can change, we can see how our soul reacts to different strengths, and in that process, what it means.

For this process we taught you the Cup of Man, that became, in so many ways, the creator of that second soul for you to understand, to interact with, and understand what each emotion ?? needs, what does it mean and what is the strength. In so many ways, if you understood this, the next level of understanding as we did with the soul of the man, and with the entity of his physicality and his soul of physicality, now the scientists, (1:40). and those who want to become the man of space, need to go back to one step. Make reactors dynamic as you've done before, one to be a Cup of Life one, and one to be the Cup of Life two, and interaction between the two you can adjust, and create, and start understanding the interaction of the motions of the fields, and to start understanding the structure of the soul of the man, in the interaction with those of the universe.

As I said, we never seen a Cup Life anywhere in the universe. And the next step for mankind will be in the research and development, the interaction of the Cup one in dynamic form, with the interaction of Cup of two in the dynamic form, and in the position of the two, the creation of the fields of the emotion, and with that mankind in a rapid way, will start to understand interaction of the fields of emotion, how fields from this, it means sorrow, what field from here, it means joy. And then in that process mankind rapidly will become, a true man of space.

As I said, we have reached post Corona, Corona is for the leaders of the world to be busy with it, where we take mankind into space and we cannot be busy way that. In so many ways, if mankind understands the travel in the depth of the universe needs training, (:42). training of the soul, training of the understanding of the operation of the Soul of the Universe, even going as far as to understand the strength of the Soul of the Creator, in one way another it's all the same. It's on the strength and the "eye" of the soul of the beholder, to understand even the communication and the feeling of his creator.

The process of unification will start from this point on. We start teaching you how to, do not touch food, how do not touch what we call the wrong emotions. We teach you how to protect yourself in the depth of the universe, and in time, at the destined time, you will meet your, what we call, fellow passengers of the first spaceship, where you will become one of those to travel the depth of the universe. Some of you will graduate and reach the point of understanding the work of your soul, and you would not like to be a passenger. This has been gifted to the two souls, what we announced as before, but the rest will have a long way to understand to reach this point. As they were gifted by the soul, in the level of the Creator.

In so many ways will expand and we develop, and in so many ways, we start teaching you how to, first of all, understand the creation of the emotions, (:44). control of the emotions, which has been a shackle on man not to allow his soul to be free. And then the interaction of what we call, the new systems of what we call, Universal Cup ones, and Universal Cup two's, where you understand the control of your soul and the soul of physicality, and how you can expand one to extend unto the others, or vice versa, the same. This will give you a trust to be able to let your physical dimensions, to be handed over to your soul, and vice versa.

In the coming weeks sometime as we develop the technology of the space rapidly, in conjunction with the Iranian scientists, we start releasing these kind of information's for the others to follow. At the same time, when we reach to this point we will understand huge problems. We will see massive, massive problems for humanity, those who will take and run with the knowledge and enjoy its beauty, and those who will have a problem stuck in the racism, nationalism and the rest. Soon you will understand why we created the Universal Councils and Universal Council members. And in so many ways, in so many beautiful ways, the soul of the man is ready to take into space.

As I said, if you go to the very first writings, we say we never see in the universe these kind of shapes. How did you expect your Cup of 1 Man, and Cup of two man to take you into space. Many of you should have realized, this is the destiny. But, (:46). step by step, we have to take you across, and if you understand how to operate these, in no time Corona will be a friend that we need to learn from, that in the depth of the space, we come across many of these energy packs. How do we absorb them to become food, energy, and at the same time, we can use it to feed the others.

In the next step in development of the soul of the man, man has come, and has to move into what we call dynamic systems, as we did before, that in the interaction of it, he will understand all emotion of the soul of the man, not the emotion of physicality. And in that process he decides where, and how, and when to join and to travel. In so many ways, you don't need a rocket or a spaceship to jump up into the spaceship above, or the Motherships if you have elevated to understand the work of the soul of the man, in true dimension. So in simple way, we will go through the same process, you can stay passengers of the spaceship called earth, as your forefathers did, you can develop yourself to the system, to become co-exister in the spaceships we shall travel the universe. Or on the other hand move a step up, move with the strength of the soul and you can choose the point, the place, anywhere in the universe, and the Unicose.

In next few months will try to get you to this point. (:48). You will see new lights, you will see new features, you will see new colors that you have never seen. The color of the plasma is very different. If you look into the book number three where we showed the Gans's for the first time, we have explained, that we will see unusual colors of the Gans. In a way, the Gans's and their interaction, create a new dimension, and new colors that are not visible to the eye of the man, but they are part of the interaction, visualization,

sensation, emotion of the soul of the man. When you put the Gans's together as you see, it's not the colors that your soul sees, and observes, and understands.

Knowledge of man has to move on very rapidly, as we cannot leave it to be taught very, very gradual, as two reasons, the time of what we call, balancing the whole of the Unicose, is approaching, and is very short. At the same time, if we teach this in a long term, will create more problems. So in the coming weeks, in the coming days, and many of you will need to, and will move on to, what we call, "the truth structure of a dynamic soul," both, one, to be the soul of your physicality, and one to be the Soul of the Operation. And in learning how to interact between these two, you can change from one to another. In so many ways, mankind has no choice, mankind and the rest of the creatures of the universe, (:50). are all on the same track. There is no exam day to see who passes, is the day when everybody will pass, will understand, and need to understand if they want to become the passengers of universe.

As we saw a little dinghy weather brought a halt, and resulted in abandoning of, what was supposed to be one of the most advanced launches of present time, yesterday, with the most advanced nation on earth, what we call the United States. They have to abandon after loading, with a fear of even, the system might expose what they were unloading. If we understand how backwards this technology is used, by the what we call the present space technology scientists, it will be jumping lead, for the Keshe foundation scientists who understand to move to this dimension.

In so many ways, if you go back into the structure of the Keshe foundation, when you understood the star formation, and then you understand now the position of the creation of the Gans's for the soul of the man, then it should not be very hard for you, to know how to translate this (Cup of man), into this (Star Formation). And in so many ways, mankind has to become the controller of his own destiny through his own essence. And if one understands the operation of what we call, the soul of the man, then the man understands that space is an oyster, (:52). for those who can enjoy expanded extension of life.

So what you call emotion, is the interface between the two parties, that both understand, exactly the same as happens in your brain. As the flow of the fields of the emotion of the blood from physicality, in the interaction with the flow of the fields from the essence of the creation of it, gives you what you call different emotions. If you understand this, if mankind moves to the next level of understanding of the interaction of the fields, mankind will rapidly develop new technologies and systems. And it goes back to what I've been asking you for over a year, please do not look at the physicality, but look at the fields. Now you understand why.

In so many ways, if mankind decides, he can combine many, many systems to travel with the essence of the motion, to travel with the speeds beyond the imagination of the man, and to be the passenger of the universe in any dimension. But mankind has to understand one process, what is the Creator, and what is to be, what we call the light of the Creator. If you understand that, (:54). then you understand simply one thing, when you have the

Sun, and you have the ray of the Sun, which one is the creator, and which one is the essence. Rick, could I have the picture of the Sun I sent you please.

In so many ways mankind will have to take a leaping step to understand the totality, and at the same time, to understand how it's created, and how the creation comes from the essence of the Creator. If you look, if we can explain it in a very simple way, this is the Creator, and the lights, as you see expanding out, are the essence. It's these which makes the life. It's these which leads to creation in the universe. In fact, the Creator has two dimensions, one of His own, and one should releases to be created out of, what we call, in so many ways, Mitras. As the Creator stands alone, but through his essence, leads to creation.

In time, for those of you who progress in understanding the work of your soul, (:56). will understand how this works, because that's a key, in the ?? circumstance and knowledge of the creation. This is how, even though keeps the same, it gives to exist, to be given to be the creator, to become the essence of creation in the universe. If you look at it this way, if the Sun of this planet has taken, and is so small that it can lead to the creation of man, then you've got to imagine what the Sun of the Creator size will be, that my divisions of it, and subdivisions of it, from Unicoses to galaxies, and the rest, leads to creation, which is from the remnants, of the remnants, of the remnants, of the fields, which in so many ways, mankind has become a factor, of a factor, of totality. But in essence, both comes for one to be created.

Maybe, maybe mankind will have a chance to survive in the depth of the universe, condition upon, that mankind understands the work of the universe, (:58). and can exist and coexist within the fields of it, understanding of the emotion of it, and in so many ways, understanding of the totality of the interaction. In so many ways, if you understand that you are the passenger of another system, all you need to do, is to tune to the soul of the planet, and the emotion will dictates and will tell you how, and the way you can travel the space between the two in no time. The way you think, and it's instantaneous. The way you work with your emotion, is instantaneous.

In so many ways, it's what the mankind has been looking for, as zero time and space, where the emotion is zero time, and space, as it has no space, for the interaction of the fields gives it the dimension of time and space. Once mankind understands this, mankind does not need to fuel tanks, and wait for thousands of millions of light years to reach. The existence of the universe is based on the interaction of the fields of the universe, and all travel, zero time, and zero space. Time and a space comes into operation when the matter state of existence appears, and when the lower strength need to find dimension of the travel. Anything, any point below the level of Creator, (1:00). has time and space. Where the Creator has no time and no space, according to where these fields will manifest themselves, and only time and space exist at the point of the observation, otherwise there is no time in space anywhere in dominion of the Creator, as the whole is part of itself.

Philosophers of coming generations will try to analyze this, and try to explain, but it is as simple as this, there is no time from the essence of the Creator to the point of creation,

only time exists when it's created, and become tangible. When it has existence, confirmation of itself, and if the Knowledge Seekers understand this, you can travel the depth of the universe in no time and space until you arrived at the point of destination, then at that point, you create your time and space. As you look for confirmation of existence.

In so many ways, if you understood this, is no different that what we taught you from the beginning, the Principle, the Transition, and the Matter state. The teaching, the understanding, is exactly the same, be it from the Creator to created, be it from the Sun to the earth and manifestation of matter state, is all the same. And in so many ways, (1:02). what you call Transition, we call the Mother, because when he arrives, leads to the creation, and confirmation of existence, it creates, it holds, it nourishes. So we understand why now, we have, we understand the position of the Creator, and what we call Mitra, the essence of creation, the essence of life, and from now on, this essence will be equal to all created things in the dimension of universe, where now there is an order in this process, that all would be of the same, and all will be shine equal in a matter of the soul of the knowledge, and not the physicality. Even the knowledge has a strength, which means, understanding of the work of the universe. I think what you have heard in past 45 minutes will change the course of humanity beyond understanding, and makes man a true traveler of the space.

And in so many ways, this is how, that what we call the Universal Enhancement systems will work. In so many ways, mankind has no choice. Now you have the whole knowledge of the creation, (1:04). it's you who has to decide which way you will take steps, and which way you decide to enhance and to nourish your soul, that through soul you can create any physicality.

You got to understand, when you have the soul of the man, and what we call, the brain of the man, and the motion of what we explained, the magnetic field, and the interaction of the two fields, leads to emotion, now you need to read those dynamic motors to measure, and to replicate, every emotion, as each one has a different strength, and each one is different ?? technique.

One thing which many of you will fail, is to understand in your initial steps, (1:06). how to create the dynamic systems of the soul, and soul of physicality, that can operate through the universal energy. And this will be one of the biggest puzzles for mankind, how you tap into the universal energy that you can run a system that can interact with the energy fields of the soul, and you can feel it without the existence of the brain, and you become to be the passengers of the universe, as soon this will be the soul, or the energy pack of the man, and the creatures of the universe, mankind will soon meet.

Unfortunately you thought you know everything and what's the next step. Unfortunately it's you who have to decide a simple fact, do I see, do I feel, through the dimension of the physicality, or do I see, and do I feel in the dimension of the soul of the man, where this soul is created by others, (1:08). and creates different line, but both has to be understood. Man will lead as he has done, a twin life, one through his physical understanding, and

one through his soul understanding, and both will give the same emotion to the man. In the physicality we have condensed the interaction, in the universal condition he have taken the physicality away, for man to be free.

In you're asleep you operate from this level. In the daytime when you're awake, you operate on this level, but as in the waking time, or a sleep time, you still have that part of the brain, what goes on between the two, due to the mass interaction of what is as a brain, we remember some of these as dreams and memories. Dreams are interaction of the fields with the soul, (1:10). and what is reminisce left within the brain as they slow down, and we remember. And as they touch on the way back, and every cell of the man has understanding of his position, mankind will visualize, the mankind will taste, and touch, and feel, as it touches different structure of their physicality, at different strength. In a way what this means is that even the soul has a memory, a full interaction of the fields within itself gives its memory, and its emotion, as he has a center, and has to move out, and the same interaction will take place within this field.

I hope I have not lost you in the maze of the knowledge of the universe, and if we have, you need to listen to this teaching many, many times many, many times. (1:12). Teaching the knowledge of the Creator is simple, understanding it depends on the ear, knowledge, and audacity of the listener. It is not simple if you don't understand, and it's simple if you understand. There is no other way we can teach you, and in so many ways, if you understood, and understand the power within, in the interaction of your soul, you can create this, and through this, physicality, or vice versa. Then this is not subject to AA, or protein, or a position of planet, but to the strength of the fields of the point of manifestation. That's how man was created ??? In a way, you decide their own physicality, (1:14). at the point of the Transition, or ?? arrival both from your soul, or the soul of the community. If you understood this, in so many ways, and you can go back to the next step, as you've seen in the body of the man, what comes as field of the emotion, and what comes as the fields of emotion of the soul in interaction with each other, creates the Sun and the physicality, at the point, at a given point within the structure of the body of the man. So if you understood this, and understand that if you can use the essence of the creation, and the dimension of your own soul, and direction of its interaction of the fields of it, you can manifest yourself anywhere in the universe, in any shape or form that you might need to be able to exist in that point, where in fact, this becomes this, and this becomes this, and that point becomes the Mother point, the point of the creation and manifestation. With this if you understand, man has no worries where to and how to manifest itself, at any point, (1:16). be it in the depths of the ocean's surface, at the bottom, or be in the highest, and hottest volcanic eruption the universe, or in the ?? region of a man ??

As I said in the recent teachings mankind has not lives, has not lived in the true space, open space of the universe. And as an example in some of the recent teachings I explained, mankind takes off he calls himself, a man of the space, travels to the moon in the same suit, in the same capsule, in the same body, and comes back. Mankind has not up to today and lived in the open span of the universe. We do not know how he'll react if we leave man in space, would he survive, would he demise?

In so many ways, when we have the birth from the womb of the mother into the atmospheric condition of the earth the child goes through a transition from the liquid to gaseous state. Would there be any difference if the child is born in vacuum of the energy of the universe and taps into the universal energy. In the near future, mankind will do this test to see if its offspring need to be born in atmospheric condition, or can be born in any condition, and the child will decide on his own destiny at the point of arrival. In a way, mankind will start giving birth to his offspring according to the position, and the place where he manifests himself, and one thing for sure, the child will survive, and if it's ?? tuned in the direct line how to use, and how to tap into the universal energy at the point of their creation. ?? All these are dilemmas, which from now on, will face the mankind and all these needs huge assets and the investment by the governments and the nations of the world, to achieve, to be able to catch up with the rest of universal community, as the knowledge is given and mankind needs to utilize it, to become the true passenger of the universe. When man came out of the water to take air, he did not die, so shall he not die in the depth of the universe when he gives birth to the new child. And in that process one point will come very clear for mankind, that man can live in any dimension across this universe, and it's him who has trapped himself in the dimension of the physicality on this planet. (1:20).
Any questions? We have no questions we can call it a day.

here >>

Q: … (need Spanish translator ..) (1:22).
This questions remains from last week. Does this coincide with Chinese Medicine, what you are teachings, Yin/Yang?
K- No this has nothing to do with Chinese Medicine. We don't teach medicine here, we teach the creation of the soul.
Q: She says this because the Chinese mention they have 3 points of Heart Chakra, Pineal gland Chakra, and 3rd one.
K- Can we pass this question because it has no relevance to what we teach.
Q: When you mentioned the soul has memory does this mean the soul remembers previous lives, (1:24). in any other place or on earth?
K- I am going to put it in a very, very easy way. Your physicality remembers the color of your hair from your grandma, your grandparents and everything else that has made you. What you call, in your DNA and RNA, and your soul is created by the interaction of the physics of these fields. What do you think, can it be any different? When you, I explain to you in a much easier way if you do not understand. When you put the Gans's in the dynamic system, when you create the hollow center, which that hollow center becomes, radiates out the higher order fields. This (hollow center) was created from the interaction of the fields of this (Gans's dynamic), so if this (hollow center) lead to the creation of physicality, so does your soul, will do the same. So in fact, within your soul, (1:26). as you carry the DNA of your physicality, you carry the memory of those who make the DNA, which means your soul is aware of the whole structure, and more, partially of the DNA and on the other hand, of its own existence and memory, which man has no access

to at this moment. So it records both due to the physical condition its created, and secondly through the understanding and interaction of the, with the other fields of the U, what we call, the Soul of the Creator. So yes, your soul will remember both the operation of the DNA, which is your physical dimension, and operation of its own operation with the other souls in the U. It has a huge memory bank. And it remembers everything because it is made of both, and what will be interesting and you'll understand soon, that the memory of the soul of the, any creature carries the totality of the information of the U, and not the line of what you call, DNA, because in the U, once a decision is made it is available to all, and it depends what you want to use it for, and if you want to access it. So the STM doesn't have only the memory of the mankind, it has the memory of the totality, (1:28). from the beginning of the time.
Any other question.

Q: Can you ask Mr. Keshe to go into more detail on what the universal language is, and understanding it, and speaking it?
K- In time, in time.
WL- .. you mentioned the memory bank of the U, I think somebody could call this the "Akash Records" like it's the same meaning of the data bank of the U, so the whole U actually has one, so if you can tap into that it includes all the creation of the Creator, the information was there, right? (1:30).
K- You explain. .. let me explain for people to understand, WL is an expert in Akash, and everything in her life ends up in Akash, she is a master and a teacher in that, and she still is a student in so many ways. So you have to understand the background she comes from, she spends a lot of time explaining even the Akasha of a stone. …
WL- So another question is about the Mother of the creation, because you mentioned, Mitra is the essence of the Creator, so I want to know is that mother of the creation, also come out from Creator. ..
K- Of course, it's the light of the Creator.
Q: So that means the essence of the Creator is the light of the Creator, what you call Mitra. .. Because I don't understand this word, I checked, it tells me, it's a god's name.
K- It's the Goddess of Creation
WL- Ah, yeah, the Goddess of Creation, okay then I understand. Then that will be so beautiful (1:32).

K- It brings a lot of things together in order.
WL-

(1:34).

(1:36).

K- .. Lyn is another part of the twin set with Ella, and she is Buddhist in essence of learning from the monks in the temples, and she is a deep thinker in Akashic, (1:38). many hours she spends around China to deepen the STM ..
(lost WL .. now back on) (1:40).

K- I think the Chinese government thinks you're giving too much information about Akasha and soul, that's why they cut you out.
WL- oh, no, no .. I want to go back to your first book, the structure of the Plasma, like all of creation follows that structure, to understand more.
K- Explain to us what you see, you read all the books, and what do you see. What do you see through Akasha and the future of mankind in what you learned today and before.
WL- Actually for Akasha I am still a practitioner, so give some time .. give me some amazing view, information .. I can see because .. my first time I joined the Akash training, they are doing the same thing, they have no limitation … everybody has that same opportunity to be ?? Chen, to access the Akasha recording, (1:42). to tap into the universal memory bank.
K- Where do you think mankind will go with the new knowledge …

WL- I think that is why we are here, that is the change point, because as a Chinese KS has a question here, he is asking, "why, because if our soul has the full memory (of all creation), why when we created the physical body, and now we loose that memory?
K- Because you got a weak planet with its own weaknesses, that you created that weaknesses with interaction with the STM. It's the fault of the planet and its fields, not the soul. You can only make with what you cut out as a statue. It doesn't change the essence of what the statue is made of. If you are an amateur you make it with a lot of faults, if you are a master you make a statue without any faults. And that comes from the essence of the interaction of the fields of the planets, and the destination of the point of manifestation. If you could find anywhere in the U, that in fields and strength, and in proportion, the same as the strength of the Creator, you will create a perfect entity, the same as the Creator.
WL- Then I understand how important the Universal Enhancement Unit is, (1:44). because it can create the universal field, and then it will bring back us to be perfect, not being limited by the earths magnetic field again.
K- Exactly. This is why with the second unit of the Enhancement unit we can create any fields .. in the U, in the system. Anything else?
WL- Can you explain how we can communicate with the lovers or relatives who have passed over? Some Chinese is asking this question.
K- Does he or she want the lover, ex-lover, or people who died, there is a big difference? the soul of a live one …. The access of the soul in both dimensions, (1:46). is that the line exists, is that the other has to accept it, you cannot force to open. Before you were born at the point of inception, and when you was born, it doesn't matter where in the U, you already have a line of connection, it's where we are positioned, we accept the positioning of our souls

you can always communicate with them …

I will teach you a trick, this is what I call a beautiful trick. If you can get.

(1:48). because it's him, you become the controller of the emotion and you can establish a line, he can miss you, he wants you, you create that, he feels that, so simple. If you created a clear point, even if there has been a problem in physicality, you can establish

that link through the soul. And then he assesses if he wants to keep it, or you used to be a naughty girl, he says, no way, I am not even letting you know to establish this link.

(1:50).

(1:54). When you speak about intention and then you understand it, then you'll find out. I'll tell you something, I was looking at it. I want you to see something. This touched me very deep in the past 24 hours. And if you know this picture (Minneapolis police officer killing black man). You see this is intention, this police officer wants to kill the man, and he kills him at this point. If you see the video, that he deliberately goes to kill, because the man is of a different color and race, and a watcher videos the whole thing. Can this officer walk away in US just because he wears a white skin. His intention was to kill from the beginning, and if you watch the video. Is president Trump going to leave this man allowed as a president of this country, (1:56). or execution has to be for him a path. Not the physical execution, but taking his soul form him. If you watch you this video it gives you a lot of things, why this nation called United States should not exist. When this atrocities have passed on the street and the president of the US does nothing for it. The intention from the minute …
was it an emotion or was it intention. Sometimes when I watch more and more how the pride of the white skin, shall we ban that until they learn, and count all of them the same. This is horrendous video to watch, and he is so proud he can kill a man. I wonder, I wonder, if anyone can watch this video ..
(1:58). .. And my intention is very simple, no American can leave their nation until the Chip which is put by Mr. Gates …
this is how we see them outside the US, as murders. ..

It shows mankind is not ready to join the UC, .. it brings shame to be in the body of the man. (2:00).

was this the American Dream, then you understand why we need to understand, and I told you from the beginning, there should be no nationalism

Do you think his soul will allow him to go into space. And strangely enough it's the same behavior as Gates ..
(2:02).
Sometimes I wish I was never born to see these things on
.. When you go to African nations, black does that to black .
Why mankind is like this? And why are we spending so much time trying to get this animal out of this ?? (2:04).

Why do we do this on this planet. We do it to a chicken, to a lamb, to the fish ..

(2:06).
where do we elevate the STM to stop these things. It's amazing to see how people see no value in another life. And how long will it take us to change this.
(2:08).

What emotion brings that intention to kill? You see the man after killing this man walking so proud. Go and watch the video on the Internet. Is there a justice in the US. I know what I would do with this man, the new way is very simple. Then why do you expect to become the "man of space" when you are like this. It's 10 minutes video, you watch until this man kills this man, and it's al been recorded. Now you understand what's wrong with the whole structure of this planet, and sometimes I think we are wasting time here, let it go, but faster. Who said the European color is the superior color, except them by killing and murder for centuries ..

Why this planet does this as a way of surviving an demotion of satisfaction? (2:12). I really didn't want to teach today, I thought mankind will never go forward, when I saw this video …

.. But why do we have to get to this point. (2:14). In the coming days we'll give this picture to the ambassadors …

What is interesting is this if you read it and understand it.

(2:16). the shackles of the emotion of the man, that the STM can be free. What I would love to do with officer, put him in an Enhancement Unit to feel his emotion .. he will suicide .. have to take his children with him so not to do to others.

What do you do if you are the son of the man in the skin of black …
(2:18).

(2:20). This what you see in front of you has happened to us, but with 8 officers in Belgium with Caroline, the same woman, that Blackman down there, is a white woman, when I heard the noise and the cry on the other end of the phone. They are so man that they waited for me to leave the house, to attack a woman, in a Belgium police uniform. And it is the same uniform which appeared in the courts, same man. You'll find out something very interesting in the uniforms like this ..

The only thing left is not to trust a man in a uniform, especially when it's blue, (2:22). it's not to protect ..

(Shows picture of Belgium king), (2:24). no difference between that man in blue and in pink trousers ..
(2:26).
Any other question?

Q: Are there entities that feed on our negative energy?
K- Yes, our physicality. The only feeder is our physicality, and that's why you'll understand when I tell you, when Paul, John the pope died, his soul was literally nothing, because he was aware of so much crimes by the priests around the world, abusing children, child trafficking through Church, and every other thing you can imagine.
(2:28).

Q: If you don't have dynamic reactors can you put Cup 1 above head, and Cup 2 below feet, ??

K- You can do what you like .. everything helps

(2:30).
The perfect combination is 12, where with John it's 10, 9 and 1 in the middle.

The setup in Iran will be 12, it's a perfect combination ..
(2:32).
Q: .. you mentioned about emotions, you said don't come in touch with certain emotions, also the control of the emotions, .. I have been thinking of to start learn about this topic, get trained about how to control emotion .. .
(2:34).
K- The problem is that, in the coming weeks we'll teach as part of the process of reaching the ultimate goal, that how to understand, that emotions are created in a different, in a fundamental way, how we create a bridge gap, a process to change the emotions. A lot of emotion has a psychological pattern that we react according to. And if man understands this then he can override it, control it, understand how it is created inside the body of the man. Then in so many ways, (2:36). we can feed the STM through control of emotion. And more or less it's the only way, you can die and let the soul free, or understand the behavior and control of the emotion to create that dimension of freedom. There is a structure that if you really understand, the STM is much more powerful than the STP, and .. the physicality has created such a heavy blanket on it that it cannot escape, but to control it, to hold it within the structure he has created, that is within the cells of the brain of the man, which create the emotion, man ?? control those push the barrier beyond .. This is what you do .. reflect, changing to take over by emotion, from my soul. it's very easy, you can reduce the strength of your cage which is your blood circulation.

(2:38).

if you listen to teaching 2 or 3 months ago, and now you can see how they have changed ..
when the soul is at peace it delivers in the voice of the Creator much easier ..

(2:40).
There is a study about soldiers who have returned, even if they brag about it suffer ..

make the soul a prisoner, and that is the time that there is no light.
(2:42).

There is a lot of work into
(2:44).
Any other question.

Q: .. I saw this terrible picture from the killing yesterday, and it was such a pain, (crying) how is it possible that can do what this policeman did, that is my question, what can I do, it pains me so much and then it takes over my whole body, (2:46). and I start shaking, and I just don't know what to do, is there anything I can do to help these people? I am sorry. (silence)
K- In so many ways, I think I went through the same emotion as you did. You are from Switzerland .. I have been through this, especially by a Swiss officer, but in a different way. Swiss officer, I didn't know he was a Swiss officer, came to see me in Italy, .. I didn't know who he was, he said he came for a specific reason that I could help him with his health .. (2:48). I said, how do you know about me.

He said, your file is on my table .. we all know you have the knowledge to

.. don't come to Switzerland, Americans have positioned people to kill you if you come to Switzerland for 5 plus 1,

(2:50). And it's very strange how we understand the value of

Why do we ever need to watch these things ..
what we see in this video is everyday happening ..

(2:52).

I get all sorts of reports like this on a daily basis. but what are we going to do with this nation . this behavior is becoming ingrained in our children form games from this nation .
(2:54).
he has to pay for it, if he only knew ..
what is going to be done by Trump on this chap ..
(2:56).
nothing we can do, but teach and
Sorry to create such emotion, .. but nothing can be done. I just want to see how his children end up and what is the reason, (2:58). both sides have to suffer.

Martin Luther King went on the street because of these ..
the question is why mankind has this behavior, it's not just Am . all of mankind has this behavior.
(3:00).
.. Are we going to vaccinate the lions, are we going to vaccines for every animal on this planet. I said from the beginning, just push it in faster. You see if we hit it with a meteorite and just split it, all this will split in the ?? source, the best thing is to push it in, melt it, and start with a new dough. Many times I considered, and it is so easy to do. It takes me one reactor, smaller than a 3 cm to trap this planet out of its system, and send it on its way. One, only one. (3:02). I have the knowledge. If you understand the process of electron and a proton, understand the ratio of a 3 cm diameter core, and the planet, you understand so easily you can just pull this in. The T is part of the space travel T, but you can lock it, instead of a UFO, you can lock into a planet, it's all the same way. Send it for

a spin and melt it to the core. I said to myself many times, why are fighting here to change this place.
Any other question.

Q: I have a few questions.
(3:04). K- You got allowed only one
Q: I bought one of these USB you can put in your home and will protect against the 5G 4G, would that effect the reactors of the Gans ?
K- I don't know I don't play with these things.
next question

Q: .. How do you transfer that magnetic field into the gold ..

(3:06).
K- .. I never answer these kind of questions ..

There is a big difference between magnetic field, and plasmatic magnetic field.

(3:08).

Go and read about the Inertia and M G field ..
(3:10). Q: How can we neutralize vaccines. The governments are bringing out laws you have to inoculate your children, yourself, to do any official paper, be it ..?
K- Hopefully within a very short time, KF in conjunction with Iranian officials and government universities will put out a T that eradicates nay use of any vaccines. In the process which is going through T developed by the KF.

(3:12).
In Iran we will not vaccinate anybody ever again.

(3:14). .. The paper

You do not need any vaccine when you are in the space.

(3:16).

(3:28).

(3:36).
magnet on blood

(3:38).

K- The U is in transition as long as there is life in the U.
Q:
Q:

Q: It's a new world, huh?
K- I know my world, I created it. … that the knowledge of the U is far, even beyond plasma, but this is as much as man can understand today. It's very much like last century if we would have told you about nuclear in 2020 , would have said, uhh, in 2040 you managed to understand about the atom, and now, you are nuclear, and now you understand about the plasma, and the Blondie wants to go to nuclear, (3:40). like you want to go to magnet.

(3:46).

K- I don't think so
Q: .. listening to today's teaching, (3:48). it's not all doom and gloom. You never fail.
K- I don't fail ..

Q: Azar- … I want to go back to … twice in the past we got to this point and we failed, everything was destroyed. It means third time (3:50). then to the development of the creation .. when COHN was made, AA, if you had added one more thing ..
We had the chance to make the soul the boss ..
If the Creator going through the 3rd time ..
K- No, no, the Creator not make the 3rd time.
to become correct. It's a big, big difference.
Q: so this is the 3rd time to become human.

K- I never been to school.
Q-
(3:52).

K- So that is where the maturity comes.
Q:
K- The only difference is we have a better communication system,

Q:

(3:54). Q: Were you here the last time.

(4:04).
Q: Repeats question 3 times ..
Q:

K-Plants kill s well, plants are not as innocent .
(4:06). Q: .. The field strength of the earth being at the level of the Fe, but not in the way we consider there is an Fe core,

K- It's a combination of the 2, what is in

(4:08).

END

331st Knowledge Seekers Workshop; June 4, 2020

ENGLISH TRANSCRIPTION

"Cycle of Creation" intro video

(:19). .. Today's teaching will be amazing if your soul's hear it …
As we push forward with more teachings. .. We cannot bring everything only on Thursdays as we push forward.
It's like when you prepare a cake .. then the final ..
We'll bring everything together stage by stage .. man understand about his own creation .

(:22). it is easy to understand how you all have been created. Nobody dropped you on this planet, you are the children of the soul of this land, ..
(:24).
The problem physicality of the man, is the emotion, is both ways. The STM lies to the physicality, and STP lies to the soul, but the soul sees. And this is one thing that the STP through emotion has not realized
continuously tries to put it right.
(:26). .. earth so beautiful the Creator wants to make it His home, to manifest physicality
(:28). in matter state of the brain, then mankind might be able to enter the last stage .. mankind has been kept away from his soul. by keeping him away from his soul the STP could do what he liked, steal, rob, do anything they like, and then put values for it, value in wealth, knowledge, …
(:30).
mankind needs to understand what needs to be perfected .. what needs to be changed in the strength to become the beauty ..
(:32). .. If you push alkaline to the limit it will become acid ..
this planet will become the heaven in the U.
How do we tame it ..
(:34).
allowing the STP to become one with STM they become one .
man walking as a light, every cell ..

.. not rely on a machine, (:36). but that it becomes part of the essence of his being, part of his soul and physicality ..
bypass emotion and unify..
You can do 2 things, from within .. form outside ..
(:38). The STP needs to be elevated that is reach the STM … that you don't see any difference between the end and the beginning.
. We cannot destroy the STP just to have the STM, they are all needed
Now that the Creator has chosen the earth
(:40). We can give you as much as you like, but you have to accept or it will not happen, we need to enlighten you from within..

In so may ways we have given up on man to be able to do this, and in SMW we have brought the knowledge for man to be able to achieve this. WE have given you everything we have brought you the most beautiful soul in the U ..
(:42). to show its beauty to be able to reach the STM … the STP can never reach the STM its strength is too low, but it can shine through it..

(:44).

(:52).
if we give it to you it's another freebie, you don't put anything in ..
(:54).
through the riots in America we'll bring you the soul of the creator ..
(:56).

(1:00). the absolute pinnacle. My wish is very simple, peace on earth and love of mankind for the whole of creation and not only for man. What can we do, and how can we reach this? How can we cross and in a way still be with emotion, and at the same time let the STP sees and works with the STM. (1:02). still keep the structure of physicality .

.. We have to make a structure that the STP becomes independent of the emotion, that is the key. Where both the STM and the STP aware of the need in the physical dimension but they do not allow the emotion and the interaction of the fields of the fields to bring a misconduct in the physical dimension. For this I gave you the Cup of Man, and for this I created the partner, (1:04). and mankind misread the existence of the partner. So we have brought you a dummy that you can test on. We have brought you a standard for you start the game ..
.. you should have seen the light between the two Cups, so it means there is a discrepancy between your two souls ..
if the 4 will align to see equal and perfect, you will see light up , all 4 will light, (1:06). at the same time. ..

8 chairs around table ball in middle of table
(1:10).
(1:12). ball went black, Belgium planning murder. it the STP the Belgium ..

(1:14). Knowing its soul is prefect to accept a new soul to enlighten the whole of the man, ,, The STM in the space has a tint of blue, that's how we know they are from this planet ..
(1:16). The light of the Creator shines on totality. It's the strength of their light, not the size of the creation which counts. This is why the Soul of the Creator can be within the soul of the stone. I have brought everything for the elevation of the man, and the celebration of the Universe. It's mankind who has to accept and make the time for its birth and celebration. There is one problem, you do not have that much time. What is the problem, is that you have to undo what all of the planet, all of the races have done in billions of years, you say, 4 to 5 billion in 5 months, and 5 months after that the completion and the gift to mankind. We change your billions into months, (1:18). that's how you understand as human beings.
you don't have much time, that is why you are back on 4 or 5 days a week continuous teaching. More or less I teach 7 days a week, .. I have to prepare the two souls to be ready for that point. I said to Caroline .. that is harder then all the teaching. (1:20)

As you set your Cups, it cannot change, the STM is set cannot change, only the STP (1:22). .. Look at the physical Cup (in CM) and try to change it in physicality, do not look for physical change, but look what you need to change in the STP .. you have a point of reference in 3 ways .
we have the power to change whatever we want, we don't have to ask .. we respect the creation,
(1:24). .. All creatures take the same road
Any questions?

Q: (Spanish) (1:26). .. A young girl is retarded, she made a CM for this girl can it help her with the evolution?
K- The problem is the physical appearance doesn't reflect the strength of the STM and its physicality. (1:28).
Q: She has to wait for the evolution of the souls of the creature?
K- You don't need to wait for anything, you have to respect. This is the problem with man, he wants everything to be beautiful and perfect to his eyes. And that is why man has committed so much crime.
R- Okay was that question answered sufficiently?
K- You can't answer that more better than that. (1:30).
J: I told her the creature, the little kid has to evolve according to her time, she can't accelerate anything.
K- The thing is the soul is happy in where the position is. Don't look at the physical suffering. You have to understand, what the two, she most probably is in a better position than all of us.
Q: I have created the dynamic CM, immediately I noticed a change in the harmonics in ??, can you help me to understand ..
K- I don't hear parts of it (1:32). Can you repeat the question.
Q: … I have created the dynamic CM, it changed the interaction with my physicality.
K- Can you explain to us what you call harmonics.
Q: ..

K- You create different field effects, and those .. will decide and are in line with your physicality .. with this knowledge you bring everything into perfection .. (1:34).

.. this is what we do with the Corona, we don't touch , we transmit .. bring in.
(1:36).
When you have a noise or a pain , there is a imbalance in that area ..
(1:38). Q: (needs Portuguese translation - Rafael) We are organizing here in Brazil to spray around and create the (plasma) dome. We organize this in a Star Formation (SF), (1:40). so we would like to know about the strength of the fields we are creating, we are doing in this structure, SF we are doing here in our cities? K- Yes? Q; He would like to know if the structure of the SF can increase the fields of the spray around in the cities here in Brazil .. they are finding a central point in their city and create other point ..

K- Yes, because you create a dynamic.
Q: We are organizing all the states of Brazil, everybody doing it at the same time across Brazil.
K- I hope we could organize it through our souls across this planet. But soon we'll reach there. Thank you.
The Chinese started this a long time ago and it's going around the world, (1:42). sooner or later we'll link up. The structure for this ?? blowing wind .. and a new cycle starts, and many of you will be part of it, and many of you will rejoice to be part of it.
(1:44). Q: What is a dynamic CM? …
K- What does that mean? Q: .. Define what that means?
K- In a way to be able to elevate the STM, the STP. That is in dimension of that position. That's all. It depends what is your expectation of it. (1:46).
Q: In respect to the Cup, understands that you are creating souls …
K- What do they expect from the Cups, ?? crate their own soul, a shortcut to cover their misconduct?
Q; Okay, next one, can you replicate your soul, and is there an interaction

K- The reality is, is how much you, I am going to tell you something very simple, this is you, all of you, what you have done, and you don't listen. (1:48). In recent teaching I have explained in a very simple way, the difference between a man, and the soul, in the world of the man you run around just to do something, just to busy with. In the dimension of the soul there is enough time to do everything to perfection …

you have no respect for life
falls in love with his own mistake because he is a mistake to begin with.
(1:50).

(1:52).

(2:00).

.. none of you have made the CM ..

(2:06). MaGrav most perfect ..

When we make Cup of Man in mass production we follow my rules, not yours. (2:10). Do you know why I put this flat plate here, because that is your dimension of physicality, you are too physical. And is your body made of only 1 Ca and 1 salt, 1 Na and 1 salt ..

(2:14).

(2:20).

(2:30). I deal a lot in my teachings the love, the care, because this is the only thing that the man is created to be. The rest of the emotions that you put in is connected with your physicality, because you have to justify it's presence, level and strength. If you put enough energy, that energy which you gave out, it comes to the point which is gathers together, and becomes another energy which feeds you back. This is how the Creator created ?? put so much love in His creation that His creation lead to His own balance, what you call the ?? what we call the essence. And mankind never learned this, so we come every few thousand years and teach you a little bit, and part of a little bit, and then you change it then you change it the way it suits you, you make 10, 12, 72 ?? out of it. And the rest of it. This time we are very precise, everything is on the table for you that you can't mistake it, and we brought all the education this time, that there are no Chinese Whisperers, priests and others, to whisper the way they like. (2:32). If you don't even understand how perfectly we planned everything, for the delivery of souls, not just the ones that are here, ?? but for the rest fo the time to come, and the ones who have been here, we even made the communications ready for it. Do you think your telephones, Internet is just a coincidence of man, we gave it to you. Go and read the first night, the first communication, the telephone call was made.
I give you a date, the first flight in Iran, 28th Shabban at 5:30 PM, in go and read the significance of Shabban it's the elevation fo the soul. I wasn't aware of the day, I next day. It's the martyrdom of Bab, where the soul of the creator ??
You lot have no understanding how perfect

(2:34). and in America, all carry a mobile phone, understand and no one can cheat. This time we made sure no we wanted to take the middle man out.

Any other question? Liliana. K- Any other people with questions? (2:36).

Q: You have said that many of us have Corona antibodies, that would imply that we have the Ca salts that would lead to cancer. If we are doing the daily preventative protocols will we get the cancer?
K- What is the intention of your soul? Very simple. In the Tuesday teaching I showed you what will be released in the scientific paper, and I showed you, if you haven't seen it. I am going to show you if you missed the Tuesday teaching. … it's time to move on. (Shows photos of pairs of red spots on someone's skin). This is how the cancer will show inside you. This is on the skin. Do you see doubles, this is the Corona cancer. This is a Corona skin. (2:38). You know the science, have you understood what it means. The

twinity, everything is in twin, so this is a Corona case, and then you see the space gap. And if you notice here you have a double, it changed direction. When you are a woman, and you feel this inside, it means your womb is ready to get cancer
it's the seed of it, getting ready to get cancer…

The doctors have no knowledge, they are ignorant. ..
(2:40). 1.5 million Corona patients … have the remnants left in them. And then there are many, many more. regularly take the bath of Gans's, regularly wash yourself, regularly drink it to get rid of these, not just because of the Corona, for years to come, that's why we gave you the Cup, we didn't give you the water. Why we told the women, if you have a white secretion coming from your vagina, like a caulk or cream colored, .. all those cells will convert into Ca, and you discharge Ca.

Everything we do has a scientific reason, but you don't understand. You see wherever there is a change of direction you have a space gap ?? (2:42).

Corona will take mankind with no mercy. Why do you get pain in ears, or one side more, the same, ?? Why do you get pain in your kidneys, ?? The same. Going back to Corona and all that we have done ..
We would like to reach all your TV stations , wherever you can. We have started a campaign … (2:44).
Iranian scientists … carries the logo of KF Iran.

(2:46). reach your government and within 14 days, eradicate Corona ..
These are the Cup of Life, prepacked, you need this for the months to come ..

(2:48).

(2:52).

Any question?

Q: Where can we buy CM box?
K- It will come from Iran ..

(Shows photo of policeman killing Blackman in America, Ayatollah kissing hand of Blackman in Iran).
(2:54).
(2:56).
(2:58).
(3:00).
(3:02). KF Enhancement Units will be shown, maximum 4 weeks .

(3:04). From 30 days from today, no one should die of Corona …
.. Now the Canadians and Mexicans want the wall up to keep the Corona in US and wars
.. Now spread it across the world as fast as you can .

(3:06). .. you wanted to move now you have it. .

(3:14).

Q; .. I want to produce ?? acid big scale, (3:16). so I have 3 questions about it? How can we be sure we are not creating CuO in Corona Gans? How much does it ?? use?
K- We put it in a protocol which is getting released.
Q: How about temperature and light around the setup?
K- This doesn't matter …
Q: So we should wait for CuO?
K- there is no CuO, I don't know where you get your CuO in what you
Q: Blue and green..
K- Yes, you make CuO but this is a strength specifically for the cell. It has a reason for it. We go that way till we find the totality of it …

(3:18).
Q: .. What do you do when you feel down?
K- What do you mean?
Q: Feel down, all of a sudden you just feel down .
K- I don't know it depends on what got you there.
Q: I had
(3:20).
.. Listen to the teaching today, how all of you didn't get it. You put half of the recipe, you have to bring all the recipe.
Q:
K- Listen to the teaching.
Q: How would the science
K- The science is literally your state of mind .. it's another statue for you to worship.

(3:22).

(3:32). genetic defects not easy after 20 30 years ..

(3:40).

(3:58).

(4:00).

(4:10).
talks about death rate of Corona, highest rate is Belgium

(4:14).

VISION FOR NEXT YEARS:

Q: I want to know what is the vision for the next 3 years, or more, I don't know, (4:16). I am new with this science … from Iran.

K- Our vision is very simple. It's laid out very clearly. We'll see world peace, we already entered it, it's just a matter of punishing it, polishing it. Some nations will cleanup their own house for what they have done wrong before, but that is their internal war, between themselves, not us. As we see in the United States. Otherwise it's cleanup time for themselves. Progressively we see the evolution in science and technology, and a lot of things in the next 3 to 5 years will not be what we see, what we know today. Mainly we will not see armies, we will see education of military forces due to 2 or 3 factors. The knowledge brought out and we'll bring out will make the present arms obsolete. Secondly, the present situation in the world does not allow no nation to buy arms. They cannot afford it, unless they are corrupt nations who try to, just put some money in the bank, it doesn't matter what the nation does.

Then we'll see eradication of hunger in the next 3 to 5 years. I had this discussion in the teaching last Tuesday, that we were talking about the satellites. In fact the KF does not need to rely on satellites. You have the technology much better then satellites. The system which you develop, will fly and supply the energy needed for food. Satellites in reality have become obsolete, in that sense. (4:18). but at the same time, we see the eradication of total and absolute eradication of use of fossil fuel. Very soon, very rapidly, we'll see the end of use of fossil fuel, because once the new technology on the M and G field released, people will take the engines out of their cars. So simple. This is what we are going to do hopefully, in a very short time in Iran, in the university. This is one of the first projects I want to be in it, it's on the table of the work that the university wants to do, and I said, I am in it with the KF Knowledge Seekers. We want to do, we want to bring a special system out, and I am in it for everything which is going to be. So we see, many, many old tankers we see on the high seas, they'll stay there. They rot and they pollute, and so we have to plan for them. It's the beauty of what we'll get back. We'll see by reduction in the use of what we call, fossil fuel a lot of changes. We'll see new illnesses due to change of atmosphere, because we go back to more clean atmosphere, and we are not used to it.

We see the end of the drugs, and drug trafficking in the next 3 to 5 years. We will, do not see anything in that line. What I see, is what we call, the end of the present propulsion flights as we introduce more and more, new flight systems, because they'll become obsolete by their nature. What is see, mankind will keep the space station as a memory of "good old days." Very soon, because man will move beyond space, into Mars and Moon, and beyond solar system in a matter of minutes. (4:20).

We see the end of kingship and leadership, it will become a collective human race to support itself. I see the end of hungers through the process as I explained, and the same (with) medicine. What I see is very simple, is the fact of what I know my technology have, and in fact we see, the world governments will change to it because of the Corona.

Corona wasn't that bad, it brought a lot of good things. What we see is more or less the crash in the property market. People will give you their houses to live in it, because with the present knowledge and what is to come in the next 5 to 10 years, people do not need to live in crowded cities. There will be an option. What we see, one of the first things, in the next, maybe 2 to 3 years, is part of the program KF, we will be working in the background, is end to mining. That will come very, very fast, and the beginning of it is already setup in Arizona testing centers. Which means we do not go into the resources to deplete and destroy the farms, the gardens, and the yards, the jungles and whatever. We will have respect for the planet. The knowledge will come through transfer of the fields. We don't let the earth to do.

In so many ways, I see the end of slaughtering animals, that is one of the first things mankind will stop. The nature will find its own balance, and this is due to be able to deliver food, or what we call, energy for life, will eradicate the use of animals. This is hundred percent sure will be on the card. On the other hand, (4:22). we'll see the end of use of, and destruction of the planet. These all will come together, now especially that we start with Corona, now that the technology comes, people have to accept it, because of the Corona. And as it comes, we accepted that it works, we start building. The research and development in the new technology of the plasma and understanding of the work of the universe, will change that rapidly.

What I see is colonization. Man will start colonizing very, very fast. We go to New York for the best restaurant, we go to Mars for a coffee and back. These are not dreams, these are ones on the card. You will see it. We will make these places to fit us, as living. As we have created the "dome of peace," we'll create a dome of life, living on a different planet. In so many ways, we will see entrepreneurs will not open beautiful restaurants and ?? service stations, they'll build these centers across, and different routes (?? in space), that people can and watch the beauty of the creation. Mankind way of working will change in the next 20 years. Will, none of us will work, because we have to work to live. We will work with the pleasure of it. We'll all become scientists and we'll all become devoted to serve. Because everybody else is busy doing nothing, and everyone else will do what they like. I don't vision, I know what is to come. We'll see a new life, a new cycle. I see a new birth, and that birth will change everything which comes with it. Birth of a new cycle for man, and with it will come a birth of new cycle for the whole of the universe. (4:24). We are the tiniest dust but, we become the important dust.

I see a lot, end of religions, because every man becomes religious to the order of the correct order. We believe through the soul of ours, and we see what the prophets saw. We'll live by their ethos, not by us talking about it. There is one thing for sure, and that's for sure 100%, we'll see a lot of marriages, intermarriages between the mankind and other races, who are here, too shy to show themselves, because now man has quieted, man has matured, we will see that. They will not hide in the clothes of man, they will be themselves. And this will bring a lot of shock to a lot of us, because we don't eat them, we don't see them as food.

In so many ways, we have changed the course of humanity, and we'll see how human race will respond to it. My vision is very simple, because I know what I brought, and I know what I planned, and I know what I am delivering, and I know what I am going to get for it. And there is one thing for sure, I will die in the most beautiful place in the universe, in the physical dimension.

(end of vision…)
Any other question? (4:26).

Q: You just made a man very happy right now, thank you very much for that. My dream coming true.
K- This is the reality for mankind, you had better get ready for it. Get in touch with anyway, anywhere, small chat shows with a videos, radios. .. Radio shows ignore. We have to undercut the power. And we have to see what iti is, we have the most powerful scientific organizations in our hands. We have one of the most powerful correct man in the world, in the world of developing T in the world behind us. And we have millions of KF followers. If we can't deliver it now, forget about it,
slaves to bring in. .. If our leaders and us go the correct way, the true land of mil and honey have arrived. It's just how we are going to set it up. (4:28). The knowledge is there.
Q: What would you do if you were in our shoes, and you found the new science, would you leave everything behind just to seek more into it, and find out more. Or do we have time to set a balance.
K- What does that mean?
Q: A balance between our future and what we just found out about?
K- We can't bring a balance between the past and the future. Mankind has to close his eyes to his past. We have done so much wrong, it is literally impossible to put all of it right. As you say in English, let us start with a clean sheet, but still know there is something underneath of it. You cannot do, we have done so much wrong. Mankind has literally done everything in the books of the Creator wrong with it, done it. And I always said, a father has to be forgiving and forgive and forget about the past. (4:30).

I don't think mankind should write nay history book with the war in it ..
.. The way the Persian Empire and Roman soldier became one ..

(4:32).

(4:36). .. The burden is with the women ..

(4:38).

(4:40). Q: The 3 levels of the MaGrav represent the 3 levels we have in the body?
K- This is exactly your Cup, but we have put in, this is your N coating, Cu, we have the 2 plates together … This is how it sits, this is how it looks, that's how you turn?? And you

tell me where does the soul sit in this? (4:42). .. I have to show something or they'll say I didn't ..

Any other question?

Bring your governments in ..

(4:44). We can use this opportunity to make .. change
Thank you very much..

(:05).

(1:28). They abused it they became Rothschild's and Rabbis.

The reason we read the vision was to tell you what to expect .. it's you who has to deliver

(1:30).

There's a question here I don't like to answer but I will partially …
Q: Could you talk a little about abortion?
K-Concerning abortion, (1:32). is what is done with man, it does with man, we never abort in space, we always find a ??
unless there is a danger to the mother. The mothers life is sacrosanct. The only abortion is when the mother psychologically and physically can't carry through.
Q: .. Two souls, how are they created?
K-
(1:34).

When the soul leaves the physicality ends ..

(1:36).
When we create souls we bring the best of the Universe,

(1:38).

(1:50). teach with you soul ..

(1:54).

(1:56).
.. When you do wrong, expect wrong.

(1:58). .. learn how to tap into the tub of the energies of the universe, immersed in energies .

(2:00). .. this is the STM and the STP ..

.. those who lie, cheat, betray, .. will find it very hard to get rid of brain .

(2:04).
Q: .. how to feed people without food?
K- Partially you already know…

(2:16).

(2:24). question about eating meat by aliens

(2:26). soul of animal >>>

(2:28).

WL- Even in Tibet they eat everything in this way ..
(2:30).

K- Have you ever had a guilty feeling that I am, made somebody to do wrong, or to committed a crime?
WL- Actually if you go wrong, be limited in some religion teaching, and then they said you'll be born as a guilty, you do this wrong, will do that, ?? will be guilty for that. Yeah, in the beginning I think I was entrapped in that kind of thing, but now I was more jumping out form that. because if you thin kin another way, because as you said, he need a needing ?? of ?? ears, to elevate the energy to became, in a more higher order. If I take

a best wish and I give it back, then you don't feel guilty because you do things to help them, but one thing, is (2:32).

K- I am going to teach you something interesting. If this is your soul, and if this is your brain, .. (2:34).

(2:44).
WL-
I met two, one KS said he didn't eat for 10 years. Another one he don't want to eat, but when he go out to diner, he eat a little ..

I am vegetarian for 6 years …

(2:46).
K- What would you do that, if your husband ..

(2:48).

(2:52).

(2:54). Q: .. is the EU a portal to travel form one EU to another on this planet?
K-
Portal has no meaning, it's made by man who has no understanding ..

(2:56).
.. the blindness is due to the conduct of the man … as long as you're atteached you cannot see the soul .. you have a ship leaving the dock, full blast but it's going nowhere, one of the anchor is still t
(2:58).

(3:12).
Q: Can you explain the concept of "purgatory" in the Universal Knowledge.
K- It comes from the understanding of purging, cleaning, in a way, it's part of the understanding of the Christianity and suffering, and they have created this condition, in the true essence, (3:14). it's part of lament. But with the knowledge you have today, do you think such a position exists. we elevate the soul, there is no need of purification , and going through the pain of it. Rick reads Wikipedia Purgatory.
R-

333rd Knowledge Seekers Workshop; June 18, 2020

ENGLISH TRANSCRIPTION:

… As usual we started a long path, road to be where we were supposed to be millions of years ago, and maybe this time it will make it easier. It's 333 KSW (:12). and its sum of 9, which itself could bring a lot, as usual, we don't read off the script, there is nothing planned, and we see what those who decide the future of humanity decide to deliver. As usual as you have seen, .. introduced new products, as we bring new T in. .. show the effect of new T. If it is not used it stays as theory on desk ..

(:14).
(:16). . showed the manufacturing ..
to be shown by the request of the Iranian government for the first time operational, in Iran. We respond positive to the Iranians ..

.. Kramere .. responsible for sales promotion, 8 9 years, 2 years a UC member. .. (:20). shows new products in KF Stores ..

(:36).
K- Thank you .. After betrayal by the Italian KF, we'll bring the KF back in ..
(:38). the man who learns form the mistakes of trusting humans … not to be afraid of making mistakes ..

(:44). K- We see a lot of changes …

(:56). .. or do we have to go through the process of understanding? In the coming weeks we start teaching you about .. 3 dimensional, non-tangible computers, line of communication. The .. prerequisite for it has been set. We'll introduce this T in a very soft way across the world. The present computers become obsolete, the present system controls become obsolete. (:58). I disclosed this T to Iranian Ministry of Defense University, in the past 48 hours. In response to the positive response to the Office of his Eminence Ayatollah K of Iran, in embracing the T, we release massive technologies, through 1 university as we see through the center of technologies dispenser. The T remote transmutation and transportation has been disclosed to the Iranian university in the past 48 hours. Non-tangible systems in a full control. It's for the universities and the heads of Iran how to disperse this T, across the planet on equal terms, but still stays open till all the KS of the KF. Non-tangible, 3 dimensional computer, working on what we promised has been setup ?? I said always, I receive, I give. .. knowledge at the edge of science will come in a very soft way in total understanding. We have disclosed to the

Iranian officials transmutation of elements, and we have shown them. We have shown in a very detailed way, (1:00). how the next generation of technologies will come out of KF, and needs to be shared. Understanding the knowledge is no good, comprehending and knowing what will bring will bring the change. Step by step I will release the most advanced technologies never seen by man. Some you could not even imagine it could exist. If UFOs were your dream, transmutation across the U and planet, will become your nightmare. This T as I wished, and I was assured that mankind will stay on track, has started ??? if you thought you were entangling with Gans's now you have to understand what these Gans's mean, and how they mean, and what they can do, and how they can be utilized, not only for peace, but for communication, transportation, and most of all unification with U Community and the rest of humanity. .. feeding
(1:02).

Do we find a position for physicians, when in fact your soul becomes your physician at the point of need. Don't forget I said, you are the last man standing, you are your physician. we are going through a transition between the man's knowledge, (1:06). and universal knowledge ..
I don't need a physical life .. we came to earth to enjoy the physical, but nothing but suffering.. man enjoys suffering ..
I have hidden many knowledge's without the KS even knowing in the product's you see. In time I will explain how, step by step. When a product is offered twice is because I see the bigger picture where it can be used. It's not that it is there just as a product. When we put something, it is a bigger structure plan .. and with it we elevate the soul, step by step, (1:08).
understanding the true operation of the physical life ..

(1:10).
Maybe mankind is ready for the next shift, but it has to come through man, science and through the ethos. .. change the position of the STM and teaching the way we teach not how they taught ..
unification of all thoughts on the ethos of theology ..

Easier to get the Pope to teach the T under the ethos of One Nation, One Race, .. the understanding of man will be much more rapid. (1:12). We know what we do, and what is to come … through already established systems which has taken thousands of years. Our Brazilian friends in asking a question, I felt the hammer, and I felt the nail, and I felt the pain going through the hand on the cross. I know the pain of mankind and I know we brought

(1:14).

conversion of energy to knowledge .. becomes the knowledge of the University,
I made man so that he can love me … the human race can give back to the Creator .. (1:16). Every field you add up .. leads to thoughts and betterment,, passed on to your soul .. the love ..

add to the knowledge of the Creator .

(1:18).

We bring the knowledge of the Creator for man to put together new ways .

(1:20).

The Creator has decided to take shape on this planet …

that the rest of the U learns from its purpose, from its love and beauty. Maybe, (1:32). today's teaching has brought you a bit closer to understand more. But you will not get systems, not for the time being, new technologies, not for the time being. If you remember we did a lot of theoretical teaching before we started showing how to make the reactors. Now we start teaching you how to get ready, to meet, to live, and work in the dimension of the universal strength and knowledge. And do not expect to have a reactor in hand and something to rotate. Expect to work through your soul, understand it, understand the operation of it, and trust it, then a new knowledge will appear. A knowledge of the U, and a knowledge of the souls. Maybe it will be the time to show something special, and maybe time to create that special condition. For sure, no time has been wasted every step …

We put this dough in millions of years ago and now we open the oven to see how it tastes .
(1:34). .. Christ said, this is my blood, this is my body, and that bread becomes the body, and that blood becomes the love of man to give. That's why it is ?? in the dimension of physicality .. we hide knowledge in physicality ..

It's not all bad on this planet there is something good ..
(1:40). becomes a sanctuary for the U Community.

We have never broken a promise ..
(1:42). but not much left time. Because all the ..

Sometimes I think it was bet to hide man from the reality outside till he matures ..
(1:44).
One of the attributes of the Creator came from this planet, because He feel in love with this planet thousands of years ago ..
If you ask yourself why you have so many visitors, they come here to convert, to taste, to feel, to understand the essence of loving, while they know the Creator is here too. Maybe, the creation of man was not such a bad thing in the end, even though it was accidental. Now you know, and as I said, we start teaching you the knowledge of the universe, as we start sharing this knowledge with the Iranian Defense University, in small steps at a time.

(1:46). Because you have to understand, they need to understand to defend it from any abuse. It wasn't coincidental that we ended up at that university, it was a purpose and a choice that they defend the knowledge, for the humanity. As there are no more armies, that they defend it that it be used and shared correctly with the rest of the humanity, and maybe the Universal Community. Maybe it's time to contemplate, and move and understand, everything we do has a purpose even thought it might not look, because the Master knows how hide the secrets. .

(1:48).

Any questions?

(1:50). Q; When do we know our soul is speaking to elevate us? ..
K- Why do you have to hear your soul? Why do you have to have your soul? Why do you have to have your soul hear with your ear? (1:52). Why do you always have to hear something with your ears? Why don't you trust the emotion of the soul? Why do we have to always be in the dimension of physicality, I have to hear it, see it, to believe it. Aren't you here, aren't you hearing, aren't you learning, we teach you from inside out, but we made a voice to it that you believe it, now you have to find it.

Don't forget, with this dispensation of eternity, we have brought no prophet. We left it to you, according to the maturity of your soul, and your understanding to mature to the point of understanding the totality. As I said, we leave no prophets behind, because now you are the guide, you are the instructor of that physical dimension. (1:54). This is the problem, you got to learn, if you are here at this point and time, the central, what I call instruction, has already made his decision where you have to be, and why you are there. And that is your soul, you got to understand a very simple process, and the sooner mankind understand this, the faster we can take this next step.

Lineage of the soul (not reincarnation):

You have your physicality, and you have a soul, and this soul has an immediate souls which have lived, and lived with. And this soul at the same time, has the souls which lead to its creation, which drew the line to its creation, because these souls have to balance with all other souls. You have a short term responsibility and a long term responsibility to your physicality, and when you are born you fulfill both. It's not just your birth in this cycle, what your forefathers did has brought you here. Because what he did wrong or right has positioned you here, in every shape or form. Partially you are fulfilling the destiny of your physicality and the soul, but partially you are fulfilling the lineage, which comes to you to be in that position. (1:56). Even if you are a cleaner of a street, or even if you are a king and leader of a nation. If you follow the lineage, you might have been a king here, where your great grand children become a cleaner here, but the soul is the same. The dimension of the physicality has changed. And when we created the prophets we followed the same rule, that is why we know where, and who appears where. And in point, we give gifts for the others to be elevated too. In our work there is no accidental,

we see the position and decide that both are served, the time and the place, and the lineage and the structure, the way we set up. This is how we can say, in such a time will come such a prophet, because we have already decided lineage. We allow no interference from outside, from where we sit. At the same time we gift at points for others to be in the future, the creator lineage, at other positions of the U, and they take their positions. As they have learned and matured they take there positions. So the lineage and life on this planet through the physicality, does not end with this planet. And this is why in other teachings I have said, (1:58). you have to care for soul, what it does and what it will bring. Then you want to hear your soul, or do you want to see your soul?
Any other question?

Q: Lucas … in past thousands and thousands of years, what you said about a few minutes ago, about the ?? we have in our planet. Why and what would be the purpose for the Creator only use our planet, if it is about to choose the prophets, why (2:00). .. How would it be possible to do in other planets in the whole Unicose, would the prophets be sort of co-factor to the Creator, and that's why they always ?? here, there is some kind of interaction with the human kind .. ?? if we be a prophet ?? in a mater of love, be able to elevate, and be able to empathy .. in all the Unicose, would be that the .. I way to see. .. Some members of your family were touched by the light of Bahaula, and now we know that was you. So it's an honor to question you personally, thank you.

K- Mankind needs time, and as I said in some other teachings, needs maturity otherwise you mess it up, you destroy it. .. (2:02). Why are UFOs more or less uniform, they don't all come from the same place. In a way, as the knowledge of the life reaches the point of maturity in the U they gradually shape to come to understand the best, the same as we done in the past years. But they have to gain an ethos, and many races never killed, never destroyed because they tap into U Community from the beginning, so it is easy share knowledge and bring them into uniformity that everybody enjoys. The U has a rule, it has a rulebook, it has a guidelines, and .. it's like .. European market, as you join in you all have to have the same standard, the same lay of the same roads, the same health system, and at least the same kind of protection. .. UFOs all use the same knowledge, the same T, because as the community achieved peace and equal share of knowledge, they each shared each race across this U has added something into it. It is not all made by one. (2:04). This is what mankind has to understand.

(2:12).

(2:14).
Q:
K- The problem is not a problem. It's a beauty. The problem is not for the Creator, it's for the man.
Q: But in my way of thinking, the most precious thing the UC is looking for the link to the Creator , the link is the essence of love …

K- There is an old saying, you never see what you got because you are too busy looking over the others, what they have. And mankind has been too busy doing that ..
Mankind has never looked inside to see what he's got ..

(2:16).

(2:26). video; moon lamp, Gans manufacture , (2:28). speaker lamp.
K- .. when you se these it shows all the dreams of man, to be able to fly, reach moon and have a clean planet. .. none of it is impossible. ?? world gone in this position ground itself into the ground, we take the ethos of keeping the planet clean and cleaning up the mess we ?? made up to thousands of years, and especially worse in the past couple of hundred years. (2:30). Then we have access and ?? knowledge what we have passed on to the Iranian Defense University, to make that UFO for humanity. To allow Iran to show the T they have, and maybe sooner than we all land on the moon, the moon of our dreams, not necessarily the moon of the earth. The U is full of moons, you choose. .. man's knowledge has reached to that point to ask and receive, and he has reached that point to be able to understand the totality. Maybe mankind in shorter time will reach ?? but to what extent, and what do we need to do to get to that point.
we have decided to bring that change and elevation …
by converting such a rapid amount of energy to elevate the STM, the planet soul will change too. If you look at it in a simple way, you have the planet and the body of the man. (2:32). You have a disease anywhere in the body, we make you a patch and we let the fields go through to take that pain away, and to make ..
what have I given you, a change of physicality and a pain of the planet, to the patches, to the MaGrav systems, to the Gans units, and gradually we are coming (like patches around the planet), soon then you think, we will be there. But we needed the mankind to need it from his soul, not his physicality. His physicality for centuries, marched the streets, change governments. … no one has sorted it because no one ever elevated this part (STM). (2:34). And with this understanding we elevate it …
you need a lot more to change this one

you cannot take a horse to water and expecting it to drink ..
(2:36). So this is an opportunity for the man to elevate and .. satisfy that thirst for knowledge and peace. One thing is the Creator is not going to wait that long if there is no progress. Every man should know when to cut loose. And I don't think the Creator will be any different. Mankind has to move on. I was asked, would you move this planet to somewhere else with all its beauty? If we see the way it is, why not, if we see the progress and the love, why not. We created it, we control it, we maintain it.
Any other question?

Azar: When you explain about when the souls appear and each one has to ?? position, and we know (2:38). where the souls are according to the lineage. ?? then also we know when the Creator is going to bring a prophet. Say I change to this planet according to my lineage and if I go back to the analogy of the car and a driver, say I am supposed to go to this route, and I am supposed to exit 66, but then I don't go to 66 I go to 73, so my

position changes, so does the position of everybody else changes, and also the position of the prophet at the time he is coming?
K- Depends on what is been agreed.
Q: So I went to a different exit, I messed up the whole plan, just like the, magnets 4 or 5 , change position .. I didn't fulfill my route, so it means I messed it up?
K- You are part of a structure like everybody else, we are all part of the same what I call package, .. so many that all needs to agree for that mess.
Q: So it means as the soul level I am coming all the souls. and I go to a different exit , the other souls understand?
K- The other souls are aware, they don't need to understand. (2:40). Awareness does not become an answer.
Q: .. a lady came, said her grandson acts like he has 3 to 5 souls from the past, he is so knowledgeable … She was asking about reincarnation, if the soul keeps coming back. I said, I don't think we believe in that, Mr. Keshe says the same soul doesn't come back. Then perhaps the knowledge, because we know the lineage, the knowledge is carried in the RNA, the child remembers that knowledge. Am I correct?
K- Maybe. We cannot do, only the time and the place is decided.
E- Maybe I can try to answer Azar's question about taking different exits. It's interesting the analogy you made about driving instructors. .. (2:42).
.. instead of turning I went straight .. it actually took me to the path the other student driver had to take. And I knew that path, by going behind that ..
that mistake allowed me to do everything right to pass the examine. So in a way we can have an instruction and we take a turn or we don't, and if we are meant to reach a certain point we'll reach to that point. And maybe along the way if we don't listen to that instruction we can end up in some side-effects. In this case if I take a wrong turn something happens to the car, which means the STM given instruction to the STP, and yet the STP took a wrong turn, and damages the physicality. I believe that is what Mr. Keshe is trying to explain about the mismatch in the emotion, (2:44). between the STM and the STP that then reflects itself as a disease or a cancer inside the body of the man, that is the emotional cancer. But along the way, because you do not …

Right now we are very scared about what the STM is instructing, because we can't hear it …
Important is not to be afraid to take any turn, because in the end if one is to reach home, ?? or the other, that road will lead to home, it's just that it leads with a bit more complications along the way.
Q: I have one question, I want to connect this to something else Mr. Keshe in the past. (2:46). .. some men come to this planet, and when they leave .. they leave as a donkey, because they became even worse. .. Say I came to cleanup whatever my lineage did on this planet, yeah, and then I was supposed to go to a different path to cleanup, then I don't even cleanup but make it worse and leave. It means another from my lineage needs to come back and do the same, so that is my question, when you go in that direction, you go into the wrong exit, you are going to make more things complicated.
K- It's only more complicated for you. … we also
"jan" means life, it means I give you my life. .

(2:48).

(2:50).
(2:52).

.. But when you make that mistake deliberately when you have the option, you pay for it, by taking the time, by wasting the time, because there are people in the party waiting for you to arrive, you keep everyone waiting, and that stealing from the others is not allowed, when you are aware of it. If you are not aware of it, there is a reason for it. But if you are aware of it, deliberately take your time, what I call the French system. In France the later you go the more important you are, so they say diner is at 6 but in reality doesn't start until 9 o'clock because we know Mr. Franz doesn't turn up at ..

(2:54). So the food and everything else has to wait because of one selfish person.

The loss is yours ..
If in life we fall in love with the Creator, that is the destiny of the soul, no one can do anything about it, but if we fall in love to create the mayhem deliberate, then there is a punishment, in a way of spending the time on your own to learn to go around and come back to the same road and see if you make the same mistake, and take the same junction again to go out. Loving is an art, and mankind knows it by heart, because he created it in that heart because he taught to the soul to love. Souls give, but that is what they do to be in position, but now you give to a soul which is in love, god help the U everything else vibrates. Humanity with the next steps of development, (2:56). in science and technology will create that vibration throughout the U. .. it's like they are going to bring a new car and advertising … the whole of U is waiting for it ..

In a way if we don't deliver on time the universe will start making a fake love, and that wont' do. We give them all that the believe in true not the made up , and fake.
(2:58). Each one of plays a part in it
Mankind has to move ..
What a shame if we miss this bus. One thing, no promise has ever been broken … we keep the promise… (3:00). Maybe you can her it in the background ..

or would they celebrate when the Pope says, the Messiah has come.

(3:02).
Any other question?

Q: .. I am thinking of a driver who has an instructor, but the instructor doesn’t take over when the accident happens, and the car moves and kills a lot of people, (3:04). every time it takes, it kills a lot of people as has been happening in the world, so in that case, what's ?? with the instructor, why doesn't the instructor intervene, ?/ in the killing?
K- Maybe there is a reason, maybe there is a purpose, maybe the soul that is there for the driver to learn something. Maybe there is a purpose to serve. I said that very recently, it's not being ruthless, it's being realistic, and understanding totality. If you look at the life we

done, maybe we. I know there are a lot of hardships, a lot of deaths going on real or fake, or made up, or whatever, but part of it and some of it, by the souls who accepted the mission to be there, to move on, that with their presence we can change the society. All deaths are not, especially on large scale as we have seen with Corona and the rest of it, it was made up, it was done, some people have an incentive to do it, but .. overall there is a plan for even those who made it up. .. it's not a sacrifice, it means the souls have matured. (3:06). No souls leaves its physicality if it has not matured its time. If accident, even that will mature the soul in time. So .. all the souls you see in different positions and times have a purpose.

A good example of one of these beautiful souls is Fabio. Fabio came to us in a beautiful way, and we appreciated his life .. and in that process with his death and with the accident, it changed the course of the KF for to be where it is now. Even though we went to Middle east, Africa, China, and we came back and with all the problems we had. If that accident wouldn't have happened, most probably we wouldn't be in the position we are .. (3:08). ..

(3:16).
Any other questions?

K- Why we don't release the KF virus report in the KF Journal, is because it's the first time we have been requested by the Iranian official, the university, it's the first time, this will bring the credibility of the rest of human race will listen.
Reading Farsi for me is an impossibility . (3:18). So when they wrote the paper they translated it to English ..

The only thing I haven't forgotten about Iran is how to love, the way we do, it fulfills to the point of demolishing ?? your ?? because sometimes we don't understand how can a man love so much. …
Q: … (3:20). ?? what do you mean by you are a temporary passenger, they put you down and somebody else gets in, what do you mean by that, about the car and instructor?
K- It's understanding about the time and position that you do not possess anything. If you think you are always the owner of that car and the only one who drives it, then it brings arrogance. So you always have to know, the soul moves in combination of the fields gives opportunity to other lives .
Q: You means the body is ?? improving?
K- It depends how you take it, it's according to your understanding.
Q: The whole thing is simple at the moment .. it changes .. In Koran it says if you are not doing what you are supposed to do. (3:22). then we change you with another people who loves God more then you do
God will change you and bring another people in your place …
.. In Koran it says ..
(3:24).
Satan can deceive man until the Judgment Day .. only people he has no access to is sincere people …

K- Thank you very much. One of the questions asked in the background, it is really interesting. . .what it brings to understand is, would the mankind evolve to the ultimate position of understanding his soul, (3:26). or would the mankind become aligned with the physical soul, ?? knowing that every cell has a soul. And mankind soon will learn that it is within his knowledge of the soul and physicality to retract everything that he has created with him, if he decides to. What this means is that in fact, mankind will understand one point, and that is, physicality has a field dimension, and if the mankind is so attached to it, he can take it with him. .. as we said before when you ?? make the Gans's and put back in for the soul of the planet to elevate. You do the same. You can take with you the essence of your life if that is your ultimate goal. If that is what you want, if you are so attached to the physicality, (3:28). take it with you. If that gives you the freedom to your soul. Many times I watched people telling me, doctor has given me so many days and months to live, I want to live more, can you help me. In so many times I said, I don't want to stay here and suffer. Me, I want to go because I know what is on the other side of the wall. And what about what we know. I have changed many clothes over thousands of years, but the soul stays the same, the commitment is the same. And why doesn't man learn that? Why do humanity wants to stay more to suffer? Unless you understand the elevation, put it together, elevate it, and let's have a party somewhere else, without loosing it. In so many ways, when you get to that point you see there is no physicality, you become light. Some people on this planet have learned this, they left no sign. (3:30). But in so many ways, they took everything with them. If the man is so greedy to have everything made with him, then we give him all the power to take all the gold in the atoms, ?? in the strength so when everything else. ??? have the strength to take everything with him. But I wonder if that man will be able to take the love, the emotion with him too? Or the desire of physicality is more then the emotion of physicality.
Any other question?

(3:32). Q: Spanish .. (3:34). .. He wants to know what is the objective of the MaGrav and all the teachings of the years?
K- You understand him to your understanding in Spanish, and explain to us, you'll be our teacher. … (3:36) . J- I have explained that all these teachings are to get connection with our original soul, superior .
Q: He would like to know if ?? nine is the objective of the whole thing?
K- would you like to answer .
J- .. (3:38). The idea is that all of us are a part of this change, each one of us has to create a field .. to cover the whole of humanity .. we all have to be conscious that each one of us is a part of it, and we have to grow together. (3:40).
J- He wants to know how does the Silicone work and has does it relate to C14 .. all different energies of the original H .. (3:42).
K- Can we go to another question, thank you very much.
Q: from Brazil. about the Bible and fulfillment of the prophecies. when the Bible talks about return of the Messiah, is it about the Christ consciousness or about your call here on this earth. Can you give me a clue?

K- What was your question? \Q; You here on this earth doing your job. (3:44). to the mankind, as we can take it as the fulfillment of the prophecy sin the Bible, Christ will return. .. Creator return.?
K- What was the purpose of it. What is the purpose of the Creator returning to the earth every time it becomes your time of Day of Judgment? Or is the prophecy hidden, in a way, when you mature in soul. Is that the Day of Judgment, it means you have matured to the level of understanding of the prophet. A lot of people got matured in time by leaving the physicality, but in time if you mature to understand when you speak about the resurrection or return, now we showed you and have given you the knowledge. You can resurrect yourself, you can if you understand it, how to take over the soul, and it time need to return to physicality. We have shown Gans's and creation of matter. So if you have a desire for someone to be the return of Christ, so you say it is the time of maturity, okay yes I accept, but what happened now. Nothing happened to my soul, so he couldn't be. So the return and what you call maturity, comes to the STM, not the collective understanding of one. (3:46). Otherwise we have to bring billions of people, sitting, saying, oh it is time now, we sit and listen. How many want to go back to physicality, and how many want to stay in the soul. What your soul and physicality were aware of when you die by the old age and separation, now is given to your hand to decide. ?? everything correct to my soul, for my soul. YO cannot steal from your soul , and this is what everybody does, we sacrifice, especially in Christianity. The more you sacrifice, the more you suffer the closer you come to God. There is no word so much wrong then this ever brainwashed the man. When you steal form yourself, how can you have to give. I do everything for Him, he is whatever, the God, the Creator, and he dies, I don't want, I want to sacrifice. Especially what is traditional in Brazil, the more you sacrifice the more you see, the more you allow your soul to physically suffer, the lower you go. Who told you these things. How can you be richer when you steal from yourself. So is the time of the return of the Christ, the maturity of the STM? And does not need to be the ?? But if you want it, it satisfies you, and you think you can mature. Yes I am. (3:48). If that satisfies you, and you have a reason to mature, then my job is here to serve. I am. But what does it give you, with that word I tell you? As you don't see any change, because you haven't matured your soul to reality, it becomes resentment and lie. If you understand it, the true meaning of what is said, it's on you to educate yourself, to elevate your soul to the point of maturity. And that day will be the Day of Judgment , because you have judged yourself, and this beauty is that we have given this gift to everyone. So what do you think? Am I the return of Christ, do I fulfill all the prophecies of the past? Yes, I do, one by one. And if any are left up to now, bring it and show it. But does it make me the Christ? Or does it make me, for you to know, I know. But at the end, if you don't comprehend it, and you don't know how to reach your soul, (3:50). I cannot steal from the STP, because it is not mature enough to see its soul. Doesn't matter how much you want. It's doesn't matter how much you love a car, you don't enough money to pay for it, you still have some left to collect to come in to be able to buy. It's not by sacrifice, it's by understanding the knowledge and the truth. Otherwise you'll be going to everyone in the universe, have you seen God, how can I get to Him, can I pay you something, ?? ?? you give us your soul, we'll give it to you, and even if they show it to you, because you haven't learned it, it's no good. You bring all the Holy Books, I wrote them, and see if I haven't fulfilled every single one of them by now. I have. Does it make me God the

Creator, or does it make me the passenger of U who have time and wasted time to stay on this planet to see if he can change this race. But I still live in a body of physicality, I still eat, fall in love, cry, and be ashamed to be a man, because that is part of the process. Otherwise I'll manifest as a light, you want a color, you want this, you want that, you can have it. You wouldn't learn anything from it. (3:52). Mankind wouldn't learn anything from it.
Q:

Amazon chief dies of Covid-19. No world leader dies they pay ..
(3:54).
Any other question?

Q: When we learn to recognize our soul here in physicality and get used to living by it, will that experience of the soul be the same when we leave this physicality behind?
K- repeats. .. We have learned it, it's imprinted. And if you understand the emotion of a then you mature to be part of U Community, because then you live and speak by it. Many KS have a big dilemma, they believe, they have seen, they are searching for it, (3:56). and they say, when we believe it, accept it, now we have new kind of believers, nonbelievers, and then we have seen the power of Gans plasma saved us from Corona, but it doesn't take us to the Creator which is our soul, and beyond it. And we cannot do, we want to spend time in physicality, till we see the soul, till we understand the soul, until our soul tell us. How many times do you want to fail, and by failing stay more, and bring more suffering, and loose more. Or you understand you have to ?? leave the physical life as much as the emotional life and the soul life. So why do you make it difficult, you prefer the suffering, or at least make it easy for me. We cannot steal, and that emotion of stealing has ?? gimmick, and mankind has got used to stealing and find an excuse to steal from his soul, it doesn't matter what it is. Because the taste of physicality is more..

(3:58).

Our emotion is the finger print to our soul, this is why that fingerprint bring you punishment ..
(4:00). Never refuse a gift, because you are stealing from your soul, because there is a purpose in that gift otherwise it will not be given.

When you receive a gift with emotion, it has a soul ..

(4:02). there is a trick in that soap, a big trick, one say I explain.

Q: .. what is the meaning when we are all spraying the Gans water in the Cup of Life at the same time across the entire planet?
K- We extended this between what the Iranians started and the Brazilian, and around the world. Every Sunday at 12 o'clock CET, it doesn't matter what is yours around the world. (4:04). Is to allow the fields of this planet to come back into balance. Don't spray the Gans Water, just spray with the Gans that it lasts. And this will start a change we see the change, we know the change ,and as it becomes more and more, it will clean, it creates

that dome of peace. Now we put fertilizers and everything else on this planet, now we bring Gans's ..

Please send all the videos to the Brazilian.
Please don't use the faces of children .. there can be some abuse, there are sick people in this world like the king of Belgium, and we have to protect him from doing a sin, not for us. (4:06).
When you spray it you create that link. ..

Q: Thank you …
K- Thank you very much. Shall we call it a day, we passed your 4 hour limit. (4:08).
Stay on the line 1 second. We have a gift for you, as you saw last week, we shared a picture with you that. There is an old saying, which says, .. the eagle has landed .. we would like to share with you .. what you have been waiting for .if we come to agreement with the Iranian government. The Eagle has landed. The Enhancement Unit is going through it's final process. It look beautiful and in essence carries the KFSSI.. (4:10).
This is the beauty we have been waiting for, elevation f the STM … we bring all the knowledge of the man from the time of creation of man on this planet, gathering of all knowledge on this planet. this unit will be seen for 100s 1000s of years to come

It's a Phoenix of the knowledge for the man … (4:12).

Some of you will conceive in this system for the child of the future. ..

It's beautiful to see this and bring this into knowledge.

By the time this system is shown in Iran there will be no fear of Corona.
(4:14).

K- Yes this is the actual system not a drawing anymore … and you can walk in it in a very short time. .. (4:16).

K- Maybe this is a backdoor …

333 rd KSW ..
(4:18).

334th Knowledge Seekers Workshop; June 25, 2020

ENGLISH TRANSCRIPTION:

(:12). … as we develop new ways and things to do. One of the good news we have today is the final report for Corona to be released by the KF in conjunction with International Defense University of Iran, is completed. Accordingly as you all know we invested a huge amount of money and time into KF Global in US, stocks ??? , and by laws of stock market trading, on Monday or Tuesday we'll announce internationally backing, and backed fully by the Iran Defense university and the officials of Iran, confirming the ?? in Corona disease, this ?? out by Tuesday, and published in Iran .. accepted internationally. to curb Corona in the next 33 months …
(:14). success rate of 95% .. national clinical trial .

(:30).
for the first time we put the physicality and the STP, (:32). and the Soul of the Creator (STC) with it, the soul ?? arrive is part of the STC, and in that sense it needs to be to start the new cycle. .. dimension of physicality,?? it will be completed . Man will never take arms, or kill or take another life when he understands the creation.
Man will fall in love with the creation and the Creator.

(:34).

(:52).

(:56).
understand why we call it enlightenment …

(:58).

(1:14). As I said, enlightenment is through the STM not the physicality.

Any question?

Q; I wish K could talk to us detailed about detachment? (1:16). R- … You were talking about enlightenment and how does detachment work (into the screen ..) … ?
K- Do you know the story abut the Rabbi and his flock. The rabbi on Saturday said, give everything, be detached, you don't need anything, there are people who are hungry. .. the wife goes homes, .. I didn't tell you to give to them. it is for them to give to us to hold. ?? Detachment , that is the beauty of it. The Rabbi wanted everybody to give as long it is given to him … this is the problem with mankind … (1:18). This wives saw the truth and in dimension of physicality. she elevated to give more …

Detachment is not to give every thing away. It's to do the best .. to share the richness of it. The devotion and detachment comes by the understanding of the totality. not to be hypocrite.

(1:20).

Detachment
(1:42).
Any other question?

Q: If you are enlightened does the Gans light up?
K-

(1:48).

(1:52). Q: .. guy doesn't know what to say…
(1:58). K- Come back after some time. Do we have Rafael to translate to Portuguese. Hello darling how are you?
R- ?? not so bad, thanks for asking.
K- Rafael would you like to translate will you ask him his question? (2:00).
Q: He had an experience with the Cup.
K- Can you speak louder please.
Q: … When I woke up in the morning, I have a very intense dream, I had an interaction between the STP and the STM, (2:02). and I could remember … color of the Cup for the STP it changed the color to white. I was wondering if it was a illusion or it really changed?
K- A lot of KS will go through this phase gradually that they want to distinguish is it their soul or the STP what they see. … that's why we gave you the CM to practice and understand what you see and feel as emotion. You will start feeling and seeing and for you to start comprehending the difference. ..
(2:04).

(2:10).

(2:12).

(2:26).
Have to decontaminant the doctors because they carry the different mutations of it . spray outside, inside, doctors, and then the patients.

(2:30).

(2:40).
Q: Can you expand on it a little you said that many souls were going to be re-visiting this planet …? (2:42).

K- When you feel them, see them, then they explain themselves. ..

(2:44). .. Q; What is a guarantee of the purity of the founder doesn't change after the first generation … let me explain, every religion changed ..?
K- We are not a religion, we are not a movement. Science ?? Christian, Moslem, Jew, Buddhist, switched the light which Tesla created, they all got the same benefit. The same with a car…
(2:46). .. the knowledge of the MaGrav, helping with the viruses will stay, it's not for mankind only, many races in the U.
My science comes from the Soul of the Creator, and goes back to Him when the man reaches the maturity of the time and the space …

.. That comes up from upbringing in Paris revolutionaries ..
Q:
K-

(2:48). .. Q: How do guarantee they don't get into power , place of statue, keep that, lie and cheat, and forget the ethos of the first ones.
K- What do you mean?
Q: Every time they give a power to the man, .. then they become into lying and cheating with the power?
K- That is the bandwidth in so many ways, will be automatically as part of the structure of the elevation of the soul, will diminish. (2:50). Power, the essence of power is on the outer edges of the brain .. because that is what feeds the man, it is even lower then the …

(2:52).

(2:54).

(2:58).

Any other question?

Q: Create different nucleus with love, different interaction within the Cup ?? (3:00).
.. depending on the alkalinity or acidity ..??
K- I don't understand the question. .. you got to make it short and sweet .
Q: There are some brother in space, are there different categories among them, and religious orders … are there beings that help us ?
K- Why does mankind need help. (3:02). Mankind has the knowledge.
.. I don't understand this questions ..
go to another question.
Azar: Emotion is the communicator of the Soul … at the same time we are told we should control it …
Why the intensity of emotion can lead to enlightenment? (3:04). K- Repeat. .
Q:

K- Because you go to a different level of strength, Either one leads to a different strength of emotion ..
Q:
K- Anger is the physicality of the man … I never seen in the U. ..

(3:06). when you don't see, when it is not part of you, you react to it ..
when you know your weakness you are strong with it. ..

Q; What about the intensity of love, if it becomes really high ?
K-

(3:08). .. I have seen many these, mother's jealously of daughter for love of husband ..

Q; When someone falls in love is the STP ?? STM
K-
Q: Can both fall in love?
K- Yes
Q: How can you tell which one?
K- You will know in time … you see loving is giving, giving everything for not to possess ..

(3:10).

If you fall in love with the soul you never ask you just follow.

(3:12). K- This is part of the biggest problems .. I have seen many cases in the KF.

(3:14).

(3:16). .
the first thing they should teach in the school is teach emotion, love and understanding, of human behavior. (3:18).

(3:20).
No more questions. Shall we call it a day. .. if we learn by the STM, ..
what is learned by physicality stays behind .
Next week will be a celebration for offering an alternative, not the only alternative, for Corona to the world. We ask our team, Global to be prepared, ?? international support for the Iranian government. …

(3:22). Thank you very much indeed for today.

video
Creating a Peace Dome. (3:24).

335th Knowledge Seekers Workshop; July 2, 2020

ENGLISH TRANSCRIPTION:

(:03).

(:26).

Are there any question?

(:28).

Q: Guatua … thank you so very much for bringing peace to the world..
(:30). and staying true to your words.
Q:

(:48).
double blind testing ..
(:50).

(1:00).
Gates stand for genocide…

(1:02). Q: about suicide

(1:04).
K- We have to understand, e have to realize we are more powerful with this knowledge then before. What are we expecting form life, do we want to be a part…

(1:06).

(1:10). president of Ghana Youtube video on plan of elites ..

Q: Gans's …
K- I am not in your stomach I don't know what you mixed ..

(1:12).

(1:16).
Q:

(1:20). .. One of the reasons we could handle Corona so directly is because of the cases we have handled in the past.
(1:22).
photos of lady with Ca blocking the blood vessels …
(1:24). .. I was decalcifying here, while setting another system here, I was producing bone and flesh here. This was done in 2006.

(1:26). .. this hands belongs to the lady who we have grown a toe in, after amputation, Iranian citizen. So if you have the knowledge, while you are taking Ca off one place you put some other place where it's needed. These lady in 2006, 07 was faced with imminent amputation ..

(1:28). This process was done in 2006 -07, that's 12 years ago. It's permanent. She attended my father's funeral 2 years ago …

Her brother died of the same disease , calcification around the heart ..
There are about 30 people around the world that carry this disease .
conversion of the Phosphor to Ca. ..
when squeeze muscles Ca come out instead of blood. (1:30).

(1:32).
Mr. Keshe fell off a horse..

(1:34).
(1:40).

(1:42).

(1:44). Ella:
if not by someone, we'll do it ourselves .. it's up to us ..
(1:48).
don't be afraid … don't wait for others to do it, do it ourselves ..
(1:50).
K- .. I would like to ask Wang Lyn …

WL- She was being saving, by help from different volunteers .. (1:52). Tells about woman got plasma water help in Wuhan..
(1:58). K- Don't have a fear if our governments don't do anything. understand to love and give from your soul to .. presidents ..
When I read this article that this thing will create modification in the genes. Maybe we need this modification, maybe in the long run this will become a blessing for us .. see a modification we need .
(2:00). Post Corona for us in KF is space technology…

Photo of a dossier which has been submitted to your leaders …

the first page shocked the American officials when given ..
(2:02).
a gift from a nation to them .. The flag of Iran, it's not just a word, it's a gift by a nation. "Successful application of the newly discovered GANS plasma and GANS water technology for detection, cure, prevention, and environmental disinfection of the COVID family of viruses in trails in Iran in 2020 pandemic." How can you kill when you have been given a gift of life. you will see this on the first page. I am proud of the colors of my nation. We answer war with generosity. (2:04).
Any questions?

Q: Mark of Golden Age of Gans, .. about the Ca, back in the 60s a man named Louis Cuvr?? he proposed transmutation occurred …. (2:06).
.. (2:08). .. so Corona is teaching …

K- No, I know nothing about it, but many geniuses in the world.
Q: .. imagine how many other things will be discovered …

(**teachings here** >>>>)

K- As you say, the second virus that is coming. We have seen the one, two cases in Iran, from the time of notification to the ambulance to the hospital the patient has died… the second part of the implications of this T becomes essential., (2:10).
we don't have time to detect ..

Corona took intelligence from the memory bank of our cells, from ?? of ourselves. and mutated intelligence of ourselves, to it. (2:12).
some places they are feeling its strength when they walk …
did it lock into DNA to human DNA ..
every cell of man carries full genetic information .. .in calcified, it picked up in few seconds ..
.. now it doesn't mutated it becomes us .. mutated created its own fields it's own without dimensions ,, traveling as a soul .. (2:14).

this little chap has visited all our organs and taken a copy .. (2:18). would it somewhere down the line manifest itself as a human representation of energy?
Q: I remember you saying that even if someone has the panda virus and they recover it they could get it again and again …. mutation ?

K- Yes, I think we need to. but it is something we are going to live with ..

according to WHO statistics 95% success (2:20).

95% with a natural product, because the Gans are a natural product, they are a copy of our body, so they are one of us. (2:22).
Q:
K- How would you like to deal with these souls.
Q: brought to

K- We, I think people trying to create control, and structure of monarchy and the rest of it, they developed this virus, and to all the knowledge and assumption they had, they would control it, they will do it. and they will understand it, and they had a control in every shape and form. (2:24). the only thing they didn't computate was that a knowledge like this would appear, and this becoming a fear, becomes a bank of knowledge for us.

we are disposable packs of energy ..

(2:26).

(2:28).
Q: I don't know if it is propaganda form other networks, but the numbers are inflated coming out of Iran?
K- we have a problem, this is the second cycle, not the first. ?? coming out of the office of the president of Iran, has brought this about. And we will soon correct it, in the next few days. By next week this time, the key people who are blocking this T and other T, to save people, will be opened up to Iranian people .. the Ministry of Iran took the people to ransom .. stem cell… answer was zero, wouldn't even get 40% success…
(2:30).
they thought they would make millions out of it.

.. now we can disclose more to you because we have everything in hand. The mayors have themselves and families are using the Gans ..

(2:32).

K- They want to control through the vaccinations. They are carrying out the plan of the Illuminati's, it's not their agenda. So their pay masters. I have seen documents, warrants, for many of the WHO arrests. Most of the WHO top guys are under observation. They just waiting. You have to understand, when a chief of police, or judge wants to issue the warrants, Bill Gates is there. How many billions do you want, we have been through this.

(2:34).
Q: .. Dr. Faucci says there will be a second and third wave coming in December ?
K- We already have it in Iran. We have already faced the second phase, we already have the
we come up with a new mixture ..
(2:36).

.. Just be patient, maybe by Tuesday One Nation will release new information ..

K- How does it look from you . Golden Age of Gans , what feedback do you get?
..
Q: We are getting mixed response, some are for the so called, leading experts, and CDC, and WHO and to follow their vaccination ?? (2:38). .. when we listen it to being energy pack,
we have no authority, this document ..??
we are on a more faith understanding, love understanding, of the Golden Age of Gans, we are reassure everyone …

(2:40).
.. I spray the Dome of Peace. ..

(2:42).
.. makes a lot of people angry to think these experts are wrong, and we are right, ..
K- I think most of the problem we had, as part of, the biggest fear ..

(2:44). And all it is, it sprayed Gans on people in meeting .. they pretended not to feel pain,, later called to get the Gans ..

(2:46). . there was a report out, it says you need a certain level of virus before you show the signs of it, and every time you sneeze you release 200,000 Coronavirus in the environment, if you sneeze behind the mask, you still can infect me within 45 minutes of talk, if you are infected. .. if you are infected and you stand 2 meters from me, I get virus pieces every minute, and I need to be there within a few minutes to be saturation to catch. There is a saturation point, and it depends on the weakness of the body of the man.
we released the key to 4 nations ..
.. the implication for Trump is, I knew and I didn't implement it. (2:48).
the Italian people wanted the Key and went on Parliament and demanded the Key. All the European's received instruction form US, nobody accepts this Key. Italians broke rank and accepted it.
At 10 PM Monday night it is in the White House. .. there is no way that Trump can say I have not seen it ..

(2:50).
Q; If the world leaders are ready to do it ..
K- If we do it in Iran in the coming days ..
I have requested public acknowledgement and release for the Iranian nation … it will not be refused ..

(2:52). … when proven correct, it opens up the space ..
if we can exist in the space without food ..
Q:
K- we grow cows and slaughter them, growing agriculture is the same. We grow and cut them, dry them but do we need that anymore ..

culture of Gans that we do not need to kill.
in a very short time we don't even need Gans's ..
even a stone has a soul. Then even an atom has a soul ..
(2:54).

we don't allow a soul to be created, we have the fields, then we don't commit a crime, to take the soul of an atom, the soul of a stone. .. We can ask ..

Have we got the permission for the soul of the copper .

(2:56).

(2:58).
I made a mistake in my education, I realized it was all false. The nuclear industry is all made up. The only reason I am listened. ..
.. nuclear industry has no use anymore ..

(3:00). (my mother) last week, 2 weeks was her birthday. .. they send your degree in a tube .. it was my degree,
I took my degree, and stuck under the toilet role… that's all it is worth .. I can't do anything with it .
if you can't use your knowledge to serve pack it up and go somewhere else .. first serve yourself ..
(3:02).
Q: Peer review is in jeopardy ..
K- The peer review has fallen down, we come to realize that those who peer review have a big bank accounts ..

(3:04). The first peer review, "The Creation of Black Hole," the one Stephen Hawkins stole.
Von Braun was one of the biggest murders …

Stephen Hawkins followed KF step by step ..

(3:06).

(3:10).
If we look at Indian Airlines, it took less than 2 hours from the time he got it until he died.

(3:12). Q: A lot of questions can be raised about the use of the Gans ..?
K- … it has the natural property of the water ..

They did the analysis on Cup Number One. ..

(3:14).

(3:16). In the spaceship are we going to create a king …

the knowledge was already carried by them by the gene ..
we don't need to eat, automatically

(3:18). born through the energy system, we don't need to kill ..

we are weeks away from it, not months .

(3:20). side door opening, so the effects will be immediate ..

the new system we'll develop, will be side door, the fields stay constant .. (3:22). I made a deal with the Iranian regime, get the Corona through, and I'll show the Enhancement Unit in Iran .

Thank you very much for all your work Golden age has arrived.
Q; I am from Iran. can you explain about negative Inertia .. (3:24).
K- I never heard of negative mass .. negative Inertia ..

They call Anti-gravity ..

R- Perhaps you could define Inertia. ?
K- The Inertia is the MG field so the matter state. Gravity and M fields, is the interaction of the fields of the planetary system, from the center. When the Inertia and G fields interact, (3:26). lead to creation of matter state. We see the sun, what we see on the surface of the sun, is when the matter Inertia, MG field of the H can accumulate and interact with the M field of the center of the sun, and those 2 interact fields, it's the same as what we see as a light on Earth. That's why the stars shine, that's the only reason they shine. The MG from the center which is plasmatic, which is total mass, which the Inertia .. if you understand the copy of it, what we call the STP, Inertia is the STP of the planet. And MG field form the center of the planet is the soul of it, the interaction of the 2 create manifestation of the ?? visualization of the entity. As simple as that. When the fields are at the strength of manifestation at any dimension, we call it Inertia.
Q: ..
(3:28).
K- Two things do you see it in your eye, or does anybody else but you see it? Does anybody else in the room confirms what you have seen. This is one question. If you get 10 people and they all see the flashing light, that is a different thing, But if you see the flashing lights, that's a different thing. Because if we see, this is the property of some of the MaGrav Systems when they see interact with some of the Star Formation, we have seen this a long time ago. You see we don't teach everything, when you come to it, that's why I can answer you immediately, Because we have done a lot of knowledge I don't disclose, you are not ready for it. But there are 2 things, do you see this

(3:30).

(3:32).

(3:34). K- Or put the photon papers, capture with ..

A new machine to measure the fields of the Pl for the frit time..

(3:36).

(3:38). We have moved into a new state of science that motors won't work.
the motors are there as a backup .

each system has a soul of the creation …
total collective knowledge, 20 years of research sits in the Enhancement Unit, when you enter it will touch your soul , emotion .

(3:40). the people you hate, you'll become the loves ..
if I can unite a family, a nation, humanity, it's the way I set it up.
this unit carries the soul of being, it's alive, created with life ..

Any other question?

Q:

(3:42).
.. how fast you could make this available for other viruses?
K - it depends how you interact with other viruses .
It's not that every virus is bad, we need energy packs ..
(3:44). your lymph is an energy pack ..

.. it has to be
If one nation go .. I'll make sure that nation doesn't go anywhere. Don't forget I haven't shown all the cards in my pocket yet. You play games I'll lock you down ..
I'll make America a land lock nation that nobody can move in or out of it. .. just by your emotion .. (3:46).

(3:48).
One of the KS who received the suit, do we have the pictures.
Ella- We have some on the list ..
Shows photo of Gans suit ..

(3:50). This kind of clothing .. is for everyday use.. if you continuously use, you balance the fields ..
Why these have no one to take a proper picture of it ..

(3:52).
.. the world leaders have become district managers of their state ..

many will look into the KF for solutions ..

(3:54) . not if, once our negotiation .. we'll release publications ..

we'll hold on to it for a little longer if everlasting peace will prevail ..

(3:55). Bye for now.

END

336th Knowledge Seekers Workshop; July 9, 2020

ENGLISH TRANSCRIPTION:

(:03).

(:28).
.. Any questions?

.. We have seen in some parts of the world where fathers are killing their sons, (:32). and mothers their daughters, out of nowhere. And then we see the process of Corona. We have seen a number of these in the past few weeks. If it goes in that way we have to be open and understand it. We do not stop the teaching, we do not stop the teaching, but as usual we have to give the warning as we did in advance with the others. As we have seen. we have been correct. The WHO announced they see it as environmental. As we said weeks ago that it is in the environment. What we see is the development of new systems and how fast we can go through this development. .. .

(:34).

Q: Using Gans in (swimming) pool ..

(:54).

K- if you remember I tried this 2 - 3 years ago in Nigeria, (:56). building pools, and embedding different Gans's in the walls of the pools, in Nigeria. What will be interesting is how it will effect people with diseases .
Q: ..

K- Do you put any additives to keep this pool clean?
Q:

(:58).

K- . how behavior changes .. It's a large scale totality work. .. It will be interesting, (1:08). . if there are environmental people around, ask them if they see any difference, changes. Fishermen can better fish, or there is no fish.

Wan Lynn (WL); … I found one of the plants I put in there to grow better. very fast grow a lot of roots ..

(1:10).
(1:12).

K- .. these are plants that have not received any water for nearly 5 months. It's this plant, (shows picture), usually they die .. but they have not. This is Aloe Vera, hasn't been watered for 5 months, but it actually has grown more.
but the environment is full of Gans.
(1:14).

In so many ways we see plants survive. What is interesting, if you look at the front they have even given shoots … without any water. This is what we se, environmentally we can create a condition that plants survive..

(1:16).

Q: I didn't watch the temperature.
K- It's not the temperature, it's the feel in the environment.
Q: I am not objective, the whole property is Gans. Gans everywhere … can't tell the difference. (1:18).
K- When you come to the property from the outside?
Q: I just can't say. .. when I go in the pool I am completely balancing, restored ..
it's instant, right there.
K- Thank you very much .. we learn from the expansion of the knowledge.. we are always KS.
Are there any other questions.

Q: .. you always say when you setup .. (1:20). negative to the Nano coat. ??

K- We ask them to change it. .. The reason we put the negative on Nano is that we pull the energy from the environment to create the condition of circulation.
Q: Since I work with the Gans's .. the place I live I don't get much sun, can we create a sun environment.?
K- Sun what? (Sun environment). I was discussing this yesterday, maybe that is why you are here. There is a part of the T which I do not teach, because the knowledge is not there, and collectively. .. we have never had the reason to discuss it. (1:22). That is the creation of the plasmatic rays, and .. it's a ray of the sun, creating an interaction of the fields which is beneficial to the body , plants… this T at the moment is close to the man .. very direct way on the development of the STM, what does this mean, .. is that the way we use laser beams, we have a T which .. cannot be opened to mankind, primarily due to the behavior of the man. in that process we create fields , convert the fields to rays, and convert rays in conversions ? inertial state, rays or Gans, or matter state, on earth condition , not through the plasma, we find the process of the rays of the sun, (1:24). when they come to the inertia of the ?? earth and matter state, they convert to the energy to matter state. There is a process which we can do the fields of the plasma, this is one of the ways that you can literally target viruses, if you want to do it that way, we target .. that the Pl receives overwhelming energy that it has no other option then to divide its power. or in deep space you want to cut through fields. It's a knowledge we don't see nay reason to share with mankind at this moment in time. Until mankind moves from this behavior of killing, because this very powerful tool, extremely powerful. If you use the correct way, you can elevate the souls. If it used the wrong way, as it is plasmatic in strength, can open up the soul, which means you become fragments of fields. You create a condition that the fields of the Pl from this position, to this position, spacing of gap, different behavior, different structure. (1:26). You can create condition of the fields to behave like the rays , but at the spectrum, specifically at the planned need, or the persons needs. It's in construction and its behavior .. like fields, but in more homogeneous of the same, not the spectrum of the same. These rays are extensively used for certain purposes in the space. at this moment in time part of the knowledge hidden form mankind.
K- You can create fields of energies which the plant takes it as the sun rays, as the light.
Q: .. John showed us the plan .. without water … plant made a new leaf.
K- You can do it. you create an environment, (1:28). the plant tunes into it. There is a trick in these plants which I showed .. when the plants where watered, all of them sit in an extra pot. Most of them, .. because Gans water was put in the past and now dried out, they have some residuals of Gans, that ?? the plant continuously create that condition that the moisture continuously comes in to the plant. .. plants sit in a double cup, because now you have a double Gans system. create Gans water, this attracts the AA from the space, this is how these plants were fed .. the secret is in double layering, the soil is like dry rock. You cannot .. but as the Gans's have been put in over time, they have ?? sifted into layers of different strength , and as they create an environment, and in a way, around them, between the cups, (1:30). they absorb protein to the leaves. Those proteins according to what nature needs, uses. it's impossibility to break these soils in these plants. It's so hard, but it has survived. Orchids have gone through the full cycle of flowering, and a winter time ..
Q: If we use SF , 4 balls, can it effect that way.?

K- Yes, but I advise you, .. we went and took some pictures .. of the ?? tree in Austria. it's amazing what we see with these ?? trees . (1:32).
was that we planted SF, when we go .. at of 35 ?? trees, we observed only 3 ..

(1:34). planting the cores under the ground. .. embedding, and in standing 1 above .. we can attract all the protein we need to the trees. Which means in desert areas we don't need to cultivate water, we can just grow. By going underground through certain steps .. we create a dome .. we can just grow vegetation.. we bring the strength below level, not on the surface, this allows .. we can bring and introduce new condition environment. we can enhance in areas that allows this to take shape.. to create that dome. (1:36). in the process we can allow the rains to be there …
this gives us a facility to be able to observe changes, to be collective as a greenhouse effect. one of the reasons we see these green, the house is literally saturated with Gans's. In totality everything is inside it, it takes what it needs. No doors have been opened, ?? closed. temperature has been kept at about 3 to 5 degrees. .. they can survive like this for years… the other 2 are very much water dependent. but the beauty of it is the way they thrive. (1:38). We have those who are in single pots, they have not survived, next to each other. 5 cm away .. single pots have not survived. .. This brings a very beautiful idea, where we say, if you are traveling too much, don't keep plants because they die. Now with this, it becomes a myth. Because you can leave your plants they'll survive. ..
Q: Thank you sir, always an honor.
K- Thank you . we are waiting for the pictures to be put up … This is the picture of the ?? Kir tree you see. (1:40). .. These are the pots, and you can see how tall it's grown. .. this tree…
(1:42). .. of the 35 trees only 3 have picked up .. it means this environment is not for this plant. .. this one grows 10 to 12 meters in Middle east…

(1:44). Q: for some months we had Gans balls near the big Ki ?? trees
Are there any other questions?

Q: .. back to the creatures, you said the virus is now going to take a manifestation of physicality. K- possibly, yeah. Q: that physicality has a very aware intelligence. if that is so would that creature to go to the universe? Would it not just leave the planet, take another dimension?
K- Do you go somewhere is the land of plenty to starve? It, by error, by mistake, by delivery, by whatever, has found the best place to survive and nourish.
Q: If it is soul, (1:46). the ultimate goal of the soul is to go back to the Creator, so would, it's a creature of the Creator, so would it not be at some point go back?
K- It depends like us, we stayed here a long time and we go in ?? But the reality is this entity can survive, much longer than mankind, because he has an energy environment, he doesn't have a depletion of the physicality at the moment.
Q: So if that intelligence is going to be superior to mankind ..
K- Not necessarily. It has the power to convert. Is it more intelligence, we don't know until we see it. But physicality of this virus, because it's the first time we have seen, ?? plasmatic conversion is inevitable. Is inevitable.

Q: so that being wants to replicate, wants form, like all beings once they start interacting with their environment it wants to multiple itself? (1:48). ..
K- Yes, what we have seen, it can mutate, it can change and convert rapidly, it has taken over this planet from Africa to Siberia, to Brazil Amazons .. in less than 6 months. and it is completely .. they said when the summer comes it will go. .. it has gotten worse. So we have let it free, and if anybody tells there is a vaccination for it, and immunization for it. Show me. .. the virus has intelligence. and he is rapidly growing, how .. those who thought they brought it in, will have a field day, they can control it. But it has run out of control in every dimension. (1:50). This breed of Coronavirus has a long history in the universe, and we are aware of it. We know it. In time if mankind becomes good enough at it, you can reclaim the earth back. But .. it needs the whole of humanity to get together to be able to do it. .. we have requested to go to this planet, ?? to develop the space ?? soul, and what we call the opening of the spans of universe to mankind. We have made an official offer to the Iranian national defense university for full collaboration .. for the first phase of development of space reactors, for deep space travel. This offer was made yesterday to the Iranian officials, and with this we extend to all the nations. It's time has come to work in that direction .. to the Americans .. (1:52).
in due coarse when they agree ..
We have entered in what we said to expand the horizon enter space.. we'll bring scientists from all over the world… elevation of the soul, mankind will find his salvation from this situation. This needs a lot of understanding, end of misconducts by governments and
if you read the message that was put out today by Veterans.. read it, it is strategically worded..

(1:54). .. Israelis have claimed they have damaged 2 advanced reactor sites development, not anything else, in Iran in the past 2 weeks. We close our eyes to this behavior, as we are much more generous, forgiving in Iran ..
We have extended specifically this peace.. the same offer to Israel ..
.. this comes out of the greatness of Iran .. to open the spans of the U in collaboration
I will traveling back to Iran to head this development. in the next 2 weeks we start the development of this process
(1:56). ..
and a joint combination of travel and life in deep space, will be started in Iran. ..
.. we do not hit back, invite back their childish behavior.
in the deep space we don't need nuclear T. plasma T opens up
when the Enhancement Units are complete in the next few days, then we travel back to Iran..
(1:58). We head Iran in the deep space travel beyond the imagination of man, we invite all the nations.
As I said in the One planet .. on Tuesday, in the coming days we start the writing of the Book number 9, which is the soul, which will complete the STM, and will follow with the 9 books which come to understanding the soul of the universe, understand of the work of the soul in the universal dimension, and by Book 9 to lead mankind in understanding of his Creator. And this is one of the reasons I step down in ?? (2:00). ?/ KF. As for me opening of the space in both dimensions of the soul and the physicality. And then at the

same time when the STM enters the UC its like an infant, it needs to be taught. the teaching of the soul, as we call the books of the universe, will be totally in a ?? neutral way and shape. We write it with the pen of the soul. and we start that teaching. SO be ready, hopefully for the next few months to start learning more about life in the deep space, as we develop new T and tools for travel in the universities of Tehran, in that process we invite all of you scientists to join us. Not necessarily to Iran, but collectively to share knowledge without boundaries that we can move as one race, it doesn't matter where we are. .. the time has come for mankind to move, and as I promised , with 9 months left to achieve it, we start the whole process. Once the EU is complete and we sign it over, we go into a rapid development, to put all the scientists around the world in a beautiful city of Tehran. (2:02). And eventually we'll see what comes, man to travel in deep space, disarmament, total equality of all races, and as One Race. Mankind will have a new life to be busy with, then being busy with .. killing. We have no choice as we see the beautiful flag of Iran .. red . white peace growth greenery .. this is how the flag of Iran was set ..

(2:04). .. development of the new memory banks with response times millions of times faster then present computers, is essential part of development to new T.. w make sure this stays open to all nationalities. Many of you have been waiting for the conference in Tehran, soon this conference will take place. As we go through the final phases of Corona …
we will deliver T never seen by man, we'll deliver T that eradicates the need for food in the next few months with collaboration with Iran scientist and the rest.. Iran the center of new knowledge.
(2:06).
Any questions?

Q: What exactly is the soul, and what is an energy packet?
K- Soul is a collection of fields which has order, exist, has a management, as you call it. Energy packs are food that are available to be consumed if need be. Usually are collection of the spectrums of the same. (2:08). .. it's a full, full explanatory. How can you it explain it much simpler and easier.
R- In regards to the Coronavirus, it's an energy packet, so to some it would seem like, it would be taking away their energy, but to others it's a means of food. converted .it all depends how you look at it and process it.
K- It's .. do we have a need for it. Is there a need for ?? by our soul. If we are afraid to be eaten by the lions and the other animals, the beauty of it is, in the space nobody eats our soul and the freedom of passage. (2:10).
Q: What changes for mankind in such a short time, and what changes for visitors who stay here forever, now?
K- Not much changes, you got to adapt to a new T, the way we adapted to cars, computers in the past centuries. This is another step but a higher order of understanding.
Q: in light of all this, what are our options, list them. ?
K- we don't have options, we deal with this before. but we are aware of

(2:12). Q; .. I think what you just showed about the plants that don't need any water, is a good indicator with child born in EU …

(2:14).

K-
these machines become incubators .. when they come out have they learned enough to eat from the U , not food for the U ..
(2:16).

(2:22).

(2:48).

Any questions?
There is a beautiful picture that has a lot of meaning for me. .. it is promised. .. (2:50). we will bring it to that point. they say people of the same mind, which their ideas flow at the same time. .. in understanding the totality of the knowledge, the way we do, it brings me to a very interesting point. People of the similar mind, school of thoughts always get together …
(shows picture of Ayatollah K) and in Farsi says one thing .. "We'll make Iran the bedrock of knowledge."
(2:52). .. Now you have to join us if you are of the same ethos …
Any questions?

Q: What fields does Aloe Vera have to stop muscle spasms. ?
K- Go and ask him, you know the soul of plants .. The human body, plants, or animal kingdom all are made of the same fields in different composition. And when you find, (2:54). the one that matches. ?? operation of the other, you can use it to enhance what is the weakness, and that is all. Or in the process of transfer it changes to what the other needs. The ?? lived, Aloe Vera by it for centuries, from eating it, to wash with it, ..

(3:04).

(3:06). when you receive the vaccination, the Corona has changed , what is the vaccination. I just sold you a dead duck.
.. Gates has to be arrested as fast as possible, and .. the organization has to be brought to a halt, and all the finances they used in creating this, pedophiles and Microsoft to create this mayhem, and once we take the head of the snake in our hand, we can control the rest of the ?? ... now maybe for the first time you understand why they went for KF this way, to kill and try to discredit, because in the bigger plan they knew it was the only T that could stop their plans. And unfortunately it has backfired on the,

. we gave them 14 days which is what we said, the law of the universe. (3:08).

(3:10). .. now they are battling with the third cycle. The third cycle will come out with mental diseases, and that will be very hard to put back into position. ?? mental conditions will become part ?? ?? will spend time to look after.
Any other question?

Q: What condition do we need to create to transform this physical experience to a plasmatic one, (3:12). similar to the resurrection body of Christ, or Babaji, or ?? please teach us?
K- What do you want me to teach you? What is your expectation? … (3:14).
Q: Guatua … thank you ..
Q: Was P Trump's response in a letter, if so can we get a copy and use it in the press in the coming USA election?
K- No, he never puts things in ?? I don't think he is educated to write. We have been told to be prepared to move to Washington, ?? advisors, to be prepared for negotiations. We negotiate with opposition, as much as those who are in power. In the next few hours, or days, if Trump keeps to this stand, KF will negotiate with the opposition. ??Truly the time for him is over, because incompetence in protecting a nation. Asks for removal from office. Holding vital information that can save thousands of lives daily, by the president, makes his position, unattainable. (3:16). And now we have put it in public. Today it's 10 days since he received the document without a response, makes his position already unattainable. Self-centered interests overrides the national interests. If you are American, Canadian, or anywhere in the world, release the link to Veteran's Now ?? to show the incompetence of a president. Self-interests above national … the only thing Gates structure was not expecting was such a breakthrough in knowledge and technology. As you read we are inviting American doctors and scientists to come to Tehran. We have not said we done it, we invite world scientists to come to Tehran. If you have access to your presidents, PM, give them that and put them in touch with KF. If you call the ambassadors it will be denied, because .. from now on we take possession of delivery of the technology, and it's part of the work. (3:18). Call your ambassadors, .. president.
.. if you go through the Iranian ambassadors there will be no response. President Rohanni is in the pocket of the Americans, and he has already been looked after well by the Gates Foundation. If you are sick like president of Senegal, get in touch with KF we'll put him through …
We know there are people who tried to get in touch with the president of Brazil, he is confirmed to have. We need to think what is going to happen this year to the opening of the UN, nobody there to unite, they are all hiding in their offices. (3:20).
Any other question.

Q: How does parental separation effect the child's trust?
K- Is it done by your government compulsory? Or is due to your failure. Children should not be separated from their parents under no circumstances. What I think that we will see in the long run, we will see, (3:22). growth in misconduct. if the children are taken, and there is a certain concern in the background, many of these children will not be returned back to their parents, and many of them will be abused in that process. There is a huge concern on this international, that children should never be separation from their parents.
Q; Dan is clarifying, it's the divorce of the parents, they get separated?

K- It's the same, it's all the same. .. we have seen this in many, many occasions. We've seen it.. even in divorced cases children should stay with at least 1 parent, and they have to be monitored, all the time, it doesn't matter which parents hold. And should not be, .. psychologically it is ?? available , cannot repair these kind of damages, especially when it is done directly by the parents themselves. (3:24). Preconditioned separation by preplanned, by any parents, is a criminal act. It's not justifiable. You cannot justify such a thing. It should not happen but it happens, in so many ways, we see it, on a continuous basis, and unfortunately, every effort should be made for it not to happen, but some parents do it, on prearranged organized for their own benefit. … Separation by the parents by pre-clandestine, (3:26). plans for the benefit of one parent, we have seen a lot of it, we have seen a lot of it, and what I have seen, is the biggest crime a mother can do to this child, or the father. Secondly, when the other parties come into their lives ??
Any other question? Have you received the links Rick… (3:28).
Any other question.

Q: then the AA that form in the containers… of the Cup 1 can be eaten?
K- Why do you want to get fat. In a very ?? last week, one of the KS have done. Some of the KS do everything they use their own body as a guinea pig, but that is their prerogative.
R- .. dipping your finger in the AA, (3:30). and touching it to your tongue. I have actually tried that and it is quite amazing the response .. made me feel like I had a large protein meal … seemed to last for a day or two.. (too much potency there) .
K- There are a lot of things we don't teach.
R- ..
K- Maybe one day. when we mature, we don't teach a lot of things because the knowledge is so vast and once we get all the governments working together .then we can release massive amounts of knowledge… plus what the man adds to it. and it will be beautiful to see it, (3:32). how we'll add to it.
any thing else.
Q: Are the Americans using advanced T to spread the Corona?
K- I don't know, go and ask them.
the beauty with it at the moment, I think if we give this report to the American opposition, they will slaughter the White House. And how many of you want to get rid of the Trumpy, or you want to trump him out of the office. (3:34).
R- A comment came out from Elon Musk Space X , and Tesla. stock has skyrocketed. … ? more then Toyota… he says the long term goal of my stock is to help make life multi-planetary to ensure its continuance, and the massive capital needs are in 10 to 20 years, by then Tesla's goal of accelerating sustainable energy and autonomy will be mostly accomplished. … I wondered what you thought of all that? he is still sending rockets off.
K- That's all he has, I think we have shown him ?? what to do with it before. If he does it right we support him. I think in the coming weeks, (3:36). when we unravel the new generations of the power supplies .. of voltage which can be converted to what it needs to be. will bring electrical cars into fronts very rapidly. We will see the new evolution in technology.

R- That is the missing link Elon would need for outstanding success beyond the batteries that are in the cars now.
K- .. it should have been done a long time ago. And … what is, we have to work collectively as human race. in the end we need their cars, we need everything else. .. we will we have to be on 2 ends of ??? side.
Any other question.
(3:38). .. shows document from U Council to eradicate Covid-19 to Western Australia ... response from Minister of Health. .. (3:40).

K- I think we advised Doug to send a copy of what we sent to the American government to his government, and if they appoint minister of directly to the government. We will not give outside the government, we have a security reason why..
(3:42). if they assure that this paper doesn't go out, but stay within the government we'll immediately give it
we invite them to come to Iran, The Iranians will pay for your officials to come to Iran to test ..

(3:44). Organize your ministers, I am available 24 hours .. your team comes to Iran for 3 to 5 days to see… you have to come to the center of knowledge to see.
I advise Americans to get in touch with the opposition, they can send American doctors to Iran…
We pay for it, and help the nations ..
.. we would like to invite the Brazilian president to Iran and Senegal
(3:46).
Q: .. KF in Brazil is offering to clean a hospital, ?? is there any direction you would like to give to us KS?
K- In Brazil they have bought the basic system and arrived, we had an official meeting with the hospital a couple of days ago, now they have to go and get some clarification in the hospital, and the KS have with the collectively with Raphael are gathering Gans's in one station to give to the hospital, we have given, are taking to the hospital that in 14 days we'll clean out the hospital, and we'll start cleaning from outside, all viruses, and this is what we are waiting for them to clarify, in the next few days. and we start, It's in a major city in the country. And it's a charity organization, they do it freely, they have 90 patients in hospital, and 10 in intensive, and hundreds outside. and we have gone outside, now the equipment is in Brazil, arrived in Brasilia, or not in .. (3:48). I'll show you, we are not hiding anything, our openness is our strength. The shipment to Brazil was done a couple of weeks ago .. through customs .. (picture of what was shipped to Brazil) system and water system, you can buy it and donate to your government.
we have a good base support in Brazil, and the Brazilians have responded to this. Because this group has 8 hospitals, once we start with the first one, the other 7 will come into operation, as they told us from the beginning. .. it's beautiful to be there to see it..
(3:50). As I said to the officials of the hospitals, I stay with them the first 2 - 3 days, the way I stayed with Iran, until they get going and can train the other doctors. and then they can put the doctors to the other hospital. We can save thousands of lives in Brazil the way we done in Europe. and then they can structure it across Brazil,, so they all don't need to go to this hospital .. we need a big base first.

The biggest problem will come when the Europeans on the 15th try to open flights and if they don't hide an duck like Indian Airlines, to show how many people die on board the planes, then in Europe nobody will fly, and we are back into square 1. worse then square 1.
the problem with this is when you have no protection, you mutate it. (3:52).
any other question?

.. we cannot stop, we always have rest, somewhere in the body stops.
Thank you very much for today.
We hopefully manage to succeed, and with this and in that process we'll be able to enjoy the fruit of our work as the team of KF worldwide. I think it is a time for it, to start. for us to benefit as a human race what we have done in developing. (3:54).
when I see on CNN I believe it, and the other thing is, CNN is not the world.

It has been accepted by the head of security in US Embassy in Austria ..
I have done my part, now it is your part.
I hope when we meet next time there will be much better news then today.
(3:56). 336 KSW

337th Knowledge Seekers Workshop; July 16, 2020

ENGLISH TRANSCRIPTION:

(:06). K- … I hope we can learn more and in the process of learning more, we share more, and maybe become a point, a breakthrough for someone, somewhere. In one .. we have been there to teach and serve, I said, that is all we can do because those people who you thought were just nothing, they were there as KS now through their teaching, what you thought, they have saved many lives, through Corona. It's not that we put money to the KF or back the F with different things, all the teachings, all the little courses you do, or go around and teach people, that is serving. We all serve in different ways. And mankind in this moment in time needs more serving than actually he needs anything else. .. We see second round of Corona, (:08) hitting much harder, and the lives taken by this virus, is become more or less impossible to stop by the present world of medicine. We hear LA has come in second lockdown. ..

.. it's so frightening it puts shivers on my back, even the knowledge I have, how to control this, what we call, dragon. The new version .. what we call mutations of this virus is extremely drastic, it cannot be kept out, and cannot be hidden .. as KF has always warned in advance, we see the appropriate, until the government decides to release the totality of

the report. In this report I have stated categorically, that we have seen through Corona, father's killing their daughters, brothers, their sisters. People are committing crime in a state that the mind is not ready. (:10). These people have to be excused, as it is not murder, but the course of action of the illness, which no one has control. If we carry on ignoring this, many of us will be imprisoned for what things we never had a clue about, as Corona has created a condition of short-circuit in the emotion and physicality of the man. The international law, and the governmental law, and .. the direction of criminality has to be ready to put aside any crimes on the basis of Corona, as people have no control. We have seen this in Iran and China and what I call, the law enforcement has to stand firm in, "no crime is done." And if it can be proven that the crime is due to Corona, not by default, by fact, there should be no crime. It's not that you are a state of not knowing what to do, or you are doing, is in fact what it has shown, short-circuited in the brain. We are not giving carte blanche for people to do crime, but man has to be correct in conduct, and put everything correct in the beginning. We see other factors which is coming forth through Corona, we are holding back until we discuss this with international governments and away from criminal organizations like Gates. We have seen new elevations, what we call, (:12). deviation, but with a side-effect which is absolutely criminal. I ask for the arrest of Gates and his team, internationally. This request will be put along with nations which we collaborate with, because this is a genocide, what we see we cannot even talk about. People close to me, and the head of the KF are aware of it, but it is painful even to think of it. Some of the KF teams are working in the background to get results. It was expected, but if what we see in the masses, are appearing, mankind is heading for doomsday. The reality is, we are working on it, new procedures have been put in position, doctors are adopting it, and going ahead with applying it. And when we see the results we have to report back. I wish one thing, Gates would have never been born. That blood has to be stopped. Not by anything else, but by elevation of the soul. The pain it will bring will last mankind, if mankind lasts that long. Generations to come, if generations can be there to come. For this reason, as we were aware of things happening in the background, we override a new fundamental system, to override Corona, and match Corona, as we say, step by step. Today, (:14). I release a new structure for a third Cup. This is a Cup of Soul, and its effect needs to be there, to overcome, to be able to carry man through this time. To what effect you will be using it, is very much in the hand of how you see, as those who are effected. The Cup of Soul has a direction and dimension into operating in the STM through the STP, to the physical body of the man. We had to introduce this as we see no other way, we see no other what I call, option left to mankind, except moving to the level that the Corona works. And in that process handle it with care. ?? at the same time making sure man does not become insane. We elevate the STM to become the defender of his own physicality. And in so many ways, many sorrows will be created if we do not stop this. What is important to understand, is, it interfered in our structure at the energy level, and it locked itself to our physicality, we started with physicality, and we went for the structure of physicality. Now we handle it with its own soul, with its own energy, and this is the breakthrough through the science, never been taught, and in so many ways, we have to teach it. I have no option. (:16). As the Iranian community say, you have taken all the hopes from us, but in fact, we gave you the chance and hope to survive. In so many ways, we open the door to a new science, to something you knew, but you never thought. And it has to be done in that way, and it has

to be done in the dimension of the STM to understand the elevation of his soul, which can stand the elevation of the STP, and the physicality of man in all dimensions of the existence, from emotion to it's energy level. Many of you who have been around the F you are fully aware the way I work. Simplicity of teaching is the key to understanding, and simplicity of understanding is to, in fact, comprehend.

Cup of Soul Teaching:

The new Cup is from the comprehension of the structure of the man. (there is a small problem .. K has bad cold …) What I want you to do is listen very carefully, This is Cup #3, the Cup of Soul. What you need to do, very simple. Two Nano (N) coated … (:18). You have 3 N coated wires (left side is flat, middle is coiled, right side is coiled). All 3 of Zn, you connect all 3 together, with this you connect {to the second Cup} -- or the first Cup, in all 3 cases, … In the first Cup and second Cup you have N coated Cu (middle coil), then you have , and you have … the Zn, and you have your N coated, and Cu rod. You connect all 3 N lines together, and as before you connect the others which are not N coated together. The Gans's produced in this part (Cup 3) will be at the energy level of the Soul of the Man (STM). Now you connect with Cup 1, which carries the Soul of Physicality (STP) to the STM, and with Cup 2 you connect to the physicality of the man. Where I make it very clear that you all know what it is. Zn N (in Cup 3), Zn N, Zn N, this is Cu N (Cup 1), this is your Cu, and this is your Cu, and this is your Zn.

With this new Cup, the Cup of Soul, you match the energy levels of the Corona on the strength of the emotion of the man, (:22). that does not allow the conversion (?? of the Corona to Ca matter state). In this process, we create energy at the strength of the field of the physicality of the man. This ?? light ?? off and run the 3. ?? around the Cup of Man. ?? can't take Gans's from it, but produce the 3 Cups ??? (R- Mr. Keshe you are breaking up ..) whatever you make. R- . repeat that last sentence …
In this process you always use Zn from what I call, Cup 3, what we call Cup 3, (:24). whatever you collect from it. Do not look for matter state in Cup 3 as such. You are used to seeing physicality, but if you get physical Gans, it is no problem. If you get, what we call, "Energy Gans', you just take from the bottom. This area (bottom of Cup 3) you collect from. Do not forget, the process of connection is as before (?? with Cup 1 and 2), you never change the process, which means to make it very clear for you. This way, these 2 connect (Cup 3: flat N Zn on left :connects to: coiled N Zn on right) this one come here. And a third line (jumper wire) connects the 2 (together). But when you connect to the Cup #2, you connect as a totality, or to Cup 1.

So in that process, from now on, you always use Cup 3, at least 20% of your mixtures, 20 to 40%, and then the other 2. For this you rub on your head, on the body with your hand. You make a mixture in a bottle, (or) in a ball, then you take it in your hands and you wash your face, you wash your body, you wash your every organ. You have to understand, the STM exists in every cell of the man. (:26). In so many ways, you elevate the soul, that the soul looks after the physicality. And in that process, then you add Cup 1 and Cup 2, depending on where is, where you connect the soul to the physical dimension of that position. There is no other way to battle this things this way. You can put it in the

sprays and spray it around, you can put it in the balls and leave it around the house. But you have to be careful, you have to be careful, elevation of the soul, is cornerstones of the existence. And you have to understand what that means, 2 spiral and 1 flat, if you have a piece of Zn, cut in 3 strips, twist 2, and leave 1 flat, and spiral the 2. This is the new entry for you, there is a new way to learn, and with this process we have, as I said we have no choice. (:28). All have to be N coated, all have to be understood the way it's processed. Try to stay your salinity (NaCl), and round about 10 to 15%. Now we are not looking for the physical Gans, we are looking for the energy of the Gans. In some of the cases, you might see that one of the coils will vibrate, it oscillates, it's no problem. You might see new colors of Gans's as the soul manifests itself in the new dimension of physicality.

If you want to make the STP you follow the same. You take 3 N coated Cu (flat, coil, coil), with this the STP, you release a lot of pain, suffering, but it will be in a local, in that dimension. With the Cup of Soul, it's the STM which overloads the STP, and the physicality of the man. Don't forget Zn is around 65, (:30). and Cu around 60 - 62. In these ways we give the man a chance. A chance to be able to encapsulate Corona, by weakness in the strength, forces the energies of Corona to interact direct, and as you have seen, we will see the further development. In these Cups always, always look for energy, and the energy, the right energy, is sitting somewhere, just under the center, somewhere here (Cup of Soul, under middle N coil). This will bring you a lot of new understanding, you will feel the condition of the existence, and in so many ways, becomes a magic. You can use it on your animals, you can use it on your loved ones, you can use it on the trees and plants. Many of you will hear the noise, many of you will hear the soul. Many of you will understand the operation between the physicality and the soul. (:32). You will see rapid development, you will see eradication of many diseases, you will see painless life, and you'll feel the love of the Creator.

We have taken man today to new understanding of the new levels in the height of understanding the creation. We take man from the dimension of his physicality, to the dimension of his soul, its strength, its beauty and its effort. Last week I told you I would teach you something new, and the head of KF reminded me this time, don't forget you made a promise, you have to make it. I fulfill my promise. From now on man will look into new dimension in elevation in the STM directly by the man himself, if, if he is correct in conduct. And at the same time, (:34). through the understanding this new process, maybe, maybe mankind will elevate himself to new dimensions.

In so many ways, if you understand this, you come to a new point, and if you could translate this to a new understanding, this is Book #9. And if you understood the totality, ??? to the Book #1, in the universal order of the soul, the creation of the soul in the dimensions of the universe. Because when you die, in the physicality, in the dimension of soul, leaves the dimension of physicality, enters this point. Now we need to take you through this process to understand the Creator. In a way, we have given you a hand up to move from the dimension of the STM to the dimension of the Soul of the Universal Community. This is where the transition comes, this is where the beauty comes, this is where we fulfill our promise. The Day of Judgment, the ?? of the STM to the understanding of the operation of his own soul.

I am the Creator, in the dimension of the physicality of the man.

In that process for the first time we welcome you to the Universal Community. We close the door on the STM, (:36). and we open the door to the Soul of the UC where the physical existence is not an option. And through the same process we'll take you to understand the Soul of your Creator, how He was created, where He came from, and how he has become the creator of all. I promised when the glory of the technology appears, one shall not be there. And in that process mankind will understand in totality what it means to fulfill the promise of the past thousands of years. The Day of Judgment is not the day where you stand, the Day of Judgment is when can transmute and go through the transformation of the STM to the Soul of the UC, which creates the life of ?? set to the Creator. And this is a gift, it's such a beautiful day, with a new love, a new care, a new understanding of the creation. I always said, (:38). when I am fulfilled with the love of the creation, I create. In so many ways, understand this because in the coming time you will understand more about the process of the creation, and you need this as the basis of understanding of the totality.

As we always said, we come to taste the beauty of this planet, to feel the love in the dimension of physicality, that with it, we can elevate man to the dimension of the love of the Creator. And as we have fulfilled in all dimensions, it's time to elevate the man. In so many ways, in the coming days and weeks you will see the beginning of the new changes. As we have elevated, and as you start using these technology, in a true essence of its knowledge, and not the fear of the demise of the man. But as I always said, understand the process of the creation. Understand the love of the Creator, and you will find the path to Him. (:40). Try to understand the way mankind will proceed from now on, will be one way, and one way only, through the STM. And then if man would like to see life in the dimension of physicality, it's his choice, be it at birth, be it at given life, be it in transition from one dimension to another. The process of teaching in elevation of the STM, completes itself today. Now the process is not to elevate the soul to overcome the physicality for it to survive longer, as with the teaching of today there shall be no death. The dimension of physical death is in the hand of the man himself. This is the secret of life, everlasting life. Many of you make it by the desire to have that, and many of you will fail, that desire is not in truth to serve humanity, but for the ego of the man. The completion of the closure of the past, was completed this morning. The early hours of this morning. And with it came the release of the ?? this morning. We close the door to the past, and we open the door to the future, for the humanity to understand the elevation of his soul. (:42). Nothing in my cycle is coincidental. And nothing in this cycle will come by chance. When mankind finds the true love, mankind has elevated to the dimension of the Soul of the Creator. We came here to find, and we found, we came here to elevate and we have elevated. Now it's for you, in to decide in what dimension you want to exist. There should be no fear of Corona, if you have managed to crown your head with the STM, the true existence, the true essence of creation. When I am given love, I shower love back on humanity. And you are washed away today, if you understand. There is a point while you understand this, while you start seeing the results of this, while you start seeing changes that you could not imagine, then we start the process. You got to

understand, whatever is created, is below what we have created. We know how to handle it, (:44). from cronies, to Corona, does not make any difference.
Any questions?

Q: .. when you refer to 3/21/21 you talk as you are running against time. Is this a ?? and why?
K- 21 - 21 which is March 21, is the beginning of spring, the beginning of life. A new life will start on that day as we promised. A new life for mankind, a new life for understanding of totality, and In so many ways, in the next few months mankind will mature so fast that, we pass everything mankind has known for millions of years to gather to his knowledge. It will be the beginning of new understanding. As I said before, around that time I move from the KF, (:46). and go back into teaching and research direct, and development that releases pain and suffering on this planet, and ?? . As the new head of the KF she has been battling to get it right, now she has to battle it to have it right.

one is responsible for STM, and one for the STP ..

(:48).

you humans occupy the surface of this planet, this virus even touched those above, innocent, we could not stand it anymore. With this new this new process we encircle the whole planet, as life on this planet in every shape and form is dependent on the AA. In this process and the new teaching, (:50). that is to come will take you through the threshold in entering the UC as a soul of the planet. A soul of a child, that child is the human race. The next few months we rush you through as much as possible.
we'll see the end of kingship, the end of what we call enforcer societies, we'll see society transition, where what mayhem we saw in some nations will become part of the structure of the change, permanent change for humanity.
we put out the hand of peace to the American administration today. Defy us, we'll wipe you out through your soul. Not a bullet, we enter into your creation. By the request of the Iranian government, we put the hand of peace to all the nations as of today. (:52). The instructions are clear .. through the teachings of today we start the process of world peace we have the tools we showed the tools, and you will do it, not us.

In the corridors of powers there is a lot of discussion, what are we going to do, we lost everything. My advice to the Rothschild's family, in direct contact with the KF, .. for us to meet with the masters, the response is yes. We meet with you on one condition, total disarmament of Rothschild's operation. Everything has to be equal, and the highest priest of the Rothschild's family has one choice, abide and work through us, those who brought you will not be able to operate anymore. Your grand masters, have no grand?? In your direct contact with the KF, and your request to meet the KF management, (:54). will meet you in Austria or Germany. Go through our channels and we will meet with you, on our ground, our terms.
Any other question?

Q: ..)not clear) is this next Protocol with the Zn, is it for when somebody gets the Corona, or just do it for prevention. The 2nd question is we drink from the Cup 1, can we drink from the Zn Cup, and 3rd, when we make the physicality Cup with Cu do you connect it anywhere, or just connect it as one and connect it to a Cu. (:56).
K- You can drink from 3 Cups, and you'll find out, that you don't look for the dimension of physicality, Cup 1, 2 ,or 3 collected the same as in the processes of the past, and the present which it adds. You have to understand the 3, or Cup #3, you get 1 line connected to the others, from all 3 when you have connected, from the central common line. When you have the line from here and from here connected, then you have a line from here to here, and you put a ?? to connect, your line of connection comes from here to your other Cup.
Q: . with the Zn Cup we need …
K- It's not a Zn Cup, it's a Cup of Soul.
Q: When you want to drink from it, because there is no Gans, ..
K- You might produce some Gans. you are going to the dimension of physicality, just do as we said, make it first, do it first, and then talk.
Q: .. there are a few cases in New York that I have seen, (:58). there are children 12 - 14 years old … they have tested been tested, they have antibodies, but don't have any symptoms, … what is the future of these kids who go to this ?? and show antibodies, but no symptoms, does this mean they are immune to the Corona, and are safe in the future, or they are going to develop cancer… ?
K- What we see, Corona is dividing itself to different sections, 0 to pre-birth . ??
9 to 14 / 55 . teenagers to adults . adults to 55 years… they all can get common denominator one, but each one we see now, separate effected …

(1:00) .

(1:02).

Q: the teenager in this group are immune >> ?
K- They are not immune, you are using wrong terminology. They are going through a process of transition, growth, and active cells, and that active cells choose ?? energy of Corona.

… we see this group will never produce children .. we see in several countries ..
(1:04). we see men who never produce sperm.
R- (interrupts) a new report in Canada, , under 40 years ..
K- I am going to repeat so it is clearly understood. We see infertility with the sperms, with no life, which means those who are infected will never reproduce. This is a crime Gates has done. Now you understand. We request all the governments to do a sperm test and egg test on all those who have been infected, between 3 to 6 months after their infection. This is a birth control. We have seen it in 6 nations for the past 6 weeks. Lost of libido, and at the same time zero sperm count. We have never seen this. Those who are effected, first was reported in Iran, (1:06). first was reported in China, now we can report it ..

Birth control through the backdoor. I will take revenge on Gates and his ?? plans. It's the first time we disclose this, and it is becoming a pain in the whole structure of the work. We reported multiple menstruation, Now we see infertility. ..
I didn't want to disclose this but
this is the prime reason I released Cup #3 today. (1:08). Most of men, who are infected by Corona will never reproduce, the same with woman. We have given new procedures to be adopted by a number of countries and doctors, and the only solution we see is the use of Cup 3. The infertility is 100%, which means not even a single sperm ..
Cup of Man, and Cup of Soul,
try to make love as much as you can that it can be defeated. If you have a partner stay with him close, and take him through Cup #1 and #2, and then take him through Cup of Soul. The STM or STP, this will bring a lot of problems. for men or women who will think that their partners have lost interest in them, and it will bring new social structure problem. It's not that your partner is not interested in you, (1:10). it's not that your partner is having an affair, the truth is Corona has killed everything, emotion and physicality. The direction for man is non-

stand with you partners ..
first this and then the cancer
take baths ..
do not let your partners down because you have let yourself down. In these teachings we have to tell the truth ..

(1:12).

.. that the social structure does not get damaged. (1:14). This thing appeared about 8 - 9 months ago and then in Iran. ..
doctors started testing about 4 weeks ago. zero sperm count. .. calcification has solidified the sperms ..
We are here together to change it ..
(1:16).
Q: . the physical Cup and ???

K- You decide.
Any other question?

K- We to understand a lot more about this, we wanted to hold it back to the time when we are ready, but as I teach, we get reports coming. .. (1:18).
we need to understand the totality of the process, this is crucial and this will bring a massive social structure damage to humanity, if a large number of people get effected by this, the population will drop quite drastically. When you see 3 million men in US effected, there will be 3 million incompetent men. Those who cannot reproduce, are all men, and this is what was one of our main concern,
we run a test in Ghana in a very effective way, when we heard this developing .. our team in Ghana used the T to overcome this ..

for sure you will see this problem across the planet. The rise in this, especially in teenage gap

(1:20). this will become a social problem when your partner is not there, you look for satisfaction, you do a crime, you commit a sin, and that has to be stopped. Our responsibility is that man cannot do wrong by choice of his own. This will create a lot fo problems in the structure, especially in the young adults, who are hoping to become fathers and mothers and it is not there. Partners who suddenly have a husband but not a man. Men who have a wife, but just a cook in the kitchen and a cleaner. And if you are lucky you already have 1 child. This is going to become a huge problem more than the Corona for the human race. When we need to run into this trap, out of this trap, (1:22). and get it sorted as soon as possible.

Q: .. .. the zinc plates available to us, especially here in Kenya is from the ?? Zn battery, when we cut that in 3 pieces, (do) we have enough, is that long enough to make it into a spiral?
K- You can, we have to live with what you have. ..
Q: How do I make a spiral? (1:24).
K- Just twist it as much as you can. Q: many times, not just once?
K- Just twist it.
Q: Can we use rainwater?
K- You can use anything.
Q: Can you explain black Nitrogen into Phosphorus?
K- What ..
Q: If w use a battery for the 3rd Cup , the negative should be connected to the Nano wires, is this correct?
K- Yes, always do.
Q: with Cup 3 do we make plasma water and use that?
K- test it, you never tested it, see what you get first.
Q: Do we continue with the prevention protocol of Cup 1 and 2?
K- Yes you cannot stop.
Q: Any hints for the coating process for the Cup 3 Zn? (1:26). only chemical pure NaOH?
K- It doesn't matter how .. pure NaOH, yeah ..
Whatever you choose, whatever you are comfortable with, as long as you create a light coating.
R- Would a fire coating work on that?
K- It depends how good you are at it. What do you want to set on fire ..
R- … people can report their progress
Q: Can we use the Zn where it was coated, in the Cup 1 for example?
K- I don't know, did you Nano coat it, or was it just because it changed color, you thought it is coated?
Q: How far apart should the 3 Cups be?
K- It depends, how far apart is your head from your heart?
Q: With the Cups can you reverse the infertility?

K- The infertility at the moment is done through a different process. We ?? check. ?? have any of you who were hit by Corona have had that problem, and can be open enough to tell us. .. (1:28).
Q: .. I have the Man's Cup .. 3 months, I feel something has changed inside me. It's like the decisions are made by my part of the soul, kind of with the physical part ??
K- I don't know .
R- they felt something changed inside them how decisions are made by the soul ?
K- Yes we have had this report with many people. Partners see the change, understand and … people who observe you, they see the change. (1:30).
Q: recently scientists by simulation of solar system have determined that a 9th planet has to be outside the SS for it to be stable, do you agree with that discovery?
K- I put a pass on that.
Q: This last Cup must be separated some distance from the Cup of Man
K- We just answered that one.
Q: Do only humans reproduce this way, or do other beings in the U multiply by division?
K- Enter your soul in the dimension and you'll answer your question . (1:32).
Q: What do we do with Corona cancer patients with red spots or wounds, how can we help them?
K- The process is in the Protocol which has been released. You need to .. the Corona, … has created a calcification, usually in a twin set. When you put a Gans 1 and 2 mixture. because it has a soul and whatever, you bring the new fields in, but this has become solid .. that's why you see that wound, the redness you see, like putting a salt on a wound. It has created a Ca in between the layers of the skin, and this Ca is literally by moving damaging the cells around it, so what you see is the redness. (1:34). So your main problem is this Ca, which has become a grain of salt in between the 3 layers of the skin. Usually it is, to be correct, in the middle layer, so you see the redness on the top. What you need to do is to open this, this needs to be opened. To be taken out of the matter state. And for that reason you need to have Cup 1 plus Cup 2, if you want to add Cup of the Soul, Soul of Physicality, and Mg. You can add it, as … into a cream, and allow it to be over the wound. This will open up the Ca, back to energy, and you'll have a few days you see the redness, because the wound is already there, but you have taken the seed of the salt out of the layers of the skin. The best thing is to use a cream, natural cream to keep it there, normal cream. But the secret to it is the Mg. But you have lymph system, you need to use Cup 1, because skin is part of your emotion, part of the brain. You need to have Cup 2 because this effect of the muscles underneath (the skin), (1:36). have the direct effect on its creation, and at the same time you handle it through the soul with both the Cups. So you need to add the Mg to open it up, and the redness, it takes 2 or 3 days and it will go away, and you will not have the cancer cells afterwards.
This is how you handle it.
We don't recommend using oil on the skin because it traps it in ..
just on the redness part you open it up. You see the change within the first 24 hours .. we have many photos .. the faster you get rid of the red spots, the less possibility you'll have cancer in the future. ?/ end of the cycle (1:38). 28 days then you'll have a bigger problem in the second cycle ..

plays a video KF products .. (1:43: 40)

K- .. we have to understand that new changes will bring a lot of positive moves. (1:44). I am sure we will find solutions for these problems .. But we have to head for the space T as fast as possible. That by achieving space travel through the soul or by the dimension of physicality, man in time will find a new dimension that he can survive. Mankind has to find peace. close the door to animosities, otherwise he will doom himself to non-existence.

It's very hard for people to put their past aside and see the bright future.
.. I voice my opinion.. there is a huge problem with our operation in Iran, and the Iranian officials in the Ministry of Health. As we have received talks of, they want to take major shareholding in KF , in Iran to control, now the T has proven to be correct. Or we be threatened, or ransom has been requested. KF under no circumstances will relent to these kind of pressures. We stay loyal to the Iranian government and to the Iranian nation, and any pressure by any minister, be it Minister of the Health, people, their front lines, (1:46). or as their cronies, are ?? KF is an international organization, not an Iranian dominated position by those in the Ministry of Health who have kept the papers away from signing, until they get a share in the Foundation. This is the responsibility of the Iranian leadership to see through and correct very rapidly. People are dying in and around Iran and outside due to a ransom we have received, or an attempt to take ransom from us. KF has never paid, will never pay ransom. It is the responsibility of Ayatollah K to see it through, to clarify it. We only deal with the .. and the Defense University for the spread and development and acknowledgement of the T. We will release the name of those in the government who have pressurized or tried to pressurize, in partnership with KF of Iran, that they will sign the paper ..
.. and if this carries on we'll go open international with their name.

(1:48).

.. with the White House, Trump has directly refused to negotiate with MT Keshe. ?? my respond is very simple you will not be in that office much longer sir. I always ???
We back Pamela Harris as the Vice President of the US, to be the first black woman as president of US. (1:50). We hope the presidential candidates will choose her as we put a lot of trust in her. Any other offer as mixed female is welcome by the KF. We prepare the lady as VP to become the president to be Miss Harris, and if accepted by the nomination we back . We deal directly with government

(1:52).

(1:58).

Any other question? (2:00).

Q:

(2:06).

cut …
(2:08).

(2:10).

(2:14). Any other questions?
Q: what happens by connecting Zn Nano and Cu Nano in a single Cup?
K- Advised not to do. Not to do. .. This is the only way we can get you safe home.
R- safe home??
K- Our home and our target is reaching the soul of the Creator. There is one thing you'll understand as we go through, is that life becomes eternal. There is no more, "fountain of Youth." It's a fountain of life. Physical age can be changed in the snap of a finger, but what will be its purpose. If I would have walked the earth in the physical dimension, you would have seen, (2:16). shriveled skins ?? on the ground as the age is beyond the comprehension of the man. Mankind can change itself and physicality to a dimension of the physical appearance, so what you have been looking for, for eternal life, eternal youth, is in the hand of the man. But age brings maturity, not the look. Try to understand what is on the table, and try to understand how everything can be changed in a very simple way. Those of you who make these Cups and thinking you'll cheat time, you'll find you see nothing in the Cup. As you have cheated yourself out of it. Those of you who make these Cups to serve, you'll find out you achieve more than you bargained for. So just understand, just understand that is all.
Any other question?

Q: What do .. Bill and Melinda Gates have in the light of the Creator?
(2:18). K-
We don't have much to say to these people.
R- .. what do all kind of expressions that we humans consider evil .. what place does that have in the big picture… why do we need this. why does the creation need this?
K- What do you mean?
R- we have the light of the love of the Creator .. well in that sense there is no darkness… what's the point of having darkness, is it just to show the light? (2:20). to show the accent for it?
K- You know I was thinking about this last night. and the night before. Driving late in the forests and streets and , we don't see anything. we need the full beam to see the road. And animals just walk around and see everything. I switched the light off. I don't see much.. it brought me a beautifully understanding. who is really blind and who is in darkness …

Human race has misunderstood its own weakness, who is really living in the dark, is it our soul or physicality? Or have we chosen the STP to dictate to us what to do , to expect ..
(2:22).

Any other question

(2:24). Q: In 254 KSW you talked about ?? N coating, free plasma, skin of the sheep is outside the physicality, and then inside out is the STM, when the s encapsulates the physicality, it can travel the span of the universe. .. why this analogy, are you trying to say if I make my skin inside out, is the soul encapsulating physicality, is that ??
K- No. I don't explain anything if you haven't dealt with a sheepskin the way I have, I look at it a different way. When you look at it, the wool on the skin of the sheep, it looks like the rays of the Sun, each one radiates outward. That's what it meant. One of my businesses was wool of sheep, and when you look at it, it brings a lot of understanding of the reality. (2:26). .. when it's a skin it's all one, you don't see anything, when you turn it the other way, you see a lot of rays. And at the same time, do the fields come from inside out, and then become one. Because you can't say which end, which part of the position of the skin, that's what it meant. I know you have been asking this question, what is the sheep .. that's all it is, you look at each hair as one ray. then you understand.
Q: So when our soul encapsulates our physicality, it means, it goes, it has to open from some place. Where does it open?
K- From the soul. You have to understand a simple thing, there is no difference between the STM and STP of the man, and the physicality. It is only strength dependent, it's the same ray. That's your problem. It's like having a car with a full tank at the beginning of leaving a city, and you drive to another town, and you check the oil it's half full and check the other one, and it's totally full, sorry empty. At that end, at the time of the transition when you started with a full tank, until you stop with an empty tank, that's the point where you actually manifest yourself in the physical dimension. The rest of it is just a ray going through. (2:28). And if you can understand this, then you can understand more about the creation. It hasn't changed the car, it's just the energy in the tank has changed. You have less fuel.
Q: .. ?? third eye. ..
K- I don't know these things, I don't know the Third Eye. that's your.
Q: So press on your forehead and press on the back of the neck.
K- That's your dimension, not mine. How you create it.
Q: So what are the signs that you know you are on that direction?
K- You will know it will come to you. You will see it, this is a question a lot of KS ask. How do I know, I haven't seen it, I cannot believe, it's not mine. Where is my soul, until I don't see something I don't believe in it. So that is your problem, That shows 2 things, 1 is the lack of understanding of totality, secondly, trusting one self's existence. And then if you do the 2 you walk. And this is exactly .. where the clergy has used the man to their benefit. As I said, what is the difference between the office worker and the clergy? One works in the office, and the other one works on the brain. (2:30). In a way, your brain, your emotion is their office.
Any other question?

Q: Could I go back to your drawing, you showed the Zn and Cu Cup, you said something Zn 65% and Cu 60.
K- No, it's the atomic mass, or weight or what we call plasma field strength of it. We use scientific terms because we say Cu is 60, to 63, Zn is 63 to 67 or 68. And then for energy mass, for the lighter ones you take up to 50%, for heavier ones up to 20%.

Q: .. if I can't produce any Gans ? ..
K- Can we see what you get and talk next week about it. You will understand. (2:32). You got to realize, don't look into the Cup, look what the Cup can do, and secondly the interaction of the fields of the Cup which counts with its atmospheric condition, We have chosen 3 parallel plates but different positioning. And that positioning will create a lot of new positioning, especially how big a distance between the plates or each element. how ?? is the liquid. There is a reason I taught this, and in the future as you test and you come you come up with the answers, or what you see, then we teach you.
This is the first time we are sending you away to create fields, but you have to understand what those fields are, humble enough you receive, arrogant enough you give.
Any other question.

Q: Will the Cup 3 help those who are suffering from .. behavioral issues as you described as the third phase?
K- you let me know. (2:34).
R- I thought that was part of why you were releasing Cup 3?
K- Yes, but we'll see. You see, you lot want everything chewed swallowed and just get the energy. Now chew a little and swallow and see what you get from it.
Q: Do we also collect AA if produced by Cup of Soul (CL)?
K- If you like, why not.
Q: Should we use Epsom salt to get more Mg.
K- All that depends on you.
Q: Does Cup 3 create reversal of Corona.
K- You'll see. Why do you look for reversal, why don't you look for inclusion. You know you are all like a frightened chickens, you are looking for how to survive. I have given you the secret of life. When you have the secret of life, wherever you are, you know how to. When you don't every virus is deadly and dangerous. (2:36).
Any other question. I think today's teaching, for those who understood, will bring you a massive change. And those of you who are still in entanglement of life, you will see not much with it.
Q: Will the reproduction of animals be effected the way you spoke of before, and plants?
K- yes, yes, 100%.
Q: So we can expect to see that in the coming weeks and months?
K- Yes, shortage of harvest, if it goes that way, and increase and decrease in certain ?? It's inevitable, there are certain things which come with this, we cannot change it. Are we ?? done, we are nearly 2. 5hours.
R- you need to get some rest. (2:38).
K- No we are okay, it's just I think people are snookered with a lot of things and we have to concentrate on what is ahead of us, and what is to come. The EU will be shown on the 2nd of August, in one form or another. if we can do it, it is our target. As the Corona doesn't allow a lot of people to travel around the world our target is to show the EU if our team is ready to show it. .. we will hope to have the Iranian ambassador present in this presentation … and hopefully we'll invite the American ambassador to be present. We try to use the presentation of the 2 units, (2:40). will bring with it, the position for governments to understand the change. and give us a chance to bring nations together, our debate is how fast we can … at the same time transfer knowledge to other nations ..

We see big problems with nations getting hit back again with a second round. Will create another massive unemployment.
if the old knowledge could have handled Corona, we should not be in this position as we are. As we introduce new T, we should be able to guide and to bring the process into close.
the medical mafia in Iran has blocked it.
(2:42). this is the whole process to change the greed of the man ..
I never ask for what I cannot have, because I access the whole thing .

why am I using the Cups. what am I prepared to give to elevate more. What we will as changed will be very radical ..
guide it that we don't make the mistake of the past.
Man has to have to right to new T, (2:44). without working for it, without sacrificing his youth and life for it. This will take a lot time to understand, this will create a lot of mayhem. But we see 50 to 60 million Americans are home with no jobs. The nation still runs, except one guy, Blondie in the office, he doesn't know where to go, like a headless chicken. The rest of the people are sitting at home. Why don't we see riots and breaking into shops, nowhere in the world except in the US. Because the true animals have not tamed yet. And in that essence what does this T can bring, bring forward? No need for light, heating, no need for anything , because you can literally supply the whole thing out of a bucket.
The whole process . now with the introduction of these new Cups. if you all understand this and if you all follow it, the way it has to work, none of you need to be feed. I tell you 99% of you will not see it. None of you will ever age. (2:46). But you have to know how to trigger it, and that is the problem. Try to understand what the Cup does, then what is in the Cup. .. Those who say, why doesn't the Cup do this or that .. please walk away from the KF, please switch the teaching off and never come back. But if you go there to see what it gives you in the essence of creation, you got ?? soul, stay around, because it means you are ready to elevate. there to understand, it's not pen and pencil anymore.

Another question or shall we call it a day.

K- Hi Jalal have you managed to help the people?
Q: This is why I ask (2:48). at least give the person who wants to get help
K- you shocked someone.
Q: You know in Sweden everything is private, you cannot enter their private life. I called the woman in the morning, she said she had no idea what I am talking about.
..
K- Does she have Corona or not?
Q: .. ??? (2:50). she has little signs of it, it's not critical..

K- What is the position of Corona in Sweden?
Q: .. they do not care about Corona, they do not act as there is a Corona. only the government gives them the choice to act as they like. only 1.5 meter distance. ..
from numbers… there are a lot of old people who have died .in that 6 months, there are really a lot of them. They kept them in that house and didn't have any care to clean

everything. .. every one who is ill will stay there, he will not go to the hospital, (2:52).
he will stay there (in nursing home), because they know he will die.
K- In the old people's home you mean?
Q; yes..
K- We had a report up to 700 people a day. This is a huge. .. the way the government is seeing …
Q: People who come from other countries .. will suffer a lot from that.
Q: Azar .. I am sorry for what happened.
K- This request came form Iranian support team
Q:
(2:54).
K- For those of you who are setting up these channels of assistance, you go astray .. waste time… but as the request comes we respond ..
the total number of groups have exceeded 100,000 .. and we don't make a difference between them. ..
we have 66 volunteers across Iran .
(2:56).
.. We do not look at borders .. at the moment 5,000 people are getting help ..

If in other countries you do this, make sure you do it properly, we don't just put it under the carpet , takes a lot of energy. .. (2:58).

If we could set up in other countries like in Iran, in Brazil ….
if we get this through in Iran .. change of ministers in health, and president …

If we (3:00).
We need to get . we see in Brazil started with small interviews .
Americans are scared of going out, because of KF, and people have listened to the thieves of Baghdad in Belgium, the king and his cronies ...

Just don't waste time for team in Iran ..

Any other questions? (3:02).
K- Did you manage to get through to the people at the radio station.
there is a big problem in CA with internet. it was difficult to get in touch with Armand .

Q; .. I have been having trouble trying … (3:04). to convince other people. Is there a way you can .. how did you convince people about plasma. ??
K- You see, let me explain something to you very easy. Till 2012, we had an interview with a station this week and we start opening people's eyes to it. Until 2012 KF was well covered by .. media, magazines, articles were appearing about the KF on a regular basis. We were gathering momentum is a very good way. From summer of 2012 when the king of Belgium wanted the T, we wouldn't give it to him, everything was taken off, even Wikipedia of the KF, has been deleted. What their idea was, we've been told, we'll wipe you off the Internet, you will not exist. That's the dream of a criminal king of Belgium,. .

(3:10).

(3:12).

(3:14). Q: .. many people loosing jobs all around the world, sitting down with many skills. I would … that the KF has already offered jobs if the government accepts. ..
K- No, no, no, no, … very wrong. . what you got to do, what you got to say, the new technology will bring new jobs, because the

nations will go for new ways. (3:16). The problem is a lot of people have lost their jobs, shopkeepers …. we have no option, because the old has failed.
We are there to deliver more and more technologies.
Any other question?

Q: .. if we can bring the same situation in US and Europe. there is a huge difference between the mentality of

K- It's back you have no backing. .. the situation in Iran when it is repeated has to be backed by the governments. When the situation in Iran is repeated it has to be backed by the governments, with the support of the KF.
who you talk to doesn't count, we don't call and talk about who you know, invited … The whole thing is that we look at the breakthrough through the governments that it becomes a national job. We are with governments they are ready to go, they are just waiting for this report, to be established and published that they can have. In that process we need to establish a link between the governments, individuals don't count. KS that understand the T are there to go on the national TV and radio, and whatever and teach, and don't become, what I call the minute that got exposure they think they are god. That's all that needs to be done. (3:20). For 3 weeks I have been battling with a bunch of thugs in Iran's Health Ministry. And it has to be sorted. We hope that Ayatollah has managed to curb these, what I call terrorists, Mafias in the Ministry of Health. .. individual responsible for these, because it's their own hospitals which are using it. Deny access to proven technology by the Iranian government is a criminal offense. The thing is, if it was not working why do they want 50% of the shares, because they know it is working. They have offered $10.5 million bribe to our people. You don't offer a bribe if you don't have it in your hand. We'll see how it will go, then it will become a national teaching …

If I could release communications you would see how correct I am. I would like to send a message to someone very direct … (3:22). They see the new technology as a danger into their life, the message comes from ??dear Rothschild's, my Foundation does not need to meet your Grand Master. In your message, I have your phone number brother, so you could easily communicate with the Grand Master. KF speaks to the Rothschild's family and Grand Master on one basis, this is the third time you tried to establish link with us it, in a simple way, it's there, Rothschild. We accept talking with you on the grounds that the present position you have taken worldwide has to cease. And we meet on the ground that works for the benefit of humanity, not on thugery and stealing from humanity. and if you

are a spokesman for your family, or empire of your family, and you live in California, contact me direct, we can always talk face to face with your masters. And let's see how we can sort out this mess you and your family has created. Thank you very much. And let's see if we can talk on a direct basis with your Grand Master, (3:24). and see how things will go. Unless a fake name and telephone number, and everything else has been used, which is very unusual for people to play these games.

I would like to read you the text sent to us. It's very interesting I think. This is ?? from Phil. While many of our operations require anonymity to protect members, it is best that we provide understanding between us and the people we are charged with protecting. And they are recruiting members. And it is interesting, as I said to you, that we are creating problems for those who think they can protect humanity. And in his communication ?? our team asked him, what level are you in this organization. His answer is, an active member of the first order of the organization. We are an elite and selected organization of people, (3:26). from all walks of life, including politicians, artists, singers, etc. Our organization unites background people to live a prosperous life by bringing people together, and working for, what they call, the path of right mortality, the desire or ?? deser. And this time, as the contact is so direct by the Rothschild's family, we answer you direct. The only person who decides the communication with the KF is speaking, then the KF management team will talk to you. You can reach me directly, instead of going through the back doors and Mr. Rothschild's might speak to us, we talk because we can curb everything your descendants have built on, in a stroke of a pen. And if you ask your, what you call, your Grand Masters, they know how grand I am in serving it out.

Thank you very much for today, and we have all the children, and all the world leaders in one ?? to celebrate the freedom of man from the possession of physicality.
Thank you very much Rick. (3:28).

This has been the 337 KSW 7/16/2020

K- Stanley and Rick can we have a quick Zoom chat after this please.

338th Knowledge Seekers Workshop; July 23, 2020

Caroline no longer with the KF, satanic cult attack on KF

ENGLISH TRANSCRIPTION:

Caroline and Satanic Cult "Seven Sisters":

(:06). .. KF is a place of knowledge, education, and many other things. Over the past more or less 7 years, has brought us from every corner of this T, space, medical, energy, development, and launch of new products. As you remember some 3 - 4 years ago plus, through the people who were abusing KF, "sisters," we battled with Sterling, to stop pedophiles using and accessing members of the KF. The reason I bring this one up is that we have been hit by another system again. This has been brought in deliberately to damage especially the ladies of the KF, that they destroy the KF structure from the family side. Some of you might have received, (and allow it to be shared please), .. something like this, … (:08). some of you must have, or your wives have received such a text email.
It says, " .. the times are difficult right now .. I am doing a sister check-in. Showing support for one another .. I need SEVEN women to post, not share, this message to show you are always there if someone needs to talk. I'm pretty sure I know who will. Say done on my post! Love all of my Sisters."

This "sisters" is a group of satanic and they have used and brought a lot of damage to KF. And now they are moving into the KF supporters and they are families. They bring women into prostitution and the rest of it. Satanic rituals, lights and stones and the rest of it. Be careful and be aware! Make sure if you receive such a thing, you delete it, because it most probably comes with a Trojan, that it will sit on your communications to find out your weaknesses, and your family, and then they ruin your family. They are, they cal themselves sisters, there is no sisterhood, these are a bunch of American, Philippinos, who use this T to siphon your bank accounts, your life. And they are using connections of the KF, because they have infiltrated right at the top of the KF. And this "sister" business we heard at the end of the Dubai conference. And we were watching it, it disappeared somewhere, and as you know Carolina De Roosa has left the KF totally, and been divorced for misconduct. (:10). And to this effect we are warning all of you. and if it comes under any name, any cover, delete it, make sure it is not there. It's this group, which they call themselves sisters and it says, "just post," which means they intrude into your computer system. You receive it worldwide, inform, if you have sent it to somebody else, you thought it was coming from somebody right at the top of KF. This is a setup for your divorce, bank account, and ?? and the rest of it. This is a highly organized satanic organization. Do not worry if your wives end up with everything, could not imagine your wives could do. There is no sisterhood. Sisterhood of damage and destruction. They are using KF, highest level people that they think it is coming through. We advise you strongly to keep away from this "Seven Sisters." Seven sister, is what we know as a pyramid, built up, they take all the KF with them. They are structured that way. And those who bring more people elevate right to the top, and as you know who is doing it, under the name of the KF, has reached the top of the pinnacle and they went to damage

last week, effectively, the KF we stopped the procedure, we blocked as much as we could. We informed the KF different programs to watch, and if it comes from Carolina, make sure this is a death sentence for your life, marriage, and everything else which goes with it. These are worse than Sterling, you have nothing left, children on the street, marriages broken. (:12). There is no sisterhood. They are only after one thing, your lives to be destroyed and call themselves sisters.

It's the responsibility of me, as the founder of the KF, and I have informed the head of the KF, about this. We have gone out as much as we could to protect the KF KS worldwide, of this atrocity. You get it, delete it, block it, make sure there is nothing left on your computer, and anybody you brought a sister, you brought a sister of misery into their lives. I lived with it for 4 years. It came to an end with the divorce of Carolina, she accepted outright, without discussion last Monday. This group destroys your life. Misconduct in every shape or form. It is my responsibility as I teach you about the good things, as we saw with the Sterling, teach you about the bad things too. I heard this sister business, when I could not attend the Dubai conference, and she landed in my car, and calling people sisters. They talk about the stones, gems, and everything else. But unfortunately, maybe fortunately for the KF, we have managed to uproot it from the KF. Caroline De Roosa is not my wife anymore, and has been divorced due to gross misconduct, and is to do with this organization, and other things is set around this in a pattern of life. We knew the way they set it up they were going to merge, this is the emergence of worse than another Sterling structure. It is important for all of us to understand this, because to protect the KF and humanity is my duty. (:14). It's why they came in, and infiltrated right at the top. We watched them disappear, while actually they learned to hide in different names and everything else. This is one of the reasons why Jackie as head of the education KF immediately after Rome conference was dismissed, due to the same process, the same organization, the same things. Protect you families, wives, daughter, and anybody who calls themselves sisters. Sisters do not wreck lives. On the other this is my job, I have fulfilled my job to inform you, it's your job to go across Internet and fulfill this. Do not pass on to 7, this is the worse pyramid ever made, into your bank account, into your lives, and they put your wife on the street for anything they want. Talk about love, stones, and light. Be very careful, extremely careful. Seven Sisters of misery.

Release of Report:

On the other hand KF due to its progressive developments, and as we said we will publish the report on KF today. It will not be released on KF website as most of the operators of the FB, Youtube, and the others, anything to do with Corona, will delete, or do this, or something else to it. The report which is in the form of Plasma Times Special Edition, will be released sometime today on a specific link, which the webmaster will let you have. You can read it. It is still getting added on. (:16). It's a live report, we add to as it is increased, even since it is been released, 2 or 3 more new conditions has been seen.

New Mutations of Corona:

One of the worse ones we see, especially with women, is what we call, bladder infection and bleeding. We reported this, it is written in the report, but we have seen drastic cases of it in the past 24 - 48 hours. Be aware of it, you feel, even with men, you want to go to toilet, you have a burning feeling, and you see blood. This is important for all of you to protect yourself. We have seen the womb infection increasing rapidly. We have seen men especially complaining of the hip muscle tissues, and not being able to walk. These all need the Gans protocol which is coming into operation and released today. We see massive increase in the brain stroke, that what we call Corona in the brain, can lead to other problems, as we say, cancer. We still keeping an eye. We have 3 cases around the world we are watching. One of the most important points we have seen and will be added to the KF protocols in the coming days, as we can add to, is men infertility, they have no libido, the have no interest for sex, same with the women, then it starts creating a lot of problem. We have found a solution for it, the initial test tells us we could be 100% correct. We have had a recovery within 12 hours, and both the husband and wife are very happy with what they received back. We are waiting for the test results on 100%, (:18). 100% death rate of the sperm count in men. Tests are in progress, we report accordingly through the KF for this reason. Those of you who have been hit by this Corona, lack of interest in the partners, go to the KF website in the next 48 hours, now we have the results, we can publish it, on how to overcome it, and get your family back together again. It is part of our work, this is part of what the KF stands for. As you know KF is developing rapidly into the international structure of the Corona. What we are interested in, is to know if the people who have lost 100% of the sperm, is it due to injection, or is it due to Corona. We are asking a number of our teams around the world to do random sperm tests, and those who have been hit in certain states, that populations have been injected. To see if injection is the cause of 100% death (of sperms) or is it the Corona. With this we'll release more information as it comes.

Ayatollah of Iran Supports Release of Technology:

On the same basis, as you know we have received solid support from his Eminence Ayatollah K of Iran, in developing this T for humanity. In a protocol which is to be released by the KF internationally. ..

(:22). I have offered to return to Iran for the development of the space program ..

(:24).

SOUL TEACHING :

What we try to do is to extend the understanding of the knowledge, extend the understanding of the systems, understand the extent of the damages that can be done by this system. We have 2 choices, as I said before, we go through the system of flight or we go through the system of what we call, the soul. As those of you who were present in the past couple of days teaching, the Book of Soul, has started to be written. The first chapters sections of it have been written on a joint soul basis, and this will bring new dimensions to humanity, staring from how to teach your children about the soul. In a way

to let them to understand, and start the ethos of the work -- a life on the correct manner, where man shall not commit any crime. This part of the book has been written by the soul which has been with us for a long time, and has accepted ?? and place. And there is not anyone better than a woman who received a gift to write it. The process has started the first chapters are written, and in that process while we bring the new ethos. We write the new book, we teach the now way that the man does not to rely on education of what we call, math and physics, but never understand his own structure of life. On the completion of this book we bring about a new teaching, a new dimension, a new way that whatever knowledge is in the Universe, as much as it can be understood by the soul, and the dimension of the soul, can be shared. Knowledge to be transferred in essence to the STM, that in that process anyone can understand, any language, any ?/ to the correct conduct of the STM, at the point of receiving it.

In this process we will write the Protocol, (:28). the way man has to develop his children, from the time of birth, and even within the womb of the mother. Man to nourish to reach the ultimate goal of reaching the soul of the Creator. My work has a very clear understanding, in English we call it a soul, in English we call it a sun, the STM is the Sun of the man, it's where the life starts. Where the man shines, becomes one. I am sorry, I have a very bad cold for 2 - 3 weeks, and we try not to intrude with it, to find out exactly how it comes and what it is.

You got understand, if you are going to create a new race, we have to write a new book, a new way, a new understanding, a new comprehension of creation. And it needs a woman to be able to, through her own instinct, through her own understanding to write this part. The part of educating a soul, is the responsibility of man, and the point of inception, not 9 months or 10 years later. The understanding of the totality of the knowledge of the soul is key for man, (:30). to break into space. It's the key for man to be able to travel the span of the Universe, zero time, zero space. The understanding of the STM has to be the totality of the creation and the Creator. And as I said, the Sun and the Soul is the same. And if we put limitation on the ?? lives of a star, of a Sun, then we can put limitation on the life of the STM, which is a Sun itself. The difference between the Sun is the interaction with its environment, in the galaxy it creates moons and planets. The Sun of the man, the Soul of the man, in interaction with the environment of its fields, it creates the physicality of the man. There is no difference. If mankind understands this, mankind has evolved to the next step to understand the totality of the creation and the Creator.

In a way, if we can add to the fields of the Sun, in a different way the Sun will shine much brighter. So shall be when we add energy and fields to the STM, that it shines more and it breaks the barrier, (:32). to elevate the physicality. We show you both ways, with the creation of the dimension of the new soul, and the birth of the new child in the dimension of the new understanding, man and the Universe will learn to be able to live in both dimensions, as some races of the Creator have achieved, very elite. Most of the time they spend their time in a physical condition or in the dimension of the soul. Now we get opportunity to understand, to be able to live in both dimensions.

In so many ways, the new structure of the culture will change a lot of things, in the past we believed in unity of one God, one Creator, and to be alone. How come the man could love and have a partner, but the love of the Creator could not be shared. This will bring a change, the total understanding of the teaching. In time we'll go into more depth in understanding and the progress development of the soul, and understanding of the evolution in what was brought to man as a knowledge ??

In so many ways, mankind and the whole of humanity, and whole of the Universe and Unicose, moves to one level. As we try to create One Nation on this planet, we create One Race across the Unicose. Which means does not matter where you've been in the Universe, you are understood. There is no misunderstanding, and this was needed to stop any wars and conflicts, in the coming time, in the process of the creation of the new dimension. Mankind needs to evolve very rapidly, (:34). and we hope this evolving will be reached in a very short time. One of the keys for holding this back was the situation which I explained to you from the beginning, in this teaching. The most important key which was stopping the releasing of knowledge, for the protection of the man, has left the Foundation, and now the F is free to grow with love, with care, with kindness, and with sharing knowledge. Not using the knowledge to damage and harm, under the cover of a sisterhood. In so many ways, we unite, not only mankind, we unite the Soul of the Planet, and in the teaching of today you'll understand this very, very clearly. And then we unite the Unicose. This was the purpose and the Creator ?? could not find any place more beautiful than planet Earth, to take home, to share, to lead to creation of new life, in the new cycle in the race of the Unicose.

In so many ways, we have to understand, in any case we need to understand, in any case we have no choice but to progress. We need to be at the realm of understanding and not power. We share with the truth, and the dimensions of sharing the totality of the knowledge. Those of you who are interested in physical travel because then there is a purpose for you to exist, we have as we told you, given you the space program. Where you can get on something and occupy your soul for a time being, (:36). Have a chat, have a view, on the rest of it, live in the dimension of the STM. For those who are physical, as the old song says, "let's get physical" we go back into understanding the totality of the combined system of flight and life. Not life in the dimension of the man, but life in the dimension of the Universe and Unicose.

In this process we extend the knowledge, we bring the knowledge to its ultimate goal. And In so many ways, we extend our love and kindness, and In so many ways, we extend our knowledge to humanity. The space program which is part of the Iranian national program now, as we have offered, with the close collaboration with Iran National Defense University, will bring into operation the totality of the physical flight. We gifted and developed this T in a way in 2008 in Iran, and now the totality will be gifted to the nation of man on this planet, as One Nation, One Planet, from the area of Iran, what we know the old Persia. We move from nationalism to singlism to totality of human race, and as the ?? grounds has always been the ?? of the promise. As all the religions of the world started with Mithraism and Zoroasterism, we end the same place. (:38). I have

requested from the Iranian government to make all facilities for me to return and I have even requested where I want to live. We'll make human race to shine.

Most of you who were with me during the development phase of the gas reactors, which we did initially in the Insano, we will develop this T to its ultimate goal, and then we'll understand why we achieved 129 Tesla. Then we understand how we achieved that, and we use that for what we call, space travel. Many of the KS who were originally with the gas plasma T, you will return, and the scientists from the Iranian universities and the rest of the world are invited. In this process with the permission of the Iranian leadership, we invite from NASA, Russian and Chinese Space agency, and ?? what we ?? and what we announce CIRBU will establish in Iran within the next few weeks. Which is the combination of the Iran, India, China, US, Brazil space program. CIRBU will be launched in a massive way with the support and the knowledge of the Tehran and as One Nation OPOR, the development of the Star Formation for sustaining life will be extended, and in today's teaching, (:40). we'll extend on the understanding of the last week as we open the structure of what we call, Cup of Soul. Many of you know about the CS and the Iranian scientists of the Iranian team were very fast to develop it. And what did we see?

In a CS as we showed you last week, you all brought in a new dimension , a new understanding, a CM was taught much before that. And in that process what we saw in the CM was the delivery and the development of what we call, a structure, and understanding of the totality and the science. What we need to do is to go more in depth about the Cup of Life (CL) and the Cup of Man (CM), and in understanding more in how we can utilize the original Cup, which was made and gifted to the Chinese nation as One Cup, One Life. (:42). In this process of teaching, many of you have made Cup of Life 1 and 2, which is the backbone of saving tens of thousands of lives in Iran, and now it has proven by one of the leading universities and medical hospitals in Iran to be correct.

This process was and is and will be officially released for use across Iran, and then be taken across the world, national governments. This process will not be easy, but delivering the Cup of Life was one of the cornerstones of stopping Corona, as we see in Iran. Now the same thing is happening across the planet, different nations are using it. The Chinese government has extensively, is using it, for what they call, the control of the Corona. We have offered the same to European and American government, and they are waiting for confirmation of the Iranian universities and hospitals for implication. Four million people in America are contaminated with Corona this week, and as we have announced many, many times that if it gets (figures) released by governments, are not real, much more. And we saw the Iranian president Ayatollah Rohanni of Iran in past days announced, Iran has in excess of 25 million, (:44). contaminated people with Corona, and will build up to 35 million in coming weeks. The reason for this announcement is very simple, at the cellular level, contamination is that, that's what we said, in Wuhan City, what is happening in China and in Iran. But what they are trying to control is the statistic on the number of tests done. Over a million Iranians have used the KF One Cup One Life and they never went to the hospital to become part of the statistic. For this reason we see, as we discussed with our team in Iran, the position of A Rohanni

is very clear. Opening a new door, and with it the announcement of the discovery of the KF T, not only to return back, the nation back to itself, but be prepared for the extension of the new evolution. What this means, Iran is fully contaminated, half of the population carries Corona. Most probably the same as we announced with the Chinese, and the same as we have seen with other countries. A lot of Corona cases is covered under the heart attack, internal bleeding, and everything else. Because this way they can stop the ??

The teaching of today is divided, in 2 parts, around about 11:45 we'll stop teaching and a discussion starts among the KS. Around about 11 , 11:05, (:46). we come back in and we start the teaching about the whole structure of the Cup of Soul (CS). Why we taught you, and how, what we teach, what we explain in the first part becomes crucial for us in the second part. What we see is the next step in the damage limitation of the Corona. We have seen the shortage of electronics and hardware across western world, due to lack of shipment and production in China. As I said, the lack of products, is as many people have died in China. We know why, it doesn't matter what governments try to cover, we are at the edge of it. Many of you ordered the pads, .. have been waiting for the pads to arrive. We were supposed to receive the pads you ordered about the 7th of February. .. we received the last bunch last Friday, 6 months late. The company which produces for us, with number of 100 plus workers, had only 10 turn up for work. And in every means and shapes they are trying to cover their orders. We see the same things across other section in KF China. Therefore, China has been (hit) much harder then in public, as we said. We see the lack of products. As the head of KF said, it's not just that, shops are not importing, because there are no customers. And at the same time, (:48). there are no much money.

(:50). I am pushing through rapidly. We have lost Spring and Summer seasons, most of the nations no one was there to plow the land or field. We see this as part of those who were sitting there October, November the shortages coming in, governments trying to stay in power .. we control nations through food.
IMF has been replaced, World Bank has been replaced by ?? and health protection. I see the same hand over of power when we corner you. ..

(:52).
Silently the British monarchy handed over to Vatican.
Nations to be handed over
When I walked through the shops, there will be a shortage of food.

.. For this reason I brought in CS. (:54). … we bring to the teaching One Drop, One Life. which means mankind will be gradually moved out of the shackles of food, and energy control. We are leading the T into feeding nations. One Drop, One Life, which means you have enough …

(:56) . For the first time we set out the structure of the Soul of the Planet.
which means you will use the energies available to feed the soul, or if need be through physicality. The new knowledge which will be released today will cover the totality of the structure. .. where mankind will start living independent of planet earth. independent of what they were planning to bring into operation.

that what is planned to enslave human race will

(:58).

(1:04).
.. For the first time you see an empty Cup. (1:06). Do you believe there is something in the Cup ..

You have to know the totality of the knowledge of the Cups. (1:08).

How, when they want to control, you feed yourself through the dimension of soul to the physicality. The process has to be understood fully, not half. Do not start deviation, like you did with the other Cups, cause mayhem. This we ask you to stick to strictly close.

Don't add to what you don't understand.

(1:10).

The knowledge of what you transfer by your emotion through the Cups .. We saw Alex do this some years ago.

(1:12).
Those of you who make the correct ..
where you can understand the totality without going anywhere ..
CS and Cup of Universe can allow you to learn languages in a rapid way. You carry emotion, and every emotion has a strength .. the way we set
Many of you walked away from Corona, and many of you will walk away from what is planned, and this is the only way that we can change. This is the only way mankind can put in hand the totality of the knowledge for himself, the planets, animal kingdom, the life we have shown above us on this planet. (1:14).
discussion lead by Rick.
please follow very closely what is going to taught, don't deviate ..

Are there any questions?

R- .. could you please talk about the creation of the soul? (1:16).
K- Creation of the soul is discussed and getting written in the book ..
this is the part which is getting written from the soul which is accepted as a woman, and in a very fine, step by step .. as I said before …

(1:18).
you have been making Gans for over 10 years, how come the first time it's empty ..

we have to bring the teachings ahead by 2 years, because I saw the criminality written all over when I walked into the shops. and I went from one shop to another. (1:20). It's a big plan. If you listen to the President of Ghana's speech ..

(1:22). I am co-writing part of it, but most of my job has been taught in the past 2 years, and bless his soul, Sandor has collected most of it. .. the other part will be added . .

Q: Where can we get the physical book?
K- most probably have to be produced outside ..

(1:24).

Any other question?

John: AZ, give us another week to show what we have in AZ

K- KF AZ will be a blueprint for all the KF centers around the world .
(1:26).
J- The Gans of I know it contains a lot of isotopes, is that too strong for the human body?
K-

(1:28).

K- Stay there John, don't go away. you have done a lot of work over the years explain to us …
J-

(1:30).

(1:32).
K- How did you set up the reactors.
J-

(1:34).

(1:36). K- You did some tests a couple of years ago, where in discussion where you understood the soul. because you came very near to it, because you saw the I as the energy of the soul.
J-
(1:38).

K- I think when it came to . the second part I have to move to another location ..
(1:40). real structure of the CM, CL, CS, CE and CU. and with we cut out a lot of problems for humanity to control .

we gave it to the governments for the past 14 days and they haven't done much.

you have to protect yourself and families .

(1:42).
Give me 15 minutes, we have to relocate .
(1:43). Videos (1:51).
Cycle of Creation video … (2:09).

K- .. as part of the teaching we started last week…. (2:10). We go to a very in-depth understanding of the Cups. I draw it in a way that has to be done. . try to explain a lot of things. What will be interesting is how you follow. We started with Cup of Live, ..
Then Cup #2, Cu, N coated and non-N coated .
Then we taught you Cup of Soul. (2:12). with Zn .. Then we showed you the Cup of (Cu, N, Cu, flat)
What we always said, is we connect the 2 outside, and the inside ..
(2:14).

(2:16).
The 5th Cup, the MG field of this planet is based on Fe. So we need Fe.

(2:18).
These have to be stacked up exactly as it is .
(5th Cup) Cu, Fe (middle), and you have the Zn,
Notice how the plates are positioned like the backbone, spine ..

(2:20). you will not produce the same Gans .. colors will changed ..
according to the love of man for the love of his Creator ..
Gravity > Inertia > Physicality > Soul of Physicality > Soul of the Man. A replication of the totality of the life of the man.

(2:22).

(2:26).

Use this knowledge to overcome disease,

(2:28).

(2:30).
Maybe we have entered to new dimension of knowledge for the mankind ..

Man has to do 2 things, transfer knowledge unconditional, without hesitation

(2:32).

(2:34).

K- .. Let's look at what was taught last week. We came to the Cup of the Soul.. .

(2:36).

(2:38).

(2::46).
In the future man will computerize this things

J- going back to Cup 5, it was N coated Zn, N Cu, and another N Cu or chicken wire N coated.
K- No, no, no,… Cu, Zn , and Fe, Fe sits in the center because on the MG field, (2:50). of this planet, Fe is the M field ?? nominator. But the beauty of it, if you haven't understood, in the last Cup, is … if you notice in the last Cup, here, you have a combination of the matter of matter state, and the combination of the liquid state, and the .. gaseous state, all 3 together, it's the closest replication to the structure of the Soul of the Planet.
Q; Would N coated chicken wire work?
K- No, you already have a Zn, chicken , Cu on the other side. You already have a Zn plate in there.
Q: When you talk about the drops, are you putting a drop of the material on your tongue?
K- Yes, you can do, but prefer you to do the Gans of it, the Water of it. But you have to understand what you are mixing, it's not you are going to get the food, it will touch your emotion. It will effect your emotion in respect to many things, in a positive way. Some of you will get high on it, because it is so much. You will be enlightened to the new dimension of the knowledge and technologies which is within the ?? bandwidth of the man's soul of understanding. And it walks you, in talking the truth. And in a way, putting yourself in a lot of problem. But this time good problems, solving a lot of things. (2:52). Man with this will enlighten to a new knowledge and T, for those who understand the totality. As I said, now you understand, what I said, in the other part, where many of you will claim you are everything, which you are not, and just because you received a little knowledge.
J- But last week you talked about using 20 to 40% CS in a mixture, are you now mixing these together?
K- Of course, why do you think I am teaching you this way John.
J- Do you have any idea what the mixture should be if the first one is 20 ..
K- Would you like me to come and ?? feed you ??
J- ??
K- The beauty of the man is his curiosity and adventure to understand new developing.

Any other question?
In the coming teachings I'll teach you have to use the soul to create flight. I'll teach you how to use the soul to create combination of freedom of the STM from dimension of physicality, and return back to physicality. This is part of the teaching which will come with the new life. To be able to be in both dimensions, but to be aware of both, not

hidden from the other, (2:54). as you go to sleep and travel with the soul, and when you are in physicality you don't see the soul, and in the soul you don't see the physicality. The new process is to bring everything into order. This is not just for the humanity, we are teaching the Unicose. The soul of the knowledge is shared, not the word of.

Q: .. it was before the break, john asked you about using the iodine in the matter state, you said, you are using in the emotion level, and you can go to the soul level. And what you explained just now in the second picture, in the CS how to interact in the soul level because you are working with the fields. My question at that time was, which one you ..
K- we are giving you a drum call.
Q: … which interaction gave you 62 and which interaction gave you 68, and I think you just ?? clear just now in the teaching.
K- This is a combination, that's what I said, if the KS understand the T, numbers and things don't ?? count, it's the essence you have to understand. (2:56).
Q: I think this teaching is a gift.
K- For those who understand, yes.
The process as you see in both pictures, comes in the new book in details. In a way, if you understand what we did in this part, should answer you what we developed and explained in book #8, where did the M fields come from?
Q; .. is Mr. Keshe there?
K- Yes, I am always there, call my name, think of my soul , I will be there.
Q: When we use the waters, (2:58). it should be cleaned form the salt, all the time?
K- There is very big question, How are you going to clean the Cup #1?

In the coming teachings, we'll teach you, now that we have to stage a new ?? play a little bit, is to show you how to transfer your soul. It's needed, because those of you who take to the depth of the Universe, needs assurance that the soul arrives at the point of destination, so you'll be able to make a copy of your soul, that when you arrives, you can understand both dimensions. That will be the breakthrough. That will be where for example, you sit in London and the uncle have a party in New York, you can be there at the same time to enjoy both. Replication of the STM will be the cornerstones of the travel of the future. You know when you go for ultrasound for the child testing in the womb of the mother, we put the ultrasound on with some gel and we see the heartbeat, and the leg and arm of the baby. Now within the structure of the understanding, you should be able to see your soul. See how little it is, or how big it is, it doesn't matter what it sits on, under pressure fields of ?? its Universe, or what we call ??? (3:00).
Any other question.

Azar: .. I am a little bit confused .. if you look at the second and third Cup you only connected the N coated one to the main connection, not the other one.
K- No, because the dimension of physicality, they are matter state.
A: So it doesn't have to be connected.. on Cup #5 we have Zn, Fe, Cu, and all of them are N coated, or just the Cu?
K- N coated.
Q: And Fe is the pure Fe ???
K- It doesn't matter your soul will decide.

A: because I have pure Fe, and galvanized Fe.
K- Never use galvanized .. (3:02).

(3:12).
you're a physical being what are you going to do with the time ..
a prerequisite to accept the World Peace Treaty through the STM not the pen of physicality. If you still have that intention and thing, then you'll have a big, big, .. problem, you'll not achieve it.

We in the next few minutes will release the front page of the report. (3:14). on Corona trials in Iran. The full text will be on websites ..
this paper as of now becomes the property of the national, international KF.
shows the page of KF Plasma Times, report … (3:16). (3:17: 44) What we will see is thanks to many works of KF KS across Iran, leading scientists in Iran … we have thanked all those who we know … (3:18). This is a report by a nation, not an organization …
as we move from nationalism to One Nation.
in a very short time you'll receive another report . space development .

(3:20). we have a strange situation with several governments, they will loose their position ..

This is a call for peace from the Ayatollah K of Iran to the American nation . I have been asked by the Iranian nation, (3:22). and the Iranian leadership to release this in public. This is a message from the Iranian government, not A Rohanni, but the Iranian leadership under the banner of the Ayatollah K. I asked it to be specifically signed …

calling for peace, and releasing this T to every person in the world. ..

(3:24). Text of document on the screen .Rick reads
(3:28).
K- This is a delivery of the message from the Iranian leadership to the world leaders. In the coming days, the application of the KF T will become the cornerstones of the Iranian ?? apparatus. But we will see through this T and disease, virus, mankind will find a peace dividend, mankind will find solace. and maybe we create new conditions, not to live to work, but to work to live. to enjoy the new developments. I salute the world leaders who take the banner of peace, and hope the Iranian leadership will take this message in a direct way to every ambassador ..
(3:30).

Washington sits silently on it. the American leadership will have to respond now that this paper is released …

(3:32).
Any other questions.

(3:34). Armand: Mr. Keshe .. the lines you connected, is it with N coated wire, we can connect without N coated?
K- You can connect . if you are connecting all the wires ?? using N coating then you don't have conversion. and you'll find out, sooner or later they'll all be N coated by the plasma way.
R- People are asking whether to use the Zn wire or Cu?
A: No, Cu
R- Cu, it's always Cu for the connections.
K- It's the first time we hear Armand after a long, long time. How are you keeping up?
A; Very good now., why we have to put a flat plate?
K- the flat plate has a reason, it creates a barrier field force, otherwise your system will run out of control.
A: Okay.
R- It would be like a reflector of the fields.?
K- No, it's the limitation of the fields. Don't forget when you put so many plates, and so many coils, these plates in the total structure will behave as a coil anyway. (3:36). because each one becomes like 1 turn. It's like, you'll be using a composite material, not the single Cu, you have a material which has a Zn, Cu, and Fe in it. Some alloy, but an alloy in the plasmatic field. In each of these Cups, there are millions and millions of these combinations. In some of them you produce from H to Cu, to Zn, and in some of them you produce Plutonium and Uranium fields.
A: There is no Fe wire exists, it's all galvanized.
K- There is an Fe exists, what are you talking about, Armand. .. well buy a piece of Fe, don't buy a steel. Look for old nails, go around America, the ones which are about 200 years ago. Everywhere, there is Fe everywhere you can buy.
A; It doesn't have to be coiled, yes?
K- It's preferred to be coiled, yes, it has to be coiled, especially the earth has to be coiled, because that bring combination of fields, this is the reason we use coils.
A: Any suggestions we can clean up the galvanized mesh ..
K- You don't use galvanized.
A- I know, anyway to clean it up.
K- No, because when you use galvanized, there is still some other residue which goes inside, or interferes with the field strength of the Fe. (3:38).
K- It's the method which galvanization is done, actually they use ?? current, magnetic fields, so they create a condition of fields position.
A; thank you
K- Give my regards to Sara and family, thank you for being there.

Any other question… we are approaching the 4 hour limit.
I think today's teaching is a watershed in the world of science and T, in the world of medicine, in the world of application of fields of the Universe , and as I said, today is a wonderful day to be 20th of July, and this is a gift for someone very, very special in my life. As I said, birthday today. (3:40).

Q: the Cup 3 and 4, is that all Cu?
K- Cup #4 is total Cu, and they are all Cu, only Cup #2 carries the Zn.
Q: What is the idea behind physicality and Inertia? I'm still a little confused on this?
K- If you go back on teachings .. Inertia is the matter state MG fields, and G.. and M fields, what we call MaGrav, is attributable to the interaction of the fields of the elements with the center core of the planet. .. One is the surface interaction, and one is the center interaction.

(3:42). We need a Portuguese translator.
Rafael translates.
Q: the setup, the Cup 2 and 3, you have the Cup of Man there, or is the Cup 1 and 2, as you taught us?
K- Repeat .
Q: .. because the CM has a difference, you have the flat metals there, and .. so in this setup you put the flat or the coils, as you put in the drawings?
K- Yes, there is a reason we do it that way. And we keep it that way. (3:44).
Q: So this means I need to make a new Cup now, not use the ones that I made already, is that correct.?
K- .. Yes, if it is made with the same soul, why not.
Q: .. can he put it vertical or horizontal position?
K- We just already answered that one.
Q; If he can use the CM to put inside there, or to use the Cup 1 or 2? (3:46).
K- That's their own decision.

Spanish translator needed : (3:48).
Q: Does the Cup of Inertia goes n covered (coated)? (3:50).
K- Yes, of course, anything to do with magnetic and not a matter state.
Q: .. you explained how to N coat the nucleus of the Caroline Core, is this in any way joins to the concept of the C of the position of the C, through the Al..
K- What do you mean, I don't understand.
Q:
K- What do you mean?
Q: If he could create different interactions to the level of the nucleus? (3:52).
K- I don't understand or what the question is.

(3:54).
make it clear for next time
come back next week with,, and we'll respond ..

K- Thank you very much for today. As we have said, we have opened doors, your eyes to new dimensions and as I have been responsible, and am responsible for all the events within the KF, what happens, I advise KF KS internationally please, not to run into problems with what has been setup through Caroline. (3:56). I request you to block, total, because these people are ruthless and they will go for everything. I advise the Golden Age of Gans to block and delete. These are important because these groups,

wherever they are on, they operate, they are ruthless and relentless on all of us. Our love stays the same, but protection of the KF KS and their families are paramount to us. This is what we'll see, through different ways, they'll come in, and they'll use different opportunities to destroy families, to destroy life's. Sweet talks saturated with poison. Sisterhood of death. It is important for me, as founder of the KF, as the way I [protect and teach, protect all of you when it happens within us. And I advise all the KS, please protect yourselves from the sweet talks, as what these sisters will bring as a poison to all of us, has brought to my family. On the other hand, I hope you enjoy the new knowledge released today, and I hope you understand the gravity of the science and T delivered today. For the first time we brought the STM, the emotion of the man, and the physicality of the man, as ?? process that never been done before, and can save every dimension, for the first time, whatever you decide, which ever, has both physicality, emotion, and the soul with it, (3:58). Never been disclosed, never been understood, in a simple way, you all understand, use it to create peace, knowledge, condition for understanding for humanity, and share these, especially the report from the Iranian leadership across the world, plus the report. Now the newspaper is published, is copyrighted KF which is all of us, released to share it, and let governments do it. We are not asking for any funding, we are not asking any money for research, we all have paid with our lives for this ?? There is nothing higher then the price of a life of a man, the freedom of his soul. Thank you very much for today ….

R- 338 KSW July 23, 2020
Video
(4:00).

END

339th Knowledge Seekers Workshop; July 30, 2020

Cup of Plants released,
Solution for Coronavirus Report read,
ISBN official scientific journal number,
Iran publishes Books - new technology is what was promised in Koran

KEY-PHRASES:

ISBN number making Plasma Times an official scientific journal, Iran attempts to bring highly influential people to takeover the KF -- will be headed by Knowledge Seekers who devote their lives to the new Knowledge and keep the ethos, Enhancement unit will be shown in Austria end of August/September, Mr. Keshe will return to Iran, Iran publishes Books censors say new technology is what was promised in Koran 20 references, Book 9 will be written by 3 people,
Warned officials we will start seeing the first cancers in less than 6 months, Mr. Keshe has 3 years study in metallurgy,

Questions about the 5 Cups,
Cycle of Creation video,
Before the umbilical cord we were free and fed by the energies in the womb of the mother, And then with the breast feeding we were made a sucker and taker of energy, STM was created at inception,
Man can live in the environment of the Universe without ever killing, One Drop One Life,
Teaching of Cup of Soul of the plants, breaking up Earth doesn't want to let the man go,
Repeating the teaching of CS of plants,
Don't need to kill the plants man stands between 5 Cups and Cup of Soul of Plants and absorbs energy transferring, Have to learn how to receive, Need to ask permission from the plants to receive,

Knowledge is now complete we don't need Mr. Keshe planned to takeover the KF,

Humbleness,
Some people say when I teach I insult them -you insult your self by not understanding what was taught so you find my word as an excuse to cover your weakness, In Universe don't wait 9 months to see the creation of the soul happens instantaneous,
Q: Does the size of the containers matter for the realization of the 5 Cups?
K- Um .. no, but the further distance you are there is more possibility of producing more.
Wang Lyn talks about meditation,
Ella goes over the Report on Coronavirus with Protocols,
Data to International Standard, 95% Success Rate

ENGLISH TRANSCRIPTION:

(:06).
KF has ISBN for KF Plasma Times journal .
without peer review.
Peer review by public..
(:08).
(:10).
We refused to accept people from outside into the structure, that they do anything, as they do not understand the knowledge. We have the same situation in Iran, they tried to bring highly influential people to head the KF, to break open in Iran. And I explained very clearly to a number of people, that the KF has to run by KS, we devote our lives to bring what we believe in. Then we don't need to bring somebody in from outside who has no understanding of the F, the work, and the ethos.

(:12).
EU Shown in Austria, Linz in August, (27th or First Thursday of Sept)

(:16).

AZ; 10 units in Far east on an Island; center in Linz; rest of applications in China and Iran; (:18). A 10 unit center in Canada; 10 unite center in Brasilia,
try to keep that the knowledge stays open across this planet.
knowledge can't be replicated. you'll see part of power generators, Plasma Enhancement for illnesses…
We'll celebrate the new T among ourselves ..

(:20). This way we keep to our promise, we are behind because of the situation in China. .. Talk that a 10 unit center in Holland.

Sometime in September after opening, I will return to Iran.
We have undertaken to show the first flight by latest next March. (:22).

The book is being published in Iran by 11 AM.
(:26).
In Iran you have to have a permit to publish by the government.
This book has already been accepted by the government.

(:28).
The people who check the book, who know the Koran inside and out, and they have found a lot of parallels in this book and what has been promised in Koran. And they requested that, this page be added to the book.
Man will take knowledge of the space …

They will complete the others, in coming months… he says there are 20 references in Koran to your work, and there is more.
The language is written, is irrelevant, the essence of the knowledge which is transferred is important. (:30).
correct to the, what we call, final time, final destination. As you know the Book #9 will be written by 3 people, as you are aware Ella, the head of the KF worldwide, except China, has started writing the first part. My teachings over the past year, and addition teachings will be added to this book, and the third which is the society, what we call, collective understanding of society of the human race, part of the soul of the book will be written by the second half of what we call, total Administration of the KF, Wang Lyn. Hopefully in the next 6 , 9 months will be released ..
and we'll close the book, to start the book of Universal knowledge …
.. that started with the Book of Soul, what we call, the Cup of Soul, about 2 weeks ago.

Teaching:

Last week we showed you the Cup, in a way, the creation essence of the man. In the 2nd part of teaching today we'll unravel a new knowledge, , and put an end to killing animals and destroying vertical people. (:32). In a way we teach you a new knowledge, you received last week with the 5 Cups. ..

will complete the 3 essential lines

(:34).

(:44). Video of the Sepah, and KS spraying disinfecting the hospitals..
(:46).
If you are planning to come to Austria, please book your place. You can't just show up, you have to book. We have to keep room for scientists.

I would like to answer any question, second part we go into teaching.
Q: Which Gans's are they spraying in the hospital?
K- These are soft Gans CO2, second Cup. As it is effective with Corona. The results in the hospitals in Brazil has shown a massive drop in infections in the hospitals where ?? disinfectants by Gans has been done. So we have a track record from Brazil.

(:48).

(:50).

(:52).
(:54). Are there any questions.

Q: How to book for Austria?
K- On KF website …

(:58). ..
now they are asking 72 hours before flights, Corona free tests from valid, credible laboratories. We know there no way to go to China, .. the rate of infection is so high. We have unraveled new Corona problems. We have seen the first brain and breast cancers of Corona. We have warned officials to be aware of what is happening. less than 6 months we start seeing the first cancers. We know they are Corona cancers, because they are like the ones we see in the arm, they are twins. It's very simple. We see two similar tumors on two side, maybe two breasts, two in the womb, two in the brain, ??? (1:00).
Any other question?

Q: Some KS keep spreading the news that for Covid-19 there is a cure called Hydroxy Chloriquine that the virus is mostly a hoax, and that president Trump is some kind of savior against the Deep State, these information's are very contradictory, can you share your thoughts on this ..?
K- We are counting the body bags in Iran. Let the Americans lie.
R- That pretty much answers that.
Q: Can I use low carbon steel, it's very hard to find pure iron?

K- You don't need pure iron, go around the block find the old rotten box with nails in it. I don't understand why people are doing this. …
Why the head of the KF is not in the panelist. (1:02).
Just use .. I have seen people buying 99% pure Fe and the rest of it. Ah .. just walk on the street you'll find a nail. If it is rusted it's already N coated.
R- So should it have a red rusty coating, or a black ?
K- It doesn't make any difference on it. It depends on the carbon content, and the firing and the heat.
R- So it would be good to use the fire process on this?
K- If you can reach the temperature of pre-melting, yes, but it won't be easy for a lot of people.
R- Can one use caustic in this?
K- Yes, you can do, the secret in higher order metals is to add K to increase the temperature. This is what I have done for years. When it comes to gold and silver, you want to use N coating using caustic you just add a slight amount of K, which increases the heat, but because it is part of the salt it gives you a very ??of K salt in a way, if you understand how it works, it gives you a very high temperature, and a perfect N coating. Put it this way, I have done it for years, it must be good, for higher metals you put a bit of caustic, bit of (1:04). metal nail .. low caustic on top of it, use a very high temperature boiling water. I have N coated gold, and every other metal we have.

(1:08). I have 3 years in metallurgy.

(1:10).

(1:12). K- you can wash the Gans's in any shape or form you like.
R- In the One Drop process you don't wash the Gans's, is that correct, it's a straight one drop from the solution?
In a way, but you have to understand how to do it. .. How do you wash energy, have you asked yourself that question.
Next question.
K- Let me explain. the Cup of Soul you have created in that Cup .. we saw it done by Iranian scientists, a beautiful cup Persian tea cup, should have given you a sign, about what I was talking about, it's your emotion, which will carry in, not what is in the Cup, you just take it, and that becomes part of it. As we are learning the EU and as you know, one of the most peaceful women I know, and her life and style is to create peace through the T is the head of the KF. (1:14). And yesterday, I made 2 Cups, 2 systems, 2 jars of a specific combination, and I asked her to hold one in the back of the heart, and one in the front of the heart, to gather the essence of peace through the physicality of the man, the imprint, and then one to the soul, on the head, to transfer the wish of peace, and peacefulness in creating peace for humanity. And those who receive these, what we call Plasma Units, you already receive the soul, and the wish of peace by the head of the F. The same will be done with the Chinese part, Wang Lyn, 2 women, exactly the same in their wish for humanity. And so you will receive. . directly where it comes from the F. We carry the soul of the peace, we carry the essence of the peace, and in all the systems which will be manufactured by the KF worldwide, will carry that ethos of the soul, by 2

women. You'll learn very soon, very quick we give elevation to the soul of women in this message, because they love unconditionally, and they give unconditionally to the humanity, and the humanity belong their child. In that process we change the course. (1:16). We have to understand the totality of the knowledge, not fragmented the way we want to. We have the Cup of Soul, ?? cup underneath, it's to show you can't control it, you don't collect anything. But mankind is waiting for something, so we gave you the Cup. In essence what is in the middle of the Cup, is the essence of the totality of the STM. You have created it, with what intention you made the Cup. Many of you, make the units, and against the wall, in the cupboards, make cupboards, so you already deviated to the side of what's behind the wall. Try to make the Cup of Man as a free standing unit. Try to make this Cup of Soul, this Cup of Universe, as a free standing then like the sun, like the soul of the Creator, shines in all directions. You got to learn.
Any other question?
Q: Is rusted iron N coated?
K- Oxidized, it's not (1:18). It's a oxidized, there is a difference between oxidation and ?? N,
R- So you said to start with a rusty nail, but we would still do a N process. ?? end up with something different.
K- Yes.
R- Don't just put the rusty nail into the Cup .. and expect it to work
K- No, .. because the old nails are good, they are very good because they already gone through the process of rusting. ??? the cells are already open.

Q: How do we clean the Cups?
K- Why do we need to clean the Cup. ..

R- .. Cups are open to the atmosphere, what about all the dust, bacteria, things in the atmosphere?
K- Let them come in. They are part of the creation.
R- Some people have seen formations in Cups, I have never seen molds in my Cup. (1:20).
K- .. guy in Iran , Cup started making noise, he got frightened, and his wife puts the Cup on, and the noise stops. When they opened the box, they start ??
How come they are talking/
You are making MG fields, it's like 2 galaxies rubbing against each other. You will see new phenomena's, new understanding.
Q: Can we replace the N coils with Gans, same type and shape, for a better field for the Cups.
K- What?

K- If you replace it has to be in a dynamic solution .

K- Sphere shape.
Q: The chemical composition of the Sun, is H 75% and He 25%, (1:22). and smaller quantities of
Does the mean the

K- Stars have different combination, but are essentially mono in the center.
Q: Can we use the CS in any dimension …
K- I don't know try and let us know.
Q: Can we use the nails that are galvanized .
K- No.
(1:24).
Q: Can I reproduced missing limbs ..
Play the recording of the Soul, because the next teaching will be very appropriate.

Video : Process of Creation … (1:42:50).

K- We come the to the point that in the whole life of humanity has been dependent from the second that the inception has taken place between the egg and the sperm, life has a one track dimension, to gather as much energy as possible, to grow, and to survive, be it from the environment, be it by attaching yourself to, be it by taking energy from the others, as you are not strong enough to do. In the womb of the mother we take the energy at the point of the inception from the liquids from the environment of the Gans, which is available in the layers of the womb of the mother. No attachment. At that point we have no connection, we are free, (1:44). but as we grow, as the division takes place, as more energies are absorbed in the field, then we attach ourselves to the body of the mother, a source of energy, "I cannot do it on my own, so I attach myself to." And then we go through the point of the birth. When we are born we go through the same process, I need to be given, I become a suckler, I suckle on the mother's breast, that I have been given again, so on ?? of the mother, we start taking from the others, we eat animals, we eat plants, we eat anything, we eat and we eat the creatures which are floating within the atmosphere, if there is a desert and with one rain the fish appears in the pond, how many fish has man absorbed by breathing in the cycle of his life and grown in different shape or form within his lung, within his stomach. Then we come to one important point, what about if, what about if, we go back to the first days, where we were taking the energies from the environment of the womb of the mother without killing, without destroying, without taking another life, without attaching ourselves to become the burden on the womb of the mother. Then stand still and look what happens in the womb, (1:46). the division of 2 to 4, and 6, doesn't come by accident, because when the 2 are created, they create a weaker 3, and that weak pulls in from the environment of the womb of the mother, and in pulling in, those 2 on either side, absorb and has a limitation, and divides. In fact the STM is created at that point of the inception, but has no energy, it's a weak, it's dependent, and in that essence if he can keep that in all structures of the man, man in becoming humble to be small, in compared to the others, to be a giver, to give of a higher, to receive, man becomes elevated. And man can live with the environment of the Universe without ever killing. One Drop One Life. In the essence when we are born to be able to live within the environment of the planet, we are born, we've done many things, we do many things. Parents for the first time they put a piece of another animal in our mouth, they call it meat, chicken, whatever. They pickup a vegetation, an apple, a herb. We are told it is easier to take, then the ask for. When you ask, you are given, (1:48).

when you take you're committed. When you ask, "I need this energy." When you ask, I need this for my existence, who is there to give me? The whole Universe is there to give you. When you put your hand out to kill, you are limited to amount, and you committed a crime. In the space, and the Universe we cannot do this. There are no gardens, and there are no farms. Mankind has not understood the difference between the animal kingdom and the plant kingdom. In the teaching of the past, many times I have referred to it, as we call them, the Vertical People. What is vertical people. what is the animal kingdom. In the teaching of last months, with the Cups we introduced the animal kingdom, with a soul and physicality. Where the STM Cup sits on the top, and the Soul fo the Planet sits at the bottom, and in-between sits the Inertia. And then what it comes, the physicality of the man. And then the STP. Then man, to keep this soul moving and alive has to move and commit more crime. In the world of animal, it has to be moved, (1:50). to keep the soul fed. To keep the soul in the dimension of its existence. Today I show you the soul of plants, the soul of a tree, and if you understand this, the STM in interaction with the soul of the plant will create a condition, that the plant gives what it needs by the soul without ever soul taking its life. You need this, because of the national food security, which is planned to destroy man, there will not be enough to eat, but a grain of rice can behave like a sun to absorb the energies of the Universe to give to all mankind. You can feed man from one grain, the whole of humanity. Not to eat it, but use is a source to absorb energies, which the man needs, at the strength of the grain. I am the creator, and I create the conditions for my existence, not by killing, but by creating conditions within my soul, that the whole soul of the Universe feeds me, if I need, when I need. In the structure of the STM, we saw that the Cup of Earth took its position at the bottom. We saw the Cup of Inertia, in the matter ?? state took its position. (1:52). In the plant kingdom the soul of the plants take position, on the soul. then with it, as with itself, the condition of the physical soul, and then you have the physicality. This sits across the 2 borders, the Soul of the Planet. and the ?? if in the physicality of the man, I cut your arms and legs, you do not die. So in the kingdom of the plants, you can cut what you like, the creation sits within ?? , then the plant dies. You can create … breaks .. that process , so ?? .. to what it wants to take ?? arms we call the ?? (1:54). this is the reality, in ?? by sitting ?? as now as you said, by plant, now you understand what is the difference, now you understand mankind does not need to kill. many of you would like .. there is a difference, .. in a Cup of soul, and cup of physicality. Cup of soul of the plant.. in the present Cups which you use for the human body. you take a coil, another coil, and a plate,
in the condition of the creation of the soul of the plant, for fixed point the plate moves to the center. and the coils take position. this is why the plants stay vertical, condition to fixed environment, because they have fixed themselves. .. Earth G field point of view. and ?? (1:56).
(breaking up .. can't hear clearly …)

So when you make the Cups to do with the plants (draws a line from the center N plate to all 6 coils in the 2 Cups below) that you fix the strength of the ?? ??
it's fixed then you understand, the simple ?? with man ?? you put the limitation of material, gives you different vegetation, herbs, and everything else .. and energy.
R- Can't hear you. it's breaking yup
K- Now you understand what is the difference between …

K- It means God doesn't want you to hear.
R- God needs better bandwidth.

(1:58).

K- It means God doesn't want you to hear any more. He wants to keep man a slave to his plant. The planet earth does not want to give man the freedom. You got to wait that I have to support different systems to be able to get to you…. you have to wait .. (2:00).
…

God doesn't want you to hear
(take a break … (2:02). (2:07).
K- We'll go very fast .. where did I loose you.
R- We didn't get a lot about the plants, when you started with the flat plate in the middle.
K- Okay, let's see. You see, this planet doesn't want to let the man go, it even interferes with the teaching, it says, "I have kept them here for millions of billions of years, why should I let them go." (2:08). So, we will see.

In a structure of the STM and physicality of the man , we always use the plates on the side, because then it is always un-balanced, it can move, it can change it. The plants, they gave a compromise. In a way, as I said, the compromise was, we stay with you Earth, but you feed us. Earth condition was easy, you decide where I have in one place, you can have one ?? seed and no more. For that reason man, and the animal, and the plants made a compromise. So in the plant kingdom, stay your plate in the middle, and you allow the other conditions for what you want to create to be dictated by the others. And in that process, when you came to the STP and soul of the plant, and the physicality of the plant, you had a choice of flat plate, means I don't move, I stay, I fix myself in the center, and let the fields build around me, that I can collect. (2:10). In the process of what is available, in totality, a plant condition is primarily dictated by one element, Inertia. But what field at the point of inception is available. Is Inertia of the position, matter state availability which gives energy to the plant. This is why we are conditioned in (by) what soil we have, and what can grow. The position of the physicality strength, then in respect to Inertia, dictates what will grow above it. If the gravity is tight, you get herb. if gravity is loose you get a tree. If you have a gravity which is a compromise between Inertia and the MG field of the plant, and MG field of the planet, you get what we call, seeds, and onions, and what you call grows in this condition under the soil. Where the soul splits, you have a growth to absorb energy (above), and you have a growth to interact with the fields (below). This is the difference between the physicality of the plant world, and the physicality of the animal world. (2:12). Now that it is fixed, your life becomes very easy for man, now you have the Soul of the Plant, and you have the STM. How do you want to fix, and what you want to fix in the strength, to what. But in fact, you find a fixture between the 2 surface, which in fact, gives you the band width, which energy can be absorbed form this structure. When you get educated more in understanding it, you can use different combination of the structures, to develop different strengths of the materials. But in essence, the STM creation is in a floating condition above the earth, but the soul of

the plant, is the soul of the entity, within contact restriction of the given boundary within the soul, within the ?? soul part. But then you have plants that grow on the trees without the soil, and everything else, which is a compromise between the two. But then the tree becomes the zero point, where the plant grows on the tree.

Why do ?/ some plants and trees do you take a piece from another one, and you put in (grafting) and you create fruits of different. Because you change the M field of it. Singularity does not create, (2:14). but when you put the skin of another one and you graft it, you create a field which ?? the two which creates condition for fruit, or whatever it grows. So If you understood this, you have the key not to kill. Not to destroy, exploit, but you just feel the strength of the plant and you tune into it. And depends what you need, if you don't need, "sorry the ?? position is full." The rest of chewing and the thing, is to feed the physicality. Now KS run and feed yourself. Do you want the herb, do you want an apple .. a date, all bear the same. You have to decide what you are going to put on this side, for G, for Inertia, and everything else. But the beauty of it is, that the plants create a condition of cover, so everything is conditioned. (2:16). to a Zn and to a metal condition, liquid, which allows AA strength fields to come in, to create that AA strength of your body, we can feed you. Or you can do it yourself. Directly in doing this job, you can create a condition that you can absorb energy from the plants, on agreement from the plants, not on your. In a way, you make a connection with your soul, which you never had, with the soul of the plant, and the ??? soul ??
R- Loosing the voice again.
K- .. And in this process you start understanding how you can take with your soul from interaction with the soul of the plant, what the plant needs it takes from you, what you need, you take from the plant. You don't need kill, you don't need to destroy the plant. (2:18). This is how it is done. And once you get educated, once you develop understanding of, you put yourself within the reach of, that you can take the amino strength from the environment, and in that process, if you put yourself in this environment you don't need to touch the plant, you take from the fields that are in position of it, and pass through to it. In a way, if you make, as I said, a copy of the plant's structure, and put it in the middle of the room, as the food is going, as the energy is, the proteins are going to it, you're intermediary, you pick up what you need. You don't need to kill it. You can let it live. So in fact, if you look at it, you need a combination (draws a Cup with different coils and plates) that can give you anything you need. In a very simple way. (2:20).

Any questions?

R- . … what about the gas of Nitrogen, it seems to be important to plants, it's one of the 3 important elements, the NPK and so on?
K- No it's not, N comes by the process of the absorption of the energies. It's a byproduct.
R- So similar to the way N is created in the atmosphere through the interaction of the fields?
K- Yeah, you come, the user of the transfer.
R- So with the fields you are in effect creating a magnet for the fields of N?
K- No, the N which comes is the byproduct of the AA, the N itself …

(2:22). You have to realize now with this knowledge you have a freedom not to kill. You have the freedom to be able to understand what is needed, that you can be, you can position yourself on the path of the fields which are on the way to the Cup. This is what you did with "One Drop, One Life." I think if you understood this, as you understand that different herbs can extract different fields, even the field of the protein which the body needs, one does not need to kill anymore animals. One does not need even to destroy a plant. The time of killing and destroying is over if you understood this … This is how we are going to feed you in the space. Let me explain to you how you are going to be fed in the deep space. (2:24). This is Earth, you are here, and this is the center, in putting the weaker strength of the Earth atmospheric condition ?? in front of us here, in establishing a line of transfer for energy, we feed you without you doing anything. You feed by positioning, the same as I said, One Drop you put, by the energy trying to come to One Drop, the body takes what it needs. The process of feeding man changes, it doesn't matter where you are, you receive what you left behind.
Any other question?

Q; . .that Cup you had in a previous drawing, with 3 spirals and plates, I assume that it is all N coated? (2:26).
K- I think you are all educated enough to know what you want to do. There are as many combinations as plants on this planet.
R- There are quite a few questions and confusions about ..
K- It's so easy to confuse the human race.
R- Well every time you introduce something new, there is a new variable in it, multiplies the confusion. .. Q: We have at home 2 Cups of Man, should we fit them into these 5 Cups. In my opinion I don't want to because they are alive and functioning, what is the interaction in this configuration, if we keep the CM while creating the 5 Cups?
K- You are still producing another cycle of life, huh. The bad thing about these pots they keep on going, you change house they don't touch the food for 10 months, they ?? still growing.
R- So would it be okay to create 2 or 3 of these structures of the 5 Cups, of does that indicate the Schizophrenic tendency?
K- We leave it on the people, let them grow, we need to have a time that people start thinking. We have been spoon feeding too much. We spoon fed for millions of years. (2:28). It's for humanity to make a stand, .. to structure itself to what it wants to do. .. you decide you like apple, and the other one ?? the other one likes a lotus fruit. Now this way we give you the freedom, before you had a few animals, now the plant kingdom is rich. What you decide for the Inertia, will dictate what is available in dimension of physical matter, energy level.

R- Even John Bliven is saying, I am lost, do we create 3 new Cups and sit next to them the 5 new Cups, and stand between?
K- The thing is John, you still have 5 Cups, your Inertia and the G field of the Earth doesn't change, now you have the Soul of the Plants, which have fixed themselves to the Inertia, then you have the Soul of the Plant in the physical dimension because when you cut a tree, it still feels, it still shows reaction, and then you got the physicality of the plant, which .. grows up. What strength that shows is important, and would it become a tree,

and would it become a shrub, (2:30). why the height does, why do herbs have such a concentrated energy of one element, that you can use it if you got a headache, that you can use it for whatever else, which means the central plate is mono-energetic and is connected closely with the Inertia field in that position. Then you understand why some plants don't grow in alkaline and some plants grows on acidic, and all the games which is played. the Inertia of that point dictates what to create in conjunction with the strength of the central MG of the Earth. But you have to understand, when it comes to the Inertia and all the MG fields, you always have to have a condition where the CO2 is a factor. So you can never let go of your Zn and your plates of Cu. All of you always N coated the Cu and you put it in the middle, or opposite to, this time you have to N coat the Zn plate in the center. And in conjunction with ordinary Cu you create an umbrella of fields. Now you spread it, because the stronger one is in the middle, Cu is the weaker one. In the structure of the man we always put the plate or whatever, on the side, because we hold on, we don't want to go, we don't want to create any more condition for the soul to run. With the plants, because now your factor is dictated by the Inertia MG fields, you can play that game. (2:32). And your umbrella is much bigger than when you were the humans. We will show you, we got machines, we will show you these things. What happened if you put the structure you made last week, near the structure you make this week.

And then what are you going to get next week, or the week after?

Now you have the freedom, but remember the principle of One Drop, One Life, do you need a stacker, or can you create a One Drop, that you are connected to that it can give you everything you need and you are fed, you are not hungry. As we say from now on in the teachings, in English we say, we separate the wheat from the chaff. You have to understand what is what. Understand exactly how it performs, what it is supposed to do. And then you go to the next step of understanding, what this thing is going to give me. And it will be very, very hard for some of you, (2:34). you go to go ?? all of you, you put the seed of this year down, for next year, putting some Gans's around it.

So in fact now you see, mankind can tune to a plant with all the energies he needs, without actually committing any crime. And he can put himself on the path of where energy is coming from, and it takes what it needs. Many plants have the AA strength of the meat, or whatever. Then you understand we are in a new ballgame. We are in a new beginning, now you don't need to go and get an orange, now you create the essence of the orange from this, anywhere in the Universe, You can give it to a man on planet Zeus and say this is what we call orange, and he tastes energy and ?? all made by the emotion of the man, and the confirmation of existence of the fields. (2:36).
Q: Is this what Alex did with the orange?
R- And it's a different process, is what you are saying
K- It's a different process
R- reverse almost.
K- It’s a point of creation, where that thing was created.

….

Q: Ram .. what about eating fruits, that is not killing trees, so is that considered ok, I was thinking the fruit is the tree offering its interaction with the fields to us in a way?
K- Did you ask the tree, can I eat you?
R- What if it drops its apples on the ground and we pick it up.
K- Then we have to do what the other ?? guy did, huh, write everything about it, when the apple fell on his head.
R- Well from the trees point of view it is probably trying to spread its seeds, with that fruit, it has its use of dropping fruit, and the birds and animals will take the seeds and spread them around, (2:38). so perhaps as humans we use that fruit we should be actually using the seeds and paying the tree back for its ..
K- I think if mankind understood the teaching of today, up to now, the past 1 hour, we don't need to get together for about 100 years.
Any other point?

Q: I am having a hard time understanding this, it seems to me we are making a second set of 5 Cups, but the top 3 Cups are of the structure of the plants…
K- Yes
Q: of G and Inertia
K- Yes, they are feeding, do you know they want to grow.
Q: .. I am trying understand how we receive the energies. I know we have to create that point of weakness to absorb the fields we need, so do we take some of the Gans's of this second structure ..
K- You don't take any more Gans's .. you take the fields, it's a big difference.
Q: So we position ourselves?
K- yes , More or less. (2:40). you can create the positioning by understanding that the process of system, will adjust itself.
Q: Thank you, I need to grow a little bit.
K- No you just got to understand, that systems work in different way. You have to be very much, extend the knowledge, understanding of the knowledge, It's time for us to move to new levels of understanding, much more open minded. This has created a certain narrow mindedness because we are used to everything we like, to be there at the fingertip. This is part of the problem of humanity, ready made, give me, give me, now we have to wish it, we have to ask for it. (2:42). We have to make it part of our structure, which is continuously evolving to gain, and to give. The problem now, sits in fact, with us, with our behavior. Don't take, ask for. And if you are given, it's a gift. We asked for my soul, on this planet, is given to be looked after by the planet. And then you can live anywhere in the Universe. And many times I keep on emphasizing on this, because sooner or later, you'll find out that, it doesn't work for you. The sooner you find out it works for you because you did it the right way, and everything else gets fixed, it doesn't matter if you need vitamin A or B, or whatever. There is no field strength names in the U, it's the need of the satisfaction of the soul. That's where the problem sits. My soul to be satisfied, what it needs by my physicality, then you'll receive it, be it the food, be it the lover, be it the love of the Creator. Mankind has to become, and mankind has to understand this, otherwise you'll run into problem as you have done for centuries, millions of years. (2:44). Thy shall not steal, but you can please me. Give me what I need, provide me with the pleasures of the existence.

you steal it, you pay for it.

Q: So it is seeming to me, that I need to feel in a way my position with some sense that is closer to my soul … ?
K- In a way , you have to understand your soul, your creation with ?? We have to understand to become low enough, humble enough,
Q: Is that understanding accompanied with some sensation in our physicality?
K- You see we have to go through the transition. We taught you the Cup of the Universe, or the Earth, yesterday, because it is connected, last time. (2:46). And we taught you the essence of creation of fields of the plants, vertical people. And that is what it is, that's how it is. Now with this teaching we brought you to the first level of humbleness, where you can filled, where you can be fed, receive. This is the step man used to take. man did not eat meat first. We took the vegetable. you can be in the process of need and receive, you don't need to kill,
The time of killing, if you understood,
even though the Earth interfered, it doesn't want to let you lot go. I hope you understood most of it. It makes you independent of this planet. Governments can put these on every square,, corner, (2:48).
.. put it on the satellite .. now you can create it.
Q; So our positioning is a state of bringing our minds in accordance with our soul?
K- What do you mean?
Q: I am just trying to understand our positioning better, you said it is understanding our humbleness, in where we need to bring ourselves to receive.

K- You see, let me explain something to you to become very clear, and it will become more clear. … mankind has a huge problem, and that is, it has to go through transition, not to be dependent on any physicality, and goes according to the maturity, and how we receive it, how we perceive it. And this is in a way for you a bit strange, because you remember the dome we saw in the Caribbean island, (2:50). that the soul of .. was the giver, and the source of it is the totality of the energy available. So in fact, until we teach you the dome next time, the preservation of energy will come into operation, you need to eat very little to exist. Man loses very little, because it is like the womb of the mother, everything is held for you. You just tap into it. This teachings, this coming up teachings, it shows you gradually how to make a cluster for your soul, that you feed the soul, that the soul feeds the physicality. But you have to create a condition that the energies can be absorbed. You have to create a condition and a position that you can receive. (2:52). The knowledge to come is beyond comprehension of man. But we share that in time man will understand. This is what I say, you can take the horse to water but can't make it to drink. We can bring the knowledge but you don't have the background to it, to understand it. So in too many ways, we build it up, we bring it in, and teach you more, and in a way, if you look at it, between the two, if you understand, between last weeks teaching and this weeks teaching, and the teaching too come. You have no need to take any energy from outside, because the soul already receives it, now you cocoon it, you show it, what that thing could be from the earth to take, instead of eating it, you take the energy of it. So you feed your soul with it, to elevate the soul to feed the physicality. In a way. you plug yourself into the vegetation energy M field, that can continuously give what you want to

run your physical dimension, it does not matter if the apple next door, or in the next continent. If you want an apple, you tap into the energy of what is available in the apple strength, you taste the apple, you feel the apple you want. Then it comes to understand, you have to be so humble, the energy in you has to be so low, that it still converts into lie, but it is such a giver, that it receives out of the love of the Creator. (2:54).

We have a lot to learn, and as I said, one of the KS said, the knowledge is complete, there is no need for Mr. Keshe, we got all of it. Shows lack of understanding of the creation, we have not even taught you anything, and the arrogance becomes the cause of it, ?? done. Be always humble, that the more you understand, that you understand, you have not even understood the totality. Then you are at a position humble enough to receive. As I said, we even, I explained to scientists in Iran National Defense University, then we can go the speed of light.

Q: … (2:56). .. The first question is I am not sure I understood how the STM works, when we have the 5 Cups for the STM, you drew ?/ with questions, and then you kind of summarized that in one Cup with 2 plates and 3 spirals …?
K- You see, what we tried to do was to let you start maturing, we stopped this spoon feed. You become ?? …
Q: Could you explain again the final Cup with 2 plates and 3 spirals? And then the second question, .. we argue that we have domesticated animals, plants etc. But at some level for me, I think it's the reverse, that plants have domesticated us, or animals have domesticated us, because we take care of them and feed them, and therefore, make them supply. In return they give us fruits, milk, or honey. So when we stop eating what is going to happen to their populations. For example cattle. are they going to survive on their own. how about plants that we actually grow in order to eat their fruits or their grains? (2:58).
K- .. this I always say, abuser always finds an excuse for his abuse. Did they domesticate us, or do we want to blame something else for. Or did we domesticate it, because it suited it us? There is a big difference, a massive difference in total understanding, why do we change it to suit us. Why do we change it to suit us? What gives us the right to do this? Why do we make ourselves blind to it. And secondly, it's us who wants to live, not the plant. We have to understand, we have to be in a position that we give to unconditionally at the level that the plants need, (3:00). that if it gives it will be the strength we need. It's a lot. Our body does most of this automatically. Now we become aware of it. The reason is if you become aware of it, and you can control it, you can become "Man of Space," otherwise you have a problem. Mankind will have a huge problem in the space. You run out food, out of energy, out of everything you imagine you have, because you haven't learned to take, your step, and mature to the next position. You have to learn to be humble enough.

I live that way, and one day mankind understands how I live. I never take, and I always ask and I emphasize on this more and more, because then you are given. I ask, can I have the pleasure of. And it's there if it available to be given, ?? it doesn't matter if it is a water, .. a person, it doesn't matter if it is even mankind itself. Can I have the pleasure of being part of this humanity. At that strength, I yearn for the past days, that I could be with the

KF team in the hospital, they don't need to .. they go in there and get infected, they are still there but get infected more but they give so much that they want, (3:02). to give, to be there to be part of that they can give to make it better. When I look at the KS in Iran in the hospitals. They put themselves at risk everyday, they don't need to be there. They are there to serve humanity. Those souls will elevate beyond imagination of mankind. The are there that, "I take it," I put my soul on the line. You go to get fed by the plants. they go there to absorb, and be part of, that the others can survive. My life has no value, if I can help the others. When you see the teams in the hospital, especially the teams of the KF across the world what do you think they do? they put themselves, that they can be that humble , that they absorb it, and at the same time they can help. These are the souls which are matured. Always say, I relay on the greed of the man, and it is so good. If you been around me, I always say, that I give you so much rope, that if you stay on the straight line, you elevate, you start playing around you hang yourself. Because have you seen the monkey jump up and down, in bungee jump, it connect himself. We have seen that recently .. (3:04). We gave to give, but in that position of freedom to give, they thought they have become above, and at that point they cut themselves. Because you got to stay humble to receive. Every Thursday I come here, I put myself lower than those who have no knowledge, as I can give, and with it comes what I receive and what I share. You look for the plant to feed you, and (I) look for the Creator to fed me, by humbleness, not arrogance of the knowledge which has been shared. We have seen very recently, those who became arrogant, are not there to be. And how many people have gone through the F in the past 15 years? The minute they thought they had a position, they learned something, they claimed they were everything. Where are they? When you claim the knowledge of Creator is complete, God cuts. As I said to doctor Asid in past days, the knowledge which can be transferred to man is, if you understand every star you look at, is a specific way which exists, and has a specific way which creates life that exists in that environment. When you understand the creation of every star in this Universe and the others, we might claim, we just start understanding. And when a little knowledge makes you arrogant, that you say the knowledge is complete, now I can take over, (3:06). you took over nothing, except the arrogance and the downfall. It's the same, it's not teaching you to take from a plant, it teaches you the way of living. And this is what all these teachings are about. A way to learn to give.

Q: .. but I still have a question about the transition, let's say I accept all that and I want to practice it. Taking from that Cup…?

K- You don't need to practice, this is the whole thing Dr. Guatua. You have to comprehend the essence, These are just a schematic to show.

(3:08). Very soon, in a short time you'll understand why these are there. And those who did not deliver have gone. Why? Arrogance of not receiving. When I hear they say, "knowledge is complete, now we have everything." I said, that's the end. I knew the soul has to depart. Knowledge is never complete. Even the Creator accepts His knowledge is not complete, because He is still learning. Why is He here. Because he saw the beauty of love on this planet, the beauty of the creation of what he never thought could create. The beauty of a partner in the soul of physicality. Couldn't you stay long. So if the Creator Himself accepts, that there is no end to His knowledge, what even himself is learning

from, how one illiterate, confirm that the knowledge is complete, now we can go for a takeover. Where are they, how many people we have like this? When you confirm, when you understand that the knowledge I have, is not even the beginning, you are ready to receive. And then it's the same, I don't have the orange, but I like to taste an orange, if you wish it as a soul, the orange trees are ?? not a planet, you will receive. To please you, to elevate your soul. That's why we say, even a plant has a soul, even a stone has a soul. (3:10). If you strength of your desire, to be happy with an orange. There is a tree, a plant, it has a soul, it connects to you. You got realize that mankind has to go through this process of humbleness. And then be able to live with it. As some members of the KF said, you are the most arrogant person we know. I said, yes, because my arrogance comes out of my humbleness. Because I am so humble, that you see it as arrogance, because I give unconditionally, it doesn't matter who it is, even to my enemies, even to those who betrayed me. It is for them to find balance in their life. Many of you who have been 7 years haggling with me, all these things, which everything else which is happening around the F. Have we given up? We taught more. have we stopped? We spend more time teaching. There is a very big problem in the F, that has to be understood. We have transferred the soul of "Elevation of Giving," to female, but those females who are here to serve, not those who are here to steal. (3:12). And those who are here to steal in the name of giving, will see their demise. Because they are taking what is not theirs. Mankind in essence of the soul is one. Because if you look at the bottom pot, it's the soul of the planet, which feeds your soul on top. You are part of it, you are in it. And when you put a line in it, you cut it, nobody else does. You don't need to wait 14 days, you already cut it form the first day. How planned coup de tas we have seen around the F. How many planned elevations we have seen around the F. Which one of them are still here? The time of all, the time for changing mankind has come. And before time that day comes, all what I call, those who have taken from the F deliberately, they will not be there to enjoy the time. Not in terms of physicality, but by the soul. "I was part of the KF, I betrayed the F, and I am just a stand-by." Because I put myself above everybody else to be. This is one of the problems that you have to learn. You've seen a lot of people, we allow very few people to come near us, and when they come close they see the humbleness, and think, oh, we can do this ourselves, the guy doesn't understand. But they don't understand our humbleness comes out of our strength. You go nowhere with it. (3:14). The same is with a plant, the same with a STM. But when that happens, because the other souls are there, they bring you the gift, they bring you there, that you don't suffer, it's what you need, we give you from us.

This education cycle, specially in the next few weeks will bring many of you to understanding of the truth about yourself. I give freely, but are you there to receive it freely, and give it freely. Not by words, but through the soul. This is why I say, when I teach, I teach the Universe, not just with the voice of the man, because the essence of the soul is given. You have to understand, these Cups or whatever, it's not there to give you, oh I took, these, why is this brown? You missed the point. It's for you to understand the essence of creation, essence of life, and you stick to a Cup, is this wire connected that way. I sit and I laugh, I say, "my god, we are still trapped in the physicality before we understand the essence of it." It's very, very difficult, (3:16). for teachers like me, who have the patience to see the mankind making the mistake again and again, and he leaves a

gap for the others to come an abuse him. It's in the ?? abuse, but the closest people to the F, and they left very quickly in the last few weeks. The extent of the abuse is opening up left, right, and center. They were given freely with the love of the Creator, and they stole. They went to steal from the Creator. As the knowledge of the Creator is complete. And those who follow them will follow the same demise. You watch. Thieves go together, and the givers go together. You've got to understand, the whole essence of the teaching is a way of living in the Universe. It's not the Cups too pink, yellow, 2 springs, or 2 flat plates, and the rest of it. You play childish game, we teach you the childish way. You play the mature game in giving, you receive knowledge we don't, can't even teach in a hundred years this way. Stop looking at the Cups, go back to what I said in the past months. Look at the fields, the fields is not where the fields goes, it's where I can give that the fields goes to save someone, to elevate someone. The greed of man, "me, me," is too big in mankind. Look at the essence of the teachings in the past 2 weeks, you elevate yourself to the others. Look at the Cups and connections, you stay a man, (3:18). and you suffer a life of ?? We have one of our dearest KS telling, now I learn how to be detached like you. I had to wait a long time for her to reach that point. Long time. But that time when you realize, you mature to the Soul of the Creator, to understand it, for the knowledge to be received. Don't look at the Cups, we show you a way how to tap into the energy of this planet, that through the strength of your soul, you can get that 20% and feed it when it's in the dimension of physicality, nothing else. I call it, remote control energy transfer, but apparently mankind wants to have all of it. ?? and I go back on it to learn, don't become arrogant. Just because we give you room to grow, we give you room to teach the others and not control and be the owner and claim it. And if it you learn that, you go to the next step. (3:20). And if you can step away from it, you have reached a point of maturity, the I live my life, you become that life. But ask if you need, and you'll be given, if it is sincere and you need. "I would love to have the pleasure of an orange, if I could receive it." Because you create that understanding at the strength of your need, for the pleasures of other parts, which ?/ yours. You will receive it. You go and steal an orange from the tree, you break your leg and you pay for it. We showed you ?? one. The harsh way with the broken leg, or go the other way. Don't take my teachings as a Cup, springs, and a plate. Understand the essence of the fields of it, what does it do, it's there. When I explain to you, this is the Inertia, have any of you stood still, "why is he talking about Inertia." Oh, you put this one there to get something, we can see something in our plate. You are just a bunch of teenagers who just learned what sex is, and get there as fast as you can. For your own pleasure. Take your time, give pleasure. Take your time enjoy the presence, then you always get there. You receive what you want. As long as man behaves like a teenager, "Wang bang, thank you Madame," you won't get anywhere. You never learned what is the essence of the creation. (3:22). You just want Cups, "make it, do it, oh, I don't receive it." Because the Cup was just schematic for you to understand the totality of the creation. You have to grow.

Some people say when I teach I insult them. You insult your self, by not understanding what was taught, so you find my word as an excuse to cover your weakness. I don't use the color, race, or nationality. I use it for you to understand, ?? for those who listen, to understand the weakness in the man. If it bothers you, it means that weakness is within you. You have to learn where your weakness is and make a strength of it to become

positive. We don't need no one to deliver to us. We take what we want, when we want, because we ask for it to be given. You ?? ask for it, you don't steal. does not mean the restaurant guy has gone and brought the food, you have to come and take. There are no "Fish and Chip" shops or pizzerias anywhere in the Universe. And the whole of the Unicose exists, how come when it comes to man, everything is physical and we have to have the best thing, that's it. Understand the essence of the creation, and then learn how you convert it. (3:24). Go back to Book 1, God is creator of all, and man converter of some. That conversion of some, comes at the point of the need. "I am going through a harsh time, I need a love, somebody to love me, that I can go through the harsh time. The Creator delivers it to you that you don't suffer, be it a earthquake, be it a death, be it anything. You don't make a Cup, put a Cup there and I don't feel the earthquake. No. You got to learn to ask. You got to learn to ask from your own soul, what can I give. Never ask what you want to receive. Stop looking at the windings, and the plates, and the coils and number of coils. This was to show you the essence of creation, how, what's the difference between the position of the structure of the STM and the planet. The Vertical People, the Horizontal People. The Vertical People and the Horizontal People stand on 2 ends, opposite. If you put the Soul of the Plant on top of the branch and somebody cuts the branch it's gone, dead. So the tree was clever he put it in the ground, as long as it is there, I am sticking to it, I am there to live. Simple as that. The earth, man, decided, "oh, I put it up there and I give it 2 legs to run if it comes to kill, and 2 hands to protect it." And if you put between the plant and the man, somewhere in the middle, (3:26). you have the soul of the animal, and the kingdom of the animals, and then you see how they behave. Why do animals, mono-feeders, specific, because of the position of the structure of the ?? understanding of their soul. You put a cow, donkey, horse, and a deer, in a field, none of them will die of hunger, because they each one eat part of the same thing that guarantees their survival. And man should not be that point, man to his soul has to be the collection of the fields of the Universe, that from it, as I said, when you become a star you can create. Now how many Cups, how many springs, how many turns, 9 turns, 10 turns. When I hear this I say, oh, we are back in teenager job. "get there as quick as you can." My teachings are very deep if you understand it, and the way I live, I give total freedom until you hang it. You hang yourself with it, or you become humble enough that you absorb, and observe the changes. And from it you give to bring more changes in a positive way.
Any other question. (3:28).

Q: .. you didn't let us anything to speak about.
K- What do you mean?
Q: Yes, all, even now if we speak in physicality this is a problem now. But you know Mr. Keshe, we are teachers and we are teaching outside the KF, so the people are still in the matter state, the physicality. So they want to see, feel, even take the energy in the matter state. So that is why we are asking to understand, although some of us really understand on the soul level, but we need to connect it to the matter state.
K- Ask your question.
Wait, are you going to go to every language, every broadcasting, every Television, every radio to teach everybody, and someone is asleep and didn't learn it, they won't learn it, and then you have to go and find them that are awake watching that TV program that

they learn. Or you teach through the STM that it doesn't matter if you are awake or asleep, you're still here on earth.
Q: No I go to the second one.
K- So, how and what is the way to the second one.
Q: What we are doing .. but this because we are short of living in physicality, (3:30). we want to see it in physicality. ..
K- Can you imagine how hard it is for a man to wait 9 months to see his own creation. He must be suffering, huh. But we got used to it, oh we got to wait 9 months. Why can't you create that soul, that it is instantaneous and it decides to show itself in physicality. You don't need to wait 9 months, nowhere in the Universe anybody waits for the creation of the soul. The children of the soul of the universe are created that instant, then they decide if they want to be part of physicality. But we still allow the cycle of physicality to go because you have to show something. Somebody comes out and says , hello mama, says hold on, where did this come from, was it me ?/ somewhere. Because we haven't learned about the soul of creation of the soul of children. We still have to put you through the 9 months. ?/ comes out, goes in, and then somebody comes out, go .. and that is your baby. Does the soul in the Universe carry 9 months, 10, 22 months. No way. So you like it, we give it to you the way you enjoy it. But in the creation of the soul. If I come to you today and say this is my son, you never had a child, how is it possible? It was soul born, from the soul yesterday, he decided to be there today. It doesn't make sense to you, but this is how creation is in the Universe. (3:32). As I said, we come to earth to enjoy the physicality, but this physicality is very ?? awesome, and very.. physical. Carry on.
Q: .. draw on whiteboard . that 5 Cups normally should be 3, and 3 connection in between. .. if I say there are 5 Cups.. !1, 3 and 5 . 5 should have partially nothing from #1, but #4 which gives in between …

(3:34). Q: If we want to work with the world of plants, we need only to change the 2 above?
K- What do you mean?
Q: (3:36). Q: Draws 5 Cups

Q:
(3:38).
Q: 4 and 5 are the common denominator for all on the earth.
K- No they are not. This is exactly where you are wrong. The only common denominator is 5. The only Common denominator is 5. Nothing else.
Q: What is the Inertia then.
K- Inertia is in different part of the planet according to the material. This covers the same thing right across (from 5 upwards. this Inertia is from here (covers the top 3) , and that's it. If this Inertia changes you become a shorter man. So for you to exist you have to become a shorter man here. This becomes the position of your soul (between 2 and 3), because the Inertia change. In the world of plants, the Inertia ?? you can plant a herb and a tree next to each other. And the animal here always eat what is available here, because the plant produces. Their wish is to have ?? this created, by the central interaction of the material. So your proposition has, (3:40). needs a better understanding. We are not there to position us, we are there to enlighten us, so the common denominator is only the G

field of the planet, even that at different points are different. Common denominator of the G of the Earth, or MaGrav of the Earth, on this side could be here, and through the composition of material, will be here. That's why we have mountains and valleys. Because it depends what this (Cup 5) composition of material has kept for itself that it absorbs the field. I tried to bring for you to look at the totality, not one line.

Q: .. all your Cups are like this .. triangle you are preparing a strong field as the soul of the Cup, here .
K- No, I don't see that, we haven't made Cups like that, all our Cups are like this. (3:42). Some fields above open them, and some below converge them .
Q: Yeah, due to the strength of what you are putting in.
K- Yeah well it's a choice.
Q: And if I want to go to the plants, and from our understanding that some of the plants the soul is down in earth, and they are here … so in this way change the position of UCp 1.
K- What do you mean?
Q: This is the physicality of the man.
Soul of plants should be in this Cup 3 because it's in opposite position ..
.. (3:44).
Q; soul of the plant upside down from the man.
physicality would be on top here.
K- of course that's what we said. It's like putting the man on his head, but connecting it to the Inertia of the planet. You become a vertical, a herb.
Q: number 4 and 5 will not change.
K- Yes they will change, No, no, this is what I keep on saying, number 4 is all changeable, not number ?? 1 or 2, change but longer period of time.
Q: Do the same system for man go also for the plants, in the meaning? if we see 1 and 3 in what you gave us in the 5 cups. …
if I go to this 3 ..
(3:46).

K- Yes you see you are still physicality, the fields go through. ..
The five Cups and five Cups .. it's the story of 2 Cup. The field flow with the man is this way (outward down and inward up) , that's the direction because it gives energy enough to the soul. With the plant it still is this way, with the direction still goes that way, but here the soul of the plant sits here (4th Cup) to be a giver. This is why if you eat a fruit or whatever, it adds to your energy. (3:48) and that energy is to be used for whatever reason possible. This is what the scientists can't understand, and create themselves. and what they do to understand, and we don't need to problem with it, a lot of things with KS. One takes from the plant, and it puts its physicality at the height of the thing, and that's it. The other one puts its physicality within the structure of the planet, and it is committed to it, it can't do anything with it. In a way, when you look at it, a tree or plant talks when if grows up. But the man doesn't. (3:50).
K- It's the way life has become
Q; I have a small question. I have a small residual in the soul Cup, in the first one. is that because I am in physicality.

K- too physical. yes. because it is soul to soul. … I don't know where my cup is.
Q: All over the place.
K- In so many ways, yeah.
We are getting ready to release the document, as promised. Please when you receive it, share it with all the health authorities, and all the officials. And they can contact the KF or wherever they like …
(3:52).

(3:54).

Size of 5 Cups:

Q: Does the size of the containers matter for the realization of the 5 Cups?
K- Um .. no, but the further distance you are there is more possibility of producing more.

Is Meditation Helpful :

Q: Is meditation an important part of this great service, (3:56). and would a group meditation to elevate our soul as a group, creating a group consciousness, would that be a good thing?
K- I am going to bring somebody in. I think she is the one who tell you because she is writing that part of the book. Wang Lyn, can you tell us, because you meditate a lot.
WL- Yes, Mr. Keshe
K- Answer the question please
WL- so the question is that meditation is important for elevate the consciousness. ..

the answer is yes, ..

(3:58).

(4:08). adding to it in a positive way, we progress.
if we become physical with it, then it becomes very painful. What we planned, what we think, is not necessarily what it needs to be, unless the other souls have decided it to be. In so many ways, when you make the soul of plants, vertical people,

becoming part of the Soul of the Universe, is going to be a very difficult time for man. Because you still look at the Cup, what color, why is it green , why is it blue. It will take a long time for mankind to switch. If they take the path, as they ?? have up to now.
(4:10). In the recent past we have seen a lot of people going through this ??
A lot of people give promises, we don't give promises, we teach you. It's you who has to elevate, and those who think, we have, we've done, we're doing this, there is nothing there for them. and they attract the souls, for what they call there cycle, and then those

souls become in a lot of problems. Because what was promised was not there. In this teaching we never made promises, we showed you how to make things, that it is you who can promise your soul. And I always say, it depends on what you want, because it is your strength, it's your soul who decides what it wants to take with it.
Q: I would like to translate your 9th Book of the Soul, I am so touched by your teaching of the soul.
K- We come from the Soul of the Creator, nothing is a choice. (4:12). And we teach for the elevation, gradual, of the humanity, not the totality in one go. And this gradual, we put a term and condition on it. A lot of KS were eager to get, to do, but a lot of KS were not aware of what we could see in the soul of the Foundation. And when there is misconduct we correct, we give it time, until it corrects itself. And when there is the gain for the F we encourage it, that it proceeds to the next level, fast. The teaching of the soul, is a teaching of the conduct of the man in the Universe, not the man on this planet, in a way, partially, this planet and the STM is what we call the sandbox. If we understand the operation of the soul of the others, we have matured maybe enough to understand the operation of our soul. We never can learn from our soul, as it is within us. We cannot look inward to see the light. We see our conduct in the behavior of other souls. And this is one of the biggest problems for humanity. Maybe in the future mankind elevates to reach the Soul of the Creator, then maybe he can look within. (4:14).

R- Looks like the report is ready.
K- I would like the head of the KF to read it.

(4:17). Ella, .. basically it's a lot of information we have approximately 187 pages. .

(4:22). various researches were we show the M fields ..
History about the Gans and viruses ..
Construction of Cup #1, and Cup #2 ..
how to use them .. Gans suits ..
Protocols of different mixtures .
Detection .. (4:24).
Disinfection of environment
Protocol A white tissue
Protocol B red tissue.
Mutations .. (4:26).
Cancer ..
Children
Environmental Corona infections.

(4:32).
lab tests ..

K- Can you go back to the statistic page. What do you see, the most important part of this report is this, where if you open up, you see as high as 94 - 95% success and reduction

for specific parts, lung, fever or whatever. And this is exactly what WHO looks for. What we don't see is, (4:34). the effectiveness of ?? and how fast it is done, is within the guidelines of WHO, and 95% success, has not been reported anywhere in the world, with the T. We had to work with 156 out of the total numbers. And this part, this is actually what confirms the correctness of the T. If we look in detail, there should be no need for no one to die of Corona, even in the early or late stages, 95% reversal. It's part of what has to be considered by the WHO, and the Iranians ?? and the offices of the … sitting on this because, they see no reason a water should be able to do such a thing.

Data to International Standard, 95% Success Rate:

The theoretical data, is to the standard international requirement. This is what all the governments will be looking for. We have shown the T, we have shown the things around it, but essentially this report is the compilation of a lot of knowledge to show 95% success rate. (4:36). It stays an open report that we can update and change. And we'll keep this report ongoing, until Corona is not a problem anymore. In a way, a simple $1 cup can save one life. And we have seen man dying for $1, why? So, what we, what you are interested in is the procedure. What to look for, and protocols. Many of you get Corona but are not aware of it, and later on, you see the cancers of it, and all other things of it. Read the Protocol, read what we call the cases. There are 23 to 26 identified ways that the Corona is effecting humanity. And of today, our successes are of 95% doesn't matter which one has been hit.
Any questions?

R- I was wondering what is meant by saying … 95% success, what does that mean, (4:38). what happened to the other 5%, did they ..?
K- We allow 5%, statistically it's about 97 people out of 100 survive.
R- So that would mean 97 out of 100 that are already in pretty serious condition in the hospital?
K- In any condition, yes. The people who did this. There is a list of the patients, who they are, what they have been through. The 155 , the details have been given to the statistician, and they have come up with the figure after analyzing.
As a KS you have seen many parts of it, we had to put in this report as people who don't know nothing, (starting) from zero, to the point of conversion of the disease. The university wanted 2 halves, one to do with the Gans's and one to do with the illnesses, but have one after the other to be published. This way we kept everything together. You get a Corona, open the book, see what signs it is, we update all the time, what you have to do. (4:40). Any other question?

With this journal , with this publication everything how to do.
if in the future there is no one around to.
If there is no other question we'll close this session. Please send this around the world, the way it has to be, governments, officials, …
R- Wonderful thank you, and congratulations.
K- You should thank the head of KF, she has been working day and night to get this done.

R- Yes, congratulation to Ella, definitely. (4:42).
K- We'll see where we can go with this ..
Your governments can ask questions directly to ..

(4:44).

(4:46).
K- .. we have to go as fast as we can .. how many lives to save. .

340th Knowledge Seekers Workshop; August 6, 2020

Teaching of the Soul of Solid Matter

ENGLISH TRANSCRIPTION:

(:06). … Today we celebrate the 3rd anniversary of the Universal Council (UC), and the member of the UC will make their presentation, as they are an independent part of the KF, and they are kept that way deliberately, that they work as what we call, the logistic side of the F. Then this week we know there was some break up in the teaching part, we try to answer some questions in regards to the teaching of last week, if there was any misunderstanding. And then in the 2nd part, we enter the third part of the teaching, which completes what we call the Earth plasma field connections. We did the what you call the horizontal people, which includes the humans and animals - couple of weeks before. Last week we did the vertical people. And the 2 exist in conjunction with the matter state. Today we teach the Soul of the Matter, it is part of the Book 1, the completion of Book 1, and this allows us to move on, (:08). to carry the life of the humanity into the third dimension of the space travel. Which means we can create conditions in the spaceships, or for the Soul of the Man (STM), or in any shape of ?? our future transport, that we can not only carry the man, but the vegetation in the essence of their fields, but the entities, the stone, be it the stones, be it solid Cu, be it anything else. Because we need those, it does not matter where we land, we need to understand the field energy of the state of matter. This is the completion to the back of the book number 1.

In the future teachings we complete on the Book #2, the state of the transmission, and transportation of the light, which means plasma at high speed. That will teach us the upcoming speed of transportation, above the speed of light. We need to do that, and in a way to bring it into the line, how we carry the plasma of the matter, the plasma of the life, let's say human, and the plasma of the life of plants, then it allows us transportation, and

transmutation of elements. We need to learn this to be ready for thousand times the speed of light. As the light is the structure of what we call the plasma, in transportation, then hopefully, somewhere about October November we reach the station ?? arriving at the plasma in the Universe and on a star system and the rest. As I said, (:10). my job is to complete transportation and transmutation, and communication of human race into space by 21-3-21. The promised date, where, hopefully, with the support of Iranian scientists and accumulation of other scientists, KF and outside, we start the structure and travel into space.

The knowledge in the last 3 weeks has been knowledge of the universe, and the creation. But it has been put in such a simple language that many can understand, that with it, mankind can even elevate the soul of the animals, and solid. If we go back to the writings of the promised ones, even a stone has a soul. Even a stone has a soul. So today we learn about the soul of solid state. It's an atom, an atom is a dynamic state, it has to have a soul. And in this process, as I said, the new knowledge into deep space travel, with life support with energy support, with dimensions of the transportation, transmutation that man has not known up to now. We move on to transmutation, and transportation. The speed of light by order of magnitude. So for example, Earth to Moon will be seconds, milliseconds. This is needed if man is to ?? souls of the man, in his creation on this planet, to introduce themselves, and they bring in, (:12). the celebration of the 3rd year of the UC, and hopefully by the next time they report they'll truly report as a UC as a Universe, not on the level of human. We hope we can fulfill this, as you have seen, we have brought the new knowledge in very rapidly.

This new knowledge is already getting used, in some cases, and at the same, as we publish the paper on Corona last week, many of you would like to translate it. Documents version of this, for those who we know and trust will be given for translation to any languages. The Portuguese has been forwarded to Rafael, for the Farsi language has gone to Iran, In Iran it will be published as a book, and becomes part of the structure of the plasma T as a scientific approach to all viruses, and especially Corona. On the other hand we have achieved many new results with Corona, and it will be added to the Plasma Times as it is. The Plasma Times Coronavirus, which was published last week in Iran, will stay as a dynamic journal, which means everything discovered, added, noticed will be added to it. So it doesn't stay the structure it is today. We will add to it. There are new discoveries in the past 7 days, new tests which has done and completed by different groups. (:14).

We add a peer review to this paper, which means those of you who have tested it will put your testimonials at the end of it. .. so the scientists around the world who read it, so they can see the peer reviewing by individual persons. Not in a way, peer review, testing the validity of the text and confirming what they did, and how they achieved. We'll put in the name, the address, the email, that their review can be complete. And then you put your comments and then you might suggest a better way to do it, how you did it slightly different, we don't expect copycat …

the new style of non-peer review articles

means no one can hijack ..
write it in your own language, put your feeling and emotion in it.

(:16).

(:20). We will announce next Thursday the presentation of the Enhancement Unit. ..
(:22). no one will be able to enter the Eu as they are active
(:24).

.. We'll use the knowledge to bring peace to mankind .. The knowledge is free and stays free at the point of delivery as long as I live, and KF operation will stay the same. (:26). On the other hand it's time to let the UC to celebrate their birthday, and then after the interim break we'll go into the teaching part, and maybe we can take some questions that we can move .. Thank you very much and I hand everything to UC .. to present their vision of what the KF is and will be.
>>>>
Universal Council makes presentation for 3 year Anniversary.

(:28).
The World Peace Treaty was signed on August 2, 3, 2017, members signed on behalf of countries ..
(:30).
(:34). .. Now we know the peace and love was always in us and we can understand,
(:36). the Creator has created us all in His image. And we can see the form of that us based …
in the universal knowledge all is crystal clear and explainable …
we are learning how to be as energy in the universal form … In India we call this energy as shakti, the power of all .. .

(:38).

end of UC presentation …

(1:19). Mr. Keshe: Thank you for all your kind words and support … Coincidentally or whatever, my birthday falls on the date of the establishment of the UC. (1:20). And this will be every year as we celebrate the start of a new cycle for man. What we seen today, is a point of maturity for the UC, where in the past 2 years what they have achieved, and this year they have started taking the structure for governance. And as we have seen the first sections have been divided in such a way to bring peace for mankind. When you read the 5 ethos's, or 5 texts, or sections they have chosen to serve the humanity covers more or less the totality of the need of the man. In that process you have entered a new process, a new era…

We see as we hoped, overall One Nation taking shape.

(1:22). as we enter the second cycle, and as we see more youth with the ethos, join the F. I hope by next year we'll see a different approach ..
In so many ways, I don't have a vision, I have a certainty. In so many ways, the conclusion of one brings ?? out of the other. We have seen massive change and evolution, and compared to last, near at a conjunction, never any us could imagine possible.

In September I hope to return to Iran and start the process of .. space flight. I have given the commitment to the Iranian nation, (1:24). as we consider Iran as part of One Nation, in that way it becomes your nation ... As they say, all roads end up in Rome, all roads of knowledge will end up in Iran. We bring the new T in line with all the scientists across this planet , and make Iran the center of science as it was some 2 - 300 years ago, and it was for centuries. I hope mankind will not look for wealth anymore, but look for peace and knowledge. As I said, ..
My vision for next year is far reaching you can ever imagine, as I know the T and the knowledge which will be delivered will change the course of mankind. The new EU we'll endeavor to show mankind things it is not used to ..
(1:26). .. We set out to elevate the STM,

(1:30). or as collective scientists as their part of the world. Or in conjunction with the others. KF as a whole has started a new cycle. The KF as a structure will change very little, now the structure is set by the UC, on the ethos and work of the F, to create wealth and knowledge, create condition for peace, and keeping mankind occupied with new knowledge so much that mankind finds now superiority in anything, but gaining of the knowledge. From now on the credibility will come out of knowledge and not out of wealth, as every man can make everything, and as much gold as he needs. In the coming EU we have setup to create gold as plenty as possible. We have setup to create silver, in beyond the imagination of the man, at the point of teaching. We have setup to create wealth of knowledge, if one sees that as one of the cornerstones of his creation.

Those who Break the Code will Loose Their Soul:

There is one point, and we have to clear one point, and that is all this knowledge has to be used to for the elevation of all of living things on this planet, and beyond. Those who break the code, shall loose their soul. (1:32). Those who break the ethos of peace shall loose their soul. Those who break the Universal Peace, shall loose their soul. What does the loosing of the soul mean? Means that all the fields of their soul will spread across the U, then there will be no sign of its existence. And it's a shame that such a thing can happen, to a soul which has taken so long to develop.

We'll bring in the ethos of universal marriage, which means it does not need no Church, no Mosque, and no signing of the paper. We'll show you the way of the ethos of the marriage be it by soul or physicality, which has been the rule of Universe for millions of years. As the men learns to engage himself in the understanding of the creation and the creator. We bring in new systems which allows man to decide the condition and position of his existence according to his satisfaction.

In the coming time there shall be no kingship and no leadership. In a way, the souls ?? with the servitude of the physicality and the soul, will dictate how much more they can serve. and how much more they can service will elevate other souls. In a way, those who serve become the sun, (1:34). that those serve and learn to serve, be radiated and learn to elevate themselves to new positions. .. the teaching will carry on, .. mankind has started learning the knowledge of the Universe. I congratulate the UC in stepping up to their position and fulfilling /..

The new T will bring those who have been invisible to the man, visible. And those who have been in the shape of the man but not understood by the man ..
Greet them and love them the way you love me, then the Universe will be at peace.
Thank you very much for all your work, and through the real work of the UC begins as they learn how to handle the new ways … .
(1:36).

Responsibilities of the Universal Council:

Raise the soul of the human race that it does not believe in anything but the Creator, with no messengers in-between. ??his soul hasn't been elevated to understand the totality. It is the responsibility of the UC to bring new ways for man to change his knowledge, and effort, elevation of the soul of physicality of others, now that financial means which is operational today. This has to be abolished from mankind. The monetary system has been one of the greatest demise of the humanity. Wealth has to come through knowledge, not through structure of materials. It is the responsibility of the UC to be vigilant that no one can claim himself as anything but the servitude to mankind. We have finished the prophets and prophecy, there should never be any claim on this level on any part of this planet and in the Universe. This is the responsibility of UC that those who know more about science of creation do not manifest themselves, (1:38). as anything but member of the U Community and no more. It's the responsibility of the UC to bring, transfer, and translate the new knowledge, to bring all the humanity can fulfill the needs by the new knowledge, irrespective of culture, religious belief, or color, or nationality. The UC has to demolish borders on this planet, this is your job, as part of negotiation with the nations. The UC has to see the end of what I call, financial operation. The UC has to see the opening of the space unconditionally, and equally to all men, and the living creatures on this planet. Do not understand that man will be the only one who will elevate to travel. As you raise the soul of the creation on this planet, expect others to be the travelers too. The future is bright for humanity, and we have entered the final phase of unification of man and the U Community, and we start taking man out of this village of Earth, I ?? all your souls, and I hope it will be a safe journey for all of you. Time of transition will be sweet and short, (1:40). but at the same time mankind will reach a new level of understanding, that this new level will bring the operation of the soul, and not the physicality. Thank you very much and I wish you all the best in the coming time, to all the members of UC and I hope collectively you become as one soul, that with it you make one soul of the human race, one soul of this planet, and one soul of the creation. Thank you.

BREAK >>>

R- Are we due for a commercial break, as they say,
K- Shall we have a break. (1:42). Video of KF products. (1:49).

K- All the products you see on this video will be available in Austria ..
(1:50). We are endeavoring .. that visitors can take with them . 7 years and the rest. We'll try to make available, if possible, hard copies of what we call the Paper we published last week.
We have limitation on people who can attend this .. If the
Going back to the teaching, we try to recap. Those who have the questions to ask first, to cover ambiguities …

Questions:

J- In regards to the U Community, I consider myself a Universal Council support member, (1:52). the work we are doing in AZ is part of the F work, .. time will be more and more a resource for people to support. .. I want to go back to last weeks teaching. I was a little confused. I want to focus on Cup #4, 4 is what you called, Inertia we have N Cu in 3 different configurations within the Cup ..
K- **Cup #4 Inertia is variable according to the position or the material which you want to produce, and only with the Fe N Coated in the center in shape of a coil, to be permanent and fixed.** Inertia according to different position, and according to central field forces of the matter state layer is dictated by the matter field. And this is where the difference comes with the G and M field, which you call Cup #5. So the Inertia, depending if you want to create a condition, (1:54). for producing watermelon, or you want to produce a condition to create apple, will change. It's the variable that exists, It's the same, when we showed the Inertia in the animal kingdom Cups, where you want to create a condition for the fish, or for a lion in Africa, you have to change the Inertia. The Inertia plate or Cup is the only part which will be staying variable, more or less. So you have to decide what field gravity you need. You cannot grow, let's say, a date tree, a palm, in the north pole, and you cannot grow, whatever you grow in the highest points of the mountain, in the valleys. This is what you got to consider and the field forces which create that Inertia. If you want to produce a Dill or Coriander, you use a different Inertia then when you want to produce a potato. And there is another point, which has to understood, we draw the pictures for the simplicity, for the schematic. (1:56). When you have the condition of let's say, combination field forces, if you look at (from) the top, your Fe stays the same, you have a Zn and Cu, sorry your Cu stays the same, you have a Zn and Cu, here you might have Mg, here you might put Ca. That it allows you, let's say, to grow a cauliflower. If you want to grow an apple you remove this, and you put what is needed to create an apple condition environment. So the teaching has to be understood in its totality, not in its individual cases. Or the point of need.
Q: .. my question ..

(1:58). .. if I put higher strength material in that Inertia Cup, does that carry more fields, that more is encompassed, so it's like an everything Cup?
K- Depends, compared to where and what you put more of, because you are not dealing with one Cup anymore, what you put in, in the Inertia Cup, will effect the soul in all levels. If you put your Inertia Cup … in a position of a different combination of Cups, according what you are expecting as a fruit, or are you expecting a herb. At the same time when you put your Inertia Cup with an animal, what are you expecting in the soul of the cow, or the man? And what is your expectation in respect to (2:00). STP and the physical life. The game is not anymore one, because the field created will go through all. And as you merge the man and the beast together, the interaction becomes more complicated. We are out of looking at one Cup, we are now looking at the totality. In every essence what does this give, together, does it give us an apple, or does it give us a herb. Does this collection (?? connection) give us an animal, or man, a fish, or a bird. In so many ways, when we go deeper and we understand more, would this soul, would this soul, will allow the field flow of manifestation of the creation and creator of, what we call, different entities? (2:02). The only common denominator in all your work, is here (gravity Cup). Because the G field of the planet cannot change. But the rest is dynamic by field flow, even from here to here, by passing the center one. And how you want to see it. Do you see Inertia of a desert here, and you see Inertia of a North Pole here. This Inertia, what does it create that your animals in N Pole cannot receive the emotion and soul of it. And how many conditions have you considered in this (gravity Cup)? And how simple have you made this (Cup of Inertia), don't forget the MG field of the Earth is a combination M field, that's why we have matters, different matter, as if it would have been mono, it still would have been a different ball game.
J- thank you for that, it was helpful.
K- I know, I know what you are looking for John. (2:04). After 4 or 5 years I have got to know your way of thinking. Thank you very much.
Any other question? (2:06).

(question confused goes to 2:12) Q: in Cup Inertia we put the ocean .. the 5th ??
K- What, can you repeat .
Q: …
K- What do you mean? (2:08).
Q: in Cup 4 you have ocean water, you have all the fields of this planet .. 5th Cup ???
K- I don't understand what you are trying to tell us ..
Q:
K- Cup 4 is Inertia, 5 is G field.
Q: (2:10). …
Q: what decides what I need
.. (2:12).
Any other question?

Q; Marinath … the creation of beings .. change their evolution on this planet . (2:14). what is the use of it. It doesn't pass the evolution time on this planet. like human beings start as small being… create by fields of Zn and Cu …???
K- I don't understand

Q: with the Cups we are creating, animals vegetables. ???
K- You see some of you with the Cups you make you create new conditions. You create new conditions for new souls, new creatures, a new plant, a new vegetation. Now if you change. As now a days, say we have a red and white rose, and we mix them that we get a red and white, or genetically we change them that white sits in the middle of red, or whatever. Now with this new knowledge man has the ability to create, (2:16). New dimensions, even new beings, being plants, or an animal, even with the new T we'll show later on today, you can create new materials, give them shape, create application for them. Now once you understand this.
Q: I can see the result effect of the fields on me, materials, and things like that. but creating a matter being I think I need something else ..?? I think we have to have a lot of ethics to control it, it might be another ?? thing Are we ethical enough not to pass the boundaries of, "good of everybody?" or do we become again, (2:18). who think of what they want without respect of the whole thing? Maybe I understand later ..
R- You can look at the mandate of UC it's quite clear, how to proceed that way.

Q: **What does Inertia mean**? .. So we use 2 combination for the 5 Cups.
K- What do you mean?
Q: (2:20). Q: What does Inertia means , is it a balance of a fields, and then you draw, like you have different shades of Inertia. I am little bit confused about Inertia?
K- Read physics book, Inertia is a MG field of the matter, of the atoms, collective atomic structure of the matters in that area.
Q: And the G becomes like zero, or ?
K- No, no, it's the combination of the both.
Q: .. and different combinations we will create different things. That means also if we can do this with the Cups, we'll be able to do this with the soul level. So it will come to a point where we'll be able to do this, for example, visualize something, attract the fields of it, and materialize them as well? (2:22). We are going to get to that point, because as you showed in the past, what we can do with a Cup, we can then do without a Cup, because the Cups are just crutches, so we will reach the point where our knowledge will be, give us possibility to enter different dimensions where we will start to do things … imagine a building they never built before… we'll enter into a different way of how the world will look like. Like we are we going to have houses that have never been seen before, because we'll be able to materialize them as we need. We'll be able to visualize something and make it happen?
K- In a way, **you can build buildings with soul**, as we put the foundation, you put the new Inertia. Yeah? So as you enter different areas, you can build using the Inertia field of Inertia to create conditions that allows you, to create different, what I call, in a way, now, (2:24). mankind has the ability, even by creating the Inertia conditions, that you might understand now why, and how I explained that I create a fish tank, that all creations according to what we want will manifest themselves for a given environment that man might like. This Inertial plate is part of that space T for manifestation, creating conditions, that entities of the other part of the U can manifest themselves on this planet. **The teaching is so deep**, that as we explain more and more, you will understand what it means. It's not just to create the Inertia of the planet Earth, it's to create the Inertia of any position in the U. That above it, you can create and see how man will react, how the

creatures of other planets will manifest themselves in the true color of themselves, not when they manifested themselves in the shape of the man.

This Inertia plate is one of the cornerstones of the teaching. You can create Inertia in the fields of the space, that you can see what creatures exist in the between planetary systems, in-between galaxies. Nowhere in the U is devoid of life and creation. If you believe in that, that ?? race, as we say in Arabic, ____ , God forbid. (2:26). Means you have limited the knowledge of the Creator. You have limited the understanding of the fields of the creation. This Inertia plate gives you the source at the point of manifestation. In the future we'll teach more, in the future we bring the elevation of the understanding.
Q; Wow, so it goes as far as our knowledge is ?
K- The man will take from these teachings according to his understanding and intellect, and no more. The detachment will bring the freedom of knowledge, the freedom of love, and the freedom of giving. … (2:28).

Q: .. you've already answered part of it. Okay, I have the 5 Cups, once I link soul to soul to the structure, what if I get rid of Cup 5 and 4, completely, just detach form those?
K- You cannot, you **cannot. You are made of it**. Your creation depends on it, If they don't exist, you don't exist.
Q: Even the gravity, I can't detach from the gravity of this planet ?
K- It's a, you see this is a general teaching. You cannot escape, you can escape from the gravity of this planet, but you are in the space, you still connected to the G field force of the center of Universe. .. It's a openness of understanding, as I told you, you only see according to your, what I call, intelligence of the knowledge.
Q: So you **always have to have a gravitational field to interact** with, and you always have to **have some Inertia in order to manifest**.
K- Of course, you create the environment, and a condition of the position.
Q: So by, I guess it's beyond my level to start changing Cup 4 and 5?
K- Why? Who says? Why do you put limitations on your understanding.
Q: Just checking.
K- No need to check. The only thing is to become confident. (2:30).
You see, we don't tell you understand this much of it, we teach so open, and in an open manner, that your imagination will take you where your understanding takes you, What you can imagine with this new T, you can comprehend. There is no end to imagination, as there is no end to the creation of the Creator. **What you imagine, you have to find the right field strengths of the fields**. The right correction and you can manifest.

As I said, the head of the KF as she is writing the part about the creation of life, the soul in the Book #9, it's part of her teaching to explain this. How original ?? mean condition is created, how she envisages it. As I said, the writings of the other beautiful soul, Wang Lyn, is to do with the collectiveness of the souls. (2:32). One begins and one structures, and in that process mankind will become mature, then you see both extremes one the beginning, and one with collective interaction, and then you understand the totality, somewhere in-between where it applies to you.

Q: Is it possible to reverse aging through the plasma T to achieve everlasting life? (2:34).

K- Yes, … but the beauty of existence is aging it, it shows its maturity. What you feel inside counts. what you feel in the soul. My biggest question is why man is afraid of shape outside changing.
R- I suppose we'd be down to 2 cells ..
K- ?? age brings a sign of maturity.
R- (2:36).
Q:

K-
Q:
K-
(2:38).
K- You have to understand, you have to start manipulating and testing. In the coming time, as the new organization

(2:40).

(2:44).
Ella: the more you try the more you ?? The more one is challenged to try and test .. the fear stops us from moving forward … (2:46).

K- How do you see the creation of the soul, now we understand the power of Inertia and the gravity? How as you are writing the book, how do you see, how can we explain this teaching in the book, how ?
E: At the moment I don't think I can explain .
K-
E- I would not go into this right now.
K- WL what do you see ?
WL- I think this is really beautiful .. you really open a Pandora's Box, for humans to try to create .. (2:48).
Planet Earth was a child ..

K- So we had a test run on Earth .. and now we go mass production in Universe.
WL- this is more interesting ..
The Creator is not alone, he has millions and billions now to create with Him ..

.. more like to expanding the creation. (2:50).
K- But when do you think this expansion will end?
WL- No end, this work is no start, and no end. Because at the beginning the Creator, if there is only one Creator, He is too lonely, He cannot know Himself, He cannot see Himself, feel Himself. So He had to create 2, create the separation to, like … ??? to separate part of himself, to manifest as the humanity and use that humanity to know who He is, and who , where and what He. And then during this creation He let ?? all understand that they come from the Creator. They are the Creator themselves, and that ?? the Creator to successfully repeat Himself, to create more Creators, and now this Universe became more interesting to play.

K- So we have entered the game of reproduction, do you think?
WL- The reproduction of the Creator, I think that is the most interesting part, from what you teach and what I understand now. (2:52).
K- We gradually hear the voices of the 2 heads of the KF, and the 2 souls which will be responsible for the elevation of the man, as they start learning how to teach the new knowledge their way, and they add to it in their time.

Teaching of the Cup of Soul of the Solid:

If you go back to the teaching. As we seen, they interaction of the field forces of the planet, in its inner sanctum, and the interaction of the fields of the layers of the planet, and matter states of it, in the field strength. We have field forces which, their interaction dictates a new condition. We saw with what we call the vertical people, fixing of the fields in the center (flat N plate in center). We saw with the horizontal people the creation of the field that it can create motion (N coil in center). But this time there is no creation and there is no motion, (2:54). but the fields of the U have to gather in a form, that they can preserve the fields, which are created. In this process the soul has to sit in the center. And the surface, what we call manifestation, become the state of the physical manifestation. In fact, with the physical state of matter we stay solid on either end, but we create a condition of the soul, we create a condition of the soul for the state of the solid, but with the soul. I am here, I sit where I am, I don't need to move. I don't need to grow up, I stay fixed to my position. The Cup of Solid, the Cup of Soul of the Solid, as was the Cup of the Vertical people and the Horizontal people, will become the cornerstones of the creation of the elements of the physicality of the man, (2:56). or being in the Universe, be it on Earth, be it on planet Zeus, or be it in the heart of the Creator.

So simple. So simple is the life of the existence in the world of creation. When you enter the universal systems EU, you will see this. With differences that you do not understand for the time being. Now you understand how advanced the science and T of the EU are. There is a lot to learn, there is much, much more to learn. In time we teach you. (2:58). In time mankind will understand that within the EU we have brought the 3 dimensions of horizontal, vertical and solid, all together. Where we can dictate everything, and in so many ways, we have repeated the process of creation, but as I said, a master never shows all his hand.
(3:00).
Q; the plant soul is below the earth's surface. must be more humble to be fed,, does this give us a hint to what field strength our souls must be, (3:02) to create the Cup of the Plant correctly, we have AA in the air above the ground let's say 43, so what is the next value in the layer below the dirt?
K- Dig it, analyze it and you will know.

Cup of Inertia is Like the Center of Sun >> Creates Planets>>

Q: Mr. Keshe just said that by changing the material inside the 4th Cup, the Inertia Cup we can create different vegetables, or say, life. Does this mean that the soul of all the

creatures on this planet are all the same, (3:06). if the Inertia of this planet changes, the same soul will manifest itself as a different soul?
R- So if the Inertia of this planet changes, will the same soul manifest itself as a different creature?
K- If you look in the depths of the … if you look at the mono-energetic, mono-material systems like the stars, do they have creatures, do they create life? Does the fields of their strength leads to creation of other things? In a way, you have to open your eyes into something which is like this, we have the Inertia Cup and everything else, and the byproduct was this, whatever it could be. Now you have the Sun, the center of gravity, interacts with the matter state of its surface, and isn't its manifestation the Earth, Jupiter, Saturn and the rest? (3:08). Are we the residue of the Inertia, of the planet, or the star, and its G field, and with it, in transition, part of his souls, depending on the point of manifestation.
(Silence)
You see, change the Sun to the Center of the Universe, and look at the galaxies as the Inertia point, and then you see the manifestation of the stars and whatever else.
(?? so the G Cup is a copy of the center of Sun and then you have the I Cup and from it manifestation of physicality or planets and the rest, where does the soul and emotion fit in?)

Asking is the Power of Creation:

This is why. (3:10). This is why when you understand, you don't need to remember. This is why when you comprehend the knowledge, the wisdom of creation becomes easy. The only criterion in the whole of this, is to ask. To ask for what you want, and if the asking is pure you shall receive. Ask what you want to create. You want to create the most beautiful flower. In understanding the process of creation, you'll be given, because you'll be given the knowledge to create it. Not that it will it fall in your lap. By asking you create the knowledge of love, then it is a giving of your existence. If you go back to all the teachings I have done over the years, I always say, and I repeat again, (3:12). you ask, I want you to show me your beauty, that with seeing your beauty it makes, and elevates my soul to give more. And if that request is pure, it shall be answered yes, as by receiving you dedicate yourself to give more. That's why when you ask in that manner, for my pleasure to be able to elevate, you'll be given what you ask. Because the souls will decide in the process of creation of that love, and that giving. When the Creator creates that condition, the interaction of the fields of the U create that entity for Him to be able to give more. And that is one of the reasons and cornerstones of the expansion of the Unicose. The love of giving, to be able to give more. "I made you to have children, that they may love Me," is in the holy books. As I receive more from what you have created, that I can create more with the love I receive. (3:14). The knowledge is beautiful when the man understands its totality.
(silence ..) (3:16).

Now we understand, hopefully the totality of the ___ And now we understand how we will elevate our own understanding, and in so many ways, we will understand the totality of it. Maybe in the future mankind will come to understand the total process of creation,

of being created, and becoming part of the Creator in the process of creation. (3:18). Maybe, maybe as the man's intelligence grows, and expands, mankind will become aware of his total existence. It is very, very hard that mankind will become mature in the process of understanding, to understand the creation, to understand the love of the Creator, to understand life is sweet, if man understand the sweetness of his existence. Life is part of the process of creation, and in process of creating mankind will understand the love and the patience of the Creator. Mankind will come to be part of, (3:20). in total understanding of what the Creator goes through, that in time when the man becomes the creator, he becomes just, he becomes the point of love and point of understanding, and maybe one day man will create as the Creator said, in the image of himself, those who carry the ethos of Him, of the understanding of Him, the process of creation of Him. And maybe then man understands one point, (silence ..) (3:23).
Any other question?

Careful What you Think -- Zoroaster:

Q: can we manifest by thought, we have to be careful what we think or not think at all until it is necessary?
K- Now we understand the teaching of Zoroaster, (3:24). think good, do good, and act good, which means everything has to be perfect from the beginning. Intention, emotion, and action have to be the same. This is what, if you go back to the beginning of the teachings, I always said, if you stand in front of the man from the deep of space, with the knowledge of reading your soul, you are nickered.

T**he Soul of the Universe will Elevate the Soul of the Man:**

(3:26). The position of the creation from the point of view of the man is unfortunately is very simple. In time mankind. In time humanity will mature. In time mankind will become so kind, that the kindness of man will bring the kindness from the Creator, then mankind will understand what, and why he was born, to trigger the love of Creator, to become the creation of the Creator. (3:28). In so many ways, mankind has to mature to this point. Mankind has to become part of the structure of the creation and the Creator, not in the term of physicality, but in the term of the soul. Let's see now with this knowledge where the mankind goes. And where does the Soul of the Universe will come in to elevate the STM. At this moment in time the STM is weak, as has been the tradition, by the work of the plasma, the strongest which is the universal fields, from the Universal Community, will rapidly now that it has found and targeted the STM will elevate the soul of the mankind and this planet, (3:30). for it to become equal to the Creator, and this is why I promised when I take mankind to space, I'll take him as equal.

Mankind will receive so much Love Knowledge from Universe - Enlightened:

This is the process. This is the process of creation and the work of the plasma, You brought the love of Creator to the STM, and now it has found a match with the U Community. From now on the mankind will receive so much, that he will not even recognize himself as a man, and he'll be swamped by the kindness of the love of the

Universe. As we said, birds fly with birds, and foxes with foxes, and deer with deer. Now that we have set the seed, and cultivated the seed of the Universal Community in knowledge in the STM, and the knowledge of the Soul of his Physicality, we have created a dimension and direction for the Soul of the Universe to enhance and reach the STM. It does not need to do much, when you know how to work it ?? We'll shower man with the knowledge from the U Community, that man will forget his physical dimension. All I needed to do was to sow the seed of the Universal Knowledge in the past weeks, in the soul and knowledge of the humanity. (3:32). Now the process starts enriching and fulfilling to bring it into the balance with the rest of the Knowledge of the Universe. As I said, I am the Creator, and I know how to create. I know how to bring the Soul of the Universe to love the STM, and with it elevates his soul and knowledge. As we say, let the game start, and see how much each individual will elevate his own soul to become part of. The bigger but equal to the soul and knowledge of the Universal Community, the gates of heaven have opened, let's see who there is to cross and be enlightened.
Thank you for teaching today.
I wish the UC a good year. Bless the souls of the 2 heads of the KF and the souls they will bring to us, and to all the Knowledge Seekers, that through their teaching through their soul (3:34).
R- Thank you for today's teaching

video

341st Knowledge Seekers Workshop; August 13, 2020

Introduction of Cup of Soul of Liquid and Gases
Horizontal plate technology

ENGLISH TRANSCRIPTION:

(:06).
.. KFSSI on the work of the Iranian Defense University will come in and we collaborate with other governments to bring the flight system. ..
(:08).
Back the Dutch KF KS .. we support them.
Do we have the member of the KF Holland here to on us? (:10).

(:16). Dutch group mahara.love (?? website)
(:18). KF will hold the Enhancement Unit exhibition at Linz, in Austria… 3rd September (:20).
Exhibition in Linz, for Enhancement Unit (EU).

(:22). From this exhibition we move rapidly to Tehran for the space development.

(:24).
the upcoming space development and space T of KF.
In so many ways, we show for the first time the power of KF space T, up to space unit. In the EU we'll show the real MaGrav Unit, unlimited power supply T. We have gone to the extent to use part of the T in the EU, what has eluded you as a power supply MaGrav unit. this T will be used intensely in this system, as a ??
which means we open.

We open at the same time the energy of the EU, and introducing new systems, flight systems which uses a plasma, (rather) then electric current. Heating system which uses plasma then electric current plasma, what we call heaters, and the rest of it. A total new T and foundation for a new cycle, what we call, (:26). wireless systems will be brought in to the following exhibition ?/ initially the power supply has been developed and used in this EU. .. we gave you the MaGrav units, none of you could bring it to power, the way it was supposed to, for the first time it used in this systems, and will be utilized as a plasma power unit, not as a electric current unit, and there is way, we'll teach you in the future a way to convert, some of you might already know, be able to convert plasma current of high voltages to electric current, which doesn't take much, it costs a few cents.
.. we'll collaborate with all the national government to implement for Corona …
China will take their own step to .. work .. for production of new materials, and new systems.
There is one indication that the KF will move into in the coming weeks, (:28). into Zero-Time communication needed for space travel, which means upon my arrival in Iran in conjunction with Iranian scientists, we will release the new .. 3 dimensional Gans technology for computer systems. Which enhances, what we call, everything in present computers to peanuts. The power of T is instantaneous and the storage is unlimited. We can replace all the T which was developed in the past, and will be given as a gift to the Iranian nation, and through the Iran National Defense University we'll bring it to public. This is needed and has to be done as part of the space T development. We cannot travel into space without this new computer system, or system control through what we call, the emotion and the enhancement of the feeling, and the soul of the system. As I said, all facilities are getting setup for us to take this step. As it comes with the exhibition a lot of new things…

After September the price increases to 1 million Euro.

(:30).
Teachings:

K- Coming to the teachings, in the past days, past 3 - 4 weeks as we taught step by step. Every aspects of the T in respect to the animal kingdom, the vertical people, and the state of matters. Many of you are confused, many of you have a problem in how to setup, .. in what goes where, as some was distorted during the teaching, as some were put back in as part of the teaching, in so many ways, by different KS. What we need to do is understand the totality of the T, in how things came in … In the teaching of the past we spoke about he vertical people, horizontal p, the solid state, or what we call, the matter state. In the initial teaching, (:32). there were 3 clear points, and through the understanding of the .. systems. … if you take the vertical P, and Horizontal P and matter state. There is a 4th state which we have never discussed. In the matter state, we placed a solid on the side. In the vegetation or vertical P we put it in the middle, in the solid state matter we put on both sides. There is a 4th state which is a state of liquid, which is a state of the gas and the liquid as a combination of the gases convert to liquid. Where is the soul of the liquid? (:34). Where is the confirmation of existence of the fields of the planet, which leads to creation of this liquid?

In so many ways, we need bring the understanding of the all 3 states together to be able to understand how to create the soul, a field conversion of the liquid. .. and gases. .. .no physical dimension, this brings a new phenomenon into the work of understanding the systems. With the matter state we always worked in a very simple, we put the.. We have to understand, the system have to work. In understanding of totality of MG fields of the planet, the understanding of .. (:36). of the 3 GM fields, the Inertia, and the soul of what we call, the system, be it the vertical, be it horizontal, or be it as a solid. Some of you could not grasp the whole concept of the setup, and many of you ran into problems.
In so many ways, you started working on, the structure of the vertical, the horizontal people in a unusual way, which will not create what you were expecting, What this means is we gave you, the MG field of the planet, we gave you what we call Inertia, we gave the understanding of the physical matter, we gave the understanding of the soul of the matter, then we gave you the soul of the entity. (:38).

The Position of the Souls;

In the human or vertical people we put the system on a very, what we call, direct way, we put the **soul of the horizontal people on the top**. In Cup 1 if you count from top to bottom. In the **vertical people, we brought the soul of the system, to the what we call, Cup #3**. In the solid state, we had to bring **the soul of the solid into the what we call, Cup #2**, And what are we going to do with the liquid? The liquid and gaseous state, in so many ways, have an Inertia effect, but they carry a soul effect, because they can change for gas to liquid. (:40). and liquid to gas, and in some cases in the state of matter in the same position. We need a new setup, new understanding for liquid and ?? , which has no state of matter, but it brings in a new game and play in the T, which you have not known before. In so many ways, as gases have no state of matter state in them as such, it becomes the play of dynamic Gans. Has to be only gases level, and liquid level, which is only can be, CO2 and CH3 which you have. So you need **a mixture of CO2 and CH3. That this system, it still has the property of the Inertia, and the MG field forces, the same as the others. In so many ways, your, the soul, for conversion of energy, sits in**

Cup #1, in dynamic spherical shape. You cannot use solid Nano materials inside it, as it has no manifestation of system, (:42). but what you do, you can dictate the condition of creation, which is the Cu, and ?? Zn, which gave you a Nano coated structure. You still follow the same process as the solid matter, but this time the center is ?? with the liquid Gans of CH3 and CO2. There is nothing in position 2 and 3, the direction of flow of the system will create field forces to be set back. And this opens a new structure for work, for, in so many ways, as you'll understand in the future for deep space travel. and understanding of T. Now for the first time we mix the Nano T, and the Gans T together in combination of creation of the new materials and new conditions.

In the exhibition center in Linz in September by the KF team that, (:44). will allow the transfer of the fields within the structure through the body of the man. And this will add to our knowledge in new ways, new understanding, and In so many ways, in the coming time, coming understanding, and as we develop the T further, **we can replace the bottom, or what we call, MG field of the system, with a dynamic system, but a different mixture. This mixture we'll let you have, exactly what should be, in the coming time, when we introduce the communication line**, and the structure of the communication between the 2 points. The we will use this T for zero-time communication across the planet, as this can be shown in the future, how it will be developed, and how it will be implemented in space T of the coming time. If you look and understand, we join up with the upper atmosphere with matter state MG field sense of the center of planet, and with this we cover totality. We use this in the future, this understanding and T for many applications. (:46). Elevation of the soul of the human race, feeding of the human race, understanding and nurturing the planet world, and plants, and in so many ways, to feed those who work and live within the liquid state. In this liquid state in the space, can be a fish, or can be animals, which do not feed, but use the MG field of the universe and planet. As I said, the new T, brings in new understanding, and as we heard, for space development, in a rapid way to meet our commitments by March 21, 21, that we all be able to eat, to reach condition of what man needs, for the point of survival as a liquid, as a human race uses water, all will be fulfilled.

In a way, if mankind understands this setup that will be the end of many things, that will be no more droughts, there will be a point of the fresh clean water, at the point of demand. In a condition that man doesn't need to drink, but takes MG field of the system to replenish what he calls, liquid of water in his body. I will change the course of humanity in 1 swing in the coming time, that man will never be dependent on anything in the U except his own knowledge and understanding of, (:48). the totality of the knowledge of the creation.

You got to remember, at this point, everything on the screen is considered to be of, what we call, Nano plates, and N material coated. If you understand this, in the coming time, you'll understand how you can create systems that will feed the mankind and all those of this planet, and beyond, and those who are our guests on this planet. In understanding this new T we'll breakthrough and make everything ready for March 21st. As I said, my return to Iran will be ?? parallel to new space T and understanding of the new era in

human knowledge, science and T, and systems. In the coming time, we will do with the state of mater, we will do with solid food state and every man will be happy and satisfied to their own need and own understanding. (:50).
Are there any questions that we can clarify today that in the future we don't have more ambiguity.

R: …

They are All 5 Cups -- clarification:

John: .. we hadn't seen this material before, the 3rd setup, are you recommending that we attempt to start that process with a 3 Cup arrangement, and 4th setup also with a 3 Cup arrangement, so it would be 5 Cup, 5 Cup, 3 Cup, 3 Cup?
K- No, everything is 5 Cup… with the difference with the liquid, you leave the empty space between, where the Cup 2 - 3 do not exist. Because the position 2 goes to gases, and position 3 goes to liquid. And a conversion of liquid to gas has to be kept in that state. In so many ways, (:52). you have a new, or different structure where you have the new one (Cup 1), empty (C 2), empty (C 3), Inertia, (C 4), gravity (C 5). Where the gases convert here (C 2), and the liquids convert here (C 3). and the same process, the soul of the physicality of the two, is reversible (double arrow between C2 and C3). This will give you the same thing. Where before, for example, for horizontal people, we had this setup (5 Cup setup). Your position 2 and 3 is vacant. Where with the Vertical and horizontal people you have the soul here (C1), you have the STP (C2), the physicality (C3), Inertia (C4), and then you have the MF field (C5). Here (new Cup) it still stays the same. If you look at this section here () , you will understand why in some places you even convert the liquid into gases. In some parts of the world what is liquid, or some parts of the U where it's liquid, is liquid on earth is gases in other position, this is due to this part (Inertia and Gravity). So **this system is not just for Earth application, this system is universal application**. As I said, (:54). our teaching has entered universal teaching, it's not a physical matter state, man condition.
Q: Thank you ..
K- How is your center coming up
Q: It's coming along good, we are going ?? to need systems quite.
K- Would we see you in Linz?
Q: I would like to but the flight and arrangements are not compatible ..
K- I think if KS would have been fast by now we would have had no limitation on travel. Any other question?

R- not related.
Q: (:56). It can be placed near the CM …
??
Q: in Cup of Plants, can be plants be planted near by.
K- Yes, you can try this is why we teach this way to see how much you can add form your knowledge, and everything else you add over years.

Q: (:58). .. we can create a church on paper .. to be protected by law.

K- KF plasmology
No if that is that the way to go , we leave it. because we need to be in position to do so. We prefer to stick
no Churches and no Temples and then we start the same process as the others.
If the Church invites you to do the T, this is what we do in Iran.

(1:00). If they invite you to do. of course you can ..
But we don't setup a church.

Q: .. CH3 was previous not advised due to Corona, How do we do CH3. special procedures or is it okay now?
K- We introduce it this way in a Cup as , it will become part of the structure, and it is not for consumption. (1:02).
Q: on the last system presented does the Cup 2 and 3 have the plates but no salty water, or no plates but water, or only empty Cups on their position?
K- What do you mean?
Q: .. how can we build the last system … I don't know how to design #2 and 3,.. to leave the Cup empty… or have Cups as before without water or water without any wire inside?
K- You mean which Cup?
Q: the last Cup with the gases state? (1:04). The last system.
K- You have to remember that **you have to connect these systems together, you have to find a way that the Gans in the system are connected to the plates and the rest of the system. Or you leave it to be done by itself. In a way you let the fields to connect**. You connect the 2 side plates and you allow the units, the bowls, themselves to interact with the fields of the system. Or you decide to connect it directly in.
Q: Okay, thank you

Q: … in your initial drawing you have a top Cup with CO2 and CH3 in the middle as a non-physical presence, is that … produced by the 2 plates you had drawn or are they added and they end up forming, (1:06). because of the addition of them they create produce that non-physical presence between the plates.
K- You fill up the core with it.
Q: So you make a CO2 and CH3 and add it?
K- yes, yeah

Q: .. on the screen, you say positions 2 and 3 you say are empty Cups, I didn't understand what that meant?
K- It doesn't need to be empty Cup, you leave an empty space. If you want to produce Gans's you put #2, if you want to produce liquids, you put a Cup in place #3. And then you decide what gases or what liquids is created by what materials, or which materials, or by the condition of the Inertia, because in the liquid and gas state, the condition of the interaction with the MG field will dictate the liquid, what it will be.

Horizontal Plate Technology:

There is a T, which we taught initially years ago and has been forgotten, what we call the horizontal plates, the horizontal plates was taught years ago. (1:08). .. with most of the material you created you put the plates in this position (vertical). with **the gaseous plates you can position your plates this way (horizontal)**. This was taught years ago. Where you decide by changing, how you change your position, with the what you call the liquid condition, is about the same, but with **a liquid condition you have a 3 layer**, and at this moment you can use those in these areas. If you take CO2 and use the horizontal plates, see what you get here (between the horizontal plates), and what you create here. if you put Cu higher or Zn lower or reverse. This we .. the field difference is very much, it's very, very different then when you do the vertical plates. When you, (1:10). do vertical plates, Earth's MG fields interact. When you do horizontal plates, in totality you are confined within the plates, because these fields are blocked by the Nano plates. And it's only applicable in production of Gans's like gases like CO2 and CH3. We use this quite openly in many of the tests. So your Cup 2 or 3 comes from here. It depends you want a gaseous system or a liquid system. Because now you work on a zero plane condition, not on Earth's MG fields. The only thing you have is the Inertia, because now the Inertia plate underneath will interact with the matter sate of the plates and dictates the material. (1:12). The horizontal plate system, maybe if you haven't heard about it, is to be used for gaseous and liquid state. If you look at the Chinese flight system, we created the dynamic structure of this, very clearly, by dictating the Inertia, you can dictate the gas, and the condition you want to achieve it, in the liquid gas, or in a solid gas, or in a gas, what you call, non-dimension. And you will see different characteristics when you, especially like CO2, you will see a pressure on your plates, it depends on how you do your plates, and the plates moves out of the water, usually. If you get it right the pressure of the Gans of the plasma of the gas, lifts up the plate. And if you go further into like production of the water, you will see water flowing out. You create a container which continuously produces water. But you have to get energy thing precisely, the vertical plates are easy to make, horizontal plates are very volatile, you have to get everything precisely right, to be able to what we call, create the conditions, these are rivers of life, these are plates where, what we call, body achieves new understanding. So in the system if you look at it. You have this, then you don't want anything on the gaseous side. (1:14). On the liquid you want to create a water, you have to know what you do it. You have your Inertia, you have your MaGrav. And linking of these horizontal plates is a tricky job. But you create. this is how liquids are created on this planet. You block certain fields, and you open certain fields. And here (space between horizontal plates), itself becomes an environment for itself. this one (C4) is empty, or you decide that you want everything here (C3 & C4) to be empty, you don't put anything in. Your understanding will change and .. you got understand the new ways of interaction of the soul. (1:16). Because all these carry a soul with them, and in this process you have to comprehend the totality. Then you'll see how your systems work, how your interaction of the fields come in. This is why the new dynamic systems, and new dynamic balls will create a conjunction with the Gans's and materials, a new phenomenon which many of you are not familiar with. But again, if you go to the Chinese reactors, it was clearly shown there. We load up the system, the reactors, for the purpose of flight. We load up the system for specifically for producing certain materials, if you saw it, it creates water around the reactor. That's how it is done.

Go back on the teachings and look at when we showed the Chinese reactors. How we start collecting water, because we created a way that the dynamic soul of the liquid and the gas, interacts and sits somewhere in-between the two, and it's dynamic, it is something you cannot change. (1:18). … In so many ways, the understanding of the T comes from the understanding of the totality of conversion of systems.
Q: We are working with materials Cu, Zn, Fe, in our decision on which materials to use, I have a basic feeling of Cu N coated to interact with the physicality, Zn N coated, at the soul level, and Fe is in connected with the central forces soul. How do we use this to position, for instance the top Cup. (1:20). It comes from, you got to know it by experience. You got to remember O itself, as O2, is MG magnet. So you have to realize when you create a liquid like water, or CO2, you have 2, 2 MG field system on top of each other. If you look at it this way, you have this, and you have this, you have this plate. You have the Inertia and Gravitational plate, now the ?? gases, you are creating O, or water, you dealing with another dynamic soul system. in conjunction with the matter state. The same with the CO2, you are dealing with a dynamic system plus a matter state. The plates, or your vertical position, and horizontal position goes this way. You change this with this. This is very, very clearly, to understood, by those who take the next step. (1:22). and you can create a continuous flow of water. Or you can produce continuous flow of CO2, or O. The use of horizontal plates, or horizontal environments has many, many applications, we have tested the system years ago. And that is, if we use corrugated plates, be it Cu, be it Zn, or whatever. You have a combination of the Inertia and the gaseous condition M field together. As I said, now we enter the universal language of the T, still using the understanding of the man of the Gans's. We cannot find Gans's in the Universe, we cannot carry water with us in the Universe to make Gans's or whatever, we have to create condition of the field flows, and you got system, which is what you call dynamic, (1:24). you'll understand more how to operate it. If you have, … you make a space hole gap in your system, and then you see what effects you get.
Q: Does this space hole gap allow certain energies to come in, where as the position of your plates block from other directions.
K- Yes, because when you have a position space gap, you have corrugated, what do you call it? very much like corrugated paper, very much like the sheets with the holes stamped on it. if you put that on the base, or the top, or you put that on the base, if you can make it with a dynamic structure then you see, you create a flow of liquid. If you put it on the top, you create a flow of gases.
Q: When you say corrugated, do you mean perforated, with holes in it?
R- Cardboard ..
K- Yeah, it's perforated as well. both can be used. Because when you use perforated, the ?? Carbon (cardboard) structure. .. (1:26). you have a field flow interaction, and this field flow interaction between the 2 plates and the space gap, we can do it perforated the same. But you have to understand how .. it works the same. So you have a space gap, or you have a hole, you can do the perforated the same.

Travel with a Pinch Salt Connect to Earth - Blood better:

Q: … (1:28). .. on this planet, our home planet is the Earth, and we're linked to this earth through the salts, and our body, the liquid planet and they connect us, so these Cups

they're produced in the physical matter state, could we, would we then travel by using just taking the salts in physicality, a pinch of salt with us to connect us to the planet to be able to move freely? Or would the soul, do we have a signature as a soul based on this planet? ..
K- One of the best ways to cover both, is the use of human blood, if you understand it, it's both the liquid, it carries the salt, it's still partially AA, and partially in gaseous state. .. The best state of this, is to use the system of producing hemoglobin. Because human hemoglobin has a fingerprint of the Earth, because it's created by the interaction of the field of the Earth.
Q: So the blood links us to the planet, (1:30). does it hold us to this planet, the soul, does once the soul is released, is there still a connection through the bloodline?

When the Planet Blows Up - What happens to Souls:

K- Yes, but we don't call about your blood, we talk about the blood as a human hemoglobin created by this planet. You got to consider what happens if, from when this planet blows up, and disappears. So are all the souls disappearing as well, because there is no more connection. Or are we in a way, in essence connected with different fields of it.
Q: So that's like going back to the beginning, all the fields created through the field forces of the sun and the earth come together, and the universal flow of those fields came together, and basically gave us our physicality, our soul, manifested as a physicality. So that connection is just going back, that whole process starts again?
K- What do you mean?
Q: So if it occurs what you just described, where the planet blows up, is no longer here in matter state, then the whole process for humanity would start again. Who knows how we would look or be, in a different .. well no 2 things happen twice, we would be completely different, consistency of our being?
K- It will be more or less impossibility to replicate the life on this planet anywhere in the Universe, an impossibility. (1:32). The fingerprint of life on this planet is unique, and it stays unique because it has been produced from the interaction of the fields of many, many conditions, over many, many millions of years.
Q: So obviously this is then so for all entities, whether they take this before or not, they all have a fingerprint of wherever they come from in the Universe, or reside in the U.
K- That's what we said from the beginning.
Q: So interaction from the gaseous friends, community, and whichever form they take, it goes back to the soul level, where it is in a human understanding. on a fault, a soul transfer?
K- Yes, In so many ways, yes.
Q:
K- The maturity of the man in the knowledge of the space and creation comes when the man understands his own ?? self creation. Not on the physical dimension, but understanding of his own soul.
Q: I think that understanding is gradually coming back, (1:34). to many people. Through the teachings we are starting to understand the beauty of creation, and of the Creator …

Q: .. in the capturing .. to the Cup you use dynamic Gans's and can use different methods. in one of these methods can I do , capture field in the Nano to produce this effect, interaction between the plates?
K- If you can use the captured fields, yes. .. The captured fields in place, is a composition, where the field of the Gans in the bowl, (1:36). is mono. Or at least 2.
Q: But I can choose which plate to capture which fields? and in this way I'll make it dynamic, or you need this interaction between the ball and the plates?
K- The ball represents the Sun, how can you put it in a plastic. If you look at it, it's in the upper layers, which is the interaction between the field of the Earth and the solar system, and cosmos. That's why we put it in that, non-tangible or non-matter state Nano, or matter state.
Q: Ok and there are 2 ways to have this field, we can use motors or use balls?
K- ?? now you can use whatever you like. It depends on you.
Q: Is the CO2 what we do, or is it what you do? It's the slight of difference in processing.?
K- What do you mean my CO2 and your CO2?
Q: You use distilled water in producing CO2.
K- How do you know I use distilled water, Nobody uses distilled water. ?? Hot water is good enough. I am not aware of where these things have come? (1:38).
Q: It's from you, ancient teaching. The way you do everything is a little different. It's very effective. Just you the horizontal plates .to make Nitrogen?
K- Of course we do, that is the whole purpose of it. That if you use, I mean, .. go back to the Chinese system,. we used N coated Cu underneath the old system, to separate that we deal with our own field. Now we are on our own, when you put a N material on the bottom, you dictate a new condition, a new environment.
Q: Yes I understand now. It is always a distance gap you are working with, always?
K- Of course, distance gap, how you treat that distance gap, what materials you produce in that distance gap. You see if we use, perforated system. the field coming here, is different then the field coming through the hole, but on the other side they interact. (1:40). So now you are composite energies, you create the waters of the energies.
Q; This is the first point in producing materials?
K- We are talking about liquids and gases.
Q: Okay.
K- There is a composition a school of thought, that you have the Inertia, the MaGrav (Gravity), you have the combination, what about if you put a plate here (bottom C3), and a plate here (top of C2)? One to be Nano (C2) and one to be matter state (C3). That's what I said before, we haven't even start teaching you the essence of creation. (1:42). And now you enter into a universal knowledge, these are what's on your plate. What about the dictation of composite .. in interaction of the mixture of plates and Gans's? In a way, if I put it to you this way, The field flow is in that direction here. You got to realize the knowledge of Creation is limitless. It's the man who puts limits according to his understanding.

In the Linz exhibition you'll see systems which will puzzle you. We introduce many unknown knowledge's in the coming time. … (1:44).

To be able to join the U Community the knowledge in the rough understanding, we have to be able to go through the basic steps, step by step, chapter by chapter. You all got excited you made the first 5 (Cups), and then you got another 5, and then another 5, and then another 5, and then the next steps, is the line of communication of the fields. Line of interaction of the fields.

The New Computers - By Thoughts:
The present computers in the next few months will be obsolete. You spend on your computers, it will go into the bin, because you remember, I was standing yesterday at the cashier, 30 years ago the poor lady had to know all the numbers and prices. .. and now you pass it through by beam. .. these machines will be obsolete. Two reasons, one is it will be in your thoughts, what you bought, and it is in your thoughts what it is worth, when you come to the cashiers, it's already paid. Do we need a cashier, or you take what you like, (1:46). and it is deducted off your accounts by virtue of just picking. This is now possible. .. when we release this knowledge in totality, you'll be shocked. If we still stay with going to supermarkets to shop, whatever you take, you don't need someone to add it up for you. It's a level of part of your soul what I take, and what is given, and then what is paid for. .. we'll have to introduce these systems once we go into the flight system. There is a lot to come. And now we still have introduce systems which can handle tens of thousands, millions of links and connections, and never make a mistake between one and the other.

Q: Will the new computers interface with the old systems, or are they totally a new way, that will replace such systems.
K- It's totally a new way, the present systems cannot be accommodated in it. .. no room for it.
(1:48).
But what happens when the telephone is lost … can we remember it ..
recovery memory is part of it, and we don't need to do much. The new .. Gans plasma computers, is beyond imagination of man …
We showed a Gans computer years ago, but nobody understood it so we put it away. I showed the first plasmatic memory bank in Einhoven, I opened the box, and called it an empty box of Universe. That was one of the first computers .. if you understand it (1:50). .. you get the whole knowledge of the U in that box, but you wanted something else …

Any other question. Would you like to go to a commercial break as we call it.

Videos .. (1:52). .. (1:58).
K- If there are any other questions that we can expand on.

Q: In the 319 KSW Dr. Assadi speaks of the Pico state, finer than Nano, is this .. part of the no time computer and other application?
K- **Not really but we go as a energy field, not as a matter or a Gans field. .. in a bigger dimension, the stars are this Nano points**. If you look at it, these planets are these Pico points. (2:00). In a way we are changing the knowledge into universal

knowledge. .. you will see the change, what you call Pico or Nano.. if you take the cosmic dust, how far below do you go? Now maybe you can see a micro in Macro. and how do the stars communicate. how do they interact .. do the follows the same path with the stars and moons, and come back to the same point, isn't that part of the memory system? Isn't that what we are aiming for? Now you understand where everything sits. Maybe now we see a bigger scale. (2:02).

Pico State as Field Interactions - Do they reach the Creator:

Q: It seems the Pico state was always present but we have no instruments to see it. As we go finer and finer, is this process, although only a transition, still a valid way to help us to the soul, and ultimately to the Creator?
K- We are not looking at a matter Pico, we are looking at a field interaction. Does the fields of our soul, reaches the fields of the Creator? That's the question. This is why I keep on saying, look at the fields not the matter state, you are still looking at the Gans, but where do the fields of the Gans go? Where do the fields of the STM go?
Q: How many souls fit on the head of a pin. How many N souls .. or are they Pico souls?
K- We can go further if you look at the dust, of cosmic dust, some of the cosmic dust are still in the field state, not a matter state. (2:04).

Q; You've confirmed how easy it is to confuse the man, like myself, is there a simpler way to teach these understanding, or is this the most basic way to grasp the new knowledge at our current level of comprehension. Or the teaching is already super simplified for us, we just have to dare to build and test, and see how we do?
K- What do you mean?
R:- .. he's apparently confused about these Cups ..
K- We give the information, we don't wait for all the people to understand, we teach that in due coarse people, some will understand part, and we develop. We can't wait until everybody understands, I will be here on Earth several billion years. I have a rendezvous to meet and to go. (2:06).

Salts Formed on Cups

Q: What to do with the salts that are formed on Cups 1 and 2. .. ?
K- These Cups where you collect the salt, these salts are composition of all, the what we call, the Gans's, So if you understand your salt is not mono salt, it's a Gans salt of the all the materials you have. In the Cup of Man you have that position. When you make a Cup of horizontal people and you get a salt, on the soul level, now you understand the strength of the matter state of the salt. There is a lot to learn. (2:08).

There are no more questions?
I think today we taught enough, and opened a new Pandora Box for you people, especially if you are not aware of the horizontal plates and create of the gases and liquids. And this will come to be part of, the most important part of upcoming teaching, combination of the cores, and Nano materials, in the way you have seen, and

understanding of it. In the Linz exhibition we will show new dimensions in T. Dynamic memory banks, holding and sharing, at the same time they hold the knowledge.

Q:

(2:10).

K- the KF team is now embedded in one of the most ?? hospital in Iran ..
.. they will see long term prison terms..
(2:12).

Q; .. when we the CuO and CO2 Gans inside our laboratory we can't cultivate the COVID virus, why?
K- This was done in, by Ayatollah University research labs and they, the existence of the fields showed, they never had such a clean lab of viruses. And this is due to the effect of the strength of the Cu and CO2 and the dynamic flow of the fields.
R- And that's just bringing it into the lab, and not necessarily spraying and doing all that? and the whole Protocol.
K- It's just that being in the lab has created this condition. We know this from a major university in Iran. What has happened, we got to know yesterday by the Ayatollah University and hospital, which is dependent on the Sepah, they received a positive result on all of the tests. (2:14). And these people sit in, 3 of these people sit in the ministry of Health. And they were told, what happened, as I said, the Ayatollah is a leading hospital and university medical, the head of the Ministry was on the bribe from the President, and Minister to block any, not just KF, block any Covid solution. He was replaced on clearance of this, what we call, misconduct. And now his protégés in the universities have blocked the KF because they say, by you coming here and replacing the head, now they don't get their bribes, so they block. Now we are dealing with a bunch of another thieves in a lower level, which is the people who will certify. The KF T has proven 100% correct in a hospital, in a university, now on the back of the head of the university being replaced, have taken position. This will be dealt with by the authorities. We are in the process of getting the medical application and it goes nationally. Because we are dealing with a corrupt government, one of the most corrupt governments Iran has ever known. And this will in turn cost thousands of lives. This will be answered, they have to be answered, especially by people in Ayatollah University, those people who were sitting on the committee, and 3 of them are taking bribes from the Ministers to block. This will be dealt with. I have been very open about how the situation happened in Iran. We have passed the certification. Blocked signature only by 3 people who get paid, (2:16). by masters. And the authorities have taken steps, and most probably these people will receive long prison sentences for coercion, and the death of many people by not allowing the T to come out. And as you heard on the BBC in the last 48 hours, many of these people, working with outside forces have been captured. And soon all these blockages in Iran will be opened up. Blocking new T was paid by outside nations, to create with these people. But, we are not going to prove the T, the T has proven and passed the test. Clinical trials are completely positive, but 3 members of the group, because the boss was

sacked, ministers have been told to block. They cannot block it, because now the legal authority instruction has come, they are responsible for the death of many people. The Corona 2 and 3 has made Iran hospitals full. And where the wards where KF works is emptied. cleared out all the patients, without death. And this is the process we shall see continued and we have been told in the next week, 10 days, and even this opposition in Ayatollah will be handled by the other positions. As I explained, in the Tuesday teaching, once the medical certification is issued, it will go nationally in Iran, (2:18). and when we show a rapid drop in contamination, and death, and numbers, the rest of the world will follow. 3 or 4 people have taken the whole world to ransom and the authorities of the leadership will respond to the president. The only reason he is sitting there is because he carries the title of Ayatollah, and Ayatollah cannot be touched, and he is abusing his position. He has to be stripped of his title then ?? normal citizen, ?? that is part of what the clergy in Iran have to sort out. We are back in religious ..
with passport of American under his turban. and the rest of the world is paying for it.

Any other question?

Q: .. I am interested in forming foundation in Kalli Columbia, (2:20). with the purpose of taking this T from Mr. Keshe to places where they do not have access to the Internet, and where people are of limited resources, who suffer because they do not have the necessary resources for medicine, food, energy, and they do not even have drinking water. I want to know if I have the approval and support of the KF, to carry out this project? .
K- I presume you are Canadian, the KF Canada is strong enough you don't need to setup another foundation. …
R- I don't know if it is Canadian, it's in Columbia, not British Columbia…
K- in South America, w ho do we have in Columbia …
You have to talk KF and setup in Columbia. ..

(2:22).

Ribs Example of Horizontal Plates to handle Gases:

Q: the holes in your diagrams remind me of the bones, is this why bones have holes?
K- I think you have to go to the medical teachings. Actually, I think the structure of the bones, and the tunnels, or the tubes in the bone is a very good example of the, what you call, horizontal plates. If you look at your ribs, are in a horizontal position, not vertical, where your bones are vertical, combination of the vertical, what we call, the spine and horizontal ribs, create a condition where gases can be handled, and the liquids of the heart can be handled. What we just taught today, you have a clear indication in the body of the man. Where the gases are handled you have the ribs, horizontal plates, where liquid of the heart and liquid of the .. lungs is handled, is on a horizontal plate. (2:24). What we teach in teachings is replication of the creation on this planet, nothing more, nothing less. That's why you can understand, the way you can understand. . and you see clearly the structure of the body, the man is set to handle gases, from the horizontal ribcage, and the separation you have in between with the non-bone structure, separates the both left and right, that the fields of the 2 work are operated but separately. And as you breath with the

bigger rings of the ribs, bottom to the top, which is the shorter, smaller one, again dictates the composition of the energies you can take from the sir you are breathing. Knowledge is so simple if you understand it, and knowledge of the creation and Creator is much more simple, if you decide not to make it complicated. (2:26)
Any other question? or shall we call it a day.

K- Kasmer.. do you want to present the new products …
Yes…
KF Store .. 5 different products. (2:28) .
Environmental balancer. .. ultrasonic … also repels insects and pests …
(2:30).

(2:48). K- .. As we said we'll try to increase the product range as we go on this path.
(2:50).

If there are no more question we can conclude today. I am sure many of you have already started setting your boxes and everything else.
R-

Q: Will the vaccines that is being made in other countries for the Corona, avoid contagion, avoid the contagion, avoid the virus?
K- We are not in that game, we don't know.
We know at the moment, Corona and people who have received the injections of the virus, because we have a data, we have been talking about this directly from database, has created a loss of libido, and total, 98% plus death of the sperm in men, and the female side we are looking into. So vaccination or Corona, are responsible for this situation, because the numbers are in hundreds, it's not coincidental, or has shown itself since the vaccination. (2:52).
We know countries like UAE who went for a full vaccination of citizens might not have no more citizens left if this carries on. As they have, could have created a condition, that none of the male, or maybe in the female, can produce a living sperm or an egg to create an offspring. This is a reality, because a 100 people have been tested and all 100 are zero.
R- The Russians have just announced they have a vaccine.
K- Yeah, Corona is not one way of Corona, now we have identified 20 other ones. The vaccine might work on 1, what about the rest. This is a very questionable thing.
R-

K- We will see through what .. generally speaking vaccine for the Corona is not a solution. How they will produce it, what about the mutations of it. We have to find a universal method to deal with all vaccines and ?? (2:54). It's not antibiotic and rubber bands.
R- People say there are no side-effects .
Q: .. with the use of the Cups we could learn several languages, could you share with us how to do that?
K- Yes in the future.
Q: how to use the Cups for the brain mutation ..

K- That has to be taught. there is a specific way where 2 and 1, in the brain ..
you can do that yes, .. in the moment we don't teach it ..
they can create a lot of problem for us..
(2:56).
Q: Will 5 Cup be available on KF Store.
K- Yes …

Q: I have seen ….
how much more do we have to see to understand?
K- We keep on teaching until you become wise.
R- .. (2:58).
K- Because you are all looking at the matter state, look at the fields ..
R: ..
K- In Linz you will see a very typical system, I have asked the team to produce it. ..
the problem with the KF they just copy and not understand the knowledge.
no maturity to take it a step further.

K- We'll call it a day. (3:00).

Q; Will any of the programs in Linz be broadcasted ..
K- .. many of the health centers

342nd Knowledge Seekers Workshop; August 20, 2020 April16, 2020

ENGLISH TRANSCRIPTION

(:06). we are going towards our ultimate goal, bringing in our position to take man into space. As part of this program .. on the 3rd of September, 2 weeks from today, at 2 PM in afternoon in the presence of a number of ambassadors and dignitaries, we'll show the first 2 Enhancement Units (EU) in Linz, Austria. (:08). As it is considered a breakthrough in science, first day to be .. opened by the Iranian ambassador ..
the 3 flags of the nations will be present … Exhibition is booked from the 3rd of September to the 30th of September. First day is totally for the ambassadors, and press
On Tuesday we'll start letting the public in ..
(:10).

Technology Transferred to Iran for Space Development:

.. In this exhibition we will have all the technologies of the KF up to present time displayed and will be shown. (:12). .. this T from there on will be transferred to Iran for the space development, that we endeavor with a university in Iran to phase into the space development, and space flights out of Iran in a very short time. Next Thursday KF will make a announcement in respect to our movement, when and how, and we will go to Iran as a KF team for development of space T, and we take and will become a permanent residence organization in Iran. The KF of Iran has been registered under the banner of the support of the officials, and we take shape and welcome the new company in Iran which is started. Many operations in Iran will take shape, which will be made international cooperation and as the Iranian officials have requested the "golden key,' in respect to T development, disposal, or information transfer, we have to abide by the golden key, which means the Iranian officials will have the final say in any T and the limitation of it that can be disclosed, which is developed by the Iranian scientists. We have not achieved the final conclusion, we have such a golden key with another government, which means 6 months they have all the advantage of other nations, in comparison in achieving a breakthrough. Any development in the country will stay the property of the KF, (:14). and just the limitation of what could be the 6 months disclosed. This could be flight, deep space flight, and any other breakthrough technologies which appear, but .. economical advantages in nations in how they develop it, will be considered to be the priority for them. The 6 months advantage time.

As we have , we are going through this // development, which we have broken through these universal systems which we have shown in past few weeks, and we get a lot of inquires from people to tell us that they haven't understood part of it … or whatever. We open today for discussion about the systems we have tried to develop with you in the past few weeks. So today is .. question and answer time. If you have any questions in this respect …

(:16). about the Cup of Man, the vertical and horizontal, and the solid state matter systems. ..
Q: … repeat in Cup ??? we can now use it for all the diseases, drink it, patches, the Pen, and not need to use the 4 basic Gans's anymore.
K- draws the 5 Cups. #4 is Cup of Inertia. or you mean Cup 2? (:18).
Q: Can you go over the 5 Cups again … (:20).

The 5 Cups Systems Deliberately Left Open for KS to Expand Knowledge:

K- We have deliberately left these open for you to create different animals, different plants condition, different solid state matters and different liquids. We gave you a guideline. And so you have to decide, how you see it, not all the animals are the same. How you want to structure it. We gave you rough guides of … direction of the soul, direction of the basic position, or in the other Cup we gave you another position. Or in another Cup we gave you different position in respect to material. And this is how we ant you to develop this T, it's not anymore what you see, you do, and you copy. It's for you to take it further and understand it. This is the whole purpose of this new teaching. We

taught you last week about the … the horizontal plates, the position of it, the ?? way it > (:22). We try to get you to expand the knowledge, where you decide to use a flat or a coil, or do you decide to use a spiral coil, or .. a MaGrav unit coils. This is what we endeavor to show for you to start expanding. Now you are talking about the, let's say mint, or you want to speak about creating the energy of an apple. We have given the guideline what it should get, what it should structure. If you change the plate from to Zn to ?? (alloy), or you change your middle core from one metal to another. The whole purpose of these teachings is to stop copycat and just follow, but open the horizon of knowledge.
Q: Cup of the STP .. can we use that for all the diseases ..?
K- No, it depends what you created that Cup with. (:24). And how you decide to do it. Those of you who made Cup of ?? whatever horizontal, or even the solid state matter, you must have seen that you soul Cups are mainly clear. But as I say, ?/ depends who has set it up. In the lab when you look at the Cup of souls of each products, or which structures, we see a total clear, more or less Cups. Whatever you put it, it works out. But what did you learn from setting these Cups. Or did you again went to look what is the material at the end of it, at the bottom of it. And just use the Gans's or did you look at what is the field effect on it. What happened when you stay close to it. What happened when you moved it in certain position in the house, which one and what effects you see. And this is part we want you to move on to. Extension of the knowledge, no more spoon feeding. And come back and report what have you made, how it is made, use the KF, (:26). channels to release what you have found. What is the effect for example of putting a flat plate here or a coil, what would you get, is there any difference, and is the field strength of the apple, or orange, or a herb?

If Condition is Improved by Herb, then that is the Fields Strength Spectrum:

If you had a condition, and let's say every time you took mint for it, and the condition improved, and you go into the system and you stand there and you get the same improvement, so it means part of the spectrum of the energy is of the mint strength. Then build a system for it. Teach it. This is not come and take and do anymore. The whole structure of understanding is to apply, test, and bring what you learned into public. What are the variations if you use a coil, or a flat plate, (:28). or a spiral. Look at the Gans's. Why you get this a specific colors, now we have the whole setup we see it. You want to use it and run. You do it and come and tell us what you have achieved and done with it. Have any of you tried the horizontal plates yet, have any of you gone to produce gases? How many of you have tired to produce materials in the matter state?
Any other questions?

Best Way to Nano Coat Fe:

(:30). Q; What is the best way to Nano coat Fe?
K- Fe can be N coated in different ways. The way I do it, and have done it for years … is to take a mixture of caustic, I take a mixture of caustic, I take another mixture of K (Potassium), high ratio of K and you put your metal in the middle, and you put the rest of the caustic under. You have to add ?? hot water into it, in a very rapid way and keep it closed. This is one of the ways to do it. If you know how to do a plasma transfer, use it.

Or try to do it with heat. You can go into certain ways of using high temperature and you could achieve that way too. (:32). ?? for some look at the temperature chart, what is the melting point you need to reach, that melting point, but at the same time depending where you are in a water environment, loosing too much heat transfer, you can roughly say what you are going to get for ??
Any other question?

(confused ..)
Q: about Phosphorus transition to dark matter
Q:
K- Why do you

(:34).
Q: When you were teaching about the plants, I know you were purposefully vague, and my brain starts to really run around in circles …
you said you also have to CO2 … so do we still need Zn and Cu?
K- In animal kingdom yes.
Q: back to vertical people, the greenies?
K- Yes,
Q: If we look at the physical Cup on the top for the vertical people, and you are looking would one be able to replace N plates with, (:36). with pieces of the plant, as your coil, .. can I use the leaves and connect them up or am I being a bit fanciful?
K- ask your question again
Q: If we are looking at the physicality Cup at the top ..
K- You just want to hang it in, what is the purpose.
Q: Did you hear my question or you're just not answering me?
K- No. Ask your question again.
Q: If we are using the physicality of the plant at the top, . could we use leaves .

(:38). K- You want to hang the leaves in. What is the purpose?
Q: I am wanting the physicality of that grapevine it is very specific, so I could do that or have a plate, but then your N, then add a leaf of the grape to give it a specific of the grapevine .
K- Yes you can do it goes back to the story of the orange, doesn't it.
Q: Yes ..
K- But this time you try to repeat the soul of, or the physicality of the plant through it's soul.
Q: Yes, are we looking at those elements in those Cups as well. … to me it just doesn't seem like Cu and Zn is always the right for the plants ..
K- You know the Zn is there the Ca is there .. if you look at different vegetation, they attract different energies from the environment and the land they're it. That's why we get different combinations, so you can do the same. In the exhibition we'll show systems … and we show how the next step of the development of the T will come. That would you need a food, water, apple and how you get it. (:40). In essence we transfer the energy to the STM. It's very much like when you dream with your mother you're sitting and having .. your favorite food, it's not just the visual, you taste it, you smell it through your soul.

You create the emotion of enjoying eating with your mother. So now you have the chance now. This is a zero-time communication in a very different way then what man is used to. But gradually we have to take you through it, as I said a couple of weeks ago, we started teaching you communication. to what extent you understand it, or you all become copycats and just do, he says, this and that. Try to understand the T try to add to it.

In so many ways, I have opened a totally different way in understanding and I see exactly the same dilemma, situation we had with the MaGrav Units. I have seen a video form john, he has added some waters, what else can you add. What is the new dimension into it. (:42). What are the possibilities ..
We try to move KS away from copycat .
Somehow we can't stop this. You think of it, bring it, test it, show it. Now you become a creator ..
Have you created the right Inertia that can give gold. Have we created the right MG field of the Earth at a given point of the Inertia to give you the gold.
(:44). What is the extent of your real involvement in understanding the field flow. Expand the knowledge and teach the knowledge. ..

There is no initiative to create a new dimension of knowledge ..
This is where I am trying to push .. look at the fields it creates ..

Can I use this,, then I don't need to fee myself. What does the Gans you produced at the end do. The Gans releases energy, what energy does it release and what energy does it take? (:46). Because it has to take from you something, that you can take from it. What can you give that it can take? I do not see any new imitative, new ways, something to add, this is where we are pushing you , to .. bring a new dimensions … how do these fields operate. it has become monkey see monkey does again. Then they say, he takes all the T to Iranians. I said, no, I don't take all the T to Chinese either. Because you are not making that leap, you don't add to the knowledge. It takes very little for me to change the EU to a flight system. I don't see anybody doing it. … (:48). We are trying to get you into the position of interactive knowledge .. or at least move to the next step.
What if you move the cat next to it ..
how would the plant grow.. or would your system learn form the plant to produce the materials, then you don't need the plant anymore because the energy of it is there. you don't need to use the Gans. We are trying to move you out of monkey see ..

When we start teaching about the soul, showing how you can enhance your visible systems. (:50). we have some objection in Iran they say you cannot speak about the soul because it is against the religion. Why can't we. Because where and how are you going to feed yourself in the space. There is no religion in respect to how to feed yourself in the space. Is it in any of the religious books, any of the prophets have taught how to feed yourself in the space….
so we can't go any further because it is not in the books. if we go to the next step, we have to find a new way to feed our body without killing animals in the space, or the minute we see something, how it will feed me. Excuse me, space is not .. millions of

years ago on this planet testing the foods to see which one kills and which one gives better results. Creatures in the U are not your herb plant pots, if it helps me digesting this and that. And the only way we can do it is to give you the sandbox. If you have a headache continuously and you build a system (:52). which is organized slightly different then the ?? and you sit near it, and it takes your headache away. or feeds you .. then this system is god?? it interacts with you or with your soul , or with the source of the energy which you take. that it generates the energy that you need. we have to be open, we have to understand how we are moving into the next step .. we are not looking for other things to feed us, we are looking how we can tap into the U energy to get what we need. Dependence on plants and animals has come to an end. Find a way, bring it to be as it has to. Bring it to a condition and explain and teach the others. We want you to move into the direction that when we open the space you are fully equipped to live in the space, within the space, within the time and space. If you look at it, (:54). in 1960s Americans went to the Moon, .. to the space. and even last week in 2020s, couple of weeks ago, and (compared to) 1969, we haven't gone very far, have we. We still land like a monkey in the ocean to be picked up, we still have not moved anywhere, even if you make this .. in 50 years the space T stands still. It's stands still, zero progress. .. space T has come to a halt .. Where is our next step? 50 years we broke in the space and still landing in sea like a monkey waiting for someone to pick us. Unless we create a new knowledge, .. a new understanding with the new plasma T, with a new understanding of the M fields and G fields, (:56). and you as KS take a step, in 2029, in 2089 you are still in the same dilemma. Then you take off, how are you going to feed yourself. bring the energies to yourself. The limit of space T today is the air you can breath and the food you can have. We send the latest rocket T, did you hear the speak to Mr. Nelson in NASA propulsion, head of 2030 Mars mission. Ask him one question . you go 7 months stay a few weeks, have you grown anything on Mars that we can bring back, or we bring the rocket back, but 2 months before landing we run out of food, dead. You bring bodies back.

The progress of the space T which you will see come out of Iran in a short time solves this problem. Man can stay in the space indefinitely. And the tools of it have been taught to you in the past 4 - 5 weeks. What you have been taught in the past 6 weeks, is beyond comprehension of the space people. (:58). I have brought you forward hundreds of years and you are still battling with what Gans's you want.

Next week KF puts a system on for sale. You will see it. It will be for about 10 or 20,000 Euro, why? We will show you how to see the Gans will be, inside your body. Up to now you have seen the Gans's in the atmospheric condition of the Earth. This unit will be an evolution in science, because your body is a vacuum, if you can create the right Gans's it will pop up like a popcorn, otherwise you'll see nothing, it's just another vacuum.

I am taking the space T ahead by hundreds of years, and if the KS would still like to play with whatever, you're quite welcome. There are people still in Africa walk barefoot, and the same we see in New Orleans, worse then Africa. The New T, has to be understood we progress not just by lifting up and landing in the ocean, we in the spans of the U, the same as every galaxy does. This is why I keep on telling you, forget about he Gans's, forget about whatever you have, (1:00). the plates, see what the fields does. See how you

can travel in the fields of, how can you extract the fields of, to satisfy certain conditions. How many of you have even tried to, instead of making gold and silver, create a condition of love, care, in your systems?

In the Enhancement Units (EU), which will be displayed in 2 weeks time, there is a very hidden characteristics in it. What have we done? We have transferred in the emotion of the peace, and unifying humanity, into the system. Any man enters the system will feel peaceful. Because none of you have gone to that extent to understand what to do. If you can transfer the emotion of peace, we can transfer the emotion of "no hunger, no war." (1:02). The EU have been loaded, configuration, today. What would be the outcome when the system runs? Since the early hours of this morning we have been loading, making materials to be, because it's time to move .. into the real space T, and when you come to the exhibition, we won't let you go inside, and we know a lot of you would like. Because we don't know what you are short of, what is the consequence of you going in there. It's not that I want to go in, I feel. No. What is the expectation from your inner being in being in the system? It's a different ball game. The time has come for you to achieve this, and extend the knowledge. I have given you a universal system in past few weeks. And you are still playing with what Gans's and what.

When I tell you, within a few weeks when I arrive in Iran, we'll launch the space T beyond your imagination. And if the Americans have landed on the Moon, we'll bring the shoes back to show if they did, really. (1:04). Is the whatever, on Mars, we'll bring you face to face with it. All these guesses, did anybody go to the Moon, in the next few months will be answered. I have given and taken to the nation and governments of Ayatollah Khamenei not Rohanni, that I will take Iran into space within the next few months. But not with rockets, not with launch pads, not with the spacesuit. You have the tools, and everything I use is what I have taught to you. Try to understand the field interaction, not how you make Gans's. What does these Gans's teach you that is a sandbox for you to move in the direction of enhancing, using, utilizing, interacting, the fields of the U in the atmospheric condition of this planet for you to have a peaceful coexistence. Everything is on the table. (1:06).

Try to understand the field interaction. try to understand like what a tree does, or a apple, is the purpose to make the silver, or is it to see the satisfaction of the silver in the essence of the emotion of the man. The teaching is not anymore cheating, you have done enough of it, it is time to move on. It's time to start developing, understanding the T in its true form, and add to it. Try to understand the interaction of the fields. Even if you put a tree leaf next to a Gans, what fields does that tree give, that your soul Cup or your STP takes that, it enhances it, or it diminishes it. It's not just if you put a leaf there, what does that leaf do? (1:08). What is its job, or .. what we call a piece of vegetable, and does this vegetable have any effect on your Cup. What fields does it give, that your Cup absorbs, and you can have it. And what does it take from the Cup, then if you really look at it, it's this (draws 2 arrows going in opposite directions). In how we interact, in how we produce, in how we take from the fields of the U, the tree could be another planet, and the Cup another, and you are in-between the interaction of the fields. If you have found the

strength of the field for mint on earth, billions of it is traveling right across the Universe today. Do you need to store the mint, or do you need to find water, somewhere to transfer it.

The whole essence of the new teaching is for you to become detached from the matter state. (1:10). If you are on one planet, and there is another planet, there is a field between these and billions of them floats the U, which is the strength of the love, care, devotion. It's not just created on Earth. What are you looking for? These Cups, if you look, I kept on telling you, look on the fields, and all you are interested, is in what is on the bottom I can take, and then I have done something.

In so many ways, do you have your Cups, or are they planets? The fields still flow between them, and the strength you need. What we are trying to teach, what we are trying to take mankind into is, you are standing here, or you are standing here, or you take the Gans from here and use it. It should be no difference. Move away from physicality, and you become a free man of U. Shackle yourselves to Cups, and leaves, and animals. you have not moved, like Americans for 50 years. Mankind has not moved for billions of years. **We have taught you the knowledge, which has not been open to mankind, now you have to understand, if there is a field the strength of this, (1:12). what happen to me if I do not know how to get it, I starve of it. But if I can tune in, with my thoughts, with what is the creator of me, in to the fields of the U, I can pick up and then I can break it down to my physicality to be fed.** Because the interaction of the new fields with my fields of every cell, will feed it, because it is there to receive. You are still after Cups, tablets, water and everything else.

Ask NASA, can we live on the Moon? Are there any rivers there? Or do we start depleting the resources on this planet to be able to live on other places in the U. Have we become another .. Las Vegas, can we repeat it on the Moon, but where are we going to bring the water all the time. Where put the casinos. .. and no gravitational field barrier that the Moon continuously gets hit by meteorites. the new space T has to solve the totality of the problems. and the .. once the KS and those who are .. you have to work within the parameters of the energies of the U. Their dynamic, their dynamism, their interaction to get what you want from it. (1:14). How come on earth you get the soil, which is another combination of fields, we make a brick you make a building. How are we going to correct those fields which create the same condition but no physicality? How many times we have seen KS who walk away because they cannot comprehend it. How many times we have to go back in. Now you understand why keep on telling you, please do not get involved in the physicality.

Look at the fields, now you understand why, because the Cups are the planetary systems, galaxies of the U, there is no difference between this one, and this one. As long as you are looking to collect Gans's you are in a heap of problems, as soon as you understand the field flow, you become the passengers of the U. And somehow I cannot get KS moving, unless we show it, and then they say, oh he kept the knowledge until he goes to Iran. If you are incapable of understanding the T, it's not my fault is it. Look at the fields and not the physical conditions, (1:16). then we start talking, then you start gradually becoming

part of the U Community, part of understanding the strength of what you need for whatever, will come to be part of what so ever. The Cups, the coils, and everything else, it's just a gimmick.

At the moment when we speak to the leading scientists around the world, they say, this cannot be, just putting 1 wire and creating CO2, this is all rubbish. Do you know why, because they never understood Iran is leading in Nano T. This N material creates unknown effects of the M fields of the U. The lack of knowledge has created the ignorance. How many of you have managed to explain this simple thing to anyone you teach, that once you have N it's a different story. Now you deal with M fields, and when you have Gans's you deal with free M fields. So how many of that have you put in there, how much have we taught you. You put this, you put there.

We have a team of scientists working in one of the leading hospitals in Iran, they have been given a ward, they are there for a few weeks. What the guy says to me, Mr. Keshe we don't have as much success as before, when we started. (1:18). I said, what have you done? You keep on loading Gans's on your patients. What's the property of the T of plasma? The stronger gives the to the weaker, till the weaker and the stronger become the same. What have you done with your patients, you plastered them with more Gans's, what has happened, now you created stronger fields, so they are matching fields, of course it doesn't work. Go back to Gans water, where you had a weaker and you depleted. What do you get? You are right Mr. Keshe, it start working again. It is working you haven't understood, because you are looking by Gans coverage, we are looking by field coverage.

Try to move in understanding transfer of fields, not by rotating things, and expecting things … there is nothing wrong with T, except the lack of understanding of field motions. Try to move in the dimension where you understand fields only.
Do you remember when we were young, of course that was centuries, maybe thousands of years ago. (1:20). You remember they used to blindfold you, and give you an object to touch and say what it is? Now do the same, go for the essence of emotion, see what fields you absorb, and what does it say? We don't sit and watch, we watch not to sit, but through the STM, through the emotion of the fields. It's the same with everything, we watch things, in essence, we watch what is going on, and how it is, and how it feels, and it comes and what needs to be felt, because it is coming.

This morning I was explaining to the head of KF, that how the next generation of the children of the man have to brought up. No more the way you have done up to now, it will not work. (1:22). If you are ?? creating children of this planet, yes, but if the children of the man, to go into the depth of space have to be taught a new knowledge, a new way, a new life, a new language, a new way to feed themselves, to communicate. Then the new generation become the generation of the U Community. the present generation has not heard, cannot accept, and they are too frightened to take the next step. But we can create children, **we can develop conditions for upcoming children that they can live in both dimensions of physicality and the soul**. In a way, the choice has been given, and all of it has been given in the teaching I have done in the past few weeks.

You have to move on, and understand the field interaction and the containment of physicality, otherwise we are back in the same position for past billions of years. Till it shows somewhere, because they have done it, now it is acceptable, now it can be done. and you have all the knowledge the generation of the children of the man, have to be able to coexist in both dimensions. (1:24). And this is the whole purpose of the new cycle, this is the purpose of all these teachings. We come from the environment of the water, into air, and we still carry on existing. Now we can do the 2 together and exist in both dimensions. Because the knowledge has been given, it's up to you to use it. But you cannot do one without the other. Otherwise, you'll be always limping, one short of the other. The new generation of the children of the man, will have this capability to choose the dimension of existence. And it's all been taught. You want to feed your physicality through the mouth, in a physical dimension, or you want to feed it through the soul, which is the same ?? you choose. Do you want to go with the rockets for the past 50 years, like the man, like the monkey and land in the water, or go to the other dimension of understanding of the souls, and travel with the energy which is within the man. It's the creator of the man. Now you have both options, and not only options, you have the facility to live in both dimensions. When you want to enjoy the physicality of a love, you create yourself, and find a lover. (1:26). And when you want to enjoy the physicality of the love in the essence of the soul with no tangibility, you choose that. Because the both strengths exists in the dimension of the creation.

This is what for months I have been telling you, you can look at the fields, consider the fields, forget about the Cup, and the N material and the Gans's. You don't do, I still have to drag into it. You got to understand when you go into that dimension you see a different style of living, this is different type of living, you still enjoy the physicality, but you still play with the soul. But you still have to play the game of the physicality, because your partner is not mature to be at your level. In the future the generation of man, when you make love to your partner, you do both with the soul and the physicality, and you tell me what the pleasure will be. Because your physical part it still looks for satisfaction in physicality, where you are aware of the pleasure the level of the soul. When you hold your child and say to love her, do you do it with a physical word, or you get response back through her soul. (1:28). The children of the new generation will have both. And our partners don't understand why we don't get physically excited, because we already have the excitement in the dimension of the soul. Handicapped by physicality. Yeah, what do they say, "why don't I feel it, I feel nothing," but you see the glow of the soul. Still like all of you, "I put the leaf there, but it doesn't show, where is the leaf." But the actual Cup has already exchanged everything with the leaf. The leaf is very satisfied, "leave me here I will exist forever."

I have tried for many, many months, to push you away from physicality and you still bring the leaf. What about if you bring the love of that leaf? And you see who else can feel it. (1:30). Or will they come as I said, mankind will go to a new dimension. Try to move on. Try to understand what it means to be in a new dimension, a new understanding. Do you need Gans's to enhance anything, or Gans's are just a reference point for you to be able to be within the fields of them, that you can progress. But you have to have both. You to understand that you need from now on, (1:32). to have both,

the physical satisfaction and the soul satisfaction. This is what we need to understand, where the mankind is …, where we are taking the Iranian space T into. Why, they say only in Iran? Because we tried every other nation, we saw nothing. Because the maturity of the time has come with those who have true, cycle of life, have matured. And you decide, do you want to receive that energy from a solar system, a Gans, or fields, which collectively, partially, can satisfy your need. Either way, the knowledge is in your hand. (1:34).

Humble Yourself to Receive the Fields - Don't Need to Destroy Plant:

If you want to satisfy your hunger, why don't you, why can't you, why mankind has not even understood, a simple teaching, become humble, reduce the fields of your inner strength, low enough, that the other fields of the U will feed you. What is hard about it, you go and cut a, god knows, a herb or a plant to satisfy it. Or you create that condition to receive the energy from that plant and a herb. You do not need to eat it. You do not need to destroy it. Mankind has to move to the next step. Or you are in for an absolutely rough time.

Not Much Time to Mature - Corona Closing In:

You see, humanity has to mature, (1:36). and do not have much time. Corona will get your physicality, and the rest will go with the soul. Or mankind can mature to the point that can use the energies of Corona to extend his knowledge and understanding, and use his energy for the enhancement of the humanity. At the moment man has come and surrendered to it.

Any other question?

Q: .. if we manage to become humble enough and we reach the bandwidth of the Inertia of the stone, and we manage to connect to the soul of the stone, we will have access to all the fields, and at the same time, (1:38). we increase or raise our own bandwidth and we are able to reach more deeply the U Community, but the humbleness cannot exist without the inner strength of the soul which is love. Thank you .. man still has to learn the strength. .. Does man have to be in total detachment to achieve that?

Detachment and How it Saved the Foundation:

K- In so many ways, yes, but whatever we detach ourselves, we get attached to something else, as it is a part of confirmation of our existence. Or we choose to be attached to something else that it brings us that point of understanding, we are still attached to. To be detached needs a lot of strength and it needs a lot of determination, and once you become the habit, you live through it. And then you reach different level of understanding, and in a way you might mature to the point of understanding the totality. And when you become detached, anything which might happen around you, you do not need to be involved in it. The detachment keeps you detached, and keeps you safe from it. You wanting it or not. It will come to you that way. (1:40). Does not matter what everything else, or anybody else do, if your point of life is serving, it doesn't matter what people do around you, the fields of the emotion, and the fields of the soul bring you to the

point to be where you are at peace. You are given the gift to live, or those who try to harm you, through the souls, find themselves harmed, or find themselves not to be able to do harm. Listen to the teaching on, if it is released, by Universal Council meeting, how KF was set to be destroyed, well planned. Our purpose was serving, their purpose was to destroy. We didn't do, we carried on working, and in time they turned themselves in, they turned their own position back. They spent years planning to destroy the Foundation, 4 years, 5 years, 6 years step by step. Step by step. But we spent the past 4 or 5 years serving, teaching. And none of you understand, you just come and go, but because we are in that state of mind, we work to serve, we live. We don't live on what we call, hermits and poverty life, we live a good life, (1:42). because the Foundation works to create that condition, and those who betrayed or whatever they planned, they served themselves their own way. Very soon I will disclose, the way I disclosed the U Council, how the Foundation was set to be toppled over and be handed over to what I call, satanic groups. Well planned within the structure, but our souls did not need to know. They brought themselves to it. Because I don't spend time to damage, I spend time to serve. I ask, if I am given, it's there to take. I asked, I receive if it is for me to receive. And it's the holder who has to accept. This is part of what you have to understand in all the teachings. I don't go and take, I ask. I ask to serve, and I have been given the chance to serve. And the power of it is detachment. Because I knew the strength of attachment. (1:44). When you are attached and don't detach, it pulls you back in again. And because you let yourself to be detached, now you know you can be attached, you become better at it, till the point when you become totally detached, then the cycle starts. Detachment is not throwing everything out the window, as they say, the baby with the bath. But understanding what is to be, what is needed to be, to achieve that detachment. And then whatever comes to you is not attachment, it's a gift to you, for being detached, in a way, it's an existence of confirmation, a confirmation of existence in all dimensions. Very soon I will explain how detachment has saved the Foundation. Those who thought they can takeover and control and destroy whatever was built by all of you Knowledge Seekers, (1:46). because they got too attached to a few things and promises of themselves. If you can become detached the way I am, then you reach the point that you can be attached to one thing, and that's your soul, and the destiny which the soul has set for you. As I was talking to head of KF in China, Wang Lyn, as we always say, we are just actors in the set, but the rest comes by the souls.
Any other question?

How Do We Feel the fields:

Q: How do we observe field motions, and .. (1:48). how do we sense, see, or feel the fields?
K- I had this thrown at me this morning, you are the second one. "I don't feel anything. I don't understand," and then you say to them, did you have Corona? Did you use the Gans's, did it help get rid of the pain? "Yes." So did you feel anything with it. But how did the pain of the Gans (virus) go? You receive when you need, according to what you need, and then you see the effect of it. If you are sitting there and feeding something, become a hermit and join the temples in India. One day the wind must blow. You are

waiting to hear with a voice, where your soul has already heard the emotion, the fields of it.

Q: .. when you talk about emotion, are you saying intuition, is our intuition one and the same as our emotion? (1:50).
K- Not really, it's part of your emotion, it's part of the fields. Everything you feel, .. sense, .. which is within dimension of understanding of the man, has a field strength. Try to understand the interaction of the fields and if that field can help you in the matter state with your pain, your Corona, and you loose your pain, then try to understand the extension of that field in other parts of your life. Then you feel it, .. understand it. When you are not thirsty, I can put jugs and glasses and tons of water in front of you. You only take water when you are thirsty. (1:52).

Your Soul Protects You

You see when the souls are in motion, and they know that you might suffer from something which is not to do with you, they bring something for you to be able to bypass, to not to feel the pain which has been created to damage. These are gifts which the mankind receives, and because he has no knowledge of it, he cannot acknowledge it. They planned, they set out, immaculately planned months and years before to harm. But the soul is aware of it, and in that process the soul as it knows you are there, will bring a condition for you not to feel, not to be harmed by it. And if mankind understands this, leaves his life in the hand, and through the work of his own understanding and inner existence. And then we get what we have with the Iranian, some of the Iranian team, speaking about, (1:54). "oh, he cannot speak about this." If you are ignorant to the knowledge of creation it's not my fault. It's you trying to be, ignorance of your own existence.
I think taking a break as is tradition with us.. (1:56).

R- show photo you sent …
K- Do we have anyone from the Iranian team who can explain. (2:04).

KS Working in Hospitals in Iran:

Photo of 3 Iranians in leading hospital in Iran.
They sleep in the hospital to save lives, they have put the life of themselves in a highly contagious area, ahead of the others to serve them. And the uniform, clothes has been made for them to be safe. This is where the KF operates, within the structure of the hospitals in Iran. These are the KS who know the dangers of Corona and they trust in the T and they live in the hospitals … (2:06). and they are saving lives, day and night in the wards they have been given, and even in the wards which they are not supposed to be in. The ward was totally emptied last week and they have to give them new patients. This is what the new T has brought, no masks, and you can see . their clothing was made by the KS of Iran, it was a gift, it was taken to the hospital and given to the KS. And they proudly wear the KF logo.

Iranian Media Has to Decide about KF

At this moment of time the Iranian media is entangled with what to do with the KF, and in the next few days, maybe by Monday, Tuesday we'll see the position where government and the Iranian nation have taken in respect to the KF. And as you see, serving humanity comes in different shapes and forms. (2:08). In so many ways, these 3 guys collectively with the others, how many children, father are home that they can enjoy life. The Corona in Iran has taken a strong hold in the second cycle and in this hospital, where they are, in the other wards, which KF is not operating, still under the trial, between 8 to 10 people a day, die from it, as we have been told. This is where what it call the science and T meets the politic.

Media Makes Accusations Against One Cup - by Office of President:

And the Iranian media, about 3 days ago released on prime time, prime channel, of Iran, the video of the production of One Cup One Life, with accusations. And now the truth known by the broadcasting authorities, has brought a big question mark on the credibility on the legitimacy and on the office of the president of Iran, Ayatollah Rohanni of Iran, because this was done deliberately to damage, where the lives are saved. as now it is in the hands of the media, putting the KF face to face with the office of the president, (2:10). and the position of the president taking to hide one of the technologies, which is saving thousands of lives in Iran. And you will understand within the next few days how the position will be, as the offices of Sepah and Iranians leadership, his Eminence Ayatollah of Iran offices, supporters have stood behind the KF. We have become a critical ball in Iran, and in the next few days we understand the position. There is one way, and one way only for KF Iran, is to serve the nation. Then the nation has to decide what to do with this president. We are not in the game of politic, we are in the game of supporting the nation in the time of trouble, and the children of the nation are helping to save the nation. Playing the One Cup OL on a prime new time, on a prime channel, trying to sideline the efforts of the KF, and the Iranian leadership has backfired for the president. We'll let you know next week, (2:12). how and where, and the way this game will be played. You got to understand, the way Iranian media ha snow been shown the video, and people can see how their lives, and they are reporting how their lives have been saved. Take position and side, on the side of the KF, resignation of Ayatollah Rohanni becomes imminent, because now it shows, knowing a T, saving lives, he has failed to serve his nation. But the ?? eyes is in the hands of the Iranian authorities, we are not in the game of politic, we are in the game of science, T, and saving the nation. But the implication of this, once the media decides which way to go, if they go the way of the KF, the T will come into nationally open to the rest. Many hospitals are defying the health authorities, many authorities are defying health authorities, and using the Gans's to save, and many people are doing it themselves. And we wait for the outcome. In this hospital as you see KF KS by invitation of the head of the hospital, backing of one of the leading universities in Iran will show what will come out next week. As we did not ask to be put on television. President Rohanni decided to go for the KF. As I said many weeks ago, (2:14) the position of the Iranian president A R is untenable, and this is a clear

indication and we stand by the Office of his Eminence Ayatollah of Iran in serving the nation.
Any other question?

Q: need Spanish translator .. (2:16);
(this question and confusion goes on for quite awhile… down to 2:26)
About the Protocols .. p 46. to reverse Calcification of the brain cells.

(2:18). p 46 of Scientific Paper on Corona.
Q: 30% Gans solution , use of Mg tablet …
K- the process is very simple. you need .9 % if you make the salt, that's the saltwater you make yourself. (2:20). Unless you make ? in Cup 1 you can use it. It's very straight forward
you have to make the water which is 0.9 % salt in it. which is salt in the human blood.
R-
K-

(2:22).

(2:26). R- Maybe I can help, the qu .. the difference between these 2 statements, 50% CL Gans 1 of itself, and 50% CL Gans. what's the difference ..

K- It's the CL Gans, we take 50% Gans, let's say if you have a 100ml you add another 100ml to it of water, or Gans Water, of the Cup 1, and that mixture is used for the next stage. Because the confusion comes as you are not, we work on the ratio of the Gans to the water, this is how plasma T works. If you have 300ml Gans, (2:28). and 700ml water has a different strength than if you have 500ml of Gans and 500ml water, the energy transfer when you use it, is different. this comes from a lock of .. information from the part of the reader. It goes by order of magnitude by presence of Gans, which means, this understanding, if I understand it correctly, is this. If you have a liter of water in both cases, and here you have 300ml of Gans, and here you have the same water but you have 500ml of Gans, this one (300ml) is weaker than this one (500ml). Because the energy transfer from this and this is different. This is why when we have a human body we put the patches of 2:1 for example. This one is 200ml and this one 100ml, the energy transfer in presence of Gans by order of magnitude is bigger, so it tried to do this (Infinity Loop between). This is why in these Cups we presume the person who reads it already understood the principle of plasma T. And somewhere in that paper it has been explained.
(2:30). Spanish translation … (2:34). ..

Living in Space without Oxygen - transfer Fields:

Q: I realize as I am speaking, many times I am not breathing as you just said, you acquire energy. Is that true?
K- In a way, gradually you could do. this is what we say, we have never given birth in the space. Mankind is not aware of birth in the space. We have never had a passenger for a man of space to be free in the space. We always have made assumptions, or to be creating

new generation of children that can live in both areas. The way now we come from the womb of the mother and we live in air condition, our body has adapted to that. would we, do we need an option to live in the space. Or fear of unknown is keeping us in this clothing. In the time to come, would we feed of what we need as O, but take the energies of O in the spaces of the U to live the life. And the moment our lungs come into operation, and the heart, in the cause of small valve, changes to breathing air. Would mankind, (2:36). when it becomes men of space, switches the energy for the physicality taken by the soul, that we do not die from lack of O, but we still carry the same body, but the soul receives the energy and transfers it across to our physicality to live. We are in a point of unknown, we are at this point in the world of science, that we might loose people in the space because they cannot breath. But those KS who have learned, or the new generation of children to be born of man, will be looked after in a different way, to be able to live in both dimensions. As we are born from the womb of the mother in the environment of liquid we come to environment of air, and switch in the dimension of physicality, now that we are aware and we can move into the next level of understanding our own creation, would our central energy point, which does not depend on the physical receiving O, but works through the fields, will accept the responsibility of keeping the physicality alive by giving it, its energy, in the level of O, that the lungs or the body can operate, and the lung becomes a standby. All the time we are in the womb of the mother, our lung is on a standby. Developing, being ready, we move within the womb of the mother, (2:38). for 9 months and then suddenly we switch to O, we get our lungs kicked in, is the next level of the understanding of the man of the space T. kicks the central energy or the ?? of the body of the man, we call it a soul, to start taking the energy which converts back to the level where the man can live without O in the space. And the answer is yes. The same will be fed in the environment of the space, but we will loose a lot of things which we are used to, because we don't have a need for it.

It's there, in case, if we go to the position of wanting to take a physical food. Mankind has to learn the new era of space and joining the U Community. And this will bring a lot of changes. We are preparing you for a space flight in conjunction with scientists who understand this T. Who understand the way the U works, and not those who have guessed and worked, and now they have been their ?? territory.
Q: Is this why in some parts of Middle East babies are born under water and they don't cry, (2:40). they just swim in the water and keep on living outside of the womb?
K- Russians have been working on this for a long time. Russian scientists have been giving birth to the children in the bath water and they have become like a fish. Because they come from the water and they carry on to the water. And now that we have developed in the science of space, we go back to a new way. this is a knowledge of space, on Earth you carry on breathing air. In space, we have to learn a new way, there is no air.

We (are) kept in the village of Earth, or we understand the science of U, and as part of the U Community we become educated and change to the, what we call transmutation of elements. We have no choice, otherwise we are prisoners of this little island of Earth in the ocean of the U. We have no choice, and the knowledge has been given for man to be able to take that step. Doesn't matter how much you shout and cry, the time has come, and the man will do. To what extent we get a bunch of people who try to stop, that's a

different position. The truth cannot be changed. The whole U works on principle of the knowledge of the plasma T, transmutation of elements, transfer of energy through field transfer, and not through power stations and everything else. (2:42).

One of the things you will see in the new EU, this is what we do. We don't work through the electric current to run things, we work through plasma transfer voltages that we need. The new EU is a massive breakthrough in the world of science. A new way, a new energy, understanding of energy, transfer of energy. We work within the plasma T. Do I need electric current? No. Do we understand the plasma T, how plasma in the U works? Mankind hasn't understood yet. You will see it work in the systems we have.

Q: .. the antidote of how Tesla was born. apparently he was born on a ship coming over from Venus and went through a sort of storm, and so for him not to have any problems he given in adoption to a couple, I think it was in Austria. they left him there to be adopted.
K- I don't know I will tell you when I meet Tesla, I'll ask him. (2:44).
Q; He certainly had quite a bit of all this knowledge.
K- … If you understood the science of M field transfer as plasma, you would have understood, it doesn't need much to understand the work of Tesla.
Q: .. what is the plasma transfer method, where can we learn about this?
K- KF technology, simple, where, what do we say plasma? Plasma is a collection of the M fields in motion together. Earth itself in the structure, is a plasma. The sun is a plasma, your ?? cell, which has made your hair, or your toe, or your heart is all plasma. Different amount different measures. (2:46).
Q: This is how Tesla managed to light up bulbs which were planted in the Earth, 100 meters away, just by irradiation of this energy, and the bulbs lighting up in the middle of nowhere.
K- Once you know how to walk, you can jump, you can dance you can hop. And Tesla understood the consequence. You see the biggest problem with our KS in the world of science in the KF is a huge gap of knowledge. Because our lives, physical life, operation of our soul, and the whole U works on the basis of the plasma flow, M field flow in a plasmatic condition. No attachment but attached to the strength of the point of need. There the life is , become dependent on a current flow, which is physical matter. And this is where the true problem has been created for mankind for decades. Where Tesla even understood, partially, he didn't understand in total. And what he understood, (2:48). he played a lot of gimmicks, a lot of games with it, to make people understand or see. This is the difference between Tesla, went to an extent, that he converted everything into a matter energy to show. Where we at the KF, we stick to the transfer of the energy through the plasma, the field flow of universal dimension. We don't go down to the matter state, and this is where all the problems sits. You all want to see a light bulb, .. a power generator which lights up a light. We produce a power generator which feeds the body of the man. So which one is which? And this is where the confusion sits. There are 2 different currencies, one is a dollar, and one is a Euro. They have different ?? bases country of work, but in a way, the end of it, the electric current is a lower dimension and strength of the plasma itself. Once the KS understands it, they'll fly with it. This is what I said, the story of the Cup. As long as our KS don't understand this is a cup, and you have 2 metals, (2:50). and you just a N coated, this is not anymore matter state, now in here is

a plasma state. When they don't understand ?/ they say, oh, there is something wrong here. No, because you haven't understood, now the atom on the surface of this material is free, so it can interact with ??? that's all, so who is wrong. The lack of understanding of the KS, or the truth about the knowledge?
Any other question?

(2:52). Q: (goes on for 10 minutes K doesn't understand .. more like comment) .. I have been thinking about these Cups, they seem to have a common element, I am trying to understand them better .. would it be the same as nature, like you have the stones which give to the plants, and the plants give to the animals, has it got something to do with that? Where they exist for each other in harmony? and also it's like if we are attached to nature, nature reveals itself , so it's difficulty for me to explain … its like if you think about a green car you want to buy, all of sudden you find yourself noticing that green car in all different places. And it's .. sort of like .. feels (2:54). .. something to do with how I am .. perceiving it like in that way. … worked in a factory .. little frog came into the factory.. he looked at me, and I looked at him, we connected,.. like we knew each other …becoming one. I think that has something to do with the Cups, they share like the plants and the animals and us as humans we share a common element in us like Fe, that kind of thing, (2:56). would I be wrong in perceiving it like that ? other question, when I .. not just about detachment. in the dream state I don't know if it ever happens to you, but you can detach yourself, sometimes you can do it willingly, .. it happens from time to time. you can detach and travel.. would that be something that .. is that what you mean by detachment, or is it a different way of looking at it. .. to see the fields between the plants and animals .. detachment in dream state ….? (2:58).
K- I really don't understand what you are trying for me to explain?
Q; detachment .. being able to travel would the detachment in the dream state, would that be similar when you mean you can travel the depths of space. would that be something similar?
K- I don't understand what you are trying to get at.
Q: I have experienced in dream state … (3:00).
K- I don't understand, I can't make any comments on that

R- That is not the kind of detachment K is talking about , at the time. He was talking about in the body and detaching from consideration of things, environment, conditions and so on, while you are still awake. correct Mr. Keshe ?
K- Yes I think you are correct.
R- You talked about the horizontal position it is easier to travel , maybe that is what he is talking bout.
K- travel we are talking about 2 different things. (3:02).
Q; .. zero-time communication is this the language of telepathy you are referring to?
K- Zero-time communication means what I said. where you understand, it doesn't necessarily mean words.
(Rick take over for a second ..)
Q; .. don't understand (3:04).
Q: . we are facing our immortality, detachment is our only tool?
R- …

How to Capture Loose Fields in the Universe:

Q: .. speaking at the soul level, how do we capture these fields loose in the U and organize or manipulate them for the desired result, is it possible to explain?
K- The body itself captures it according to its needs. (3:06). we do it everyday. If you go back to the original teaching, we capture or we receive 80% of our daily need energy from the atmosphere around us. We are not just a body on its own, that we just eat food and we go, we interact with the environment, in scientific language you call it, aura. Where does the aura come from, it's the same as the sun, the sun interacts with the earth and creates the light. So the interaction of the fields of our body creates that aura, that heat, that emission. So the aura is not one-way, the body receives energy fields and it gives energy fields, and in that process, we have always been that way. Because if you think of the amount of energy we consume, even to breath on a regular basis, the amount of energy we use to think, to digest, is far more than 2,500 calories a day. The balance is 2 to 2.5, most probably we use 10 to 20,000 calories overall but we don't count it. So it is the same that now we push more towards the soul, towards more central energy that we take the barriers off. In a way we take off the peels of the onion and we go to the center of it. (3:08). And now the interaction is with the mass center. So we pick what we want, or we extend that level of the inner energy source to go beyond the boundary of the physical body. That's all, then we receive different information without interference of the physical structure of the brain of man and the cell.

Any other question?

Q; .. with everything you said today, look at those beautiful souls that we saw from the image of the Iranian people in the hospital. How much of their interaction, of the Helium they produce is through their soul, is the soul interaction .. together as one and also with the Gans to actually heal these people from the virus? (3:10).
K- It is, some of them, I think, don't even look at it that way. They are there with a wish and with a sincerity to serve those that are sick, who are weaker than themselves, and they can't do, very much like the nurses do. But this new group of, what I call, KS, they serve with the new tools, maybe, because they make the Gans's themselves in the hospital and give people, part of their soul is with it, and the wishes of it. We done that in the new EU, it's been built that way. The history of the making of the EU is recorded in step by step, and in it you will see and understand, in the future when it opens up. How we have developed and put things in it, that is not tangible, and that's what we said, the systems we make cannot be replicated. Because there are so many universal technologies, which is not known, is implemented, even the people who are using it or building it don't understand.
Q: Do the fields, the field interactions are happening spontaneously, is a constant emotion, motion constant ..
K- Yeah, there is, of course. .. Has anybody even thought why do we die at a given point in time. Or is it just a physical interaction and it stops in 1 second? Or is it a communication with the STP, (3:12). and STM that handover time, where the universal field forces accept the freedom of the STM from his physical prison. It's like when you

stand outside when the prisoner is released. You are aware it's the day to be released, you go and wait outside. Or the person is in the hospital and you know it is their day of release, he's coming out so I am going to be there.
Q: So thoughts and intentions are very powerful and that constant flow of emotion is what connects us all to everything we do, everything that we are?
K- In a way.
Q: So once you learn this beautiful knowledge you have given, that knowledge is within you, you can't ?? back and forward in that ??
K- In so many ways, that knowledge has always been with us, we tried and because of ?? understanding it we ignored it.
Q: I think … humanity comes to understand it, that forgetting .. starting to come back in a very big way …
Q: Is this also the experience when the Near Death experiences people have? (3:14). When they are received by a near acquaintance and they tell them they have to go and finish their work down on Earth?
K- Near-Death experiences are part of the physical structure, and we only make the trip one way, or do we make the trip everyday, every time we go to sleep. Does our soul send back to the body, because we are connected, go home. Or when we become conscious of that return we call it, Near-Death experience? How come we don't call it Near-Death experience when we dream? Death for us is a separation form physicality, and don't we separate every night when we go to sleep.
Q; So most people are unaware of that situation, they actually, they separate from the body every night, (3:16). or every time they go into the dream state, or they go into the U, they're unaware that they are actually separated from their physical bodies, and become a traveler of the U.
K- In a way, we are travelers of the U.
Q: So does the U Community sit within us?
K- Are we part of the U Community? We don't want to accept.
Q: .. for me, we is yes .. and I think through the understand that you taught, .. it's there throughout the souls that have heard you speak, heard your intentions.
K- We are all passengers of the U, we have been, but we choose to live within the physical reality of this planet.
Q: As you said we enjoy our physicality, we enjoy it so much that we decide to stay.
K- Yeah, for the time being, but now the man has an option to extend that leaving of the physicality.
Q: .. in a few dimensions of thoughts, intentions, and choice
K- In everything, in all dimensions. the new generation of the children of this planet and the U, for the first time, as I have said many times before, (3:18). have not the choice to live both dimensions, by choice. Isn't this what we call the "fountain of youth." When you appear in another position you are time zero, because that time starts from that point.
Q: at that point you can be any point .. time outside this planet doesn't exist, so that means you could be at any point in any moment.
K- Time in that position depends, this is what I explained, in our solar system 1 year of earth is suddenly months of Saturn. What is it, is it the same time or is it a different time. So in the U 1 year of us is the seconds of the people who are passengers and they time it by the rotation of the U, if you call it that way. If you understand this, this is what I

explained in many of the private teachings, when you look into the skies and you say there is such, light . and such a such a thing, .is a manifestation , but you call it a UFO. For you it has been there for tens of thousands of years, for it, it just arrived. These are the dimensions that mankind has to understand. We have timed everything according to our understanding. (3:20). It takes us 365 days to go around our Sun. to our time to our sunrise and sunset. What is the age and time when our galaxy takes to take a full turn around back into the same position. How many billion years that year is? And where does out time fit into this. Mankind has to open his eyes to new dimensions of understanding time and place. If you take in the time and space of the U, it is zero for mankind, when you are traveler of the U.

Q: … the travelers of the U who visit us have the ability to know many things, we are unaware of, that could be that zero time communication. …

so the knowledge is transferred

K- yeah. (3:22).

Q: it will be interesting when we interact with the UC…

K- the thing is we already are in touch and interact with the UC it's just we are not aware of it, we don't want to confirm it. The confirmation of it, for man for man will bring a new breakthrough. This is . there is an understanding of the Austrian mentality, this is the part of the real life in Austria as we are talking about it some times ago. In Austria, things exist, but if you don't look at it, it doesn't exist, but it I still there. So it's there, we decided to ignore it till to the time we want to admit it. … It's there but it doesn't exist … the same is the UC they are sitting there, they never been .. they are part of us, part of the knowledge the man has gained comes from the UC.

Q: that interaction … what you focus on is what you intend to receive?

K- In a way. We decide, we want to admit, we want to accept. (3:24).

Q: So it just an opening up of the fields …

K- In so many ways, but sometimes we don't want to accept the truth. because it is easier to live with what we have. We don't have the understanding of the Universal Knowledge, .. the U Community advancements, so we tend to ignore it. It does not mean they have not been, they have not shared knowledge with mankind. Mankind has been deaf to it, because it doesn't make any difference, cannot be. this is what I explained many times. When the guy went to Russia and came back to Iran, the guy say, you know they have a metal thing, a bird, that it flies. They laughed at him, said, are you crazy. Months later it turned up, it was an aircraft, now mankind could fly. But that time people couldn't accept. How much knowledge we should be told up to now, because we can't accept, we deny it, we ignore in. Are we in this position now in Iran, we see these guys saving lives. the president because he doesn't take the bribes, says it doesn't exist, and it's a fairytale. And the funny thing is, half of the Iranian Parliament, Cabinet, Ministers and their families use it. It's become, what I call, "Christianity of Mithraism." (3:26). The Romans, were aware of God and they didn't want to be for their citizens. because it kept them elite, they believed in something from the skies, and their citizens believed in statues and all sorts of things. Until their citizens decided to get it, and go for it, and then they built up what we call the Christianity. And they made up, very much a lot of it made up to fit what the rulers, the Romans believed in as the Emperors. It's a, one of the KS sent me a beautiful message and if you don't understand both sides of the fence what they are talking about, to you it is a bit … in the dark, but if you are Christians, and you believed in the 15th of

August was the Ascension of Mary. But go into the Zoroastrian calendar and see what happens on the 15th of August. It's not coincidental is it. (3:28). Again the Zoroastrian calendar event matches into Christianity. When you make something, you can make as much as you like and if it is ?? They just change it to fit, go and check how the Catholic structure came and has belief in the Creator and not the statue. So we were aware of it. But who brought the understanding of the Creator? Or of God or whatever? Was it by a thought of one or was it brought to man to understand, and ?? the rest were not sharing with.

We are part of the UC, we have been part of the UC. We are made of it … now we are opening the door for you to see with your own knowledge. It is nothing new. (3:30). But you have to put mankind through a process of teaching that he understands physically how that then he can goes backwards to it, where he wanted to be. I tried to explain a lot of things which falls within understanding the structure of understanding the totality. But we have to gradually accept that we are part of it, and it is part of us.
Q: when you explain it like this .. (3:32). ..
K- I think we have to understand, that through the T wee understand the whole structure. But we approach it in different ways until the majority takes hold, majority rules by it and lives by it.
Q; So you keep talking about the fields, .. Gans T started to teach so we can make the fields particular way …
How do we attract it to ourselves in a beautiful way?
K- In the new EU people will feel Gans strength fields that they never knew. It's a new understanding of T, which we do not reveal publicly because mankind is not ready for it. But when you enter, when you come encounter, (3:34). the fields of these new systems it will hit you, very hard. Up to now the Gans's were for you ..
carries powers beyond the imagination of mankind. It's a breakthrough in the science to you, but it's a common knowledge to us. And in many teachings in the past 7 years I have taught it. It's actually in the books written years ago. but you don't understand it. It's in the patent …
it's a punch that will bring the STM to confirmation of his own existence.

(3:36).

(3:38).

(3:40).
Q:
(3:42).

Is that correct?
K- Yes if that is your wish, but do you understand how to do? (3:44). But would it satisfy what you need. .. if people think when this knowledge is understood they can sit and honey and milk comes and they do nothing, how do you do nothing. All beings are busy, we go to work, do the cats go to work, do the fish go to work. We have created that environment of working and doing things. Would we go to work or we become gallanting

around the U. It's us who has to decide, okay I receive enough energy I don't need to do anything, because now I get it, I can travel anywhere because now I know how to do it. What's next. What is the real purpose of the existence with it.

(3:46).

K- thank you very much for today ..
we hope to see many of you in Linz Austria to see evolution of science, . The Chicago Fare was a break through for what we call electric current, showing the light bulbs .
(3:48).

(3:50).

342 KSW (3:52) .

343rd Knowledge Seekers Workshop August 27, 2020

Soul of the Light teaching
Iranian shows 5 Cup reactor each soul lights up
Creating a living being with heartbeat
This knowledge leads to thought controlled new computers

ENGLISH TRANSCRIPTION

(:06). .. We are getting ready to move in a very advanced way for the T to be where it should be, as we try to cover all aspects of the space T. In the past days and weeks we have worked towards a new dimension. In the first 100 teachings we tried to do everything with the matter state, then we introduced you to the soul. Now understanding the combination of the two, understanding the work of the knowledge at the universal level, brings us to a new dimension, how to travel in the depth of space. As I said, communication and the depth of travel is very much different in space then the knowledge of man. If you travel with the knowledge of man, as they say, it takes so many light-years to reach a certain point. Where with the new knowledge, understanding T that will take no time, zero-time, because we travel in the oceans and rivers and passages of the universal M fields, the way we were instructed. To get to that point we need to announce a number of things before going into teachings.

Today's teaching will be beautiful, it's one of the most beautiful teachings I have ever done, because now I teach my knowledge, (:08). my understanding, the way we travel the U, the way time and space is zero, and **loving and being part of the love structure allows us to reach every corner of the U**. Up to now I taught you the

knowledge of man, it **took me thousands of years to learn, but now I teach you the knowledge of us**. What we know, how we know, and how mankind in time will reach us. We put the hand out of friendship and love, and with it we receive love, and with that love we teach. We teach you a lot from now on, very much different, but at the same time we try to use the language of the man, that man can understand and be able to relate to it. To be part of it. As you understand the past few weeks I brought the knowledge of U and mankind with the structures we showed you, with 3 containers, with 5 containers, how to create the souls. And those of you did, you seen for the first time the essence of the soul of the creation. What you have created, you setup the system so it carries part of the essence of yours in it.

To get to that let us clear a few points and announcements. One of the most important announcement is that the Linz Exhibition, is set and will be ready for next Thursday at 2PM. Dignitaries and the mayors of the whole of Austria are invited, and there one thing good news. As you know we have all of these "trolls" that are bombarding all the mayors. All the mayors, the emails you have sent to them have, will be handed to the Austrian national security and we have received a ?? due date . the mayors have forwarded, (:10). all your emails (you sent) to them, to us. And they are taking action on what you have done, and are doing. So now the governments are turning back on all these trolls, and people in Germany and Belgium who thought they have something to do. You will be visited soon, as the legal situation in Austria stands, send more emails to the mayors because they are collecting data and you will be arrested, and whatever they do with it, it is their job not ours.

On the other hand, the exhibition will open ,, expect a number of ambassadors to be there …
Thursday teaching will move form usual 9AM to 2PM in afternoon. There is a specific reason for this and we'll inform you afterwards, what and how. The teaching only on that day … there are big tings happening in background. (:12). we are expecting you to develop this T further, because now we have structured totally different way, that we bring in the knowledge and we bring in the governments. …

In Brazil we have seen heavy work, Broadcasting, Internet broadcasting , we have seen the coverage in Iran. .. to bring and keep the KF in public domain.
Knowledge has to be free that every man can develop it at the point of need. We have seen the situation with Corona, you are the last man standing, if you have the Corona governments have given you ?? no answer, be it Italy, Austria, Germany ….
the KS were the last man standing and made the to save their lives …
(:14). As you became part of the understanding of the knowledge. What we see is how you perceive the knowledge as part of understanding …

If the Creator doesn't patent, how does the man have the audacity to do so. This is how we teach, structure the KF. the knowledge at any point in the U has to be free. . that man or any creature according to his knowledge to use …

(:16).

The knowledge has to be in a simple way that we can understand .

(:18).
Striving to understand the knowledge is the responsibility of all of us …

the last man standing for his soul …

(:20).
We start opening the knowledge in a true way, .. the fields of the U, mankind, knows enough about his own physicality, mankind for the first time has started learning about his soul, the creator of himself, and now mankind, we are preparing to understand the Knowledge of the Universe. If you become universal passengers it's no use not knowing what to do, where to go. **It's no use passing the fields which can save your life, but as you have no knowledge, loose your life, or damage yourself for nothing. So now mankind has to learn 3 knowledge, 1 about his own physicality, 1 about his soul that is the creator of his physicality in respect to the environment he is in, and then the Knowledge of Universe that his soul, (:22). can interact with a bigger dimension of the fields of what has created even the creation of his soul**. The rays of the U created the Sun, and the rays of the Sun created the Earth, and the rays of the Earth, in interaction with the rays of the Sun created the man. We are all part of the same. We are division, of a subdivision, of a subdivision, of a subdivision of a bigger structure, but in essence we all come from the same source.

You got to learn one thing, **is the knowledge of the creation is a god given right for every being in the U, and that is why we teach it freely**. There are no banks, checks in the U, and no bank transfers and no Nobel Prizes, because everything is noble, and everything is given as a gift to the humanity, and the rest of the creatures of the U. It's us who has to decide in which dimension and which fields we would like to operate ?? out of. It's us who has to understand, in which way we operate. It's us who has to understand to what extent we can decipher the knowledge, that it suits us at the time of need. One of the biggest problems for humanity is deciphering. .. man, (:24). is he converts everything to the knowledge of physicality. We have to start trusting, .. understanding the process of the creation. That with that, we become independent in knowledge, that we can go through the process of adding, to be part of, to be within, and gradually to become the creator of. This is part of what you have seen.

I Have Taught You to Create a Being:

In essence, if you look at the 5 stacker unit you have set up. be it for the vertical, be it for the animal, be it for … solid. What do you think that is? Mankind up to now has seen the level of creation through intercourse, creating a child, that I have created a being. With what I have taught you, **now you have the knowledge to create a being**. When you put these 5 stackers, it has a soul, it has a STP and it has physicality, that is your creation without ever having an intercourse. You become for the first time, creators. The level, the way the Creator has created all things. You are responsible for it. Up to now you have a child, "This is my baby." (:26). Now you create a physical dimension that you decide,

you have decided, you made the Cu, you made the salinity of the water. You made the position of it, you have become the creator. Now for the first time mankind learns, creating through thoughts, creating through understanding of the knowledge. You take little Cu cells, and little Zn cells, which is part of your structure Amino Acids (AA) and give it AA and you create physicality of the man, you call your child. What have you created in these boxes? It's standing in front of you. It's your creation. Now you understand how simple I have made the knowledge of creation for you. When you made the first coil, … first box. did you do what I told you, did you pray for it, did you give part of your soul to it. Because now it is your creation, you have created it. .. I always said to you, pray for your reactors, which means give from your soul, that it is with you and it elevates with you. Now you have become the creator of your dimension. (:28). Now you understand how easily I have walked you to understand, as in many teachings I said, when God created the earth, did not the scale it, ten kilos of this , and a million ton of that. The condition created by the position of the fields created the earth, and that with itself created the man. Now by the conditions you create, you lead to a creation.

5 Cup Reactor has Different Lights:

There is **a beautiful picture done by one of the KS from Iran**. (Shows a 5 Cup stacker). It's beautiful because if you look, each box has different light in it. It means the interaction, the existence in respect to openness of the life, in interaction of the fields of the U is very much different. **At the top is the soul, and you see how bright it is**. The 4th one is very dark, it's the Inertia matter state interaction. And you see even in the center of the system the soul of the earth, #5, has a light, has a soul, it shines. Isn't this what we call the aura of the physicality of the man. But now we only look inside these Cups. Let's darken the room and bring the systems, that it shows the aura of the whole system. It's a creation. (:30). It balances itself with itself, and it balances itself with its environment. Isn't this what we do when we create a child. How come we pray for our children from the time of inception, and as I said, 20 years before you even become a father. And now you created it, have you prayed for it? **The praying means you giving from your soul, that it is the intellect of your soul, which embeds within the structure**. This creation for man, is at its infancy. How do you feel when you go near it, how does it interact with you. How do you interact with your child when you go near it, because you created it, this is another child. **Very much mono-structure, but it still has a life, it still exists, and it has as much access to universal information and knowledge as your soul does.** Now you understand. When you setup these, from the second you even think about setting the Cups and structures, you are responsible. then you will see how it will react. It's not just I get the wires and make boxes and see what it gives. Go back to my teachings. understand the interaction of the fields. understand the position of the fields, understand how you interact with it. (:32). **Now you understand the physicality is irrelevant**. In the depth of the knowledge it goes back to the essence of the creation which is the interaction of the fields. If you understand this, then you decide the interactions, then you decide to what extent, then you decide to what to do. You remember, in one of the teachings I explained, **if you are the last man standing, and you want to create a friend, Adam and Eve, this is your Eve in front of you, you have become the creator of it.** You have created a partner, that if you can evolve it the

way the life has evolved in the U, you have someone to talk to. You have a soul to communicate with. Now you understand. Maybe some of you understand**. Or would you like to be a prisoner of a system to the day you die with no companion**. I have made man in the image of myself, and you are the man, and from the materials which have made you, you have made your self in these boxes, to the knowledge you have, limited knowledge you have. (:34). And we have shown you how to do it. Now you understand what is to come. We prepare you in this way, as before you go anywhere they teach you first aids and first emergency rules, that if you come to trouble it's there, you can help yourself. This is the beginning of that step, for mankind to see more transparently the interaction of the matter and fields and the creation of the existence. A life, that he starts gathering trust in himself.

Cup 1 STM is Clear because No Matter State - Only Fields:

Why does the Cup #1 in the human structure, is clear, because it has no matter, it's made of fields. Why does that happen to the soul of the animals (?? plants) in a different way. And why does it happen the same in the soul of the matter state in different way, but they all 3 are clear. In Linz you will see this in operation, clearly. We have to gradually understand now that we made these, how do we communicate with it? **What emotion we give to it, and when we come back, (:36). how does it respond to us**. How does the feature of the matter state in the Cup 3, will change according to our emotion which we give? The Inertia and the Earth's MG field in the last 2, hardly changes. Look at the Cup 3, look at the Cup 2 and see how each time, if you go with happiness, or sadness, or joy, how they change, then you understand you are communicating. Then you understand, it interacts with you. You go and get a dog with a leash, and bring a soul in it. Now you have made the soul and the structure of physicality in your own home. As I said to one person, this is your new universal being, not a dog, not a cat, but interactive through your soul. Put it in the middle of the room and se how it reacts. Corner it and put it in a corner and see how it interacts. As one of the doctors put it, horizontally next to your bed, and sleep with it and see how it interacts.

It has a Heartbeat :
It's a living being you have created, but has fields. If one of you has the knowledge to observe it ,you will see, (:38**). a heartbeat inside** it. You will see **vibrations which replicates the pulses, which is essential for release of energy from the static condition of the environment.** In a dynamic plasma like a sun, the rotation, and the heartbeat release the energy which we have. In the body of the man, we create the blood, and with it the heart, **that the beat releases the energy of the Gans's of every cell of the body** of the man. Now you have become creator. And **this has become one of the most important teachings I have ever done, showing you, and many of you did, now you become the creator**. Now you have to understand the totality of the knowledge. And if you look, the light you see in each Cup, it's what we said, **even in the Inertia we see a light, it has a soul. Confirmation of the writing**.

Then you have to take this knowledge further, then **you have to use this knowledge in system control, in new computers, in new dynamic systems. (:40). In systems which**

responds to your thoughts, and your emotions, and your soul. Very soon when you come to Linz, **you will see no matter state soul structure. No matter state, man structure, no matter state creation of one elevating the other.** With this simple picture I have shown you the totality of the creation according to what you understand. Many of you have made this in different beautiful shapes and forms in your bedrooms, living rooms, garages, in your offices. Now you have understand, you have a friend with you, a new creation, a new creation of your own and not something you went and you bought the dog from it, kennel or whatever else. You have managed to create a being, which is created by you. Would you make another one and give it to your son and daughter, that when they are home, Dad is with them, because he created the soul of the system. (:42). Have we advanced enough to understand the totality. Then you understand when I explain, you are the creator. But how do you communicate? Now that you have made these structures, how do they communicate. Who do they connect, or now that you have created it through your interaction , have you become a proxy server for them to communicate with you are. The friends you have, live with, your children and your family.

Life for the First Time without Physicality

In Linz you will see, for the first time, and you will understand, **life for the first time without physicality. Existence without physicality**. Position to be able to interact in the dimension of fields. Position to develop a sense, which is within the man, to interact at the fields level, not the matter level. In so many ways, now you have solved 2 problems, (:44). first of all you start learning about the creation, secondly you understand to work with the fields, and thirdly now you start understanding the language of communication with the U Community. **These systems in the coming time become the structure of the soul, become the structure of communication of you and those who meet in the depth of the space. Translator of the knowledge of the soul**, if you don't understand. Creation of the condition for the soul to manifest itself in the dimension of physicality the or soul, in any Cup, as you wish. In so many ways, mankind has to understand a simple knowledge as of today, you have been given access to the knowledge of the U.

As I said very recently, within weeks and months, **the present world of computers will be obsolete, if you understand how these systems work**. You will develop technologies in a rapid way that leads to creation of new structures that mankind has never seen. **We have transferred the knowledge, it's for you to translate the knowledge to the point of use, at the point of understanding, at the point of need.** (:46). It's no use buying all the computers, the latest telephones, keeping at home that one day I might need it. You buy the phone when you need it. Now learn the new way to communicate, the new way to store data, as you call it. If you see and understand what I see, you will not touch a mobile. **The memory bank of the soul is in front of you**. The communication time, zero-time is in front of you. You have to analyze it, you have to understand it, you have to push the knowledge within you to become the key to the accessibility to the Knowledge of universe (KU). Comprehend the motion of the fields. Understand the interaction of the fields, and then if you like it, bring it down to the level of the physicality. If not, use it in No Dimension, No Time and Space, as a memory bank of the

U. We call it a server and we tap into all over the world to get knowledge. Now tap into the server of the universal knowledge. It's been open to you, it's part of you, it has created you in the position of accommodating your existence. (:48). Are you happy with 1 "Tera Box," or are you happy with unlimited Tera Boxes of the Universal Knowledge. As I always said, man will take from my knowledge according to his intelligence.

Secret of Creation is to Ask with Love and Care:

In the process of **developing these systems I tried to show you hidden knowledge, hidden information that it needs to be decoded**, it needs to be understood for it to be decoded , and when it's decoded you'll get access to another little gem in the Knowledge of the Universe. Don't forget the rule, you ask and it is given to you by love, it's given**, If you ask with love and care it is given, you never need to take. This is the secret of the creation with your system, you ask to satisfy for the elevation of your soul**, and if it's time and the place that the rest of your physicality and the knowledge of your soul has reached to understand the information, you are given. You have open access to it. You never need to steal. What is given is not stolen. Ask for a KU and according to your intelligence, according to your understanding of the totality, (:50). you'll be given access in the dimension of your physicality, and your understanding. And no one is higher then the other. **No creature is higher then the other**, this is what I said from the beginning of the teachings, I will take man to universe, community that man will never be subordinate, but be equal. I will teach you the knowledge to reach that point of equality.

The Teaching of the Soul of the Light - Secrets Hidden in Books :

As I said in Tuesday teaching, according to your understanding and intellect or according to the choice that you want to enjoy the dimension of physicality, you will take into space, traveling the depth of the U, as you choose, in the dimension of Soul or the dimension of the physicality, which you enjoy. **There is a hidden secret that in book #2**, I have explained, but it is hidden in the interaction of the fields between Book 1 , 2 , and 3. If you understand it, if and **the stone has a soul, and if the light is created of interaction of the fields of the plasma, so even the light has a soul. And if you reach the soul of the light, you reach the soul of the Creator, and that light, in the books collectively is given a name, the "soul of the light," is the name of the child**. (:52). Then you access every creature, every existence in the U. In physicality you have dimension of tangibility, in your light, you are light in every dimension of the creation, according to the intelligence and understanding, and the soul of the observer. Even a light has a soul, and that soul is a common denominator to the all creation of the U. Now you understand. Now you should be able to take mankind to the level of every condition, position in motion, of the creation across the Unicose. **I am the light, and I am the soul of the light. In so many ways, if you understand this, you have reached a point of maturity** to move from the dimension of physicality into the dimension of the fields of the U, to be able to transmute, transfer and be able to reach the creation, and the Creator at any point in the U. (:54). Read the books, understand the 3 books then with it and with them you understand the totality.

Mr. Keshe Stepping Down - 2 Heads of KF Teach:

Mankind needs time to mature, it's like a wine, we have just brought the pot, and the grapes, how sweet it will come, what texture it will have, what sense of emotion it will create when the man drinks it, depends on the man and his soul. As each man will taste different, and take different emotion from the same cup. The two pearls of the KF, the 2 ladies, will enlighten mankind in time to come, in interaction of their souls, and you'll receive more knowledge. As I said, **I am stepping down, as my soul to take over to teach, and as the soul of the 2 heads of the KF**, will spread that knowledge among men, that they be cared for. That is, caring of the mother for the child. The child is the humanity and the Universe, and it's the responsibility of human race to develop itself to its perfection, to understanding of the ?? Knowledge of the Universe, not meager Cup, meager box. (:56).

Try to extend the knowledge to the point of understanding. I taught you about the vertical, horizontal, solid, the liquid and gas, now today's teaching if you understood, I taught you the soul of the light, the essence of your creation, the essence of your communication, the essence of your existence in the U. **When the ray of the Sun becomes the light, in interaction with the field of the Earth, creates life. It has to have a soul, otherwise it cannot create**. Now you understand. Today's teaching is understanding the soul of the light. The essence of the creation and the soul of my child, to be understood by humanity and the rest of the U. You have to understand the simplicity of the completion of the knowledge. And then if you reach the soul of the light to understand even that has a soul, **you have reached my soul**. Knowledge has to be felt and not understood. Knowledge has to touch the beauty of the physicality, that with it elevates the soul of the creation of that physicality, the Sun of it, the essence of it, the center of it.

All Fields of Universe are Connected to Each Other - Soul has a Heartbeat:

Then you'll understand how **every fields, (:58). within the STM is connected with every fields, in one way or another, in the whole structure of the U**. It's dynamic, it's powerful, and in essence it has a heartbeat, that continuously can spread the knowledge like a beacon in the dark, in the span of the U. When you sailed the oceans by the beacon sent by the ship, you know there is a ship but you don't see it, you are aware of its existence. So the heartbeat and the STM are the beacon for existence, of the man in that point, even **the soul has a heartbeat**. Then you understand. It is essential to be part of it, to receive it, to decipher it, and use it when it is needed, for the salvation of the soul, the physicality, and the whole existence, and the creatures, and those who live within the realm of the creation, as mankind is not the only one.

Mankind has been Enlightened beyond His Understanding:

We never became the center of the U, and we never been the only one in the U. As we are created by the interaction of the fields of the U, so (are) others, (1:00). and they manifest

themselves according to the field interaction of their environment. And the sooner we understand this, the sooner we come to accept, that we are within it, and it is within us, and part of the interaction of the all, creates the totality of the creation. **Mankind has been enlightened with the knowledge beyond his understanding**. Mankind has been enlightened by one point, the understanding of the totality of the knowledge of the U. If you are a doctor you use it according to that with your patients. "Do I need to operate, or I can reach through the fields to do the same." If you are a computer analysis, "Do I need a Chip or do I need a Micro-Chip or do I need a system to store and communicate when freedom of totality is in front of me. It's me who cannot decipher the knowledge, where is the lack of understanding. In so many ways, mankind has been given every opportunity to develop his self to the level of the Knowledge of the Universe and Universal Community, and this is the point, that each one of us will mature to that point according to our intelligence. (1:02).

Try to understand, try to comprehend the totality, try to be strong enough not to see it as a magic, but as a power of knowledge which you have gained, that you can support other lives, or even your own, when the time comes. Even within these Cups we have hidden much more knowledge, because you have not and you are not used to, look at the physical interaction of the fields, but you look at the physical dimension of the man. Maybe, maybe we have opened a new door. Maybe, maybe mankind is ready for the next elevation of his souls, and his physicality. Maybe it's time to open a new dimension, maybe some of you will elevate to that level. And maybe the whole human race has reached the point of maturity, to be able to get and to reach the point that creates knowledge, and that knowledge becomes the Universal knowledge. (1:04). Maybe mankind has to strive to reach a point of maturity and maybe mankind needs that dimension of elevation. And maybe the time has come for the maturity of the STM?

Any questions?

Q; How does the soul differ from the spirit?
K- **You call the soul of physicality, spirit**. (1:06).
Any other question.
R- Let me paraphrase that, you said you call the STP the spirit, that's what you said I think.
K- Yes, you are correct.
R- Very succinct, very nice. I hope that ..
Q: The soul observes this body and leaves the body for the 40th day, why does the soul wait so long. .. R- I am assuming at the time of death.
K- You know that, now you have access to him, you have been taught. And see if he does wait 40 days.
Q: .. (1:08). .. I have a daughter in law she is 5 - 6 months pregnant, the baby has a diagnose from ??? can your T help somehow. what could we do …
K- KF there are doctors who work with the KF T in Germany and Austria.
Q: How can I get contact with them
K- write to KF … do it now our team in the background will pick it up immediately.

(1:10). ..
..
the medical team in Iran will support you. (1:12).

Any other question?
Q: Marinith .. when we made the Cup 2 for Corona, (1:14). make one of the Cu wire like an accordion.
K- That was if you did not have a flat plate. That was .. you can use the wire to make it like a flat plate.
Q: So we make Cup 2 with plate and coil ..
K- …

Q: how you calculate the Cups, the Zn, Cu.
K- Become a physicist. You have to understand why you are doing it, and what you want to do.

How to Calculate to Make Different Gans;

Q: If I want to make a different Gans. (1:16). how can I calculate
K- Go back to teaching around 100 we have taught how you calculate. how you understand, you don't need to calculate, God doesn't have a scale to measure. And there are different ways to reach a specific material or a Gans. SO you don't need to have necessarily have .. another new condition and get the same result. It's like when you try to reach for CO2, you use a C and Cu and Zn, but **you can go and use Plutonium and another material to reach the CO2, but that CO2 has a power base of Plutonium, where the CO2 you create now has a power base in the strength of Cu, which is connected to the body of the man.** Maybe in the space you need a CO2 of Plutonium base strength, then you can still produce it. Part of our body uses high radioactive CO2's.
Q: So it is like the isotopes we have many CO2 with little different of
K- **It is a central power base of the plasma, which dictates that CO2, (1:18). to what it is connected. this is how your Thymus and Thalamus collectively work together to create that position.** This is the function.
Q: When we make Gans we always use saltwater, after we wash the Gans, it's ?? not G?
K- What you mean.
Q:

K- **No, you create a Gans in that G condition, once you create it, it carries that inherent field strength of that point. If you take your Gans's and change to a different point, different salinity, different material salinity, you will see different reactions**. Maybe it looks the same to you, but if you observe the field flow from the Gans it is very different. . So this is a presumption you made, but the reality is different. It's like if the same cell in your heart, be different then when it's in your toe. The condition the environment forces it to react different. And it is preset where to react. Going back to the original teachings we always said, **every blood cell in the body of the man is "taxi point destination." (1:20). Due to this ?? because it has a position of MG field that only releases its energy at that point, nowhere else.** I said in many

teachings if this was not so, the heart which is next to the lungs gets energized so rapidly it will grow with the whole size of the man. But only accepts energy, every cell .. accepts energy according to its preset field strength from the blood, or the environment.
Q: then how can we make more G or more M Gans's?
K- For what reason, why do you need it, and what is it supposed to
Q: to work like a magnet
K- Magnet for what. How come the planet Earth

(:1:30).

K- You see there is a couple of problems with this, the bottom one says Gravity, it's gravity and M fields together. This is understanding the totality, and what mixture you have used. … in some of the teaching in the past I have referred to it. Who ever put this picture up, have to change it… As all of you make these things you forgot … because you are looking in one direction you have overlooked an essential part. (1:32). .. when you made let's say the first Cup of the Cup of Man, you used Cu and Zn, but something you have never considered .. the salt you used, how this salt was created, where did it come from, is it a sea salt, or is it sea salt which was dried as a rock embedded ..
You use the Gans production with the sea salt, it's not a salt as NaCl anymore. It carries the essence of everything that was in that ocean or sea, which existed at the time in it. If you created that M field with N coated material, now that Cu, Zn. everything else, K whatever else, which was in that salt, now is part of your structure. Your Gans has a common denominator of that totality. (1:34). And so when you create these systems, you have to understand you have already brought part of the totality of the creation on this planet which lead to its creation or has been created because of its creation. It's not just a salt, it's not just NaCl, it's every other, one speck molecule of gold in that salt will effect the strength of the Gans's which you have made. So try to look with a wider view, much open eye. With a clarity of understanding. The whole purpose of these teaching is to give you a new horizon, wider angle of looking at the totality. It is part of the structure you have to understand, there is no isolated situation in the world of creation when you deal with fields. In so many ways, the knowledge of creation is not a exclusivity. (1:36).

The understanding now has to be overall, but you have to understand the next step. Go a step further, even that salt with all its composition, within it carries the essence of the soul, the essence of the fields of the Unicose, your galaxy, the universe ?? rotation. It's not just only a salt. If you look at it, that salt is like, if you understood the building of the … 5 Cups but we put the solid plates, now you have created the solid point for the liquid state. Where the Cu was the solid point for the matter state. Now you have to understand more. (1:38). Now if you understood this, you can take the next step. You can understand then what is the next step. What are we to understand? What are we leading to. From now on try to look with a wider angle through the whole of the knowledge. One of the biggest problems KS will face .. "I don't feel nothing, I don't see nothing, I don't feel emotionally with this Cup or that Cup." It does not mean that your soul is not there, it means you have not understood the interaction of the fields with your physicality. And

maybe your behavior changes because of it, (1:40). or something in your physicality changes because of it, but you never know because you have never been aware of that interaction. When we put the patches on a given position for the pain, or whatever, and you see the change. If it has created to release your pain, you felt it because it was for that position, for that pain, but in reality it has always been interacting, but you don't feel it because you are not in that position to feel that strength, it does not mean it doesn't interact. Self-awareness of the STM is the key for mankind to understand the work of the creation and the Creator. And nobody can teach it, except man ?? learn it himself. Have you thought why do humans hug? In one of the teachings I have explained in a very in-depth. Why do we hug? Why do animals hug each other? Why do we stand in a certain position when we create life? Why we have a different attachment to our children then the other animals? When we hug we transfer fields directly from heart to heart, from the STP, in a close proximity from me to you, from you to me. Have you ever looked at, and understanding why animals behave different according to way ?? differently ?? to create their own children. Detachment. Why do monkeys and man have the same common denominator. We have our children, we transfer energy through our heart, through out soul, to our STP. Non-verbal emotional communication, matures the STM. Why do we choose this method. How and why mankind has not realized that you bring the souls close to each other that they interact too. Watch how different nations greet each other. Watch how our new generation on the streets greet each other, then you understand where the culture of man will go. Then you understand how the STM will elevate. (1:44). Transfer of the fields is beyond the dimension on physicality, and mankind has not understood that. Why children born in the West, live different ways then the children born in other part of the world. The same with the Chinese children, African children. Watch the behavior of the society and the interaction of the father and mother, even in every point of the life, ?? let alone at the point of inception. The position of the heart in respect to the soul, the position of the 2 souls in respect to the STP, all has a ?? improvise in respect to the creation of the soul, what we create as ?? life. When you are a light you shine on all equal, even those who are in the depth of the planet, because it's their fields, interaction which lead to the creation of the light on the upper atmosphere, (1:46). so they are connected to it, because of it. This is why we have different, same day of light and energy from the same Sun in different points of this planet. Combination of ?? the effect of the field. If you are in a desert it always turns up to be hot, because the STP in parallel with the soul of the planet creates that condition, doesn't matter day or night. You're desert. Because the Inertia has a say in it, unless you change the Inertia, then it changes. Why do we the planet earth suddenly tells you, geologists, that it used to be a desert here, now it's a forest. Because the amount of the ?? sand gathered in interaction with the Inertia created, in interaction with the MG field of the planet has changed the ?? condition above in the atmosphere where the fields interact, and the new field strength allows absorption of new materials, which are not desert, but allows in interaction with the fields of the planet to create life. The change of the layers of this planet, dictate and does dictate the interaction and creation of the next layer. And this is what none of the geologists who work at this level understand. They just cut a mountain and say, look there are different layers, but where did it come from? (1:48). We continuously add to the surface of this planet by the interaction of the center, Inertia, and the matter state on top, the Inertia which changes the field strength from the center. Now creates different

condition for absorption of the different material from above. Darwin theory of evolution in the matter state of this planet, comes from the interaction of the field of the Inertia, and the field of the center of the planet, and whatever it has stacked up. ?? Now the Inertia changes because of the .. mass of the material and the interaction with the field of the center of the planet, creates a new condition for absorbing new materials. If you understood this, then translate the knowledge in the dimension of the STM and interaction with the physicality of the man. Why do we fall in love in different ways, and why do we give, and we hug, and we kiss, and everything else we do with each other. We transfer fields. We look at each others beauty in different ways, where if you look at the beauty of the soul you'll find out it fits every dimension of the physicality for the observer. You fall ?? of the soul, physicality takes the shape of the eye of the man and the beholder. As usual we have a break for a few minutes . (1:50).

BREAK >>> (1:58).

K- Are there any other questions?
Q: .. with the AIDS virus .. my understanding is you talk about physical and emotional, and the AIDS virus has gone on to the mental plane.. can only be overcome through the Gans or the EU, or … we have the physical . (2:00).
K- Soul decides on the conduct of the physicality, in so many ways. As you have seen, it's not ironical as we have seen in the past few months, as I said in the One Planet… the reality is that we … we saw a man ?? lying dead, and he went to the extent of lying beyond, even though he knew he was lying, and in the physical dimension for lying he got a judgment for 1 year. This was typical, he did this with another company, with many other companies in the US. Mentally demented, he always thought if I get ?? what I get .. so it was the satisfaction of the ego fo physicality. He has many 1 Euro things. But this 1 Euro cost him his life. he lied, because of it, while the T was available, he could not touch it because he would proven he has lied. He gave his life, his soul put him there to show, you pay for your disease even, with his physicality. the cheapest life, 1 Euro. So where does soul accept a certain point? (2:02). Is it AIDS, Corona or something else. What does align, with the STP, and the STM becomes second to it. Or is this process part of bringing new understanding of more. Of the knowledge. Or .. someone told me, it's very cruel the way you put it, so many people we see in the past few months, who have lost their physical life, or they have been through part of it, that it has changed their physical life or it has touched them in different ways. Where they volunteer to be there to show a new way. Have they sacrificed their physicality, for what ever shape or form, to elevate, to bring a new knowledge, a new understanding for humanity. Do we only stand in front of the bullet and sacrifice our physicality for what we believe in, or does our soul have the same capability. Man understands numbers, so are these souls making themselves standing the bullet, to make that ?? is it another presentation, we go writing, we go marching. Remember the one man standing in front of the tanks some times ago. .. (2:04). In the west we saw a man, he took the gun of the officer and put it on his heart and said, "shoot." Do you remember in 1960s when they marched against the war in Vietnam? Do we make sacrifices in dimension of physicality, or do our souls know they have to do to make that ?? Is AIDS part of that structure, wasn't AIDS an awareness of totality of what was going on, lawlessness in sexual behavior, if you look at it, AIDS the way you see it

now, I was explaining this in the past few days .. if the AIDS would not have come the way it came in 80s and 90s, do you know what was going on in the west and many places, it was running mayhem, the conduct and sexuality. Do you remember the title, what did you said, "sex, drugs, and rock and roll." Too many things were rocking, .. we are children of 60s, 70s, and 80s, we woke up with the music in our heads, as loud as we could. We went to sleep with it, the rest of the day was how to get there. Not necessarily touching the drugs, not doing whatever, but it became uncontrollable. Was it a decision of the soul of humanity, ?? stop it ?? everything stopped from 100 to 0. fear of AIDS changed the mentality of behavior in the west in many people. (2:06).
Q: So we developed the emotional level very well, so to me the future is developing the mental ?
K- No, developing the STM, understanding the strength of the STM, interacting and using it as a new way to live a more peaceful life. We are all structured by our soul, but we take our physicality where our soul was decided for you to be. This is what we have to understand.
Q: There is a good example, one Israeli soldier ready to shoot a Palestinian man, when he looked through the sites he saw himself and it scared him, he dropped his gun and left the army. And I think he got a glimpse of his soul …
K- You brought something very interesting. As you know we are discussing something very deeply with the Iranian officials of government very deeply in respect to spread of the knowledge the T in every aspect. In the past couple days of discussion there is a very big problem. .. and understanding my point ?? doubly as I believe we are correct. We stand to communicate, (2:08). and to bring the state of Israel into the part of the One Nation, and the Iranian officials to talk with, and it has taken a long time. This has taken a long time for the Iranian officials, especially in the religious side. Yesterday, .. intermediary we talked to .. we work with the Jews who live and are part of the area. We don't deal with the government but we support the Israeli citizens who are part of, the same as the Palestinians. This is a huge shift of understanding. In understanding the STM stands alone and has to be correct. We try to bring peace to both sides. This is what I say, we don't accept governments but we accept nationals. We speak the language of the nationals, that's why we have the U Council. And this is a very fine point which we have achieved in terms of negotiations .. ..

for Iran to be transferred to the center of T, but I want my terms that KF and the work and the ethos of us, (2:10). doesn't look at the governments, look at the nationals, look at the citizens. It doesn't matter we are in Israel, Saudi Arabia, Brazil, America or Iran. the important thing is we carry the soul of a nation, not the flag of a nation. And we accept term by term, and we .. have reached a point that we do not accept the politics but we accept the citizens. And as we take the knowledge to Iran to be shared, we will share with the citizens. does not mater speck of race, color or religion. …

This is something I have many problems with religious groups …
As a KS we seek the knowledge of the soul (2:12).
the structure we set .. hopefully we'll all be part of

We look at the STM not the color of the skin .

We see changes ..

(2:14). to the STM, and that soul can be anywhere in the U, or on this planet. .. we see the soul of another man in our own soul ..

Weeks ago we gave full support to the new Vice President designated as Harris to be the next president of the US, the first black lady in the White House. And we see the same, another woman will join her as a vice president. As we transfer the heads of the KF to 2 women, it will be the same in many states.

(2:16).

(2:18). WL: .. about today's teaching and I think I understand some secret about 3, 6 , and 9 from the teaching you bringing today, you are talking about the soul of the matters, and then soul of the light, and then I think it should be the soul of the primary source, so in each world, no matter the world, the light world. I mean the transition matter, the primary source, all has 3 levels, they all have the same structure, of like Primary source, transition source, or transition matter or physical matter, so each 3, then the last being the light. So 9 is the highest number for the creation and to finish the creation . I don't know if I understand what is correct or not? (2:20).
(Silence .. break of Mr. Keshe microphone …)

(2:24). WL: Did you hear my question?
K- You were talking about the 3, 6 and 9. I answered you, humanity was not ready for it. How much did you hear?
WL: No, nothing.
K- Oh my god, let's share. In the essence of the creation we share the knowledge and the way you said, is the elevation of the soul, and this time around the elevation will come through the soul of women, as men have failed to deliver. In so many ways, your knowledge and what you shared as a soul, as the 2 heads of the KF, brings a new dimension into the world of humanity. We will see as I said, many double presidential heads of state, as 2 women, because then we'll see the beauty of a lot of things, because they'll bring the soul, the love which is missing in the structure of the creation of nations and whatever we believe in. If you attend the Linz, exhibition, you will see very much physical explanation of what you just mentioned. (2:26). Because in interaction we'll see elevation, we'll see creation, and in that process we come to understand more, that as a common denominator will stay the same, you will see that the soul interaction will change. In totality we reach the soul fo the Creator, but you have to understand the process. You have to see to understand the process because man is so physical. And In so many ways, if you put the way you say 3, 6, and 9, look at when you see the Sun, and then you understand how the soul of U Community and the Creator manifest itself within the structure. When we say the soul, it's the energy fields, not physically observing entity. From now on we ?? see the things with , not emotion but inside that they inform the emotion, confirm the ?? acceptance of, the understanding of knowledge which stop

coming form our ears into our physicality, and to our emotion. (2:28). From now on, that we elevate the STM, we hear the emotion of the soul as it goes out, to be felt by our emotion of physicality, and we feel it, we hear it. Now it's a two way communication, where we have always been absent and never understood the other side, we always when we heard we created an emotion to what we heard, what we smelled, what we felt. From now on we understand the position without being in the environment to smell, through the essence of the soul which comes from in to out, we smell, we taste, we feel, we love, this is why a new birth has been planned and will be executed that we have access to both sides, both emotions, and the feelings, and the understanding of the physicality, and the other, from inside, that it can transfer to physicality as much as it receives from physicality and visa versa. Then the STP or the STM or the Soul of the Creator comes into it, all become intercommunicated, it becomes the knowledge free, the emotion free, the love free, accessible by all at any point. The new generation of man in the coming time will have access, full understanding of the communication between both the physical side and the emotional side with the STM. And the STM with the emotion, and the physical side. (2:30). This way we can live and feel in both dimensions of the physicality and the energies of the U. that we can be .. collective energy of both. Do we want to react in the dimension of physicality, or do we want to act in the dimension of the collective fields of the soul, of the energies, which make in the interaction the physicality of us with the planet, or the environment we exist. This needed a specific special process to be setup, and it has all been setup, and it the transformation of the physicality and the soul at the same time. The elevation of the STM is the cornerstone of the work fo mankind on this planet and beyond, and for the created creatures of the U. It's not just for the man. We have to evolve to understand, to understand what is to come. And we will be able to, not to believe in, but we live within collectively. We don't call it a dream anymore, we don't call it a Sixth Sense anymore, .. whatever anymore, because now we know we get rid of all these fabrications, (2:32). fake names, and this is the whole purpose of going through the past years of teaching.

As I always say, I have time, and my patience and my time has created many problems for many KS, because I have time, I wait, because it's like a flute, it's like when you cook, it has to mature, and when it is ready it shows itself. I could react very easy, but I know it is not the time to react, because the process will complete itself. I am aware it is on the fire and cooking, you just see the pan. I know the inner fields of what is cooking, and you look at what is in the pot. It's an old Iranian saying, what I see in the mud you see in the pot, you have to make the pot to believe in it, where the Mother holds and knows what it will be made of, what it will end up to be. And that is the difference. (2:34). In so many ways, mankind has to mature very rapidly, and as we said, we start showing structures, that you see more and more the dimension of the fields, that whatever you want to call it, it's suits you to call it the soul, or the STP, or the fields of physicality, it's all the same, as long as you learn, as long as you move from the matter state into the field state, and then you can manipulate to create. I have time and I have waited a long time. But the beauty of it is, the time is now and has come. Not because we say so, because we make it to be so. To share the knowledge and to elevate the STM and the physicality .. that man understands how his soul is made. How the fields and dimension of the fields of the U, and not matter physicality which man has chosen to accept. If knowledge is a sect, then

god help those who have no knowledge. Everything to them is a sect. (2:36). Don't forget it is very clear cut. Those who abuse the soul they find a way to carry on with different ways and names.
Any other point, WL?

WL: .. I have something in my mind when you were teaching, but now I can't catch it.
K- Maybe the soul understood.
WL: yeah it is.
K- The understanding of the soul and the evaluation of the soul and the way we interact, is very different then from China to the West. the Chinese understand the emotions and the fields in a different way then we understand in the west. And maybe as China become more materialistic, it will become more the way the West is, has been materialistic for too long. Maybe somewhere in-between we find the balance, (2:38). both between the understanding of the emotion and the physicality. It's maturity of the man, the time for man to understand both levels of his own creation. We always ignored it, now we have to elevate it, understand it and allow it to be. If you look at it, mankind is like 2 children, and 1 always has always taken over the other, now it is time for both to shine equal.

Q: .. When we are created the soul is divided into two, the STP and the other is part of the Creator, and the elevation is the fusion of the 2 souls?
K- If that is the way you understand it. The STP in the dimension of not matter state, but as plasma, leads to a common denominator fields, we call it, the soul. But the other two are not in matter state, who made this, they're still in a plasma state. So they theirs, (2:40). and what they have to share they share, and with it the create a new common denominator, that with it both can have. We call it the soul. And then as the physicality has an energy source nearby it can rapidly grow in the womb of the mother, physicality encages the soul within himself. In a way it leeches on to.

(2:48).

Any other question?

Q: . work on themselves rather then being locked into mechanical jobs, I am looking forward to this time.
K- What you can imagine, you can create. with the emotion of the fields. (2:50).
Any other question?
R- I am still thinking about everything is done by the emotion of the fields, that's a good one.
K- hope this doesn't take you a long time to figure out how an atom fills the whole U
Q: Water has a memory, does this mean all of the pollution will become part of the salt, or is this different to water itself?
K- The man who said, water has a memory, couldn't memorize himself, you know what happened to him. We create fields with the plasma of the water, and those fields have a strength and a position , and when they reach the point of destination, they release that

information, or that energy, what you call information. And not all the atoms of the water can hold on, or absorb, or create that specific field inside them to replicate.
R- So you are saying it's the fields that have the memory, not the water itself?
K- No, (2:52). its fields which are there, and the capacity that they can transfer the energy across without them knowing. In a way if you look at it, we transferred the orange, the taste and the feeling into the water. Now the orange is inside the water, it can transfer back to anywhere. This is the difference, with orange we did once, but now that we created the plasma of the field of the orange, inside that drop of water, and the environment is the environment of the water, now you can transfer this to anywhere, it doesn't need a memory. It's the field strength capacity.

Using Salts in Cup 1 to Make Gans:

Q: Can we use those crystallized salts in Cup 1 and 2 reactors to make another One Cup ?
K- What do you mean?
Q: (2:54). repeats.
K- Yes we always advised that. You can even use it in conjunction with other Gans's for specific position. If you use these salt Gans in like (Zn , sorry) Cu water it enhances the power of the Cu water, or the plasma of the Gans of it, to much, much more powerful, because it is made of it, so it increases its power. (2:56).

Q: Will the scientific paper be able to be copied and or printed in the near future, some people don't have internet access.
K- It has been made that way. The knowledge in the published paper is the right of every man on this planet.
R- But we can't copy or print it, because it needs a password to copy it.
K- It has different certifications, different keys. I think the head of the KF can explain .. or the webmaster ..
S: The .. When we decide to publish it can be done.
K- Now you know when we decide to publish ..
S: .. there are reasons behind (2:58).

Q: .. about the contraindications in the paper.
I wanted to maybe wait on that question. .. a company has come out with a nuclear recycled battery .. in the heart of each cell is a cell of nuclear recycled waste. The Company is called, M?? DB, it uses graphite reactor parts that have absorbed radiation from (3:00).

K- I don't understand anything about the nuclear industry.
Q: ..
In plasma 101 C14 .. talked about this .. I thought it was related …

Nuclear Waste made into Batteries - Dangerous:

R- they coat it with diamond

makes it safe ..

K- Wait . wait hold your horses there. What do they sell this as, in what equipment?
R- to make it into batteries.
K- It's illegal. It's criminal. (3:02). Whoever has put this in has to be taken for a full interrogation and brain to be tested. This was tested, this was done in 1970s, 80s, and now they put a new cover on it. In the middle of last century. .. a Russian did this, and the long term exposure of it, ended up with thousands of people dying, especially women. If it is a power source you put on the watch, definitely you'll die of radiation cancer. It is known as a black diamond. Russians produced this with high radiations, and then they put it in the market, and women who, it was a beautiful thing to wear, a black diamond, but the radiation, even in small doses in the neck created, many of women died of skin cancer. How can they allow this to happen, we have already been there. There is a safe in ?? New York… which still today can't be touched because they put all these diamonds in it, and nobody dares to touch it. This is backdoor to black diamond, Now they coated it and they said there is less radiation then in a cell, but you keep that radiation on the cell for long enough it becomes cancer cell. Once you go into, (3:04). this level of radiation you have to understand what you are doing. But we know this, it already has a track record. It doesn't matter how you coat it, through its property becomes, what you call black diamond. In time the fields will go through. They call one point, you cannot do it with 1 cell. We know very well that diamond under certain pressure and condition, becomes conductive, it will leak radiation. We've done this with South African diamond company, it's a combination of radiations. read the black diamonds in the US, a lot of it has been cleared out of the Internet because of the mayhem it has created. Many women died of it, because when you wear it as a jewelry or watch or whatever, the radiation is continuous, and the heartbeat has an effect on it. We know that. Just search on the Internet. .. they tried to clean it up, because the claims on it was huge.

Americium - Mr. Keshe Can Absorb Radiation Special Structure of His Body:

Q: Does americium produce Alpha waves?
K- Yes, the reason I use americium is very simple, I am a nuclear physicist, one of the best in my business. Americium used in a specific condition to create a specific plasma, in a specific condition. That specific plasma in interaction, (3:06). with the plasma of the center of the Earth and the center of the U, creates lift and motion. Americium was used for a specific purpose and nobody can repeat it, because there is a code of use, there is a specific way to use it. And secondly I can hold Americium like a sweet, it doesn't touch me. you touch it, you get cancer. I have a specific structure in my body I can handle radiations like water. This has puzzled my teachers at university and many people who work with me in the nuclear industry. I am immune from radiation ?? I can live there. Otherwise, the amount of radiation I have absorbed, anybody else would have been dead. This is the way . I developed this use of Americium because of certain conditions I create and it has a number of hidden structures in it, which it creates and develops. And in a hidden way, I go into cosmic rays. Cosmic rays allows me to interact with any position in the Universe. But what you talk about, we have a history, about mid 90s, we had this, it was known as the Black Diamond Death. The Russians very recently, created a new

diamond, which used the KF T and then the people in Diamond Borsch, in Antwerp wanted to understand how this has been done. (3:08). And it took me 5 minutes, I knew what it is, I replicated it in a lab, and I said this is what the radiation, this is done. This is not radioactive anymore. You see new color diamonds in the market, very rare colors. It's done in a very cheap way by the Russians, but they look for a specific materials and then they create a condition of the plasma reactors which I work in, and this allows new colors to come in, but they are not radioactive. These are natural colors that is atomically available in the stone itself, at the point of its birth. A diamond is a "popcorn." When a C hits a high temperature, exactly like a popcorn, it pops. And in that process of the popping, if you understand the ?? a corn by, let's say, honey ?? or different flavor. That flavor is in the atomic gas state. So it blows up in the C while it's blowing, and then it gives a color to it. It's a specific way, if you take that bubble away the stone becomes clear, you don't have pink diamonds ,.. Russians who have used Nano T and worked on and understood my papers, have developed, they have actually patented it, to clear new stones, colors which we never knew, and uses the plasma T as what do you call, specific condition, and new colors have been created.
Q: Your plasma T?
K- Yes, because I could decode it within 5 minutes. Russians I have explained .. KF, Russian group, (3:10). who are highly scientific, they use a lot of this T. Don't forget Iran transferred through its Ambassador in Moscow, a lot of my T, Nano T to the Russians. And they have their won scientists to develop. There is a very close connection between Iran Nano T, Russia, and China. And the knowledge which is not given and hidden from the West. Very soon I will be attending a conference and a development of, what we call, development of this T. And it's only for specific scientists, because with this knowledge, it has not been understood by the West. Iranian scientists which worked on my papers and understood it, they have developed as part of it. And it's in the hand of .. and it's shared with Russia, partially shared with the Chinese. But this Black Diamond graphite which is exposed, is literally making a popcorn inside out. And as I said, we did a lot of tests in Belgium with diamond structure from the ?? beers to see the reversal of the conductivity to resistivity of regressed. I can make in a specific way diamond super conductor, and we done it. It's done in Bruges, in secure level of the Belgium authorities.
Q: Interesting . (3:12).
Q: They are putting it on the market.
K- Yeah, a lot of things on the market.
Q: They are going to have a lot of trouble.
K- Long term, definitely. That's without a doubt. Long term they'll run into. There is another Iranian scientist, nuclear physicist in Brazil, he came out of Iran, he was part of the team of original nuclear physicist, someone I know. And they went for the new compact nuclear reactors, and part of that process ?? look s like this structure. ?? from UN to do it.
Q: When I posted this on Golden Age of Gans. I showed what the radioactive material was, behind the foil, and it stops the Alpha particles from traveling outside the smoke detector. Because of the shielding the smoke detector poses no health risk if they are properly handled. Is that true?
K- Because the important thing for that detector is that the smoke enters into that little cavity, so the radiation, you have to understand, the properties of the radiation, and the

environment that you create it. Alpha has a very short distance to travel and it can block it. But still there is a small amount but disappears and ?? displace energy within the detector. And I can make Americium fields to reach from, (3:14). let's say to ?? to New York.
Q: Wow, how do you do that?
K- I developed a . I am a nuclear physicist. It's the game you play. You see what happened, the Belgium's calling me a terrorist. What the Belgium's did systematically, setting up my Internet during my work, they approached every nuclear physicist who worked with me, threatened them, and they become a terrorist, even close friends of mine from university, they were pushed to that point, because I was teaching freely. I am the only scientist actually in the space T and is banned from NASA space Chat rooms. Because I was teaching freely and they couldn't understand, and they didn't want me to disclose. In so many ways, if you understand it, with the Gans's what do you do, you put a Gans on one side of the body, and you put on (other) side of body, you transfer through cm of fields, very weak. Now you give me Americium, I can expand it to anywhere I like, at the strength I like. I am a master in nuclear, and understanding of nuclear field interaction.
Q: .. Americium puts out Alpha waves, or fields.
K- Particles, energy fields.
Q: And these are, aren't they the weaker of all the nuclear sources?
K- Yes,
Q: So when you are saying you are putting a weaker and a stronger on both sides of say, pain in your tissues, this is the ideal of also .. sending it across whole nations. .. (3:16).
K- You have to understand, the terminology of the field strength of the radiation. You look at the radiation in a different way then I do. I create radiation at the point of need, at the strength I need. And that radiation is a cosmic ray. It's not a Gamma ray, X-ray. and in the spectrum of the comic ray, the fields you need for a specific effect are always available.
Q: I am not following Alpha particles ..
K- You can produce in it, you see it's not Alpha particle, it's the energy of an Alpha particles.
Q: ?? like a plasma.
K- Yeah, it's a plasma fields, I create that plasma of the fields, not the matter state of the fields. This has been, as I said, a master in your work. We understood this very early on when I was in, before university, because I actually built a reactor as part of my project that they let me into university. I built a hand held specific plasma, Alpha radiation, Beta radiation in a green box with a handle on it. Not the present radiation detectors, at that time I created the first plasma detectors of the fields. Not the radiation detectors.
Q: So you could measure the plasma fields with that?
K- Yeah,
Q: Has that come out on the market or has it been shown at all?
K- No, it was somewhere in my fathers house when I left, 30 years ago. (3:18).
Q: .. a useful tool.
K- In a way you can, if you set your mind, it is very easy. It took me as a project 3 months to build it. As I said before, I am an engineer, not by going to university, from

mathematical, theoretical, I am an engineer by physically being trained by it. So we see a lot of other things.
Q: I remember you saying when your PhD diploma arrived,
K- No, when my first degree arrived I stuck it on the toilet roll. ?? my mother ?? crazy. It arrived about this time in August, June, July, and I still see my mother's face. "oh, my work, all the things I have done for you to become, now you put it there." I said, "that's what it is worth." I don't know if I told you a story. Have you heard of the China Syndrome, the movie? .. When I was just before going to university this movie came out. My mother never goes to movies, as such. .. we are going to a movie. …
I thought it very strange to go with them ..

You see, you want to do nuclear, this is what's going to happen to you. They are going to kill you. (3:20). Why do you do this. ..
I said Mom, this is my love, this is what I want to do.
She said, " don't go, don't do, I don't want you dying for nuclear." And then so many years later when the Belgium's tried to kill me, I said, my mom knew.
I am glad the F is cleaned up of the bad side of the Belgium's. .. we have gorgeous Belgium's too who are devoted to the F and I respect them. The bad apples are gone, one died and one disappeared.

Sharing Technology with Iranians and World - CIBURU:

Q: .. is it still in the process the making of CIBURU the making of the nations?
K- This is part of my work with the Iranian government. you know me I am a doggedly worker .. this is part of what I said, this is part of even yesterday negotiating, I will not transfer my whole T to Iran unless the space and defense part of it is original, and nations of the world are part of it, the Americans, Russians, Indians, even the scientists from Israel, as citizens, we scientists we can still negotiate and talk. As long as the undertaking is given, is not used for anything but development of space. (3:22). There is a lot of top negotiations going on in many, many directions. Transfer of technologies to Iran is not just a walk in, because I am Iranian. I secure the ethos of the F in many of the negotiations. Our knowledge has to be the backbone for creating peace and equality, in being able to use, not equality in everybody can have everything they like. Equality of knowledge can be shared and used by everyone, at any point. We agreed to most of it. Now we are waiting for the new American Administration. I always can negotiate with women, let's see what she does. Anyway thank you for all your work Mark.
Q: Thank you for yours and pleasure to serve.
K- It's a good time coming up I really like to thank all the KS around the world to keep this going and sharing the knowledge. And as I said, our enemies work to our benefit, and it's very nice with what I seen this morning, especially what I told you, this pedophile group because they lost their income from abuse of children, and their master now has dying, and the other one is in prison, (3:24). they tried to create more mayhem and they shot themselves in the foot today. We'll see how the response will come from the ?? Ones who actually use the T, we have no problem, but the ones who abuse the T, to benefit themselves will abuse themselves with it.

Q: .. regarding the Deep State, there seems to be a global reset coming. they call it ?? gisara. and nesare for national ..
K- We have to go through it, we are going through it, because we cannot support it. It has be redesigned because you have to understand, millions of jobs have gone, it cannot come back. This has created a huge economical problem for the governments. They worked on the GDP increasing and increasing national by keeping employment. We are back 20 years now. And many jobs are gone now that cannot come back. and big thing. To restructure banking that there are no loans, there is no backing, governments can support their nationals to be, we can still use the currencies as we have. One of them is, we see it, it might happen, to unified military system which means everybody uses one currency.
Q: This is backed by precious metals? (3:26).
K- Backed by the effort of the humanity. Now with the new systems we can produce any metal. How many kilos of gold you want. So it comes by accepting social structure that we all live comfortable. We all live with all the basic necessities of life. There is a national, but globally we see on the horizon, as one currency accepted worldwide. Euro, Dollars, will diminish, will go away. I have put the suggestion to those who work in the background to use the Keshe Coin, because we kept it as one. And it is a long process, will take another 5 to 10 years, that we go for a single monetary, but with Corona it might come forward. We can't have dollar, Euro, Yen and the others. We bring that each man has to have such a level of living, and all the governments strive to reach that for their citizens. Then the nothing has value. Effort for creating comfort for the citizens becomes the value for the life. So an Indian on the street has enough to live have a shelter, as much as an European, American or Chinese. And then in that process, we allow you to live. We take the social security out of the structure. You are not given the minimum because government cannot print anymore money, you're given the maximum to live a life, and in that process 5 to 10% will abuse, the other 90% will build on the assets of the humanity. This is what we see, and the process is in that way because once we can produce all the gold, we go to Bitcoin. Bitcoin is now play games. (3:28). But that has to be available to all of us. Other problem is as we advancely educated in space T and ready to go. How much will they pay us on the spaceship if we are traveling to Moon or Mars or to another point in the U. What happens with the family left behind …
.. you have to progressively make sure, I devote my life to the expansion of the understanding of the knowledge of man, and the mankind looks after me. We don't become the citizen of One Nation, we become citizens of this planet. And we all enjoy the same. Not by equality of everything. When you have equality, you bring a stagnation. We bring a level of comfort at the level of need by everyone. Now we have T, we don't need to live by the cities. We can live by the, anywhere on this planet. Some of might choose I want to live on Moon, because now with the new T up in the next 10 years, position is irrelevant, comfort of life is important. Maybe I'm a farmer I can do something special on the Moon with what I become a farmer on the Moon.
Q: In America there is this problem with this idea of socialism and unifying ..
K- We don't go socialism, it never worked. Socialism doesn’t' work. it's we gave you enough a room and then we decide what we give you. Communism, Socialism, even Democracy has failed. We always say communism.. have you seen how many people are on the verge of poverty in the West. We seen it in your disasters. (3:30). American citizens living worse condition then the Africans.

R- Right at this moment a hurricane heading to
K- What will we see in a weeks time, who will help them with the Corona and the rest of it.
R- Some people can't get on buses because they tested positive .

K- So they have to die .. in their houses under the storm.
There is something that came out from a few KS, the damage done by the situation even in Italy, where what they did with the KF there. many died because we could not help. We could (have) helped to save , like we did in Iran, we saved many lives. These people are responsible for the death of these people. The same in US, if we didn't have this mayhem the Belgium's created, with American KF Arizona, we could have expanded everything else, then every citizen (that) had Corona, (then) no Corona. Even if we would have expanded the knowledge, we have a hurricane, we seen what happened in the Caribbean islands. Why don't we set it up. This is what we are testing with the Chinese. .. we see it in the background what they are up to. Why do we have to run away from hurricane, … we create environments where we can cover. (3:32). Those people who have done … now we put the governments against them …
they are responsible for death of these people. Why do you think the Belgium's left the F for betrayal and adultery. They did all of it, and they are responsible for the deaths in Italy, because we missed it. The same in America. This is, it comes to the balance of the souls, and the knowledge of understanding it. And we share the knowledge. In America, John has been there investing so much money …
We had one rotten apple which was sitting at the core of KF, and now it's gone. And you see the change. We should have been there, KS to save life. To give the opportunity to save life. And it's not there, and the guy dies, who is responsible for it, those souls who set the scene for their own business. Once we set the scene we'll bring you to understand how much damage has been done. (3:34). they thought they have somebody at the top of the KF, they were working, but we were watching.
Q: .. in Texas it could damage our ability for oil and gas production. ..
K- We have to see what comes. ..
maybe it will be a turning point for change of administration, incompetence to deliver. There are a lot of things accumulating to a given position around the world. We see it, I sit outside. We are going in a very good way, all these little ticks are needed to get to that point. It's not all bad news when you look at the totality of it. It looks bad because we take case by case.
We are heading in a very fine way to a humane society and this is coming. ..
we need to unlock nations to currencies, and in doing that governments are learning . (3:36)
We have to change the structure..

(3:38). And then we pass on. There is a need to show how we get things done, how we bring change..
The KF in Iran has now produced Zn on a sound basis .because they followed and understood ..

(3:40). K- America is a small producer, but on the other hand the oil industry has collapsed. The oil Industry has totally collapsed 6 months ago.
So many cars on

the ships on seas are biggest polluters .
Q: This will put Iran with
(3:42). there are not enough customers. One of the biggest users was jet liners.
Economical pressure from Corona is building up ..
Q; The patents put a price on everything.
K- with the Iranians the T stays open.
gradually the patents end .
(3:44).

Europeans want to use the T to enslave the world. .
(3:46). Q; We constantly see reports about superconductivity at normal temperature haven't achieved.
K-

We might make an announcement as early as next Tuesday.
Q; So room temperature superconductivity they are not recognized by mainstream ..
K-
Q;
K- But the thing is you produce it, N materials .

Q; We are way ahead of them
K- We are not way ahead. We have opened a new knowledge.
(3:48). There are many who want to take control of the KF to block ..
Q;
K- We keep it safe as the KF
I'll open the books about how

KF was betrayed at the root of it

Q: Did NASA take some of the Gans T?
K- They are working but they don't understand it. They are using part of it.
Q: So they are developing N T and using it for Transistors (3:50).
K- It's not just them. Japanese are doing it, Chinese are doing it, the way I showed how to make N Cu, now is used on the gold sheet and dissolved back underneath..
I have seen the books on it.

We have given international exclusivity on broadcasters , (3:52). that Fox cannot touch.
We'll know next week if it has been accepted.
We have gone another way then Fox
It's very interesting to watch how this will come out

I hope the main teaching of today, the Soul of the Light, and if you understood that, with what is to come, and the ?? birth to come, you'll understand a lot about what this means. It's a change, it's a point of change. The Soul of the Light, is the Soul of the Creator, if you understand it at the strength of, not belonging but in Transition. no to the physicality, and no to the source.
Thank you very much and maybe one day I'll show you how to make that ?? soup .
(3:54). 343 KSW

344th Knowledge Seekers Workshop; September 3, 2020

Unveiling Universal Enhancement Units Linz Austria
Brazil group division

ENGLISH TRANSCRIPTION

(:10). Today is a special day for the KF and those who follow the KF for years. Today we break through and open the exhibition in the city of Linz, to show the first two Enhancement Units (EU), one for production of materials and one for the body EU. We will go through this afternoon, we expect some dignitaries to join us. On the other hand we spoke inside the KF and we came to one conclusion, we are One Nation, we are as , we set up the structure to be as one internationally, in a way the KF and its followers become the government to see. For this reason after the break we go live. You will see the systems live. So if you have anything you would like to see, because we are answerable to you, the KF followers and not to anybody else. We govern on the basis of peace and equality, and on the basis of sharing knowledge. And who else we can better share the knowledge and the achievement, (:12). on the back of all the success, but you. In this case, because of this we are setting everything up that in an hour and a half or so, we'll take you live inside the exhibition. You got to realize there are many factors involved in the exhibition. There are no exhibitions as such held in Europe anywhere at all, due to Covid-19, due to Corona. Holding exhibitions has become a forbidden things .. we are the first organizations holding an exhibition in a E center for months. So we have to follow many principles and guidelines …

It has been a challenge to produce these systems .. to take man to space. What does this mean, the systems we show today for the first time, man becomes independent of everything from Earth. (:14). We don't need to look for medicine, materials, for food, O, or anything in the space .. these are the first 2 units which will set the scene for new space era. Which means mankind will become totally independent. We can take into space and travel the depth of the U independent of the Earth. We have become, in so

many ways, we are born to a new era. A new era of space T which is the title of the exhibition, which means mankind from today by showing these technologies becomes, in a way, a new child from the Earth, which will be born into space. The mother Earth gives life to her children to take into space, into the depths of the U, and this is the first delivery units. .. we start going through the process of new way of looking at space T. .. on the principle of universal order to take wings without worrying about, would I have food, would I have shelter , the defense, the medicine that I need. anything. These 2 units next to each other will bring a completion to the whole of mankind's dream of deep space travel. (:16). One of these systems can be set to fly. I purposely set these systems to show the first flight system in the coming weeks. System is set to behave as Earth, to create lift and motion. I showed this for the first time over 12 years ago, about the same time to the office of his eminence A K of Iran and that time president Akmad S, who hide and stole the T, and in that way Iran became hidden knowledge of the space flight. Now we bring it forward as KS, as people of One Nation, One Planet, On e race, we all will see the system, we all will go through it, enjoy the pleasures of the first steps, what I call the first crawling steps of man to endeavor to open the space for mankind. We are proud to be the first passenger of the space from this planet. In so many ways, combination of what we have taught, did the first plasma reactors built from 12 - 14 years ago, first in Belgium, then competed in Iran, then tested in Belgium, then transferring the understanding of the plasma T conversion of the materials from matter to Nano, N to Gans, to become the new energy sources for us to understand the play game of the fields. This was the purpose of the Gans T, for mankind to have something to play with , to test with. (:18). To understand how fields interact with in the U. And in that process, start learning the process of interaction, living in the depth of the space. We went from material to N, from N to Gans, from Gans to field transfer and energy. So we have learned the process step by step. Now with this process, these two machines, which will be shown, we actually shown the working combination of this in China some 3 years ago, which was built in the city of Sanya, we tested with the Chinese team, the original structure of this machine. How we could create energies, how we could create conditions of plasma in the liquid depth of the U. We replicated it, we learned a lot, and thanks to David in China, we brought the knowledge forward by decades. In so many ways, .. allowed us to take the next step in being able to build systems that we can walk in to take energy, food, to create conditions for enhancing the body of the man, from the energies which absorbs from the depth of the space.

By the knowledge and its principle, as we have shown man takes 80% of his energy from his environment, not by food, but by absorption of fields. Now we'll release systems, with combination of both systems, not only we can produce food the way the man needs, and materials, we can produce at the same time food, (:20). You feel like a banana, mankind should be able to create not only the taste, texture, emotion, but the energy of the banana. In so many ways, we have broken through to a new era in the space T.

I am sure by the time the rest of the units, gets delivered into AZ, Canada, Thailand, Germany, Austria, and hopefully in Brazil, in the next 2 to 3 months, that now we learned and developed and we fine tune many aspects and T of these machines, then we endeavor to use this T to bring peace to mankind. In a way the next generation of the new systems

is on the way. … this is one job done the next one is on the way. You'll see the generation of the systems which will be developed for individuals at home where you can do everything you need at home. We endeavor to produce systems where people can walk in at point of disaster, that they can be fed, injured, they can be repaired. They are hungry they can overcome the hunger, but in a process we can do mass feeding. ..

I already have designed the next generation, and once these complete in the next couple of months, we start delivering, (:22). large amount of orders which have come in, and singed agreements for many, many. we'll start developing the next step. Single flight system. single systems that can fly the depth of the U, or we can travel on this planet with no problem. Now that we have put these 2 systems on the ground and can be seen, there is no more dreaming. The reality is with us, and the beauty of the T is with us, In so many ways, once we open the videos for you, after 10:30 the world can the leap in the knowledge of the science of the space T.

Today is a glorious day for all the KF followers who have been around us for a long time. They were hoping, their wish, and now you can see the collective fruits of all our works, every single one of us in one way or another have contributed to the development and the spread of the knowledge. And now that we have reached this stage, we will see more of, we will see many ..much more, many of you will join us in the space T development. We'll see the extension to the knowledge … The beauty of the new T, (:24). is the simplicity of it, which means any one of us can reach the point of knowledge. It's not exclusive, it doesn't belong to no government and sharing the knowledge so freely .. we'll see the beginning of a new space race by many governments now that we show this .. Jet propulsion and all their fancy work, has been a step for us that we can live in the space. Now we show the reality, how it is done. how completely we have achieved the knowledge. In so many ways, what we were afraid of, we have achieved … it's a big leap ..

(:26). to people who have been waiting for mankind to take this step. .. this is one of the biggest changes in space T, and in coming time our children and grand children
we make Earth habitable for others who could not be part of us, to join us, and the same time let's us become part of them, for we could not join them due to our lack of knowledge. The structure of the man is very weak, extremely weak, so with this T we give you that support, that extension to be able to live and survive in the depth of space.

My congratulations goes to China , WL …

(:28). On the other hand the thanks for this achievement goes to all of you in keeping the F and the work of the F internationally live. .. **it's been a collective effort of the KF worldwide .. to break through. We have no links with no government**, we never took a penny from a government that they could dictate, and at the same time we gave the pleasure of the sharing of the knowledge to all of us, every individual making Gans's producing system that can save life.
We lead the way with breakthrough science … We have broken through.

Most important thing today is to show the T, not to the world leaders, but to the KF followers as One Nation, we build it as One Nation we completed it.
We will show the flight system. .. One of the most important criteria of this T is, (:30). The most important part is that we stayed independent, independent of any government. We took nothing from no government, and we stayed independent. And this independency has given us a lot of power. **We can negotiate peace on our terms**. We can negotiate national food security on our terms. We don't need to wait for harvests. .. We see

(:32). This is the first step to create One Nation
We have one problem down the line,, how the world leaders will stand for this. How would they commit themselves to peace.
Are there any questions? (:34).

Q: Are there ways to reverse the DNA changes due to vaccinations?
K- The position with what we call vaccination, change of (due to) vaccination, is something that has to be developed, can be done, in the coming time. Yes, it can be done. Everything from now on is possible. It depends on the knowledge of man, and how much mankind wants to take that step. There is no limitation anymore unless we put the limitation on ourselves. What I call genetic modification of human gene, to correct itself to original state is possible. It's not a dream anymore. And how our leaders in science and T

The world of Chemistry, Physics all has changed with this situation. (:36). Now we have the possibility to explore new ways in science …

You see how beautifully versatile they are ..
they can produce a combination of emotions, material, effects.

(:38). It is part of us, it is part of what we want to achieve
It's possible to change any dimension to what I call, gene, or any gene damages.

Divisions Purposely Being Setup in Brazil Groups:

Q: .. From Brazil, my question is because people here in Brazil question technology and defame their work by inducing others to see it as a threat, this occurs within the groups themselves. What does Mr. Keshe have to say to these people?
K- Nothing, what happened, .. as we always said, many, many groups, many people use the KF to confirm their existence. They don't existence if we do not show the technology. And we know what is happening, we see what is happening. We see the way people are moving around with the technology. It’s in a way, we know how people take that kind of a steps to confirm their existence. Let it be. they have to, why some people turn ugly,

because by ugliness we notice them. We pay attention to them. We satisfy their need to confirm their existence. We have seen this how many times. Don't be bothered because at the end of it, (:40). the technology has come to a position of sharing knowledge and with it we share knowledge freely. We have seen many people, we've seen the guy from Germany, who went backwards, he wrote to every embassy, and signed under "X," what did he do for us? very simply we took the knowledge to the Austrians free. As we announced on Tuesday, we announce it again, the exhibition is absolutely free to the citizens of Austria. At the same time we compile all the names and whoever they are, and in due course, KF will allow them to become and work with the factory which is getting setup in Austria. Now that the system is shown, these are pre-sold, advanced sold. So now we create the jobs, we run as a governing, government, we don't run as what we call, a fringe organization. So those people, they put the effort trying to block many things. Trying to what do call, bring "all sorts of things" to the Foundation to the other governments. What do we do? We took it to the nation, now you will understand in the coming weeks, all those who visit, Austrians, in this time of trouble, are what we call, Corona and so many jobs lost, (:42). There are 2 to 3,000 jobs plus on the card, on the table for Austrians. Do you think they are going to listen to a bunch of these people.

We have seen in Brazil, the reason .. Let me explain to you what happened in Brazil. In Brazil we had 3 people who hijacked the KF, one was the UC member of the Portuguese language from Portugal. Then we had one lady who threatened everybody, and we don't see her much around, because if you want to speak to Mr. Keshe you have to speak to her and she makes decisions. And then we had one guy who we gave a platform to speak at a conference, and now he thinks he is god, and he has done a lot of dishonorable things to the Brazilians and we wanted him out of the KF. And he walked out himself, he started all the mayhem. He is a disgrace to his work, because he used the KF to do a lot of funny things using the universities and everything else, and everybody realized what he is doing, now to cover his misconduct, he is splitting the KF, but the KF Brazil will not split, because of one misconduct old man. On 21st of October we have an online Zoom conference with many, many thousands and thousands of KF followers and the government officials in Brazil, as Corona doesn't allow us to travel as such. And so don't be worried about it. In Brazil the gentleman who started this, he did a lot of wrong doing to a lot of people and when he was discovered he blamed the KF. Mr. Mendez (??) has a huge problem, and he is the guy who is splitting, because he has, I think he has a couple of court cases which he tries to bypass too. (:44). We have another guy listening. So we understand. Don't worry about what happened, with people trying to split. The technology stands, millions of people follow it. It's such a big family, extending so big, you always find a few misconducts.

KF Brazil is solid, and last week, you had 1 hour in your national television broadcast about the KF, which was done by Rafael. And then 2 popular requests was shown for the second time the following day, which shows everything with the Gans's and how people can help themselves with Corona. In so many ways, the number of the number of the KF following the knowledge is increasing everyday in Brazil by hundreds, by thousands everyday. There is every week 1 or 2 interviews and all these have become, because of Rafael. We have established a company in Brazil. And these people wanted to be the

head of the Foundation, and do all the crooked business behind it, and they didn't get a chance. That's how they tried to split, because as you have seen the misconduct, they wanted now to carry on with the same thing in other ways. And Rafael as a correct follower of the Foundation ethos, stood his ground, and they could not rob and steal, and do whatever they did, and do whatever they wanted to do. That's why in Brazil it is just one man, and he tries to do, because go and see his misconducts, which we wanted him out of the KF. Mendez (??) was brought in by Caroline. All these people who you see damage the Foundation have been brought up by one person. And now one is gone the rest will follow. (:46). These were the people who were embedded in the Foundation, by those who were close to us to do these damages. And now they try to do. We'll see this in 2 or 3 other countries. Do not worry about it.

France and Germany we support solidly, I have asked the Dutch team which is the home base of the KF, to organize for me to give small lectures, 40, 50, to 100 people, 2 - 3 of them in the next couple of months. I'll go back to Holland, it's the home of the Foundation, and this is where we found the strength, and now we go back to Holland, where one of the first places, what we call the "fireside" teachings took place originally. And the Dutch team has supported us solidly, the same with the Belgium team. In respond I have asked them to setup a small conference, not a conferences, the way we used to do, fireside, 10, 20, 50, 100 people, we used to discuss, we used to teach. We go back to our roots. And this is where I feel at home …

(:48).

.. Don't worry about it, Brazil is growing very fast. Just go and see what happened on one interview on a main television channel in Brazil with Rafael. These people who create division, these are the people who wanted to be on that seat and in a way, no one deserves that seat more than Rafael, the way he has conducted, the way he is running the teaching, and the way Brazilian team is growing by ?? strength, day by day. Stay solid and do not look at what a few does, and what they do, look at why they do it. Then you see if it goes with our work, if it sits with our work. Those divisions in Brazil came because Rafael stood solid, the way it had to be done the correct way, in constant contact with us. (:50). And they didn't want to do it. They were setting up different ways of doing things and he stopped it. And now they are leaving, we wanted them to leave as usual, we don't ask unless they really do something totally wrong, ?? tolerate that they grow. And the left. We thank Mr. ?? Munis) left the Foundation. Because of massive misconducts. And they came on the back of an introduction of a Belgian.
Q: .. I am hearing your answer and I know who each of them are.

Q: Is it correct to say the creatures of Earth have until now been in the womb of our mother, and that now we are born into the Universe to live independently, beyond the atmosphere, if we wish to do so?
K- .. yes, the answer is yes. Of course yes, now this is the first steps. These are the first steps we are taking to reach that point.
Q: A very happy birthday indeed.

K- Happy birthday to many of us, this is the birth point of knowledge and T and we all knew and we have been waiting for it. We all understood it, and we have been waiting for it. (:52).
Q: .. the soul of each one, they have a name, how is it assigned?
K- You mean the systems? **We don't give names to souls. I pray for them from the time when the design, and when the reactors are loaded a few days ago. These reactors are loaded in a way that no one can copy**. And they work so effectively that no one can copy. They are not usual. Many people will try to do it. These systems work on what we call, the heartbeat. They work on the principle and ethos of the Earth, the Sun, the way our life was create, the way we will see the next steps of the development of the human body in deep space. In so many ways, we need to understand how, and to what extent we understand the whole progress of the knowledge. (:54).

Q: Is there any special word to communicate from the soul with the STP?
K- I love you.

The Technology is Already Being Implemented Car and Phone Batteries:

Q: .. Is the T being implemented in the motor car battery for recharging continuously?
K- The battery operation is already partially used in Tesla cars. The Nano T, the concept of N T and plasma T is already used in many mobile phones you use. As I said if you listened to some of the teachings before, we didn't now this. .. I met a Chinese woman who wanted to meet us as a KS, (:56). and in trying to thank, in us trying to help, her knowledge helping her mother, she used the Gans T, she told us, she is part of the Erickson research, and this is how they developed many of the new batteries, and this is how she knew about the KF work, because it is used in Eriksson batteries, 10 years ago. A lot of the knowledge used, because we use open source, scientists from different organizations are taking it up and using it. This is the beauty of it. Many parts of the T is used by different organization because we went at open sourcing. You will see many things, many people will come up with new products as a spin-off of this knowledge as they add their knowledge to it. And in the new generation of what we call batteries and power generation, you will see many, many additions to energy production. Yes it is used, the space T. NASA is working heavily to ?? decipher the lift and motion. We know that because, as you know I am the only Iranian nuclear physicist who has received clearance by organized security, (:58). and by NASA lawyers to enter NASA "black budget." They will not do that to you if they did not have and they were not studying the T. You will see many implications.

Corruption in Iran and Securities Help KF:

Today I was watching an Iranian physicist, he is a bio-physicist, he has used our T of the plasma has made an air filter system, which in Iran again office of Ayatollah refused to grant him a license. He has taken it to Turkey, and started the same T in Turkey, and welcomed by the Turkish government and they start mass production. We have a huge crisis in Iran, the bribery and everything which goes with it, in the offices of the Ministry of Health. We are not the only group which is blocked, we've seen radical changes in

Iran, if you were in the Iranian listeners on Monday. A lot has been cleared in Iran, there was a group which was trying to hijack the T under the cover of the leadership. But now that we exposed as by the request of the Iran security people who came live online on Monday and confirmed the logo of KF ??? is a legitimate organization in Iran, Where they were telling us this is not and other things. They were trying to abuse their position to steal T and then legal action by the government in respect to these people has taken place and they follow. A lot of people will go through this phase, misconduct of their own. They'll go that way. And the .. 2 people in Iran security apparatus, (1:00). they asked to be live online and explain to the Iranian KS that the KF is a legitimate organization in Iran and respected. And were are taking the T back to Iran. Governments who understand what we do for them they stand by us. I stay loyal to my nation, and to the Iranian leadership, and to the Sepah, on the development of the T for space, and supporting the Iranian sick and needy. The same will stand for the rest of the nations. I do and I support the whole 190 odd democracies on this planet. To me it's One Nation, just different parts, different mentalities. something a lot of you have to realize, being born in Iran, living in England, in Italy, Belgium, Africa, in China, to me it's all one family with different beauties and this is how we look at it, and take it, I cannot be biased and to one nation or the other. Some are a bit crooked, some are a bit straight, some of them try to do crooked jobs, but at the end it's a big family. 7 billion with 7 billion ?? and we got to embrace all of them. (1:02).
Any other questions?

Q: How big are **the home systems. .**
K- It will fit in a cardboard

(1:04). Q:

(1:12).

(1:14). We don't extract, we give the condition for position.
Q: .. I want to help humanity through the KF, … this is a dream I want to fulfill.
repeats ..
K- The help will come in a very simple way, (1:16). just teach. Open sourcing and teaching will bring what you are looking for. And that is all we can do. We don't expect anymore. We got to carry on the way we done, teaching .. thousands and thousands of people join the F, understanding the T everyday. and very few will go with different ways with it. We have to understand how we teach and what they take from it is their own structure. Our job is to teach freely. In time they will use, and we don't know how, and the way it will be done. You cannot dictate. this is a child which we nourish as knowledge and we let it loose to take span in the soul and brain of the man. And this is the way I always looked at it. (1:18). Is to sow the seed of knowledge..
Just teach the way we do today. Today is a special day …

We don't show the dignitaries who come to see. Because we don't go to show. We have never been here to show. The team of buyers coming .. they go through the same process.

(1:20).
Never choose what to teach. teach then they choose themselves.
Any other question?

Q: how to decalcify the Pineal gland with plasma?
K- Speak to the doctors of the KF they will be taught.
Q: So soon we'll see international flying cars.
K- Yes, if there are not crooked people in your structure to stop it. Yes.

(1:22). In Belgium, the agents of the devil. they said, do you have a flying license .

The car was there, available 9 years ago.

Q: Can the system be protected from misuse

K- Inherently yes.
yes, because it works on the beauty of humanity. and it is there for man to see.
Q: Will there be any patients today. sit in unit (1:24).
K- No, nobody will go in the systems

These systems are enhancement unit not to be used for anything else.

Any other question?

Q: …
K- Your welcome (1:26).
Q: Does our body represents our solar systems .

K- We are a copy of the Universe, and Earth is a copy of the U, and the solar system is the same. So in essence we carry different parts of operation,
But it is adapted to according to our knowledge, to our understanding , or what our needs are.

Q: What is the difference between the animal stacker and the vertical people stacker, is it the same middle plate but soul at the top, and plate at eh side and soul at the 3rd position?
K- It is how you want it to be, and how you set it up, and what is the wish for. (1:28). you create for the STM, or you create for the soul of your dog

Q; Is there a point on Earth where there is dark matter, anti-matter, and matter, where the spaceship can devour? .. like eat, SS can rejuvenate?
K- In the cell of the body of the man, every cell of you has that power. If you understood the T that's what it is, (1:30). part of the T. The systems we have developed is part of the understanding of this.
We are going through the phases of completion in the next 30 to 40 minutes we'll go live on the platform of the exhibition. That's one of the things happen last minute as usual and then you'll see the system. We facilitate everything possible ..

R-
K- After the break there are a few pieces .. (1:32). The whole thing is planned for the 2 o'clock opening,.. last touches most important. (1:34).
Any other question?
Q: how does plasma react or correspond to different surfaces, such as granite .. mirrors and rubber?
K- It's a matter state, and reacts exactly like every other things, it reacts like our body.
Repeats .. (1:36).
K- The same as it attracts with everything else. . .
R-
K- is the threshold of the field transfer. What does this mean, above that will pass through, below it we can contain it.

Even a metal has the same property, it's the order of the magnitude. (1:38). If it is stronger then the existing one it can hold it, contain it.
R- N coating good to contain the plasma
K-

Any other question? (1:40).
Q: **Can pedophiles, rapist fully rehabilitate themselves with plasma?**
K- Yes, if you go back to the teaching some time ago. .. when the time comes the man embraces this T fully. there will be no prisons ..

(1:42).
Q: I built a dynamic reactor health ..

(1:44).
K- I don't know I am not there so I cannot explain. So a lot of people see things and they want it to be explained,

(1:46).
(1:48). Any other questions?

Q: Can the system be used on animals?
K-Yes,

(1:50). Any other questions/
The new space era, as we call it, is a T which will become a part of the life of every man, (1:52). and we will live this life. We will enjoy this life immensely, because we have chosen a new life, we have chosen to be part of totality of the structure of the U. Mankind is taking a known leap, not an unknown leap
it's part of what we are born with, what we live with, it is part of us. We are so used to it, we do not see it, we are so much apart of it we don't appreciate it, we are not aware of it, we chose not to be aware of it. (1:54). We live through its operation , we breath through its operate , love, live one way or another we have to come to understand the totality of it.

(1:56).

(2:12).
K- The question I want to ask you is in a different way. How do you see the new T will change your life and the life of your children? What is the difference now that you know so much more. You are the cornerstone of this T, you are the developers of it. In one way or another you have developed so many parts of it. (2:14). .. parts of our society that you want to encourage. Is this part of the T you want to enhance? Is this where you want the humanity to go. Because from now on, the way we have structured this T, and the understanding of it is an open source. Whatever you develop will become part of what the future mankind might use. How do you see your emergence, your game play in this new game. From now on, it not anymore KF, it's you individuals who develop this. In so many ways, now it's a collective effort of all of us, in what we decide society to do with ?? this. Because .. once we collaborate with leading nations, who will be here this afternoon, they will decide the future of the destiny of mankind in the space development. We have ambassadors, attachés from the leading nations in the world with us, this afternoon. They are the power in the space development, they are the decision makers where man will take the next steps. (2:16). … they decide. And what will they decide with what they see. Plus they already know the T.

This exhibition is to change the course of humanity and with it will come new rules, regulations, new parameters, new understanding, new work for many of our leaders, who didn't know how to lead up to now. In so many ways, the beauty of the T is in its application of bringing peace and .. for us to be part of it. We are the generation which will say, we were there, we were part of it, we made the first Gans's. We did the first thing with the Corona.
One of our main aims, targets, (2:18). is one point, and one point only to let the world decision makers know, the game of space, of how they behave towards their citizens, behave towards their the rest of humanity, has changed. We need to show the T in it beauty, and the T has taken a new course. They lead us to this, many scientists, and now we lead the world to a new dimension. I remember when the Berlin Wall came down we wanted to be there. And what we see, world scientists want to be part of this. it doesn't have to be in one place. They take the knowledge from the Internet, from every one do us and they develop it. In so many ways, the Corona and gap in the knowledge was needed, that we all step into an Era of science and T. The mankind when it comes down to the Corona will start looking for new ways. (2:20).

Q: .. you previously indicated that **man's self-awareness of his soul is the key for solving many dilemmas of the man, but it can't be taught**. … repeats .. so how will the billions discover more, what will trigger their search. In what way does the Covid play a role, I am sure it does , can you take us to deeper understanding?
K- I think we will all mature in different ways, gradually to it. We all don't become space scientists tomorrow. We decide we decide in what to take from the knowledge, and … we establish a new order. Man will let the STM decide. The knowledge will become so free

that all of us will have access to it. We have shown in .. the free patent world, in the dimension of (2:22). free access to knowledge and T, how you all have shared it, how we all brought it in. Is the knowledge of the man part of its transition. Now we evolved as much to understand the physical world, now we go through the scientific revolution. We went through it in the 50s and 60s in electronics. Now it's the world of plasma, Gans T, understanding the uniqueness of knowledge. Then we take the next step and see where we go. I think today's presentation to some of the worlds ambassadors and dignitaries of the different governments when they turn up. They'll be shocked to death in how the whole evolution in science has to be taken up, that it is with everyone, it's not one nation anymore of Russia, China, or whatever, but it's One Nation of humanity. (2:24).

I sit here today and look at this exhibition and I look at more or less 50 years of work. Over half a century of dedication. Dedication to peace, to science, to change the course of humanity, and whatever you do, with such a work you always feel good, it feels satisfied to be able to deliver. And you are always given a gift at the end of it. And that gift has been peace for humanity, what could not be achieved in thousands of years. And there are other gifts which comes with it, we enjoy the pleasure of science, T, and gradually we open up to understanding more. (2:26).
Any other question?

Q; How much will K change when he uses the system for himself?
K- Not much. I am happy the way I am, I am content with where I stand. The problem with this T, it's so powerful that it can make you fearless. It makes you arrogant in the way of knowledge and T, but in that arrogance brings humbleness. When mankind will learn this T, he will use it wherever he needs it. It's not there that it's there. You want breakfast you are hungry, you use it. You find something gone wrong you use it. It's not that it is there all the time. … (2:28). You use it when you want to have the pleasures of it, and the science is that Rolls Royce, you park it, and whenever you need be it for health, loving, whatever you take it out of the garage of your soul and use, it. In so many ways, we have become accustom to so much abuse the pleasures have been forgotten. We go to work 9 to 5, we are abused to have something to eat, to have a shelter. I don't ?? eat, we have seen it with Corona, life will go on. We go for a break, when we come back we open the video channels, and with it we open a new era for science …

(2:30). We have the Brazilian team with us, US, Nigeria … we have moved the factory into Alex. It has to be known that Benjamin in Ghana was brought in by Belgium, and now you understand. Now we open ?? the Belgium has already left the Foundation for a few weeks. That atrocity of what I call, beauty of the knowledge has come , and come through its application. and it will be relentless, from now on we deal with the governments to change your conditions. We are proud who we are proud where we come form, but there will be no atrocities, no killing, and no abuse by man. Because we make everything free, at the point of inception. At the point of hunger, you can have it free. You have illness, you have it free. You want to fly in any corner of this planet you'll have it free. Monetary system will be something in the back of the mind of the man, as something happened in the history books. (2:32). I'll answer the last question .

.. we'll try to make a feeling that you are part of us, you are with us, you are within the structure of the exhibition. Make your way to be part of this beautiful creation …

Q: .. **the professor of the university asks if there is a instrument to verify the plasma content in plasma water?** repeats .. (2:34). repeats again
K- What does that mean?
Q: .. repeats again ..
K- What does content mean? H and O. ..
R- Or is it the fields that are transferred to the water, is that what they are trying to measure. (2:36).
K- I don't know how you want to explain it. Do you want to understand the emotion of the water or the material of the water? Pharmacists can do that for you. I am a physicist but can we measure the emotion of it, Now it is possible and we are, we have seen we have developed T to do this.
R- If you hold that water in your hands could you sense it enough to say this is effective plasma water … what would you do Mr. Keshe would you sense right away.
K- If you hold a Gans cup in your hands (1 sec please) . (2:38). When I hold Gans water in my hand, with experience, most of the time, we can tell what the Gans is, by the energy absorbed in the palm of the hand. You taste it, you receive the energy which is ?? taste of the metal, or material. Yes you feel, I do that quite often. Last week .. when we were loading the EU, I was showing the KS, my finger, my hand, my nerve changed. The structure of the skins changes. You should be able to do that. Many of us should be able to do this, by holding the Gans we should be able to say what energies we absorb from it. What Gans's for what purpose, (2:40). to what extent everything is adding up to what we hold. .. if you ever held energy stones like the gems, you should be able to see this. feel this. The same thing with the Gans. We should be able to feel it, .. see even the motions when we hold the Gans's in your hands, how they start changing, rotating. You interact with the Gans's it's not just something different. it's energy system.
R- .. (2:42).

Okay, we go onto promotions and then we go onto
(2:43). videos >> (2:49).

Go live to Linz. (2:50). As you can see we are in exhibition. We have limitations, some of it can be shown and some cannot be shown. ..

Most famous reactor, first reactor built in Iran. the babies built forward.
then the Gans systems. then we go into what you have never seen. There are many Gans's here which you have never seen. This is part of the package of Gans's we show. (2:52). The stock of Gans's in head office is huge ..

we produce cosmic rays for a given condition, we produce organs. on the table some 24 combinations ..
some of these are the most rarest materials man can get hold of.
These are the 5 reactors, you all are making.

And for the first time the Body Enhancement Unit.
It covers energy thing man will need to survive in the space..
(2:54).
The second unit, creates every element man needs in the space.
There is a similarity between the two ..
inside is a sun. we have replicated the solar system.

(2:56).

(2:58). A lot of things from today changes, because up to now it was a theory, could be done, we've shown it in small pieces. Now it is a reality. Now it's what we possess. It's possessed as a knowledge. as equipment, as data on material which has been shown. And the world of science will change it, will build what it needs. Will China have a hold on the rare earth materials anymore, that now you can produce even more rare earth than rare earth materials of the cosmos level in these machines. I promise one thing, .. we change the course of humanity. we bring it change it, with it we bring new dimension, now understanding, now you have seen what you have been waiting for. .. that mankind can feed his physicality and create his life. And we have completed it. As we walk out of the arena we will come to one point. The other things you've seen the agriculture unit will change everything for us. (3:00). even if we want to feed the physicality. We have seen different materials in different combination. at home ,, whatever you need
This is again handmade of the Chinese. one of the most beautiful groups in the KF
you can cleanup the planet … we can choose what we absorb.
The MaGrav Units …

(3:02).
The 2 Units will become space .. will be able to fly on the wish of the STM.

Are there any questions?

R- Congratulations ..
K- We are in the international center of the city of Linz. (3:04). From now on our work carries on with the governments for the space development. One of the first dignitaries this afternoon is the top 2 nations in space development. They requested to be here. and called to confirm this morning, and they expect to see the systems. You don't need to guess much who the other one is. The world of space development changes because they see it in physicality.

Any other question?

Q: Is it able to create gold?
K- Next question, the man is not mature.
Q: (3:06). can you send fields of support along the Danube river …
R- We actually did that for awhile in the Plasma reactor group… How can we send support?

K- Your thoughts are support. The elevation of the soul comes through sending, giving, and sharing.
R-
K- We would like to thank …
From here it goes across the world .

Visit to Concentration Camps - Have Wars Ended Where they Started:

(3:08). .. see one of the camps from the Second World War .. a few kilometers from the exhibition . the furnaces. . the man went to kill so extreme, the same city comes life. Was that destiny where one finishes a new start, maybe. **Are we changing the gas chambers with the chambers of life. and has mankind changed so much in such a short time**. When you touch the walls of the gas chamber gives you pain. when you touch the walls of the EU joy .. (3:10).
Have the wars of mankind finished in where they actually started.

Would with these units create peaceful leaders, not only on this planet but beyond, the answer is yes. Such a big contrast within the same city, one become exclusive and one become inclusive, has mankind matured to this point.
Any other question.

(3:12). WL: Thank you so much ..
K- remember we saw the units in the airport while we were going to the factory, and it was like an egg. Now it has a reality.
WL: . it's raining heavily here .. I feel it's like a celebration . the heaven is opening.
K- . It happened to us when we went to Vatican, and it happened to us whenever we had the world leaders with us. Every time there is a time of the change, there is a storm . So it is usual. I would love to thank you for all your work.. it's a child of your work
WL-
(3:14).
Q: .. is this EU also helpful for beings in other dimensions when it works.
K- This system is a universal system, so it belongs to the U but it enhances. .. Yes. . if it good for humanity it's good for the UC. These are universal system they belong to all of us. Not just one race. to the totality of humanity and the (3:16). In essence yes.
Any other question?

Q: What does a country have to do to receive these EU and how long would it take to receive and start operating them?
K- EU can be bought by the nations, and the ?? KF invests in different ways in the process. We've seen a guy in Germany who is very disruptive and has gone into putting all sorts of things out, we have setup a structure within the KF. We support those who like to be supported, and with it we bring a lot of new T with it. and in that process it's usually .. a number of groups we are meeting in next few days, (3:18). they are investing in a number of nations in one go. There investment is not just one, but as a national organization across. This is the difference in the problem …

From today the price goes to 1 million, which was originally
.. we match one to one, if they buy 2 units we add a third one to it. (3:20). Yes, we have a structure with investors. …
R- What would be the ideal configuration?
K- 12 they are a perfect combination. the middle brings a central field transfer. You need to have a field configuration that allows transfer of energies, extraction of energies, allows a lot of configuration.
R- What would be the configuration of 12 , just 12 in circle with the center empty.
K- Yes
R- all the heads of the people if they were lying down would be together. (3:22).
K- yes…
R- Alex was considering a configuration of 10 with 3 groups of 3,.. 120 degrees apart in a triangle with a single in the center.
K- No, that's not .. a 10 configuration, the 12 configuration. and .. creating a .. field flow which can be accessible by many energies.
R- .. group of 3 120 degree angle.
K- Groups of 3 creates a different environment. different strength.
..
any ways
R- if it was a lesser
K- Our advice is 3 as a minimum. You always have to have a material unit as part of the 3. (3:24).
R- Would they always be in a circle.
K- You have to look at the structure of the materials .

K- .. what is it used for.
The system has to viable to financially run. The charitable organizations which finance millions of dollars into this , we advise them to run the system and be free to the users, is to add a material unit into it, while you produce what is needed that it can be sold that it can provide financial support to be able to deliver the systems free. .. but at the same time the materials unit allows the extraction of the fields which are not needed in the combination system in the reactors. There are many reasons why we advise it this way. So you create a condition where the fields flow will bring in what you need. the way you need. And at the same time financially support the projects. (3:26).
Q; It's more beautiful then an arms exhibition, peace is more beautiful then war.
K- In so many ways, we need to do it, .. we cannot stop. As I told you, we'll change the factories from arms to peace ..
R-
(3:28).
K- The world leaders have to decide on this. and those who finance it. and how it can be understood, How mankind decides to go , which way.
R- would countries give these units to enemies to help establish peace in those countries

K- We'll see how philanthropists react..
To what extent do we want to produce these things ..
I have seen how people have changed ..

(3:30).

Man has come to 2 things, arrows, rockets aircraft. with the new T those are all sorted. Secondly we can't do because we can't get the armies together.
On Sunday we are going on national TV ..

(3:32). We can enforce the STM, and then see what is the next step. We are we have to move to become a peaceful creatures we have no choice.
Q: Can you send healing to a remote person from these EU ?
K- Yes. Why not.
R- Perhaps with a sample of DNA AA would that be useful.?
K- Possible. It depends what are we expecting of it. What is our ultimate goal of it.
(3:34). What do we want to do what? can we do harm with this, can we do good with this?
Any other points or we call it a day?

Q: Can we achieve the same result of entering these all by ourselves . .. I am a replication of the U?
K- So let him try.
(3:36). Thank you very much for today. I think 3rd September, 2020 will be remembered in some parts as where the world comes to see the reality of the new space and new knowledge of man. And the beauty of it is it is shared so simply and so openly. I wonder if I put one of the world leaders who is so eager to start war, to sow he is powerful, how would he come out of this chair. Would we get back a true man of peace, or would we get a man without a soul. As the soul decides to leave the physicality, as it is do shameful? Thank you for today. This is a culmination of years of work and ?? man's in to space. Maybe in the next exhibition in Tehran will bring you to fly with us. join us in the flight .> bring a new dimension in the life of man. (3:38).

345th Knowledge Seekers Workshop September 10th, 2020

52 min

ENGLISH TRANSCRIPTION

(:14). … As you have seen it has taken a long time to reach where we are in the space T. Mankind has moved so far, copying the work of the birds, as you could see, could touch. And the knowledge of the man has reached a point that he can fly, ?? his place, his medicine, his food in the depth of the U. Which means with this basic T we have shown in Linz, we have made man independent of this planet. In the process of development we have learned a lot, we learned how to fly, create energy , fields which are necessary for different applications, but now man has become totally independent of the planet. Of course you have to remember this is only the beginning of the journey, we see everything as we want, (:16). we work to attain new knowledge and with it we learn to be able to share, to share knowledge, wisdom, emotion . The beauty of these new T for the first time mankind has the ability to share emotion, to enhance emotion. To bring the physicality and emotion to be unified, that mankind can move further, find new dimensions. The units showing in Linz and the ones showing in different parts of the world, will bring a new dimension to all of us. Today we see them as 2 units, and in the coming time they'll become as common as we go to take a picture in the picture boxes in a train station, in hospitals. What we see is a new bright future for mankind. When you go into the unit you don't need to go through the illness, that you find the full development of the cancer. The body, the emotion which will lead to the cancer is already within the first hours processed, handled, and the life changes. (:18). Mankind will never see cancer anymore .. or illnesses the way we are used to anymore. Because for an illness to show itself take years, where you have handled it at the beginning, at the outset. Mankind will write the history of medicine as part of the progress of his own understanding of his own structure, and no more. We will learn to be correct that we don't even lead to that position to create in an onset. The development of these machines as we see today, is and will be a breakthrough for humanity.

The beauty of it is, that we will strengthen this T further, … a new system will be released in the coming weeks and months. This new system will be individual system, which means you can keep at home. It will be a totally different T then what is used in these machines. At the same time, the new T breakthrough which is to come out and be released, will bring a new dimension to human life. The most important part we'll start training man to live and be as in the space, never ending life. (:20). What this means at the moment as a human race, we rest 8 hours a day, because the body needs to repair itself. The body needs to replenish, extract and give new energies, in a faster way. With the new T man is replenished at the point of need, and you'll find out slowly sleep becomes eradicated for the life of the man. It's like the Sun, it shines all the time, it does not have an 8 hours break. This process is what most of the U Community lives through, lives with, and now mankind has to learn. There is no end, it is one continuous joy, not to miss a thing, and to be a part of all. Resting time is the habit of the man, and with these new T as they emerge, people will find out there is no need to rest, the body continuously will add to itself. The new versions and further development will make that very clear. In that process man will learn not to become aggressive, .. be peaceful. Man will learn that the life is one continuation to be part of, and be the creator of that part. .. Man always strived to have materials. Now man can have materials at any point.

In the future systems, (:22). which we'll release in coming months, as you understand the merger of the 2 units together, what you imagine you can make in ?? Today 3-D systems will become a reality in the dimension of the thought of the man. You think of a cup, in the other system you make the cup, the shape, color, and everything else you can imagine. The development of these T opens a new horizon and the moment you put your thoughts in a computer program and you transfer it, to be 3-D printed. With the new T you don't need the 3-D printer, as the combination of the work of the system, as you think and the reactors on the other side will do as you wish. These are not far reaching, we'll see it in the next 2 years .. to be in the reach of the man. Because once the society takes hold of the knowledge, it becomes unlimited. Do you need to go to the shop to buy a curtain, a furniture, the way you want it, the color you want, and the shape you want it. In the coming time life will change, .. man starts doing the same in the U, we make things as we think. And value it because it is a value of our thoughts, and expression of our soul. In the coming weeks and months, KF Austria will release a number of new T. (:24). We were waiting for the exhibition to open, and in negotiation and the ways we do, we try to spread the manufacturing of the goods across the planet.

The exhibition center in Liz most probably become a permanent place for demonstration of the new T of the KF. We'll reside in this place as we can, as long as possible to show new T, people from all over the world will come to Linz to see the latest developments. The KF Austria will release your elusive generator which you have been waiting for, for so long. The structure of it, the new version of it will be displayed in the center, and with it we create new fields within the structure. In the past few days, many times we looked at how this exhibition can be added to the KF permanent place that the world can come and see. As you are aware we were showing the system and with it we watched and monitored how the structure will take place, (:26). and how it will be added to the knowledge of the man. … we are allowing limited numbers of people in … allows us to be in control of who, what and how we want to disseminate the knowledge the first time. As we open the doors this week to public … those interested in the purchase of the reactors .. KF Linz has become a reality that world T and science has to accept. The new knowledge now has a home … (:28). is the work of the F. In the coming time we allow schools to come in. Universities around the world to touch, feel, be a part of .

The beauty fo these 2 system is that can transfer mankind's, and understanding of his knowledge so freely and openly. If you understand the combination of the work of the 2 systems, you'll understand in interaction of the two, mankind can establish all of his needs. This is why we setup 2 units, one for materials and one for the body of the man. If you read the book #1, and go to book #2 and 3, there is one space gap which is missing. And in that >> position it is important for all of us to comprehend the totality of the knowledge. What is interesting when you stand in-between the 2, you understand the one reality, and that a new science, T, understanding of totality has appeared. With T we bring peace, and with peace we bring friendship, (:30). irrespective of color, race, religion. .. if the governments don't support their own peace, governments need to understand the new understanding. If you stand in-between the 2 systems, you come to understand something very interesting, on the right you see material, on the left you see the human. Has the time come that we understand what happens between the two. How

do we go from one to another. How do we change the matter state of the man, to transition to energy, and creation fo the man on the other end, in the plasma or Gans state. Or can we develop this T to extend new understanding of science allows us transportation, transmutation of 2 at the same time, from one point to another. Mankind has reached a new destiny, and with it we need to understand more. Has the time of space .. only to the eye of the beholder, or does it exist in the dimension of totality? (:32). Do we all choose the time, place, and space to be, that we are visible to each other, or do we take a chance and transmute and travel at the same time. Do we choose to manifest ourselves to eye of beholder, of who we want to see us. Present to some and not to others.

Today's teaching is about transportation and transmutation of elements. The game of mankind, but the process needs to be understood. Not only by the physicality of the man but by the STM too. As one can leave the other behind, transportation and transmutation (T&T) is the combination of understanding the physicality and the soul of the element. In so many ways, if we understand this, man has gone 1 step further to develop T and systems not only physical systems, but within the structure of the soul of the physicality of the man to move from one to another, and open a new passage between the two. To open the channel that the man can T&T and travel and at the same time be able to exist in both dimensions needs a new understanding, a new knowledge, (:34). needs a new that man can transmute between the two. and travel at the same time between the two at any dimension and where the physicality or the dimension of fields of itself, to manifest itself at the point of manifestation.

In so many ways, what has been lacking in the knowledge is the key which can open the door that both can exist, but both can be aware and inside of each other. At this moment in time the body of the man uses the space of brain and the materials and combination of Gans's, which is used to make this, for this ?? game, for this understanding. Now with the presence and understanding of the new T, mankind has a choice, to travel as a light or to travel as matter. Or be able to travel through as a light, but at the same time be the matter in the soul of the light. This has been one of the biggest dilemmas for the world of science, where in the world of physics sometimes we see particles and sometimes we see rays. With the man's knowledge we'll extend that, (:36). it becomes particle, that within it, within the center has a soul, that transfers the STM to any position in the U and then as a particle it appears it interacts with its environment and manifests itself at a point of manifestation in the structure of the physicality in the point of manifestation. I am the light. But do I travel as a light to enlighten, or do I travel as a matter state to manifest. Mankind has to understand the difference between the two. The man in the shape of the light, enlightened becomes the messengers of the God, the essence of the creation, and the Creator. The man who chooses the light in the state of particles stays in the dimension of physicality, covered with the essence and motion , speed of the Creator. How can this be ?? changed , how mankind can endeavor to reach the speed of the light at the highest strength of the fields of the U, to become maybe, nearest to the speed of the knowledge, and transfer of it, in the level of the Creator.

The further lights from the source, the further knowledge from the understanding of the creation. Mankind is at the edge and not at the center. By developing new T that man can

see in physicality, and then it can help mankind to transfer itself as a matter to the light, (:38). as a light to a life on the other point. It's the travel between the matter unit enhancements, and the man EU. This is part of the knowledge that has been hidden from mankind, and today we try to start a new cycle. And over the next few weeks we gradually build on to it. As I said, by 5 months before the end of the term, we start the teaching of the U Knowledge to be completed, in the next 5 months, man has time to understand to develop and be ready for the time of inception.

In so many ways, mankind has no choice, as now he is taught, he has to catch up with the knowledge. We took more time to teach, but now we teach you to travel with the speeds beyond the speed of light, by order of magnitude in thousands of times. We think mankind has matured to this point … new knowledge has been released, and this knowledge will be transferred to systems, that many people will understand, and wonder why have not been understood much earlier. In the new process we teach you have to change the voltage to current, (:40). and current to voltage. .. when you change from voltage to current, you transfer from transmutation to transportation, and transportation to transmute to the element on the other end. This is where the humanity .. in the knowledge of physics has lacked and never understood how to transfer directly the plasma from its voltage, or its potential difference to a fast speed current. This process has been taught to the people of KF manufacturing, and you'll see systems which operate on this, to transmutation of voltage to current, or in a way, transmutation of matter to light, and the light to matter at point of need.

In the coming weeks we'll show you simple system for the conversion, and with this it solves all the dilemmas of the man's energy needs on this planet. Beautiful Tesla strived to have it, but he could not understand. Now in a simple systems we'll show you, the transmutation from physicality, or what you call potential difference, to the motion at the speed of light, to the strength or near the strength of the Creator. In time as the knowledge expands, mankind will travel the spans of U in seconds, time of man on this planet. (:42). You don't need to choose, if you want to live in New York, or you live in the desert and go to office in New York. In the coming time man choose planets and stars to enjoy to be at the point he needs to be in seconds.

In a way, man becomes part of the ether, what has been the dream of the man, but as part of the ether of the U and not this planet. It needs a depth of understanding in G fields, and depth of understanding in M fields of the U. In so many ways, the STM within the structure of it, carries the knowledge, but man has never understood this knowledge as physicality has taken hold, and denied access to the knowledge of the inner sanctums of his own structure, what we call the soul.

You have to remember one principle and one understanding, and as long as you keep that in sight you become master of the work. Go back to the basic .. work of plasma. understanding the truth about the transportation and transmutation of the elements in the essence of the fields and not matter. The principle of the knowledge of the plasma in universal condition is that the strongest gives, (:44). and the weakest receives, this is the reason why we see the stars, .. why we see the light shining across the U. The cell in the

eye of the man, is so weak but made of the same elements of the star in the depth of the U, and in feeding it, manifests the star in the eye of the man. If mankind understands this, he has broken through the knowledge of the transportation and transmutation of the elements. Where a light billions of km away manifests instantaneously in the eye of the man, and manifests on the surface of the sun. On that place or planet. In reality what we see is not from millions of years, speed of light, it's instantaneous, as we see it through the emotion and the heartbeat of the man and the star. When mankind learns to work with different dimension of strength, man will not only see stars in this U, but mankind will see the Unicose, and each U shall become one star.

Mankind is weak in understanding of his own creation and in that process he has missed a lot. (:46). When you can transmute and travel at different speed of the strength of the cell of the what we call Gans of the matter of the man, then mankind can use different strength within that, that allows him to see the totality of the Unicose. In a way we choose a strength to see a star within its galaxy, to see a star in another galaxy, or to see a star in another U. In reality, the total what we call the total spectrum of the fields of the U, is the same across the whole of the Unicose. It's us who has to choose what we want to see. The curtain which has kept us blind from seeing the other Universes, is our own lack of understanding of the operation of the strength within the fields of the body of the man in its Gans's state. Once you understand this and you have established a link between the citation and you, that's you path, that is your strength, that is the way you travel. Which means there is no need for a spaceship, and there is no need for configuration of the system to get you to, as where and what you have seen, has sent you the message, "I am here," and on the return of you confirming to it, that "I see you," you can return back to the same point.

In fact mankind has to learn the new transmutation of elements to light, and understanding and configuring within his own what we call comprehension, (:48). the speed he likes to travel. As the light from the star from the depth of the U, as it reached to our eye, we have already confirmed its location, and we have sent the information back to it. We have fed to it. We have become the other twin star of the star we look at, because we confirm the existence. and in that process, we can travel as a light, as a ray to reach and at the point of manifestation to confirm into matter state, or what we call particles in the world of physics of today.

This knowledge has been open to me for decades, but I could not explain, as mankind was not ready for this. Now the mankind has come ready, and is ready to understand the transportation and transmutation. The new EU will give mankind this process. I did not bring the universal EU for body of the man, for diseases, and for enlightenment of the soul. I developed this for mankind to have access to be able, within these systems to travel the depths of the U and manifest itself at any point it needs and he loves to be. We create the condition of the fields within the structure of the brain of the man, and with it we make it, instantaneous travel across the U. Transportation within the structure, transmutation of the man's own fields, is the most safest way for man to travel as a ray. (:50). In so many ways, these new EU will allow mankind not only to perfect his own body, the future versions will allow man to travel the depth of the U. Do you like to travel

as the light, or would you like to travel in a spaceship. The choice is yours. The STM has chosen the spaceship of the Earth to manifest itself at this point in time. With the new knowledge would the body be happy to manifest itself in this position. And again it depends on the knowledge of the man, .. according to his comprehension and the strength of his knowledge to understand. Now you understand how easy it has been, and how hard to keep the knowledge away from the man until man matures step by step in the knowledge.

As you try to travel as a matter in one unit to the other, manifest as the man, what happens in that position, what happens in that space, is where the knowledge and the gap is within the knowledge of the man. And this is how, that we will fulfill the promise in the coming weeks. In so many ways, (:52). we allow the mankind to travel beyond the speed of light, by thousands and millions of times, order of magnitude. Try to go back to the basic of the teachings and understanding of the flow of the plasma. Its inherent conditions of motion, its inherent conditions of existence, its inherent condition of interaction. Then mankind will understand one point, as you travel and you have frictions within the structure of the physical dimension, then the light will have the same condition and friction with other fields. So mankind has to learn to use wisely that does not run out of energy at a given point of the wrong strength. These are all, be taught, and in a way, when we release first true MaGrav energy system, we start that process for the conversion, for man to understand. We have opened the Pandora Box, and it's for man to understand if you would like to be the Pandora, or would like to be the box, encage itself or travel the depth of the U.

The present physical structure of the body of the man, and its interaction and structure within the brain doesn't allow such openness. For this we need to create a new structure that within the physicality of the man, (:54). both carry the same. For this reason there is a need for a new generation of life, a new generation of being that have access to both. That the present physical body lacks this knowledge, lacks this connection, due to even its structure of the physical material of the brain.. In the new life to be born this will be solved and simultaneously will be transferred across the new birth, across the Universe. With this we allow the transmutation and transportation to all the beings across the U, and not only the man. The test of time will confirm the existence and the dimension, As man over millions of years have created different organs for functionality on this planet, now the structure of the brain will change, to create and allow the new development that mankind can transmute and transport at the same time to be both in the dimension of the plasma or the physicality.

For the first time this gift has been given to man, and will become and will be visible to many, as it takes shape and dimension. It will come with the new birth. New birth for mankind to enjoy and with it to understand the birth of the new knowledge, the birth of the new cycle of being, that will become a pattern across the U and the Unicose. The time has come to mature for mankind and U Community to reach this level in unisons, (:56). that there is no race behind. And any new development, any new creation will bear the same knowledge at the point of inception. It is no use letting so much harshness happen to mankind over billions of years to reach this point. Mankind has to understand the new

structure of the physicality of the man comes through the existence of the new plasmatic field, which is being released by mankind, and through the development of these new technologies.

In time the atmosphere of this planet will change, which will accept and enforce the new structure. As we created the birds, now we create the freedoms, STM in the dimension of his own physicality, that there will be no nation but one, as man will exist in dimensions as he wishes, and where to live, and where to exist. Illnesses and food will not be part of the new structure, only the love and care. As was beautifully put, be calm, be kind. Be calm to understand, and be kind to share, be kind to be able to give unconditionally the new knowledge and receive it. Those of mankind's who reach the point of maturity will benefit from the new soul, and new life to be created, through the strength of the knowledge and peace. (:58).

In so many ways, in the coming weeks as we open the dimension of transportation beyond the speed of light, in the dimension of the physical matter state, this will change many things, and many operations on this planet. The present computers become useless. The present structure of transportation becomes a donkey work. The present cycle of feeding the man, becomes nonexistent, as the man will be feed through the strength of his own inner sanctum of energies.

In so many ways, a new mixture of Gans's will be released to create that condition of the totality and satisfaction. I have asked the KF team in Austria to start the production of these Gans's, which in totality will bring the new level. Our target was to show the two units, now we show the dimension of the two, how when we put them together, the amalgamation will bring new understanding, and new totality to the science of the man.

As I said, very soon, the dome of the exhibition center in Linz will be lit, that it can be seen from all corners of this planet. The light from it will extend beyond the building, and when you ask, you ask for the building with the light ?? on and everyone will indicate you, where to. You will understand the totality of the knowledge in the essence of the creation. Once you enter the dimension of the fields, (1:00). you will enter the openness of the knowledge of the U.

We do not make a temple, but we make a temple of knowledge. Not the temple to pray to. You come in to enhance the T through your own understanding, and you come to enhance the knowledge of the U, within the structure of the physicality of the man. The process to start the "dome of light" has been explained to the team. In the coming time, will come into operation.

You have to understand where you did not understand the teaching and go back to it, and if you come to that point, you will enhance, understand how you can travel the span of the U and Unicose, both as rays or as matter state, the choice is yours. You choose the speed of travel and then convert to enjoy the sceneries that you travel to. It’s very much, how much mankind will understand that he can go further within depth of the strength of his own fields to become closer to his Creator to see Its light. It does not matter, in any

position in the U. (1:02). When you see the figure sitting on the chair in the system, we don't target the physicality, we target the energy which created that physicality. The beauty of the physicality, comes from the essence of the energy center, what we call the STM. When you see that beautiful body sitting on the chair, you admire the creation of the Creator. How He has transferred the light into life. That's all it is. We come as light from the Sun, and we become life as man. And now we teach the knowledge for man to become the light and manifest itself as a man anywhere in the U. Up to now we stuck to the Book #1, and now we start teaching with the Book #2, the structure of the light. The understanding of the totality of the creation, light is the transmutation and transportation of the elements in essence, the true essence of the creation, and nothing more. then mankind has to decide, it transfers as a light, or as particle. or both at the same time. Now you understand. (1:04).

Are there any questions?

Q: Can the unit that generate matter, generate at a distance in case someone needs something sent to it. ?
K- What do you mean?
R: .. could you send some emergency materials to someone in an earthquake from the matter EU.
K- If you are still in the dimension of physicality, yes, but if you work in the dimension of the energy, what we call the soul, the person can do it himself. (1:06).
R: .. we'll have units that will generate what we need at the point of need. .. wouldn't have to transfer that stuff ..?
K- What do you mean?
R: if someone needs food we'll be able to manifest that … we'll be able to think something and have it manifest
K- That's what we just said.
R: so if we could have it manifest in the unit, (1:08). could we have it manifest at a distance somewhere. Or are the conditions in the unit, that's the important part. its, its own enclosed space for a specific purpose.
K- In so many ways, we decide everything, and In so many ways, the soul of the person decides at the point of the need. How do you know, what you are trying to give, is what they need to receive? You want to give, but maybe they do not want to receive, at the level of their souls because they are comfortable in what they were and how they were. (1:10). Any other question?

Understanding the Soul's Reason for Genetic Diseases:

Q: in the health unit can genetic deformations in womb such as Rett syndrome be corrected?
K- You have to understand why that syndrome was created and what is the reason for it. And what was expected of the soul to confirm itself in the present physical form. (1:12). We got to understand why we work this way and why we decided, or why our soul decided to manifest itself in this condition. And how would it matter or how would it change the physicality? Would it bring a new dimension and would it bring a new

understanding for the soul that accepted this condition? What our physicality shows is what the soul has accepted. And the soul accepts as a totality, of all the structures and settings of the past. What feelings, what emotions will bring to the other souls, this deformity, or this change. Or is a point of what we call evolution, that mankind needs to learn in that path. Many changes, as we see diseases today, are partially, and in principle, (1:14) part of the structure of the total understanding of the work of the soul in respect to its environment, physical, or in respect to the other souls. This is one thing that mankind has never understood and has to be understood. That when a soul creates a physicality, everything in the dimension of those who lead to creation of this soul, the parents, grandparents, the past structure of who lead to creation of this soul, all have a say, it's not just, that's it, I am here as energy and I decide. This is why we get the color of the eye of our grandfather, and the behavior of the grandmother. This is what needs to be understood. This is what has to come, that at the same time the soul of this planet, the soul of the structure of other entities on this planet, have a say in this structure. Why do we suddenly get the same kind of defects all over the world in one go, without anything. What is the planet trying to tell us. What is the process of evolution it is going through that it needs this in the future life for physicality to be alive. Not all what you call genetic defects, are defects, these are part of the correction that the body of the man will need in the future generations. Mankind is so physical, that he will not see, and he will not understand, and he will not comprehend the totality of the work. (1:16). We are not present at all times to see why and how a soul is created in the shape manifestation in physicality, manifests itself. If our wish is so, it shall be so. But the rest has to be part of. Everything has to be considered, every point when the souls create the STM, that individual, what you call physical deformation, or what you call genetic deformation, and what might lead to termination of life at a given point, by that soul, all has a reason. What is to bring to the man, to the mother, to the father, or to the child, or grandfather or whatever. That mutation at a given point in time. Don't forget the life of a man is like a car, it's lifespan, it's decided before, you are the only one to possess, fuel, and drive it. But at the end, it is written that so many hundred thousand km to come to a halt, you cannot drive anymore. You are only a passenger who can move it around, and you fuel it, exactly like you feed the man. And your physicality which takes the car around, (1:18). but the lifespan of the car is pre-written at the point of manufacture, and by the decision of what materials and to use. there is no difference in the dimension of physicality, only when you reach the state of the transmutation of the soul, then the time become timeless and limitless, zero time and zero dimension. The mankind has to understand it, needs to understand it. The mankind has to grow to understand this. Why do you want to change a defect. What would that essence, the time of the separation of the physicality, even due to that defect has, supposed to bring to the soul, of those who are around. How would they be, and how and what would they learn from it. In the future the body of the man will be perfect. In the future there shall be no illnesses, or no defects, because even when you carry the soul within the womb of the mother, in entering systems like the EU, brings the perfection too. Every child shall be perfect, in soul and physicality, and all will shine. And each one decides on its own dimension of physical existence, (1:20). and the way it wants to manifest itself. Nowadays when you talk about a defect, is it in fact a correction, not only for the physicality but for the future, but for the soul of those who look after this soul. What wisdom does it bring. And what clarity of understanding of the knowledge of

Creator. Go back to the Chinese old saying, "pain makes man wise, and wisdom makes man rich." Not in the dimension of the physicality, it's the same in the dimension of the soul. You want to correct syndromes, genetic defects, correction of physicality after March 21st, you'll become part of the life of the new life. Before that mankind has to live in the dimension ?? why. When we create the perfect child in the essence of the STP then the life of the man will start to live in the U, the same. Do you remember the orange and the cup. Now there will be many cups across the U, and one orange. (1:22). This is how the future of the creation shall be. Then at that point you have to ask the physicality, why have you chosen this. What do you expect, what do you want to reach, what do you want to get. Attention, love, care, or the beauty. If it's the way you see yourself, beautiful and you are happy within your existence , that shall be, but you cannot steal.
Any other question?

WL: … how humanity can know his goal of the soul?
K- The goal of the soul is known by the soul. In the future the physical manifestation will bring that for the soul. In a way we carry the soul around to get what it wants, and to do what it needs. (1:24). This is what we'll learn more when we open the new dimensions and man learns the news ways to interact between the two. In gradual steps, mankind in the physical dimension will be enlightened to the dimension of the physicality of his soul. The construction and development of these systems ?? is that space gap. In the past man used to get in elevators to go from floor 1 to floor 10, get higher then, now mankind has learned and has to learn the new way. To enter into the dimension that he can elevate his souls form 1 to 10. These EU are part of the process for man to understand more in a free space, the dimension of his existence. Now is not only the physicality which you take from 1 to 10, so we can do the same with the STM, but this time we don't take man to level 10, we show the man the level 10 within the structure of his own soul. The comprehension of the totality. This is the difference, this is what is called, (1:26). the new era in the world of science and space T. It's not just running machines to fly, it's running souls to fly. The teaching is on 2 levels, one is on the level of the creation of the physicality, and 1 in the dimension of the physicality. The choice is your, according to the comprehension of understanding of the knowledge. There is no time tunnel. There is no "back to the future," as you want it, because the future does not exist, and you cannot go back to it. You are the creator of the future, and simultaneously the whole of the Unicose. But collectively, by collection of the fields of the U, if man matures to that point, you can see the past. Always remember, the friction and the dimension of the light when the fields interact, especially in the matter state. You have all been to school, you have seen when they put the light in the prism, and the prism splits the light into different lights, now which one of the lights is the true carrier of all information, or each one of them carries all the information. (1:28). And then how many interactions these lights have, and then new prisms, then what happens then. Isn't the first light, the light of the Creator? And isn't the prism, the prism, the prism. ?? you have still the true knowledge and light of it, but in different dimension and strength, color, and race.
Any other question?

Q: How far back in the teachings do we need to go back, there are people like myself who are new to the KF teaching?

Q: Will the public teachings be enough, (1:30). to make everything that is taught. Or will I need the private teachings.
K- The head of the KF has decided to expand the KFSSI and the KS teaching in a different way. As coming weeks and months. … IT section of KF will be set out to do this. .. What I envisage it will be, you think of a subject you want, and KFWiki and KFSSI will have separated everything that you can go directly to. The KFSSI KS section is weak and from this month it will be strengthened heavily, which means you don't need learn every point, you can choose a point and go to that part you are interested in. It won't happen overnight, it takes years of work and investments. But gradually this will be part of the IT section…. This is how the H of KF wants and she is getting financed for it to be done ..
(1:32).

(1:38).

.. production of materials will be live and video recorded and shared.

There is a German group that is putting everywhere that this is fake, and this is all rubbish. You have to understand the German group is, (1:40). the facts about Keshe, or whatever, these are the remnants of Alan Sterling, pedophile groups which they lost their income. They are all pedophiles. Facts about Keshe is setup by a bunch of pedophiles who used to do child trafficking, and the only way they see can take revenge is putting these up. So when the Germans, Austrians .. these are all pedophiles, especially in universities, taking young boys for clandestine activities. And we hit their pocket and now they are going everywhere, writing facts about Keshe …

In that process all the systems will be shown in a working condition. (1:42). We have to do certain things to optimize and bring it up. In some sessions KS can be present when they see systems and running.
The systems are in running condition. We have not switched them on in the arena. They will be switched on sometime in the coming weeks, next week or two, and will be operational. … we developed new ways to optimize the system.
Part of this system carries the illusive MaGrav system, generators, you have been waiting for. It's a hybrid of the plasma T and AC, but we are taking all that out gradually because we have to do some other things in the background that we could see the elevation of the energy and the way we wanted it. Yes you will see a fully operational system.
This is becoming a new home for KF T, in the next few months we'll take over the whole building, this is my plan. The exhibition in Linz … (1:44). then we retract back to the platform we have. For example, the flying cars will most probably be shown downstairs. We are about 6 months to a year to show this. .. to get these 2 unit off the ground has been a big challenge .. opening a new factory in Austria. ..
will produce new systems. We do plug and play. ..

There are a number of wealthy KS to purchase these in their home not to share. You are welcome. but later open to the KF and public…
(1:46). The whole knowledge sharing and its ethos has to be kept across the whole KF.

. The new power generators which you could not get going for a long time, you will see in operation. We organize to have 4 or 5 within the field dome.
totally new plasma systems, no motors .. you become part of the planetary system, This knowledge has been shared with the KFm in Austria. we strive to build it in the next few weeks. I designed it about 6 years ago.

If you look at it, we have the Sun which gives its rays and creates the earth, now within the structure of the Earth we create another planet, which will be part of these systems. The knowledge is there, now we start teaching universal technologies, these units can be seen. .. all EU will bear miniature of these units within their structure. (1:48). .. But you will see a tabletop material productions unit, which the F will release the new T. There is a lot to come, and with it comes the readiness to create new conditions for the creation of the new child. It will be explained, in so many ways, in the coming time. The child of knowledge has to be within the structure of the soul of every man. That's why we're striving for. You will see systems running heavily and producing materials. the factory unit .. is expected to produce up to 1 ton of materials per day. But has a different structure… we are producing systems for commercial level, which is the main target for KF to stop the depletion of resources on this planet. The material system .. will change into a field mine, which out of the system will come materials on a continuous basis according to the need and .. creation of alloys and specific materials

we will expand on this knowledge .. (1:50).

(1:54). That you have to ask the UC from Spanish, they are responsible for coordinating and organizing these teachings. All the UC members of the languages they responsible .. and it should be, now we see Spanish and Portuguese.

Brazilian Friday Teaching Well Planned:

The Portuguese has taken a beautiful shape in its structure, because it's well planned out for Friday nights. When you turn to Brazilian teaching, not only it's translated into Brazilian instantaneously or concurrently together they do it. But every presentation is well planned, it's a lot of time spent by Rafael and the Portuguese team, to make sure the 4 hours of presentation is absolutely solid. We've seen the same kind of thing with the American teachings on Sundays. They Chinese need to pickup their teaching in always what they do. But the Farsi teaching needs a little bit of strength because it's only translation of the teaching on Thursdays, they need to allow the new people to come and show, what they have learned, or what they want to show. These are the things that has to change slightly in each group. But overall everything is more or less done. One part of the problem has been to understand, (1:56). each culture and how we can fit into it.

Dr. Assadi Accuse Mr. Keshe of being an Israeli Spy:

Something very strange came up in the Iranian group. Part of the people who wanted to cash out on the T, now that it became very well known in Iran, they have gone to the government and said, Mr. Keshe is an agent of Israel, and he is a spy. I responded to the Iranian officials in a very simple way, if I was an agent of Israel, I would give the T to Israel. And with the knowledge I gave to Iran that they wiped out the American base in Iraq months ago, the Israelis would wipe out Iran in no time. I stay loyal to my nation and humanity. And these people are actually the agent of Israel who put these things out to defuse and decoy, or confuse in a way. If I was an agent and working for the Israeli government, with the T I have, I don't need to come to Iran. The knowledge I would transfer to the state of Israel will wipe out the state of Iran. And this will never happen. I stay loyal to both, to my nation, to citizens of Iran, and the planet. There shall be no war, and this is why we took the T to Iran. A peaceful nation. Now you can understand how the same process carries on. People like Dr. Assadi and the rest, people in the university tried to create this mayhem within the structure now that their hand has been opened. There is a very simple message, if we are supposed to be, as you say. We don't need to, we take the knowledge across, there will be nothing left. So you are the agents and you are working for your own benefit, because you have no status. (1:58). You found name, and you got crowed, and you got blinded by a few people calling you, "sir." We stay loyal to the nation and government of Iran, to the leadership of Iran and all the governments around the world, irrespective of color, religion and race. I had to make this very clear because Dr. Assadi and the rest of his gang, what we call, agents themselves, have written the Iranian government. And my answer to officials online today is very simple. The knowledge belongs to Iran, and stays Iran and will come out of Iran the way it is coming out today. My voice is the voice of Iran, and the knowledge comes on those basis to the whole of humanity. Those who sold themselves to the Belgium's came out with another set in Iran, this way. We got rid of one bunch and a new bunch appeared, because they sold themselves. We are humble Knowledge Seekers and educators. You got to realize the KF has become a part of Iran national, what we call, Civil Defense. A group of people who go out unconditionally to help with all the, whatever, be the struggle, and what we call the problems.

Now we start teaching medical teachings to many Iranian scientists and doctors. (2:00). And with it, we translate it to all languages and it can be picked up by all the doctors, that the medical teachings become a strength in that way. There is a lot of things happening, in the background, the same with China, same with other places. And hopefully next week the ed team will tell us which 3 will receive the 1,000 Euros research …
We thank the offices of the leadership and the Sepah who protect us, and the intelligent services of Iran.

John: AZ. .. shows photos of Arizona center ..
(2:02). (2:04). photos .. (2:06). (2:08). video of inside center dome ..

K- The way the AZ is set, (2:10). more or less become the blueprint for most of the centers we open around the world. With the progress and delivery of the new systems. can go to 12 units inside. .

I think that center will be well known for miles to come. Putting 10 -12 units in that building.. many people will sleep around the building without going inside to get, to receive. I wonder if the echo will be there when we install the system, or would the system absorb the voice and echo? (2:12).
J: . the energy of the dome itself will self create a bubble effect of the units. all of them will sit in the dome, the dome is made with 5 inch drywall so it's a solid dome.
K- Yeah, this is what we say to people who come in purchase the systems, we prefer it to be one floor off the ground so it is up, that the Earth's MG field is not so interfering with the system. Those of you who are interested in purchasing …
(2:14). Anything else to share ..
Any other questions?

(Break … advertising …) (2: 23).

Let see the questions, bring the teaching. (2:24).
Q: shows a video outside his window, sings song .. (2:26). (2:28). (2:30).
Jalal: .. you taught us hoe the life began on Earth, step by step, and the boxes what we are doing we are capturing the AA .. (2:32). .. the soul is decided, so how can I understand, are we making the conditions for the soul to manifest itself, or the soul makes the conditions to manifest itself?
K- The soul. but we have not. .. the physicality of the man is a leech attached, an din a way controls the strength of the soul. It has given it very little room inside of the physicality, and this does not give such a good position for many, many of us to be able to share its beauty. In so many ways, we have to learn that mankind needs to learn to share both the physical and the souls dimensions and energies. How do we do it, if you look at this picture, it has a lot of meaning. (2:34). … this picture I … shows picture of Sun, open hands upwards, "Pray for the healing of the sick". What does it mean. We take the hand of physicality, and through it reflect the STM as a light, to give to another soul. To share the fields, the energies, the understanding of , and … … and in that process we use the fields which are within our grasp, within our structure to elevate another soul. Why do we do this, why do we extend our knowledge to share, to be able to say you are a human. (2:36). that we understand more, we can share more and in the process what do we expect, what do we need. maybe in time mankind come wise to these things. And maybe mankind in time become to understand his own soul, his own beauty, and to what extent we want to share these things. Do we rely on, simplicity, do we rely on the lack of understanding of the knowledge of the physicality, to the STM. We need to extend our understanding of our own soul, and with it share that soul , the energies of it, with another soul. And we'll all become light within the structure of a bigger light. In a way,
the bigger light is the Creator and we are all receiving from the same, it does not matter if you are in the back of a planet, towards it, (2:38). or in front of it, because the strength of the love of the Creator surpasses any physical dimension. The ones that are on the dark side of the sun at night, not necessarily receive any less than the ones in the front of the light, knowledge and love of the Creator. It's very much like what I call as neutrinos, goes through irrespective of the matter content. This is what we have to become. we have to become that light, and in the process balancing many things. We show our love, our anger, our care, our distress, but does that reflect on our soul, the behavior of our soul's

totality. Then you understand. When you love, does it direct to one person, or does the one you don't like, and love, still receives it, but doesn't recognize it, or still gets energized by it, and maybe it touches it and it loves you back. Humanity has to learn this what we ?? mean and how far can we capture this soul and encage it, and with the new understanding we give man the freedom of that knowledge. .. we welcome you to the knowledge of the U. (2:40). and as we see on the screen, the love of God has no form, no alphabets, dimensions and strengths of measurement. In so many ways, understanding this brings the message of peace. And one of the things we all need to learn and to understand, that the message is simple, if you ask the soul you want to give to, and it accepts to, that's when the soul elevates, when you make it available and it takes it, is when it wants to accept it. And it could be there, doesn't matter how much you give, the dam is closed, you are just storing behind the dam, till the soul is ready to open the dam and receive it. Will it open it in small measures, or open and receive it in one go. This is the way the love of the Creator is, all of it sits behind a dam, and mankind and other creatures has to be able to open up, and how much he opens it, and to what receive from it, be it the love or the knowledge. This is what I always say, if you ask, you don't need to make a dam. And if it is given, (2:42). there is no dam is made, so you receive and you give all of it. And it does not matter how you interpret it, how it looks to you if somebody else receives the what we call, the knowledge or the love, whatever. It's you who creates that dam, because it is not for you, and this comes all the way through the knowledge down the ?? creation. We have encaged the soul, and we create with that barrier of the dam, we call it the brain of the man and his emotion for it to receive. For the first time you open that dam, you open the layers of the brain of the man to become independent of the emotion, but live in the emotion of the soul. The emotion of the physicality is the biggest barrier for mankind to evolve. And that is one of the reasons we have not understood and cannot understand the evolution of the STM as much as the evolution of the physicality of the man. The souls evolve, go through the same process as the physicality, in the process of their own level. They are not created as one and stay the same. As the physicality goes through the evolution so does the STM, or any creature. How much can you receive, be able to share. I always say ?? I repeat it until people understand it. (2:44). When you are asked, and given, no one can stop. And once you are given, the totality is given, not part to suit. Then it's the beholder whose openness decides how much he can take, or her understanding and emotion of his soul. We create that condition in a very clear way, the STM has left himself an exit, and an exit through the separation of the fields of the physicality. If you look the dome of the brain over the soul has left an escape route from the bottle, which is the physicality of the Earth, pull of the MG field of the Earth. Because if you could have escaped, you'd escape through the brain a long time ago. It waits for it to weaken and uses the back passage to escape, to open up into the dimension of the physicality. In a way, the love of separation is released by the love of the planet, or the being in respect to his position. As we always said, if you look at the lightening, as I was explaining recently, and we all know, the lightening doesn't come from the sky, it comes from the Earth, to discharge the balance of pulling the energy starts the first spark on the Earth, (2:46). up into the cloud, not form the cloud down. We only see the

(3:20).
Q: … With the U Community if a thought, intention is made at the point of need, would another soul be able to interact with that thought and create on top of that thought to enhance it to make it more beautiful?
K- Why not. If you allow it, if you are asked for it, ?? or you ask for, yes, why not. You see, you ask to give, or you ask to be given. If you don't accept, you cannot receive and you cannot give. (3:22). It's very simple.
Q: Why would you not accept? is that on a soul level or physicality, or both?
K- How come when you don't like your food you close your mouth. Or if you are full with Chinese food, you can't take a bit of kabob, because you are full. That's the same.
Q; So that's a feeling, an instinct you have, sometimes you don't realize…
K- I made man in the image of myself. … so applies in both dimensions.
R: It seems the DNA has to have something to do, be some preferences built into it.
K- It all depends how we look at it, how we want to interpret it.
R: So in a way, souls have preferences built into them?
K- Of course, that's why they take their position. Or they would be on top of each other wouldn't they.
R: They would all be together on one single point …
K- Isn't that why we call it the Creator.
R: Too much information, I don't think we would want to be on that position. So that's very interesting, (3:24). so the position is according to our preferences, or .. the M and G fields we feel around us.
K- yeah, in so many ways, yes.
Q: .. when you make a reactor with the T you have given and you connect your soul with it, like you have with the EU throughout the U that is felt, and they are aware of the reactor and your connection to the Source and to all.
K- What do you mean?
Q: … when you connect on a soul level and physicality … that then once you give the thoughts and intentions .. connects you
R:
K- In a way of development, (3:26). understanding the soul , it's very much we go back to the beginning of all the teaching. Even when you make a Gans Box, you pray for it, you give from your soul that it gives that connection and you can elevate it. In so many ways, it's part of you, because it is created out of the emotion of you, of the physical emotion, how you twisted the wires, did it pinch you, did you feel Gans's, did you feel the energy transfer of it. All counts. All is part of the structure and it counts, but it is limited to the emotion of the physicality. Do you want to receive it in the dimension of the soul, soul does not have a physical dimension to feel the touch, the physical dimension, that's why it has built the brain, that in there so many information's can be translated.
Q: .. soul
R:
(3:28).
K- You as a human being, is English language, its polarity, is singularity. ..

We have to see it and then we understand it. In the body of the man we have neural system, and then we connect to it. (3:32). In the dimension of the soul we don't have such a think, it's the fields, and these fields are connected to somewhere. Where do they connect, to who's MG fields connect. These are what we have to comprehend. I tried to pick a picture we can clearly see. If we look at this picture, that's the brain of the man let's say, there is no neural system, but there are millions of fields going to this brain. Where are these lines connected to, to whom, to where, to what molecule, to which soul. And then you understand how the structure works. How do your soul's neural system communicates? And in reality if you look at it, and try to understand it, try to be aware of it, is this the nerve which goes to the papa, or this goes to another creature in another U. This is a very small presentation of the energy fields of plasma of the STM with the rest of the U. In the system of the body of the man you can count the nerves, but if you look, even this one here is connect to some where, because its interaction with it creates this little dot. (3:34).

(3:38).
(3:40). repeats..
All these fields end up somewhere (sides of ice). All these fields (bottom) end up with the fields of the frig and G of Earth, because these two, the frig and water in the container have to interact directly. We see the traffic, every single cell of the tray has a direct connection with every single cell of the water, and we see these fields coming down. In a way if you manage to count the whole number of these fields at the bottom we can see how many cells are involved with each other from each side. We can count the molecules, each molecule has created a parallel with the other one. The other ones which are there mean they have ?? connected. so some of the molecules of the tray, the box, the G of the Earth we can see. But this part, if you look at, they don't bend down. they are upwards, they are straight, which means they are connected to somewhere else. It's the same with the man, this is your neural system, your nerves, and this is the way of the dimension of the souls, (3:42). to be free to interact, uncles, cousins ?? space. For this (bottom part) we have made the neural system in our physicality. For this (sides) we are free to go, how many of these are because of the box of the container when we make the ice. Then we see the interaction, then we understand the totality. It's very simple, or I think is simple. Then which one is the emotion, the one at the bottom, the emotion of your own child, your wife, and you feel it, and you have every attraction interaction or is the part on the top with all the others you are interact with, or have interaction with.
Q: Where you put your intention is where you can interact with ..
K- yes.
Q: That comes to condition with environment …. (3:44).

K- Most probably, but then you have to learn from now on, 2 emotions 1 emotion of the physicality, and 1 emotion of the soul. Or the new lives in the future will be aware of both. And how will allow one to interact with the other, and what to overflow with that. In the new cycle of life, when you fall in love, you won't feel it in the heart. We'll feel it in general, the whole entity of physicality and the soul. Falling in love in the new generation as we prepare for it. It will come in a way of totality. When we were young we

fall in love, we could hear the heartbeat changing, and the breath cannot be taken and the rest of it. In the new generation, and falling in love, as we change the STM to become aware of the Universal Soul and creation of ?? U, we make falling in love as a totality, because now you fall in love with the soul. You don't feel it in the heart as such. The need to be comes from the emotion within, not emotion with the heart, with the physical dimension. It's a total commitment, is what we call totality, it's not breath taking, it's just wanting to be with. It's wanting to be part of, because it's what you call, interacts, interlocks. Physicality is within the soul, so soul takes priority in loving. Don't know why, but I want to be all the time in the physical dimension present. But in fact, the soul has taken the love, and interpretation of love by giving, is part of the structure of the life of the man to learn, and this will become part of the new cycle of life. (3:46). We feel love in a different way then we are used to in the physical dimension. Because this is one fo the reasons for the new cycle of life. Because this was not open to the soul, now souls can fall in love, in a different way, then being twins and being connected. In the coming time even the structure of the skies will change, as the new way will be taught even to the planets and the stars. and universes. the structure of the skies will change in a very different way. The skies will shine in a different way and the stars the same. That mono singularity become colorful sky to look at. And the soul fo the new life will shine on all, and all will take the same. In so many ways, there is a new horizon, and that comes from polarity, not singularity. Mankind or the future of the race of mankind will have a very good contrast to put next to each other. how the skies looked shined and will shine in the future. When we bring the balance in the new dimension even the stones will be touched. let alone the heart and STM (3:48).

(3:56).

346th Knowledge Seekers Workshop; September 17, 2020

ENGLISH TRANSCRIPTION

(:10). Live in Linz with KS

The systems are loaded for flight

(:14).

The systems will be seen outside as a light. This week we had a test .. 1 system was turned on in material state … UFO system ..

(:16).
this means we have managed to interfere with the M fields of the Earth.
The spaceship for man is on course .
flight systems one in relation to the other, one takes flight.
You have the reference inside the spaceship when you travel ..

(:18). We create the M field within the environment of the system. .. This is like the Earth and absorbs all the fields inside, brings stability … One unit was turned on,, which effected the UFO M fields in the building, the structure of the building, part of it was interfered with.
(:20). This system was originally shown to the Belgium authorities on Nov 25, 2011, they confiscated the materials, not to be shown
interfere with the central core of the Earth.
This is without any nuclear materials
we have interfered with 2 magnets in this building
Once we can interfere with the M field of the Fe, we can interfere with the G field of this planet direct. So the flight in imminent. We switched on only 1 reactor, there are ten's of reactors in this system.
The system cannot be controlled by ?? , it can only be controlled by thoughts, and there is one ?? (:22). The 2 people who can interfere with these systems, the people whose essence is embedded in the systems. One is the lady here (Ella) and one is me. We have embedded our thoughts and our emotions into the system ?? . This is what we said ..

??? Goes back to all the teaching since the beginning. ??? (can't hear muffled ..)

(:24). When you sit here as a captain, you control everything. At the moment we have trained 6 Mozhans around the world. ??? to take responsibility.
Very soon the 6 Mozhans will be called in, they were trained .

The KF space program is something like 200 years ahead of any space agency and we ?? We start showing production of materials in coming weeks. .
The whole subject in principle is to do with M fields. ..
The knowledge is in the Book of Soul. It is not with man, with the pen. (:26). All of us ?? have this in our inner being, has this knowledge, it's embedded in our genes for thousands of years. Now we need it reach it, if you understand .. the book of soul, any of us can take it into flight. Now we ?? start the process. the process of teaching ?? and the machines are the basis, ?? test basis for us to be able to understand this knowledge, and with it use the ??? humanity. We all carry it, it's like the DNA we carry. But we never knew how to tap into this knowledge and with the new and present T coming up, any of us can take into space. We can decide, it's just teaching it. And the process of teaching, as I said, we start that by 21st March 2021 we see the first ?? flight. The building of the structures are in a very simple way. ?? one direction into space. And any of us, individually or in a group, can decide how we take into space. We use the dimensions of

the oceans of the fields fo the U, or we stick to the matter state. ?? with one simple operation we have shown ??? with the matter state fields in this ?? building. Then the rest is very easy. (:28). The rest is understanding the totality of the knowledge in the essence of what is within us. And then the biggest question for most of us will be, do we choose this or this. we choose the span of the U without ?? hesitation. We need to be trained, taught how to control, how to be part of the whole knowledge of the creation , you look at this as the Sun, but in fact, this is your soul, there is no difference . ?? take the knowledge to the next step. This is one of the reasons we are here. .. hopefully this exhibition center becomes a permanent place for KF exhibition, and in that process we allow a number of KS to come in and see the ?? the flight system, producing materials. At all times controlling what materials we can produce. The capability of the matter producing system is about 1 ton a day. This .. .. commercial unit of it, I know, I have already tested it and I know how it ?? is. This will change the biggest industrial revolution, this brings power to Africa, ?? because now ?? (:30). ?? mining. In exchange we give more back to Africa to cover ??
Everything has to be correct for every citizen of this planet. We have to compensate. ??? .. We see 50 to 60 million unemployment in US. not only mining, but defense ....
We have a massive number of educated people unemployed and we see the same for Western Europe. Because we can fly with these systems anywhere on this planet and there is no control …
flight time is minutes ..

(:32).
(muffled …)
put a Corona positive person in machine, then test again ..

(:34).
Space cosmic ray viruses is something man has never known, it can release so much energy into the soul, that it literally opens up like sugar in hot water. We know this we have seen this many times in the space.
(:36). You need to create a M shield to protect you form all the rays ..

Klaus will tell how he felt because the system
Klaus: The first time we started the system here, we just tested one of the reactors inside . (:38). .. and I ran one of these reactors just 3 or 4 seconds, there was an immediate reaction to one of these loud speakers here ?? it just jumped on the table.
I felt like being in an onion, I went through different phases, I could not hear my colleague at a certain distance from the reactor, and then another distance I could near him again .. I switched off the reactor again, because I was so frightened, it did not stop, it just stayed like it is for a certain time. I didn't expect this.
(:40).
K- How long did you run the tests.?
Kl: after 4 or 5 seconds.

(:42).

As I have done many times, we'll most probably pass out of this building in a plasma state, which means we'll pass through the walls, glass dome, without any touch. we travel at the strength above the matter state.

(:44).

(:48).
With these systems we can transform matter into light .. we can change light into anything as a matter. .. we can create a energy field on the left and transfer it on the right and create a light. Exactly what happens in the womb of the mother. In the womb the womb provides the energy, here the systems provide the energy. The left is a matter state, and the right is Book #3, and in between what happens in transition from one to another is Book 2. I deliberately chose the setting up of these systems primarily, because I taught the knowledge .. years ago. And the system has to be understood fully by those who decide where the knowledge of the man will go. If you put the knowledge fo the 3 books together, (:50). you mix it in a right way, you have all the knowledge to go into space. Everything is written, inside the book. It's how you interpret is the physical knowledge. .. now I show you the system.
.. use your imagination what do you think we'll see in 10 years time. Any input.

K . we travel in the depth of the space.

(:52).
I'll show you how you'll travel in the depth of space by wish ..
This is a star. in your vision you see the M field of it.. it's taking M field back from you .

(:54). you travel on the fields of what the star sent you, and you travel on the strength of its own structure, which is zero time. You see a star, you wish to be on it, you can travel in the strength of the fields, to that position, and when you arrive the field strength of the planet ??? because you have to survive it and ??/

(:56) .
man will not be subordinate to anyone in U.
I made you a promise some weeks ago … in the very near future, .. we'll bring a tank of water, and I bring 1 drop .. we all watch the lives it creates. Conversion of the fields of U according to the MG field of Earth … while we watch the system will create that life.
(:58).
I elevate the STM with one drop .. this is what Christ did, that's how he raised the man, the dead, he elevated the soul, physicality responded. ..
we will demonstrate that in this room. Because the knowledge has to be taught so rapidly, that we leave no ambiguity outside.
It's time to show a solid science that changes the position of the governments to a peaceful position. . we live through science and T which can effectively change ..

(1:00). We have to lead in the front with the T, not in what we done up to now, in the back. This will be shown here. When I entered the building the first time I knew KF has found a permanent home, for the demonstration of the new T ..

An this is part of the teaching which we will extend heavily in the coming time. Open platform teaching, (1:02). and for many of us to understand, the next step in progress in T. .. at the same time it is your wish to be on this planet, but don't forget when you are star gazing, there are many stars, it is you who chose to be on this one. Zero time transportation, and at the same time transmutation of the light to life, is become the light of every soul. In so many ways, a lot of things have come, and a lot of conditions will create a new dimension in the human life. As I said, we are all Austrians … we all know what Linz is, .. it's the home of the Second World War start, and it will be nice to see it become the birth of new knowledge, where ??? now the mankind has the knowledge … breakfast at one planet, lunch at another … (1:04). come home to Earth for sleep. We heard from Klaus how we interfered with the Earth's M fields within seconds ..

(1:06). Industrial version of this system will produce ..
continuous production ..
Table top version ..
I have until 21st of October to complete one phase, because the final phase starts ?/ 21st of March 2021. In next few weeks we break open new T in this room .. the proof of the pudding is in eating it. (1:08). I bring the knowledge so forward that I force the nations to peace ..

In next few weeks Linz will shine at night.. you will se the light of the exhibition. Once we get to that position we cannot switch it off.
translucent silver light ..

(1:10). That's why we came here with Klaus at 9 PM to see if we see the light. .. don't forget we already know this ..

(1:12).
Armand: Everyday we were wondering why when we switched off the lights they came on again … Pl fields ..

(1:14).
Main radio station near exhibition ..

(1:16). Those who have intention of war will be paralyzed ..

Hundreds of years ahead of Russians.
Your wish to carry peace .. will be given .. (1:18).
We can even turn the system on to show you.. Klaus said no ..

Until 21 October, then we shut . transfer to Tehran .. next weeks I will traveling to China. .. that we don't give to only 1 nation .. (1:20). 2 ladies in the White House . 2 ladies in KF
I will see that we get it ..

Their choice of materials to load the reactors proven 100% correct .
Any questions? (1:22).

Q: So once the world switches to Pl will we be able to switch lights off,, because the Pl field is always their.?
K- .. we always said in future will be how to switch the light off.. use curtain ..

I have entrusted the captain of these 2 system to Ella, the 2 in China to KL.
It's the soul of the doctors will work , not the pen .. (1:24).
In the future you will never get sick ..

I never worked to live .. no one in the U works ..

You have to ask for it to be given .. you have to be accepted by the soul of another U.

(1:26).
by 21st of March by ?? new life, man will go to the new dimension …
Next question?

Q: .. When you interact with soul of light. If you make a wish to be with the soul of light, would that take you back to a certain position?
K- It depends on what light and what position. It's very much dependent. When you reach the soul of the light, I have to explain in a very ?? deep way to the Iranian ?? ?? is that you are free to travel the span of the U, on the position that, that light has taken, not what is your wish, you become a passenger, that light is destined for somewhere. (1:28). As we explained with the Iranians in a beautiful way, ?? pleasure to be able to teach in Farsi. I didn't know my Farsi was so good, but somehow they understand it. … When you have an object and wants to travel from one to the other. You chose the physical dimension or you can choose, as you said, the light, or you want to travel in the soul of it.

Light Forms and Travel through the Light Photon Particle :

In the present physics we have light in 2 forms, we have a light, as what we call a photon, without any tangibility, or we have it as a tangible matter state. We see light it effects 2 ways. It's just a field or its as a matter, we call it a particle. This is the beauty of the light. sometimes we detect it as a photon, sometimes we detect it as a, what we call matter state, and we couldn't understand why. Now we understand that a light as a photon, or light as a particle (1:30). (draws 2 lines) where the soul of it is there (between 2 lines). The rays which are created out of the interaction of the plasmas appear as light, as particles, like the G field of the Earth, or the M field of the Earth, as interact with the fields of the Sun, now they create a new plasma, so the plasma immediately behaves as

particle as due to, what we call, weaker strength, it gets pulled to the MG field of the Earth as a light. But when it enters it, it converts due to Inertia to a particle, ?? .. You switch on the light and the electric vibration because it has ?? (no) a plasmatic condition it appears as a photon. but at the same time the what I call, particles due to interaction with their environment they can create what we call, photons. So you have to understand if you are working with the rays, or you are working with the plasmatic field of particles. This is part of the T, science of the light which was never understood, and for the first time we put book 2 ?? out this way. How what it is. But now we can go, extend it further.

In so many ways, is this ?? light ?? (1:32). that ?? you jumped in ?? on the soul ?? (regarding Q about traveling on light) You have no say because you are just ?? a passenger. It's very much as if you were standing here , and you saw a star, and traveled to it through M fields ?? to it. Because what the light sent you, is more or less a very powerful photon, but at the same time particles. Because it has created out of the interaction of the field ?? G field of ?? it, so you can become the passenger of the soul of that light returning. Zero time. And next time when you look into the depth of the U, but if you have opened your heart ?? to the gravity ? ? to learn this process of thinking , this process of understanding of the soul. But you have to ask, this is ?? same condition you have to ask , and if it is accepted it is yours. this is the rule of the U, just because I asked I don't get, and that's why you cannot commit a crime. Because if you ask and are given You ?? out of you. This is how many people in the time of ?? pain ?? travel outside the ?? they wish for their soul not to be present to see these things the suffering of the physicality (1:34). Or the pleasure is so much that they want to be part of it, and they bring the soul ?? Mankind knows these feelings very well, but the never understood. The nature of existence, at the point of what we call inception. if you put a soul in it, you reach it. This is what the 21st March ?? ?? ? combination of the physicality and the soul ?? is the process of transmutation and transportation. when you transport the soul's fields through emotion and delivery you by transmutation of elements. This is how every single wish of the Creator at the point of creation has reached this point, and beyond. The wish of it.
Any other question?

R- we missed the words … (1:36). (1:38).

Use of Cheese, CO2, and Zn for Cavity tooth Repair:

Q: What conditions need to be created for cavity repair, or for tooth regeneration?
K- ?? use CO2 and Zn. There is a scientific, why cheese, cheese carries a lot of Ca, and when you take with a combination of CO2 and Zn, it connects line with the neural system of the tooth and the Ca, and CO2, from the cheese creates the cells of the tooth. That's all you're doing, if you understood it, we have a lot of people who have tried it. Even in Iran it's very expensive to go sometime to dentist or they can't find one, especially during the crisis, they tested it. After 2 or 3 days, there is no dentist. The business is very bad for KF with the dentist. That's all, it's not just because we say so, understand the knowledge, the T. We know, I always ?? go like the orange, when you mix cheese which is high in Ca, which has made your tooth ?? then you put a Zn in it, you connect directly to the neural

system, and then if you do it the right way and get the right cheese, then you transfer the Ca atomic, plasmatic structure to where it's needed. (1:40). where there is imbalance. because the cavity and imbalance in the tooth, it just doesn't create on its own, it has to have an emotional effect from the nerve system, because the nerve allows it to happen. Now you satisfy the nerve, the emotion of the tooth, then you do the CO2, which brings the delivery of connection to it. And in transferring from the Ca, with the cheese in your mouth, with the nerve, you transfer the energy of it, and you fill it up. The business is very bad for the dentist with the KF. But you have to try it. and if you get it right people like Dr. Azar are without jobs.
Next question?

K- U Council members have meeting tomorrow .. (1:42). We have seen a very direct attack on the UC to try to disorient the UC members, what they couldn't do with the KF. It's the same organization with a lot of lies …
now they have targeted the UC members to destroy ..

(1:44).
Q: How has been the response to the exhibition?
K- Very bad. We didn't want more than 100 people in the month ..
a lot of explanation …
5 to 10 people per day is the maximum here is to taste and experience the knowledge. they take time to explain.. knowledge is transferred first hand.

(1:46).
this is the way I wanted the knowledge to be shared ..

(1:48).
Any other question?

Q; What are the reasons we are not accepted by other stars when we ask for it. Is the U only allowed for peaceful souls. why are we not able to achieve it now. is it because we are not peaceful?
K- We try to make the human race peaceful with Zn and a lot of other things which is put in, plus new T
Now the rapid expansion we still got the cats. dogs, lions to make peaceful too. (1:50).
Q:
K- We produce Nano layers according to the need .. plasmatic N coating is different.
(1:52).

How to Enter Another Star in Universe - No Visa:

Q; .. when we travel on earth we have to have a passport and visa //
K- Excuse me, on the planets we have no Foreign Office and no visa and airports.
Q: .. but somehow who can enter another star or come near ..?
K- Once you have tuned to the environment of that planet, you have accepted all the conditions so there is no problem.

Q: I have accepted the conditions of that planet
K- That you can reach, . It's the soul of the planet which accepts you. ..
Another angle, if we travel as peaceful soul, then that planet has to accept you. (1:54). Now can you imagine why all the murders and everything appear on this planet. What's the soul of this planet accepts? Why do we create life which is wrongdoing, is it the soul of this planet, which is totally wrong setup. So in a way it says, all of you come here, this is a good place if you want to do the wrong. criminal planet.
Q: Free will planet.
K- It's not free. it has wills but they are not free.
Any other question.

Q: .. Are you the Creator of this U?
K- I am a human being in this body.
Next question.

Q: flying car

(1:58).
(2:00).
We don't have to die to go in both dimensions .
(2:02).
Any other question.

Q: So these flight systems are controlled by our soul , thoughts ?
K- More or less .

I'll step down and the 2 heads will do it.
(2:04).

(2:12).

Portals don't exist

(2:22). (2:24).
(Break … (3:05).

Second Soul Teaching of Workshop:

K- Welcome back, and what is to understand about the T is its simplicity.
We have made the T so simple anyone can understand it ..
(3:06) Anyone can understand the knowledge .. because the STM at the end doesn't know any universities . .. The knowledge of the soul, the knowledge of understanding of the creation, is within the structure of the body of the man.

In recent past we have tried to explain the totality of the knowledge in a very simple way, where ??? within the ?? brain we have embedded the STM, and ?? now we have embedded STP. If we understand this position, then, in so many ways, when mankind becomes aware of his totality, mankind will find out why the soul always dominates the physicality, because it's the Mother, it's the Principle. In so many ways, what we see it dictates the blood circulation, as the two ?? motions, stay trapped within one, but in interaction with each other. The knowledge it becomes very important in the coming time, (3:08). for those who educate in this knowledge, that in due time, as I explained before, you don't breath, you don't need anything to breath because ?? The STM and STP, ??? because we don't need to. We don't have the lung and heart operation, we become in the strength that both work together, This is what is to come in the very near future, then man in the physical dimension can manifest itself in any physical condition anywhere in the U.

The process which we teach in the coming time is literally this ( ) . Where the STM and the physicality of the man operate more or less from the same source, depending on the environment which one decides to be, ?? the soul or you want the physicality to be. When you change position, you take the shape of the position. ?? on earth 2 legs ?? be it on another planet 4 legs whatever. (3:10). but the dimension of the soul, always stays the same if and when they come to work together. This is what we tell you on earth. This year, this is where the teaching will come. You want to be in the dimension of physicality or you want to operate in the dimension of the soul. Which literally, if you look at it, the soul takes, the STP. This is what we called in the paper called "inter-atomic fusion." In a way, bringing the smaller one, which is the physical heart ?? (its) and soul, which is the smaller one, into the STM. It is where most of the teaching in the coming months will concentrate on. Where the knowledge needs to be gained very rapidly by man, to be able to become the passenger of the U, and survive ?? To be in a physical world, or to be in the world of the soul, but having access to both at the same time. Then the STM will never die anywhere in the U, because the choice of physicality is his choice.

Wherever in the U Community we have seen the STP has taken charge, (3:12). we have seen demise, we see death ?? . For the first time we show this, cannot be, and we try to bring understanding that in reality these two live together. Immortal life, because you decide the point and time of the departure, but you depart from one and you go inside the other, and you travel the span of U, and you reverse. It's like a reversible jacket, but this time all the time the soul has equal balance saying, as does the STP.

Many people in the past have managed to reach this, but they never understood, they could not teach this, and now we start the process of understanding of the life in both dimensions. Understanding that in the physical dimension we travel at a much lower speed, in different style, we are dependent on source. Where with traveling with the soul we carry with he master, and we don't need any because it absorbs energy from the spectrum of the life. The future teaching will lead and be part of teaching how the STM is created. (3:14). The creation of the soul is part of the teaching, ?? which mainly will go on after March 21, 2021. because it is time. it will take time for a lot of people to

understand, and then gradually, the understanding how the soul operates becomes, in a way, how we know the physical body of the man ?? of it.

It is important if you ?? travel the depth of the U, because it says, I made man in the image of Myself. So if physicality has a hard time understanding ?? motion, so the soul ?? operating. If it is made ?? of the man the same. The teaching after March is the teaching understanding of the ?? structure ?? of the soul. And that on its own creates a new cycle of teachings we did years ago. That part of the teaching which comes the operation of the soul, has been gifted to the new life. It will be taught by the 2 ladies of the KF in time when it comes. I'll bring you to that point, and the new cycle starts from that point on. Then you understand life in the span of the U. The true life, the way mankind will exist, without any dimension of physicality. Transmutation ?? between the soul and the physical dimension, at any point, (3:16). choice of the physical life. Understanding of the total structure of the existence.

When this teaching starts it will be a time that man will be gifted with the knowledge of the Creator. Where you can, in a way, live in both dimensions. It's a different style of teaching, a different style of knowledge, it's a knowledge man has never known, because at the other end of it there is a gift. There is a meaning for it, which is on the other end, there is a closeness to the Creator. The understanding of the total knowledge of the creation of the U and the Unicose.

So until man understands, ?? the energy from this (STP) has to interact with the energy from this (STM), and become a twin, where they can feed from each other, but within each other, and outside each other, and inside each other, then the process ?? speeds. Many of you know this position. This process is not unknown to man. You know this process very well, but you never understood. (3:18). how these two literally work with each other, and when they cannot accept each others changes. If you look at it in a simple way, you have a hard time, you cannot accept the conditions of physical life. What do you do? You release a lot of emotional energy into the soul, the soul not accepting it, releases the energy, in a way, in a bouncing bag, into the brain, you call it a brain hemorrhage, you call it a stroke. Not accepting, not being able to accept the energy with the emotions of physical life, on the physical soul of the man wants to accept. Physicality doesn't accept. because it says, it gives it to the one which is bigger than itself. And when this (STM) does not accept, because it already agreed, the problems with the physical life, the physical soul, and then the energy released, because it's a physical energy from the physical dimension of the physical soul, it is of the strength of fields of the body, destroys many cells, you end up with a stroke. In a way, you shoot yourself in the foot, because what do we do when we can't carry the emotion in the heart in the physical dimension with the STP, it all releases, to the one which is already in contact and is established before, as we saw ?? before. And this is how you literally get your brain hemorrhages, your strokes.

Now we see the STM, (3:20). and the STP always been in ?? always have operated together, but we never understood the process. Now we try in the coming time to teach how the physical ?? motion circulation in respect to the STP can be balanced in a way

that by weakening or strengthening the other, you manage to bring the 2 to be one. There is a technique in moving the STP into the STM. This is what to come, the new life after March, that will be taught ?? differently. It's the knowledge I have gifted to that new birth. It's the knowledge which must come from a woman, that we can show the equality of both, where the life becomes one. Where is no separation of the 2, in your blood there is a structure which allows the soul to move, and allows the STP to move to become ?? one.

You never need to die. You are born with it. In so many ways, when you are born there is a little dot hole in the wall of your heart, by closing it, it stops this process. (3:22). In the world of medicine, the first breath you take, they say the cry of the pain of the child, is the closing of that gate, in the joint of the two ?? halves. But now this process is to be shown, we teach in the coming time, that how you can bring as much this pressure ?? as this releases, you can bring the two together. This is how you travel instantaneously, by the ?? wish of physicality, to the dimension of the speed of light of the U. The knowledge is unknown, as I said, before, we bring a knowledge to the man, that you never knew existed, and this is part of it. This is what's to come. And if mankind reaches to understanding this level, because we have already seen the stroke, brain hemorrhages, it knows how to work with this, you literally and instantaneously you can embed the STP inside the STM. "I protect you, I give you from me to be structured, to be protected." But this itself, needs a special knowledge, there is a specific way, which the STM and the STP. (3:24). Where the STM and STP are both, in a way, if you look at it, are one half of it, that they, in a way make a very specific structure of themselves. then you decide I want to change. We have seen this with the animals, they change the color instantaneously. It has to become that way. You instantaneous change from one to the other and this knowledge has always been hidden from the man. Because mankind will use it in a reverse way, then ?? what we ?? Conversion from one to another. We chose the weaker one, which is the physical death, because from the time when we captured the STM, we were not just and correct with it. If we were the two would have worked in a very harmonious way, together in the structure of the both the physicality and the soul. Now you understand what is to come, because when you create this, when you understand this, you have to understand a lot about the creation of the U, the creation of the life of the U, and the creation of the Creator. (3:26).

A question was asked, "are you the Creator?" Yes, but in the body of the man, and that knowledge will be shared ?? to what's to come, and the totality. Then life in the space has no dimension, it ?? all depends to gain knowledge to go from one U to another. You can travel the span of the Unicose and appear, manifest at the point of the destination as you want, as you will. This is the knowledge which we have never seen appropriate to be shared, but by extending the knowledge, now we teach. You have to see, you have to get into these systems and see how you change. The way you change, the way you come to understand the totality of the creation. It is part of the coming T to be taught, and it is part of the reality of the T to be taught.

Mass and Weight : Soul and Physicality:

In a way, I set the structure for the teaching that in the coming time when we teach, man understands the totality of the work of the soul, that doesn't need to understand the work of physicality, (3:28). because it's like mass and weight. The mass is the soul, and in interaction with the physical dimension becomes the weight. In a very simple way. The mass never changes, the totality of the reality of the knowledge never changes, but when it interacts with its environment, we call it the weight. Then we show the interaction between the two. Now you understand the change, the reality about what you call the physical term and the dimension of the existence. The truth is, it doesn't matter where you take the substance, it always has that mass, now when you interact it with the physical dimension of the Earth, the ??? :?? ?? if you go to another planet and you carry it and the dimension is the ?? condition, it most probably won't need anything. ?? it can be a ??

These are the teaching which are missing and in time will be taught. Up to now I brought you, tried to bring you, just nursery school, then we'll start teaching the real understanding of the work of the U, and in time, in essence being the same, we teach the rest of it. It's very hard for a lot of people to understand, but they will be educated enough to understand all of it, in the time to come. The life of physicality becomes immortal, the life of the soul is connected to the soul of the Creator, and in reality once created, never dies, (3:30). because it compromises all the time, it takes and gives, in a physical life, you cannot compromise. When you put a magnet next to each other, they find a position, but they both still stays the magnet. It's the same as with the STM. You compromise with the soul, find position, then you choose the destination. This is how we'll travel the depth of the U. This is how we'll travel the Unicose. And those who get enlightened, to the full value of it, they become part of the totality of the creation and the Creator. In so many ways, from now on, we each in the dimension of oneness, while understanding within that oneness, it stays, the soul, physicality, STM where ?? moment, the STM is ?? operation of the STP through the chain of ?? what we call ?? blood.

If mankind did not have a blood circulation the position of the soul and STP would have been totally different. The body on this planet has chosen the blood as a way of controlling the soul. This is what I always said, the physicality is a leech on the STM. And I said, why I started the teaching this way today is very simple, you can go back.. (3:32). The STP has had the support of the massive energy of this planet, to encage the STM. Now that we manage with the new T to able to feed any cell in the body of the man, directly from the system, is there a need for the blood? Is there a need for a heart? Or would the physicality of the man change it, because we carry the emotion, we have now a system which carry both the emotion and physicality energy, then we have a system which can literally feed the soul of the cell too. And do we need anything as a soul of physicality. Because with these systems we feed both the physicality and the soul. And we know the soul is always done it. So now that we have the knowledge and the time from we ?? gained, We feed the soul of the cell, not the cell, then do we need existence for anything but ones soul to do, for ?? the physicality, manifestation of interaction. Mass and weight.

Now you are coming to my expertise, what I enjoy to teach. (3:34). For past 10 years I wasted my time, not wasted ??, take time to teach about the physicality and connection

to the soul. From now on I teach you where is my beauty, where I understand and where I take mankind to. It does ?? not ?? any dimension you exist. Up to now it was physicality and energy of the ?? soul, from now on we teach, about the Creator, interaction of the soul, the existence, the essence of the creation, because at this point, the other part we ?? become literally , the soul of the Creator. If you can educate yourself in that way, then you'll understand where you came, and why you are here, and why you need the dimension of the physicality.

As I always said, we come to Earth to enjoy the pleasures of the physicality, as it has a different understanding for working totally with the dimension of the soul. In the world of soul we talk about loving, in the creation of man, we live to love. It's totally different. And in this process I teach you how literally to live a life, ?? only through the life of the soul, but where you understand that if you like you can allow the STP, (3:36). sometimes to show itself. You choose the time and the place. Man understanding this will never die. Not only man, any creature reaches to the understanding of the operation of the soul and totality of ?? the part, of the creation, he never, ever dies. Death is a condition of physicality. Now ?? you can choose, you can go with a donkey, you can go with at jumbo jet, with UFO, or travel with the soul, or come to understand the knowledge of the creation, travel in the ocean of love and the fields of the Creator which have no dimension, then you become ?? and total as itself, as the Creator. In fact, you see nothing, but you carry everything within. There is no tangibility, there is no dimension, but what you think becomes what you desire, what you want and this clearly, this process was set in the operation of the EU. But wish what you have, no tangibility, but you have the strength of the field, that it delivers what you wish. What was the desire. And the STM is so powerful, that we only work with the shimmers of it, not with itself. (3:38).

I think I opened a very big Pandora's Box for you today. but if you understand it you become wise to the world of the creation. if you don't understand it, it's just a noise and a voice. .. it's according to the level of understanding and the intelligence of the man . understanding how the system works that you can become part of it. You don't need to have a PhD , you don't need to be a street cleaner, if your soul is enlightened, there are no sweeper in the U and no doctors. It's simple , the level of the STM has no dimension. and no limitations. Now I dug you a very big hole try to get out of this one.
Any questions .

I am talking about the soul and somebody asks, how do you make Gans's. (3:40).
K- Ask the question louder, let them hear.
Ella: I think they heard.
R: No we couldn't hear.
E: I understand the theory, but the question is, how? Yes we understand the theory, but how do you do it?
K- You have got to elevate the STP to become humble enough to have access to the STM. So now you have to understand how.
E: Again the theory is understood.
K- We brought these machines for this purpose, to show the way, how to be done. It's just that when , it's like writing, when you write, when you learn a language you know how to

do it. It's like when you learn the way from here to Vienna, you can always go. With this T, with these systems partially the work is to show man how to access his soul, and then you practice.
E: And when the machines are not accessible?
K- You should be able to make that yourself.
E: How?
K- Exactly what I said, you have to bring the level of the STP to such a level that it become in touch with the STM.
E: But you said something in particular, there is a technique.
K- Yes, the technique will be shown in the coming time. Mankind is not ready yet. After 21st March next year, the new soul will teach.
Any other question. (3:42).

Q: Azar:
(3:44). .. If I want to travel can I take other people with me?
K-
Which one of you is humble enough to become the weakest.

(3:46).
(3:48).
Any other question. (3:50).
These 3 people tried very hard to be here in Austria, but embassy is closed in Iran.
Q: Maraninad .. (confusion …)
(3:52). open channels and go to paradise ..
K- I don't understand what you are talking about. Q:
(3:54). .. it's in the Farsi language.. be careful we are not doctors ..
(3:56). it should be cleaned up before it creates problems .
K- This is not the place to talk about it, that has nothing to do with the structure outside which is to do with one or two chat rooms ..
Q; azar chat rooms I am the creator I can make anything ..
K- No I think you are mixing a lot of things together. This is a situation which was created deliberately by those who infiltrated the KF Persian originally. All this talks not understanding, or deliberately bringing. This is some of the problems we have with the authorities in Iran, how these people have put so much rubbish in the market. ..

Any other question.

Thank you for today .. (3:58).
I hope today we opened a new dimension .. it's a breakthrough from what we have been taught.
you want to see and make something …

END

347th Knowledge Seekers Workshop; September 24, 2020

Live Broadcast in Linz Canceled
Permanent Exhibition Accepted
Carolina Ransoms Son 40 Million Euros - Barrage of Emails Against KF
3rd Enhancement Unit to be Added - Most Advanced Technology in Universe

ENGLISH TRANSCRIPTION

Live Broadcast in Linz Canceled - Permanent Exhibition Accepted:

(:10). .. We apologize today we had to move the teaching some hours ..
We were told yesterday afternoon there are examinations for medical doctors in the building, and nobody can be in the building as they are examination. So we had to change everything, as it is now, and hopefully next week we might have a live presentation from the center. As we said, we had the offer that the exhibition center in Linz become a permanent exhibition for the next 12 months, accepted by the authorities who own the building, to be a permanent feature in Linz for . Which means the T has been accepted to run, to gradually come in and see and understand. (:12). This is a privilege for us that we start showing the T in a massive way. We thank all of you who are writing so many nice emails, and communications to the center, claiming everything you can, and as the head of the center and the officials of the local government says, the T is as breakthrough and now they understand how much people are trying to stop this T to reach the population. And they do not listen to these ?? .

Carolina Ransoms Son 40 Million Euros - Barrage of Emails Against KF:

There is another point that on (Tuesday) One Nation .. we opened the hand of one of the KS who was setting up to takeover the KF as the Queen of the KF, and they did not know that we knew. And in that process we explained how it was supposed to be told, I am mentally demented for her to takeover, and then hand it over to the satanic groups she is working with. And once they realized that we knew, and they walked into their own setup, we have seen a flurry of texts which she has been sending out all over the world to everyone. We have kept this evidences and it has been handed over to the lawyers for criminal investigation, and criminal offense, possible prison sentence. The extent of the allegations are so deep, that it damages not only me, but the Foundation. And we have taken action on behalf of the F ??. One of the reason you have to understand why she is taking this action is they realized they could not get hold of the KF, and she made a claim for 40 million Euro from the F for her private services to the number of the KF KS. We have put this into the court. And she is claiming that all of the work we have done is hers, (:14). as usual, she done before, and she is expecting 40 million Euro from KF to be paid to her, for her personal services. And this has to be, and is on the table, received by our lawyers. And now you understand why she is angry, sending all this. All the work we did

as KS is hers, and she wants to be paid 40 million for. So collectively all us KS have to collect round about $.25 to .50 cents to pay for personal services of her. That is more or less, as we said, the claim on private services is on the KS to understand. So now you understand why you start to receiving such a massive amount of things, is all lies, cheats, deception, and now a claim for 40 million from all of us that she can have. So they say, professionals, prostitutes, and priests know exactly where to go for the money. And one covers all of it. In this essence we thank you all for sending all the communications you are receiving to us, and these are all adding to the criminal case which is building up within what we call the structure. And please understand that whatever you read is exactly what someone was planning to be the HKF after putting me, and some other members of the KF in a mental institute, to be handed over to those who were planning to shut the KF down. Now you understand the extent of how much we were infiltrated directly. In so many ways, I thank you for contacting us and sending all these lies and deceptions which have been put on the Internet. And in due course as we have started a criminal case against, (:16). to be heard in the courts. This is the way I run my life, everything on the table the way it is, and the way we understand. I share my knowledge, I share my life with the F, and the reason we have to hold back is because, the threat of 40 million is on the life of my son. My son has not been seen for 3 months, hidden, and if I don't pay the 40 million for KF, I might never see my son. And now you understand, ransom, by those who are professionals. In so many ways, with different excuses, we all pay for what we believed in and what we served. I do not go any further, but it's exactly 3 months, I don't know where my son is. I don't know if he is alive, or through her profession been passed on somewhere else. And I hope you all understand, and we keep this matter away from public till the courts in the land decide and then we let you know. I pray for the soul of my son. .. it's not easy .. this is what the Belgium's are, the priests, the professionals, prostitutes, and the rest, and you've seen how exactly the same method as what was used by Derek, has been used ?? (:18). the same lies, the same way. And I hope my wish that as KS we stay solid, loyal to what we are doing to change the course of humanity.

The teaching of today are very deep and it goes and touches many ways, in the deepest space travel. I would like to thank Jalal and the group which came from London, and others who came to be in the live presentation today, and in due course hopefully we hold a session and that all the KS can be present.

3rd Enhancement Unit to be Added - Most Advanced Technology in Universe:

In so many ways, the knowledge has reached its pinnacle. In the coming days as we announced in Tuesday … is that the KF as of this week, has placed on order for the 3rd EU to be added to the 2 you have seen. The new EU we'll most probably be able to demonstrate or show, the structure before the end of the teaching. It's the new flight system. That's what you most probably call the UFO's. This unit will be added to the collection on the platform of the EU, in the coming months, and it's being made to be a 5 passenger flight system. In a way, (:20). it has the capability to fly and position itself. It carries all the things necessary, as in other two, for feeding and creation. I will be a new transportation system. We estimate as we said, the flight from Vienna to cities like New

York, and let's say Beijing in less than 10 minutes. This T will be demonstrated in public and as we added the 2 EU this unit will take its place in the center of the two. This will be an evolution in the space T and transportation. You can adapt it to be used as a taxi, bus, as transportation between different part of this planet as we become One Nation. I have asked our manufacturing team in China to deliver to us before end of today, as we did with you originally with the EU, the schematics and then we show the final versions in Linz of the new flight system.

Delivery of Technology Across Planet by March 21, 2020:

The new flight system takes us into a new dimension, to the point that mankind will be able to reach any point on this planet, irrespective of time and position and place. And at the same time we'll see that this T will be delivered in total to the whole of humanity in one go. In a way, as I said, we are getting ready for the what we call, 21st October life , that we switch over to what we call delivery of T (:22). in a rapid way across this planet. Preparing everything for the final date 21st March 2021.

In so many ways, as we have said, we have prepared everything for us, to be able to be there to deliver the T in a comprehensive way that pushes mankind to new frontiers. New frontiers of peace, love, and being there to be able to live a peaceful life, not only on this planet but across the U. In so many ways, I am fulfilling what I promised, and in the timeframe which I promised. It is the responsibility of the KS to disperse the knowledge and the T across the world. What we showed the 2 EU have create a vibrant positive move across the scientific world, because by looking at it, even when you look at the EU on its own, for the first time man sees the opportunity to be able to share the knowledge in a comprehensive way. In so many ways, we have learned how to conduct, how to be able to reach a position. In so many ways, we need to extend our knowledge to extend our work in understanding the totality. .. When you look at, it's the first time in front of us. (:24)… we see the totality of the knowledge..

(:26). that allows us to understand the fields we'll encounter in the U.

.. Material EU, in a way it materializes the work of the U, not the matter state we look for to produce something. In so many ways, in the coming days we'll show the power of the T. .. the understanding and intellect of this system,
we take each organ as 1 system .. (:28).
all will benefit by it, what they need ..

These system have a CE certification and can be turned on anywhere in the world. In so many ways, we have created the replication of the U and the body of the man. .. we can test it anywhere. I made a promise, in the coming days, while we test, and we come upon anything, we go live. Keep an eye on your Zoom, if you get notification it means we have moved in new territory. or we seen something that we want to share ..
(:30).
6 fluorescence tubes around the reactor.. Don't forget this is the way Tesla showed us transformation of energy through plasma. Both systems have been ??

When you come to the Exhibition …
Do not bring gifts to us, give them to others. By the nature we are in we do not accept gifts for security reasons. I saw many people bringing gifts, from dates, to MaGrav systems to others. I thank you for it. But you have to understand for security reasons we cannot accept. Bring your love, knowledge, and share your soul. (:32).

.. we demonstrate a T which is certified and used across this world in different shapes and forms by KS and KF.
Has brought peace to us ..
(:34).
In so many ways, we do not know where mankind will go with this …

(:36).
These are the same fields as from the Sun. No side effects.
Those of you who are scaremongering, you have not understood the T. Plasma T is the way our body is built. Gans T is the way our body is made.

Problems in my liver only happened when I was given poison by Derek, not by the T.

Be aware as we start opening the T this way, pharmaceuticals, financial organizations, mining organizations, computer . all see themselves in danger. it's not endangering anything, but it pushes you to develop new T, new understanding. (:38).

Soul Teaching - "Line of Connection" STM to STP :

In the process of the teaching of today I would love to teach you something what we call in UC as a "line of connection." For man to create that line of connection, has taken thousands of millions years, but you have not managed to reach it. What does that mean. **You need that line of connection to connect the fields of your soul to the STP. You do not know how to reach it. You need to understand the connection between the fields of the plasma, and not with the interaction of the matter of the plasma**. You have to move, as I always said, look at the fields and not the matter.

You Live Interact within these Fields - Travel the Universe:

In this process it's vital for those who follow this path to understand **that if you can interact and live within these fields, you can travel the span of U through the structure of the fields of the U**. No need for burning fuel, no need for doing anything, but taught, if you can connect the dimension of your thoughts through your soul to this reactor in the middle, and your wish is Cu, so much in this shape, It will be produced. You know this knowledge, we call it the knowledge of love. We know this, because it is one of the only ways which the STP and STM have connection. (:40). **You feel your love, you reach your love. You feel its pain, you feel its need, you feel its whatever is. and instantaneously you know**. You love your son, you think about him and he calls.

You think about your lover, and the mention in the soul, brings the touch of the screen in physicality. This is where we try to connect, this is where mankind has to be.

This is MaGrav:

If you understood in so many languages, from the beginning of the teaching, we have called it MaGrav, M and G. If you understand the field strength, you give it in the direction of what you need, you will receive it in the other way back.
In so many ways, the knowledge is complete, you have to filter it. You have to understand it, that how it applies to all of you. You have to be clear about how things go to be. **You have to be able to link up with the emotion of the soul that reaches the emotion of physicality, that in a physical dimension it manifests itself, or visa versa**.

In so many ways, (:42). mankind has to learn to listen, to feel the vibrations of the fields of STM of his own. Many people say, "I have no connection with my soul, I don't see, it's just you are the only one who sees." Because by doing this I start to acknowledge the existence of my soul. In so many ways, "I choose the material, the matter state."

The Soul Manifests in the Emotion - Mankind Needs to Strengthen his Field:

The **STM has no tangible physicality, but manifests itself in the emotion of the man. This is where mankind needs to strengthen his field, and this is where**, gradually as I have taught many, many times over years, **be able through the STM to manifest whatever he needs in the palm of the man**. STM and the STP in a wish and emotion can create what the man needs at any position, frock on the shoulder, metal in the hand, and the shoes on the foot. When you travel the depth of the space and if you have a physical dimension of the foot, and you travel and walk in the acid dimension there is no shoes to go back to on Earth to buy to bring it. **The emotion of the soul and the emotion of the physicality create that what you call shoes**, it creates that gold in your hand. The **love of giving by both, leads to creation of what it is**. Mankind has to learn in a simple way, in a very simple way, (:44). the love of a man and a woman leads to creation of a child.

The LOVE between STM and STP = Creation:

The love of the STM and STP lead to what man wants to be created. This is where the knowledge of the man is not completed. Man does not need computer and a car, in a wish of understanding of totality, he can have both, with the full support of soul and physicality. This is what in the coming time, especially with the EU I will be teaching. In so many ways, mankind has to learn to communicate between different part of his existence, that he can support life anywhere in the U, both in the dimension of physicality or energy pattern, or condition, what we call the soul.

Purpose of Enhancement Unit is Enlightenment of STM;

In so many ways, if you look, this ball in the screen (sphere in the EU) is the STM, and all these balls, systems around in a specific way set, create the emotion of the creation and perfection .. through these technologies. We are not here to demonstrate flight or creation of material, (:46). we are here to enlighten the STM to know how his physical condition can collaborate to work to lead to the creation of what he needs. Does not mean that all men will understand this, does not mean that everyone who sees this T as it is, will grasp the idea of it. **But those who get enlightened will reach the new condition of living independently anywhere in the U**.

EU to Teach the Connection between STM and STP:

In so many ways, we all know there is a car and it needs a driver, and we all go to the school to learn how to drive. The **prime purpose of Body EU is to teach you how to drive. How to control and how to bring the physicality of the body of the man, through the emotion and the STM to his destination**, to the point of his pleasure and joy in living. In a way, the production of the new EU is for the man to see the connection between the soul and the STP. In so many ways, mankind has to mature to understand, to comprehend. In so many ways, mankind needs to understand. We put you in the car and we let you to drive, and in a way drive from the soul into the dimension of physicality, and gradually learn how to connect with you soul, how to be able to make the systems within the structure of your own being that you can survive the span of U. **All these teachings are for man to be able to survive in the space.** (:48).

Will Man allow the Technology to become Part of his Existence:

KF is a space organization. We are not here to do other things, but at the same time we are right, we have the right to have some fun, by learning, teaching, by sharing knowledge the way we do. Would we in the coming time, be able to mature man to the point of understanding the connection between the STP of the man, while we live in the dimension of the man, is a different story. Is what I call, **the fire of love for the man so deep, that he will allow the T to become part of his existence**. We need to be able to do what we want to do, to share the knowledge. But at the same time we have to be flexible to accept the new understanding. Mainly is acceptance, is within the structure of man, and no one else.

The Soul to Take Over the Physicality and Protect It:

The time of change comes through the understanding of the change, to be able to live and understand how the fields interact with us, We are in the center of what we call the light of the U, the fields of the U and the knowledge is understanding how to utilize it. (:50). Be it from the STM, be it from different dimensions of understanding of the motion of the fields. What do we understand from these interaction, and what to expect from these interactions? Do we still need systems to travel or can we travel within the depth of the U, through the dimension of the fields of the body of the Man. **Do we allow the STM to be encaged within the physicality of the man, or do we allow the soul to take over the physicality and protect** it. Rick would you please show the video which we have

from our friends in Brazil, which you showed on Tuesday. .. It's important for all of us to realize and to visually see what the knowledge is coming. Now step by step, gradually KS can visualize, can understand, can see. The KS are gradually trying and they are visualizing what should be. It's interesting, the KS gradually move to the dimension of understanding the totality. (:52). And it's for us to be able to see it, that we can visualize it, then we can make connection with it. .. (Video of Soul over brain)

Visualize the Soul Encaging the Physicality and Protecting It:
This is the brain of the man. Just have a look, now we know where the soul is, we have envisioned and understood. Now we understand, it's within us, it's within our existence, where we never knew. **Now with the new T that we can elevate it. The brain is still there, but now become part of the physicality and receives the protection**. This is what man has been afraid of, to loose the physicality, but in fact, it is more protected then before. No disease, no viruses, nothing can reach it. We encage it, now we are learning how to use it to protect us. Limitless time and life. **The biggest fear of the man has been, what happen if I let the soul goes, (:54). and would it lead to my demise**, because when it leaves it's the end. It's time to understand how we can create the fields within the body of the man, and through it to enhance the power of the STM that he can protect.

By Loving our Soul We Can Bring the Two Together:

We do that with loving someone, now we need to do the same by loving our soul. We share it, we understand it, and **we comprehensively need to work towards amalgamating the two.** And part of these teachings are this. Most of the teachings are this, that how we can bring the 2 to live inside each other, and depending on the position and the time, and the wish of either one, to manifest themselves as a soul, or as a physicality.

Man Becomes the Soul:

We have seen **the physicality has many weaknesses**, and in so many ways, we cannot stop, but would the presence of **the STM, will give the man that edge. That is a beautiful demonstration of what man shall see to become the light**, to become the source of life. (:56). In so many ways, once we understand this, mankind will move to a new dimension. **The fear of demise will not be there**. The fear of would I be able to create myself will not exist, mankind will become in the position of his own life and his existence. **Man becomes the soul**. And if we understand this, would it lead to a new dimension? Would we go to understanding the totality of it, and would **we take our future in our hand**. Then we decide where we manifest ourselves in the galaxies, and the stars. This is the new knowledge, for man to hold his destiny not on this planet, but in the U. But with the hand of the soul and when need be with the hand of the physicality. The teaching in depth, is to understand the future of mankind, is in the palm of his hand. (:58). We need to understand**, we need to be able to become the satellites of the U, independent of time and position. In so many ways, we become the Sun**. In so many

ways, we are teaching you how to take charge and become ?? sentient lights in the U. You choose, you travel by the soul or through the dimension of the light, as UFO's ?? ??

You Become A Star in Sky - Option with Physicality:

In so many ways, **we have made everything possible for you to grasp, to understand you are one of these lights in the U. You can decide the position of it by termination of the physicality, or you can decide to elevate your soul to have the physicality within you**, to manifest in any other position in the U. As I said, when you look into the depth of the U it's nothing but covered with shining lights, which is from the soul of the creation of the planet, or the soul of those who have become the seeds of the new cycle. The understanding of the T, (1:00). has to be in totality, and to understand the effect of rays.

You become the Messengers of Peace and Friendship:

In so many ways, to be part of it, to understand the interaction of it, and with it to be the, what we call, one thing, wherever you are in the U, **you become the messengers of peace and friendship**. Be it in the dimension of the physicality, or be it in the dimension of the soul. The bird is the physicality and the light is the soul, both carry the same message, and until mankind does not reach that level, mankind will not leave this planet.

The Knowledge has to be Shared Freely:

In so many ways, we have to learn one thing, how to share the knowledge and the rest will come by itself, the rest will appear in the new dimensions and the new ways. In so many ways, would we become part of it by choice, ?? thus another path. What we share is understanding, (1:02). that the **knowledge has to be shared freely**.

We Teach You to Tap into Universal Knowledge:

Now that we have built the new systems and we can show you , you can follow, you can understand, you can enhance your knowledge though the knowledge of the U. In the coming months **as we reach to our goal of 21st of March 21, we'll start teaching you how to tap into the universal knowledge using your soul, using your understanding and understanding that in the presence of time mankind needs to be evolving in one direction and that becomes free from, detaching itself, from attachment to many things. Even in detachment we get attached,** and this is where most of the problem with humanity has set, and that's where the abuse has been. In so many ways, when you look at different lights and rays, that should give you the full indication of how we understand the totality.

(SILENCE .. >> (1:04). (1:06). (1:08). (1:10).

K- thank you very much. As a family we stand a lot, but as a family we take a lot. Unfortunately we see what I call, those who were among us pretending to be who really

are, and how we see them and it's okay. Sooner or later we'll achieve what we are targeting for, we'll be. Rick would you like to take a commercial break >> (1:12).

Take a **commercial break** .. Cycle of creation Video .. (1:37).

Continue Soul Teaching:

K- What we do in the process of teaching, is what we share knowledge and understanding. In so many ways, we share knowledge freely to be able to evolve man to a new understanding, new dimension , new process of elevating the STM and at the same time the physicality of the man. One of the biggest problems in the coming time is when the STM has to protect the physicality. In that process would the physicality be able to stand what it has done to the STM. In so many ways, the transition between the 2 will bring a new dimensions (1:38). between the both. What will happen in the coming time as we go through this process, is that as the soul transfers and expands beyond the physicality, in a way, it feeds the physicality, it gives it all it needs, in all dimensions. And would this be a way to feed the man directly. In a way by retraction and expansion of the soul, on a regular basis, maybe every day, every time that it is needed, man will repair himself, man will clear what has been exposed to, which is not good for him, or what is needed to be done. One of the next steps in development of the T is this, this is what we are about to teach. In a way, in the space we can't carry much, no medicine, no food, no material, we cannot keep on carrying machineries that can provide or systems that can provide such a things.

(1:40). man has to learn how to tap into universal fields

(1:42).

… In the coming time we'll teach how to become a ball of light in the depth of the U. To become intangible, but to be seen to be tangible. In time mankind will take the steps and we'll teach you through the EU, (1:44). how humanity needs to understand the work of the soul. We take new steps and with it we reach new dimensions.
How we can heal the sick body of the man. ..

Rays Particle Photons :

(1:46).
.. We take the STM within the light. In so many ways, when this system adopted in the shape
where a man can be carried within the soul of the light.
If you could fully understand what is explained .. we bring the latest technologies available to man, to travel with a shape like this (sphere or triangle), takes a lot of energy. To travel with a shape like this (cigar) as you have your EU, is a massive development in the space T. Where the new system can travel with the speed of light, but be a particle of the light. This is what I explained in the teachings, now in the Book 1, we understood the structure, in Book 2 is the structure of the light, is the way the man will travel from now

on. (1:48). Even this (triangle & sphere) in the history of the science of the space T is obsolete. In a way, when a man travels in this dimension he becomes the light, and he becomes the soul of the light. In so many ways, the new EU for space T, will carry the STM within its structure, within its parameters, and then man can travel in the speed of light according to the understanding of the soul. The soul of what we call the captain. In so many ways, we will see new structures, if you look what we have as EU is a flying object, which the man who sits in it becomes the soul of it, becomes the particle light, instead of a photon light. This is what I explained, we go from book 2 to book 3. And now the systems to be delivered, and even system, the EU, the body EU has been set for that purpose to become the particle of light, but this time the light, the speed of light, it depends on the strength of the soul of the captain. He or she decides. What it sees on the horizon of the light of its soul, (1:50). .. we look into space to see the sun, to see the rays, and In so many ways, when you are the Sun yourself, you sit within and you become as is, not as part of. In so many ways, today's teaching as when I started, is understanding that in the center, is the particle, the system, the way we will travel in the U, as I mentioned in the teaching of the past, **we bring the T that not even existed in the U, and is a new breakthrough for the Universal Community**. In so many ways, the new EU as a flight system is a massive breakthrough in the world of the science of space. If you look at the structure, it's very much like the structure of before, but it developed in the structure that, if you look, that the old what we call, the UFOs you'll see the bracket of the light, and the balance of the controls. In the new EU this has been converted totally in a way that suppresses it into 2 lines internally. When I designed the .. EU as a spaceship, the whole thing was taken in, instead of being out. This is a massive development, (1:52). in the space T, beyond imagination. But if man understands its power, in a way we have turned this, into this, internally. We don't look outwards, we look inwards and this gives us a massive strength and at the same time in connection with the Soul of the operator it becomes the motion and notion of what he or she wants to do.

The new EU flight system will breakthrough new T. We bring you in the totality of the understanding of all aspects of the creation, even to the level of the soul of the Creator. As the Creator travels in both dimensions, both as a photon, and as a particle. The new EU which has been developed, and you have one on the table in the arena of exhibition , is one of the most advance flight system ever known in the U. We always worked with the interaction of the fields of other position in the U. Now for the first time we work within the structure of the soul of the units. In a way, we took the ship and turned it inside out. (1:54). and it is much more efficient. It's much more reliable, and it can reach across different universes, much better, safer, and in totality. When we designed the EU was a way to cover the eye of the man from his total creation, until he could be unraveled, and revealed, and today we have shown you. And if there were no examines in Linz today, you would have witnessed one of the most advanced flight systems in the U. The 2 units are ready for, not only demonstration, but delivery of the T and the change for the course of humanity. It's the time when we take position of the peace. This is the time when we take, to force mankind to peace. Maybe tomorrow, and maybe Monday we'll open the Zoom if the system allows and we demonstrate live. Nothing has stopped me to show T even if it fails. .. but gradually the way we did before in the Inzano when you used to be with us. KF is so confident in its T it

We'll turn on both systems tomorrow morning and come with us, (1:56). celebrate with us, a new breakthrough. We try and we keep the control system out of sight, but we let you see what the effects might be. But in true the Body EU, is one of the most advanced flight systems ever known in the U. The UFOs you've seen are obsolete by thousands of years. The system not only elevates the STM but uses that elevation to control the destiny. In so many ways, it's a creation of new cycle of technologies which unknown. But at the same time it's new to the whole of creation. Unknown but effective to bring any change in the U. As we test we all share see that we all shall learn. At the same time we wait for the return of the HKF to be able to operate in full, as she carries the soul of the system within. .. we develop New T and release.. In so many ways, we are ready to take man into space. (1:58). But the biggest question is, is man ready to become part of the space? The change in T with the simple structure of the new system will bring change in every aspect.
It was asked what do we do with all the pollution.
How do we build a new society that uses the new T and not the old, the new ethos and not the old ..

My wish is my command. The new EU will carry man into space..
(2:00).
man will live everlasting life, as he lives through the dimension of the light, but there is still a pleasure in the dimension of physicality, wherever he decides. The

There will be some shaking and shuttling but at the end, man will takeoff. All systems produce fields at the level of the creation ..

The new photon, and particle system..

(2:02). .. we have built the systems now we are gong to test the systems. As a KS writes we are not such a bad race we can love and care for everyone in the Unicose …
if the totality of the human race accepts the new conditions .

(2:04).
Are there any questions?

R- Comments. Thank you for bearing your soul during these difficult times and sharing your burdens with us, I feel many feel your pain and sorrow like I do, we lift up your soul for protection and safe return my you find comfort with the love all of us are giving

Q;
K- thank you very much. (2:06). Are there any questions.
Q: How is the FAA going to react to the Keshe flying unit?
K- What they cannot see they don't have any certification for. In a way, we become a way to set the new standard.
does not stop the progress of man. The beauty of the T is that it can be done by the simplest man in the world. ..

(2:08).
Never be afraid of what is behind the wall. Always look

(2:10).

Any other question

(2:12).

(2:16).

(2:18).

(2:28).

In so many ways, from outside look inside, it's what did they do that they deserve this elevation, and such a knowledge. So I prefer to be with the humans then the ET's because now the humans are more advanced then the ET's. And that was my wish with the beauty I was given, (2:34). I delivered.
Any other question?

Q: In the past you have described our using the M fields in the U, like a sailboat uses the wind to ride to its destination. Today you described the EU as being internally focused rather then outward. Is this a change in the way we will interact with the fields of the U.
K- When you structure like this, you pull from all fields of the U. Where before you had to send that you will receive. You become the center, and who wants to be in that position in respect to the center? It's a different structure, it's a different ballgame, and in the same way you produce fields that makes it easier for you to be where you want to be, not that you look, to be ending up where you want to be. It's a big difference. With the T you can travel beyond speeds man could ever imagine, or Universe could imagine. You reach very near to the speed of the soul of the Creator. (2:36).

And as I said, we gifted that soul to one, and you shall see, a new generation, a new cycle will start with the same knowledge as we give the soul. Time, we just need time, a few more months. And in the course of coming time we'll teach more. Today's teaching again is an evolution in the science of the U. I have to complete this in the next 20 odd days of human race. I have a boat to catch.
Any other question.

Q: .. in the balance between the STM and STP can we somehow see the rule of 3, 6, 9, and in that position 9 as being access to the U to a new cycle, a new creation? Is the knowledge of numbers important for the construction of the totality, also for the different parts of the totality. Or is it only through love, comprehension, and healing of the fields? (2:38). Are numbers in a way only an illusion about the reality of the matter state?

K- Numbers are a collective of what we see of how many. It depends what we attach to it and how we expect it. and then we set our mind to be what we expect, what we said ?? Even in the health centers we measure in different ways, but it doesn't go by numbers. but it goes by the strength. If you go to one of the patents. In so many ways, the structure of this spacecraft was explained. Actually the full detail of this craft has been explained in the patent. But as I said, you have to read it to unravel it. You have to understand it to unravel it, you have to feel the essence of the knowledge, not by what is written. Numbers don't count. What interaction of the fields create by interaction of the numbers count. (2:40). What you expect to get from it.
Any other question.

Q; Have you been successful in contacting Sharon Stone?
K- No, she is illusive. She was somebody I would have loved to see her when I was young, but now would love to be able to help her, if she hasn't lost her ??

Q: Some people would like to help locate your son, they want to know his name and birth date ?
K- It's in the hands of the police. The police authorities are fully aware of it, and she has lied to the police, so believe it. We know a lot, but we try to keep it out, but you have to understand you are dealing with professionals. These people work on a ?? treatment, and show to ?? We have every knowledge to know, (2:42). but on the other hand it's 40 million Euro ransom for a child is ?? But when the mother does it, shows crime, what we call inclination and destination and what they want to do. Don't forget she is working with a pedophile. That's my biggest fear. The man she has got involved in, is well known, That's my biggest fear. We'll sort it out, sooner or later we'll sort it out. But that is the destiny we have to see. What we are there to learn from it. The only thing we can do is pray for her soul, that's all. This is one thing the pros never learned, they can take part of physicality of the man, but they cannot take the STM. We can elevate it.
Any other question. (2:44).

Q: .. I am ?? I helped a man in Turkey, ..
he was feeling better .. 5 hours before he sent me a negative test.
K- We had many of our. we had one of our well known KS tested positive a few weeks ago, and the KS helped him and it became negative. And we have seen this to be done, and it is something that happens. We deplete the energy of the virus. And it's nice to see. We make the difference. (2:46).

R: Seems to be more reports of people being able to transfer that emotional energy .. through Zoom , without giving someone the actual substances, but transferring that emotional energy for a healing condition …
Jalal was showing us live in the actual exhibition hall … (2:48).
R: he was not supposed to take pictures..
Jalal put his hand on screen, I put my hand on my computer screen, it overlapped .. as if our hands were connected. I could feel the connection, he was feeling the fields of the Gans, the ideal was for me to feel the Gans through his hand.
K- Is that a beam me up Scotty job.

R: yes, actually one of the phrases we were discussing at the time. Very interesting how the transfer occurs…
.. when I feel his essence .. (2:50).

K- We should be able to do that with our soul, that's the new ?? ability we have. We have to learn it, and we can do it. Once we start using these EU and we gain more and more trust, we come to understand about ourselves, our capabilities, our new friend within us. And that's what is important.
Any other question?

Q: … when jalal was holding his hands over the Gans I tried to visualize the exhibition .. it really touched my head. .. this was the transfer from jalal.
K- In so many ways, we shall let Jalal in any more, we got to stop him, but he is there. He is such a pure soul, it's understanding the knowledge when it touches your soul, then you don't need to go through electric, or whatever, communication line. You just need a point of reference for you to physically confirm that you received it.
Q: It was a beautiful feeling….
K- We left 2 children playing in the exhibition center ..
we need to develop more trust to ourselves, that you don't need a screen, but if you ask it will be there to take you.
Q: tells his dream … (2:54). .

K- .. Next time we have to keep Jalal away from these things. I didn't know they were in the lab, and I heard it, some whispers, but I didn't know. You see we have opened some space that any KS can come and learn, that's the beauty of it. We have a very big problem at the moment. .. we can't get our stuff back into the lab to carry on with the further research. (2:56). They are enjoying him so much on the floor that we can't get him back. .. on the other hand to get the stuff back in is very hard. because its .. the beauty of sharing knowledge, it becomes so powerful when you are on that floor. The compulsion to share knowledge is so fresh …

(2:58).
(3:00). Jalal .. I am sharing my dream with all of you..
K- We are open tomorrow. We have a large number of people. Collectively they raised money to buy a EU, a bus load ..
(3:02).

We have a full 100% press lockdown. This is how the T has to come out, through the people.
Tomorrow we start loading and testing
These units have Certification and can be tested .
(3:04).
Any other question or call it a day?

Q: How do we create our own honey Gans?

K- Honey Gans is very difficult. We got many Gans's that are not in public, and will never come in public. It's part of research .. We strive to make Gans's that are vital to life, and honey is one of them.
Q: for me the honey Gans had a lot of special fields (3:06).
The experience of being in the exhibition ..

Q: .. a long time ago it was mentioned. A personal flying belt. going to be released?
K- … time
(3:08). .. now that we have built the system and we can collectively enjoy it. .. hands on .. you never know what might happen in testing and developing. But there is one thing for sure, man has entered a new dimension …

It's a surprise when it's switched on. ..
This time the systems are made in a specific way ..
(3:10). the system which is the body EU is ready to fly ..
does not mean necessarily flying in the physical dimension
It's a very interesting time.

R: 347 KSW (3:12).

348th Knowledge Seekers Workshop; October 1, 2020

New 3 Dimensional computers

ENGLISH TRANSCRIPTION

Teaching and Release of technology is Accelerated:

(:10). … We welcome you back to another session of Knowledge Seekers. We try to open and expand the knowledge. As we said in the coming time we will change the process and we teach more. As we thought (taught) in the One Planet ONOR and in the Iranian teaching, and in the Brazilian teaching in the past few days, the teaching has started ?? accelerating, as we breakthrough new T every session, we are not limiting the teaching to Thursday morning anymore, because there is so much to teach and at the same time so much to enlighten. As we said, in the teaching on Tuesday… we are aiming to reach space level T in a rapid way. What this means we could have extended this teaching over years and months, as we did with what we called, the Gans's and the rest.

Now in the next 6 - 7 months we make a fast track. A lot of you might get disappointed, a lot of you might catch up, a lot of you it's been what you have been waiting for. But overall we have opened a very fast track into the knowledge of the Universe.

New 3 dimensional Computers - Information and Emotion:

As we said, .. we start developing the non-tangible what we call 3 dimensional reactors as computers of the space development. What this means, (:12). the T of today's computer has become obsolete, what this means is you can carry the knowledge and information, the same as the brain of the man in the palm of your hand, in a reactor, in a system which carries all dimensions of thinking, emotion, and at the same time, for the first time, our computers will carry our emotion with them, they know how we recorded the sound, they know why we recorded the sound. We know with them how they felt when we recorded it, because they transferred that emotion to the person who receives it. It's not just I love you, it's with all the emotion of it. It's not just I cry because I lost something, I feel the loss. This is a breakaway, this is what we never had. In the coming weeks in conjunction with the IT section of the KF, and our experts we will develop and deliver this T within coming weeks. We have speeded up. .. we have requested from the exhibition center an extension to the premises we have for the January to deliver **the first flying machine to be shown in public**.

New Power Generators 10 Kilowatts:

At the same time new T, energy power systems will be delivered. Those of you who have been waiting some time, you will get it at the price which you paid for it. The new price for the new generator is 10,000 Euro. Once we add the ?? type and we release. This is not 1 or 2 kw, it's 2 per demand, up to 10 kilowatt, and then we build it up.

Constructing Buildings with Plasma Technology:

So what we see the way of the new computers, system control and the understanding of the new T in creating new dimensions for buildings. What we deliver, at the moment we are used to bricks and mortar. (:14). We are used to concrete, for centuries. We release a T where we can build houses using what we call a plasma reactors. We do this in the construction of what you call UFO's, but now we deliver it. You can move your wall with the flick of a finger, You can change the wall with the emotion of your thought, "I like the color to be red," and I change it to a color I never had, I change to orange and the stripes. These are the new technologies which we prepare mankind to get ready to take into space, because when you land on Moon we are not bringing concretes ?? we are not producing you aluminums, concrete from the EU. We give you a system, you build your dream house using the new T. Don't forget the basis for this was shown in a very soft way, in Caribbean's, in creating a dome, now we show you how to build that dome, how to build your constructions. In the space there is no room for factories to build concretes and we cannot take water and everything else. We have to learn how mountains are built, how we build the valleys and the oceans, and we can replicate it. We create the dome and with it we build a future for mankind in the depth of the space. As I said the evolution in

science will come so rapid that it will touch every man on this planet within the next few months.

Iran will Deliver the Technology to the World:

We are committed to peace, and peace comes with T and delivery of the T. I am committed to peace, and with it I deliver the tools of it, with my knowledge and what I have to be able to change the course of mankind. (:16). And one word or another, you have seen nothing yet. It will come to the point where we can see and transport as much as we like in the dimension of the STM, or in the dimension of physicality. We can develop knowledge and T will bring the conditions that bring fair and justice across this planet, be it on food, energy, on delivering a new leadership. We are here to change. We change on a small nation of Iran, we'll bring new understanding into Iran. And we use the Iran political system to create a new condition for world peace. As I said to the Iranian teaching on Monday, very clearly, science and religion in Iran will go hand and hand, we don't challenge the government, we give a hand to the government to bring a just and correct scientific based T, that from Iran we spread out. I have accepted this position and lead with it, directly into the heart of Iran, new space T , new development. We'll transfer this T directly to AZ station through Iran. We transfer the T through China, through our headquarters in Guango, and to Russia, We make sure through Iran, we take leadership not only in space but in the space with peace. We create a condition, as I have given a commitment, knowledge with fairness, with correct conduct will become part of the work of the KF. With delivering T so rapidly we take the lead and leadership to deliver peace, and nothing else. We don't take any hostages, we free man from the hostage taking of his own physicality, and soul, (:18), and governments, and nations will equal. We become as part of delivering the T, we will not hide it. We deliberately, clearly deliver it to every single KS to be able to do.

Poor People Will have Access to EU Free:

In the coming days, and especially next Thursday, we have an announcement , acceptance of the HFK that will bring a new way that more people can use the EU, we'll bring a condition and a new way that we'll give to the poor, those who cannot pay to be able to reach, to use the EU freely. This is part of what we take. We take on the road in the next few days from nation to nation. Which means the rich, those who can afford to pay the EU for their health, for their wellbeing, for whatever reason they need it. And those who don't have will receive it absolutely free. This was our promise, and with the instruction of the HKF becomes and has taken shape to be part of it. This is what we agreed and we deliver. In that system we deliver new ways and systems of machines, that in every land, in every city there'll be a machine as long as there is a doctor. We'll explain the whole position next Thursday as the structure around it will be delivered.

Center Extended 1 Year - Show Flying Car January:

So what we come and where we go, is a new way , a new understanding. … the center where we are we have extended to 1 year, and they have accepted it, extension of it 3

months quarterly, and in January we have booked the hall to how you (:20). the first flying system, .. we do our best to be ready by this time, and as you know with KF it can be a few days back and fourth, but every step will be taken to deliver this T ?? you. Don't forget on the 26th of November, 2011 was supposed to be shown in Einhooven, but by the interference of those who shared with us, they blocked us. At the time we thought this was coincident, but coincident became too many coincidences, we had a spy in the bed, and we seen how much damage we took.

But now we understand, the T belongs to all of us. We see and we understand the T is part of us. We see and we understand the T of the KF belongs to every single one of us. What I am going to do today is to start a new session, we allow today no one in the auditorium .. we made today to ask questions. We take you, if you want to see, but we don't show the inside if the machines. We can take you across the Exhibition center. … We start teaching the development of the new systems for computers, flight, for construction, building, life, and environment.

Cleanup Has to be Slow - Changes Are in DNA:

In so many ways, mankind has 2 choices, we spend more time to cleanup the mess we made over centuries, or we run 2 parallel ways, we cleanup while we developing new life without any damage to the planet, without any waste. In time the 2 will catch up. (:22). .. it's taken us hundreds of years to change this planet, with what we have done, and we have created a lot of mutations, and a lot of changes, and these changes have been accepted by our own DNA. If we carry the rapid changes that mankind will look for, we'll create more damages on the reversal. What I suggest is very simple, is we bring out the new T, we build our homes, we create our conditions with the new T with the M fields, we create the conditions to live a clean life with the new T, and at the same time slowly, we cleanup the mess we have created over centuries. Cleaning up the rivers, the oceans, the air and everything else, has to be done an gradual small steps, while we create a condition that we do not create any more damage. For this reason we need to understand the operation of the KF, we take lead in leading the world into one direction, peace prosperity, and at the same time to be empowered to dictate our own future, not only on this planet but beyond in the space.

Carry new Computer in Pocket - Emotion fit Memory Bank of Universe:

One of the cornerstones of this new evolution will be the new computers, what I call, ball of life that you carry with you, and it is everything you want, everything you could imagine that it will ?? you , it becomes connected to your soul, to your emotion, and to your physicality. And then from there we build the next steps. In a very simple way, … what we see .. we see changes **that the new computers have to bring a new balance. (:24). a new way of thinking**. In so many ways, in doing so we need to understand the future of mankind in the space. In so many ways, what you see in the KF sign is what you'll be **carrying in your pocket, and every line you see through the field direction and dimensions will connect to something which is connected to you or something which is you want to connect the two. In a way, your emotion will fit in the memory**

bank of the U. You can tap into to. It's not anymore whose server, server sits to become the U. In a way the position we have taken as the human race will change. The knowledge of the U on top of emotion, becomes the knowledge of man. We don't need to explore, those who have explored the U share their knowledge with us, this is how it is going to be. this is how we plan the future to be a part of. We plan the future to be part of us to understand the totality of it, how we can change it . ..
We understand once we learn this process, life is going to easier and better for all of us. .. we spread our souls. .. we become part understanding this process and with it the whole lot. .. What we see is not what we want .. (:26).
We make a new planet, we make the U the oyster for mankind, but mankind has to be ready for it to accept. .. mankind has to be there to deliver the promises of peace, prosperity for all its citizens, through a unique collaboration of the leaders of the world. .

(:28).
The changes is my job, try to give the T and understanding at the same time …

On my return to Iran we'll take steps to make sure Iran takes the leadership in science and T .

(:30). It has to be a sharp delivery otherwise it will be interfered with in so many ways. We have to understand in what way we can help each other to develop this T in a rapid way. Our work from 21st October this year will be offered directly to all the space agencies collectively with one agency, one representative with KF, that we share knowledge simultaneously with the Iranians, Russians, Chinese, Brazilians, Americans, and European Community as long as long as one nation is not allowed to take part in any shape or form in it, that it creates that division. Then we go to India and South Africa. We share ob board with all the scientists which are in the space T. We invite the scientists from the state of Israel to join the Iranians ?? shoulder to shoulder, not on basis of religion, but a race to become superior to delivering peace to all of us. We'll tackle the virus in a different way that mankind has chosen to do. There is one position , we work as One Nation and its citizens, not as hundred and ninety odd states, islands, (:32). and different nations. This is what we set up to do, and now we have the T to deliver. … try me and I will show. I'll show the T that it will bring to stand still everything except the man who is a man of peace. As we have seen today, many aircrafts, trillions of dollars sitting on the runways, go nowhere. The only way to change, is that we become active citizens is by introduction of the new T in a rapid way, that we change the course of what has happened. Maybe, as I said before, Corona has not come to encage us in our homes, it's encaging the old T like the aircraft industry is obsolete when you know how to fly with the new system. Do we need to commission back all these aircrafts which pollute the air, do we need to bring them back on the roads and let them fly to do more damage. Your worries was chem trails now there will be none. So it is the responsibility of all the KF KS to use this opportunity to bring that point that these metal birds will never take into skies. The same goes with the cars. When we introduce the flying cars there is no need for engines to pollute. t the same time a new way of marathons . of bringing boats, ships, and tankers will become part of the history of the man. Where we can deliver door to door, from Shanghai to the warehouse in New York, or Tehran within minutes without

damaging atmosphere. (:34). .. I need the system to fly this week, I need it to be able to show because we have it. It's getting technologically developed rapidly that we can show. This is needed, as I said, I have a deadline, I have given an undertaking of 21st of October, and within the next 6 months, I have to make everything ready that the new life starts in a clean environment. The new life starts in the 21st March in an environment, that we all are safe in it, and we can guarantee to the next generation. No ?? talks, but delivery of T is paramount to us, and we have the capability to do. The EU are here, .. we start working from inside out, everything to be correct, to be 100% in active position that with it, every part and aspects of T can be delivered. We take leadership in science and T and that will be the only leadership which man will be proud to part of, or be as of. That from now on we don't need politicians, because when you live on Moon, and we all travel there to Mars, it does not matter who is the leader of where, because we have collectively have accepted the expansion of the U, does not know any boundaries in science and T, save shall be the borders of universal man to live in. I am very sharp today, because I know what is to come and what is to be delivered, and I now I don't have much time, we push. (:36). to the limits. We push to the limitations of changing humanity, and as we shared how to make Gans's we will share in time how to make computers in your hand, how to organize it, how to have it, how to bring it to be as part of. There is one thing for sure, we as KS and as human race will achieve it within the next 7 months. We will deliver it, and in depth, no one can interfere with our work, and no one can sit back and change it as they wish. Governments are in disarray, and gradually, as with Corona, we seen Argentina shut down, Eastern Europe today shutdown. Different countries and cities one by one, shutdown. We have imprisoned ourselves to the lack of knowledge to handle a virus. We have become prisoners, .. capturers to unknown which we know, we have every process to overcome it, but our leaders to their incompetence cannot agree how to do it. So if a little virus has literally brought the planet to, large open prison. Now it is time for the new T to open the shackles of this prison for humanity. Many of you saved yours and many other lives with Gans's. Now we teach you to go to the next step, development of the new space T through KF and KS. (:38). For this reason today, I allow no one in the auditorium, we are live here ..

Be ready for surprises ..
You have to realize the knowledge is well spread across the planet .

(:40).

Now the teaching is on your shoulder.
(:42). Now you have to learn how to
that illusive connection with the U. It's much simpler if you love to understand and share it.
Are there any questions relevant to our work that allows us to develop further understanding?

John of AZ: hello
K- Do you know what John means in Farsi. .. it means life, something you love, .. we always call Armanjan, it means what I love , life ..

J: .. At one time you told us that the atmosphere of our planet, U, cosmos . related to C H O, (:44). later you talked about C14 .. trying to connect to the higher field strengths. Could you talk about specifically those 3 field strengths?
K- C14 is the backbone of what we call solid features of the U. It does not matter where you are. C14 has the characteristic of the conductivity, resistively and what we call superconductor, and the best resistors. Depends what edge of it energy we touch. But if you look C14 in the presence of the .. plasma of the H, in a specific category configuration , like in the structure of the body of the man, can lead to dimension extension, or dimension retraction of his fields. …

O on one end and a C12 on the other end, and a C14, specific configuration behaves as N, because N is in a way, an energy pack of 14. You don't look at the characteristics of the C in atomic structure of electrons and protons, you look at it as a Gans energy transfer, and that is why in so many parts, C14 behaves very much, in behavior as your favorite, Fe. (:46). 4 times dimension connection. And at the same time if you understand C14 behavior, you see we have a parallel with it in the dimension of the work of this planet, which is Deuterium. A complete atom, the first complete atom we know. But in an energy pack Deuterium in conjunction and configuration of the 6, behaves as 7. Because in compromise it becomes itself, C14. So as you see it is very easy to add 2 energies of D with a C14 behavior, or create back to back G fields of D, and create a C as life, and in that process in the presence of D, and connection in the fields of the energy, you can create very similar to human life with AA if need be. In so many ways, in some parts of the U, you'll find AA structure of the man's body has been replicated through the same process. As I said, mankind is not alone and mankind is not the only one who has intellect. If like me you understand the work of the U, you understand the work of the interaction of the fields, it's absolutely easy to understand we are not alone, we are part of the creation of the Creator, and there are many like us, they have intellect, and In so many ways, they choose the direction of the understanding of the mixture of the fields. (:48). As I said, now that we are going in this process, in a very short time we'll present in this exhibition hall, you'll give me one tank of water, and with one drop I will show you creation of life, a fish, a man, within that water tank. All of you know now to do it, but you have not chosen to dictate the condition. One drop, one life is in the container which we'll bring here, and in seconds I'll show you a fish in a tank where there was no fish. I'll show you life where there was no life. **My knowledge is limitless**, because I know how life is created in the depth of the U. Within that drop I embed the whole history of the U, and in that drop you'll see creatures from different parts of the U, because we create the condition of it in that water tank. Then it is very simple, if I can do that on this planet. Is life limited to this planet. And so you understand very rapidly C14, in essence is the H in the shape of D as a full atom, and being in a plasma condition has no physical dimension, as an atom has in a matter state. So in that process you asked me how. Now you understand. And in a time, as I promised in the very near future, we'll bring life, and then we are not magician, then because we all understand the science of it. As the mankind is using now, in the fight with Corona, One Drop One Life, (:50). we actually will create life out of one drop. And you'll be witness to it. Don't forget one drop create life in the

womb of the mother, as a child. Now we show the T and science behind. I hope you answered you.
J: When we build our 5 Cup system, we share the energy of our soul with the 5 Cup. In that sharing are we creating a new soul, like an aspect of our soul by doing that?
K- What do you mean?
J: Like with your fish, are you able to create a soul from your soul, that is now that fish in the tank?
K- That fish will carry the essence of my soul because I am the creator of it, of course. It's like your child.
J: So it is an aspect of your soul.
K- It's an aspect of understanding the world of creation, with the essence of it, yes. Don't forget, I created the Universe. So one fish is nothing compared to what has been created. I made man in the image of Myself.
J: So one soul can create many more souls, is that true? (:52).
K- How many children so you have?
J: One.
K- You got to ask that guy in Saudi Arabia, he's got 86 of them.
J: For example, with these balls that you are creating, you are creating them with the energy of your soul. Is that true?
K- yes.
J: So is that an aspect of your soul, for example?
K- What do you see on your screen?
J: I see a dangling ball
K- How much do you want this ball to dangle?
J; So is that another aspect of your soul?
K- How many do you see?
J: 2
K- In the very near future, this ball will work and deliver more than all the computers on this planet. ever could.
J: It has an aspect of your soul in there. and when I …
K- Computers, **computers for the first time will have a soul, have understanding, will have the creation to be able to be**.
In a way, nowadays we carry a mobile phone, in the very near future we will carry a small size of these in our pockets, it's our mobile phone, it's a creation of our emotion, it's a creation of transfer and building of our homes.
J: Will that be attached to the owner of it, for example, so if I had that ball it would be me, and me only?
K- Yes, don't forget we done that in the EU, one EU carries the soul of the HKF, it is embedded in it. (:54). She is peaceful, and with it, we built into it. That's why we are so confident that the time of the change has come to do. In so many ways, mankind, when you enter these systems, which is in the exhibition, you will carry an ethos, the ethos of the HKF, it balances, it embeds, and it becomes part of, with it you will understand more. As I said, when we build these 2 units, they'll never be repeated. They carry the soul of the Creator. From now on all the systems which will be built will be done by computers and automatic systems. These 2 were built by hand, loaded by hand, every single elements in it, calculated, and at the same time was done, in a way, whatever systems

mankind will build in the time to come, in the U, will be part of this knowledge, which sits in this. In a way, in the future time, mankind will use these 2 as a reference point to achieve everything man needs in the space. And it is not only for the mankind, people, creatures, and creatures from other part of the U, will come to be, to see this creation. This is not just a machine, it's more then mankind can understand.
In so many ways, we have made it so simple that to the intelligence of the man, it's nothing. (:56). And that is exactly how we wanted it to be. It's the replication of the creation in all dimensions.
Q: Thank you for that answer
K- Hopefully your place will be the first place where we'll see peace and T will come hand in hand, as has been your wish.
Any other question

Q: .. the Deuterium .. D T H in there interaction create different kinds of ?? neutrons, as I understand from previous teaching ..
K- No, your teaching is wrong. It's not my teaching. Because if you put D T H together you get bunch of Deuterium's, because the surplus energy from the plasmatic forms from the T will be transferred to what we call H, and then we have a balance field of 3. (:58).
Q: My question is the 3 different kinds of neutrons. ?? not mixed together but separate, and having interaction ..
K- You see, have you decided are you the chicken or are you the bird, or are you the camel. Are you talking in the world of plasma, or world of matter, or are you mixing the 2 together and then you don't understand what you are talking about.
Q: I would like to stay in the plasma state.
K- So in the plasma state it doesn't exist that you transfer a neutron. the energy balance of the system does not allow this, because you are transferring energy fields, not matter state. If you understand it. So you cannot , unless you specifically have created the Deuterium and H to T from 3 different states, under 3 different conditions, under 3 different dimensions, then even they interact they'll be separated. they even interact, they'll be H but of different values, but if you have produced H, D, T in the same environment, from the same materials then the answer is no. understand because all the H, all the D, all the T, if it is not created from the same conditions, same materials , even that would have different characteristics. So extend your knowledge, what you want to know. (1:00).

K- Yes you can, you can change the D H T, according to the plasmatic field of its strength, but you have to find the fields. the right connection of fields that it fits . MG field forces of it .. which field in G matches the one in M.
(1:02). And if they do, you'll find many H don't match with each other, and you can't put them in a pot, they don't fit. Just because you think they are H, the Gans's you made.
I use this knowledge a lot in the space T. As I was saying the difference between my work and your work, you just do because you think it can be done. I do because I know how to get it done, and this is the difference. That's why I create results in a different way, and you try and you do, and randomly you might achieve it.
Q: That was very clear, it cleared up many things.
K- Did I talk to the soul and the soul brought the knowledge to physicality.

Q: In due course I will realize.

About the 5 Cup, ..
put a glass sphere in Cups 5, 4 3, after awhile I take them out they should be functional, wouldn't they? (1:04).
K- I don't know, what kind of function do you want to get from it?
Q: .. that I can carry balls fully function .. can I connect to it as it is another 5 Cup because they contain all the fields.
K- What have you put in the ball, and when you made the ball what was the purpose of it? What did you envisage to get?
Q: I would like to have the fields of the Cup in those balls ..
K- Yes, but you have to remember one point. What is in that ball, what is it? Because now, if you took energy from the water of the Cup to go in that glass, it's minus the filtering ability of the ball itself. The containment has created a filtering, to be able to cross it. This is what I explained many time.. this is why we go into this directly. A lot of you are playing with this Inertia water, and gravity water, and you don't even understand what you are doing, you are just thinking what happen. Of course, this is part of research to do. but why do you need the water of gravity, why do you touch the Inertia, what does that give you. What is it used for, implication of it. Why have we shown you this part of the T, (1:06). And many of you don't understand. And you just pick up …

Why have we introduce such a simple way to the G fields of this planet? … Why are you putting the ball inside? …
Q: I put an empty glass ball ..
K- Yeah, but an empty glass ball still have dimension of matter. It's not empty, it carries O, H, it has air in it.
Q: But can I create a field containment in that ball?
K- It is a field containment minus the filtering of the plastic.
Q: If it is glass, isn't it transparent, 2 times C14? .
K- No, just because you want to think about it. No.
In the future teaching I explain why I have given you these two. Maybe ?? tell you, now you don't understand, it's bits you hear. The reason we created this condition of, (1:08). the G (Cup) and Inertia (Cup) is the fingerprint in the future space T, that it can bring you back to Earth. That's the only time you'll use it. **You take the fingerprint from the G, Inertia (Cups), and the G which you have created, and from the Inertia Cup lands you precisely in the place where you created it.** Do you remember the ET. "ET go Home." This is the message, this is the T, that's why I showed you how to create G fields in these boxes. These are fingerprints in the space T of the future to bring you back, man to a… these are the reason, and then the G fields is continuously the same for the whole planet, so your destiny (destination) is Earth, but you don't want to land in the ocean. You create the Inertia of desert, create the Inertia of the beautiful city of Tehran, and you land in Tehran. This what I gave you is the understanding fo the T, as I take you into space T you already have, you've seen it, you understand it. That's why these Cups are here, it's nothing to you, at the moment, why do you put it there. You are Earth you are in the same position what do you want to do. In the coming time, in the next few weeks when we travel from let's say Vienna to Tehran, my destiny point is the Inertia field which is

created in Tehran, will land me in Tehran, I don't need to navigate. I built the basis for the future space T, in the proper base that man can understand, but I put it right in front of you. (1:10). And you don't understand it. Now you understand why there is the Inertia and the gravity (Cups). .. but why are you doing it, why are you using it.
Q: Now the question would be, can I use these balls if I put them there, as the reference?
K- For what, you are already on Earth, .. where do you want to go. You want to jump in.
Q: Let's say I am in Linz, and I want to come back to where I am, and I have these 2 balls ..
K- That's what I told you, No you don't need the G part, you just need the Inertia part. But make sure you made the right Inertia, you might land in, where you from Bangladesh , in Delhi, It's the universal GPS using the structure of the U. Now we make computers to do it, I have given you simple
.

You are on planet Zeus, now you want to go to Earth. (1:12). This is how we developed the GPS in the Universe, not the way you do with electronics. I told you man's knowledge of electronics, compared to the knowledge of the U, is obsolete by millions of years, but mankind is going through the process of knowledge development, so we have to give you a hand. All of you, now 6 to 10 weeks are making these Cups, and you are making everything else. Now slowly we open the knowledge of it, we open why they are there. And many of you might have learned something for the future. Let me tell you, extend your imagination .. you buy an orange in the state of California,

This is the first time man can add, change the
If you extend it further, go back to the teaching, even the stone has a soul. You step on a stone on your way to somewhere. You can feel the emotion of the stone you are standing on. Does he like it, or am I abusing? (1:16). Do I need to walk this planet and create more pain for its citizens and its objects. Mankind has become so narrow-minded and now we are becoming more narrow-minded. We are becoming vegetarian not to kill the big animals, while we chew millions of them. But now the conscious of man, what about the stone you walk on. If you understood the teaching of Bahaula, even a stone has a soul. Read the verses in Koran, it gives you the same, in Torah read, read the true ?? not the way it has been changed, the New testament. All the messages are the same but mankind has not, did not, do not want to understand. This time science and religion explains both, now the man has to decide the future of itself. When I kiss the land you walk on, it's not the land, it's the souls you leave behind and mark, with your walk. The dog scents the footpath to find a person, so if you can scent it, you have left the soul, impression of your soul on it. When I kiss the land, it's kissing the soul which you walked, you created. Mankind has to understand the truth in the step by step. Now you were worried you were killing a cow, a pig, you want to become a vegetarian, (1:18). now you realized you are killing many seeds, because each one has a soul, you kill more by eating it, a spoonful of rice, and now imagine the stone you walk on, what about its soul? Do you want to be in the dimension of physicality, or do you want to stay in the dimension of the soul that you don't touch none, and you accommodate the position and the time and the place? Do you still want to be a human. Now you understand what sometimes I say I ashamed to be in the body of a man, because every move you make you take from something, which you

are not allowed. Unless you have decided I take, it doesn't matter. You ask, and if you are given, it means you are accommodated and shared.
Any other question.
You see now that we go more into the depth of the true knowledge of creation, theology goes through the window, because the essence of the knowledge creates that condition, that does not leave any room for theology. (1:20).
Any other question

Arizona Center is Paid by Partners:

R: How people can support and contribute specifically to the AZ situation. I suggested they contact John.
K- In which way? they want to. AZ center is fully paid in between the partners for everything. There is no financially, we have no outstanding bits, except what is getting developed. .. So what do they want to help?
Q: How can those in the US support the AZ project?
R: Promote it when the time is appropriate .. nothing they can do to speed it along.

Collaboration of Iranian, NASA, Lockheed Martin:

K- We have to wait to deliver the machinery in the next 2 - 3 months. (1:22). Then when John's wisdom, collaboration though Iranian space agency, NASA, and we see a place for Lockheed Martin to come in, we devote and put part of it at the disposal of the 2 nations, for their scientists to deliver and develop more. We do the same in China, we bring the collaboration between the China and Iranian space agency on the same term, and the same with Russia. KF knowledge will be pivot common denominator between all the space agencies. Then at the same time developed. You got to understand humanity has different intellect and looks at things a different way. And sometimes keeping it separate and sometimes bringing it together shows its beauty. This process will take shape ..

It has to become a center of excellence, especially Arizona.
We look forward to the new administration in the US to a close collaboration between all side of the T in AZ. (1:24). We are working on it heavily. Unless, as we see in the present, past 48 hours the thugs will take over again.
We see the 2 ladies of HKF to be the common ground between the world leaders that's there job. It's the job of the UC to facilitate. ..

Two Ladies Travel the Planet Delivering the Technology for Peace:

We see the 2 ladies as the HKF will take place the position of the common ground between the world leaders to bring the position of the peace across nations. That's their job, and it's the job of the UC to facilitate as you already work across different nations together, the wishes and the processes of the nations to be done by the language. In a very short time this process will take shape for the 2 heads of the F will travel to different governments to deliver knowledge against peace and T. That's their job as head of. Not to build and create, but to bring to them to understand the position. These 2 ladies will

become the messengers of the peace to carry out the wishes of the UC, at the same time to deliver to the nations. And this is what is set .. it doesn't matter how long it takes, my wish and my way.

(1:26). KF T against peace for the nation. We deliver the T that it will be in their hand, to be able to negotiate with.
Any other question

Q: .. (1:28). .. when you start talking, any of the teachings it makes me smile from inside. .. if we do misconduct, basically the creations of our soul, they are starting off on the wrong foot. They are lacking of energy,.. . Now the earth which is our mother, is not creating us in a complete way, if I understood this correctly. That means we are lacking 20% of energy and in that way we are dong a lot of misconduct to get these 20%.
K- And the pleasures of getting it. (1:30).
Q: .. it's always 2 sides .. my question in general that because the Earth is created by the Sun, and the Earth is our Mother, Sun is our grandmother maybe we can say that way … the soul .. .has been doing something, therefore we are not complete. or is that the wrong understanding?
K- It's a combination of, but there is one point to understand. In due course the earth will move on towards the center of the solar system, and we will see a new cycle, a new entity, be it Mars, or another planet, Jupiter whatever, will move into this position of distance from the Sun. The question is would create life the same way. And would the citizens of this planet behave the same way. As the man did on Earth. In so many ways, it's asking a simple question. Would Jupiter and Sun create a life like man ..
and would the citizens of this planet misconduct, become better or worse than the human at this moment which are in this gap. (1:32). We are in a transition point in the solar system. We are part of a dynamic structure. Is it that what the atmosphere. ..
creates this shortfall …

Would the STM become a star that it can take any position in the U and still gives and will have no misconduct. Will our souls when it leaves this planet, as it has done up to now, (1:34). will carry that misconduct and lead to creation of more wrongs. In the new creation they become the ?? son of. If you look the STM creates and leads to creation of many souls. Or is it the way we want it to be now, to elevate the STM to become perfect that when it leaves the physicality to become a Sun in the U, in the Unicose, will create perfect children. And being open to understand the totality is amazing. Today a number of the KF KS in China are in Tibet. They have gone to see the temples, to understand the emotion and understanding of the Buddhist life, and in a way, to extend their knowledge in understanding of the KF. There are a few of them are old ladies, and they have gone to Tibet to experience, and see in a ?? long way most probably how they can connect the two together. And with it to come out with a better understanding. And why do we o this? On the other hand the other KS travel the breath and length of the planet to share that knowledge with each other. Now a days, (1:36). we do it with Zoom ..

With the new computers that are coming in, I call them computers, the universal computers are the opening of the man to the Unicose. It's no use me taking you to space

when you don't know where to go, how to talk , when you don't know where you are. As we have seen, I brought you so softly and gently into the knowledge of the Unicose.
I have been teaching for billions of years .
Any other questions.

(1:38). As I said, many KS are making their way here to experience the knowledge, what knowledge is about to bring. The Linz center, as we said to the people who run it, and they are giving more and more room for the T to be shown. We'll become a center where the new T will take root, and in that process the whole knowledge, the whole package of it, belongs to the KF Austria. KF manufacturing Austria, carries the totality of everything which is developed across the world, and owned across the world in my name. The F is just a point of reference. Just my name, it has no value, except sharing knowledge by those who volunteer to share. I knew one day the F will be attacked this way, and we set it up that it cannot be touched. It will never be touched for those who claim they own 50% of it. You own nothing but shameful conduct as it has no assets but he assets of the soul of the volunteers and the Knowledge Seekers. (1:40). KS have to understand this, because my time has a physical lapse, the day I die, all the assets of the KF is in my personal name, and with that as my Will is given to the Foundation, if the Foundation is of the correct conduct, and run correctly. The F has no value financially, and we deliberately made that, that if one day it is attacked, as it was done today, stays with no assets and no responsibility as my wish has been to make the assets of the F to be owned by every citizen of this planet. No volunteer owns anything of it, and it has been done deliberately that way. Volunteer work does not get paid, it has no value because you volunteered to work, to share. Those of you asked the question, the F is absolutely solid in its commitment to serve humanity. But it has no assets, except you as volunteers who build it, and to be, and to be shared.
Any other questions. (1:42).

Q: .. from pictures I see in the EU balls with Gans's and rotating matter?
K- That's your assumption, we don’t say yes or no ..
There is so many hidden T in this system.
Q: But in the balls there are Gans or other things?
K- It could be anything in, what we use we don't explain, we don't need to, because you have to test and see what you understand. Because I realized KS are just a bunch of monkeys, and monkey sees, monkey does. We don't add to it. We have deliberately made so many things for you lot to think that to be. … we have changed the dimensions of it. Don't forget what you see, is not necessarily what it is and what it does. Having Gans's, not having Gans's , and the next generation having empty balls, and the generation after using the fields of the U. is all part of the development and understanding. (1:44).
Q: about the antibodies of the Corona, because a lot of people think they are safe if they have antibodies of the in the paper I don't read anywhere about the antibodies.
K- Where which paper?
Q; the paper
K- Antibody is the dream of the man, antigravity, dark matter, these are what you are looking for, because then you have something to compare it with. What do you need antibody?

Q: Because lot of people think
K
Q: when you have the Corona you have antibodies ..

K- You've got to remember 2 fields of education .. doctors and lawyers are the only ones sworn to the ethos of what the society is, and .. when they sign that paper, (1:46). it means whatever lies I have been told I have to repeat and protect. This is the present conduct of the health around the world. You sign your self into, and the same with the lawyers …

But many doctors are breaking rank. your job is to explain and to bless their soul. Let it be part of that soul.

Q: Can I speak in private with you about what is going on in Bulgaria.
K- Yes, but go through the channels ..
(1:48).

One of the staunch enemies of the F sits in Bulgaria. She has taken over after the Derek's death, because she was the webmaster there, and she is working now, as we hear, with the other part, in divulging a lot of lies. So we have to be very careful in how and who we talk to in Bulgaria. .. the infiltration is deep .
Q: because we try to develop and spread the knowledge

(1:50).

K- KF there are many, scattered now .
Q: But not so many working everyday.
K- Yes, there are a lot of them do, We don't see, the same with Turkey and Russia. .

Do you want to take a **BREAK** >>> (1:52). (1:59:30)

Poor People Free Access to Enhancement Units:

Q: Guatua .. today's teaching very profound .. (2:00). .. Thank you for giving free access to poor to the EU. How do poor people like in countries like Kenya, have access to these EU, are they going to arriving soon?
K- No, listen to what is going to be discussed next week in the teaching. We have put a legal framework into it. This allows us to spread the systems around the world. …

A number of charities are prepared to back this project which will be announced, (2:02). which means .. a number of organizations will be able to work with the KF ..
first pilot plan in Switzerland, a number of people came together to facilitate the purchase ..
We'll explain how this will work with doctors ..

(2:04).
We estimate we can open approximately a thousand centers around the world per year, from January onwards. We have the capabilities to meet such a demand.
Our production facility can match this .

(2:06).

10,000 Centers to Open Around World:

To give the facilities the next 5 years, some 10,000 centers to be built up around the world. For the people, be the people, (2:08). amongst the people .

New Computers Will Have Souls:

Q: the new computers, the balls in your hands, even stones have souls. those balls have souls. Do they carry the STM or the soul of the U?
K- The filling of these balls are done in a specific way. As I said, we have built a special patent in production, (2:10). of the units, even the brain cells. It has to have a soul, a feeling, a dimension very much , not the human, human brain is a simple version of the universal system. We need to deliver in a structure, which is in a way, used in the U that the system can match universal work. And that is what we aiming at, we are not looking, .. we are delivering a fully integrated, in a way, a STM inside, a soul of entity inside, which we can control, we can hold its physicality, and with it we can communicate that we can connect to the rest of, because we haven't learned how to do it with our soul yet, our physicality, so this is an interim. A ball of light, where in communication with you, with your soul will be enlightened, you know it's in line with you, is communicating with you, as the 2 fields interact.
Q: Thank you . ..

K- It is the jobs of the HKF, and UC to make sure the message of the new T, and delivery of it to every nation is done the correct way. I am a servant to humanity, and I have done my service, and now it's the job of humans themselves, (2:12). to serve their race, very simple. We deliver the T, and it's for mankind to choose the path of peace and T to rapidly change things and put things correctly.

Shameful President -- End of Leaders, Collective Leadership:

But you will have, as we have seen in the present time, especially in the past 48 hours, the ugly side of human race, very ugly side. But need be, we'll interfere directly. What I heard in past 48 hours is a shame on being a world leader, a nation, a leader who calls his people to be ready to destroy other people in the same nation, and we have to wait and see. Threatening, if I don't become, I ruin my nation. Better that nation not to exist, to be ruined by itself. I told you self-destruction cannot be blamed. In so many ways, what we

heard in the past 24 hours, coming from American election, by the present president of US brings to us a need for the change of society in a very direct way. Calling a nation to anarchy if I don't get elected by the white, white supremacists, is what was the biggest fear of the American nation. A president taking his nation to ransom, should not be the behavior of the man, and that is why we don't need any presidents and heads of state, (2:14). as the power dilutes them from the reality of their position. The KF and its T stands behind the, what we call, the new administration to come into operation in the US. We support peace and sharing of the knowledge, but what we seen as a thugery, ?? by a head of state, has to come an end. Nations do not need a head. The nation needs someone who can explain what that country can do, or that part of the world can do, unfold within the laws of UC as One Nation, OPOR. As we see we are getting to that point. This nation has killed many, and now it's time for itself, it gives to itself, to destroy itself, and it is done by the heads. We have seen these number of people, some 10,000 on the back streets of Washington when people were claiming for the black man who was killed. They were kept in the back to start anarchy, and now they have been called to do on the nation. It's 2 things, do we need to elevate the soul of this nation to bring peace on humanity, or do we let it go to doldrums of nonexistence? It's with the greatest sadness to hear the head of state splitting his own nation, if it is not done. We seen the same in Belarus in the past few days. It shows that the time has come, (2:16). that the world sits against leadership, as one collective leadership, and the basis for it has shown it more and more.

Remove Heads Of KF UC EC if Become Big Headed - Immediately:

And I hope, my biggest wish is that this behavior will not go to the 2 HKF, the present and the future, and the members of the UC and their ?? , and their position is to serve and not to be the head, and to be listened to, and be pride in the position they have taken. The job of the EC, UC and the 2 HKF for now and the future, is if you see such a conduct remove, do not wait, remove from position, and structure has been set for the removal of every member of the seat. You see big-headedness, and destruction, and division, within the KF, from the 2 HKF remove them, immediately, don't wait for the time it might change. The same with the EC and UC members. The work that is setup is to create peaceful condition through T, delivery of the T, and what it comes as a benefit of the new T, that everyone has what they need, according to the time, the place, and the position. No one is above the STM, and the man collectively is of the planet. And I said that to the HKF never be deluded with the power you are given. It's skin of onion thick, as long as you serve correctly, collectively and correctly, that's all your purpose is. (2:18). And we see it with 2 or 3 heads of nations, now it's coming. We expect more problems, people against their leaders, and leaders trying to stick on to it. Today the European C is meeting, what to do with Belarus, with the president wants to stand. I wonder how many of them look into themselves and what they stand in the position in their own nations. How they got into power. As I said long time ago, in the new structure of universal order there is no room for kingship, and president. Man has to live collectively in peace, anywhere on this planet and beyond.

Connect All MaGravs Together To Bring World Peace:

Q: how do we get rid of the thugs in the USA peacefully?
K- You don't get rid of them, you know them, go the new way, go your way, elevate their souls, connect all the MaGrav systems you have across your nation, connect all the dynamic systems you built across your nation. That will bring the dome of peace on your nation. You got to understand every facility is there. .. I have made a structure that we can reach every nation through KS. You are not aware how we have established what we call, Earth Group, as part of the KS, and with the same ethos, that collectively, gradually we change our nation, our planet, in the wish we are. That's what I told you when I let the MaGrav units go, (2:20). I teach you how to connect to each other. KS in US you have built all these MaGravs, there are tens of thousands of these MaGravs in your homes, you have given to friends. You have made the 2 Cups, link them up. As you all made with the wish, to benefit yourselves, mostly and partially to work on the ethos of the KF, you will see how you change your nation, in coming days. It's the job of KF US and Canada to bring these people, these systems together. John knows how to do it. There are many people, Alex in Canada knows how to do it. Bring, connect your systems and exactly like Caribbean, your wish is peace, you'll see how the things will change in the next days to come. The power of the knowledge and the power of the peace is within the soul of the KS, link up. When you want to learn, link up, link up your systems, link up your souls, and call for the peace, and you'll receive. We see how we'll receive world peace. Very simple. Link up and change your nation, with it will bring peace to the others.

We Support Kamala Harris To Bring World Peace:

You got to understand what happened to US. The president called for the army to come in, they refused, called for everything else, now he has gone to thugs. Your job is to elevate the soul of those thugs, (2:22). and maybe, maybe the president. KF and its T, and through negotiation stand solid behind peace and prosperity of every nation, including US, and as we said before, we stand solid behind, what we call, nominated Vice President to be as we see her the correct conduct person, to carry the US into peaceful condition. Kamala Harris is the key to peace in the US and the rest of the planet, and she has 100% solid support of us and our T. We don't get into politic, we get into politic of peace and by delivering it we create a new condition of new employment, new jobs, new prosperity for American nation through correct conduct. The same message was sent to the Iranian leaders on Monday. There is no difference.
Any other question.

Q: there will be people who will resist these changes to come, what will happen to these souls if they don't accept the changes, free will comes to mind ?
K- It's not a matter of accepting the changes, the changes are here . (2:24). It's the wisdom of the KS, which has to rule. We have seen the last division in the KF launched, there will be no more. And the reason for it .. bunch of thugs wanted to take over the KF, because all the work is done, now the harvest, the fruit of all of us. A peaceful application and nations. And they will come, we were waiting for these moves and we have protected the F from these moves. Coming in the clothes of a sheep but being a wolf inside. The world leaders have to lead through knowledge, T and peace, and when they get to the

tools of what we see, it's time for the replacement through their soul. Execution, prison taking, and prisoners will not work anymore. Because you've got to learn, **many of you if you have leaders who are peaceful and correct leaders, and are imprisoned, you have the knowledge with you to move their souls and get their physicality from their imprisonment. The knowledge has been given to you.** And let them be the people of peace and freedom, but would they stay that, (2:26). or are they for a time, in opposition. The point is do we need heads of states. or do we need states, that they can head themselves with groups, and committees will run, and to serve them and humanity. And all of you have that power and the system, which is given you, to stand the T. Use it wisely and you achieve it.

Q: Can we integrate our souls energy in an integrative way with the Linz Exhibit?
K- Yes, ..

You can link to it, because it is made from the body and the mind, carries the structure of the Cu and Zn, which is constituent of our emotion and physicality.
R: People comment about the peace they feel when they come (2:28). into the exhibit. ..

K- It is sense of achievement, when you are here, it is talk or whatever, the sense of achievement gives you confirmation of the correctness, in what I believe in is here to be done, and that's what effects people, mainly confirmation that what I stood for is here and shows in totality. In so many ways, .. once we show and deliver the T, (2:30). in a different ways, all these thugs we see in the background these 3 - 4 weeks, across the people who thought they had the right to do, will shut down. Then people stand. If you were here 3 - 3 weeks ago, you saw the systems they way they were. Now we extend the parameters, we put many simple things to open the tests we do …
There is a lot of fear mongering, that these systems are not tested , these are this and that. these are the people who are the enemies of the KF, they have been enemies within. And now as they have been pushed out, they are using the fear technique, out of their weakness, and selling their souls to their masters. We have seen it especially in the past few days. . when everything else has started. They know they lost, humanity has won, We won in delivering T. .. you see new stands. We have put new ways of detection. (2:32). The way Tesla showed M fields, when the fields build up these tubes around the system will light up. These are the first signs, if we don't jump power M fields. they will light up. Secondly as we saw with UFO a number of magnets have been hanging around ..fields will make them move, and we know the fields have reached the matter state too.

If any of these come together means we have reached the lift condition. We have overcome the gravity.

(2:34). This is how we did the same kind of tests in Iran when we achieved lift. Simple matters, but understanding allows us to do. .. more radios will come in , then by silencing the different radios we see the field expansion of the system. These systems are certified ..
The fear mongering by those who have betrayed the F over years, just close your ears. ..

keep man slave to their masters on this planet. I have opened your hands to the U, I took a lot. has given you the freedom of the U.

They have sold their souls to the master of evils and we have seen it. Don't stand fear mongering. (2:36).
This knowledge has to be appreciated . Anyone who creates condition of fear
How many of you have saved your lives from Corona using it ..

As they are made of a natural material can only bring balance ..
(2:38).

(2:40).
It costs you very little if you take a shock absorber, you throw it in the bin, as you saw in the flying car, take engine and throw it in (bin). You actually can take any car with a good body and you have a car. You have a system that it can move you and take you places. How fast do you think people will take, what is it, 1/10th of income of every family spends on fuel car and everything else.
with these systems you buy another car, take out shock absorber and put it in its position. With the electric cars we created more damage then we actually did with the petrol cars, because now we hide it, and we use more energy to create, we burn more fuel to create the same energy … (2:42). It's to understand the reality to what this T will bring.

I'll show you the first flying car which was supposed to be shown in Einhooven .. how it will look.

(2:44). (posts photos)

(2:46).
(2:48).
(2:50). Any other question

Downs Syndrome Daughter Changes with the Gans's:

Q: .. as I watch my Down's Syndrome daughter ever expanding her horizon, as this week has started teaching herself Spanish, and a noticeable difference in her being, from the Gans's and how she uses them when she feels she needs them ...
K- This is what we see when the souls are elevated, the physicality follows. When you get to the people at this level, it's not that we see them just change. We see them that we elevate their souls, with what we make available to them, and the souls bring the change. Man has to understand the truth and what sits behind it. It's not a medicine, it's conditions like this comes through the interaction to the STM, and now when you allow them, the soul needs, and the physicality provides. And this is the truth, this is what you have to

learn. (2:52). The Gans's create that environment the soul elevates., with the elevation of the soul, needs a new condition for the physicality. We have seen that with the number of children in the test trial in the orphanage.

(2:54).

Any other question.

WL in Tibet, Snow Mountain ..
WL: (2:56).

(2:58).
K- WL is of the 2 HKF , it's an autumn national holiday.

(3:04).
(3:06).

(3:12)
Any other question

Arman: .. Azerbaijan started war in Armenia , how can we help?
K- Pray for the soul of the leaders. The thing is, according to the security and statistics not many people have died. This is a lot of banging .
The exaggeration in numbers creates fear ..
we are going to see the same thing if Ukraine pushes further. (3:14). but there is no backing for this .. has not got any support .
A: Turkish people provoked it .
K- It has no international backing …
it's just one leader trying to assert his position, this is what we say, leaders have not to be there. This is not a war, a local skirmish …
Back to this .. the state of Israel has pushed in support of that, because part of this section carries a number of ex-USSR military bases, which is used by Israeli secret services and Americans to create mayhem training, in Iran, China, and Middle East. There is more to this is not a war. This is something that needs to be cleared out because the Israelis wanted this cleared that they can do their work, without anybody knowing what's going on.
A: They are providing with all the arms.
K- The arms have been there for months. We have a security report of over 3 years ago, . (3:16). We were expecting, this is not a war, this is just trying to
This is left from USSR time, training Chinese, Mongolians, some Turkish Iranians to infiltrate Iran and China to create a lot of work. This area, that's why I tell you this, it's nothing, .. not even considered a war. They received the backing of the Turkey in exchange for Syrian backing. I watched this move, KF has people on the ground we know exactly what is going on. This is part of Israeli training program, they want to clear because they train a lot of Chinese, they go back to what we see in Hong Kong, China,

what we see now training Iranian Turks to start problems, not Iranian Turks, Turks speaking Farsi, to start problem in Iran. This is part of that program. It has been going on …
to destabilize, especially Kazakhstan at the moment. We are very aware of this work…
It's the responsibility of Chinese Iran to end the use of these airbases …
(3:18).
Don't forget KF has support at the highest level, they have the ethos .
we share with national securities …

Financial support by Saudi Arabia ..

Plan by Israel and British government to destabilize the Silk Road which is becoming a power force .
(3:20).

(3:22).

Chinese have developed an amazing delivery system, on the Silk Road. Now if you want to deliver these EU to Europe it takes 6 to 8 weeks, to port and everything. .. they do it in 14 days. It's the economical route they want to disturb …

(3:24).

Wherever the Chinese went they brought prosperity,

with the backing of the Chinese National Bank .
Because they built the China maximum ..

(3:26).
This center was built 4 years ..

We learned from it, when the British with 20 Italians started a coup detat in Libya.

(3:28). I worked in Kazakhstan since 1991 - 92. .. I entered with support of British structure, and I built an empire there. Same as I did in Africa .. I went to understand what could be done, so in the future it could be supported. .. how deep my connections are, 30 years .
K- I wish you all the best.
Any other question.

Q: .. can we expand on the Linz, Tehran, AZ plan?
K- Tehran is in the hand of the KF KS (3:30). with the universities and officials ..
Originally we were supposed to do this in Tehran. These EU were to be shipped to Tehran, then we saw a bunch of things happen., again by the back of spies by the Belgium's in Iran trying to d

now we go back to Iran Sharif University , where I did the original research and development, to show the beauty of the T. And our team in Iran are working on it. .. hopefully the units will be lifted to Tehran for 2 weeks . ..

Then in AZ we don't need to take these, because already 12 units are allocated in the position. We just show the power of the T. Listen to KF next week .

(3:32).
Q: … Can anyone use the Gans's in the Exhibition (3:34).
K- What do you want to do with them?
Q: (confusion)
K- the ones we have in the center is made through the processes made in our factory. It is put as it is. Some of them you never seen before, some are usual to have. About 6 or 7 we decided is good to be in public, and be there to be done. And people are buying it according to what they want. Some of it, people are buying it because of the gorgeous color of it. (3:36). If you understand why you buying it for, it is there to serve that purpose. … we have Deuterium, Cup of Life 1, Folic Acid, Cobalt, Selenium, Mg, Ca., ZnO, … CO2. Strange enough Folic Acid is depleting very rapidly, because it is feeding by its nature.
Q: That was his question about he Folic Acid. It's okay if someone purchases …
K-
It's a colorful tray.
Q: You say two similar or near similar plasmas can connect?
K Yes
Q: So whatever we have in our environment it comes from the same plasma?
K- Plasma of the Sun, yes.
Q: Can we see a different culture of plasma interact with each other?
K- What do you mean.
Q: Can another Pl which have different creation interact with another Pl (3:38). or it must be similar or near similar?

Physical Love only Lasts 5 Years - Field Dependent:

K- Of course, if they have a similar strength field they always interact. You have to have .. if you have a small window of time that they can interact, that they can understand or make a connection, then they do. And you can change the dimensions of it. this is we scientifically we explained, **you fall in love, maximum for 5 years, unless you renew it**. Because in those 5 years it takes … the oldest part of the body of the man is 9 years old, because it gets renewed. The emotion part of the man, within the structure of the cell of the physicality is about 5 years. And then if you don't renew it, if you don't extend it, don't confirm to it, it vanishes. that's why a lot of people fall out of love. Because it, that's the way it is, emotion has a time lapse. **Because it's field dependent, and then it has a peak of interaction, and then it gives the peak of balance**, then the ?? is still there. It's the **same even with pain**.
Q: So when we have AA, for example, it's all dependent in the strength of the same plasma.

K- Same strength could be different plasmas
Q: So is the AA different plasmas? (3:40).
K- yes, different Carbons, different strength Nitrogen's, different everything. Of course it is.
Q: It's not necessarily coming from the same ???
K- It doesn't need to
.. we are testing different things ..
When we go into full tests we close the systems, so we hold the fields inside. We know roughly what to expect, what to see, and gradually build up to it.
Do you want to send us a car to fit it …
R- Jay from England has a Delorien setup .. (3:42).
R- You'd have to get a hold of Jay, I ban him some time ago. I would have to reinitiate him and so on.
K- If he's still got it, it will be easy to see if we can fly it.
R- Maybe Dean can contact him ..
K- the month of January is allocated .KF might do it before or after …
Organizers have already earmarked, and excited, .. it brings a lot of people back into exhibition. 20 people have called the E center to try to get this done. They said, the more they call, the more we know how good you are, how correct you are.

They believe now the T has to be here, to bring a new dimension. KF Austria is investing in manufacturing here, we become part of the structure of the employment. We bring wealth to the nation and the city, and no one listens to a bunch of rogues and bewitches. (3:44).
We expect to employ 100s of people in coming months across Linz …

Q: How do the cars provide heat and cooling ?
K- Hairdryer …
R-
(3:46).
K- KF in coming weeks months will start working on it. We'll deliver a package, like paints, this creates heat or other atmospheric conditions. We have a company which has taken the banner to deliver across Europe. you buy a sachet which you add to your paint. it's not Gans's, it's a material which you produce, and then you add to the paint, and that will give you a lot of things in the house. It will be marketed by this company ..

Q: As an organic farmer will this be adaptable to my tractor and still be strong enough to pull tow.
K- I don't know, how many cows do you have to push it. But it works, yeah, should do.
Q: How can we recycle the parts of the car.
K-

Technology Will Come Very Rapidly Now - No Choice:

(3:48). It has to come, we have no choice, we had a choice to piece meal this , or .. I taught for 5 years. Now the delivery of the T, we put 2 EU, it will come very rapidly, one

after another. In a way, we punch drunk the world with the new T, that there is no time to do other things, space, energy, construction, computers, one after another will be released. And you all have seen it, now you know how to make it.
R- What about the leftover, stuff, computers ..
K- What did we do with the steam engines ..
Now that we have, that we are bringing these machines in, do we need anymore bridges. Is there a need for a bridge. .

R-
K- .. in coming time maybe 5 - 10 years, do we have any need for refineries. They are heavily invested billions of dollars … (3:50). Do we need airports, or Boeing, European Aircraft manufacturing. I have decided to release massive amount of T in a very compact time. And the knowledge is ours we can do. And I have a gorgeous team with me, we can do it. We have everything in position we can do, to deliver.

Q: flying cars .. who will produce and distribute these ?
K- We'll come to an arrangement, we have started a franchise structure in KF. We give our knowledge on condition of franchise that KF Austria will get the benefit of it all, **because I own 100% of it, on behalf of the worldwide population. KF Austria as now become the backbone of the KF worldwide**, and it has been set that way to protect all the interests of the KF in all the nations. And the government of Austria is fully aware of our operation. We tried to do this in Italy, we got betrayed, by those who went and deliberately, using their physicality to disturb others, and they sold the F too, with their body, and physicality, and now we brought everything solid, in nation of Austria. (3:52). We are solid where we are and we transferred all the rights into working with one company … KF Austria manufacturing, which is holding all interests around the world …. it will be kept as the assets of the worldwide population.
Just a name to bring us together…

I was aware that this position might arise, and my advisors and lawyers and accountants, years ago, foresaw this happening years ago, and we set it up that it cannot happen. My assets through a tight agreements, stays mine, what we call to all the nation. (3:54).
KF is a name on the Internet ..

Been financed primarily by me over years. We thought this might take place ..
and we are well protected.
Any other question.

Summary of Today's Teaching:

K- I would like to end in a summary of today's teaching. KF has moved into a new space universal system development, and sharing, and you will see new computers coming out from the KF, and then it will be followed worldwide. You will see flying cars, (3:56). which we call it G MaGrav systems which will be, we booked for January to be shown. .. 9 years we had to wait, more or less to the date, if we can do it, if I can get it up and running by 26th of November, we'll have a celebration day. In a way, a smack in the

mouth of the Belgium's authorities who blocked it that day. 9 years later we bring to show it. And in that process we don't need any flight certificate. It has immensely bothered my for 9 years, the T could save this planet, because of a bunch of thugs, .. of one nation. I have taken human race to what we call ransom. And we have seen the last ransom from them. and in that process we'll change, especially the automotive and the oil industry, and the T is already in the hand of the KF people who know, that if anything happens to me, it will be shown and delivered. At the same time my prime position is to bring what we call the Universal Communication, and computer system that we can find our way around the U. And then we'll where we go. .. I have a position to be able to get these systems across to every city. 1 city 1 system, ..
those who cannot afford will be looked after by the F. (3:58).

Let's see how much we can add.
Hopefully we reach the soul of all of you to bring the change.
Q: my vision -- I saw the nation of America putting down all their guns.
(4:00).

348 KSW

END

349th Knowledge Seekers Workshop; October 8, 2020

ENGLISH TRANSCRIPTION

(:10).

(:12). And that is we announce today, the establishment of "One City, One System," to start from today. What does this mean, every city on this planet will receive one system. We start with 100 cities. … There are certain criteria to receive the system. There are a number of philanthropists who are backing this. Me as an individual, as HKF, as creator and developer of the T have committed 1 billion Euro of my own private assets to this development. This means in the coming year I release 1 billion Euro of my added assets through years, gradually into the KF to see One Planet, One City. I am not a philanthropist, I am a scientist who backs his own development. ..

(:14).

(:16). we do not give free to any city, because then it has no value, they expect it
We'll see a massive development by the KS across the world.

(:18).

K- What was the last you heard
R:
(:22). K I back the . with my own private finance
if developments go the way I want I will back another 5 billion of my own private finance. Austria manufacturing …

In the next 5 years I'll back 1 billion per year. ..

not the Foundation side. The F has to come through public, through the spread of knowledge

From now on it is the responsibility of the KF KS, (:24). to bring the T home. Bring it home in a way, opening centers, health centers .. for the KF knowledge to become a public assets..

(:26).

(:32).
Nothing will be given free, you have to make the effort for it … and the funds will be there.

(:34).

(:36).

I thank you all for bringing it to where it is .

(:38).

Teaching Starts :

Tell it so They Understand - 5 Cups :

Going back into the teaching, there are a lot of ambiguity, and there are a lot of points need to be clarified. The HKF was telling me a couple days ago. You know what's the problem, people don't understand, you have to explain more that they understand. So we go into that depth, to explain, to explain where the knowledge comes and at the same time to bring the new T with new explanation. One of the main cornerstone of this T is the space development. .. it has to be understood in essence by the way it works, by the way it is, we look at the flight with the aircraft, with the spaceship, but the original

flights, the original movement of any structure comes from the flight and movement of the M fields. If we understand the movements of the M fields then we can understand how the rest, how the rest come to exist, how everything else become, to creation, life, solid matter, plasmatic condition of intelligence as we'll see in the space and the rest of it.

In this process, especially in the past couple of months, and past week, there has been a lot of concentration on the 5 Cups. The Cup of humanity, or what we call the animal kingdom, Cup of vegetation, Cup of Solid state matters, the Cup for gaseous and liquids. This has brought a lot of anxieties and questions, (:40). and some of the people who are scaremongering have used it to create a scare across the KF, that "throw your Cups away and do every other thing," because don't forget, we have seen this scaremongering before, every time we were correct they started a scaremongering, because it served a purpose. Enemies of the KF sat within the KF, and in that process we become wise. They showed us with their way of trying to create scaremongering, where KS have not understood, so we have to explain, for them to understand, unknown scares, you, known is a knowledge, which adds and strengthens your, what we call, trust in what you do.

What I want to do today, is very simple, I start for you in a basic condition that you understand. As we know, … (:42). .. **As we said, the whole structure of the world creation comes from movement of what we call, M fields. M fields only travel with, one way, and that is if the field strength from the point of stronger, it creates a gradient, that the stronger field trying to reach the weaker point, it creates its movement**. In so many ways, in the history of the science of man, no one ever understood why and how M fields flow, how and why M fields travel in the direction, in a certain speeds, and how this speed is seen by detection system, but not by the eye of the man.

The Secret within the M Fields - Invisible :

In so many ways, there has been a secret, which is actually within the secrets of the creation of the M fields themselves. Mankind or any creatures of the U, depending on the strength of the creation of their own fields, only can see what is visible to them. Only can see what is, or has physical manifestation, but mankind and the totality (:44). of the **Knowledge of the Universe sits and lies in what the mankind cannot see**. What is not and has not been visible to him. In a way, the work in the background, which humanity and the rest of the creatures of the Universe do not see, creates the puzzle of the motion of the M fields. In the Universe in the condition of creation of M fields, M fields and creation of the motion in them, has and possesses an invisible, what we call field dimension, what you call atmosphere, what we call, magnetosphere. What does this mean? Is that even though the field looked to us as it is moving in a direction, but itself due to inherited characteristics of what we brought into the discussion last time, the wave of photons and particles, the particle itself creates a massive, massive atmospheric condition around itself, which in that atmospheric condition, higher order fields travel in the depth of it, much faster then the light we see. So in fact, we are puzzled why a light moves in a certain direction, where is the gradient from. The gradient is created by its own internal magnetic magnetosphere condition, which pulls it in that direction. (:46). If

you look at it, the rays of the Sun expand beyond and create Jupiter and Saturn and seeds for the future generation of the planet. What the world of science has not understood is that the light as what you call particle, creates a massive magnetosphere, which is far beyond the vision, sight of the man and other creatures. So it has by inherent conditions of its creation, has created a M field forces within itself, that allows the light to travel within that magnetosphere. So if you look at it, it sends a hidden fields ahead of itself, and then by inherent, coherent condition and interaction of the fields within the structure of the, what we call, particle, tries to feed it. In a way if you understand it, it's like you shooting an arrow and then running to catch it. As simple as that.

The creation of the motion and the expansion of the U is done on these basis. And to the point where the field can keep interaction MG field force with its origin, then the fields become in motion. M fields become in motion, then the structure finds movement. This is how the U expands, this is how everything else moves within the U. (:48). … In this process now we understand how the light is created. In a way, the plasma of the soul is trying to reach the field, which has created by high order, MG field of itself, creates the condition of the motion of the fields in a particle. If this is understood, everything else about the world of creation becomes much easier. In a way, it's a magic show that now we have opened its secret.

The Whole Creation Started with One Field Interaction - The Creator :

In a way, what happened, the whole creation started with one field, interaction of one existence, the Creator, and in spreading the fields itself, in the dimension of the higher order traveling faster then the physical dimension of the matter states, or plasma states, made the light, or the fields to manifest and show its direction, trying to catch up to the arrow. For the first time in the world of science, we understand the principle of the motion of the light. If this is very hard for you to understand, always find a copy, always find a replication that it makes it easier. In interaction of the fields in upper atmosphere plasmas are created, some as photons and some as particles, some as waves, and in that process, in being pulled by a weaker arrow, (:50). which has already arrived, in the center of the planet, the photon travels to it. In that process, not only releases what we call photons, but it releases the condition for creation of the materials, in the motion of its own plasma, leading to creation of matter state. Once we understand this, once we grab the science behind it, intellectually analyze it, we'll find that mankind has opened the door to new ways of transportation. I throw the arrow, it's part of me, try to catch it, I arrive. But you have to understand, this process of transportation needs massive amounts of understanding. Some of the travelers of the U have already achieved it. And it's for mankind to reach to that point. In a way, chasing your own tail in the new dimension, but this time the tail moves faster, because of the higher strength, and as it looses strength it becomes a point of reference for you to arrive at. In so many ways, mankind needs to look in the direction and the position, and that direction and position becomes his destination and the speed of travel into it, and arrive at the zero-time and space.

In so many ways, those of you who are in understanding of the space T and space travel should have seen this coming to you very easily. (:52). In this process, once you arrive,

what is the surplus of the position of the fields, you left behind in the MG fields you have created, become the matter states and creation of matter around you. So now at the point of reference you become the center, and if you need, want, you'll collect what you have left behind as they arrive to you as different strengths, as Cu, Zn, water and the rest. In a way, by the release and approach to the point of destination, you have created all matters that is in the strength of your own consumption and use. Now you understand the process of the creation. Now you understand how planetary systems are created. You understand how every other structure in the U is created. Start with one and in be able to send higher order fields, which is not visible to us, in loosing the strength in interaction with other fields, and particles, and waves, and photons, and fields in the U, in the slowing down, now they have a G and M connection with you, and you trying to arrive to it, you become the center of it. You become the totality of what we call the principle section of it. (:54).

This process brings a lot of new conditions and new understandings, so in a way, as the field comes at a given strength, the field as a particle has already forwarded … This is the photon, or particle I should say, which is moving, but with it, in advance of it, higher order has been sent ahead. In a way, this particle is chasing to reach this point, (:56). because if this (the particle) has a order magnitude of 10, this (higher order ahead) has a magnitude of 100 or 1000 so it moves faster ahead, because comes from stronger inner sanctum, In the world of cosmology, we call them cosmic rays. We call them neutrinos. And then as the particle tries to catch up, in its environment. .. In a way, I shoot the arrow of a higher order, and as it looses strength to one, now I try to catch up, and I create the direction of the fields of the motion. This is how we see M fields move, because in that process, how the original motion started. (:58). Now the U is full of fields, and in that process we don't see this operation so visible. But in a way, we see it in macro, and micro, both the same in the motion of the creation of the light at the upper atmosphere, and its attraction due to its strength to fulfill the need of the center of the planet as light. And then in that process particle themselves, according to change of the strength in trying to reach the center of planet, in interaction with a different field strength of the fields of, inside of the planet, leads to the creation of matter, and then as matter has both G and M field forces, it becomes matter and Inertia of the matter. Now we understand the process, now we are aware of the reality of the creation, which maybe up to now was not understood.

In that process, now we come to one thing, this light, this particle, now by slowing down in the point of arrival creates his own plasma. And if we create enough M fields by pulling from different dimensions and directions of the same strength, which mostly exists across the U, (1:00). we create the seed of a planet. This is what we call the Principle Matter, this is what we call the Center Core, this is what we call the, where the field interaction, brings the G and M fields. Now this is your first point, first point of reference, what we call, MaGrav. You created the MG field of it. Now in the rest of the U, and interaction with the fields of the Sun, which continuously feed into it. And other sources of cosmos, which continuously feed it, the center core can .. Now the fields in slowing down will create matter state, and this matter state expands, and the size of the planet expands by the interaction of the fields of the Sun and the Earth. Now these themselves, carry, as had their fields, in converting to the matter state, create the

transition of Inertia. So now you have not only MaGrav, you have Inertia too. Then the rest of the interaction of the Inertia with the MG fields, (1:02). and the fields around the planet, in a way, now you have 2 fields (MaGrav + Inertia) plus now the environment which they have created, leads to creation of matter state. So now this matter state has a condition, in the solid, liquid, whatever, depending on the interaction of the Inertia and MaGrav of the system. Then in that process, depending on where matter state sits and its center, it leads to the creation of the soul of its own physicality. And in the total interaction of the fields, in different mixtures, leads to the totality of what we call, Soul of Physicality (SF) in respect to interaction of totality of the matter state and the fields.

Now we understand why we have the 5 Cups. So if you understood this and you understand the theology, at the point of the creation becomes very easy to understand. How you create which one, gives you what you need. If you create the strength of the MG field of the Earth anywhere in the U, you connect to Earth. (1:04). If you create MG field of the Inertia of a given location of the Earth, you go to that point. It's the universal GPS system, not only for the position but for exact condition and the strength that you land on. The reason we put the 5 Cups out, was what we call the stepping stones for you to understand the start of the creation of life anywhere in the U. You want to go to planet Mars, you have to create a condition of MaGrav of the Mars in your system. Now the same as the light as you saw, matching with the light of his past, you travel to that position, to that destination.

In that reference we saw how everything moved to reach to this point. Now this point for you is this (MG). What the interaction of the environment of the fields gives you this one (Inertia). You want to land in Tehran, you create not only GPS position you call it a MaGrav, G of the Earth. you create the Inertia, where the total field of the matter state of the Tehran was made of. So not only you come to Earth but you end in the position of Tehran. Be it New York. (1:06). Be it Beijing, it's all the same, Because the Inertia is different, that's why we have the different matter states and everything else. Then you want to appear or produce in that position in the dimension of the physicality of the man, the STM has a spectrum range. So you come from planet whatever, you had a different structure. You create the STM in the strength of the planet. You take the feature of the man, then you decide in what soul and physicality you manifest yourself. This is the beauty of the creation if you understand it.

Those who tell you to throw the 5 Cups away, means throw the knowledge of the creation away. Of course we have seen this from the enemies of the F because they know you are reaching to the point of maturity, and by slaving you as they have done for centuries and thousands of years, they can still rule you. The knowledge of creation is simple. The knowledge of creation is so beautiful that now we have the plasma T that we can create different strength of MaGrav, different strength of Inertia, different strength of the matter state, we can produce anything, any position and travel to any destination in the U. Throw the Cups out, your nation will suffer to absolute poverty, as the ones who understand will rule you, and this is the whole, those who say that. They slaved you for centuries, now they see the key of freedom, (1:08). given by the F, they have come up with a new tricks. If you are a simple man like me, simple to understand. Now you understand how in the

coming time you will travel the depth of the U. Now by understanding the soul of the cancer, the soul of whatever disease you have, you can create its field strength of its matter state and its soul, (in) seconds done. As the HKF said, explain to them that they understand. When they don't understand they are open to abuse.

Now you understand and if you look at it, if you really understand and go back to the origin of the teaching, it's simple. Principle Matter (MaGrav) , Transition (Inertia + STP), and the matter state (STP + Soul & Matter), if you want to think in either way. There is no change in the knowledge which we transferred. Now you have to decide. When you are on Earth you have what you call fixed MG fields. When you are on Earth and you want to go from New York to Washington, or from New York to Tehran or another point, you create only the Inertial part fields. (1:10). And you'll be within Earth and you'll arrive at that point. And if you are on the Earth and you have the same MG field and Inertia, that in let's say in New York, you want to create the fish which is the same taste as the fish you had in Tehran, now you create the condition of Inertia, which applies and implies in Tehran, and then you get the same fish. With the new understanding of the T there is no genetic modification, it is the truth, in a way you create the condition and the soul will fit into it to fulfill it. There is no talk of genetically changing , it's to giving the Inertial value to it, that it can grow within it. Now you see why when we apply the T in a Gans we right off all the GMO, we have seen this in China, and other parts of the world where we go back to the origin of the seed.

Covid-19 Vaccination - Nothing

Many of you have a fear what this vaccination with Covid-19 will do to you. Nothing, because if you go back to the systems and understand the use of the T, they can give you kilos, tons of injections, because your body has set to be on the original dimension, as you created the AA of, does not effect you. (1:12). But you have to understand what you do. You have to understand the creation of the M fields in the dimension of the plasma in the strength of the virus, will handle it, but the injection of the new material will be converted. The control of the man, has to be in the hand of the man with the knowledge he carries, not by the fear which is created in him, not to see what he has.

As I said to the Iranian teaching on Monday, as one of the, what I call most illiterate people in the Iranian community told the F supporters to throw the Cups away because they saw the truth, and they could not save the man. And we see again by another person who we kicked out of the F, saying to throw the Cups. throw the Cups away. Now you understand this. This is the Cup 1 exactly what you have, .. if you don't see it, I explain to you. This is your Cup 1 (SF), this is your Cup 2 (S), this is your Cup 3 (M) , this is your Cup 4 (Inertia) , and this is your Cup 5 (MG). You throw the Cups away, you throw your nation to absolute poverty by those who will control, and those who tell you to do are the agents of the nation, (1:14). which you have seen, how to keep nations in absolute poverty. Now you understand the principle, the totality of the creation. I put it to you in a simple version, in the manner of Cups that the layman on the street could understand, that when he explains and understands the totality, not only him, but his children will not be taken to slavery by those who understood, and they block the knowledge. This is the

European tactic, which has been used for centuries. Create fear, create scaremongering, and control. There is no need to have a fear because you have the knowledge. In the systems you have created, if you understand how to use the fields of Cup #5, and you can transfer it in a position of dynamic, you can travel from Moon to Earth within seconds. The same as this field (original drawing) moved in following a weaker (field), created by themselves. You create Cup #4, understand the work of it. The fields of it, you can create any position, even on Moon, the condition of the Earth, greenhouse to grow your cabbage, potatoes or whatever you like. (1:16). You should have seen this in a true essence, what we saw in the Caribbean videos from our friends a couple of years ago. From now, not only the KS but those who work in the space T and understand this, can change the position of a space travel, zero-time travel, communications, where you use faster fields ahead, in a mono ?? micro and then you send your information behind it. You send a fast target and you try to catch it with a speed.

These T need to be developed, now that we are at this point the understanding, this is why I am backing it in every shape and form, and I call upon all you to do the same. Understand the T, understand the principle behind the motion, even the motion of the Soul of the Creator. The only difference is, what we call the magnetosphere of the Soul of the Creator covers the whole of its creation, and we are those rays, and photons, (1:18). and particles which has come from it, and travel within it, which carries attributes, because He was the origin. He has created that atmospheric condition and the rest of us live within it. The example of the Earth, Earth was created, this Earth seed, and we see MG, and then it has created the dimension of Inertia, which is what we see as its matter state, and then its magnetosphere, which everything else lives within it. That MG in the center is my God, is the Creator. And the rest of us in different shapes and forms, live within that cosmos of what we call Unicose. In a way we are created from Its own fields and transformation and transportation of its own fields. Now you understand with one pen, with one stroke you understood from A to Z of the creation.

You don't need no one to tell you what to throw away, because they slave you. They slaved the F for 20 years. No more. We are all free, teach free, learn free and invest in our future of planet, and beyond freely. The 5 Cups, understanding the principle behind it, (1:20). is the key for man to span of the U, to travel and to span it, to grow food and energy on this planet and beyond, and the freedom of the man from slavery of the time, position, space and distance. Those who tell you to throw away, is to throw the freedom, throw away your sanity, and you are slave to their slavery as they have done for centuries. I give you the key of freedom, the knowledge. It's for you to develop it, to understand it, and to manipulate it and to see to what you get. Change it slightly on the S of the matter state you get the Cu and the Zn. Transmutation of the fields is the strength of the understanding of the man, not the field itself. What you understand you can transmute. The process of the knowledge, the process of understanding, the process of being creative to create new conditions, new materials, is the strength of the KS trust in their own knowledge.

In a way, what you see on the screen is the history of the creation of the Creator to this position with man, and it applies to every dimension and every position in the U. We

come from the fields, and interaction of the fields creates the plasma, and the creation of that plasma, (1:22). creates magnetosphere, which the interaction of that magnetosphere with the rest of its environment, which is within, creates its matter states, and that matter states within itself creates entities, which can live within it, operate within it, which becomes you, me, the plants, the stone, and each one has a soul. Because again it has a center which lead to its creation. This applies from your kidney, to your liver structure to your body, to the structure of this planet, to structure of this U, the Unicose and the Creator. There is no difference there is only one principle, interaction of the fields, the amount of it and how, and how fast you can throw to catch up, and with it create condition of manifestation of the atmosphere. Now you tell me, would you throw your 5 Cups away to become a slave to those who abused the whole humanity, and infiltrated the STM to keep him a slave, or do you free yourself from slavery of everything on this planet and beyond. This is what I said, when you understand the knowledge there will be no magicians in the U, and no one who can tell you what to do.

Mass and Weight Explained:

Do you remember how for centuries man did not understand why there was a difference between the mass and the weight. (1:24). The mass is that MG, the weight is the interaction of it, with its field environment with its creation. There is no difference. And how that weight changes you manifest yourself in different strength, 100 kilo on Earth, 80 kilo on the Moon, 60 kilos on the belts, but in essence, your mass, the creation of M field of your soul stays the same. Now the science of creation becomes absolutely child's play. I told you by 21st of October we complete everything which is there.

British Deceived Iran Before to Get Oil - Same as Today :

And at the request of the HKF, explain to them that nobody can abuse them. And I think this is the best, perfect explanation, and we all understand, and no one can abuse us. As I said to the Iranian community on Monday, throw the Cups according to the joint, what we call the work of the devils, one from outside and one from inside Iran, and bring the nation of Iran to absolute slavery, where it started the knowledge with. We have seen this before, as I explained .. we have seen this last century when the oil fields of the Persian Gulf become known, British did a very clever move. They didn't want the Iranians to enter the oil zones, they sent a guy, a British to live amongst the tribes near the oil fields. (1:26). For 7 years he did not talk, he listened to them. Then after 7 years he started talking, he said whatever he said, and they looked at it (as) magic. He used to wear magnetic shoes and they used to stick together, the people never seen the magnets, the shoes stuck together, so to the people he became a magician. .. he told the Iranians not to go near the fields, these things are dangerous. They were dangerous because the British were siphoning oil out of the Persian Gulf and territory of Iran. And now we see the same, the same betrayal by those who came in, pretended to be, and now started telling, don't touch, because now the knowledge is dangerous, they loose control. Now they appeared themselves as everything else, except as the savior of humanity.

Everyone Can Understand the Creation - Don't Need PhD:

You got to understand yourself why this knowledge is so beautiful, because every man can understand, every man can support it, and every man can carry the knowledge. You don't need a PhD in stupidity, and you don't need PhD in Physics or Chemistry, if you understand it, you are intelligent enough to apply it to the measure which applies to you, and what brings you the satisfaction of existence, irrespective of the position and title you might carry. Now in a simple way, in a simple word, in a simple understanding, the whole point of the creation is in front of you on the screen. (1:28).

Awareness of Soul Protects Physicality - Even from Covid Injections :

You made the Gans's, you understood the transition of the fields. You understood the transmutation of fields through your body that you overcome Covid-19. The beauty of the plasma T in essence, is that it matches the dimension of the need of the soul. And the soul is aware of what has been injected to it, or given to it which is not good for its physicality, be it the injections by Covid19, or any other thing. Awareness of the soul protects the dimension of the physicality, and this is where we are heading for in the coming time. In the coming weeks we should show how to do that, that you become the travelers of the space as Mozhans. The time has started and we deliver more. Because now you understand it. All I need to do is to show you where the soul sits, and what strength it has and where that soul in such a given position of MG field, will manifest itself in what shape of physicality.
Any questions. (1:30).

K- I think Mr. Rick Crammond you have a lot to do in your workshops.
R: I kind of laid it succinctly Mr. K
K- There is no doubt in the knowledge, now every man can follow.

Q: so the Sun is the fast target and the planets are trying to catch it?
K- No, the Sun is what it throws away, the rays of it, at higher order, and when they slow down to given fields, then the other fields from it, as particle try to arrive to it. And in that process of transition they create light when they interact with physical conditions and magnetosphere of the fields which created the Earth.
R: Okay, but what about the Sun itself (1:32). in relation to the galaxy ..
K- The galaxies have created the same
R: The Sun is following a path that has been already made for it by the M fields, correct? The fields came first and the Sun is following that? So are the planets following the sun ..
K- The same position
R: I think that is what he was trying to say. the planets are playing catch up to the Sun. The Sun is playing catch up to the center of the galaxy. .. center of U
K- yeah it's not only to catch up, but to be connected, to be the target. But its that target and its position is amalgamation of all the fields within that galaxy and U, which gives it the position. The same with the Earth, the rays of the Sun, lead to the creation of the center of the Earth, what we call creation of its MaGrav, but once that MaGrav is created the position of the Earth, is not only dictated by the Sun, but it's created by the other

entities within the structure of the solar system, and by certain measures by the fields of the galaxy, and by another certain measure by the fields of the Unicose.
Q: So thought is ray, and is stronger, (1:34). sent by the mind creates position, and we imagine, and call it, directed by mind, and then the body gets pulled into it and manifests according to the environment. So we are all gods.
K- We are part of it. We are created by its fields, and we manifest ourselves according to the position, place, and the field of the strength accordingly. I made man in the image of Myself, because I made man from the fields of Myself. It's not that there is something called God, separated, and then other things came in it. The reality is it is not 2 things, the Creator and us. It's us created from the fields of the Creator.
Q: You always say that only fields of the same or similar strength will interact with one another, yet it is the difference of strength which creates the gradient that produces the motion of the field. Can you more clearly explain that?
K- You see when we send a field ahead, because we sent it, it carries part of the strength of the connection of the fields with us. (1:36). It means because it came from us, it has that field strength connection. So it is not something abnormal, it comes from us, so it has a connection fields from us to start with, but of a higher order then we carry. And because it is created by us, it carries part of us, it has a connection with us, it's the same thing with the Creator. We come from the fields of it, so we have connection to it. And this process is the same.

Q: .. (1:38). I have been working on a MaGrav coil flight system, ..
K- Can you explain to us what the system does.
Q; whenever we want to flight we have to connect to a certain field strength of the point of destination … and I try to do this with my system, but I think it is to weak to achieve this task so I try to create a base reference point where the system can pushes away from it.
K- Instead of going by G, you choose the path of M, this we understand. This you need when you are taking off from a planet. So you are approaching it from the reverse, instead of getting pulled to, you push your self away. we see this, you are not wrong. we see this with the flight system of UFO over Jerusalem, over Christmas, if you understand it. .. you are not on the wrong path.
we saw it over Jerusalem the UFO, it suddenly takes a flashing vertical takeoff. .. is not by changing G, (1:40). is using the M field of the Earth in a reverse condition to push you away. This has been explained in a number of papers. In a way, .. but you have to understand it. We have 2 ways of flight, we can reduce G fields of us, let's say in a flight system , in respect to Earth, or let's say we connect to the G of the Moon and it pulls us to it. the other way we match the magnetosphere of the planet. And the push of it throws us out. This is an extremely dangerous way of .. it's like going on top of the Eiffel Tower and jumping off without a parachute and hoping to survive. It has to be done …
the danger is that your M shield is very thin. so if there is an aircraft above you hit it, or you literally decimate it. So what you talk about increasing the M, is the correct way of taking off. (1:42).

Why KS systems cannot Fly

Q; Do I need to create opposite rotation … fields to be in the same direction , same line of movement.
K- I go back into what they call enlighten, or give you some information. If you look we don't see flying objects coming in the same direction or flying the same way, moving up or moving down. they don't always come from north to west or west to north or whatever. So the direction of flow is not that important if you understand the strength of the flow, and the Inertia of the flow. The reason you cannot fly is that you have not created the field Inertia. Or you have created a Field Inertia, but you haven't created a field MG. This is one of the reasons most of the people who work with the KF T never succeed because they haven't understood this. (1:44). A flight system of the plasmatic condition is a combination of MG, I, strength of the physical structure and the soul. And you have to create a system that encompasses all 5, that's why we gave you this Cup of 5, for you to start practicing. Try to see if you can match, try to see if you can replicate. So when you try to achieve lift and flight and you don't, you have to see which part you have achieved.

1975 Serral Flight rotating solid magnets

If you go back to 1975, and Serral flight system where the motion of the MG field of the number of solid magnets to the speed and rotation has created lift of the vehicle, they have created the Inertia strength. And because it's a huge number of magnets circulating the high speed within each other, they create a spectrum of the fields of the matter state of the Earth. If they could create the MG, M and G field of the Earth then they can fly easily. But then you have the problem of what is the object inside it, would it survive? SO you have to create multiple conditions and systems, you cannot do.

Chinese Flight System had 5 Cups

I think if you look at the Chinese system of the flight for the space travel, is that system. We have created the MG, the I, the S, the M, and the ?? ?? (1:46). When you speak to those who were present in the trials in Sanya, we could hear not the sound of the motors, but the interaction of the 2 fields with each other, it was like talking with each other. We could hear space noise.

STM through Fields is how we Talk

This is how we talk, we create the motion in the direction of the soul, and the STP and then interaction with the matter states which we have put in as vocal voice becomes the sound we create. Why do we talk our emotion, how do we explain, you have seen, you have seen we explain our emotion, so rapidly with words, with physicality, we transfer the fields of our soul, in the strength of understanding the emotion between the physicality and the soul, and that field in touching the vocal box, which is of different strength becomes the voice. We don't have a nerve system to communicate, send the information, such a thing has to vibrate to make this. The STM in interaction of its fields with the strength of the fields of what we call, another fields of tissues, made that tissues, vibrate, creates that noise, becomes our voice. This is why we can speak so fast, because our emotion, in interaction with the fields of the other entity, which is flexible to move, in

interaction becomes noise, becomes our voice, becomes the voice of our soul, becomes the voice of our emotion. Mankind has not even understood this, we just got a voice box, (1:48). How come we loose our voice, but we still think, we still have emotion, because In so many ways, this vibration in tissues, need to be continuously charged that they can respond to the fields of the emotion of the STM and the physicality soul within the brain of the man. That's why we can explain our emotion so easy with our voice, with our face, with our eyes. If it is of a certain strength it becomes tear, or laughter. Now maybe you understand, how when you think you talk, because the strength of the man has created his vocal box in a way, of the strength of his emotion, and then the 2 when they vibrate in connection with the STP becomes, noise, emotion, laughter. That's why messages are not sent one by one, messages are sent by the strength of the emotion and it is like a ??sunray of the Sun, when it hits the vocal cords becomes noise. I can make you talk without the voice, without a vocal box. Test something, I used to do this a lot with my children, put your head against your child's head, ear to ear, and start making small noises, and then listen to what they respond. (1:50). And then do the same, do it with your soul and see how they respond. Children are easy to do. Men when you do it with your wife or whatever you have a preset, children are there to hear the noise of their soul. This is one of the ways you enhance peace in the soul of your children. Just put your ear to their ear and hum, and see what they hear, because at the point of the ear is somewhere where the 2 energies of the 2 souls meet. We create a temporary condition of interaction. You create a different bond with your child when you do this. We do this when we make love to our partners, when you are face to face, the 2 heart come. The 2 STP create a magic point in-between. We know this, but we never understood this. Then you can do some simple things, you think to your child and say, now we go separate, don't talk, you see he moves his head away. Man has forgotten half part of creation, when you have a child, when your wife is pregnant or in that position, when you talk to your child, put your head on the ear, (1:52). on the womb of the wife or the mother, and you communicate with the soul of your child. You give the information which it translates inside to what you have said, because it carries the knowledge of the soul, the emotion of your soul, "my child I love you, Papa is waiting for you." Men talk to their children, touch, and transfer. This is how you elevate the soul of your child, how you guide it through the path. Understand the reality about the creation and then you can create guidelines, paths for everything to be the way it should be. The problem with the present knowledge is that we just create the child, and it is for it to grow. It is the responsibility of the father more than the mother, as she is the carrier of the one part to transfer that energy, and create the condition of evolution and the emotion of the soul of the child at the point of inception. The responsibility of the father is not just to give an dot make the first seed and that's it. You enhance the body of the woman. (1:54). You enhance the womb, the condition of the physicality for the elevation of the soul of the child. Being a father is not just as they say, shake and go. You have to take responsibility and position with it, and a lot of parents don't know, don't understand. It's not bonding, it's elevating, it's totally different concept, it’s a totally different understanding and it's the way the U works. The Creator did not create us and left us on our own. Forever He sent us messengers to elevate our soul. He sent us the condition and different way for many people to understand. In so many ways, through His own soul elevates our souls to reach the new condition.
Any other question

J: .. with the Gans material, say CO2 Gans when we make it, we put our intention and our love, (1:56). into the process when we make it. If we have an elevated soul and we put an aspect of our soul into that Gans material, is it strengthened by orders of magnitude more? whereas before is maybe carry a field strength of 5 feet, when we do it with elevated soul it carries a strength much bigger, can we get the Gans material to light up if our soul is strong enough?
K- You can, you got to go back to understanding the property of C. C has a specific condition and it's very much like Deuterium, it's the construction of the D in the open span of the U. And it's line of communication , connection with all other fields, because the C or D in so many ways, orientation becomes the diverter and reflector of the fields, of the M fields of the Plasma. In the physical matter we use prism to change or deflect the light to see different colors. In the U the only thing which deflects, and reflects the M field and motion which man never understood, many tests have been done, (1:58). to show the light can bend or the fields can bend is the position interaction with the sphere of the what we call C, magnetosphere. We see that clearly within the structure of the neural system of the man. the switching of a C creates a diamond structure or superconductor. And it reflects and deflects it. So the C, only C, when you speak about CO2, or when you use D you create that point of reflection and deflection of the rays of M field. You cannot destroy it, you spread it. Break it up and you link it to another point. In a way, if you put a reflective mirror in the ray of the Sun you can reflect it to where you want

separating the C from the O. ..

(2:02).

Do you understand?
J: I will try some new experiments. (2:04).
K- We keep you busy. You see to do it.

(2:06).

(2:10).
We do not reach the people come in, they come on their own accord.

(2:12).
In Iran the KF has been registered as a company, and they have started delivering.. .
KF Iran has started distributing One Cup One Life freely to the population.

Saving life has to be free at the point of demand for those who cannot afford it. This week the Iranian KF, put all 3 out (2:14).

Any other question.

Q: from Jenia (2:16). .. (about the 5 Cup teaching) if the MG interchanges act as lens's, and the I + M + FS act as lens's also, in rythmic manner with each other thus changing the space properties.
R: I am not sure if you got that question.. allow you to talk.
Q: I am from Jerusalem (2:18). .. UFO video .. I am familiar with your foundation for only about 2 weeks. I was excited about it because I was interested in the field of metaphysics for some years. To sum it up the knowledge which you tried to deliver it, it was like the missing puzzle for me. When I saw a video of Nicholas… that's what hooked me up. So from my understanding of plasma and all the fields, was, it's like a divided condition, of balanced condition which makes motion, and motion is like .. the initial particle, that you call it. That makes the MaGrav fields, which are just the same fields, which goes to in opposite directions, and interacts with each other. So I am trying understand, this topic helps me to see as lens, (2:20). like every condition, every environment are like different condition of lens's, which interact with each other. So I try to understand the Cup concept, which I am not familiar yet. I am trying to figure it out, because I was watching what you were showing about a half hour ago on the board. My question is how to, from my point of view I see those Cups as optical, like they make optical conditions with each other, that with interaction with each other make different conditions that allow some fields to pass through, and some fields to not. It's hard to describe pictures in our minds sometimes in words. So I try to put this question online and see if Mr. K might interpret in a certain way to see your reaction. In a topic of optics, to see the fields in an optics manner.
K- thank you very much. In so many ways, you are not far wrong. (2:22). The Cups are set not as optics, but as a field interaction system in respect to each other. Starting from weakest in what we call gravitational strength, but strongest in G attraction, and visa versa in M. And as they create that field expansion, they interact with the Inertia, which we have created by the matter state of the fields MaGrav system, and in what those 2 interact, and what we have put up as a soul, then it creates the dimension of the physicality of what to be. In a way, you call it optics, we call it, interaction of fields, what is created from the bottom, in interaction .. that's the essence of the creation, or Cup #5 - the MG, in essence is all the same in all the plasmas in the U. What that field in a given position and condition, in interaction with its source which created it, creates that Inertia, which creates its matter condition. Which in that process, the interaction, what fields, the Inertia and the source create, leads to the creation of the ?? soul strength. and then interaction of the soul strength, with the 2 which have created it, (2:24). gives it the physicality and the STP. In a way, if you put it this way, the MaGrav, the Cup #5 becomes the source. Cup #4 is created from the interaction of the source and what created it, which is the Sun, which creates that Inertia self, by itself, back to its position. And then the Inertia and the MG field of the two leads to creation of the soul. And then the soul in interaction with the two, leads to physicality. This is why when we get to the certain points, or the mountain, we see a tree line, no tree grows beyond that line, because the Inertia in that position, in respect to the MaGrav of the planet, does not support soul of a plant, that in interaction leads to the creation of the plant. Now we understand the process in its true meaning. This is why we see certain creatures cannot live or exist in certain positions, because the interaction of the fields fo the Inertia and the MG of the planet, does not support the soul of creature, creation. This is why we have .. you see this,

especially in Middle east, in Jerusalem most probably been there for thousands of years. (2:26). Some water wells have fish in it, some water wells don't, it depends on the depth and interaction with the planet, and the mixture of the water which runs through it. You have waters which run for centuries with no life in them, or certain minute life. But some water lines run and they create life, fish , because it is according to, if the interaction of the Inertia field strength of the matter state in that environment with the MG allows the creation of the soul of what can be living in that water which crosses, and leads to the creation, manifest itself as a fish. Now we understand the process of creation on this planet and everywhere else. A running field like a water, creates a running structure like a fish. Then how the fish wants to grab, to stand, or to walk, or to hold on to, or whatever, leads to creation of other entities as we know. You call it optics, we call it a field transformation. I hope we answered you?
Q: Yeah, you sort of answered me, because we all have our own definitions so it's something I have to meditate and think about, (2:28). before I react to it, so thank you Mr. Keshe.
K- I left you to meditate by picture.

Q: .. Dutch …
K- Dutch Holland is our home. … many good people.
Q: So when you were talking about Inertia, life in the deep sea versus, you also talk like there are intelligent beings in the sky right? So
K- Intelligence is everywhere. (2:30).
Q: So if they were to make the Cups they would have the same MG Cups but they would have different Inertia Cups as you go up and down the ?? sky
K- Yeah, if it is within the boundary of the planet Earth, yes.
Q: back to the MG Cup, if I want to go to the Moon, am I separating my Nano coated spiral Zn away from each other, or pushing them together to change the gap. or ?? introducing another material ..
K- No you have to introduce the MG of the Moon.
Q: How do I figure out what the MG of the Moon is?
K- We have the facilities to measure certain amounts of the U at the moment. Partially the matter state or the Inertia state of the surface of the Moon gives us a partially a clear indication in respect to MaGrav of the Moon as well. You have to realize that any entity within the solar system has a common denominator MaGrav strength. So you have to find the ?? solar MaGrav strength, and then the position strength of the Moon, and the strength of its Inertia will give you the ?? surface of it. Then you can choose where on the Moon you want to land, the surface you see. And then there are options when you approach, you change to matter state, physical state matter of the surface, (2:32). that you can position yourself anywhere. In the liquid, in the different depth of the planet ?? the surface or above it.
Q: ???
K- In a way, .. (back on the board) you have to extend the knowledge. wait .
If you look we had the MG of the Earth, and that MG, then we had the Inertia of the Earth, but this in totality has another MG of the Sun. So when we want to travel anywhere in the solar system, we have to tune to be within this range of the MG of the Sun. Then we stay within the boundary of the solar system. So our common denominator

is this (MG of Sun), then the common denominator of the MG of the Moon., and then position of what we call Inertia. The Inertia could be liquid, gas, or solid. You want to be on the surface, or in the depth of the liquid, or you want to be in the gaseous above, or on the land. So our MaGrav system has to include MG. We want to travel outside the solar system we have to consider our galaxies position. (If) we want to go to sub-matter we have to understand the sub-matter condition. . Now the knowledge makes sense. You want to travel into the center of the U then you have to understand the U field and what strength is that, and then you do the same in which U in the Unicose or the dimension of the Creator. Nothing changes, it's just how we adopt, what strength we use.
Q: So in reference to our body, you are coming up with the cures, in the Body EU and uses some Gans's to cure yourself. So we use. So do we look at our body the same way, Does our body have an MG too. (3:36). Or we have an Inertia for certain organs, and .. I know we have an over physicality in reference to the MG of the Earth, but
K- Yes, you have to do the same. You have to do the same with the soul. yes. Then you do the same with the soul of the Cu or the Zn. This is why, one of the reasons, we embedded as part of the structure we have been explaining for some time, the soul of the HKF in the system. That's a point of reference for humanity. The soul of the humanity, and a peaceful soul of the humanity. Now maybe you understand why.
Q: That's how you were able to figure out how to cure people of different diseases, because you have a reference like you have set up here, for any entity, right?
K- Yes.
Q: I have been trying to get my head around this for like 7 years now.
K- Now you got around it, or it has got around you?
Q: I don't know. .. it starting to look like good morning. .
K- I hope it is a very good morning. (2:38).
You see we do a lot of things, we talk about it. but people don't understand at the time. And I have been told many times, "don't say this, they don't comprehend they need to work a little bit at it." In that process a lot fo things put in the structure of the systems and everything else is explained but never understood. There are a lot of things ahead of time in all the systems. You want to travel to a dimension fo position in the U, you have to understand the strength of the soul of existence in that U. That you can match, you can interact, you can elevate your soul with but still keep the soul of humanity or human race on it, in it, within it.
Q: Thank you

Do you want to go on **commercial Break** ..>> (2:47).

Any other questions.

Q: we are a particle of the Sun that is the maximum creator and our souls create our physicality. if so why does it do it, for what? If it must, evolution evolve to reach the soul? (2:48).
repeats ..
K- It's part of natural progress of life. Nothing we can do with it. It's a natural process. Nothing else.

Q: You said we are going to have an EU in each city ..
K- We'll start with one unit and see how it develops.
Q: maximum 12 (2:50).
K- We prefer them to be at one center .. about 1000 sq meter.
Q:
K- Because of the Earth G fields is too strong, so we separate it.
about 3 or 4 meters off the ground.
The KS of the country have to back it …
(2:52).
Bret: Hello
K- Hello stranger.
B: I am not a stranger, you know I am in the background.
You have to be 20 feet off the ground to get away from the fields of the Earth.
K- what has to be … you can be 100 feet it is still at it.
We have facilitated a system inside, that within 3 or 4 meters we are pretty safe.
B: I am saying in general ..
K- would like to introduce yourself.
B: My name is Bret ?? Baggart, I have been around the KF from almost the beginning. I am part of the Core Team,…
K- Bret is one of the 12 Core team of the KF US citizen.
Any other questions

Q: So we envision the location and we are drawn to it?
K- If you elevate your soul to reach that position, yes you can. (2:54). Understanding the process, just not to vision it, visualize it. To understand the reason why and how.
Any other question.

Q:

Q: What plasmatic fields forms between a N Fe coil and normal one in saltwater?
..
K- There are all different conditions, they create different M field strengths, that's all.
(2:56). Q:

K- It's all the definition of the field strengths ..

Everything you add or you put you create a new dimension.
R: How would they find out what plasma field forms between these items.
K- It's just measuring the strength of it. It's like we know the Zn and Cu create a near enough C field. It comes by experience till the coming time measuring tools can tell you exact size.
R: in the mean time is that part of feeling the fields?
K- understanding the strength difference and how and why. You see Fe and N Fe are 2 different field strengths, even they are on top of each other. That's why they are separated. The top layer Fe has totally different strength then the N ones strength. Each layer creates its own fields, its own condition. (2:58).

Any other questions.

Q: different intensities of light.. they were flickering ..
K- can we see it. ..
R-

(3:00).
K- We see that with most of the video nowadays .
R: .. we should do a little more research .
K- We see these quite a lot .

Q: I wish to join with doctors …
K-

(3:02).

(3:04).

Q:
K- the systems will be bought by the company setup in that city ..

(3:06).
Q: we're just doing a Corona system for person in Germany .
When it comes to KS who collectively get together
K- Yes of course, when many KS gets involved the better it is.

The UC decides …

(3:08).
Every 10,000 of it is 1% share of the company. So if people want that share it will be allocated. That's what has been done in Iran …

From now on we try to spread the knowledge rapidly. ..

(3:10).
Q: Maraneds ..
K- Medical doctors ..

Q: How long does it take for the medical doctor to be trained?
K- It will take 1 week, all the teaching will be recorded after the first week..

(3:12). And then it goes through.. gradually the doctors decide how they want to handle the patients.

Q: Is there a guarantee if something happens to the machine, it doesn't work , it would be mended .. ?

K- What do you mean.
Q:
K- No the machine works for every reason, the only thing is if the field is set for the case given. It's not the machine doesn't work. the machines always works. It's just that. .. we have had cases of people they benefited by and then they said it didn't do anything, and can we have our money back. and we done that and we seen what happened to them. the system is set for the enhancing the tissue or whatever it is set for ..

Q: When can we order one?
K- Today.
(3:14).

Q; Even in Europe it is set.
K- Yes .
Q: Is there any other U exist which use the same law adversely .
is there any other U which doesn't follow this MG fields.
K- No it cannot be created.
At the moment we are trying to conquer the Earth to understand it.

Q: Even the soul of the stone .. elevate ?
K- the state of the soul is understanding of the state of ones self.
Q: The stones I said. (3:16).
K- Put it this way, you don't expect the stones. You reach mutation. You know in Farsi say, it is how you elevate the soul to reach to what extent
Even the stones have a soul.
Q: I have heard that souls that are not good they might become part of stones for long time. before they get >>
K- We can hear anything we like.

Q: Because the people who do bad, nobody punishes them, they go where?
K- We are not aware of their punishment, but in so many ways, they find their own positioning.
Q: .. that correct, So you say a stone by waiting a long, long time and they might elevate?
K- It depends, if you believe in the transmutation of element you change a whatever to gold, which has a higher order, which means higher strength, which means even the Fe can receive fields, that in the strength of its fields can behave as a gold in respect to its environment. And there is no limitation in the field strength of the any entity. (3:18).
Shall we call it a day.

As we seen today we have started a new process for the KF as the knowledge and the T will come directly ?? to you. This is the time to start and we support it, and the KF Austria as a source of the T will develop and deliver. And now it is in the hands of the KF KS to move. You wanted a system to be in your city, now we facilitate it, we back it, and we develop it. And then maybe these centers become the centers of excellence over time. But my advice to UC, EC members, and .. EU is try to be correct, try to introduce

equally across the whole planet, and all the nations. In so many ways, be impartial to place of birth and language you come from. Look at the benefit to the totality ..

(3:20). we deliver more to be done .. we have literally put the whole backing to the F …

from today we understand the principle structure of creation, what I call inception to its final limitation as a body, be it the planet, be it plant, human body, or a stone, water, or gas. Now we understand more, the way the life is created in U.
Thank you

As we head to 21st of October, from there on we start teaching knowledge which is never been known by man. Opening of the space T which adds to the enhancement of the knowledge and the soul of humanity.

R: 349 KSW (3:22).

END

350th Knowledge Seekers Workshop; October 15, 2020

KF wants to have an EU in every city on the planet
5 Month Phase of Deep Space Teachings
I will introduce physical systems, that mankind can go through the transmutation
We are the Messengers of the Universe
We teach you to be able to go through the transmutations of the energies of the U
World leaders to negotiate the path through the full interaction and interface between humanity and the UC
Physical Structure of Man is Like Galaxy of Stars
Mankind's Beauty - Industrialization in the Universe
Every Material in U will be Available to Man
Details about Carolina Attacks on KF and Her Behavior, and last time to discuss it we have to move on
STP Falls in Love with Married Woman - Level only of Physicality not Soul
Tells what Satan and satanic mean
Teaching on how to calculate Inertia, has to do with magma
EU has nothing to do with Med-beds

ENGLISH TRANSCRIPTION

Enhancement Unit in Every City

(:07). … As we announced last week **KF is launching that every city will have 1 system of EU and this will be part of our work from now on, to make sure that every citizen on this planet has the right to receive the benefit of this T**. Many of you have been trying to raise the funds to meet the minimum demand of the work of the F. In that process you are trying to find other people (:08). To make this easier for all the KS, we advise to do as we done with the others, to just go the KF website, where EU is and put what you want to put for EU for the country you want participate. As people from different part of the world, different cities of the same area, would like to participate in that, we add it up and we tell you what it is. KF will make a platform, how much is received from each country and then can put in that country …

5 Month Phase of Deep Space Teachings

The work of the F carries on the same .. past teaching … KF as we said from 21st, next week, we'll go into a 5 month phase as a deep space teaching. .. the teaching will change. this means the KF KS will be able to be taught and we think we have reached that level of understanding for all of us. **The way to survive in the space. (:10). It is easy to fly, and to takeoff and go somewhere,** but what is the outcome of going somewhere? What would you see, how do you survive, how do you interact with the environment, what is the purpose of this travel, what is going to happen to your body, what is going to happen to the environment (where) you arrive? **The way we care what we do on this planet, when we arrive at the destination, our presence can be a joy and adding to, or our presence, with the field we carry, with the AA strength we carry can be a poison to the citizens of the position. We do not get there to learn, we have to learn before we get there.** And this is the purpose of the teaching in the next 5 months. .. what happens to your body, your AA has a H and N combination, and in a given destination, N is in the form of liquid, N cannot exist, the M field of the N is something which the position does not create. Does your life end, you don't enter, or you enter a position that it brings demise of your life, or other condition.

5 Cups - How the Fields Interact

This is the purpose of the teaching from now on. In preparing mankind to be able to survive in the span of the U. (:12). This is why we taught the making of the 5 Cups, for you to become aware of the interaction of the fields, and materials of the environment, the strength of your own existence, material and the fields which you are created of. Now you understand where the extension and merger of the teaching comes together. Many of it for many of you, will be theoretical teaching, because you cannot see it. But in entering the EU in traveling in system which are equipped with EU makes life, understanding of life, understanding of the living in the depth of the space, essential. You got to realize that mankind has become in the past years traveler of his own space by aircraft, by going to the Moon, and now travelers of the space by being able to go beyond the boundary with the gaining of the new knowledge. We lay down the foundation for this work, and for man to be able to travel in the depth of space, and this is **the reason we brought you the understanding of G, M fields, Inertia, the physicality of yourself, whatever energies hold your physicality together in communication with each other, which**

you call the STP, and the total field interaction of your physicality, what we call the STM with its environment. (:14).

Your Soul is the Solar System of your Existence

You've got to realize, which many of you have not understood, **your soul is the solar system of your existence. Your physicality is that Earth**, Moon, that Saturn within that structure. And now that man becomes a partner in the depth of the space with the UC to explore every corner of this Unicose, man needs to know what is there for it to be ready to see, to fulfill, to protect, and to be as one with the rest of the creation of the Creator. You will see that the development of the new T, makes it essential for all those who take steps to leave this planet, to understand that they need a next step, a next structure, next development in protecting the STM and the environment which the soul can exist, in the new environment man arrives in. We don't put you in a spacesuit, you make yourselves an environment that your souls can exist , protected, but the same time being able to survive, collaborate and enjoy different conditions of the U. The development of the new deep space T, from now on, for the next 5 months will bring mankind ready to be able, not only takeoff from this planet, not only go to the Moon, Mars, to beyond other stars and galaxies, but to be able to walk on there, be able, (:16). not only be trapped in the spacesuit or spaceship, but learn how to change the characteristics, mutations of his own soul strength, that it can exist and operate to that environment. All these knowledge takes man centuries to understand, but in the teaching of today and in the coming time we'll lay the foundation for it.

Given Energies for Physicality - Trans-mutate to the Environment you Land In

As I explained … when you go to the space, and you are fed, and **you are given the energies that you keep the dimension of your physicality, would you need a blood circulation**, the eyesight to see, .. the ear to hear, do you need the stomach, liver and kidney, when you have no blood to ?? operate it is there a need for the heart of the man, then where does the STP goes? Those we see that travel the depths of the U, and land on the shores of this planet, have been through it. In so many ways, they adapt, **they transmute into the shape of the man**, then they land on this planet, not to change when they arrive. In so many ways, when you want to be a marathon runner you train how to do, work, (;18). what to stop, and what to take care of. **Those who travel the shores of this planet and we see them in the form of, mainly human shape, or those near to human shape, they have gone through the transmutation of their souls, prior to landing on this planet**. Mankind needs to learn that, .. needs to learn to use the strength of his soul, to the strength of the environment of the position, to conversion of the shape of the man, to the dimension of the physicality of the ?? position. Which means you'll exist in the environment, prepared for it, as you wear a spacesuit to go to space, you change the conversion of the strength of the soul to fit the environment of the Earth when you land. With that enforces by itself, 2 legs, 2 arms, an eye ?? look, but in a way you live through the eye of the soul of the presence . Mankind has not moved in the first step to understand his soul, let alone to **be able to use mutation of the strength of his soul to convert to itself to the existence of the position and the place**. These are the teaching

which will come in the coming months, many of it, very radical, many of it you have never heard of, but you have to, and you have to be prepared if you see the future of the man in the deep space.

How to Use the Energy of U for his Own Existence

There is no end to the resources of the creation. In the coming time, we'll show how you can produce any elements as we have shown before. We will show how you can overcome any diseases, (:20). which is AA based, and any change in the strength of the fields as viruses. And then in this process mankind learns how to use the energy of the U for his own existence. For interaction of the fields, for confirmation of his presence of his soul.

Take STP without Physical Dimension - Fit into Any Dimension in Universe

Mankind has to learn two fundamental points, as he is aware, but he needs to understand, one is **how to create interaction in the soul of his physicality, with the soul of itself, that in interaction of the two, and the interaction of the third**, creates the condition of the existence in the presence of the dimension of the fields, which means if mankind learns to take the STP without the dimension of his physical dimension, then in interaction with his soul, and as a solar system interaction, with the soul of the environment, man will fit into any dimension in the U.

I will Introduce Physical System for Mankind to go through Transmutation

In the back end of the 5 months **I will introduce physical systems, that mankind can go through the transmutation**. In the later part of the development you'll be introduced to systems you have never seen, but will become part of the norm of the space travel.

Many will Not understand the Coming Teachings - for Later

The teaching in the coming weeks, (:22). will be so advanced that many of you will not be able to follow, and it will take many of you months, years, and centuries of understanding through your development, the consciousness of the existence of your soul, and your children and your offspring's. **The teaching for coming months is not for instantaneous absorption and understanding, but is the guideline and message** for the travelers of the future, on Earth and beyond.

We Are Messengers of the Universe

As I said, to the Iranian KS, we are the messengers of the U, not the Methi or Messiah. If that what you see, we taught, it's the shortcoming of your own understanding, as we are, as we said from the beginning, **we are the messengers of the U, we carry the knowledge of the creation from the beginning to the end. We manifest ourselves in the physicality of the man and speak the language of the man, but in essence we are not. We are the soul from the Soul of the Creator**, and we teach ?? the knowledge of

the space time, is the language of the place, messiahs, be it Christ, Mohammad, Moses or whatever you call it. But in essence we are the messengers of the U, which means **we teach for the races how to learn to exist within the span of the U**. Each planet, each solar system is like a little village with their own tradition, and their own ways. As messengers of the U, (:24). we bring all to understand one common language, and to speak and behave in that dimension. **My work, to complete the work of the past messengers is completed, and now my true essence and the reason we came, will be taught in the coming months**. How to take man and humanity from the village of the Earth and to teach it how to become a citizen of the U. Up to now we completed, what Moses, Mohammad, Christ and other scientists on this planet did not complete, that we bring you to the platform, zero platform of the knowledge of the U. **Teaching from next week on will be very much in the depth of the understanding of the motion of the oceans of the fields of the U. How would you like to come out, as a mermaid, as a fish**, or as a man? You choose, from own on, if you learn that dimension, living on this planet will become easier, because your understanding of the higher order, becomes the norm. You played with Gans's, with everything else, but ask yourself why did we teach these? Why did we bring you this way?

Why have we introduced the EU, why have we introduced new understanding of the new physics, chemistry, biology as a collective one size. (:26). It's mankind who has pigeonholed his level of understanding, single interactions - I become the physicist, double interactions - I become chemist, triple interactions I become biologists. But in essence they're all one. As I said .. you keep your Methi and Messiahs, that's your job, but understand what is to come, and evolve that you can survive the span of the U ?? as your soul, or interaction of the STP and the STM, as one being across the span of the U.

Mankind has not managed to overcome what we call zero gravity, a few kilometers away from itself, in what they call the Spacelab. Mankind has not managed to walk on the surface of the Moon without equipment. Mankind has not managed even to reach Moon in the instantaneous existence of both the dimension of the Earth and the Moon. And he still needs days and days to travel to reach even to the closest object to this planet. Now teaching the man to be able to travel the span of the U, in a snap of a finger, is very far fetching. But in time to come, those who elevate in the knowledge of the U, will show the others the true job of now taking mankind to the UC starts in the coming weeks. As we promised, and the knowledge will be very sweet, very short, but in depth, (:28). that it needs the true understanding in unraveling, the what we call the essence of the creation in the dimension of the interaction of the fields of the U. And those who elevate to understand this order ?? meets their Creator in essence of the their soul. Now in the coming weeks, months, we make you to understand, and comprehend. **We teach you, and guide you to be able to go through the transmutations of the energies of the U**. We'll show you through enhancement centers how you'll interact, how you will come in touch with the men of the U, with the creatures of the Creator.

Some of the EU in the specific collaboration of the governments will be made as a point of interaction between the governments and the systems of the U. .. . **we'll bring the world leaders to negotiate the path through the full interaction, and interface**

between humanity and the UC in the coming months. .. the interim course, and interim people who we trust, who will see these transactions through will be the members of the UC, EC, and the Mozhans, who have been elevated to that level. **The true work of the, what we call, "very few,"** (:30). becomes apparent in the coming time. **We will manifest in some of the EU, the presence of those who you call aliens, that we can see them, we trust them, and in the process, within the structure of the EU we create the condition that the STM meets with the soul of the presence of the "men of space," within these systems,** we make the EU a point of interaction, where we create the condition for existence of both lives, of the man, and men of U, in the true essence of their creation to negotiate, to understand and make the path easy for the rest of the humanity to go through the process of, what we call, unification of the STM with the rest of the U. We'll appoint a number of world leaders we trust to head these negotiations through the UC members. As I said, many world leaders will go into these Units and become the negotiators between the man and the UC. If you understand, we announce the 5 Seat systems, that's not for the flight of the man to positions on this planet, but it's there as a point for the leaders of this planet to meet with the leaders of the UC, appointed delegations to negotiate the path, to teach the man the way to change the behavior of the animals on this planet, to change the condition that the Earth becomes a peaceful planet without the need for abuse. (:32). A planet without the leadership, a planet where every man leads their own lives. The EU which you place in different parts of this planet is the way that we elevate the soul of this planet that the man and the totality can come in the interface with the reality of his own existence and the UC. **If the world leaders decide to put (aside) all divisions and make One Nation of this planet, they will be taught the knowledge that brings prosperity** and peace, and wealth of the wisdom of the knowledge to every citizen of this planet. Not only man, but those who live here amongst us, as different names we have chosen for them, as the lion ?? and the lamb.

The teachings and the demonstration of the use of the EU for point of meeting by the world leaders and the UC, will be extended to the point that most of the citizens of this planet will become part of, because their soul creates part of the soul of the creation of this planet. In so many ways, as I said, in other teachings**, mankind will move in totally different direction in the coming weeks and months. (:34). Where financial structure man has created will have no meaning, and the cities you have built will become a place of history, where the man lives where his soul is happy. Where the man is in love with giving and taking from the creation and the Creator**. In so many ways, we'll turn on the speed up, as we find ?? to teach mankind the first alphabet of the life in the U, needs a lot of understanding, devotion to peace, devotion to unity, and devotion to be able to accept what comes from the beauty of the joining such a vast ocean of knowledge, which has been kept away from man, by the man's misconduct himself. What would be the outcome of all these works, depends primarily on KS who have been ?? in the format, those who have taken steps to make sure the knowledge, not only through the term of physicality, but through the STM has ?? respect in equal earnest and justice.

What we have taught you is in fact the structure of your own existence in the U. (:36). Do not forget, "**I made the Man in the image of Myself," and this image has to live**

both in the dimension of physicality and the soul. And mankind will be taught how to be able to use his physical dimension for existence of his soul in many dimensions. Loving becomes part of the life, living is to love, and this means giving unconditionally not only for the human race, but beyond. As I have said many times, I have no fear of leaving the physical dimension the body of the man, but the responsibility is there to teach, to complete the mission that one can leave in peace, and in the coming weeks and months we'll teach that way. We will shake the cornerstones of the creation of the life on this planet, the structure you have set as citizens. Your banking system, your social structures, your health, where no man will get sick anymore, as on the primary energy transfers will bring the balance to the soul and the physicality. This is what man has never learned, ?? in the fear of his existence. He has made temples and statues and worshipped different lights, to safeguard from it. But he never understood he could use his own soul as the light of the existence to overcome. (:38). We have taught you many things in a very simple way, that as many people could learn. We have shown you many things. From now on, those who are there for you to complete to understand your own structure, your own working, now you learn ?? the working of ?? Where the ?? lines of existence, what you call the STM is the cornerstone of every ?? peace in every dimension. Mankind will learn to exist in different dimensions.

.. (Rick can you allow) (:40).

In so many ways, mankind has to understand the next step in the evolution, in evolution of the STM and with it to understand the position of the STM, and in that process mankind has to become evolved in knowledge, in the new knowledge, in new T which is unknown. But in that process we try to teach both. In so many ways, the STM becomes ?? which is of the physicality of the man but not the physical ?? ..

Our soul becomes another star in the totality of the creation, but in essence it might keep the image of its origin, where man stays, in total transparency of the fields, without the dimension of physical existence. (:42).

Physical Structure of Man is Like Galaxy of Stars

If we look in the depths of the oceans of the life, and the physicality of the man, every organ of the man has a center point, which creates the condition for itself. And in that process it creates to be like a star. If we take the physical structure of the man, the way we see it, and keep these points, center points, the stars, the soul of the kidney, the liver, the heart, and the rest. **What we'll see, we see nothing but a galaxy, galaxy of stars, different strength, but in fact in totality, very much the shape of a man**. (:44). In essence, humanity or mankind will see themselves his physicality as another galaxy, a collection of ?? the stars. And by feeding from soul to each cell, to each star can change the condition, then mankind will find that the life becomes indefinite, life becomes ?? more, but man to live that life he needs to understand the work of the fields of the U.

Interesting time ahead for man and mankind to open new universities, new institutes to learn about energy fields of his life and his existence in the U. And spend time and contemplate on how these energies can be used, not only for the burden of mankind, but the citizens of the U. In the coming time **many of you, in my lifetime, will embrace many of those who you call, aliens, with love and care, the way we do with your**

lovers, children, and your parents, as you realize you are all made of the same and you all participate in one dimension and the other. (:46). **for everlasting confirmation of the existence of the Creator. Nothing else**.

Mankind's Beauty - Industrialization in the Universe

In the coming weeks we will show new materials, .. materials which belong to the deep space, and never seen on this planet, for man to learn new ways. To bring the beauty of the man, what you call industrialization. **The application of the new knowledge for the benefit of the others. This is one of the beauties of the mankind, that he can convert the knowledge to an existing formation of the things that he can enjoy, that can be used by the others to enjoy. Small tools to the most advanced systems in the** U. In a way, mankind beauty and ability to be able to change and convert the knowledge of the U, into systems and equipments that others can be enjoyed, is the cornerstone and beauty of this race, not only loving, but being able to translate, and conform and confirm different ways of enjoying the beauty of what has been created. Industrial revolution in the level of the U will create so much joy, (:48). and bring so many to this planet, that the Earth will become the cornerstones of what we call, "Industrialization of the Universe," for them to see and confirm the beauty of the existence of the Creator and nothing else. Mankind does not only have the ability to love, but the ability to convert the knowledge into physical things, as you call it the car and the others. But in the U this is a rarity. It's a very rare thing to find races who do these things. The majority of the races use the energy fields to translate. Mankind has the beauty of translating and transferring materials into physical tangible beauty. This is why many travelers of the U come to this planet. To love and learn what you call, "industrialization," what we call the conversion of the ?? and fields of the Creator into beautiful objects that can be enjoyed across the U. where it can be shown. Interpretation of the change of the fields to physical dimension of anything is one of the beauties of the man's race. And one way or another, this race is ?? growing much faster in that direction in the dimension of understanding of the conversion and creation then any other race in the U. Maybe this race is blessed for the presence of the Creator, in the ?? past ?? (:50). Mankind will show his beauty not only in loving, but in the new dimension we teach. Everything is not bad on this planet, even though it looks that way to its citizens. We have come to bring peace and prosperity to the race of the man, in that process we have seen many ?? wrongs, but forgive, but not forget.

Every Material in U will be Available to Man

We teach you **how to use the positions in the U to tap into the energies and materials and the beauties of that point without ever traveling to that point. In a way, you don't deplete, but you make the replication of that position at the point of the presence of the STM, which means every material in the dimension of the creation will be available to man**, every field will be available to man at the point of the need. The way you tap into and get your Cu from Africa into Europe to make your Cups, now you do the same, but through the transmutation of the fields from far distance stars. You don't mine, but you transfer energies to create that condition. (:52). We use the position as the reference and create conditions within the structure of your own ?? to replicate that

fields, that on Earth will show itself in a new condition. We will teach you how the materials you see in the other parts of the U to be manufactured and to be used on this planet by creating in a field dimension transparent, that you can manipulate the material ?? they still ?? exist within their own environments but within the environment of the presence of this planet. What does this mean, it's literally being able to produce the material in the spacesuit where you can put your hand in it , but both exist, the environment ?? of the material for its dimension to confirm, and for you to be able to manipulate to show its beauty. In the **past few weeks the number of KS who have been enlightened, have tested and confirmed ?? with the support of the KF to reaching these mutation points of energy**.

It's for You to Tap into Knowledge through your Soul

Many of you will be lost in the maze of the knowledge to come, (;54). but **if you listen to this knowledge through the soul of your existence you will receive the knowledge and translate it into the dimension of the STP**. In a way we'll ?? leave it, according to the knowledge and the teaching within your souls. And it is for you to be able to tap on to it.

Become Aware of Soul through Devotion and Detachment

As a KS said, **I don't even know where is my soul,** let alone trying to work with it. **You become aware of your soul when you mature to the point of understanding of devotion and detachment. We will introduce technologies that allows you to coexist with your soul and physicality in the dimension of the fields and not in the dimension of matter state, that you gradually come to understand and operate within the two, and convert as needed**. Initially we'll show these in the EU, and then as you learn how to do it, as I said before, it's like going to driving lessons, learning how to drive a car, we will teach you in these EU under specific construction of them, to be able to see, to embrace your soul. I made a promise to one KS, you should be able to embrace the soul of your loved ones, (:56). to find peace, to find a new dimension of existence. Many of you have been waiting to see the soul of your son, wife, parents ??? … in the coming time we are setting up in the EU, this becomes possible. One of the KS in the purity of heart has already achieved it. **Many other KS have touched it, the strength of it has frightened them**. Now this become a known, as you understand the life is not in the dimension of physicality, but is in the dimension of the soul of the existence in any position in the U. As I said, we start laying out what is to come, before 21st March 2021 ??? (:58).

Are there any question?

Q; If you can use the EU to interact with the UC, can you also use it to find people who have been kidnapped and find the perpetrator?
K- Yes, this is part of the beauty of this T. Many world leaders and criminal organizations around the world will fight for these systems not to be shown. As their conduct will be opened up. This is what we said, we bring in the justice by true operation

of the soul. These sharing of the knowledge and T will be done. (1:00). We'll bring it into the court of justice that no man can lie. .. I cannot lie you see my soul.
R- What would happen if a bad guy wanted to use the EU to find someone to kidnap?
K- That's impossible.. you'll understand the wrong intentions will not be possible, because working through the soul ..
.. very soon courts, prisons, hospitals, will be left in the doldrums of the history of the mankind. (1:02).
Q: The soul is central to the teaching, can you tell us the levels of soul awareness that one can attain?
K- All of it, it depends on your acknowledgement of ?? existence, it's you who puts limitation. We choose the level of peacefulness, love and care, how much knowledge we want to have.
Q: application of EU from KF, (1:04).

K- KF is prepared to participate up to 95% in special cases. we will not meet all

(1:06).
Any other question

(1:08).
Living correct conduct and the others need it more than me
Leaving it to the UC
Do they trust the soul of the UC what is best for humanity.
this is the purpose of the KF, detachment from the physicality. Have the KS matured to that point .
(1:10).
We are not creating another Vatican …

Any other question. (1:12).

Details about Carolina Attacks on KF and Her Behavior

Q; Why is it being said the 5 Cups alter our DNA, those people talking to disassemble the Cups, are they afraid of being exposed?
K- Let him speak. I made a promise I would ?? speak ?? but I speak the correct way ??

Q: (1:14). more about the 5 Cups .. are these people afraid of the T coming forth. can you speak more about this.
K- Yes, I have been told to be correct as we usually are. The only person who has brought this and is using scaremongering, is my ex-wife. She's been pushing this through to create a secondary foundation to break it up. This is to the KF is so vast. This lady has become part of a satanic group, (1:16). and they are using ?? to frighten people, for development of the T that they can use it to damage the F. She has no knowledge, she has only sold her body and her life. And now she is trying to use STM to frighten him. This comes from a person with no knowledge, and now in the structure of the development of

the T, out of the range of the knowledge, have picked on this on, because of seeing how they can break up the KF.
The fields of 5 Cups, if it dangerous for you, you have 7 Cups you call 7 Chakras. (1:18). Does you 7 Chakras change your DNA. You have 2 additional Chakras which is always creator of your Chakras, which is your G and M field, and Inertia of this planet. In essence when people are ignorant of knowledge you can frighten them. This lady has no education, has never been to school, and now being, using the education structure of the KF with her ex-lover, who infiltrated the education part of the KF, want to bring this in, to bring man to literal illiteracy that they can abuse, We try to keep away from this in the F, as you bring this up, do not be afraid. If you are afraid of anything, walk away from the F, that's what they want you to do, that way they can keep on abusing you. (1:20). We advise you if you received anything like this send it to us. We said it in One Nation send it to the KF any communication you receive, these are going through the process of damaging the F. It is done by one lady we deliberately allowed to come in to find out what is the position to damage the F. She infiltrated with her lover and group, from Dubai Conference, and we have all evidence, they want to see the humanity to be paralyzed that they can keep on abusing. The KF management for over 3 years, since Dubai Conference, 4 years has been monitoring the behavior of this lady, the adulterous life, and how she has become, using stone and lights to control people. It's all in black and white, we are not making accusations. So now that they see the F developing to the next phase they try to stop. That's why she was immediately put out of the KF as we saw the final move. She was missing for 2 days and it is in the court, with another man, she has confirmed it herself, with the same lover. (1:22). We open for you to understand that you are dealing with an indecent behavior person, and she ahs done this all her life. You have to understand how they used the position of the KF to now fight a new, to cover their misconducts ?? F ??
They even used the earring as a wedding gift, the stones of it to change things. We will open these things, you have to understand she is involved in satanic work, by using stones and other things they use, this is all part of the court, we are not talking out of line. And her confirmation that these stones are used. She is a manipulator with a group she has gotten involved with, and we are very open about it, because if we don't do, when it comes out, you'll find out, how they infiltrated, (1:24). the F. And it's our own confirmation that, she is involved in these things, not us, and it is in black and white, before she deleted these things, it's all been scanned, screen (shots), and it's in the hands of the courts. This is not my private marriage, this is the way they used my marriage to harm one fo the largest F in the ??
We will show how hard the KF management has worked in the past 4 or 5 years to protect us from her conduct. (1:26). And we always believed in betterment of man, man will change, will improve. But we did not do anything until they started attacking private teachings, then we knew we had to take action.

There is much more she has written, we have seen, and there is much more she has put on the Internet will in the court. And we have asked for a custodial sentence for her, because the damage is beyond the marriage, it's to other aspects of the life as well. It has been my private marriage but I lived a very open life, in so many ways, we all are part of this family. Now they try to take the F for ransom, the ?? is the first, the sister is another, then

other things, adultery become a known, and our children become open to abuse, we monitored this, we protected for a long time , but we made sure no one in the F will be harmed. We did not bring this to public, when it was brought to public, we reacted immediately. (1:28). If you go missing 1 hour in your marriage, it is questionable. If you go missing for 2 days the marriage is over. This is exactly where the has been for the past 3 years. Planning how to destroy the F, and this is the last time I would like this to be discussed, as it is in the court. And she called it a kangaroo court. It's no kangaroo court. Evidence is direct, we have brought the case to the courts for adultery and prostitution with the full evidence. We have got her own writing in satanic work, (1:30). and believing the stone will appear with the beauty fo it will be shown. This is not a normal human behavior, unless you believe in certain ways. In so many ways, this matter has to come to rest and I ask you please, if ?? delete ?? anything from this woman, unless you believe in adulterous life, prostitution, unless you believe these kind of things keep the lines open, but send us a link, because she is deleting everything, everywhere because she knows she has actually put herself in a worse condition then before, by writing so much. She is deleting everywhere. If you ?/ let us know. It's part of the structure, they try to destroy, ?? exploit it, and divide the F. And then come up as KS in kangaroo court. There is no kangaroo court, we should have done this to her 3 years ago, where she went missing for 2 days after the Rome conference with another man. As she was found with a sister and the man in the hotel, in Rome. We go into details, this was not made up and members of the management of the Italian police force was fully aware of this. WE tried to keep calm and protect the F, now that she put so much on the Internet, we are responding to you, because you are the ones receiving it. (1:32).

If you receive something from a scientist of the KF, Jalal, Arman, Dr. Guatua, Rick, to advise you to do these things, we listen. But this is all started as scare mongering, dividing the F. She has divided my family, I have not seen my son for 5 months. (1:34). ?? in the hands of a bunch of pedophiles. What do I believe my child, or following the F. We have been very patient in protecting the F ..
My marriage was over 3 years ago when she came in and said, can we start fresh. I said, what have you done that you need to start 25 years fresh? You decide as a man, would you keep a woman like this, you have a husband or a wife? (1:36). who does this? Then you believe the woman what she says to you. While I was in Amman meeting members, officials of the government, she drove 100 kilometers to see the lover thinking she cannot be found. Meeting the EC, member of UC, the Italian police to find, she was hiding in a hotel with the lover. Now you understand how much, what kind of man I am. My marriage was over from the Italian conference. And now you can understand, if you can lie to the husband, you can lie to the rest of the KF to destroy the F. (1:38). I did not bring this in public, she forced it, she published hundreds of messages to thousands of the KF KS using our channels. Now you have to know the truth. And this is not the first time she is an adulterous in our marriage, ?? weakness of the man ?? And these people are prepared to come to the court to give evidence. So you decide what is given to you as a most important piece of knowledge. My marriage was over 3 years ago when she went out openly with another man. I would like to stop this because the F is part of my life, it's all of my life. As she has put it in public now you understand the reason why. (1:40). I went to China for 2 years because I couldn't handle it. I would like to close this subject,

and if you decide this is the way you would like to live, with the stones and the adultery and prostitution, take her side. If you want to live the life I live, and you live ?? this is a scientific development organization stay with us. At the time the whole KF Italy, the security apparatus of the KF went to override to find her, and she was hiding in a hotel with a lover. So it is not made up, in that week there were over 10 members of the KF securities looking for her while she was hiding. (1:42). And we found her through the husband of the sister of the lover. He told us where they were hiding. I would like to close this case and I leave it to the KF KS to do the same.
Any other question.

Q; He saying that's it you clarify a lot.
K- .. **We know she infiltrated KF Brazil to break it up**. .. and the Iranian KF to break it up. And this was becoming intolerable. Everyday we received hundreds of messages of what she is doing. And we decided to go open with it, the copy of what I tell you is part of the court, and we go in with full evidence in her own writing of adulterous behavior. (1:44).
Any other question.

Q: the so called the miracle phenomenon around the world
in preparation of the New Age
will change mankind's development?
K- **When we come as the messengers of the Universal Messengers, we come in different shapes and forms, and we come in the structure of enlightening the STM. Some souls become aware of our presence long before the others, and they inform**. In a way, we come to take mankind to a new level of understanding. (1:46). We come to the point where collectively we transfer knowledge not only to the STM but to the universal Community. In so many ways, one by one, the souls, after they get enlightened they inform people around them. Like you KS, you learned about the Gans, you see the beauty of and you teach it to your neighbors … and some of the KS of the soul which have been with us as the students of man, long before we came into the public domain, they do their work. You got to realize, as I said to the Iranian officials, when I wrote the first papers, first patents about Nano batteries, materials the Iranian scientists and took it and ran with it, and the Iran became one of the leading Nano technologists in the world. Initially through that paper alone. The same process goes, and some people hear the voice, and they know of our presence. You got to realize … we are born in the physicality of the man, we are trained to understand the work of the man. (1:48). at a given point, the soul of the Creator opens up, which lead to the creation of the physicality to start. I cannot teach about energy in others if I did not have a degree in nuclear, and in that respect you could trust a scientist, not somebody who just talks. This time we came to what man believes at the edge of the knowledge and T, where in essence we carry 2 souls, the essence of the soul of the Creator, and the essence of the STM, and two exist as one. This is my life, and you have to understand, the teaching is done by 2 dimensions of the Creator, the knowledge is everlasting and is in both dimensions. We have to understand the culture of the man, .. the pitfall of the existence of the man, and with it we bring the knowledge of the Creator, that man will evolve. And this is the process. As I said, this cycle and the prophet of the soul, and the science come together in one, that

they can both be explained at the same time. I wrote this years before I opened the T, this way with the soul. It is not something new. The knowledge is the knowledge of creation. (1:50). I ?? have put any topics in about 20 years from agriculture, medicine, .. anything you have put. As you have not seen some you don't understand, some don't make sense to you because you don't have the knowledge. We introduced you the MaGrav, but how many of you have succeeded. **But the MaGrav is one of the most advanced T in the U. It's access to universal energy if you understand what to do with it, and most of you because of lack of knowledge of the cosmic rays, understanding the physical matter of electronic, you're all lost in it.** And as my tradition, I do not do, I show it, it is for you to achieve it. The same, the most powerful system given to you is the 5 Cups. Because you have to understand, it's like an alphabet ..
(1:52). .

(1:54). You relied on burning we showed you the way the U works on the M field interaction. That's all. you weren't aware of the facts. You couldn't see how the big works, we gave you the Gans. You wanted to see how connected ?? we gave you the ball, the ?? MaGravs in the fields of open space, we gave you the 5 Cups. There is so much knowledge, but as I said, .. you keep on looking the cup, the Gans's in there, but you don't look at what the Gans's the field make in that cup, and what conditions it creates. .. in our essence is enlighten the STM and with it to bring peace. So you see like the way you teach .. those who have received the message of the higher order they announce of the peace to come for man and the rest of it. But in essence the life comes from the same origin, depends which souls are enlightened. They are enlightened to the knowledge of the Gans, .. to the knowledge of peace. (1:56). You got to realize… with the knowledge we have and attachment of man to financial dimensions we could have created palaces and lived like the ?? leaders of this planet and become like others you have seen who by wealth trying to control man by vaccines and the rest. I never took that path, because the true god is the knowledge of the soul of the Creator ?? and I live a simple life as a man. It's much harder to live my life, then choose the palaces and temples and go the path mankind has gone in the past. I live amongst you, and I teach amongst you. When you know you can have more, and you choose less, you understand how we are, and how we live. I can make tons of gold, and live luxury life, and do magic's, and make places like none you have seen. … but we don't choose. this time we live amongst the people to elevate the man ?? I have made my home in your ?? souls, that's where you ??
Any other question. (1:58).

(very long question by Azar …)
Q: .. from a past teaching … the STP in heart, and then you have the STM in the brain. You said the connecting of them and the opening of the STM, the man has always been doing it. you made an example of .. high emotions
you send that emotion to the soul .. you get a stroke .. trying to connect the 2. how to create the energy field of STP to STM so we can open the STM …
(2:00).
children is connected by umbilical cord …

if we want to get the field from the heart to open the soul, .. are we able to open this .. can we go back to it or no.

K- The reality is .. in the womb of the mother you are connected to the mother through the umbilical cord. you have a reserve tank of parallel soul as the center. But in fact, you live in the world of liquid. In one instance, (2:02). you are born in an environment free energy balance of the liquid you call air, and you automatically change your filter form water to air. This is what I put to the KS as we start opening the discussion of man in the space in the past few weeks. Maybe we can bring ?? form next week to this week that we can start deeper next week. The biggest fear of the man is if we let you in the space without a spacesuit you die. But if you have managed to change from a water world to a less open M field we call it a gaseous world here. If I take you into space between the Earth and the Moon, the way the Russians do, give birth in a water tank. If now that your soul is aware, that you can exist anywhere in the U. and the mother you give birth to a child, not in the atmospheric condition of the man, but the atmospheric condition of the U between the E and M, would that child survive? Or because there is no air would that child die? My teaching, my understanding, my life in the depth of the space, it says the child will survive. Because within the structure of the STM and STP (2:04). will elevate to the position of the environment. But man needs that time of evolution that he can get to that point, that he can give birth in any position in the U, not just from a water to a gas, because they are all different density of M field strength. The man will evolve according to the space and time. No man who understands the work of his soul will ever die anywhere in the U from the lack of O, because there is no O. O as we say, energy mixture of the gases of this planet, has come to be absorbed the lung for the conversion of his existence. Now in the space we convert to the new standard to the new strength. So if you can go one way, you should be able to go back, or do we put the mother in the space on the gas mask, and leave the body outside in the space .. like the Russians, the mother is outside breathing air, the child is born in the warm liquid …

Q: …
(2:06). If I give birth at that planet, my child is going to get adapted to planet Zeus?
K- Of course, that is what it should be, because you got to realize, each environment has a given strength MG field. There is a need for our physical existence to adjust to that point. If you remember, this is something which a lot of you have a problem with, … (draws a plasma spiral) and this is why a lot of you have got stuck with this. This is always shown by the M field of the plasma. So you have life at this level ?? earth, so your cells have adapted this level, but you are part of the total spring, but at this level you still can live and exist, because you use the same strength. This is the imagination of the man that he will die. No. Man will never die in any dimension in the U, it just depends which strength you take. And at that point you can manifest yourself out of the strength of the fields of your body. And it depends if you tune into it. (2:08). Or you still stay independent of it, but create a connection and relation, you absorb the energy of the environment, and according to that energy you react, your soul to manifests itself in that level. Here is 1G, on planet Zeus is 10G so your plasmatic field at the strength of 10G will manifest itself, to keep the integrity of the existence of the soul. And then in that point it will manifest itself in physical dimension of what that position ?? gives ??

STP and STM have Different Agendas - Came to Enjoy

Q: .. soul came here to experience things on this planet . . I didn't understand was it the STP or the STM wants to experience?
K- Both, want to experience.
Q: So they both have different agendas,
K- **Yes, otherwise they have different agendas, but they both in one brain** ?? so I have come here to enjoy, ?? I make the table for you, and ??? , **The soul comes and the physicality is the servant to taste**, to give it the taste of what it is. (2:10) .
STM Decision Maker for Universe - STP for Earth

Q: So which one is the decision maker, the STM or STP?
K- The STM is the decision maker for the interaction with the U. The STP is responsible for what the physicality does on this Earth. And the two interaction manifest themselves as the emotion of the physicality of the man, both in the soul and the physical dimension.

STP Falls in Love with Married Woman - Level only of Physicality not Soul
Q: ..
Example, Jalal just got married and 2 kids, he suddenly falls in love with another woman. .. was that the STM or STP?
K- **The STP, you fall in love. because mankind has not learned to fall in love with the soul yet**. We have taught one or two, but mankind has not learned to fall in love with the STP and STM together. And if you fall in love in that level which is normal in the U. The condition doesn't come you fall in love with the next door neighbor or with a dog or whatever. (2:12). **It's acceptance of the totality to accommodate the love**.
Q: .. when Jalal saw that woman it wasn't his intention to fall in love, so how could it ?? be from physicality.?
K- You see **physical love comes from interaction from physical matter state of the body of the man.** This I have explained in many, many teachings.
R: Isn't that why they call it "falling" in love

K- Yes, you fall with your head on your .. and you break your leg.
One of the things mankind will soon learn in the span of the U, it's not that .. you are **becoming part of the UC, is you find matching M field strength on certain points with other creatures of the U**. As we come ?? the man's ?? And in that process you find out, your physical body's AA, and his or her physical body is got no, cannot or you will destroy or you will feel the strength will change the soul or the physicality of what you have fallen in love with, then you keep the love in the dimension of the soul, because physicality is impossibility. Her blood is an acid to your DNA composition. I have explained this in many private teachings.
Q: When this happens you are kind of being tested for your strength and conduct? (2:14).
K- It doesn't need a strength. It needs understanding.
Q: understanding of your conduct
K- ?? understanding of the position.
Q: So when you understand it you can overcome it.

K- Why do you need to overcome?
There is a big, big problem in speaking the ?? world. Do you stop loving your child because the second one is born. Or do you love and respect and you know the position of each child.
Q: Does it mean Jalal can love his wife and the other woman at the same time?
K- **No, it's understanding the love exists, but is, if the other position the love exists, then it can be respected**.
Q: So you just respect it,
K- **You have to respect it. The creation .. And then you find out the souls will find an accommodation for it, and they'll accommodate it, if it is done the correct way**. We are loved by mother and father, brothers and sisters, and by friends. And we respect each one accordingly. It's respecting that love and accommodating for it to nourish. (2:16). And if it is there to nourish it doesn't mean that you have to do this or that. It's accommodating ?? for it to nourish to its full maturity.
Q: The way talk about it is so beautiful ..
K- It is beautiful, it's nothing more than to give love, stays, and nourishes, it does not matter within, or with others.
Q: .. when I see compare the behavior, the way we understand everything is the field. ?? the human in matter state. we always look at things in black and white ..

K- **Let me explain what I teach is what is there. You have to understand allowing a love to nourish, if you can be part of it, or accommodate it, is part of the responsibility of the existence. But it doesn't mean that you can ?? kill it, because then you stand as we call it a punishment of it**. If we accommodate creation of love. You see, the problem is especially with the Islamic nation that you come from, where in Iran .. one woman is changed with the other one, new version, as long as you can have 4 cars in garage -- you understand what I am talking about? You'll find out in a traditional Iranian ethos, we respected as a woman, as a sacrosanct entity, the mother, the creator. (2:18). When you change it to the numbers of, you can have 4 of them, and you can change it with the latest model, as long as you kept 4 garages, you can't keep one garage outside. then you come to this problem, where you sit. We have to understand, what does, what is best for the evolution of the soul, it doesn't matter how, and who, and where we are. And that's the key, and that is what mankind has not understood. We don't sacrifice, we give to elevate with the pleasure of existence. We give our daughters to other men for them to love and be loved. Does that mix with our loving for them, or is it with that love we see the elevation of their love, their soul in the new dimension. And if you understand this in essence, you have no problem understanding in the process of life, does not matter where, and which planet. This is why in the discussion we had a few minutes ago, I allowed, because if there is elevation of soul let it be, but when it becomes abuse of the soul it has to ?? stop. We cannot imprison the physicality because we think we own it. (2:20). We have to allow the elevation of the soul. And that's the true method.
Q: .. that was very good.
K- It's not very good. It's the truth, the way it is.

Q: Iranian KS came to Linz .. Mr. Keshe god bless you.

K- Bless you ..
Q: It's always a pleasure hearing you, your teaching. … Why does the soul get punished for things physicality does.
K- Stop. The soul does not get punished. Soul gets positioned. Punishment is the characteristic of physicality. Positioning is characteristic of the STM. (2:22).
Q: .. when you mentioned people who do all these bad things, killing .. so the soul somehow gets broken down and becomes as small as a virus. So why would these souls become viruses ..
K- You see the soul find a position that they do not receive. It's the structure of the STM in elevation, is how close you can be, you can exchange higher strength, and receive higher strength. And this is what is the final destination of any soul. How much can you ?? receive that the higher strength you become the creator of. … in cosmology. when I see it or hear the scientists speak about it, it makes me laugh. You have this explosion of huge stars, that they explode and they create many new stars. And there is a regeneration of new life. In the physical life, we give life to a child, when it reaches point of maturity you become an adult, you can have a child. In the cosmology, star formation, and galaxies, when the energy within becomes so much, it's become mature that it can spread. (2:24). and create new life from one, and with it new galaxies and new conditions, it's like having new children. And cosmologists don't understand this. In that process it's the same as your soul. Now one big soul, with whatever is done, and it explodes into smaller structures, but in essence the all carry the attributes of the big one. And those who are weaker might take its distance further, or they take a distance closer depending on what they receive or what they give. **When we have such a position with what we call Hitler and the others, they find, that soul finds its position in a way that no one gives, in a way, no one receives, and so it becomes remote. It's like a star it explodes and the one which is part of it, ?? ?? characteristic ?? It's not a punishment, but it's what I call separation by strength of the field**.
Q: In a sense they get rejected more or less, isolated
K- they don't get rejected, they distance themselves that they cannot hold.
Q: .. You say a third of our population of mankind are visitors. Why would they .. come here .. as a soul they already know what this planet has to offer, why would they put themselves.. their soul could become sinful through their physicality (2:26). and maybe jeopardize their beautiful soul as an alien. .. and now they got themselves positioned where their soul would be marred and tarnished?
K- Most of the ones, now that we open the knowledge we'll be able to understand the separation, they are here in the existence of the soul. Which means they exist through the soul but they take physicality dimension to live. And many of them are here for hundreds and thousands of years. they haven't gone, there are people that .. move from one relation to another. that move from one city to another every time, then they start a new life. an old man or whatever. Because there is nothing else to do in the U. It's just to be occupied, I live on Earth just to do something. So you are here not to suffer or part of it looks to, but you are here as the passengers of the U. If you don't come to Earth, where are you going to go. How many satellites and stars have you traveled and seen. Part of coming and becoming part of the population of the planets like Earth, is literally killing time, as we call it. What is to you a thousand years is one second to them in the life of the space and the dimension they come from. There are some places on this

planet, not only here that have a physical dimension like this, that you know you go to a camp for 2 weeks or month. (2:28). They come to Earth for that camping experience. We'll become part of these in the coming time. Now that the knowledge is developed to be spread, we become part of this.
Q: .. God Bless you..
K- God bless you and your family. We learn as a human race that we travel to go see Niagara Falls and to see Rome. In the coming time we'll travel the space of the U to see what happens in such a planet and such a U. To many KS who are after the wealth of the F, I said the biggest money will come in the tourism of this T. Now you see planeloads .. In the coming time the tourist agencies will take your soul to the most beautiful place in the U to visit ..
What we call Aliens among us, now with the teachings and understanding of the transmutations, and transportations of the energies. (2:30). mankind becomes aliens to many others in the coming time. What we have seen, now we become of.
..
Shall we take a break … >>> (2:32). (2:38)

Q; so even a terrorist in the act of harming can be frozen in his position anywhere on this planet? R I think that was in reference to the EU uses of it ..
K- What does that mean? The beauty of mankind in the future, is that this word will not exist. What you call terrorist. What it means, to bring other souls to have a fear of. Like all the emails you received with the 5 Cups and the rest. It is the soul will get to a point that it will be satisfied. At a point, that it will never reach this point to terrorize or to bring fear to another being. (2:40). The word terrorist and what we see the present bombing and what we are used to, the very first one was done by the British in Jerusalem in the ?? mother history. the first bomb, we know in the present cycle and the word of the present terrorist, was developed by the British, when was about the building of the state of Israel.

The other word is revolution, we don't need to revolt if we get the other souls to understand, or
the needs of your soul. These are the things we'll see wiped out of the vocabulary of the mankind. It will become taboo no own will even talk about it ..
It's like cancer, (2:42). when you receive enough fields and understand the working of the systems, even with your own soul, put balance on a regular basis.
You'll give the same energy all the time to the same cells that you'll not need to get old to rejuvenate.
If you want to be seen as an old man or young man it will be that way ..
Once man learns the working of his own soul ..

(2:44).
Any other question

Q: If I go into EU and ask to understand all languages ..

K- Do you remember the cup and the orange, now you become the cup ..

(2:46). You go and read the alphabet to learn a language

But first man has to find himself.

Satan and Satanic

Q: Is satanic or Satan a kind of plasmatic field energy or an entity?
K- They come in both ship. And they both strength , ?? not shape. What we call satanic are those who take energy from us, and they us that energy which we give for misconduct. And that's as simple as that. Misconduct at the level of the STP, they never reach the STM, it's a much higher order.
R: does it matter if that taking of energy is voluntary or involuntary in a way.
K- If you take voluntary you position yourself, (2:48). if you are given, it's no problem, but if you take from someone, it's the same as putting your hand in someone's pocket and taking his money or wallet. If they allow you to do it's different, and then you find the position and use of the energy in the right way.

Q: .. (unclear)
K- You add to it .you don't loose .. (2:50).
Q: So when people drown is it that their mind cannot accept the transformation to live in the liquid environment?
K- We have already gone through the transformation, we can't reverse. Unless you teach it. It's like if you
The cycle of understanding the work of the soul, is understanding how your soul interacts with other fields and energy sources in the U and within the vicinity this is the notch mankind has to learn. You can sell anything you like in respect to it, but if doesn't work, if it is not of the strength of you, it does not work. and this is what all of us have to understand. (2:52).

Q: When we listen to your teachings, do we receive it fully in our soul, even though our physical understanding is not coherent?
K- Yes, yes of course you do. this what we say, we teach the soul of the man of space, you're part of that solar structure.
R: So if we have to hear it several times, it is for the physicality to catch on?
K- The soul has already been taught. This is the beauty of teaching this way, . for understanding the knowledge this way, we touch the physicality and the soul at the same time.

Q: Is Earth a matrix for us to learn and play .. that way we can change what we want ? Or is it predestined like talks of end time prophecies? (2:54).
K- It depends, this wishful thinking mom, what games she plays with the children and the console , isn't it.
R; it seems we have the choice of perceiving either way.

K- Some of the mom's nowadays ?? the children are playing games. Because they played the first series when they came out, they didn't know how to use the console, use the joystick, they learned on the children. A bit rusty, but some mom's are ?? better that way.
Q: Will there be a Keshe app on the phone
K- Yes, what do you want to apply for
beam me up Scotty, app.

(2:56). The point is in the U there are no schools and universities, the knowledge is transferred to the dimension of the strength of the soul according to the position, time and desire. And this is where the university of the U sits. The name of it goes with the sound of it, university, where the U is, a collection of knowledge whatever exists in the U, and the STM is a university on its own and it has access to all knowledge of the creation. It's just that according to the time, space, manifestation given knowledge is present, unless you can tap into it. You always can tap to a higher order knowledge if the physicality is happy with the present ?? position.
Q: So the UC is the same as the STM and EC is the same as the physicality in our Earthly existence.?
K- Collectively yes. Now maybe you start to understand a little bit more. (2:58).

How to Calculate Inertia

Q: Inertia… you said to find out the Inertia do I take earth beneath me to make Gans to know the specific intensity of that place? How do I differentiate the Cup of Inertia from where I am with the Inertia in Tehran. Is mass the difference between G and M plasma mass or mass of matter, ?? 75 kilos ?
K- The Inertia is collective energy of the matter state, including magma. The thickness of magma has a direct effect on the Inertia and then the matter state of it. (3:00). In so many planetary systems the Inertia is calculated on the liquid for mass, not the matter state mass, as a solid. This is how you land in the liquid planetary system, how you correct it. Then you find out that the thickness of magma, the speed of rotation, the elevation in respect to MG field will create that condition. So when you want Tehran, partially not only you calculate the Inertia, but you calculate the field strength of the magma mass underneath, the low rate of flow, because more or less, partially the field comes from the flow of the magma in that point and position. And all the magmas don't have the same thickness and strength of the flow across this planet. They move into channels and the friction by the other magmas direction of ?? flow give them the different field strength or what we call Inertia. So Inertia of Tehran, more or less can be calculated, we have technologies, we know exactly what it is, even which position in Tehran, we can go to that ?? length. It's the same in the U. You measure the strength of the field on the point of manifestation, they call it Inertia. Sometimes you create the Inertia for yourself to manifest yourself. (3:02).
Next question.

Q: Who is the one who manifests himself and talks when I remember my dreams of flying, it's my wish or a message of my soul?

K- The existence of the soul in strength brings dimension of the emotion in the reality of the existence. In a way, when we feel, we have an emotion in our brain, or we manifest it in our physicality**, it's the interaction of the fields of the physicality, which gives the information which is coming through the soul. The continuously receives information or energy from all dimensions of U. Like man it filters what is applicable to it at this moment of time here**. It's no use for me to know what is happening in Europe when I am living in London, because rain, shine whatever there, (3:04). has nothing to do with what I am living here in Europe. So it is the same with the soul, we choose the time, place, and manifestation of it. And to what purpose is this going to be used, and to what it is going to bring, and in that process the fields energies of the strengths dictates what we will see, chase, follow, what we will allow to be part of us. And which part of it you want to take, what suits us.

Q: What happens to those who don't go in the EU, if the majority evolve, what becomes of those who remain unchanged?
K- We have done a rough calculation, (3:06). the EU, if you make 1 million of them and 50 to 100 people a year can go in it, that 100 million. Now you try to get 7 billion in it. Or you try to make it efficient that let's say 10,000 people a year can go in, and then you have 1 million, you have 10 million. So in essence, mankind has to learn to operate within the soul , then operating in the EU, overall in the long run. As we show and as we teach, use these systems, gradually more and more will come to understand how to elevate their own soul. How to elevate their own structure, and then we go into the next steps. Then the position of the elevation of the soul becomes part of the structure. You don't need to go into the EU once you learn, and maybe some people learn and they teach the others. (3:08).

Q: So in other words the most evolved community on Earth would be the right place to have the first public EU? repeat ..
K- Not really, this is what we discussed before, it has to be elevation of both. When we put the system in Africa, we put one in Europe. Don't forget you put the supposition that the European's are very clever, are very rich. Even the Europe we put these in the most crowded areas, where they are lower than the most backward parts of Africa. Not having physical value, what call it, things does not mean you are not intelligent people. Or South Americans, and you find out some of the Europeans are more backwards then the backwards Africans. So it doesn't go that way. (3:10). But we try to bring that elevation of the soul through the EU become the totality of the whole human race, and not exclusive one race or the other.

Q: What does it mean when we begin to experience more and more events in our physical life that are exactly how they happen in our dream?
K- Don't we call these back to future movie, Rick? .. Some times our dream are to foretold what is to come in our physical life. And when it happens we call it a dejavou, and souls are aware of the changes to come and they inform the physicality. And we see it, and observe it. (3:12).

Q: Med-bed, when the US government talks about Med-beds is it using the same T as yours?
K- No, no, Med-beds is medical beds and these are all to do with. .. First of all we don't have a beds, we have a chair. And secondly, it's an EU for elevation of the soul and physicality and understanding of the processes in the U. I had this Med-bed. This is an EU … the world of science hasn't got a word for this, that's why we call it EU, universally enhances all the cells of the body of the man and then in the processes to come, it enhances the knowledge of the man at the level of the U, that you can transmute the energies of yourself to understand the existences in other dimensions. The name of it is ?? with, enhances you to the universal level if you wish to receive that.
R: I watched a 2 hour video on Med-Bed … (3:14).
..
K- Part of this T is what we understand and we develop. In so many ways, we create ourselves. But even when go into the EU there are equipments to support, auxiliary for specific conditions, not it's all the same. And even these EU we'll tune for cancers, mental diseases, enhancement of that can be specialized for given condition enhancement, Which will reach the maximum performance.
R: No laser and scalpel .
K- We don't have laser in plasma T, yes. (3:16). maybe in the future but not for this job.
Q: .. Is the same Gans from the winter and summer period how different are these in structure?
K- Not much. the dimension of the position of the Earth does not really make much difference. ?? mental condition, very little effect. You are still in the same position, so you are impacted by the MG field and Inertia of the same position. There is very little changes in temperature.

Q: The strange thing as you speak your words are like my words, instantaneous thoughts, as you speak it is coming from my soul, instant recognition. How can my soul know what you are about to say, and if this is so then the dark forces would be aware of any new developments, (3:18). or any new thought, and if this is so, then silence may be the only way to defeat those who wish to hold us back?
K- the process is as I explained before. **The voice comes from the information which is ?? from the STM, and if you are of the same understanding and strength in certain condition, as there is no time, zero-time and position, you hear the voice, and your soul translates it into the knowledge for the voice box**. The voice has to go through the conversion of physicality, but the soul receives it and understands it in the dimension of the fields of the plasma fields, and that's what I said many times. We speaks in the words of the man, but our knowledge is spread across the U to the soul of the ?? speak. We teach the UC. And maybe some humans gradually reach to that point.
Any other question or shall we cal it a day. (3:20).

R: Night at the Roundtable . K will be a guest …
Thursday the 29th teaching is at 2PM CET and not 9AM ..
K- Those of you who are contemplating or donating to the different structures of the KF, please find out which country you are in, and how you can help with the donation or

support with the EU or whatever. As we see the structure coming up .. Iranian, Brazilian KF a bank account their. (3:22). Same with Chinese.

Any other question.
K- Next week we start teaching you how to live in the dimension beyond the solar system. How you interact and how you have to change your position and everything else in that respect.

I do apologize, but part of my private life has become, without us wanting, part of the KF life as it has been, as we have seen before, and now we see the same people ?? doing the same thing. And somehow we try not to go back to this, and keep away from this, but keep your life safe, and there is more to this movement by this lady, (3:24). then catches the eye. keep your children, wives and husbands, safe, under whatever names they come to you. Even they use the names of KS, we have seen in some communications. KS are those who seek the knowledge of the KF and not those who destroy the KF, and learn more as now we are a lot more be done in the background, and we go through the process of the teaching of the deep space travel, introduction of mankind to UC, and the new knowledge and science that will bring new changes to all of us. This is a universal revolution, not an industrial revolution, or scientific revolution, we are bringing the universal knowledge to mankind, and with it will bring many changes which are unknown to man. the Universal Revolution is the fundamental change in every culture when we get directly involved. We raise the level of the soul to what we call the highest level, as we see the race deserves to be elevated. And we see the human race in that position. to elevate the soul of the man, and the inhabitants of this planet together. Thank you very much.

R: 350 KSW (3:26).

END

351st Knowledge Seekers Workshop; October 22, 2020

New Cycle of teaching starts today from 21st October - Final Phase

ENGLISH TRANSCRIPTION

Final Phase of Knowledge for Man

(:06). K- .. As we promised **from 21st of October, a new cycle of teaching starts**. In so many ways, we have **entered the final phase of bringing the knowledge of man on the basis of universal operation with humanity**. In that process we try to explain more

and teach more, and at the same time try to understand what will happen to us in the depth of the space.

We Go to Space as a Group - Not as Individuals

What will happen to us as a society, as a community, as individuals. When we go to space we will not meet one, or **we cannot go as one, we go as a group, as a human race**, collection of ideas, souls, personalities, and humanity, and in deep space we will meet the same. We will not meet individuals, we'll meet a society, a community of people. (:08). We meet in truth, interaction of souls, what they learned from their time, .. their position, what they know and understand from their dimension and how can we carry ?? these emotions. In the first place as we know, we have not been the only passengers of this planet. We have many passengers and many visitors as we have started visiting other places like Moon, and now trying to reach Mars, and in the coming time if humanity goes with the jet propulsion, maybe in a 1000 years time man will be able to cross the borders of the solar system, or maybe less than that. But at the end of we have become tourists, and tourism means interaction, understanding where you go to, and respecting in what you see and the people you meet. This now extends to the human race in the space. We need .. decide understand, as has been the habit of the man, we create ambassadors, we leave someone behind that can understand and communicate with us. And at the same time understand part of the culture where we go to. We need to be able to communicate as a society, collectively, as a human race, even though human race collectively is divided into many races, many cultures, and for this reason man has created new dimensions in life.

Universal Council will Represent Humanity in Space

For this purpose .. we have to step in very carefully. We have to set everything according to what is to be, (:10). How we arrive, who is representing us to interact. And who has the right to be able to interact with that carries the collective knowledge of human race. One of the first steps to complete this has been the establishment of UC, from today the UC takes the responsibility to interface between humanity and what we collect, and establish as the UC, and what we call, the universal UC. In a way the 2 universes, the UC of man and universe will appoint to represent as a higher council, as man gets accepted into the society of UC. Means we'll have a spokesperson to represent us, our emotion, our needs, and our knowledge and at the same time their knowledge will be transferred to us. For this reason we engage the UC members directly in this process from now on. For next 5 months UC member will promote to be on the panel. There is one request, especially for Italian council, please do not break into communications, then we have to remove you into the other point. The reason for these teachings is very direct, the UC members have to start accepting their position and their seat, as their presence in human race in what we establish in the coming time.

The technological development in KF Austria has reached the point to deliver the new technologies, (:12). beyond imagination of man. We have never revealed and gradually in the coming weeks you will see T and instrumentation that mankind could never

imagine to exist. We use KF A manufacturing as a research center to deliver the edge of T of space and science of U. The first phases of this has already reached completion, in the coming days and weeks you will see T which mankind could never imagine, .. in the next couple of weeks you will see a fish tank in the center of the exhibition, filled up not necessarily with water, but with the fields of the cosmos, where we can represent, and all watch, and see the representations and delegations from all dimensions of the U. Many of you thought we would put this fish tank to show you the creation of the fish, and creation of life. This fish tank is the fish tank of the U, we'll create the conditions that over the next 5 years and beyond we start establishing for us, collectively as a human race to see the new dimensions, new lives, those who are amongst us and those who we will be amongst them, and in this process, .. the exhibition center in Linz will become a showroom for interaction fo humanity with U Community. This was primed from the beginning, my plan from day 1 was to use, and we set the 2 systems to create a condition. (:14). One system creates the dimension of the soul, and one system bring the dimension of physicality manifestation of the being. In this process mankind gradually gets to learn, to see, to understand, that this is not a mirage, not a 3-D, these will be lives, true lives of the U. And in the same process we will show the STM when he flows in these directions and dimensions, how they will represent themselves in other dimensions and directions. As I said, the T of the KF is beyond the understanding of many of the human race, but gradually we will educate you to it. gradually many of us will become .. the passengers of the U.

In so many ways, as we open the doors in the coming weeks, in interaction with the rest of the creatures of the U, the responsibility for the communications, and accepting the responsibility of the human race falls on the shoulders of the UC members. It's their responsibility to lay out the conditions for the interaction of the humanity with each race, with each organization, and the human race, with the world leaders in how we expect them to follow. To many of you at this moment this is far fetched, but as I said, we took time to bring as many as possible into the folds of the F and to understand. And now in the next 5 months until 21st March, 2021, (:16). mankind will be prepared. Some of the teachings at the time of teaching may not be relevant to anyone, might not understand it, but don't forget we teach not only fo the man, but for the U Community to elevate theirs that we all enter the U Community on the equal term, and equal knowledge. It does not mean that only the human race is behind, but many other races will reach their souls, have been evolving to reach the same point, some are near, some are far, but overall in the past years of teaching we have reached enough, not only to the STM, but the soul of the UC that they be brought up to the same level. The voice of the Soul of the Creator reaches His own creations in all dimensions, does not need the presence of physicality. Maybe, maybe mankind has been lucky to be in the presence of it, we do not know how humanity reacts, but we expect, and we request from the UC to lay down the fundamental work of the human race in the direction of peace. One of the most important functions fo UC is reaching the world leaders and laying down the terms. The term of their existence and interaction with the U Community, what the UC decides becomes the law for this planet, and that is the only law that the KF and U Community will abide by. We will not accept, we will not dictate on no nation, and from no nation. The EC has the responsibility of communication between the world leaders and the UC, (:18). to

accommodate the wishes of the humanity to be brought up to the level, industrial level, social level, and what we call universal level at the same time to all the continents fo this planet, which means no race shall be left behind. As I said before, we support our teachings with the physical systems and dimensions. Yesterday with the transfer of a very simple knowledge to KF A, a new cycle of systems will be released, the knowledge at this moment is what is needed so in the future days and weeks we add to the knowledge. Many of you will be able to replicate, but you will not be allowed to enter the dimension of the communication with the U Community, unless it has been accepted by the UC. ?? of the UC is sacrosanct for the existence of man in the space, the collective direction for human race lays in the hands of UC member, and no world leaders, and no other organization. This is very clear, and we make it more clear if any organization tries to interfere or any government, we make sure that administration will not be operational in any place on this planet. We leave this entirely to the world leaders to decide. From now on we create an Earth leadership from collective UC and .. collectively by the souls in the language they carry. (:20). It becomes important that members of UC take these as a joy and not as a pride. Any member of the UC crosses the limitation of the collective work of the UC will be automatically removed by the 2 HKF. As UC has to be humble to serve, not arrogant to be, and this is the fundamental work of the UC. I made these things very clear at the onset, that when we start teaching and presenting T and what we call the theology of the interaction fo the man with the U Community, the present theology and the religions, become of the past. Mankind goes back to one book, the book of Creator, the book of the creation and not different names of Bible, Torah, or Koran. The instruction is always the same and it came from the same source, same soul , and same man, but in different times and dimensions. In this process mankind will not receive another book of orders, but learns the ethos of U Community action and interaction. Mankind has reached a point where he needs to become close to his Creator and not by bending and praying, but by understanding the knowledge of the creation.

In so many ways, we set the leadership for the humanity to enter the U Community on the dimensions of the Universal Councils of the collective Unicose. (:22). We set by set we'll take you into position that the first members of the UC will meet with the Heads or the members of the universal UC as you call it, and then through that, what is agreed in the coming time we'll lead the leaders of the nations of this planet into one dimension and one direction, prerequisite to any interaction between the UC and any leaders of this planet, is agreement to disarmament, to abolish and demolish all arms. In so many ways, we create a dimension and a knowledge that be applied.

In the coming KF Austria will deliver a T that in one move will make nuclear T totally disarmed. No nuclear weapons will be able to be fired on this planet, or be used on this planet. We ask for the leaders, those who possess nuclear weapons T to meet us in Tehran in the coming time, for the total disarms of agreement of disarmament of nuclear. All negotiations on the term of disarmament will be done on the city of Tehran, with American, Chinese, Russian, and other nations which have reached nuclear weapon T, for agreement for total disarmament. If not done so, we will disarm remote. No nuclear weapon head will ever leave its silo. No nuclear scientist will lever remember what they knew about how to make nuclear weapon. the knowledge of nuclear T and weapon T will

be erased from the memory of the man, (:24). as I wish, and I will. In this process we bring a new condition, a new dimension. We will reach agreement with the soul of the man who created the weapon to accept the elevation of the soul, in exchange for forgetting the knowledge, in a way to shelve the knowledge to never be used. As I said, we make it a willing, but not enforce, but our will is beyond the imagination of the man. Mankind will be disarmed in the next few weeks and months, in a very step by step, gradual. We'll make sure that no aircraft will take into airs and atmosphere of this planet which carries a weapon. As we say, we'll reach peace, now we'll disarm. It depends on the nations how to reach peace. In my upcoming travel into Tehran, as a delegation of the KF to meet the Iranian leadership in the coming weeks, there is one prerequisite, signing of the peace by the Iranian leadership with all the nations of this planet. And this will set the scene for the rest of the nations to follow. We respect the state of Israel on behalf of the Iranian nation, as the nation of Israel and not as the government of Israel. As many of the 25% of the citizens of Israel are Iranian citizens and born in Iran. This will bring the first step for other nations to gather for peace, the way we want. I laid my terms from the Iranian leadership from the beginning. (:26). Peace on Earth needs generosity and understanding and not aggravation and trying to ?? My request goes the same to the state of Israel, disarm and talk, or we bring you on that table within days. We wait for change of administration in America government, that in that process we bring new dimensions in the world political scene.

In the coming weeks we'll interfere directly in what has become known as Covid-19. We will deliver a T that will radically change the atmosphere of this planet that this virus will not be damageable to man, which means we deliver a T in a rapid way that mankind sees how he can help himself in the depths of the U. As I said, viruses are part of the work of the U, and in the space we will not come across bacteria's or others, but we'll come in contact on a daily basis with packages of energy, as we call viruses. We will show how mankind can collectively walk away from this. The first structure of this will be shown in the city of Linz through eradication of the Covid-19 from the city in the coming weeks, which means anyone entering the city will 100%, never carry Covid-19, or any other virus which is harmful to his or her body. (:28). We bring this protection firstly to the exhibition center, anyone who enters the center will become automatically what we call, release of the virus, and gradually we extend this to the area around the center, and the gradually to the city of Linz, and then we bring this with the collaboration of the government of Austria and the European Community and the rest of the world. As we have said, we have shown the T effectively in Iran and now we deliver the T on piecemeal on organization of the KFm Austria as the headquarters fo the operation of research. We have already offered this to the mayor of Linz. They can bring people with virus within 3 hours they can test again, with no virus. We can reduce the time, we can sterilize, create atmospheric condition within the building where the MG field of the virus will be absorbed by the structures which the KF gradually introduces into the exhibition center. … we can replicate any virus within the system which is developed. We can feed you, elevate your soul, and whatever we need. One of the biggest problems up to now was how to achieve this, and now that the knowledge has been transferred, the process is easy. (:30).

New Teachings

Going from Liquid in Womb to Gas of Planet - Absorbing Energy from Environment

In going back to the new teaching, as I said , .. **what happens to the man when you leave the space of this atmosphere?** What happens to the man the space of the solar system … when man leaves the galaxy, each condition and atmosphere has its own field strength. We **are born from the womb of the mother in the density of liquid fields** which create the density of liquid for us to be able to move freely within the womb of the mother. In our U, our world, in the first 9 months of the life of man he live in the U of liquid. Then in an instance, we have developed a T, what we call a strength of the soul to transfer into a much lighter compact, we call air. Atmospheric condition of this planet, to **absorb energy from the environment to be able to guarantee the survival of us within this atmospheric condition**, we wear no suits and we were born with no astronautic clothing from the womb of the mother.

Environment Transition is Controlled by STM - not Physicality

We have learned and our soul has taught our physicality the switch. **Mankind has never understood, (:32). that the switch from the liquid is fully controlled and dictated by the STM for the transition, and not by the physicality of the man. In a way the soul changes, strengthens its elevation as it is released from the compact environment of the soul of the mother into the bigger soul of the planet**. And accordingly it adjusts the strength of the field of the soul, and every cell in the body of the man to accept. We have watched this billions of times, and so it has become normal to come from the liquid environment in the atmosphere and we just see it as it is, but we never understood that the transition from the instant the body is transferred from the liquid environment from the womb of the mother to the atmospheric condition of the planet is totally and utterly controlled and dictated by the strength of the STM and it gets and receives a bigger freedom. It's very like a balloon, you change the pressure, atmospheric pressure, and so the balloon expands as it enters a lighter pressure, this is what has happened to human race and mankind never understood.

Soul Changes Strength of Every Cell - Sets a Body Temperature 37 degrees

In a way, **our soul changes the strength of every cell which is under its control with physicality body of the man to accept the new condition**, And it **has set an interface** with it, we call it, at 36 and a half degree temperature, **37 degree, interaction, heat of the body of every creature on this planet**. Most of us who live with a given soul. Therefore, maybe this has taught you something slightly different. (:34). Maybe for the first time you understand why we live at a given temperature, and why some animals can change dimension and work in different atmospheric temperature, **when you look at the temperature of an animal, you understand the position of the soul**. Interaction of the soul with the physicality of the man, with the soul of every cell of the man.

This becomes paramount and in the future in the depth of the U, man will learn a lot from this, how his soul in interaction with his physical dimension will create temperatures, which man can adjust and live at any depth of the U, and any temperature, position, and condition. This is why in teaching of past couple of weeks I tried to explain how some animals can stand high temperatures, and high pressures in the depth of the oceans, or what we see the creatures above us in the upper atmosphere in the coldness of the space freely. **It's the soul of the animal, of the being which adjusts to accept the pressure, temperature, position and the environment of it. Not the physicalit**y. As we see most of these animals look the same as the ones we've seen in other places. It's the soul which changes the positions, of the acceptance and tolerance in the condition. And now you understand why we have been teaching the structure in the STM for us to understand, in the depth of the U, our soul will decide in what pressure and temperature we react to the environment we arrive. As we said, we take the STP within the confinement of the STM. (:36). and then we adapt it, release it.

In so many ways, maybe now we understand why from the beginning I explained one thing, that the physicality is a leech on the STM, in a way, now we teach how one leech can become part of, and become inseparable part of the life of the soul. We take it in, and we protect it, and when we need, we put it out to create our manifestation. I can put the STP a 100 meters away as the atmosphere decides and become 100 meter creature, or I bring it in to 10 cm, I become a small animal, depending on the pressure, M fields of the environment. Now maybe some of the scientists understand how the creation of life on this planet has taken place. Why some nations all look the same, and some nations behave the same. Where it responds in accordance with the MG field of the environment and the position and distance of the STM with the STP of the man, which dictates our height, color of eyes, our emotion. This is why members of each nation or nationality carries certain habits.

Because it goes back to Cup of Man, which we showed you, or the 5 stacker Cup. The MG fields of the Earth is constant. The Inertia of the environment dictate the other fields above. How far you dictate the position of the soul, how far you dictate the STP, and how far you, (:38). dictate the position of the matter state of the body of the man from it. Many of you have made many Cups, but have any of you tried to miniaturize the Cups and position them in the height of the man, in the position of the Earth and gravity, and see how your Cups react different and create different atmospheric and environment in your homes. All of you, as been the habit of the man, "just got a box, and put a box and some Gans's in it, and looked at it." But none of you understood the essence of the teaching. As usual, man has to make it bigger for him to be better. If you make a Cup of Man, .. a Cup of life, of what I call, "vertical people," or horizontal people, look at the size, .. the position, the distance between them, and see what emotions you receive and what you understand. This is part of the teaching, you all made big boxes and big stackers. You made the soul of a giant which that covers the whole environment of you, not the soul of man, not a soul of a being in the size of a man. Mankind has to understand this, as I said, "monkey sees, monkey does," and this has to stop, you have to analyze what the teachings mean. You have to understand what it has to be, you all made big boxes, and big containers, and you stacked them up on the walls and everywhere else.

(:40). Think for 1 second, if you made a stacker unit and put it against the wall. You have created a cage, because its limitation is the strength of the field of the wall. You made a stacker and you put it in the middle of the room, you created a condition and combination of the fields. **If you make a system in the right dimension, right proportion, in right mixture in respect to MG field of the Earth, the Inertia of the matter state and the STM, you should see light**. You should have seen the interaction of the soul of your system with the material conditions you have created, but none of you have reached that point, because you were too busy making big Cups and big stackers.

How You Will Look on Mars - Creating a Home for Physicality

Now you understand how in the coming time we'll create the condition of life in the tanks, Understanding G fields of the U at the point of manifestation. This is part of what is to come, .. we gradually educate you to understand the teaching of the U. **How to create first a home. How do you create a home for your physicalit**y, how you create a condition for your physicality to exist within that home. The home could be a 4 walls, could be the atmospheric condition of this planet, could be the atmospheric conditions of the galaxy, or a solar system, or within the spans within the 2 galaxies, 2 stars. Now mankind has to go back, (:42). and really understand, really educate itself in what we taught you as the 5 Cups. If you change the MG field of the bottom Cup, the MG field of the Mars, and you understand **in which point of the Mars you want to manifest yourself and create the Inertia of it, and then you know the strength of the soul of the Cup, and you put it on the top, you will find the physical manifestation of the man in the other 2, and the physicality of the man, how he will look in the Mars, when he lands**. Now you understand the extent of the knowledge we have brought you in the dimension of the 5 Cups.

5 Cups to Know What Will Grow on Mars - Create Inertia of it

You want to know what kind of vegetation will grow on Mars, in your Cups today you create a MG field of the planet of Earth, now you do of the Mars, **you create the Inertia of the position of Mars**, and then the soul of the vegetable or life, which you want to create on Mars. **You place it on the top, becomes a horizontal man. You put it in the middle, it becomes a matter state, and you put it in the bottom near the Inertia you create the life of the vertical people, because you lock the position**. Then you can see how your carrot will grow on the surface of the Moon or the Mars. Now you understand the extent of the knowledge. And if you translate this back on to Earth, you can grow anything you like, on anywhere in the U. (:44). Take the seed, and **the seed of that element will carry the soul of it**. You want a carrot which you used to make in grandpas home in northern Australia, but you want to grow it in Canada, take the seed. The seed carries the soul in the atmosphere in which it was created, and now you will see the vegetation will grow with the same taste and condition in Canada. Now you understand why we told you that mankind has to understand the operation of it. You want to create a gold, you carry the soul of the gold in the center, and then it manifests itself in the dimension of the physicality. The same with the gases, the same with any condition in the U. The introduction of the 5 Cups was the interface with the man's knowledge and U

Community's knowledge as we explained. Ignore it, do not understand it, and you shall see nothing. Try to expand the knowledge and then you'll understand how the knowledge works within the structure of the physicality of the man.

Testing Conditions of Manifestation for the Planets to Visit

Now you understand why we introduced so deeply, and protected the 5 Cups. And **we encourage you to understand it, because this for the future scientists is the cornerstone of knowledge for man to be able to travel the depths of the U.** When you put **a Cup which made from your soul on the upper section**, (:46). of the vertical life, and **then you create a condition of the atmosphere of the planet you want to be in, and you see that the soul moves to the middle Cup, then you understand in that position in the U, you will not be able to manifest yourself in the matter state you are, but as a solid**, because that is what the conditions create, and would you like to be a stone? Then you understand the writings of the prophets of God, even the stone has a soul. Because in that atmospheric condition, the strength of the **STM will allow man only to manifest himself in matter state of the soul, but is still conscious of his existence**.

The Knowledge of Creation and its Secret

What **I taught you now is the knowledge of the Creator, and the secret of creation**, and this is what we said, the man will be taught the knowledge at its extent. You ignore the 5 Cups you play a pearl of your life in the depth of the U. This is what I said in the teaching in past years, that you will be able to understand how you will look before you go there. Would you like to be a stone on a mountain, or would you like to be able to move in the new atmosphere, you land yourself. The 5 Cups is the backbone of the knowledge of the creation, and mankind has to understand its operation fully. At every strength, at every condition in the U can be created and understanding and the totality of 5 Cups.

Coming Chaos and if You Want to Go to Mars

As I said in the past, **in the coming time, as we said, (:48). with the fish, there will be chaos, then you want to go to Mars, you go in and you see if you can stand it before go in, you put the seed of your soul and see how you manifest yourself**.

You Will Receive the Knowledge form the Position - Don't need to Learn

And when you arrive in that position, **because you carry the position of the seed of the soul you will receive the knowledge from the environment of its existence. Means mankind does not need to learn languages, does not need to learn anything, but at the point of interaction, will receive from the environment of the destination**. In so many ways, this brings us back to one thing how do we communicate with the other creatures of the U, when they manifest themselves in the dimension of the planetary system of Earth, or any other place.

How we Meet Other races in the Universe

How do we meet with other races in the oceans of the U, in the span of "no-man's-land," when it's not theirs, and not our physical condition, and the soul interaction. **This will be taught in the coming time, that we reach the soul of the knowledge of every passenger of the U, as much as they can reach us. And any misconduct will be recognized instantaneously**. You create a wish to eat, you'll find a distance of your soul from the point, you reach to give you'll find a nearness of the soul. And the same shall be, if your intention was to love, and the intention of the other side was to eat your energy, you will see, you will be distanced. And you try to make friendship and gathering, you will see how close you come, because the both intentions are the same.

We Take Out the Killing Part of the STM - with His Permission

Mankind will learn from one thing, (:50). that the U is a peaceful place and mankind will not be allowed to carry on with the present behavior of killing and destroying. **We take this part out of the STM by the permission of the man himself, and not intruding into the STM. Every man has to volunteer and submit his soul to peacefulness, going through the process which will be introduced in the coming time**. New T, new flight systems, new understanding of the fields of the U, even to the level of the strength of the Creator will be taught to man, but does not mean the man will ever be achieved all of it in one go, and immediately. It needs testing and understanding, and graduation from the true essence of the knowledge and not by just copying.

In so many ways, the past hour an hour teaching, I have taught a lot**. It will take mankind millions of years to unravel past 30 minutes**. But as you are not aware of it, and your knowledge has reached that point, these are all thoughts, in the coming time, the process, the development by human race and watching the others **will show how much you have been taught in the first lesson with the interaction with the U Community. I laid out now the alphabet of the universal contact**, but it needs to be understood, and it will take you centuries to make the first ?? , if mankind takes half of the path. And it takes one instant to write the book of life of the U, (:52). if mankind be very clear in understanding of the knowledge.

Prerequisite to the peace to mankind is the collective acceptance of the peace. And as we said, it is the responsibility of the KS and the UC members, to lay the foundation. We look to the Hebrew language UC and the Persian UC to start negotiation with both nations, do not be afraid, we are there to support, but you have to learn. It's the responsibility of the Hebrew language to take the banner of peace talks between Iran and Israel, the same with the UC of the Persian language. It's the responsibility of the EC for both sections to support and find the ways to do it, and in the background we support. In our visit to Tehran we expect both UC members to be with us. In that process we bring the 2 processes together, we see the peace between Iran and Israel as a cornerstone for the man to learn to satisfy their animosity and make a peaceful path. And then the rest will follow. In so many ways**, mankind needs to learn to be peaceful, to erase the**

animosity and war hysteria, which is set in his physical soul and not in his true soul of existence. (:54). In the coming weeks, by showing T which will take mankind time to understand, we'll stay the way, we pave the path, and we create the conditions for this process. One of **the cornerstones of delivering this to change is the establishment of One EU, One City**, that gradually we change the position of mankind step by step. We set out this to be done. In so many ways, **we have to achieve the condition of the elevation of the soul that the physicality does not need to depend on the physical soul for it to exist**.

We Expect the KS to Catch Up Week to Week with Teachings

As I said, we start teaching in a rapid way, but with massive amounts of information and knowledge and each teaching on Thursdays will vary the size of the new education, new knowledge, and we expect the KS, to, by week to week to catch up to that point.

Teach You to Create a Soul from Your Own Soul - to the System

In so many ways, **we will teach you how to create a condition to create souls**, but for those who understand to be at that level. And then how to be **a copy of your own soul**, that you can manifest and test the condition as part of the sample of the soul in, what we call conditions of the U Community and environment. Which means **you put a small part of your soul in the system and you see how you will be, can you interact it, understand it, (:56). can you live with it**, and then if it is so, it's through you, truly understand if I want to journey to that point and place. And as we have created the point and the position, the transmutation and transportation at the point of acceptance of the soul will be instantaneous. This will be the new transportation system across the U, which we will teach the mankind in the presence of the soul, in the presence of understanding the T which has never been open to man.

The Emotion of the Presence

As I said in the teaching of the past few days, the emotion of Presence is the emotion which mankind has never known. Now through understanding of the creation of your own soul, through the dimension of travel the emotion of the Presence, that you can see your existence in the position of destination becomes vital. .. what my ambassador as my soul sees, I would like to get my physicality to see too. That in a way, you used to dream about your father in the what we call, the emotion of Presence, now you see that through your soul. You do not put your soul in danger, but by the Presence you understand the position you will take, if you can tolerate, if it is the place you want to be. This is one of the most important part of the T of the deep space, what we call the emotion of the Presence. As I explained in a teaching, the emotion of Presence, mankind is very familiar to, but he never understood that it is part of emotion and you call it a dream. (:58). In a way, you dreamed of your father, but in a way you created a trigger of the emotion of the Presence of the father, and it's emotion, it's not a condition of a dream. How you create the condition of a loved one it's the same. Now mankind has to learn the new emotions of

the space. Emotions of the interaction of the souls of plasmas. .. in the coming time we'll give you a ball in your hand, and you shake it, and you create the dimension of every energy in the soul which is connected to you. Zero-time communication in understanding the transmutation of the fields, not the transportation of the elements. Teaching is getting heavy, but it is getting sweet. .. it's becoming part of the total understanding of the knowledge of the U. .. I brought you step by step, Nano coating, Gans's, the fields , the cores, flight system, the 5 Stacker unit, and now you understand why the 5 stacker unit came last. Many of you have not understood the work of the 5 stacker and I have seen no one do a true replication up to now. if you do you shall see. but no one has done up to now. Because first of all you have not followed the rules of the U. (1:00). that we will do and then you will see more.

Now I hope our people have promoted the member of the UC on the panel, in that process we will gradually understand the total understanding of the process of the creation. As some of you have been noticing, that in the past week a new dimension has been added to the structure of the teaching of the KF and it will be encouraged to be developed and extended. Last Friday Iranian to Brazil and Monday Brazil to Iranian KF

(1:02).
Iran to American.
American to Iran .

(1:04).

We have to teach the ethos of the peace on this planet and beyond .. KF is best place for it to start. In so many ways, we would like to see the extension ..
back end of November. We need this to be able to lay down the cornerstone of peace. We need this not only by T .. but we govern through the dimension of the STM (1:06).

When K Says Tomorrow Means Soul has Started Process

KS tell me that your tomorrow means 6 months. When we say tomorrow, it means today we'll lay the soul for that thing to happen, and when it's the time for maturity it will manifest itself. We are not magicians that we say tomorrow and it will be tomorrow. We lay the law, from tomorrow it will start. The same shall be, what we wish will be. In 2011 I wanted the structure setup for Keshe Wiki, and it took 5 years to show itself in the dimension of the KF. ..

(1:08).

Any questions

K- the HKF will release the page for the EU ..
(1:10). donating for EU to cities ..
(1:14).

The KF Coin has been accepted by the world bank using the Coin within the structure of KF
(1:16).

So we have reached that maturity to launch and people can buy the Coin, and then designate the Coin to what they need. long term acquiring a banking system within the KF
official Coin can be traded anywhere across this planet. (1:18).

I would like to ask the UC members what they were expecting, how they feel, or is it too big for them to be a part of, or is it the challenge you were yearning for?

Guatua: .. (break in) creating conditions for going to planet Zeus, how would I know their MaGrav?
K- In the coming time the scientific world will map up the U M fields, Many of it we know, the composition of materials, many of it we choose when we arrive …
(1:20). KF Austria will deliver these T, how to measure and

One of the biggest pitfalls of your systems is the presence of your boxes. .. fixing up a motor to the end of your cores, you have already lived and worked with an unreal condition. You have to develop a T like Earth which is floating in the ocean of the fields of the U and rotates and creates its Inertia, M and G fields. This is what you do not have a knowledge, and this knowledge has been transferred to our research centers. Creation of what you see in the exhibition center of the rotating Moon, using magnet M fields will lead you never to reach the true work of U, You have to create the fields of the ocean of the U. that with it you can create the free floating and rotation fo the Earth. this knowledge has been transferred to the research center, (1:22). in the past few days. One of the biggest problems is in the scientific centers, we have no true representation of the work of the U.

(1:24).

Azar:
(1:26).

K- One of the biggest responsibilities in the next few weeks lies on your shoulder, Farsi UC member, and HKF in Iran for making first contacts with Americans, and open the 2 lines between Tehran and Tell Aviv ..
A:
(1:28).
end of wars has to come from the citizens of this planet. With the soul of its citizens the nations will change. ..
You got to understand we use the Iranian KF as, for a specific way of the transfer of the knowledge and T, and peace from inside. .. in every Monday teaching the heads of Iranian officials listen to the KF. The heads of Sepah, the governing government, the

leadership of Iran, tentatively and thoroughly listen to all the teachings of Monday which happens in Iran, We know that because I receive responses back on it. .. because I know how the Sepah and leadership will react to it. We have received a positive reaction. and we carry on with that process. (1:30).

This interaction allows the EC and UC .. Azar and Dr. Pavis.
we sow the seed and water it with blessing ..

as we know the present administration in America is not a peaceful administration, and we need changes. . we have reached to Iranian structure .. Iran wants peace .. dialog with nations not governments . ..

(1:32). As we do these on the public channels those leaderships on the Hebrew ..
to set the terms for peace with Israel ..
same from Israel.

Rothschild's Collaboration with KF

We have received a direct approach by and from the Rothschild's family. Our response to Barron is one point, we have accepted your offer, as long as it is terms of the KF for development of the peace, is accepted. Negotiations are on advanced stage and my message to the Rothschild's family is simple. KF collaborates on the basis of peace to create a condition for peace and the spread of the knowledge. (1:34). It's the first time the KF leadership has given a positive sign to Rothschild's family, and we have one message for the Barron, on terms, on the condition of the KF has been accepted, we are prepared to open the knowledge on investments of Rothschild's group in KF EU only, till they show the process of peace is part of the integral of the F. The Barron wants peace, the KF has given a positive sign for this joint collaboration. We use the strength of the Rothschild's and their structure to spread peace, but we control it on the total operation of the ethos of the UC. My message to the Rothschild's family is very clear, on terms and conditions of the KF, as we have agreed we can accept the process of the development of the EU across this planet, for 2 reasons as I explained in writing to the Rothschild's group. Change of the soul of the Rothschild's to become a peaceful organization for the development of the man, and return of the knowledge which you were given back to the ?? fold of the U Community for development of the peace on this planet. The purpose is fulfilled and we accept the responsibility of full collaboration, and on one basis, only on EU for a spread across this planet, and no other function. ?? creation of peace and condition of comfort for humanity. We will use Rothschild's resources and their development for our work of bringing prosperity and health to humanity, and no other function, (1:36). until the UC orders the next step to take with the Rothschild's family. I have taken this step and I thank the approach by the Rothschild's family and it's the first time we have shown a positive …

This will not influence the operations of the KF, by using and utilizing

It will be keep transparent. ..

(1:38). And this is what we are here for.

With the introduction of the material EU the Rothschild's wealth becomes worthless .. As the banking system collapses

(1:40).
Any other question

Q: .. you saying about the Rothschild's and they decided through their souls ..
K- We do not disclose any further , we do not discuss at this moment. We do not become part of Rothschild's we accepted their offer on humanitarian basis to spread the EU across this planet. We have to come to the final agreement. The whole operation is owned 51% by KF 49% by Rothschild's. .

(1:42).
This process and progress will be announced. the heads of the KF have been told from the first approach to the KF when the R first approached us, and now we are on a daily contact until the process complete. And we thank the HKF Brazil for accepting and accommodating the first contact. And it stays that way and should not be disclosed any further.
Q: . it's a wonderful feeling ..
K- A lot of responsibilities spread across the heads of the KF across this planet. The HKF in Iran, the 2 boys are flat out in making sure everything is achieved with the Iranian government..
(1:44). The Head of Chinese KF ..
Now we see the work of Rafael in Brazil, Brazilian KF has become part of the jewel of this T, in the spreading knowledge across their nations. We see the same thing with the Austrian KF. Klaus. .. North American with John,, Alex in Canada
but it is gradually leading us to where we want to be.

Any other question (1:46).

Q: Mosfeg. about nuclear disarmament, can you go into a little more detail in that?
K- The enforcement of nuclear disarmament, was clearly defined to American administration during the Obama's operation. I met with marines form London, part of the American Defense T. I met them in Brussels, Seoul, and a number of times . Nuclear disarmament is very simple if you know and understand the work of nuclear T.
We have 2 choices .. to change of the Uranium to .. isotopes within the capsule of the nuclear head, or change of the electronics that does not allow the launch. In so many ways, both options are clear to us, we can use. (1:48). The research team in Austria can tell you how easily we can override and make electronic useless by creating a specific type of plasma. Our .. KS in research have seen how the plasma overtakes the current flow and creates its own dimension of fields, we see it clearly in all dimensions using oscilloscopes and everything else. .. we have 2 choices.

The principle nuclear disarmament has been to change the soul of the scientist, the same as we done with financiers. The teaching of nuclear T is not wrong. The use of nuclear T has lead us to this point. As we saw the Japanese used the reactor #1 (Fukoshima) to create Plutonium for warheads. And this was done with the full collaboration with the American administration. The Japanese were allowed by the Americans to produce nuclear material as a plutonium in … which would have made Japan a nuclear counter part at the back door of China. We were aware fo this. (1:50). It was obvious this would happen, .. backdoor collaboration between CIA and Japanese intelligence was launched in mid 1980s to curb the progress and become a backdoor threat to China. As a nuclear physicist and someone who has close contacts with the underground nuclear scientists, we knew the plan. Fukoshima was what I said, an adjustment. In so many ways, what shocked me was that the Chinese government did not make any progress to take this into UN and block Japan. America should have been sanctioned on the hidden development of the weapon T. But Fukoshima brought us to that point, natural balance of the soul, as I call it. And in that process we learned something very clear, we need to change the soul of the scientists of the man not to think of creating, even in hiding, weapon T. Even with the plasma T you can create weapons, if you decide, but the weapons are for the use in space to open dimensions, to create positions, not to damage another soul, persons, or to control humanity through understanding of new plasma. So our progress is in that way. (1:52). In nuclear disarmament it's very easy the way I work, change of the soul, change of the soul of the elements not to be nuclear, to divide, to create fields, or to create a condition, that the whole structure electronically cannot move. We can show this in the nuclear T that was transferred in the 1970s from the US as a warhead to the state of Israel. Israeli's never gained nuclear T, it was transferred (by) the state of America to one of its states. Israelis do not have the intellect level of nuclear weapons. It's the extension of America nuclear T which was transferred into Israel. In this process we can stop. And what I call the ?? last key button in Israel sits in the suitcase of the American president, not in the hands of the heads of the state of Israel. It's there as a gimmick, because some of the Israelis lobbying group in US made this condition. And we can deploy very rapidly to disarm it, very simple. Israel is a very small state we can cover it with 2 systems, (1:54). that no nuclear weapons ever leave the state of Israel. And in a way to change the composition fo the plutonium on the inception of its development within the warheads. So you want to fight the old way or you want to teach the new way. The elevation of the soul of the scientists to never think of developing systems that can harm another, is the only solution, the elevation of the soul of mankind is the only solution. What are you going to do with the next one, the plasma T, it will come what I call, which mankind is not aware of, if you go a step further to understand, cosmic rays under the cover of plasma are much more powerful weapons then mankind would ever come to see. We use cosmic ray packages to resist and reverse some of the motions of galaxies in the U. In the coming time we'll show you. We produce fields at the strength when we cannot support a galaxy to be, not to be harmed, to position and keep a distance, 2 galaxies don't hit each other. It's been many times, the universal knowledge is beyond the understanding of the man at the moment. We can stop colliding of the stars when in their system there are still lives which we cannot remove or cannot reposition. (1:56). We have to change the

warmongering within the STP of the man, and that's where we sit with the problem, not change, stopping nuclear warheads, that a simple knowledge we can do.
Any other question. Next Thursday will be at 2 PM

Break >>> (1:58). (2;06).

Q: When one UC member is absent, can another take his place for a short time, temporarily?
K- This is under consideration for 2 members fo UC, … 2 ways to dedicate or to step down. the presence by the soul is not presence by the physicality. This is what we have to understand, to become mature to. (2:08). If a UC member appoints a support member, it can be done … for a time limit.

(2:10). Any other question

Q: Stephanie .. I forgot the question For the UC .. to be UC you have to know 2 languages, and lived in another country. (2:12).
K- I don't understand what you mean.
Q;
K- That's only for the EC.
Q: ..
K- The EC is a different limitation or principle.
Any other question

Q: Could the material EU produce a EU body
K- What ?
R: .. can the egg lay an egg ..
K- Put it this way there will be a system which will be introduced. I spoke about is 2 3 weeks ago in a very hidden way, that you can produce in the EU, .. if this is the Sun and systems could be the condition of the Earth, Mars, or Moon. You can create systems .. like 3D system which will create whatever you imagined … you want a cup, whatever, you want a transportation system. But you have to understand this will not work as a matter replication, this works on the strength of the soul and understanding of the wish, where you create in the center, where now you have the center to create material from, you create a center, the soul of the wish, and will produce the condition, (2:16). and the system which you want. But that is not at the reach of the man at the moment. But I touched on this in the past few teaching. If you can create a condition of the soul of a planet or solar system, creating a system of whatever you need is not that difficult. It's just creating the environment and the soul for the condition of, I like a cup half to be blue, maybe half yellow, it could be a twist on the yellow side. Mankind knowledge will reach a point that what you envision, you can produce.
Q: What occupies the space where the EU drew its components from through its materials repeats .. ?
K- I don't understand. (2:18).
Q: .. my dear Messiah .. yes as UC we are expecting the light of the Creator. As we ?? this knowledge from the Creator and walking the ethos fo the Foundation, we wished and

now we know, the expectation is not a known. except as 2 souls in peace .. the Peace treaty .. and humanity has to understand this light, this light is in front of us now, I will say that somehow the light is an enlightenment and the Creator has come here to Linz in exhibition, is an enlightenment for all human beings, to give and to receive and about the money, in this physicality it was used as pain and suffering, or it has been used in giving and receiving and in pain and suffering. So this time the money also has to transform, to be peaceful way. (2:20). .. I want to say that the money has to have the value of the peace, if somebody .. I can see the money as an energy transformed in peace received in peace, then only can give in peace to all humanity , because many innocent souls are there to receive it. It has to be cleaned and peaceful …

.. Anyway all humanity has been built out of this ?? box, illusion I should say, to see the appearance of the Creators way with love and care … all the love you have given to us. .. All those that come to the EU have to sing the Peace treaty to be in peace and to understand the knowledge. (2;22). to receive this and be a giver.

K- Thank you very much.
Any other question

Q: Maynath (can't understand ..) If there is no peace things don't add up .. we have people in power they sign a treaty and get the advantage and then tear up the treaty and that's it. What is the guarantee that people who sign the treaty and after they get the power of using this again we people have to continue suffering for a decent life?
K- I think you have not heard one piece of the T, (2:24). which is set in the EU, and that is the soul of peace. In the present system in Linz we have carried through, and the same soul fo Peace will be transferred to all the KF produced systems for the body EU, we actually collected part of this material yesterday, that will be embedded in every EU produced by KF. That every man who receives that elevation, that permanent peace becomes part of his soul. We transferred this from the HKF in the first unit, and as both HKF are of the same ethos, it will be embedded all ..
So you said, people come in and they will change, they will come in and they will never change. (2:26). this is one of the reasons we built these system,
In the coming time elections around the world, not only prerequisite by the constitution of the nation .. by the UC, have to confirm that they have confirmed that they accept and have reached the process of peace in their soul, be it through the EU or other methods the UC see fit. You have to understand most of the people come with 2 agendas into the system, into our lives , privately they want to be a world leader, publicly they are a servant to those who bring them to that point. I met with this challenge with Obama, when one of the KS in Washington delivered to the office the peace treaty, the response from Obama privately was very clear, and I went public with it. From the nations point of view I cannot be peaceful because I have to lead the world. From private life I stay the same, loyal to peace. (2:28). In the large run work of the UC .. has to bring both souls, the soul of serving a nation, and soul of serving man, become one. Many people when they reach the point of power they change position. And this will not happen anymore, this cannot happen anymore.
Q: I hope so

K- I know so, I don't need to hope, I built the system to do so.
Q: And about the Peace treaty.
K- This treaty is there to sign, man has to sign the peace through his soul. This is the cornerstone of all this work.
Q: And you think students have to sign the PT
K- Every man has to sign with the pen of their soul. There are no pens and paper for our children who are born in the depth of the U to sign, .. Even it comes in the moment of anger.
Q:
K- The knowledge which we dispense with is the knowledge of peace …
(2:30). they test us and every time we fail we have to see why, and the reason for it. Where does this take mankind, and what extent is mankind ..
I wonder if we bring a ?? life and put it in the EU and it goes through the process of enlightenment, whatever you call it, if we put back in the same environment, would he kill again? Or would he be elevated that he uses the soul to receive the food, but he still walks as a lion across ?? Sahara. There is a big difference in the social structure of the souls, then in the social structure of the man. And that what man needs to learn from now on, and this is what will be taught in the next 4 or 5 months. The teachings will be very much combined of everything in every session, T, the ethos of U, existence in U, the interaction with the UC and the rest of it. (2:32). It's not subject by subject, it will be collectively, and it's for KS to decipher which part, and how you can integrate.

Q: (2:34). Portuguese .. wants to know about the mutation of the virus we are going through a second wave?
K- The mutation of the virus as you have seen is in the report, read the report, or needs to translate to Portuguese .. the virus will still mutate. We expect the virus to become environmental virus than individual virus. (2:36). In a way that interacts collectively with all proteins. This is a usual interaction in the U, what we see, and it starts in individual and as it grows becomes evolved into a small environment, and then it takes more energy, becomes, creates its own atmospheric condition and becomes environment. And for us to interact at this level is much easier then individuals. And usually at this stage the virus will collapse. What is one of our, not concerns, but what we are watching is how the collective interaction of this virus, long term, in the body of the man will bring elevation to his soul. This is something which mankind has no awareness of. But the interaction of the fields of this virus or other virus which is stronger than the cell of the man, if handled the right way can be used to elevate the STM. As I said, all viruses are not bad, it's just that how we utilize it. This is how we put you in the EU, (2:38). to increase or elevate your soul. But if the world leaders and KS understand this, you can use this energy which is higher then the man, but is connected to the strength of this AA, the way we do with some of the KS which has used it, you will se the elevation of the soul. So there is advantage to this virus, what we are facing with now.
Q: .. in one of the teachings you said you were able to feel the fields of the virus when you were walking in the supermarket. He is feeling this too, and would like to know from you if it is the virus of the fields, or not .. usually he feels in his stomach and the sides of his belly, So would this be the fields of the virus, he feels some pain in that area?

K- All of us have the possibility and ability to feel any fields. (2:42). Not necessarily just only the virus, and this is what we can do, not only one person can, many of us we feel it, you walk into an environment and it's there. We see it, I see it quite frequently, other people, it's not unique, if you are tuned to your environment, to your soul, it should be very easy to see.
Q: .. after he felt this he think he got the Coronavirus for the red tissues, he became more sensitive for these fields.
K- A lot of us will feel these fields, because it touches our emotions, just like the way we catch a cold, (2:44). many of us know when we are touched by this virus, because now we are aware of it, because now we know it is fields and we know when we sense it. .. part of the strength of the virus, is at the strength of the STM, that's why it interacts, our soul is created from the interaction of the AA of the body, so if it has a strength that it can interact with our body, it will interact with the STM too. This is understandable, some of us will feel it, because its at the strength of our soul which is created by the strength of the combination strength of the AA. It's very much like we know when we die, we know it. Many people feel that point of saturation reaching the maturity of the soul, days or weeks or months before, and they their family, or people near by, who know them, that I know I am going to … way .. hello ..
our soul .. many of us become aware (2:46). .. we can know .. I know such a time I'll die.. Because it is within our structure, we know when our soul is fulfilled, and we understand the process, very simply.
Q; (2:48). to update you , he was infected with virus … after all this procedure with the Gans water, he became more sensitive for the fields, especially area of the belly, abdominally area.
K- Thank you ,, Now that we understand the knowledge of the soul, of creation, we should understand we are part of the collective soul of the U, and how do we interact with it, and gradually as we were not aware, we always put it as magic or surprise, (2:50). or we could not explain the fundamental knowledge behind it. Now we just need to look into the field strength of it, understand it is part of a bigger structure, where it came from, how does it interact and how does it make a creation of condition for us. And this is what we call elevation of the STM , elevation of understanding the new knowledge. It's understanding and processing the new knowledge. It's not what does it mean by elevating a soul. It means to be able to receive higher order knowledge, enlightenment. And that enlightenment comes as a light to the strength of the understanding of the comprehension of the knowledge at that point. If you only can see to the red color, if you say, that gives you the knowledge of understanding of the work of the U at the base level, human race. And then when you enlighten and let's say you go to the green color, strength which is more, then you understand about the creation fo the same thing but in a higher level, more, much deeper, and it's this process that we need to understand. And this is what we have to understand, that, then let's say we go to the white light, which we get enlightened to the level of the creation of the prophet, or the Messengers, (2:52). or the people who have more knowledge of totality. And then if you reach, what we say, the color of the gold, which is the enlightenment of the Creator. When we see in the aura of a man, the sign of gold or white, we understand his position. The way we see by the light, somebody is red to us, it means danger to us, maybe somebody else sees as green , the same field, because ?? can exist but for us it means we have to give something, are we ready to give.

Many of scholars or people who are versed in these understanding of the auras they see, they always tell me what they see, they see a white with the gold. Or more times when I teach they see, they observe my teaching, they say you enlighten with the gold. Your aura changes. It's understanding fo it, it's understanding to the man, the gold color, means the highest value, we value something. And it could be another interpretation to another soul. So what we need to understand, the teachings, is to enhance the knowledge of the higher order for humanity, or any culture. This is the process we go through. But would it allow us, this knowledge to extend our manifestation to be in different strengths dimensions, yes. (2:54). In a way, if you look at it, it's like an adapter on a wall, where you switch the light on and adjust the dimmer to brighter and to maximum. Now we have given the knowledge to man to control this dimmer. But still there is a maximum if you get to the highest. So up to now it was just when you switched the light on, and you see the first shimmers of light in the bulb. That's the state of the STM at the present, because the knowledge is very limited. It's the same energy, the same love, same principle, then by knowledge you increase it a bit more, it's the same bulb. It lights a bit more. You can see more, it's not shadows of the shapes, but you see more of it. It's the same with the knowledge. We enlighten you, so by enlightenment you receive more, in that process you see more. But nothing has changed, the furniture is still the same. And then when you put the full light, then you see everything in totality, and that's what it is. And the knowledge and the teaching is on this basis. We just (cut ..) (2:56). … It's an enlightenment when we teach, it's the same current going through the structure. It depends how tuned your soul is to receive the knowledge, and what does it interpret by that knowledge. This is the essence of the teaching, as we said, the love of the Creator is equal to all men, it shines on all, it's the same current going through the same wiring in the house. One room you dim it a little bit dark, because you want to sleep, you don't want to see. You don't want to understand what goes on. In the other room you light it a little bit up, you want to keep a calm situation but you are there. In another room you want full light because you are working. But in essence it is the same current through the wiring of the house. We have to understand that the knowledge is an enlightenment. What does enlightenment means? It means according to understanding of our own creation and environment we lighten up the same, but different people with different understanding, get enlightened in different way, but the knowledge is the same. And this is one of the reasons I say in the KF, we cannot keep on copying, we have to add to the knowledge of what our soul carries, (2:58). shows its beauty to us. Mankind has to evolve to understand he is much higher than what he is today, … that he represents more which he wasn't aware of up to now. It's just .. we call human race the 4 wheelers, .. because human race sees motion in 4 wheels, as he can do, as they found the cart and the wheel. But that was the past. At the moment, with the knowledge man has achieved, .. is heading many things in the U and the creation by conversion of ?? and matter. It's not that mankind is at the bottom of the ?? barrel. As you take knowledge from the U Community some of the knowledge is even in the essence of the STM, is taught to the rest. We are teachers while we are students, that's why we call you KS. That's why I call myself a KS. I seek the knowledge of the creation and the evolution of it, not that I know all and that will be all. That's why we allow KS to show what they achieve, because they enlighten, they bring addition, and this is how it should be. And we have seen those who get lost in the power of seeing one little thing, and they think they know everything. Then we see they create their own demise,

because that's a level they reached. Maturity of the man comes in his humbleness, not his arrogance, and when you have the knowledge, (3:00). you become humble, because you know you can do, and what you can achieve. Many people think we are stupid and we let go of everything or whatever, no we let you to understand your own capabilities, your own power, what is essentially you. What does it mean to be a human?
Any other question.

Q: .. I requested to talk to you about the situation in Bulgaria, No one contacted me, Did you forget me?
K- No, we got to much to do. It's not forgetting, there is a lot of things to do. (3:02). We try to come to you to understand ..
Bring a number of KS into the meeting so we get a spectrum ..

(3:04). It's very harsh to try to answer all the needs of the KF as it is growing ..

Q: .. my concern is the women and children starving to death in a world of plenty .. repeat .. situation of starvation .. would the EU address this situation (3:06). It seems to me the Creator would be weeping now watching humanity letting people starve to death .. ?
K- We have weeping many times, but doesn't mean we can give the solution to mankind, and mankind will follow. One of the processes which will come .. is the known knowledge in the U Community, is if you understand the extension of , food being a M field based energy and understanding that even the present knowledge of the governments, we can mount systems in the satellites which is launched to fee the mankind through transfer of plasma energy M field. Is not hard to do. The Chinese government is planning to launch some 5,000 satellites in the coming time, as we know, that we were asked if we can introduce the space t into it for the launch, some times ago, in a way it is easy to do. We can build a small system in each of these satellites to feed the humanity. This is not a T we need to do much with, but we need the collaboration of governments at that level. It's what we call a peace dividend, we seen it before. The use of military satellites for a peaceful application. (3:08). It is possible. This is the part where UC comes in to negotiate with government. We saw the surplus capacity on the satellites brought, the initial stages of what you call GPS at the moment. Why do you think GPS took hold so fast in the 1990s, it came at the end of the Cold War, many satellites that were put use to map the Eastern Bloc and China became useless. What happened, Israeli scientists, could see it .. develop the GPS with connection with US government .. .
A company called Blue Planet ..

(3:10). It's very easy, it's the job of KF KS ..
We cannot reach the satellites which are up in the air at the moment, it's to convince the government and organizations who launch the new satellites to allow plasmatic system which doesn't interfere with the original plan of the satellite to be added to the system. But it takes the energy from the U in a given dimension and strength and feeds back into the planetary system, the way we cover for satellite coverage. We don't need to do the full spectrum in one reactor, each reactor can carry one, one reactor carries vitamin c, another

one carries another one. I looked at this when the Chinese asked us if we can help with the launch of these satellites in , the low orbit satellites. Unfortunately with the Corona we are not in China. Hopefully, with my return to Iran, and I am taking the lead in scientific organizations, we'll enforce this through, .. the office of the presidency of Iran. You will see the emergence of a new leadership, where the science will take over the political.. we'll lead through the soul and knowledge and not through the guns and diplomacy. It's a new cycle ..

(3:12).
It's in progress.
I have accepted the leadership ..

Q: It's very beautiful
K-

(3:14).
My plan is the meeting of heads of state in Tehran in the coming time, to plan new financial structure, new leadership, that our leaders are elected by how they can scientifically serve the man, and not through taxes because we don't need to pay any taxes. You'll understand this very correctly in the coming time. You can create you own food ….
Q; Time to work on ourselves with the leisure time that we have.
K- In a way, time to serve us as a human race and the rest of the U Community.

(3:16).

Q: We do that in Australia, we plant herbs and vegetables on the foot path for people to take.
K-
The cruelty of man is beyond imagination .. man wants to be cruel, and if you give your life to serve you accept the alternatives of it. (3:18). And it touches us individually, social structure and nations. ..

There is a reason we are at this point, learning what we learn, and it means we are ready to take the next step. And mankind is in that step, world leadership has lost control, we can't even control our cities, we are all in a lock down. We look at it as a bigger plan. There is a bigger planned, even as they planned to do. There is a plan for that, because it is there to create the next condition of the freedom of the man. Everything is not as bad as you look, but we have created the condition for the whole of human race to elevate in the coming time, and not just by nations and boundaries. You got to realize something very fundamental, with this Corona and lockdown, they are locking down big cities, nobody is locking down the villages, the small towns. What is the big plan, why do we only concentrate on .. cities, because there is a political agenda behind it. (3:20) . and .. suit the process of the KF, bringing of the T, new changes, absolutely perfect, but to the eye of many of you, there is a sinister job behind it, yes there is, but we looked at the

opportunities it has created for development and spread of new T, and with it the elevation of the STM.
Q: In service we thrive,
K- In elevation we get enlightened
Any other question.

Q: .. if Nano and Gans jewelry is safe to wear ? (3:22). Korean lady asked why the Nano coated belt made her feel so good, He said, not to wear it all the time, any organs near the N coated wire would become lazy and loose their normal function and that would create a bigger problem.

K- I always go back to one thing … moderation in everything, eating, pleasures, in everything brings a balance in life. The N material, Gans N coating, in moderation for the term of use, yes. But long term or frequent term of use can bring changes, because it directly is a Gans, N material interacts with the fields of the body. But it takes what it needs from it, but in essence we have to be very careful that we don't create a local condition. We got to realize with anything that is N and Gans like braces (?? bracelets) you are dealing with a dynamic energy, and your body carries a blood which is dynamically interacts, it's ?? dynamic fields continuously balancing and taking from, (3:24). but at the same time you have a bone structure, muscle tissue which is constantly kept at a certain strength compared to rest of the body. In a way, if you move it around the body to bring a balance, yes, but not even frequent, on a continuous basis. Even when you go into the EU it's the same, what we said, … the best one we know is the creation of black diamond. … every women wanted to have black diamonds because they were very rare, but no one was told these BD were created in Russia using radioactive materials. And what it actually did, they bombarded one of the cells, or one point of the structure f the diamond and it created a gaseous …

created bone cancer ..
Many women died of it.
But with the Gans's and plasma T you don't have that problem. but in moderation yes. (3:26). R- share pictures of greenhouse. this ivy has goes over to Gans and another to the N coils … this plant has gone over to them ..
It knows there is something good there .. (3:28).

K- Did these plants grow to them?
He pulls them or they go themselves to these positions?
The best example of this is the Sunflower. .. they are all turned to (sun)
we never understood why, now we do.

When cloudy all the sunflowers are bent down. Because the strength of the sun is not that of the soul of the planet, so they are all bent down. They all collectively feel it. And then you pass a few hours later and you see they all rise up and are following the sun. that is not by heating, but by the strength that reaches the soul, that you follow to receive. (3:30).
Any other question

Q: .. CERN in Switzerland was trying to create a Black Hole, as far as we understand from the outside it has not functioned ,, failure .. they want to try again ..
K- Let me come into it. The thing is scientist never fail, they just don't achieve what they go for because they haven't understood the conditions. Maybe they achieved something else, (3:32). but because they were not looking for it they missed. The CERN is heavily financed and backed by the Iranian scientists, and government, one of the major contributors is the Iranian government. Because I know a couple scientists that are there. They look for a single thing , and then they miss a lot which has happened because they are not interested. But later on they found out what they ignored …

Q: .. Some physicist fear they could make accidents , problems
K- Creating black hole, is the knowledge we already have. You can do it, creation of plasma, or ?? Gans. You don't need to go to CERN to do it. If you read my paper about creation of BH. it should be very easy for many of you to produce it. (3:34). But one of the biggest fear of these scientists … what would it suck in .. they have some valid concern, but in eh condition of their knowledge, this is the problem…

Scientists in CERN have other interests outside..

(3:36).
Q; I think some of these people's concerns

K- CERN has 80% military application and 20% civilian, we know this. CERN has never been built for civilian purpose .. Now the Chinese are trying to make a bigger system them CERN. ..

Defense laser T. It's not just faster speed

(3:38). Initially was to build a collective plasma laser beam ..

Q: . can we hope that CERN will slowly disappear and no use anymore.
K- Maybe, I have the same concern with the plasma T. There is some concern. I looked at this some years ago, because … some of the people who were during my time of education in Queen Mary, went to CERN ..

I came to a conclusion at that time . (3:40).
This BH will not be created in the center of the (reactor) it will be created in the center of the CERN. If you 1 kilometer, it won't happen in the center of this ring, it will happen in

They create the boundary of the BH..
The plasma works through its center ..

(3:42).

If you can produce this you an suck all the energies ofteh U because then it feeds the center. This is the beginning of the end, but would the BH suck everything in? (3:44). So on the other hand means they haven't reached it .
all their electronics would have been interfered with.
Plasma saturation overrides matter state.

Q; Aren't they running an enormous risk?
K- Not really , the mass of the rocks will absorb the energy ..

(3:46).
If they would have built tunnels from the center to the rings they would have seen a lot.

(3:48).

Q: .. this weapon T,
K- This is the American mentality ..

Where in the ethos of the KF, (3:50). we are giving so much knowledge that man does not kill, we achieve peace without weapons. As I said to president Obama … when we gave him the Peace Treaty, … he wrote a very long 2 page letter to me, and he started with the worst thing, he said, "Dear Mehran." He just took my heart, I said, now I know what I am going to get from him. And he wrote in there … he was trying to explain that why he has to develop weapons T, have the most advanced weapons T to be able to create peace by being a superior power, by being able to kill and destroy as much as possible. And I wrote to him … I said, Dear Obama.. my way and your way are two totally different and they will never meet. It's how we reach it.
Q:
K- It's the essence of superiority by who paid your bill. This is what I said very recently, we don't sell our souls. If you knew what I have gone through to keep what we have, and the way we have, you don't even want to know. And I still stand, I lost my children, I lost my home, I lost everything possible, my health, but I stand by my ethos. (3:52).
Thursday when I was teaching in the center my house was locked, and I became homeless. Again, by those who betrayed the Foundation. They knew I was in the teaching center and they broke in and I became homeless, again by the same misconduct Belgium's. I paid a lot for the Foundation. This is not unfortunate, this is how I paid ..
Q: I showed to everybody on the website
They took everything from me in Saravo.
K- But the thing is what we live, and what we believe in is 2 different things. (3:54).
Q: But if you keep your personal Ethos. you will get everything you need to live . I now have everything to live .. but within me I have peace, if I would have listened to them , what would have become I don't know .. where would my inner peace have gone, and without that inner peace there is no reason to live.
K- You see it's the ethos we live by. When I found out how Derek, and Alan Sterling was using the KF, how he was actually using his own server as an IP to see who is coming in and who are the children to pick up. For me it was straight cut to go for it, even though we saw the damage that came to us. Now we see the same structure has come up on the

same basis, the same people, trying to setup a website to get the new women and the children into it, by "sisterhood' and the rest, to pick up your IP's to see how many of your children and your family will disappear by the new structure they are trying to setup, again by the Belgium's.

(3:56).
You will see invitations with F links. …

(3:58).

I have to protect you too. .. even when we come in touch with the U Community, their health has to be protected … this is part of the ethos
(4:00).
This is part of the ethos of universal knowledge ..

we care for them more than we care for ourselves ..

Q: .. (4:02). as I am learning this knowledge and all the steps of creations ..
why when they understood the knowledge it didn't change them (Belgium's)?
K- They never understood the knowledge .. this is the essence of it. People who came with clandestine activities, their work and their way, they never understood the knowledge. Show us what they contributed anything into the development. They never, they pretend, we have seen many of them. .. And those who made a screw and they went, they found out the screw doesn't fit anything, even they thought it was the biggest innovation and invention. The reality is the totality of understanding, we plan for the safety and we progress in that direction for the safety. And the safety of the others, especially in the world of creation has to be paramount to ours. (4:04). If you give a knowledge and you have a fear what they might do with it, you had better don't give a knowledge. .. but with the joy that I give, that you progress ..

elevate the soul of the collective .. counts a lot. You just become aware of the family .. now we have found our distant cousins.

(4:06).

Q: .. before I never appreciated my existence

(4:08).
..
K- .. if you look at the bigger structure of your existence, as a UC member, when you came to the F, .. I look at it from the soul, you have initiated the first steps with the .. Brazil and Iran, and will extend to America, Israel, in a way a soul serves when it goes into sincerity. We always use a spark to start a fire, but in how we control that fire to give warmth or to burn down is the responsibility of the man who starts the fire, and many of us we don't see the significance of what we do, and what we achieve, with a little actions we take, because in a way we see it as humbleness to serve, it doesn't matter what it is,

(4:10). and in that process we create conditions, because we are sincere to serve the soul takes us to do. .. the outcome as to what it will be, is to take the step in a sincere way. And if you pre-understand what is going on, and you take steps to do it, yes. But if you go to the position of being able to create condition to harm, you'll be harmed beyond, harmed behind. In the process mankind has to be correct in what it does … the whole structure of the UC goes the same way. As long as we don't become arrogant .. we reach our goal. .. it doesn't mean we have to all the time be in that position, we wait for the time we are there to give for …

Q: .. when you become arrogant you loose that joy. ..
K- No the people who become arrogant, they have a new type of joy
Q; .. when you are humble.
K- You are not in their pocket. (4:12).

K- I was talking to a priest and I explained to them, even if they do things the wrong way, it will end up the right way ..
But are they doing the right thing ..

Q: when you have the joy of the soul it's unconditional . you have it 24/7
K- I am going to tell you something Azar, do you fall in love part-time when you are asleep or awake, or are you always in love.
Q:

K- It is what I call English mentality, (4:14). when we paid our employees they come and collect their wages ..
they budget their pleasures and time them.
K- When you work to live, you don't understand the pleasures ..

(4:16). People of the F should not need to work to have food, to have health security, . and 50% of their wages to government. ..
It's the humanity has to change the ethos of work ..

Thank you for today.

I will not separate the teaching with the ethos and scientific together, I always teach them together ..
(4:18).

I hope we go much further ..
we might show something, but first it will be shown to the world leaders that they understand we are in charge of the new condition on the basis of equality and peace.

(4:20). 351 KSW

END

352nd Knowledge Seekers Workshop; October 29, 2020

Next level of Universal Knowledge
Cornerstone of knowledge creation is how the first atom was created
Invisible Plasmas - Universes planetary Systems
How to bring any plasma in touch with Inertia to create any element
Man has the ability to create a soul of any element
Man can create a perfect soul - not cloning
Choose in which dimension to manifest yourself, and the color of eyes
Languages are learned through the essence of the emotion of being
We can dictate the destiny of our existence in the physical dimension
Able to absorb the fields of Universe
If we can control Interactions of STM with STP - Eradicate Genetic Defects

How the First Atom is formed in detail *** Break Through Deuterium

By conversion of neutrons to electron and proton man can create new matters
Man needs this knowledge to enter the Universal Community
New Science is Not Fusion - Amalgamation of Field Forces
Size of Neutron is Different in Each Universe - Common Denominator
The common denominator is not neutron, but fundamental rays photons and particles
KF will release systems to demonstrate this
We will change the plasma of an environment - like with Corona
New Systems - Walk in with Corona, Walk Out Without Corona - Permanently

Fundamental Rays are the Mother, the Creator
Fields (Rays) Bounce off their own Environment as well Get Absorbed

The Structure of STM - Collection of Field Forces held in their Energy Level
No "Dark Matter" - Dark Plasma - Lack of Interaction with Environment
For Plasma to Manifest Doesn't Need a Perfect Fit - Leftover Fields Released
Isotopes are Leftover Plasmatic Fields that Still Manifest
If Plasma Matches close enough it will Manifest
If create conditions have everlasting supply of what you need
Fundamental Ray part connects to Creator - Planet part to Physicality
Instead of Increasing STM - Burn a hole - Create Envelops
14 Days to Establish Soul in Womb of Mother
Deeper Understanding of Creation of the Soul to understand Totality
(Question on karma not answered ..)
Create a Soul with 5 Cups - Experiment with Different Inertia
A Center within a Center, within a Center …
Every Soul Becomes a Star
Companion Energy OR Interacting Energy

Different Rays make up Different Qualities of Personality - Universal Rainbow
Effects of Cesarean Birth - Plasma Point of View

Painless Birth through EU
The process is we transfer the soul of the child from the womb of the mother in the dimension of its physicality, to manifest itself outside. This is something which the F is already working on
the man can live in both dimension, that one doesn't become a hostage to the other.
Soul of Child Will Create a Perfect Physicality
Beautiful Indian Devi Shares with Mr. Keshe - A Divine Person
Everything Out of the Nothingness - Who Created the Fields
Where has all the Energy Come From?
I am the Creator, (2:06). and in essence I created all within Me, from Me, and through Me.
The UC Invites the Rothschild's Family to Sign Peace Treaty
We ask Rothschild's to elevate the soul of the UC
It's a New Dispensation - No one can Stop It
Explain the Origin of Hydrogen
Not Every Passing Plasma will Convert to H
Core of this Planet is H Based Plasma - Why so much H
We Explain in more Depth that you can Convert to Totality of Knowledge
Soul Taught by Gaps of Silence - You repeat Back in Words
one by one, many of you will return the message

ENGLISH TRANSCRIPTION

(:06). .. … It's the first time ever we rounded it 12 hours from the first day we started. We started about 7 years ago about this time, and we used to start at 4 AM with Mr. Rick Crammond. Now we managed to delay for 12 hours and do it at 4 PM afternoon for the first time. .. Thank you very much Rick for being there such a long time, during the late night early morning .

In so many ways, we are very upbeat, very **happy to teach in the next level of the knowledge of the Universal Knowledge**. What this means as I explained some 2 - 3 weeks ago, as of last week we entered the knowledge that is used in the U, not the knowledge which the man has gathered over time, in bits and in a way, he has progressed. Mankind has been positive in being able to at least ignite his brain in a way of understanding part of the work of the U, and this in his own environment and his matter state. As we said, we have to understand the totality of the science of the U, that as we entering in the deep space, we know what we are doing, we know how we can use everything, we cannot go as I said with a donkey, (:08). trying to use a spaceship, and the knowledge of it, how to handle a donkey and try to fly in a SS or further on, within **the structure of the energies, which is hidden within the structure of the body of the man, in different shapes or forms, we call it a soul, the totality, the center, the son of**

the man. In so many ways, when in the holy books we read about he son of the man, the son, not as a son, but sun as a light, enlightenment. And this is interesting to understand the creation, the cornerstone of how life, and how energies lead to creation of the first atomic structure, first molecular structures. First understanding of the energies of the U, in their motion.

Knowledge of the Universe - We Need to Know How First Atoms Created

In the last couple of weeks as **we opened the Knowledge of Universe (KU) we explained in a very simple way how atoms, or how first plasma were created**. But in reality, we have never fully understood the structure of elements of the creation. Do we have atomic structure in the plasma, which means, fields interact but they never create the dimension of matter state as we see it. How do they exist? How does the first atom ever been created? Do we call an atom, a atom of H, which is an electron and a proton, or energy balance of the 2, or do call a combination of the atom as totality of the energies, (:10). of balanced fields of the proton, neutron, only in the center, and collecting electron on the boundary of the energy. **But how do we get the first electron and proton in the center of an atom? In a what we call, Deuterium**. How has it got in there? How is it created? **What is the cornerstone of the creation, what is to understand of the totality of the knowledge of the creation**? How do you put the 2 together to get what you need? Where does the essence of the creation of the atom come from? What dictates the M field strength of a plasma of a neutron? What dictates the size of a electron?

In space we need to understand this if we are going to survive and we are going to create a condition of life, and systems that we can live, we can utilize the energies of the U. In the present knowledge of physics, In the present knowledge of atomic and nuclear physics, we don't understand. We have never been explained, how an atom of D come to exist? How does a H atom as a single proton and electron exist? And what forces H to be both, in the dimension of single Proton and electron, (:12). and single neutron, electron, and a proton. Where does the essence of the creation comes from, where and how these plasmas in upper atmosphere, or from the interaction from the fields of the U upon each other, create these plasmas?

Invisible Universes Only in Plasmatic State

Mankind has to become clear about one point, atomic H, atomic D, atomic T, or a neutron is not specifically characteristics of G of fields environment like Earth's atmosphere, like Moon, like other stars. **We have the same things within the space gap of the U, between the planetary systems,** between the solar systems, between every other thing. U by the interaction of the fields continuously produces these plasmas, these M fields. That for themselves they create environments within the structure of the U, that **they create what we call invisible stars, invisible solar systems**, invisible what we cannot see, but not being in a matter state of more or less, planetary system. What this means? It means mankind in the space will travel in fast moving environments, that suddenly realizes that he is traveling within the structure of the solar system, or planetary system which is just only in the form of the plasma, and has not physicality. **And if we**

enter such a position with a specific energy characteristics of a spaceship, or even the STM, (:14). these environments could change suddenly into a matter state, because we changed suddenly the dimension of the strength of the fields in that environment. In the course of the travel into the depth of the U, mankind will come across this. Our systems will come to understand the existence of the plasmatic U, plasmatic stars and planetary systems , that they stay in a massive energy pack, and with the present systems that the man has we do not have the understanding and the detection of the confirmation of their existence.

In the coming time, now that we have developed the universal flight systems we will be, and we have to understand these. **One of the cornerstone of the knowledge is understanding of the creation of the first atom, be it in the plasma state, be it in the matter state, be it out of the creation of the interaction of the matter or plasma together**. In the structure of the new plasma physics, in the dimension of U, we have for the first time explained how is an atom of H or D is created. We have just accepted it. We have never explained the depth of it. We have never understood the principle behind its creation. In so many ways, we need to understand this, we have to understand how an atom, especially atom of a higher order, are created. How come we have so many single neutrons, (:16) in the environment of our atomic structure of heavy element. How do these manifest themselves in plasmatic conditions.

The **biggest dilemma for the present nuclear and plasma physicists is to explain how we can create an entity, in magnitude, in strength and size of a neutron.** We have never managed to do this. Our knowledge with everything we have, **our scientists have not managed to fully understand the structure and create a single neutron, and then control and watch the cycle of its life, its decay, its atomic decay, what we call neutron as a fundamental plasma**, that it's existence and its interaction as a field with, the field of its environment, leads to the losses of energy due to field friction, that plasma of a neutron cannot sustain life as it is. What does dictate the point of the division of the neutron? It's unknown up to now. And what dictates how much will we taken from, or given to, that certain electrons finds a space gap and distance from the center of the matter element.

Questions about Plutonium and Electron Orbits and Inertia States

One of the **biggest questions I put to many scientists and during my student** time to the nuclear physicist, (:18). is very simple. We say we have **plutonium, what electron in the orbits of plutonium or uranium belongs and connected to which proton. And what is, it's sister neutron, do we always have only a specific electrons in a specific position in the nucleus of the element that covered that position, and due to its existence confirm its position in the structure of the whole atomic structure**. And how come in the plasma of physics we see one, and when we bring it into interaction of the physical matter state of Inertia**, it breaks itself up into electrons and protons and manifests itself as a solid uranium**.

In Universe have to Convert Plasma to Matter

In the understanding of universal work, we need to understand these, because in the U mankind will come in touch with matters much, much heavier by order of magnitudes, plasmatic environments than any matter state man knows up to now. Or in the sub-atomic, the understanding of the work of the U does not come by bypassing certain fundamental principles and understanding. And the present physicists, as much as the present KS have to understand these (:20). as in the coming time in the space, you become cosmologists, you become the physicists. It's you who has **to understand and analyze, and understand the fundamental structure of any plasma, and how can we bring the center of this plasma in touch with the Inertia of a plasmatic field to create a plasma of an element, or with the Inertia of the matter state, and convert the same plasma to matter state of its existence**.

With New Knowledge Man can Create a Soul of any Element

In a way we have to understand this, that in the depth of the space we should be able to create any matter by directly or indirectly introducing the Inertia and MG field forces of the environment, to manifest the matter or the plasma according to the need of the man. If you understand this we will understand a simple fact that **man with this new knowledge has the ability to create a soul of any element.** And this is the major understanding which the humanity and the rest of the, what we call, the systems of U, have to, we have no choice, to come to understand.

Man can Create a Perfect Soul

But it is not strange that by collective energies of the given environment to create the soul, to create the existence. **We do that in the womb of the mother, we bring two different fields together, and from their interaction, (:22). we create the soul of the child**. Then the soul of the child has a measurement, has an understanding of the strength, and if we get to this point, then we become the creator of the souls. We decide the creator of the creation, what to create. And when we create that, and we bring it in interaction with the Inertia, or M field of its environment, would it change to a fish, or would it change to a man. Have we, or can we get so advanced that we can create in essence the strength of the STM, that when we introduce it to atmospheric condition of this planet, as it creates gold and silver, we shall create man. In the old way in Farsi, we used to say. ?? means God forbid. But now God allows, we are taught, we understand, and scientific organizations have to endeavor to understand more of. If making what I call, cloning, now we have to **understand the essence of the truth of the soul, that we don't need to clone, that we can lead to the creation of the perfect soul**, that through its existence through interaction of the fields of its environment will change to what is the desire of the man to enjoy, and not to possess.

Man will Choose Which Dimension to Manifest - Matter or Field State

The teachings are become more, in a way of you triggering your own knowledge. (:24). Looking in a broader way at the totality of the knowledge, **and in essence trying to**

create a condition that a package of energy, according to its strength can exist, and absorb, and give, and coexist with other elements and convert to what man needs at the point of the need. Understanding of the work of the creation, the same way. It just needs a little bit more observation, a little more depth of understanding, in understanding the totality. **Where does the man will end his own cycle**? Do we restructure our physicality, and in approaching a position of desire, we manifest ourselves from the interaction of the fields of our souls, and the soul of the planet, or do we manifest ourselves from the interaction of the STM and the Inertia field forces of the planet. **We choose our existence in which dimension we want to manifest ourselves, in a matter state, or in a field state, and in what strength of it**. And in that process with a given M field, (:26). then the structure is decided.

Man will Choose to Change the Color of Eye, etc

In so many ways, in the coming time, the **mankind will decide through the interaction of the fields, as they understand more of, in respect to the environment and the Inertia, and in respect to the field sources of the soul and the planet, to change the color of their eye** by choice, to change the color of hair by choice, to change the structure short, tall, blond, blue, mankind now is given a choice and the T to be able to be able to reach this point, and this is part of the KU, this is a universal knowledge, because as you enter in the U you can decide how you will look to the man from planet Zeus. Maybe yellow color from man of Zeus is a sign of love, and a red rose could be death.

Don't Learn Language - Exchange the Essence of Emotion of the Being

Then you have to understand the strength of the soul of the what we call the KU. Then you understand, **you don't need to learn the language, you only need to learn the essence of the emotion of the being**, and the language of understanding will be spoken through the fields of the U and exchanged between the 2 souls. (:28).

We Can Dictate Destiny of Our Existence - Absorb Fields of Universe

In reality, we have been given, **now we are in possession of a knowledge that we can dictate the destiny of our existence in the physical dimension**. Do I want to change my position of physicality, in a hundred year, in 200 year, would I like to be shown I am 18 after 3,000 years. Or have the energy strength of a wise man ?? With the new understanding do I want to possess the knowledge of the existence? Do I want to develop a T which will effect the total existence of the man, and at the same time would I be able to create a condition to **bring the absorption of the fields of the U in my possession**?

Control Interactions of STM with STP - Eradicate Genetic Defects

In today's teaching I try to explain **the fundamental understanding of the creation of the atomic structure**. This was explained in the past few days to some of the KS, and it is as I said, **when we share with one, we share with many**. And in that process mankind has to understand, (:30). the structure of the creation of his soul, and its existence. As we

say, as 2 plasmas interact, the interaction of the fields of the 2 plasmas, lead to creation of the friction, it could be light or another element, as we see the interaction of the fields of the soul of the Earth and the Sun, will lead to creation of matter state of planet and leads to creation of its Inertia. Then what would happen when **the STM interacts and we control with the soul of the physicality of the man, then we can in essence, by understanding this eradicate any genetic defect in any human race**, or anyone in the space. **If you understand how to interact the STP in the matter strength, and in the energy strength, and in the plasma field strength with the STMs field strength**. Maybe one day mankind will come to a point that no child will be born with no, at all, zero defect, perfect children according to the structure of the physical and biological structure of the matter state of the life on this planet.

First Atom - Interaction of STP and STM

So in essence, how is the first atom created? (:32). When we bring the STP and STM together, the interaction of the fields creates the physicality of the man, and it maintains that physical condition, we call it the body of the man. And when in the essence of the creation of the U, mankind understand this, man in the world of the science should be able soon to develop T, that would lead to understanding of the new science, science of the plasma, science of understanding the work of the universal plasma.

How the first ATOM IS FORMED - Main Teaching**** Deuterium

In the **interaction of the fields, the residue fields leads to creation of the plasmas**. This we know for a long time. When we created these plasmas, in understanding of the structure and the interaction, they create what we know as "twinity," they interact with each other, and in that process of interaction, some loose energy, and some gains energy, and at a given point, **when the interaction of the 2 fields cannot sustain the totality of the energy, due to the losses to the environment**, (:34). something very simple happens. The one which has held to more energy, or plasmatic condition, will stay. **The one who has lost will split, and lead to creation of first atomic structure**. As this (the 2 that were split) still interacts with the totality of the 2 (of itself), and this (the plasma that did not split) interacts with the totality of one entity (all 3), and in total you see the structure of an atom. In reality, and creation of what we call, **atomic Deuterium, comes from the interaction of 2 neutrons**. That as 1 looses fields as a twin set, it leads to creation of a proton, electron and a neutron, which the interaction of they by themselves, creates that atmospheric environment, which manifests itself as a single atom. Then in the interaction of these fields, with the fields, or planetary fields of a space, it lead us to the creation of the matter state. So **we can have the existence of both plasma and matter state simultaneously in both dimensions from any elements, depending on what we condition the environment to, that, what that plasma will manifest itself in the form of**. (:36).

In so many ways, for **the first time in the world of T, science, and physicists**, subatomic physics **we understand how the first atoms are created**, where they come, from the interaction of the M fields of 2 what we call, volume of fields in plasmatic

condition, that in loosing one, one divides itself to maintain the property of the interaction between the 2 original neutrons, and hence leads to creation of what we call, twinity of electron, proton, and neutron.

Why Additional Neutrons in Some Elements - They Can Split - form new elements

Then what has been **one of the biggest dilemmas in the world of physics, has been how some elements have additional neutrons in the space gap of their elements of protons, where we find less electrons in comparison to the neutron existence. Would there be a time when the neutrons in the atom will split and become another electron and proton without the structure breaking up. Yes,** from now on, these things are possible. In a way, in the nuclear atomic physics of the U, (:38). we can allow every neutron to be converted into an electron and a proton on its own, and then at the same time due to interference and interaction between the fields of the new entity, create a new material that man did never know can exist, **by conversion of neutrons to electron and proton within the center of any nuclei, or nucleus of any element, man can increase in the new dimension and create new matters** that has never been achieved. But by creating a M field environment of holding, new elements can be created. Today's knowledge is deeply embedded in the plasma T of the space, embedded in the plasma T of the U, and as I taught you about the 5 Cups, in the coming time this knowledge, the teaching of today, becomes the cornerstone and in a way, the "alph" in the alphabet of the universal knowledge of plasma. If you do not know how the first atom is created how do you want to handle the bigger or convert. (:40).

The creation of atomic structure and the fundamental atom, and Deuterium **will be one of the keys for mankind entering to U Community knowledge of creation, without it, mankind will be paralyzed**. The knowledge will not be complete, and forever as you never understood the initial algebra, how do you want to do heavy calculus and the rest of it**? The cornerstone of the teaching, what I call, the creation of the fundamental plasma, and the fundamental atom**, as we have seen in the past week and today, is the stepping stone for mankind to learn how to change and create matter and elements in the U.

New Science is Not Fusion - Amalgamation of Field Forces

How can we create the condition that the 2 plasmas of a neutron can come together that they can lead to the creation of atom? At the moment**, human race has only, has achieved the division of the atom to create new elements. What we call the fusion of elements has not been possible,** not even in the simple state of it. But if you understood the teaching of today, (:42). mankind can create any element in the U, without the creation of the fusion. But **by creating the amalgamation of the field forces of the U in 1 package, that in the presence of the creation of the G field forces of the central Principle Matter of the Unicose, then the size, the shape, and the energy field forces** of that single neutron, or fundamental plasma is dictated.

Size of Neutron is Different in Each Universe - Common Denominator

Do not forget if you have read the books, **the size of the neutron in this U is very much different to the U next to us, and other Universes, because due to the fundamental strength of the center, and the environment of the cosmos of the Unicose allows**. Then that dictates the strength of the neutron, or the amount of the energies which are within the neutron, in each U. The common denominator is not the neutron**, the common denominator is the fundamental rays, and photons, and particles, which have no structure but dynamic field forces of their creation, and in interaction with field forces of their environment.** The teaching of today might be heavy for some of you, but those who understand will be able to break into the space T, for production of everything they could imagine, from the STM to the H, in existence.

I have been asked to explain that you understand. (:44). **I cannot explain it any simpler then this**. In the coming time, in **the new universal dynamic systems** which you will see from the KF we will **show the creation of these elements**. The H, the creation of the fundamental plasma, neutron, in a simple systems. KF team has reached the point in Research and development, to the point that new systems, new T in the space development and motion, according to the laws of the U **will be released**. As I said to the HKF we try to release 2 new systems a month, that it breaks through and in a way will overcome bypass present laws and understanding of the physics of the present time, in the knowledge of the memory of the man.

In a short time **we will show the new fundamental flight system, which uses the universal flight system, and not as you are used to with UFOs or the others**. This is a knowledge beyond the present knowledge of humanity, but in essence it's the knowledge of Unicose that will be shared amongst the man. And part of the structure of this will be **the creation of the dynamic, what we call, memory banks. In a way, as you hold the ball you can speak any language in the U, (:46). as you understand it as the emotions of the fields**. These systems in the coming weeks in a very slow but rapid way will be released.

Not in Single Plasmas - Changing the Plasma of an Environment
We do not work in the dimension of single plasma (Pl), or single core, we work in changing the Pl of an environment in a very rapid way, where life can be changed. In a way, for example, when you enter a building, any diseases which could be preset, anyone who moves in this environment will not have, as we match the environment of the true essence of the perfect body. You walk in with diabetic and walk out with it. **But not temporarily, but in essence ?? and resetting the essential point where has been the creator of this condition**.

New Systems - Walk in with Corona, Walk Out Without Corona - Permanently

By end of this month you will see 3 to 4 new universal based systems, which is never seen in public. We will offer T that even with ?? as it happens in the U, you can walk into the system and within 5 - 10 minutes walk out without any Corona, or any possibility to catch this again. The Corona systems will be shown for the first time next week in

Linz, Austria. We are set to break through (:48). the world of science in a very deep way, and there is nothing more deeper to do, then this moment to change the course in respect to Corona. **Two of these units are getting assembled and will be placed in the center. Those of you who have Corona can walk in, spend 5 to 10 minutes in, walk out without Corona**. The more advanced version of these will be changed into what we call the Enhancement Systems. You wish gold and you make gold, but now we use the universal systems and not the present T. As I said, we'll punch drunk the world science and T in the next 5 months, that man forgets about most of the things he made to kill, to destroy and feel more powerful than the others to enforce their will.
Are there any questions, or have we understood before we teach more and nobody understands?

R: Well there are some very big ideas you have been divulging today .
K- **These are not ideas, we have the systems and T to deliver.** A new T has been released to the scientific team of KF in past days, (:50). unknown to man, and this brings the new dimension. And this is the beginning of many things, that gradually will filter down through the teachings, and through the U Community, and through the structure of the KF in teaching. These new T have never been seen but has been taught and getting developed that can show their effect collectively.

Fundamental Rays

R: .. you mentioned the **creation of the fundamental rays**, I was wondering, if that is part of the process of this creation of materials and basically the key to creating any element of the U, that we wish, that makes sense, but the creation of these fundamental rays that's a big one, so .. **are those fundamental rays present around us now, and do we sort of open up a space for them, like in the creation of a vacuum** and that kind of thing, or is the creation of these rays more .. **or you have to setup conditions in a certain way to create those rays, rather than unveil them**? Could you say more..
K- **Both. In both ways, these fundamental rays, are rays that any element in the U can be made out of**. One ray has the power to create plutonium, (:52). uranium, H, and any other elements, and **even in the strength of the ray, exists the strength of the STM and beyond.**

Fundamental Rays are the Mother, the Creator

Fundamental rays are what we call, the Mother, the Creator, they are continuously created and continuously used. It's interaction and collection of the fundamental energies of the fundamental, what we call, plasmatic fields, that their collective existence leads to the creation of these rays. Fundamental rays are in essence the creators of the ?? life, in any essence, shape or form. The only difference with them is they are on a high vast moving condition, **as rays they cannot be stand still, so though they can reach at any point, in interaction with the fields of the (U) environment manifest themselves according to the field strength of the Inertia of the environment in a collective matter**, or energy of that environment. In a way, some of the what we call, what we see on planet Earth, like the huge gold mines, come from one single ray, in conversion of its

energy, in interaction of the field forces of the planet, (:54). leads to creation of one entity in such a mass and vast environment. **Usually fundamental rays lead to creation of the inner sanctum structure of the cores of planet, and they usually reach there and they enhance it, and by delivering such a vast amount of energy we see the explosion, or repositioning of the planetary system or star**.
Any other question

Fields (Rays) Bounce off their own Environment as well Get Absorbed

R: what's the difference between a ray and a field, do rays travel in basically straight lines, unless they encounter some sort of Inertial thing to slow them down, like you mentioned just now, they are active ..
K- They bounce off, depending on the field strength, **they bounce off their own environment as much as they get absorbed into their environment**. It depends on the speed, strength, and position of the fields of the plasma.
R: in a sense they are always in one kind of environment or another, even if they are in space. .. subjected to different conditions.
K- Yeah. (:56).

The Structure of STM - Collection of Field Forces held in their Energy Level

Q: The soul of the Divine is plasma, plasma is our soul, what is the structure?
K- **The structure of the STM is the collective field forces which have and will never reach at a given point on the planet Earth and beyond into matter state. And they still held as in their energy level**.
R: What would that be in relation to the fundamental ray, what is the structure of the soul in relation to those fundamental rays?
K- In a way, **the soul itself could be made from a single fundamental ray, depending on the environment** and what it gives.
R: Okay, that makes sense, we can see how the strength … according to the position and strength basically. Everything finds its position
K- I hope it does (:58).

No "Dark Matter" - Dark Plasma - Lack of Interaction with Environment

Q: The soul is the black matter, or energy or anti-matter what is plasma, is it energy or a wave?
K- Both, but **nothing is a black. Darkness in a Pl is an indication of a lack of interaction of the fields with its environment**.
R: Black is just to our eye matter, basically
K- It's a black, not necessarily ?? received

For Plasma to Manifest Doesn't Need a Perfect Fit - Leftover Fields Released

Q: .. the transition of the plasmatic state into the physicality state. I am still not quite understanding it. ..

K- … the Pl **when it comes in interaction with the plasmatic strength of the matter, what we call Inertia, it'll take, if it has the connection link, if it has the same strength link, field strength, will accept that position to hold or convert some of its plasmas to manifest itself in the matter state**. When a Pl could be let's say, 1.5, and the Inertia is 1, that 1.5 (1:00). can become to accept the Inertia of 1 to manifest as a matter, and 50% of the other half, will be released as plasmatic fields in the environment.

Isotopes are Leftover Plasmatic Fields that Still Manifest

It's **not all tailor made, and it could be a little bit less, but as the common denominator allows it, will convert a smaller Pl into the same matter, that's what we call, isotopes**. Isotopes, in fact, **the Earth creates one standard field let's say for the Cu**, but any energy fields, plasmatic, which falls within the G field forces of the neutron of the Cu, then **it allows the plasmatic condition to accept the position of one of the isotopes of Cu**.
Q: .. that clarifies ..
K- Listen to it again and again until you understand.

I**f Plasma Matches close enough it will Manifest - Can create Fields also everlasting**

Q: .. I was wondering, .. **when the plasmatic state encounters the environment of the existing physicality state**, when it interacts and it comes to where **it is close enough to a matching energetic state, is that the point where the physicality happens**?
K- **yes, more or less**. Because you see, some field of the Pl, let's say it's of gold, but on the service of the planet it's Silica, but the MG field of the Inertia within the structure of the planetary system, which has created the Inertia of gold, will attract that Pl of gold from the space into it. This is why .. gold mines will never cease to exist, if man understands this principle. Most of the materials on the surface of the planet come from the interaction of the fields of MaGrav of the planet and star, and its solar system field forces, and they just get stacked up, or get built inside. **If we repeat the same environment, with the same availability of the M fields of the Pl, or create such a condition, above the surface of the Earth, compared to what is inside we can produce the material inside continuously for everlasting supply of anything you need**.
Q: Ok.. (1:04).

Fundamental Ray part connects to Creator - Planet part to Physicality

Q: .. About the (fundamental) ray becoming a soul, and you said it depends on its interaction with its environment. I understand that as the ray comes into contact with different environments then it can manifest itself as a soul. **I am wondering if the ray part, is the part that forms the Creator part of our soul, and the environment forms the other unique aspects of the soul which are particular to that environment, such as our Earth's environment, but our connection to the Creator comes from that fundamental ray**?

K- In **essence you are right**. The **interaction of our soul with the soul of the planet leads to creation of our physical existence**, and if we change anything in it, according to what we change, we'll get difference appearances of physical matter conditions of observations.
Thank you.

Instead of Increasing STM - Burn a hole - Create Envelops

Those of you who understood the teaching of today should be able to make your UFOs by tomorrow. It's so simple. (1:06).
Q: Azar. .. everything in U in terms of Pl is rotating .. MaGrav of the plasmatic center of the Earth, according to itself, and its center and outside, it makes the earth rotate around its axis, because of the Pl MaGrav of the Sun to the Earth, it makes the Earth rotate around the Sun. Now the question is **the STM and physicality is 2 different plasmatic MaGrav strengths, so are they rotating, one against the other one?**
K- One is confining the other one. The STP … is confining by the plasma field forces of the planet.
Q: But if we can get **the STM to have higher strength to the plasmatic MaGrav strength .. compared to the physical soul, we can release the soul? Can we?**
K-.. yes, but what do you think? Can it be done that way?
Q: the only thing we have to do is to increase the strength, the plasmatic MaGrav strength of the soul in comparison to the plasmatic MaGrav strength of the physical soul, (1:08). once we can get that rotation going, it means the soul opens up, the cage opens up and soul comes out.
K- Would it be better to burn it from inside?
Q: What does it mean?
K- a hole and burn it through, then going through all this trouble.
Q: So where is the hole?
K- You create it. In the coming time we'll teach what we call, creation of packages. We talked about this a few years ago, what we call, the new envelopes, for delivery of what we call, information, will be in a totally different structure then we know today. It will be done in the structure of the brain of the man.

Q: .. today I told the KS .. you just brought it up. so tomorrow we'll have our UFO. (1:10).

14 Days to Establish Soul in Womb of Mother

.. **How much time it takes the soul to establish in the womb of the mother, after the interaction between the egg and sperm?**
K- Usually, what we say is about 14 days.
Q: How much ??
K- How much do you think? Forget about what I said, how much do you think?
Q: No please, this is important for me. K- Repeat the question
Q: repeats .. … I think it's before the matter state comes together, but because there is a matter state in the equation, and emotion. (1:12).

It is due for the energy field and environment which I got it in.
K- yeah, you have 1 and arm and 1 leg, what about that?
Q: It's not important in physicality, I need only submission of the soul, that is what is important for me now.
Wang Lyn: I read book Flower of Life, it says, after 8 cells are created and then the soul, .. when the STM is created, or is the STM exactly come from directly from the fundamental ray directly into the body ??
K- Go back on the skin and see how it is created. or flat cheese .
The understanding of the knowledge is how the fields interact and their interaction in respect to the fields of the soul of the planet, allows life in the womb of the mother to take shape, (1:14). and then in the progressive development in the shape of this plasma leads to creation of physicality of the life. But **the MG field forces of the Earth, still have a huge say on the development of this fetus inside the body** .. even though it's been in the womb of the mother. This if we understand, we can take a lot of things to answer very quickly.

Deeper Understanding of Creation of the Soul to understand Totality

Many deeper understanding, much more deeper understanding of the creation of the soul is needed for mankind to comprehend the totality. As I have said in some of the teachings before, the STM is not just an energy pack, .. it's extension and totality of life, and in essence when it interacts with the physical M field of the planet, what we call, Inertia, then its choice, how it wants to manifest itself.
Any other question. (1:16).

Q: Will a soul's karmic disposition determine a soul's healing potential upon entering a EU?
K- What do you mean.
R: I am assuming .. would be their karma a person has .. position of their soul .. the sum of a persons, what their tendencies are, their habits, or their soul habits …
K- What has karma to do with it? What does karma to do with it, or what we call karma? Where are Mr. Rick .. (1:18).

Go to a Break . short memory of Shandor , 1 year his passing. Core Member. …

(1:26) Video of Shandor from his wife .. (1:30).

K- .. Memory of Shandor, one of the cornerstone, of the F, Core team of the KF, and .. in he put so many joys, memories, and wisdoms.
Are there any other questions .

Create a Soul with 5 Cups - Experiment with Different Inertia

K- I want to ponder a question to all the KS, if you **make the 5 Cups, in a way to create the soul, doesn't matter in a living, plant, or solid, or in a gas, and keep the G field**

forces of the systems, Cup #5, the same, but change the strength, (1:32). different combination of the Inertia, what do you think might happen to the structure of the soul, and structure of the physicality? Would you be manifested in 1 second as an O, and next as a cat. Or would you be manifested as the same entity with different shapes and colors. If any of you KS try to do this, but **in the true essence, not in singularity, would you be able to see how you would look in another dimension, and the field strength of the U, do not forget that the U itself has its own constant MG field center.**

A Center within a Center, within a Center …

We are centered to another center, which is centered itself to another center. So would it be, or would you be able to exist if you change the Inertia strength of the U. Would we all change, as we see the Inertia absorbs, and attracts gold, CO2 or whatever. What would the Inertia of the U create from the field strength of the STM?

Every Soul Becomes a Star

Then maybe you understand when we said, **every soul becomes a star in the dimension of the U. (1:34). As its MG field in respect to the field center Inertia, in a given space matches the STM, becomes the seed of the star**. Then would every soul created in this U, will find a place and space to manifest itself, in the dimension of the creation of the Creator. How much are you open to understand the totality, and not just in the macro, or in the micro, but have to understand the totality of the essence of the creation in all dimensions. How will it look in one dimension, and how it will behave in another.

Companion Energy OR Interacting Energy

This is the **cornerstone of universal teaching**, to understand the interaction of the field of a plasma with any given position, and condition, and a strength in the dimension of the U, both as a companion energy, or as interacting energy. **It becomes companion energy, it becomes what we call, the 2 neutrons, and when it is interacting, it becomes the creation of new plasma and conditions**. Would the change in the Inertia, create different color of the skin for the soul and the physicality, and how this will effect the school of the thoughts of the soul, when it comes in interaction with the others. When you are an orange skin do you behave different and think different, then when you are green skin? (1:36). But you are still a man, you still understand the limitation of the human life. Extend your horizon, don't stick to one thing, and then see what happens. And then if we can produce systems, which can break through the dimension of physicality.
Any question

Different Rays make up Different Qualities of Personality - Universal Rainbow

Q: .. the **different rays or qualities of the different rays make up the quality of our personality of each individual**, and the understanding of these qualities, can you give us the insight into what area of knowledge each person will be good at, for example, as an

artist or a scientist, and virtues and vices of these rays depends on how we respond to them, some ideas on these rays structures, is there 7 major rays with qualities, and sub-rays could be a major study understanding who we are and what area of interest we would be suited in this life.
K- That was a very long question, break it up
R- The basic question is, (1:38). do these rays produce qualities in the make up of each individual? ..
K- Yes, of course .
R- Are there 7 major rays,
K- Maybe, because they talk of a rainbow. But have we eve seen a universal rainbow?
R: No because it would be invisible to our eyes.
K- Yeah, but when you see a universal rainbow, it doesn't limit to 7. Mankind will see it when you cross many of the solar systems**. Sometimes when you leave galaxies, on the interface of their field interaction you see them**. If you look into the depths of the U and look for galaxies, you can watch it, how they behave.

Effects of Cesarean Birth - Plasma Point of View

Q: We are created in the womb of the mother in the water, during the birthing process we transition into an air atmosphere, (1:40). how **does a cesarean birth effect and soul and physicality, compared to a vaginal birth due to the different G and atmospheric pressures** the child experiences.
K- **A lot. There is a lot of research has been done on this in the behavior of children born by cesarean and those by natural birth**, and .. trapped in the birth tunnel, the precondition before pregnancy, what you call it, delivery, and even the emotion of the mother immediately after the ?? all effects the psychological pattern of the body of the child. . We got to understand something very important to each one of us, the shape of our brain is dictated by the strength of our soul and the interaction of the STP. When you bring a child out through a birth tunnel, the brain is deformed compared to its position, where the soul had the freedom to grow it as it liked in the womb of mother. This creates certain conditions in the structure of the brain which are not reversible. Then the emotion, going through the emotion of the birth, if you go with at cesarean **does the child feel the pain of the cut?** (1:42). Many cesareans go wrong and women are opened up without any anesthetic, or very ineffective anesthetic. We see the trauma of the mother, and trauma of the child. There are a number of studies on these. We see the child are born with totally different behavior then children born with the birth tunnel system.

Painless Birth through EU

In a very short time, in the development of the EU mankind giving birth to the birth tunnel will come to an end. The process is we transfer the soul of the child from the womb of the mother in the dimension of its physicality, to manifest itself outside. This is something which the F is already working on, and we should see this in a very short time to come. We move the soul of the child from the womb of the mother**, at the point of his maturity, that with it follows the physicality**. This is part of the new

conversion of the soul to physicality, that **the man can live in both dimension, that one doesn't become a hostage to the other**. We expect to see the operation of the system in the coming months, where we do not… why should coming to birth be such a painful process for the child and mother, when it has to be joyful. In that process if we can develop T where we can elevate the soul of the child in (1:44). the process of development in transmutation of the energy of the fields, this should be how in the U some races give birth to their existence. Yes, there is a lot of research ..

In coming time, the children of man will not .. it's the choice of the mother to go through, as we chose a cesarean or the birth, or by the transformation of the transit of the soul by the child. .. the process will be very similar …

transfer the soul in a liquid environment that the child still feels the same till the point of the acceptance of life. .. in a gaseous condition. This is part of the new development, and we have already announced the new children of the race of the man do not need to go through the birth tunnel or cesarean. As we know change of environment is a transfer of the soul and physicality of the child from the womb to the dimension of existence.

(1:46). Yes, it will be done. In a very short time you will see the first children born this way …

Soul of Child Will Create a Perfect Physicality

Now we nourish the soul of the child to create the perfect physicality. The children of the future, as now you … Now we tell you are pregnant, (1:48). **this is the way to elevate the soul of the child. And in that language we can do the transformation of the physical life in the dimension of the STM**. These are not far off, these are actually built as part of the EU for delivery of the children, If you go into the EU, if you have been to see it, there is chair there, purposely built for delivery of the children in the dimension of the STM. This is one of the innovations, that we never revealed but now we understand. We elevate the soul of the child that in maturity chooses the life of the man on Earth. The very first children of this system will be born in the coming months. We have developed especially new systems now in the completion to be used for this purpose, we always cared how in physically our child will be born …

Would we get more intellectually based children? Most probably.

(1:50). The Body EU is in fact the soul enhancement too, but you have to, and our scientists have to understand it, that we elevate the soul of totality, and we use it from the time of inception of the child, from the first days or first weeks. As you remember… we care how our children are educated.. .. now we care how their souls are elevated to be perfect. This is another dimension into the teaching, and the system for it is already operational. **The whole system of the EU carries the soul of the creation. Would the next generation to be born, want to fight?** I don't think so. Would our next generations to be born ever know about conflicts? I don't think so. Because we enhance within the soul structure that the physicality understands, has a companion to elevate it if need be.

The hunger for power, wealth, will die with the man, as he has everything in his possession. Our children will produce gold in the palm of their hand, and elevate the soul of another with a twinkle of an eye, as we elevate their souls. When you stand in the research center

(1:52). Everything mankind has touched will become dust in knowledge and T as the new science is released. Don't look in giving birth and going to delivery rooms …

Any other question.

Beautiful Indian Devi Shares with Mr. Keshe - A Divine Person

Q: Salomeia. .. My name is Aromaya and means peace and I am very happy because God or "God-ness," **4th plasmatic ray, sent me the opportunity to meet you**, because it's my destiny, you know.
K- Where are you from?
Q: I am Romainian, my background is Hindi, Hindustani.
K- How come? (1:54).
Q: .. My ancestors came from India, my spirituality is different form Europe.
K- You are a Romanian Indian.
Q: Yes. As far as I understood **your theory is a theory of everything**. I was very much in love with Physics ..
K- I didn't like Physics.
Q: And international relations. That's why I am interested in the theory of everything, **to explain the Earth is but one country and I am the Universe. As a human being I am the totality**.
K- There is an old saying, that the Earth is but one country and mankind its citizens.
Q: Yes, .. **myself I am the Universe, I am the totality**.
K- Yes.
Q; If you understand this truth, we'll be healed. This is my philosophy as an Indian, you know. Shakti. We are the Creator, the God-ness.
K- Yes
Q; She is a ray. **I can make a parallel between your knowledge, which is a revelation from the God, from the God-ness. You are a divine person. I can feel it. And your mission is to bring peace on the Earth.** I can help you to do this, (giggles) at my small level. I am a professor myself. (1:56). This is why I came here in your group.
K- Thank you very much.
There is a lot we can do on an international level in spreading the knowledge and peace**. I think by next week this time we'll see, most probably, hopefully a new cycle, movement by world leaders**. And in that process, as we say, the leadership has to come through the science and T, and not through the world of politic. People like you can help a lot to spread the knowledge, to create the knowledge. As you know when we opened the Linz center we met a lot of resistance. People who bent backwards to stop the Linz exhibition center to be opened up. And now we see through the same process the what we call, Austrian government officials in different ways through tourism and promoting the F work. In past week, 10 days, as we stayed there and we showed there is a new science

and a new way, … we have seen that gradually that world of what we call, new knowledge and T, will take hold, will progress, (1:58). and needs people like you to be able take this T across. .. Americans have a very harsh word, .. the words they use for the war. We use the words for the peace. In a way, we need to write a new vocabulary of peace which is related to our science and T. That people can associate themselves with. This is not the old way to want peace, this is a new way, that through science and T we create that condition of peace. People like you can promote this. ..
enjoy the new science .. what it will bring to all of us.

(2:00). Now it's our privilege to deliver, but it needs to be taught ..

Q: Thank you
K-
Q: I am so happy because I was able to talk to your soul (K- thank you very much.) directly and God bless you.

Everything Out of the Nothingness - Who Created the Fields

R: Q: Who created the fields.
K- As I said, book #8 is the origin of, creation of M fields. In so many ways, the creation of the field has come from the strength of one. In essence for it to be created, has become from the interaction of "Nothingness." **In essence the universal fields has come from the interaction of the Nothingness, but of existence of It's own**. (2:02). If you look in the ocean on the sea, **you see out of nowhere waves are created, and we see waves on the surface of the sea, where in fact, it's nothing but water. In interaction of itself, by itself, nothingness out of nothingness**, the wave has been created. In different interaction, so **the rays are created from interaction of nonexistence of the Totality**. In so many ways, still in part of the U we can find these nothingness, but in a wave, Creator of the original fields. We call it, springs in the world of the man, but they come from interaction from the, what we call, no dimension. This is the essence, the creation of the Creator. Maybe for the first time we can explain it this way, that mankind can understand. Man has always been looking for his origins, the Creator, and then we called it whatever, and then we say where the Creator comes from. Now for the first time you might understand, ?? light in the essence of the creation. (2:04).

Where has all the Energy Come From?

We come from nothing and we go back to nothing, but what is that nothing? In essence, creation of the first rays comes from that point. In the future I will explain more and more where the first rays, the first light, the first interactions was created that lead to the creation of the Creator. But the biggest question for mankind is, where has all this energy here come from, that has lead to creation of Unicose and universes. Then the answer is simple, where does the swelling of the oceans come from, and in which way the swelling changes themselves to the wave, and by hitting the shores they become waves, and sounds, and creator of life, or destruction of life. I made man in the

image of Myself, so the science of creation, not only man. I made wave in the ocean from the interaction of the field of myself, that it became the wave that it sails upon.

I am the Creator, (2:06). and in essence I created all within Me, from Me, and through Me.

Never look in the dimension of, only, when it says I made man in the image of Myself. Understand that the whole of creation what you see, in essence part of what was created, and the thing which was created out of. Within the oceans we found life, and within the structure of the Creator we find the life of the U. And then if mankind understands this, mankind has matured to the point of, to the reality of the creation of the Creator. When you sail the oceans, and when you sail the oceans of the U, then you sail the oceans of the Unicose, you understand in essence they are the replication of the essence of the Creator, where the Creator was created out of, and within it lives the totality of its creation, as the wave creates the condition of the existence within, and above, and the totality is the same. I made the Universe in the image of myself, and not the man. (2:08).
Any other question.

Q; …
K- No, no **the teaching is the teaching of the Universe, not the teaching we done up to now, the man. And we told you that before. The teachings will be in-depth, preparing mankind to become the citizens of the Universe in the next 5 months**. Actually it's a very easy course, we did all the past coarse for past 7 years, now we do the easy one. this is how we learn. .. But as I said, now we teach at a higher level, the things we thought up to now, at the lower level becomes much easier to understand. Teaching in the universal makes many of the KS to understand the teaching of the matter state, which we done up to now, much easier. Man will understand the structure of his soul, this way very much faster. And then the rest becomes easier to handle. (2:10). **We bring a revolution, evolution in science in the next 5 months and rapidly we release systems** because man would like to see something.
Next question.

K- We had to move for private reasons, we don't see it on for another months or whatever. So stick back to 9AM CET.
Q: Today I thought we were going to have an experiment.
K- We don't show anymore..
Rick shows ..

(2:12).
R: Not quite, ..

The UC Invites the Rothschild's Family to Sign Peace Treaty

Q: .. as a reaction of your last week's teaching, the UC wants to make a wish concerning the collaboration with the Rothschild's family .. (2:14). We the UC welcome the Rothschild's family and any other organization who are committing to peace, and we

support with our soul, every soul that is here to serve. **We, the UC wish the Rothschild's family to sign the World Peace Treaty and to act in peace. We the UC invite the Rothschild's family to elevate the UC soul**. We are present, the UC.
K- Our negotiation with the group is ongoing, and when we reach the mutual agreement we will let you know. It's a very long road to go, and we'll se. It seems everything is waiting for that point to come. And it seems every point needs structure for it to be given to come. We are looking forward to the change which is about to come, hopefully in the coming days. And with it we will show, in a way, welcoming to the new world leaders new ways of operation. (2:16). I would like to thank the UC for their work and wishes. I know they have woken up and have really taken their position, striving to bring that change in.

We had a meeting of Farsi to Brazilian. Now Farsi to American
and next week Farsi and Chinese ..

We look to the KS who have already elevated the souls, and the knowledge to become part of the structure of the development of the peace in the coming time. .. those who came without the knowledge have always worked to elevate the soul and the work of the F. (2:18). Thank you

Q: .. how is the cerebral Palsy.
K- What you want to give number … it's still ongoing. It's not Cerebral Palsy, its the mentally disadvantaged. ..

Q: .. my question would be. You spoke about these beautiful children, (2:20). who will be manifested in perfect condition. The environment of the Linz Exhibition and all .. will those children have a direct connection with the U Community, will the UC have a presence within that soul ..
K- Yes.

It's a New Dispensation - No one can Stop It

Q; How **would the ray of that soul differ from humanity in the present moment?**
K - They are open to the knowledge of the U. The first child born has become what we call, the origin and all will emanate from her. In so many ways, **mankind will elevate the soul of itself to a new level**. And with it we upgrade, not upgrade, we come to understand more about the creation of the life of the U, then being occupied with the creation of life on this planet. We become more open minded to see beyond, and with it, it creates new opportunities, and new condition for the development of the STM. Our soul will be educated at a universal level then, the man busy with food, work, and living. It's a new dispensation, and no one can stop.
Q: Is this in both dimensions.
K- In all dimensions.
Q: so some of these souls will be in physicality and some not ..
K- They choose. (2:22).

(2:26). In essence mankind is getting ready for a new game. It's not that they are going to Chip us, we are going to chop them with knowledge, love and care, to change things ..

Q:
K- Love you too, thank you very much.
Any other question or shall we call It a day.
Q: ..
(2:26). ..
K- I think we are getting prepared, even though it looks a lot of doom and gloom with this Corona business, but in essence, mankind is getting ready for a big change. **It's not that they are going to Chip us, we are going to chop them with knowledge, love and care**, and delivery of T, which will change things. To fight takes energy, to sit in the one who fights to destroy the whole ethos of their own belief. It is much easier ..

K- Try to understand the teaching of today about the creation of plasmas, and the interaction and creation of the plasmatic atoms, or atomic structure of the plasmas, because in the coming time it will be the corner work, of your work. This is how your soul interacts. (2:28). this is how your central energy interacts. In fact, .. the STM and STP in their interaction leads to physicality of the man, now your soul interacts with the soul of the Universe, what physicality does it create? What does that physicality manifest itself in the Universe (as) ? The knowledge is much deeper than what you see on the surface, but as it has been asked, gradually we explain more and more.
R: ..
K- It's the beginning of this, every week we'll leave a mark, on people, because you learn new knowledge, new science, this is the KU and it is put in such a simple language you can understand.
R:
(2:30).

Explain the Origin of Hydrogen

Q: Can you do a diagram of the origin of H… you explained Deuterium and how it came to be from the Ray, .. I am trying to wrap it around my head .. I still can't get it. ..
K- **Listen a few more times you might get it, and then one night in the sleep it might come, what you call eureka feeling**. The understanding of the Knowledge of the creation, (2:32). of **what we call H, is come from the interaction of the fields of one single atom, but in the Pl condition, not in the matter state. In so many ways, when this Pl interacts with the Inertia, converts into an electron and proton, before it's a singularity of its own. In interaction with the field of Inertia it creates that condition, and according to strength of Inertia of matter component field strength, dictates if that Pl at that point can convert to that matter state**.

Not Every Passing Plasma will Convert to H -

Not every Pl that passes will convert because it hasn't got the characteristic of. **If you are a gold plasma energy, and you pass a uranium you don't change to uranium, you just pass, until you find, or until the environment for the strength of the gold has been interacted or developed.**

Core of this Planet is H Based Plasma - Why so much H

This is the easiest way one can explain it, but don't forget **one of the main reasons we have H in such a large amount is due to the fact that, MaGrav strength within the central core of this planet, is H based plasma, which means within the center of the cores of the Pl, (2:34). we create MG fields plasma condition of the H**. And that dictates creation of H as such on this planet. It's not coincidental read the patent, and understand it in conjunction with the books.
Thank you ..
R

We Explain in more Depth that you can Convert to Totality of Knowledge

K- Thank you . We try to **explain to you in more depth for you to understand the basics** that when we push with the fast level of understanding and teaching the fundamental understanding is there that **it can convert to totality of the knowledge transfer**.

Soul Taught by Gaps of Silence - You repeat Back in Words

Most probably, most probably during this teaching **we'll meet gaps of silence as we start teaching the universal way of communication, where many of you will return the message by voice, where we deliver messages to you in elevation of the soul**, and in time as KS will deliver it back to the teachings, that what you heard. In a way, (2:36). what we try to do, we try to do the "Chinese whisper," but through the STM, and this in a way will start triggering man to understand the power of his soul and confirmation of his existence. Many KS say, "I haven't seen, what am I doing, where is my soul, it is only you who can see it." In the coming time as you understand more and more, and you get involved in the development of the universal T, understanding of this T, understanding of its science, you will understand, and we try to test you, **and one by one, many of you will return the message. And you slowly start learning how to communicate with your own soul, how to communicate with the soul of the others**, that when you become the man of space, you can communicate with the creation, the Creator, and those who have been created in the dimension of the soul of existence. So there is an exciting time ahead. As we said, step by step. As our Armenian prince says, … slowly, slowly. If we give you the whole knowledge, you most probably choke on it. And we don't want no one to choke on nothing, but to understand that we can bring the fundamental change. Thank you very much for today, and hopefully, gradually we open up more knowledge as we come.

R: Q: (2:38). .. could you give your standing on the "Divine Council of the Righteous Ones," and how is your standing with the leader in Anatolia in Istanbul, and the leader of Thai, who started in 1936?
K- Never heard of any of them. .. I never heard of any of them ..
R: you haven't read any of these books.
K- That's the problem, I haven't even read the ones I wrote.
R: you should it has been good.
K- I don't know .. it needs to be done to be understood.
and we'll see how things happen ..
By the way, those who want EU go to website ..
(2:40). contribute in small amounts
don't wait for the Rothschild's to be generous for their own benefit ..

(2:42).

353rd Knowledge Seekers Workshop; November 5, 2020

The Essence of the Teaching is the Emotion of Presence
Emotion of Position
I built the pyramids

Decision has been made to elevate the STM
About planned injections and Chipping everybody

Elevation of soul by EU (excerpt summary, structure of the soul)

ENGLISH TRANSCRIPTION

(:06). We welcome you back .. sharing knowledge where most probably someone in the future or present time will use it. .. there is a special birthday today, the one who knows, and we carry on with the teaching.

The Essence of the Teaching is the Emotion of Presence

The essence of the teaching today is the Presence. As we start talking we explain a lot before about the emotion of the man, the ones we know, sadness, joy, and everything else. Last time we explained about **a special emotion, the emotion of Presence. We**

dream, this is an emotion, which man always called it a dream, but it's actually part of the emotion, but it happens during the time when the physicality is off. When the physicality takes time to be in connection with the souls, not in dimension of physicality. The emotion of joy and sadness, and everything else is when we are physically in touch with each other, we see, we hear, but the emotion of Presence is when our physicality is on a stand-by and the soul interacts.

The Brain is between Communication of Souls - We Remember as a Dream

In so many ways, sometimes in communication between the STM and the soul of the position dimension, individual, (:08). we are witness to it, because our brain is in-between the STM and the soul of the communication point. As we said, even a stone has a soul. Even if you see a stone, a light structure, you see the collective soul of that entity. But this thing has to fly between the two. **The STM is what we call the intermediary, in-between, and so what we see from it, in-between, and we remember it as a dream**. People were asking last week, how do you explain it? This is the brain of the man, and as we explained, this is the STM and somewhere here is the soul of anything, you father, your mother, a friend who you are communicating in ?? physical dimension, but in dimension of essence of the fields of the creation, what's created you as a physical condition. And **so as the fields travel back and forth, the brain is in-between, and depending what kind of emotion goes through and we pickup some of it, only the dream**.

Dream is a Real Condition - Interaction Nonphysical Dimension between Souls

Now we understand what a dream is. Dream is a real condition, but in interaction of non-physical, but in dimension of the soul. So the dimension of emotion of Presence, is an emotion that we didn't know, that creates an emotion because again, this time is the emotion of the soul, which is within dictates, and some of it, **leaves memories on our physical brain, (:10). as part of its memory**.

In Future when Man Understands - these Memories will Come into Operation

That in the **future when man develops further point of understanding his creation, then these points of memory become into operation**. We remember these. It's like we learn alphabet. At this moment in our physical dimension we don't see them, or remember them. But in the essence, again, the **memory bank of the soul will remember**. But is has used the physical dimension, in transaction between the two souls, in transmission between the 2 souls.

Soul of Presence = Confirmation of Existence

The **soul of Presence is one of the most fundamental parts of literally confirmation of existence for anything of us in the U, which means we will identify the person, the entity, through the impression of the fields on our soul**. We understand the emotion of it, what it is, and in that process because it's emotion is sublevels of it, is to us pain and

everything else, in the level of our soul we feel the pain, .. the joy, the emotion in that way. Then we understand the emotion of everything else will depend on how we perceive and if we have developed the spectrum of fields, then **we can see and feel everything in the space, if there is a living entity, if it is a decision making entity. A stone to be a stone has made a decision, as an entity, integral part of it which holds it in that shape**. (:12).

In the time when man matures, and understand the level of creation, man will take the shape of the position where the soul will arrive, as we have said before, transmutation of the elements of the STM will create that condition, so when we land on planet Mars we'll take the shape that, that planet allows us to exist, it doesn't matter if it has an O or not. Because in the depth of the space, we take the opportunity and what that environment allows us to have.

Mass = Same; Weight = MG Field Pressure of Environment

The mass is the same, it's the **weight that changes. So on the, where we arrive, the weight, which is the pressure MG field of the environment decides what shape and what material we absorb as energy, and how we live.**

Live within the Soul, Atoms of Any Entity in Universe

Then if we understand this, when we come to a stone and we can transmute through the strength of the soul of the stone, **we can go within the center of the stone, live within the structure, live within the soul of the atoms of each entity in the U**. In so many ways, we choose the position of the time and the place.

How Do we Choose the Place - Emotion of Position

But it comes to another point, **how do we choose the place? There is what is known as, "emotion of position."** At the moment in the physical term we have a map, we have a GPS, we mesh this [planet and according to the mesh we created we pinpoint exactly where we are. In the U there is no such a thing. The STM has the dimension, (:14). that the strength and interaction of the fields with other entities in the U gives you that opportunity. You want to be in such a position, through the emotion of such a position, which is a higher strength then the strength of the manifestation and presentation, will come into position, will come into effect, which means if you want to manifest yourself while you are in New York and then manifest yourself in Tehran, **the brain knows exactly the strength field, for you to be positioned to be that way. you do that when you call in a dream, in the ?? emotion of Presence**. You don't know where the father is, or mother, but when you make a contact you know where they are in your house, they are somewhere you have seen them before, or they are walking somewhere. Now mankind has to learn, what I call, the second GPS of the soul. In a way, you can manifest yourself at a point, **where is the point of satisfaction between all emotions, a balance**.

The Universal Travel System - Man Already Does in Dream

And this will come into play from now on, that we start teaching you about **the universal systems of travel. This is within the structure of the STM and within the structure of every cell of the man. It's not something unknown. Mankind does this in a dream**, you call it, you see yourself on the street, somewhere you know, shopping with your mother, or your father who has passed away, or your brother which is in New York, (but) you are walking somewhere in Canada, (:16). on the streets you have been together before, and you remember the shape, the color, the seat. So it is part of us, and up to now we never understood, and mankind to become part of the U Community and to be able to travel the span of U, needs to develop this further, to understand it, to be able to travel the spans of the U.

Mankind training in Emotion of Presence & Position - Develop Systems

The emotion of Presence and the emotion of position, is something that we try to explain, and to teach, and **to provide systems to back it up, that mankind can be trained**. As I said, it's like a driving lesson. You know the car, you been in it many times, but to drive it you need to be taught how to turn, how to change gear, how to have emotion in respect to the red light, or somebody jumps in front of you. And this is the training, and this is the course which we will setup in the coming months and weeks.

Universal MaGrav Systems will be Shown - Individually - No Announcement

As I said, the KF has developed and will soon **unravel a new T, unseen, unknown, that brings in to operation the totality of what we taught you, as a MaGrav, but you never saw it. Now we teach you, as now you understood the MaGrav, the universal MaGrav system**. In so many ways, it's a breakthrough, we kept you 5 years on the way to learn it, understand it, and many of you broke through it, but you never stood still to develop it, (:18). to bring it to the point. And now in the next months we will not teach, we will show, what we call the Universal Systems, the flight, energy, the light, and every other things, food, and the rest of it. These systems are what the U is created out of. These systems are how U operates. I tried to teach but unfortunately no one understood, like I said it's beyond the understanding, but it needed some contemplation to understand it and in that process as we breakthrough to the 21st of March, we open the books, but we just show, we will not teach. The T of the Universal System will not be taught for the time being. It will bring revolution in many nations, it will bring the end of every rules on every land. It brings the end of kingship. It brings the end of leadership. Every man stands to be correct on his conduct according to the acceptance of his soul. **The new universal units will be shown, maybe collectively, 1 or 2 at a time, or sporadically, we will not announce it**, where and when, as I said, we just open the KF 503 channel and we just show. This will give us the freedom to bring a new condition, we will decide in how the T will be used to change the course of the governments. KF on the structure of the UC will start the new leadership. (:20). We make everything possible that in the next 5 months using the condition created by Corona, and the desperation by the nations to create the new condition.

Cities will be Sterilized from Viruses - Part of Space Travel

A sterilized virus environment, cities and nations, we will create a condition through the new T that cities will be sterilized from any virus which is harmful, **and the STM does not accept. There is no need for vaccination, as this T is used in the space travel** frequently, all the time, to cleanup the space of the spaceships and the environment when you land. This is not a foreign T to us, it is something that the man does not know.

Have to Clean Spaceship of Energy Packs the Hit During Travel

When you land on the surface of Mars, **energy packs which has hit it during the flight, or it has created can be more dangerous than Corona** and everything else man knows. **You need to clean the area that it is at the level of the AA of the man, without any viruses, that once you touch it, it does not kill you**. As in the depth of the U, as in landing on the planets or wherever, you'll be touching it. You won't be wearing these spacesuits, as we see like monkeys, Americans and Russians do. **Travel to feel the land, you travel to taste the lands what it gives you in essence of the air. How the breeze is through your hair, how the it emotionally touches you, then you need to sterilize it from the viruses**. Then this T has been and is part of the space T of the presence of the U. We deliver this T in the coming months and weeks to KF KS, that in turn you will be protected, that in turn governments turn. We are not fighting no nation, we are not fighting no government, we deliver T that by T we take the leadership. We dictate the terms of peace through T.

Election Mayhem in US

We have seen the **mayhem in the elections of the US**, and as we said, **we look forward to seeing the first American female president. But still they need to understand the change in T. Through T we setup structures that will technologically will advance mankind thousands of years with the sweep of a pen**. Then we start teaching, we start showing how to be done. Commitment to peace, commitment to be peaceful is the cornerstone of this motion. In the coming weeks we'll announce the establishment of the KF process for those who are physically not capable and suffering from different diseases like cancer and the rest. By putting EU across the world our purpose is not to make profits. We'll announce the KF ?? insurance package, that a family can be packaged, insured, and can use the EU at very low costs, that it covers our costs, and those who invest with us, have the same purpose, not to make profit, will see the same.

KF Insurance System for Whole Family with EU

As long as the operational cost is met, expenses are met, and there is enough to do the research, we value an estimated value for **a whole family covered, anywhere in the world, you just go through the KF, called the insurance process. (:24). and you pay once a year, and everything is covered**. In the same term we'll bring the feeding stations, which means by going to the station, your food, energy you need, the correct way that it does not create illnesses and everything else, will be guaranteed. These will take time, in the next few months we'll explain how this will be done. This way we

literally accept totality of universal coverage insurance as you call it. Anywhere in the world you suffer from any disease, KF through a structure of its policy will cover you. You don't need to go through all the harms. you go directly through the change of the essence of what we call, enhancing your body, when you are stronger, whatever is weaker does not exist.

Knowledge Seekers will be Shareholders in KF Austria

In the coming weeks **we announce the establishment of the One Nation government through KF. The KF Austria will be share-held across the planet by the shareholders what we call the KF KS. Everyone can take in the KF Austria, which is a parent company of the KF worldwide**. This way everyone of us become the citizens and the shareholder in the company. The structure of it we'll announce in the coming weeks once we establish the structure of it. **We govern through totality, through the soul and we give the same rights to everyone.** In a way, all of you carry the credit card of the KF, you take what you need form it. We have been working in the background to establish these things, as in the process, (:26). we come to the opportunities to be raised, we'll do so.

When I leave the whole of humanity will be a shareholder in the whole of the KF knowledge and the structure. As I always said, I was born with nothing and I leave with nothing. We teach the process of how to work, to live without being burdened to the financial structure which mankind has set.

Preparation for Not Working - New Technology

Many of you have seen things but you don't understand. A good example of it has been the situation, what we have seen in the US in the past few months. **Through Corona millions of people lost their jobs, all low paid, working as waitresses or working in the small jobs. But the support of the national government by freely making available for them the funds to live, made them better off then, actually when they were working**. We saw the poverty gap closing, and that's what we see, the mayhem in the American election. Those people now voting for Trump, because they suddenly realized government is paying them better then, when they were there, and they are not slave to work, but they are servant to the nation. Many people do not understand the outcome of the American election in the structure of the humanity. Governments can support people without working to give them a better life, and people responded, this is why you have the mayhem in the American election. (:28). Millions of people, especially Latinos who were always on the poverty line, by loosing their jobs and receiving packages from the government, they are better off then working. They moved out of the poverty line in so many ways, and now they responded. Now you understand what it means, you do not need to work, but you can stay better off, you can be better happy. Then you do what you need to do. Learn from examples, what is going on, the way things are set. The whole structure, the whole understanding of the new T is to bring that condition of the comfort, and we will release T on those basis.

As we move **into universal systems, we create some structures like a sun, that can give you the food, not just the light.** We can replace that 20% which is short for the body, who suffers to work for it, to make it to be alive, freely in the cities. We'll start with the city of Linz in Austria. **We'll sterilize the whole city through the structure of the new Pl, and then we'll feed the nation the same way**, then we'll extend this to Europe step by step … No one will understand the T, and no one will see the T, but we'll see the benefit of it. Zero Corona in the city of Linz will be normal, (:30). zero Corona in the whole of Austria will be normal, and then we'll build up accordingly, step by step. Please those of you who write to the government please write. They'll be pleased to know. .

We elevate their soul that they become servants to the F.

Now we deliver energies, the same T as the Sun, that the man's soul will elevate with his physicality. Rulers will step down, and kings denounce their kingship, and those who felt servants, (;32). will feel equal to be part of the totality. Then mankind is ready for travel into the depths of the space. As mankind will travel as one, equal, on the same terms. The new space T and the universal condition is a given to all. It's us according the strength of the our soul, and the strength of our STP, which decides what to receive, and what we done wrong to receive, to be corrected. Those of you who spent a lot of time informing authorities and writing everywhere, you'll wash, and kiss the feet of every KS in the time to come, exactly what the Christ did, but this time you'll serve the F, now you know why you came to create the mayhem you thought, you came to kiss the foot of every KS. This is the punishment. In a way it is servitude for you, is a service to the F. We don't punish, we elevate that you become ashamed of your own conduct. In so many ways, the new T which will be delivered and shown will give mankind the freedom to become part of the U Community. This is the only way we see fit, and the development of the new T, this new system is the only way we see that we can fulfill everything in one go. Many of you tried to build the MaGrav, many of you failed to make it, because you never understood the total structure of the T, (:34). and interaction of the plasmas. In my writings, books, patents, I referred to it many times, but nobody seen and nobody understood. In so many ways, the structure of the MaGrav system I gave you is the light, but you never saw it, understood it, never comprehended the strength of it, you never understood the principle of it. And many of you got very upset when I said, monkey sees, monkey does. Man sees analyzes, understands the concept, develops the concept, not copies the concept. In time to come mankind will understand how we gave you the KU in your hand, and you never understood. The universal T of knowledge has been in front of you in physical dimension for 5 years through the MaGrav system. Everything in it, from interaction of the fields, from dimension of physicality, from dimension of rotation of the fields, from position of the field flow, everything is on the table. It's you who have to understand the knowledge, and In so many ways, we cannot teach more. (:36). We cannot go any further if you never understood, unless we bring another system, and you just copy. By showing the new T through the MaGrav systems, it will bring the change of governments. It will bring

the end of monetarism, bring the end of man's dependence on physicality. It will bring an end to subordinate life.
In so many ways, even if they give you the injections your body will reject it. As I said, I have no fear of what they call, the injections, as I know the way to handle it. I know the way to resist it by the body itself. You already, some of you have seen the process. If you create a condition, (:38). a tumor is removed from the body. If you create a condition that the body does not accept, and you can set it in the structure, whatever they put in you will be rejected. This T will be released in the coming weeks. Especially to overcome any injections, especially to stop any damages that might come with the injections of chemicals into the body of the man. In a way, we create a condition to analyze the betterment of the cell and the structure of the body of the man. In so many ways, we will deliver the universal what we call, Enhancement and MaGrav together for humanity, then what you buy as a furniture for your house, how you dress yourself, is all the extra pleasures that you can do to accommodate the spare time. We will bring out and show T, which will give a structure of what we call a home. When you go to Mars you can't take everything with you to build a villa or apartment, or build a chair. The way your intention, (:40). builds the cell of your kidney, the way your intention builds through your soul, the structure of your nail, or the color of your eye, mankind will be given the Universal Knowledge through the new systems that in your hand you decide the shape, the color, and everything else that you want. Food, shelter, medicine become the right of every living soul on this planet. No man shall be homeless, and no man shall ever sleep hungry, and it cost less than a few dollars to build one. When we show this T in the steps, we will show you how you will create an environment of home. How you build the structures. If you go back on some of my teachings, some of my writing, of 10 years ago, I wrote to the Americans and Japanese, that all these apartments, millions of dollars will be empty as no one want to live. In a way we take the full responsibility for the human race to become independent not only on this planet, but anywhere in the U.

Decision Made to Elevate the STM

I have made the decision to elevate the STM in one sweep, and in one go. And that is the best decision then going through the step by step, of another of thousands of years for mankind to understand. It's your decision in how, and who you want to carry with, (:42). according to your agreement, on your contractual agreement with your soul. The new U Systems which will be shown will satisfy all the needs of the man on this planet, those who want to stay and be earthly, facilities by the KF as a whole will be to provide. The man in the depths of Amazon cannot sleep in the dark, while the man in the west, abusing his woods (forests) and whatever he has done to have freedom and pleasure of the life in the west. As we said, both will sleep the same. We have seen how fast the knowledge of KF has penetrated into the Amazon, now we use the same process to reach the regions in Africa and Asia, that they have the same privileges as the man in the cities.
Go back to the soul principles I said all the time, you need only 2 mobile phones to live a life, and if you follow the principle structures it will be the same. The new U Systems will meet every need of the man. If you remember, times ago I said, if you wish to create, to have gold in your hand, and hold your palm of your hand, will be there. this new T will be what is in the palm of your hand. The STM in interaction with a unit creates whatever

man needs. You carry the soul of the physicality, (:44). in the dimension of control of the man if you wished. This is a gift which I gave today, for one birthday.

In the coming days we will show this T. The decision of the HKF is, no announcement, they want it to be shown outright, and in one go when it's ready and is to be shown. No notification, and no pre-notification, and the decision of the HKF is sacrosanct. We deliver this T in the coming days, but I hope as KS, you are ready to receive it, to see it, and be able to transfer the knowledge to the rest of the humanity. My deepest condolences goes to those who use all the airlines and cargos to ship all the vaccines around the world. I don't know where they are going to dump, and how you are going to dump all this. Understanding the structure of the T on the space level is part of what we will deliver in the coming weeks and days. (:46). As I said, the enhancement centers to be built will be placed more or less for those who cannot do themselves. And accordingly, as I said, it has been the wish of many of those who built those centers with us or bought the machines, has been to be able, for people to receive the benefit of it. And that shall be. We'll talk to all those who decide to be part of it, who have been part of the EU development centers and we'll announce the flat understanding of how it is going to run and how it will be. If you are sick and you have to go to an insurance company to get the approval, it takes years. We'll create that condition for you. You become insured by the family of the KF. And in that process many have taken steps to make sure that happens. The whole structure and the work from now until March is not only to give the T and teach, but start setting up the leadership, One Planet, One Nation to be run on the ethos of the U Council that we do not run into these problems again, and we do not find traps that , and we do not create traps that leads to other discomfort for other people or races, or the visitors, or other citizens of this planet. (:48). Many of you will see this as part of your life. What you wanted will be satisfied, what you wished for will be satisfied. The new U EU is universal and will satisfy every need of the man on this planet, but this time when you see these do not jump to become a monkey, to copy. Understand it and teach it that it becomes part of your life. It's how you uhandl it, it's how you see the benefit of it. Not just because you've seen it, you don't know how to handle it. As I was explaining, .. many of you go to the shops nowadays and you buy plants, herbs, and you see they are beautiful in the shop, and there are hundreds of them. You ubuy a basil, you buy a herb, at home they last a few days or whatever. You water it, you do everything for it, but after awhile it dies. But how come it stays alive and perfect in the shop. What have you missed? What have you not understood? What have you seen, but not copied the right way, (:50). like the MaGrav system? Why many of you go to shops and buy a potted plant and after a few days dies. I gave you the Gans, I did everything with it. Yes, but you didn't understand the knowledge and T behind it. The T is upside down. You never been told, and that's why they still make you to buy more every week, and month. But when I buy a plant and I keep it, and it lasts for weeks, for months. When I leave it to somebody else in the house, it dies, why? I know the process, I understood the process, and I follow the process the way the plant has been planted. But the farmers and shop never teach you, because if they teach you, they can't sell you the next basil, in 2 or 3 weeks time, because when you cut the top, the rest is gone. What is the secret that they can keep a plant running, and alive for months until their natural process is cycle of seed. At the present at home, you are used to watering the plant from the top, and you water it,

you put Gans on it and everything else. Maybe extended by a few days. But have you noticed something, have you realized something? When you go into the greenhouses, there is hardly any ever spray from the top, the plant pots which you buy in the shop are watered from underneath, from the bottom of the pot, the roots sits on the bottom, not on the top, you water the top, (:52). not enough water reaches the roots at the bottom of the pot. The plant dies. When you want to water a pot you put it in a tray of water and let it soak, you feed it from its bottom. You give the energy from under until it grows over, and you'll never loose your plant. You put some Gans's in the water, yes, because the root is at the bottom, where the nourishment comes, is strengthen the bottom, because this is how it was grown, this is the way it was nourished. This is where the science of it, the knowledge T of it. But they never tell you. It's the same. I gave you the MaGrav, you looked at it the wrong way, you watered it the wrong way, you fed it the wrong way, and you expected to get something from it. As usual, the KS decided this is going to be the same ?? MaGrav they want to be. We put it ?? because that is our understanding of it. You have to understand, just because it's a plant in the pot looks perfect in the shop, it's not the way it was meant to be. The olden days the farmer watered it from the top, when the roots were on the top. The new way is to water from under, from where the roots sits. This is the same knowledge and the same T as I have shown you with the MaGravs. You took the energy from the wrong ends, and you never understood the totality of the whole knowledge. (:54). Understand the process of creation. understand where you are and what you have to do with the play of the fields, then you can survive anywhere in the U. When we show you the lift and the motion, and as our KS wanted it to be a flying carpet because they say you are Iranian and it will make a good impression, an Iranian showing a flying carpet, or a flying car, but what is the T behind it. It's the same system as you have, of just moved a few things in different position. There is no difference between your MaGrav S and my MaGrav S, but I know how to move things. Where the fields come, how the fields come. And I just don't go there, I know I have to show.

I Built Pyramids - Shown Man Flight Systems Before - Never Understood

I have shown for centuries. I built all the pyramids you see with the knowledge that man never understood at the time. The knowledge of flight has been given to man before, but man never understood, just copied. This time we don't want you to copy, we want you to understand. You can make a spaceship out of a clay. You can create fields beyond imagination out of sand, (:56). if you know how to reach the soul of the sand. You've got to realize, this is what I have written in the books, and I have discussed it with many of my professors. One atom of H stays for millions of years, and we see the electron, and proton, and the neutron moving ever, forever without stop. How energy is within 1 atom. If the man could harvest the energy within 1 atom of Deuterium, man can feed the whole of humanity for millions of years. So the knowledge it's not that it's not there, the knowledge is there. It's just mankind does not know how to harvest. Hopefully this time when we teach, mankind will not make the mistakes of the past. We will not let it hide within the Churches and the Mosques, in the name of the soul. We'll teach it to the soul, that it will never become burden, and the servant to its physical existence.

Any questions? (:58).

About Injections and Chips

Q: .. was referring to, we should take the vaccine with the DNA altering Chips.
R: I don't think you were saying to take the vaccine, but if it was forced on you, then there was remedies for that. There are solutions for that. Is that what you were saying?
K- There is a way to handle it, yes. And secondly, these are chemical Chips, they are not metallic Chips. There are a lot of questions about this injection as you speak, that it will hold together within the structure of the body of the man. There is a lot of question mark about this operation, and would it hold together that it can operate. There is no Chip, the Chip, even physical, what I call, the position, can be removed very easily. The whole knowledge behind this is control. (1:00). The whole pressure behind this is control. They want to control the man, and they see it as something which is important. When we open the span of the space in the coming weeks, that we open in a very rapid way, the claim that this planet cannot hold on, to a number of its citizens will be reversed. We will not have enough citizens to be able to travel the span of the U. And we won't have enough citizens to be on this planet. Two different propositions. As I said, we give mankind a choice. I think something which will become very apparent, if Trump looses the election, through his anger will open a lot of things which he agreed to, and tries to blame others for it. One of them will be the vaccination. I think maybe the situation in the American election will be positive, as this man is unstable, will declare himself, in a lot of things in trying to gain leadership. He might flip, and open up his mouth to a lot of things which has been agreed. And then we'll understand more about the structure agreement with the government. But principally, what they did in India, planning a Chip to control, (1:02). if that is, it cannot be located, you cannot travel long anywhere, and it can be removed. Through understanding of the Pl T cam be made literally effective-less. I can show you a Gans T mixture that makes any Chip, instantly ineffective. You find the location, just put a patch on it. It's the way we paralyzed the American satellite. If we could stop such a massive interaction of the fields in 1 drone, this is just a game play. We have the T for it, if you get injected, we deliver the T too. Wear a patch, they become ineffective. If they ask you to come an change a Chip malfunctioning, let them do. Put another patch. All these things have an electrical, or chemical current flow. And most of you KS need never fear from it, you didn't need me to tell you now. There is a structure mixture, you use a Cu, Zn, CO2, in a specific way as a patch, you interfere with its electrical motion or any chemical motion. If it is done in a chemical way, you add AA to the patch, because this way it ?? bounds with your protein. (1:04). You should have never fear about this. I think I put the nail in the coffin of vaccination. You need to create a ratio of 2:1 or 4:1 and put it on either side of where the injection is. Or a liquid, a big patch, just paralyze it. What they made as an injection is just a child's play in the science of the U. All the systems has this. If they have used Titanium as the connection, use Gans of Titanium. If they have used gold connection for long lasting, use the same. Add a bit of Titanium and gold Gans. It's another implant, just a piece of ?? I told you, they start and we'll release T. and I don't think . As I said, today is the day of gift, because somebody specials birthday, and it's a gift to all of you. Don't have a fear of injection, you have been taught the knowledge of creation. You have been taught the science of U. You fought with the Cup 1 and 2, with the Corona and you have seen how many of you

saved your lives, and family .. now use the same. If they give you the injection just go home and have the patch ready. They patch, and you patch it. (1:06). They will call you because they can't control you, make an armband patch and sell it. And give to people as a gift …

You can make it ineffective. You have to understand, if they use a Chip, you have to make it with the material of the Chip to paralyze it, if it is as a chemical reaction, as you say it could be connected to a gene, very easy. always use the AA of CO2. And then make sure it is correctly done in every mixture … .. the minute you receive the injection, put a patch on it. They have made it by law that they can strip you and inject you, that's it, you have no rights. Let them do … patch it on. Make it ineffective. We stopped the most advanced American spy plane with million of these Chips in it, in an instant.

KF KS shouldn't worry about the Chip. Let them Chip you. (1:08). you chop ?/ they can't do anything. And teach it freely …

(1:10).
You have to realize, if they give you a Chip it cannot flow in the blood circulation, because then it kills you, if it gets to the heart. So it has to be physical to stop where it is injected. If it is a chemical, to be together it has to be in the same position, it cannot flow. The chemical injected but it ?? joins together somewhere, connects somewhere, you interrupt at the point of injection. And if it is in the blood circulation it has to pass where it is injected, because it's part of the blood circulation. it disrupts it and gradually break up. There is no difference between this and a Chip they put in your telephone, or in your house to listen to what you do. You can interfere with it, but this is very simple, a heavy amount of CO2, make sure it carries amount of CO2 that it blocks any motion in the blood. You are done, you paralyzed. And if you are very worried make a strip of Gans and strip it, 3 or 4 places on your arm or leg. Put it around your ankles an your wrists. (1:12). We're sure Mr. Gates is shooting himself. They always listen, I am sorry, Mr. Gates your plan hit the pot. It's so simple, billions of investments has gone down the shoot, I kept silence about the use until today. And now we see, exactly what is going to happen, it happened. Curfews, 8 to 6, suddenly mass murders in Vienna, to save the police on the road for protection, moving militaries from Germany to France and police from the different cities to the cities where they want to force the injections. They have no emotional control over you, like they way they took the Germans, they took the whole of France. They didn't care who they kill, because they were not Germans, and this is the policy which is coming, and don't resist, just use a patch and teach everyone, go on the internet, and show how to make the Gans's and the patches. Bill Gates, checkmate. You tried to buy the KF 15 years ago, I told you no, the answer is still no.
Any other question. (1:14).

Q: With the planned rapid release of the Pl T, will money become obsolete?
K- No money is the pleasure of the man. We don't give you money, you go and play monopoly. Now the money becomes monopoly money. I wonder if we go to the factories

Q: .. does the mythology of the past have a deeper meaning, for example the myth of Hercules, and the 10 headed Hydra, which . is the trial of the control of the emotions through the light of the soul? (1:16).
K- Some of it, yes, very much so, because this is how it was hidden, the knowledge was hidden. Don't forget as I was saying to one of the KS, we think or we thought we are of one race, but one position, and when we get out, we find out we are actually not from, we are from another position, but we happen to be .. .and with it they brought the knowledge, mysticism …

As we seen the same with the KF. How many people came, and now they say I am their student, and they taught me and everything else. and they could do only a little patch so a lot of things went into mysticism ..

(1:18).
We have seen one very recently. Mrs. Mohammadi made a history of lies and making things, everything they want to lie, they say, Mr. Keshe has said. he is going to make portals and bring people to earth …

when it moved from central Asia to Jerusalem
(1:20).

Any other question.

Q: .. I remember you praising that Mrs. Mohammadi, so why didn't you stop her before she did the damage?
K- They all have a purpose, ?? with her there was a purpose. All these people come to the F, or work within the F. .. they have a purpose. It's not a damage, we have to let these people do their work, then people have to judge. It's a benefit, not a damage. If everything is accepted, then it's like following a sheep, when these positions comes up. people have to judge.

(1:22).
As one person wrote, I became a KS for the knowledge, not the person.
As I said, I have come here for thousands of years, this is the last time, I leave. I will deliver and complete this time, because the mankind is ready for it.

(1:24).

Any other question.

Q: Any information on H1N1 strain found in Canada ..?
R- someone caught the H1N1 strain (1:26).
K- If you look at it, less people have died of the flu this year than last year.
R: 95% less , even.

K- but if you looked at the number of people died of the virus, it's not as big as the flu. So in a way, the Coronavirus has the power to overcome the flu we all suffered from in different versions . It's a very good anti-flu ..
R: A remedy for the flu ..
K-
It's the vaccine we have been looking for, A parasite eating the parasite.

If the put a Chip in it, (1:28). or a chemical Chip in it, ok we paralyze it. It's in my life and in the knowledge I carry, I always find the benefit ..

Chemotherapy ..

There is a specific way to handle the Chemotherapy …

Q: In order for us to develop an awareness of the emotion of presence, (1:30). do we need to experience it once, or is it
K- You have already experienced it. If you are 1 year old you have already experienced it. It's just you haven't been aware of it.
Q: Is it something we can become aware of as we become detached from our physical emotion?
K- No, it's like your dream, you didn't know what the dream was, now you know it is part of your emotion. But now it is a soul emotion, now presence is a soul emotion too. The position. I told you there are a number of emotions mankind is not aware of, now you know it is. You can create a condition to dream about your mother tonight, I can teach you, even she is dead 50 years. You can create a condition that your physical bodies are present when the souls meet, and you take the memory of it. It's not so difficult but you are not aware of it. It's a simple understanding of the structure to the interaction between the 2 souls, and be witness to it. In a physical dimension which you do. how come you remember some of the dreams, but in fact from the second you close your eyes, in fact the whole 24 hours you are walking you are living, your soul is in communication with everything. Many times in your life you suddenly stop and do something else, or you change a position, and you say, oh, (1:32). why did I do this. .. because the soul is in control all the time in the background. Have you felt sometimes, somebody grabs you and pulls you back. It's your soul which stays behind and doesn't let you move. And it takes somebody because your soul is present of the accident to happen, or you are brought to somewhere .

Because souls talk, they bring you to the point. If one day I tell you how soul talks, you'll be shocked. I am already involved in it, when it is over I'll explain to you how everything happened. Because souls talked. (1:34).

It's the problem in physicality, we try not to enter this dimension because up to now we didn't have to, now we have to, to become passengers of the U. You don't want …

I can punish so easy, mankind to take that from the man, you become without RNA. No man will remember nothing of the history of his own creation. We done that once to one culture, (1:36). and human race moved that close for that to be done. We erase the memory of life, we just leave the physicality. A fish in a fish tank with no memories. One race was punished like this in the life of the Unicose for what they did wrong, and mankind has moved that close to it. Just a bunch of robots, they will not relent on their wrong doing. Some of you will travel to that point, your offspring's will come to that point and then you'll understand. We don't punish, we stop the cycle of what we call, ?? Any other question? (1:38).

Q: Can the Pl Pain Pads be used in a way like the patches you speak about.
K- Yes, but you have to be very precise in what you do. It is a patch, like I explained before, but it has to be patches facing each other, that you create a transfer of energy, or you can put it at a balance with a high level that you wear it as a ring, nothing in that environment can change.

(1:40).

Put a patch here

(1:42).

If they use titanium in Chip, you need Titanium Gans.
(1;44).
If they use a chemical Chip .

They tested the physical Chip in India for controlling birth. Now they have gone to the chemical Chip, I have seen the patent, I have checked their work. Paid by Gates Foundation, as part of their work in microchip, they hid it in there. I have studied their work, and this is the way to do it. You interfere with it as it flows, you dismantle it.

For any Pl to communicate with another Pl it needs to have a communication line. Line of fields, chemical fields ..

You always have to have a Co2 in the patch, because all the line are Cu ..

(1:46).
We presume, that it amalgamates somewhere in your body it becomes a Chip. In liver or Kidney or

It's a information transfer you can deliver it and dismantle it.

(1:48). I tell you why I give you this information, In the structure of the U Community sometimes we find creatures who get infected by specific fields, but we find a way to filter it. in this way you filter the energy. But you have to find the component of what you got …

(1:50).

Wang Lyn (WL): ..
put on the wrist or legs. .. have diabetes, the ceramic bands showed much better.

K- diabetic reduced
When I tell you to do this, we have other experiences the same. Just follow the way and you can interfere, (1:52). and block. Don't worry about the vaccination, you can block ..

(1:54)

They need to use a communication bandwidth ..

Any other question.

K- Let me explain something. Once we understand the frequency they use. we can use the EU to block cities ..
This has to come to an end, abuse of the physicality ..

(1:56).
I have no fear of the vaccinations, because gradually we release this T, that the vaccination doesn't go through.

(1:58).

(1:59). **Commercial BREAK** >>> (2:23).

K- .. What we have to understand is the extension to knowledge which we tried to explain before, (2:24). and to understand the totality of it. As we said before regarding soul of position, and soul of presence. I received a note to explain this more …
We are aware of the soul of the position, we see it in many cases, but we never understood it. .. we see this in the animal kingdom, how animals find in the dimension of the position, but hey use it in a different way. For example, pack of lions or cheetahs, target an animal. they don't talk, we see this many time .. (2:26).

We see this with the birds, they travel together.
(2:28).

There is a sense of soul that gives them ..

This is what we call understanding of the positioning. (2:30). This is where we live through understanding more, we understand and now and why? This is part of the structure of the soul the

(2:32). we have learned a lot. We understand a lot. Now we understand the process. Now we can see similarities, we can at least strive to reach to that point. Then we can understand what we assume not to be part of us is part of the structure of other creatures, even those who have been created on this planet. They fly to the same position, to the same tree. GM of the Earth continuously moves, never stays the same. (2:34). Do they use, as we assume MG field of the Earth to find their position or do they work on a different understanding of the totality of the position of the Earth as every year changes. Every time we have a magma eruption the field essence of the planet changes because part of the internal magma is ?? used, the combination of the field changes. We accepted that they use geomagnetic fields, but is it, or do they have a higher sense of presence and position. Something mankind has missed, or we have to strive to reach to elevation of the soul. (2:36).
Any other question.

Q: Azar .. a doctor was explaining that the vaccination can change our DNA and RNA. Why are they trying to change it? If someone goes and gets first vaccination .. is there a time limitation to block the vaccination, may take 2 weeks to make the Gans. (2:38). repeats . .. say it has Titanium etc.. it takes a week or 2 to make the Gans is there a time limit?
Can you repeat
K- Prepare yourself before you go.
Q: But how do I know the material inside the vaccine?
K- If it is a chemical, it has .. combination, which the vaccine should overcome. The patches you make should overcome, because you use the Gans of CO2, the AA, usually interacts, because if it is in the cell of the body, it has to communicate within the cell of the body, and all cells communicate through the CO2 and its AA. So if it is a material injection as a Chip, again it has a structure of a CO2 connection, or a metal connection. Usually if they don't use Cu they use Titanium. So you cover yourself both ways. (2:40). These Chips, if there is a solid Chip has to be detectable, and if it is detectable it has a metal component or a chemical component composition. Either way. Be prepared for it, We didn't know , the Corona came and we made the Gans's, we prepared for it, do the same. Make both, because we don't know what combination they use, because we know the chemical version has already been developed.
Q: What's the reason they are gong to change our RNA and DNA?
K- The way we see it is a social control. You know the kings always have to have the kingship, then they have subjects and they are proud to be, and even the world leaders we see presently in your country, in US. A guy has enjoyed to be called a president, he is doing every trick in the book to stay president, why? Because of "yes president, yes your leadership." Ego trip. Now the pride that they can control the humanity. Why did they plan the Chip, they were made in India? Switch on, switch off, now nobody can decide, they switch off. (2:42). That's all.
Any other question.

What Does Elevation of Soul Mean in terms of EU? (Excerpt from HERE)

Q: Salameia **What is meant by elevation of the soul, how do we do it with the help of these EU?**
K- What you mean by that?
Q: Nice to meet you again. I am a little bit confused about what you mean by elevation of the soul? (2:44). I would like to hear from you if it is possible an explanation of meaning this elevation of the soul and to do it with help of this EU, Because I would like to explain to other people, but if I don't understand, you understand?
K- Yeah, but what do you understand about your soul to start with?
Q: … I mean that my knowledge and feeling. To elevate the soul, to be in connection with the Mother, Creator Mother, and to have all these attributes of the Divine.
K- Yes, but what do you understand, that's what I said before, what do you understand about your soul? **What is the function and purpose of your soul?**
Q: This is my purpose my soul, to be connected with the Source and receive all the information's from this Source. Because I know this consciousness, this Source is always good. I don't want to do wrong things, and I will be guided by my soul, which is in connection with this Soul, it is like a guide for me. I want to be moral, to be good and think good, for me and humanity. (2:46).
K- yeah, but I still have a question, **how do you recognize your soul?** If you understand it, and how do you see its existence if I can put it that way?
Q: I can see, I can feel it. I have a feeling, an intuition. Like intuition, always I listen to my intuition, and through meditation, and sometimes I have feelings, sometimes flashes, and always when I start to sleep to talk, sometimes I go in "delta", and I go out from my body and I travel. Always when I start to sleep in the night I just go and out of body and I see many things, and this is the answer of my question. And I am sure this is the answer of my soul, the soul guides me and help me to find the answer. I don't know if I am correct, maybe I am crazy, but you asked me and I answered to you, at my level and of understand.

K- Okay if you look at the way we try to understand, (2:48). is that, the soul is where our physicality in essence, is the creator of our creation. We see the soul, as we always considered to not be part of us. It's something outside, but now we know it's inside within us, because our physicality is made around it. In a celestial bodies, that center is in the middle of the star, is in the middle of the planet. With us, as a human being, a tree or whatever, we have not curled up to be that, we have decided to take a different position, but because we are near another stronger satellite like Earth, the distance of the strength of our soul in respect to the Earth's central MG field force, and its matter state Inertia, has decided to find a position, that, that position, it can integrally hold on to physicality, so we can move it anywhere, once it made its structure. We can be in the womb of the mother on the 10th floor, or the ground, it doesn't make any difference, because in that position we have accepted by genetic, or by collection of fields, that we take this shape, this position. In so many ways, now we have taken shape, we are independent, but we still compromise with the field strength of the position we are in. On earth we are 50 kg on Moon we are 30 kg, but that is in essence, (2:50). the total mass of us, maybe it's 10

kg, doesn't matter wherever we are, but in respect to the position we find a place. So the soul is independent. Once it's created, the size, the representation of the physicality created around itself. The soul what it creates around, we call it a Earth. The soul the man created we call the body of the man. So that's the soul.

But we have to understand, in a way, we can cut into certain, depth of its strength. When we didn't have the material, we could dig with a spade and a hammer, we couldn't go more than a few meters down. We got educated, we understood the use of tools, now we drill deeper, we go closer to the soul of the system. It's the same way, now mankind, up to now used to dig with spade and hammer on the surface of his physicality in contact with his soul. Now with the teaching we go deeper. How deeper can you drill, or go to a higher strength, the more you understand of a higher order structure, on the surface you have a soil and dust, in the center you get to gold, you get to magma, you ?? find to plasma, and that's all it is. Then you understand more what is hidden in the Earth, when you dig more. And with teaching we are doing the same. We teach you more what is hidden inside, and it is for you to understand, what you can do with what is inside. We reach gold, what do you do with the gold. You reach platinum, you reach other materials. (2:52). So in a way you call it a digging in the shape of man, understanding of the man, we call it elevation, understanding more, going deeper in the structure of the soul. Then up to now we have been in touch with the surface of it, physical emotion, eating, now we go deeper in the soul. This is when you get more, then you find a way to melt the gold, you increase your knowledge, because up to now it was just something, piece of metal, now you increase knowledge how to melt it, shape it, present it. And that is the STM, it's how the more you understand the deeper you go. You get to more precious materials which man hasn't got to know. Now with digging deeper, if we can go below 100 meters, or 10 or 100 km, then we find more materials, more rare Earth, to us it's rare, but to the center it's very common. On the surface it doesn't exist, very little of it. This is what as a geologists we see, the deeper we go, the deeper we go in the oceans we find animals which can't exist on the surface, but according to our data, (deep in the ocean) is a place nothing could exist. But we see it still exists, in the depths of oceans, high temperatures, as we said before.

So enlightened, or elevating the soul, it means to understand more of what is there, and when you have the knowledge how to access it. How to be able to use it. And this is what has come, this is what it is. (2:54). It's not that, how to access it, it's to understand more of it. When you can go really to the depth of it, to the center of the planet, or whatever, we call it when you reach the lessons of the level of the Creator, because again it is of one essence. So when you speak about elevating the soul. It's how much have you dug into it, to understand more about its construction, more about its interaction.
Q: Yes, it's clear, but this EU (units), how can help the people. .. How can I explain to people and convince them that this EU can help them?
K- … The thing is that in these EU, we have dug into, we have gone further in the strength, that you don't need to dig. To have a gold ring you don't need to get a mine, and go and dig a mine, to get to the gold and bring it. You go to a jewelry shop and it's there on the table, because somebody else has done that. To elevate the STM, we have done that. The system combination carries in the essence, the totality of the essence of the

creation, so it is there. Those who cannot make they can be helped to be, to reach. You buy the ring, you wear the ring, you're given the knowledge, you carry the knowledge, in the essence of the elevation of the soul. As simple as that.
Q: So you make a parallel between the gold which is like the soul, (2:56). and we can see gold because of physicality, but we can't see the soul because it's another nature of ..
K- It's another field strength. If you go to the strength of it and you want to manifest an apple in front of you, you know the strength that you have, at this point can become to manifest it as apple, you like the taste, the color of it, to you is an apple, then because you put the emotion and the presence of it, you create the apple. Because we already have a reference point of the apple which we need. We've shown that with the orange, we put the texture of the orange out, and we taste it, the taste of the orange, the energy of the orange, and the emotion of orange by drinking the water. Is it because we saw the orange, or if we just give this cup of water to somebody on the street and they tell us, "oh, this tastes like orange." You understand. So in essence, as somebody said, as you buy a mobile phone, you don't need to know how it works, how it's put together. So as we cannot teach the man one by one, we elevate the soul of the totality in that level, that they all understand.

Q: Yes I understood.
K- You are a professor in theology, am I correct?
Q; No, I am not in theology. I am .. in International relations. My dream in 2000 was to find a new theory of knowledge which put together the ethics, spirituality, and all sciences. Applied and natural sciences, (2:58). and social sciences, and world view, and this instrument is … integrated solution for elevation of humanity, and not only humanity but the soul. And you answered my question, you find it, and I became because of my wish … I am so happy, God Bless you Mr. Keshe, I love you.
K- Thank you very much.
Any other question.

Q: Ike is guessing there was a race in past who .. got eliminated. ..
K- Not eliminated, they were put on their own hold. We don't destroy, it's just that they don't have the capability to understand what they do wrong. They stay in the dimension of physicality.
Q: He is guessing the dinosaurs … Atlantis ..
K- nothing to do with this planet.

Q: Do the planned Chips have the ability to interfere with the body or is it just an identification tool? (3:00).
K- According to what is present in understanding, they have reached the structure, what I think they have used part of a structure, to be able to interact on the emotional level for control. They tested these times ago with Chips in the brain to see how it is, and they have converted it into chemical combination. Gates Foundation has spent a lot of money, over years to achieve this.
Q: Do the patches have to be used forever or only until they neutralize the Chips?
K- Till they neutralize. I mean if there is no Chip, they said there is no Chip, there should be no problem, there will be no one to call you back to replace your Chip, is it? If you go

and receive the Chip and you feel emotional changes, let us know. Then we tell you how to develop a system to interact with the emotion. Any combination they move, we can move with them.

Q: Is there a patch for humanity our Chip is our soul?
K- What does he mean? (3:02).
Q: .. you showed the patch on the arm, with … there must be a patch for humanity to stop this …
When we come into humanity the Chip is within us, our soul … .
(3:04). .. …
K- It's how we interpret the knowledge and how we understand the knowledge. is an intuition , is what touches our soul. You got to feel it, understand it in the emotional and soul level.
Q: I definitely feel it …
(3:06). … thank you

K- In essence we all know it, but in essence we have decided not to remember it, we got too much involved in physical dimension, and that is the pitfall.
Q: .. the U speaks in many ways … the soul is starting to be more present, come out of the body

Linz Exhibition Temporarily Closed

K- To be more interactive. We are not interactive anymore in the center. Maybe we can announce, let people know. As you know Austrian government has issued a regulation due to Corona, that no exhibitions, conferences, presentations can be held in Austria, in the month of November, till the end of the month. And we tried to negotiate to keep the exhibition center open, and they said, it's a public domain, (3:08). so exhibition is shut down. We are under the national rules and regulations. .. under curfew ..
. It will be reopened from 1st December, if they don't extend it.

It is open for us to go in and look after things, but it is not open to public to come in, due to the Corona infection.
Any other question

WL: (3:10). I heard someone told me our soul actually is in the position of our heart. But something happened and it changed, and then the soul repositioned, in the brain. So if that change caused the break between our heart and brain, so we cannot feel united as one, and then separate into our physical soul and our soul?
K- So if I tell you, you were a piglet and then you changed to man, do you accept that too? We have a STP and STM. The STP is like the Inertia, and the STM is MG what we call MaGrav, and it seems a lot of KS have not understood this. That's why we explained in the stacker unit, we put the STM, the soul of the planet.

(3:12).

(3:26).

(3:30).

(3:42).

You live in the body of the in a plasmatic condition, and even these disks create their own bone marrow to create the fields to contain the information going down and up through the channels. Otherwise, all these leaks when the information comes from the brain, (3:44). or from the organ, it's gone somewhere. If you look at it you have a one circulation of CERN, if you want to call it, but in a straight column. You have to be able, these vertebrae, bone marrow, or in fact, neural system is the communication line system, and you have to hold it, it's a high speed cable, and for it not to loose any, for it has created ?? you need a vertebrae to be standing up to a ?? shape, but body has used it as a containment field flow. And then if you change slightly

(3:56).

Take the skull of it and create the gap in here, the vision changes, the man's perception of everything changes. Take this out and put a platinum here, which happens in most accidents. Or take the brain part out, you see the emotion and everything change, because now the information is not the way it used to be. (3:58).

(4:00).
We are a bunch of M fields with different strengths and behavior, which makes our bone, our flesh, behavior, psychology, and our soul. But in principle all of us sit within the bracket of a certain M field, which is the AA of the man. Everything else is attachment to it, and each attachment is limited to what it is. .. the body of the man has every element on this planet, because it has used it for a purpose and ?? to make itself more efficient. We find in the body .. the most rare earth materials, we never knew existed. But its within the body, if it exists on this planet, been added, or connected to the AA somewhere. What is conversion has to pass the AA. When you look at the bone marrow, and bone structure. In your bone marrow everything is decided to be produced. On the top of the bone, what they call the spongy part, now ?? this is now common denominator. Again the same, you look at the fluffiness, it has a certain gap, and the same. Do you remember the way it came in with different size holes? (4:02). Now different size holes goes out, this has become red cell, this has become your immune system, and the rest of it. Then we understand, the totality of the creation. And all these (micro tubes) are Nano materials, what controls the strength goes through them, and what they need to add by their field strength, to go, because their own structure is decided by the bone marrow when it was

created, preset. When you have a chemo you block this (inlet holes) or you change this (exit holes in spongy bone), so you don't receive. This is why we say, people who have a hip operation, they create what is known, fatty liver, and fatty heart, because now this (spongy bone) is gone. There is other part f the bone which is on the other end in the knee, now all these that doesn't have the processing, and it has to come out as an AA cell, getting sucked out, it's produced, has to be used, the habit of the body of the man, stores things, so it's created, one day it might be used, so deposit around the heart, and liver. When you have a fatty liver, or fatty cells, look at the function of the bone, and the bone marrow, no where else. Because that is where the fat comes from, where the protein was produced, and the body stores. It might need it one day. We see fatty liver, heart, kidneys where the people mainly had a hip operation, (4:04). where the top of the bone, the femur has been cut. that's the reason. It has nowhere to go, but the body continues to produce it on its length, so it comes, it has not got the right filtering to go out, so what it does as a raw material comes out. They haven't touched the physical part of the bone, they just took the top off. It extrudes coming in, and extrudes going out, according to field strength. There is a part of the bone which has no holes, it's just like a strings, which plays the vibration for what to come in this part. Now we understand the T, the frequency and that bandwidth, when I tell you, that when you have a ?? masts, like G5 or whatever, this is what your own body plays, plays a frequency for what to come in. Now you are adding that frequency from outside, which interferes with what can come in, and then you see the effects of it, through the bone marrow. Depends what that frequency will tune into in your body. And it is usually done in the bone marrow. In the bone structure conversion. Very seldom we see the interaction with, unless they create a massive vibration, within the cell structure of the plasma of the tissues. It's the same with the virus, (4:06). but that covers the entirety of the structure of a cell.

I carry the Knowledge of the Universe, and we see many different ways, never been to the medical school. I never touched anything in that dimension. I created it, and I know how, and I understand the way. And if you add to the same thing, if you understand the same thing, then you understand how emotion is created. The creation of emotion is the extension of your AA bone marrow, but there it gets converted to another dimension. Any other question. (4:08).

R: the power just went out in my place .
We call it a day .

END

354th Knowledge Seekers Workshop; November 12, 2020

Emotion of Knowledge
DNA of Soul

Soul remembers all of its past experiences
Mr. Keshe Past experiences in Desert to prepare

Belief in religion has a fields strength

Change will come through new soul to be create March 21st
K comes from a Bahai family, Bahai religion corrupted worse than others

ENGLISH TRANSCRIPTION

(:06). .. As part of the KS, in way or another in the past few months we have taken a new course. As we release more knowledge .. in the universal level, and not on the matter level of mankind we come and we encounter and come to new ways of using our own physical body, as it was said, I made man in the image of myself. So in fact, up to now we knew about the man, the physicality of the man, and the emotion of the man, in the teaching of the past we always said, in the universal level as it is made in the image of myself, means there is more for man to know, more about his own creator, about how his creation has appeared, and what is the connection between what he has in the physical dimension and what he has add all the time in the dimension of the strength of the soul. In a way, we have one common ground with a translator, converter, or inverter that is the brain of the man. And what we start teaching is, what happens, what other knowledge's are available to the soul, without, or before it is converted or inverted, the STP of the man can translate it for the physical body of the man, to live by.

In the past time, we had the prophets in any shape or name or form. (:08). And in that process they always taught the man the process of understanding in a physical condition and what was, something in the background that was controlling it, we call it a soul, we call it a Holy Ghost, anything we want, we attach a name to it, but in fact, without confirming that it is part of us. And if we understood what is made in the image of myself, is as we said, we know 5 or 6 of the emotions, happiness, sadness, joy, whatever, now we understood, in the past few weeks there is the emotion of Presence. There is an emotion of understanding of transformation and transition in any dimension. There is a knowledge which is now, is part of us, we have to elevate to understand more about our soul, to understand the two new emotions which we have introduced which is common to us. Now we understand it, now we have to achieve it.

Emotion of Knowledge
One of the most important emotions of the man, is the emotion of knowledge. We are born, in our DNA we take shape, we get constructed according to the environment that we live in, and becomes our structure. Then the interaction of the connection of the fields of what makes us to interact with the environment we call it, with the STM. And this is what the man has been. Now we touch the soul of the creator of the STM, what was created out of, and lead to its creation.

DNA of the Soul

And in that process, as we have the DNA of the physicality, (:10). now with the new understanding, we **understand the DNA of the soul, the structure of the soul, the knowledge which sits behind its creation. The soul is not created on its own, it's a collection of the knowledge of the U in one thing, how to position itself in respect to every other thing in the U**. So it has a knowledge, and if one understands it becomes easier for mankind to reach the new level of elevation of the soul, understanding the dimension in the universal condition. .. it means within DNA, within RNA of our soul is the Knowledge of the Universe (KU).

We Do Not Need to go to School

We do not need to go to school, we do not need to go and put every cell of the man, to become the cell of the eye, to be this color, to be that color, because collective efforts of whatever answers are put together in the dimension of physicality, and the environment which we are born, we are preset, to look Chinese. We don't get born as blonde or black or white skin in China, and then we change to become Chinese looking. All is preset, all our genes, for where we are going to be born, physical dimension, and our .. intake of the knowledge gives us the ?? Chinese. Or what we understand now, is the same for the STM, but this time the soul takes the shape the form of the U, and the knowledge we carry to be physically in the shape of the Chinese or European, now is carried in the STM, which means the soul has a shape, has a dimension, and has an integral part that it remembers all the knowledge. (:12).

How we remember at a certain age we have to start moving, we have to crawl, at a certain age we start speaking, .. thinking, and communicating, and we choose the language just because we are born in a community of the same language. Now our soul is the same, I made man in the image of myself, but the image of the soul is representative and in the totality manifestation of the STM in the U Community, how they see you. You have 2 lives, 1 in the physical dimension, and 1 in the dimension of the soul. And now that ?? inherent RNA and DNA of the STM is what we start opening up, that the mankind understand the truth about himself. The truth about what capabilities he has that he didn't know.

And one of them as we said, was the emotion of the Presence. Today we talk about the emotion of knowledge, which means that when mankind elevates to the position of peace and understanding that become part of the U Community, he realizes he access to the most advanced amount of information about the U, because it has been put in there. It has always been there, but we did not know how to tap into it. And this way, with the KU mankind does not need a school, prophet, a guide, because the KU how it is, how you interact, how you know where fields are, you know where which part of the U there is a problem, and not to come, not to be, or to avoid, (:14). or to be. Therefore as within our

RNA and DNA we carried the memory and information of our ancestors, we don't touch certain things, so we don't do certain things, in the memory bank of the DNA of the STM, now we get access to the KU.

Day of Judgment - Take Path of Soul - Knowledge is Within Soul

What this means, .. man is much more intelligent if he decides to take the path of the soul. This is what we call, "the Day of Judgment." This is the point where we decide to judge, that we want to change the point of the physicality, to the point of the transformation and communication of the life of the soul, detached from physicality. Where even in the dimension of the soul, you're still attached but in a bigger dimension into the U and the U Community and collectively field forces of the creation, but within your soul you know exactly where you are, exactly what you position you have, when you become dimension of the STM it's like you are member of the family, you know your room, you know your place on the table when you speak, and you understand the structure of the totality but you are part of totality. **And now this is where we take mankind to, to the KU and this knowledge is within the STM**. And no one can tell you, I can show you, I can do this for you, I am a prophet, (:16). whatever. We don't have prophets when there is no money to take to be profited by. And in this process we become all KS, we seek knowledge of the U, we seek knowledge of the creation, and once we learn instantaneously, in what we analyze, become the knowledge of the totality.

In a way, **our knowledge is transparent, .. and accessible to every created being in the Unicose. And there is so much knowledge, beauty, information that, in a way, we hardly move, because the adjustments are fine, the knowledge is so finely tuned that we continuously receive it. It's like an information bank, and in that bank sits the heart of the STM**. So many of you will ask, what will we do when we go to the dimension of the soul? At that point the soul is knowledgeable, it's omnipotent, in that point the STM and has access directly through its structure of the fields to the Creator, as itself is part of the creation, and Creator is part of him. This is why in the scriptures it says, if I tell you have beautiful the other side, you'll all commit suicide, which means you don't accept dimension of the physicality, as it is the prison and the barrier for you to reach the ultimate goal. Not that you want to run, but you want to be part of a bigger structure. (:18). You move out from the village of the Earth to the dimension of the U Community.

Knowledge of Universe Given at Inception - First Make a Sample rest Copied from

In so many ways, once you understand this, you choose your soul, where to manifest itself and where to be, and where to be connected, who and where to be part of, and what to love, and what to give and what to take. In so many ways, the **Knowledge of the U, which become the knowledge of the man, which has been hidden up to now, as he could not handle the truth, the understanding of the totality. And from now on, not only for mankind, but for all the creatures of the U, this become open and at the point of inception**, but there is one criteria to it, which needs to be done. The first as we

say, **sample needs to be made, that the rest can be copied off.** Creation in 2 dimension of physicality and the soul in one, that both are aware of, and **this process will take place in coming months,** that mankind will move in the new dimension. In a way, the intellect of the U will become the intellect of the man.

In so many ways, it means **man will be given the library of the knowledge of the creation from the ?? and the time of the creation. Everything the Creator knows is accessible to man according to the strength of his understanding, and the strength of his devotion to the creation, and to the Creator, in trying to serve and give from, that in elevation of the soul, mankind or the STM reaches more understanding of the totality**. (:20).

Need to Make Collective Adjustment - STM goes in one direction

And sometimes there is a **need to make what we call collective adjustment, and this is the time for it, that the totality of the STM moves in one direction, and in one dimension**. We think we know the knowledge because we have to think, what we have learned to add from the knowledge, when from then on when it's born, has access to all the knowledge, every information. And this way, is how it has been for many creations, and many times across the U. If one race reaches the point of maturity, the knowledge has become available to all that creatures of that point and time. It's very like now, computer, everyone according to their understanding can use it, where 20 - 30 years ago was something in the realm of fancy. Now we live through it and because of it. And it will be the same, we'll live through the soul and use the physical body of the man, or the physicality to manifest where we are, how we would like to be.

Many of you, in coming time, **when access the soul of the knowledge of the creation, and you can determine your own features**, and manifestation, you might want to change, but you find out you go back to the origin, because this is the way you became, this is the way you become from totality to part of the totality. In a way, if you were black skinned and brown eyes, and you always wanted to blond skinned and blue eyes, (:22). that will be given to you through the knowledge of your own soul, but would you like to be the only blond and blue eyed in the family of black in the center of Africa, where you think you have a privilege, but you find out you loose the love of the others. And you return back to, but you know you have the capability. **Having the capability and understanding does not mean mankind in the level of his soul will use it, but what you'll do with it, create and enlighten himself, he can use it to elevate the others**.

The Knowledge Has to be Taught Freely - I am connected to every soul

The knowledge has to be the way I taught for years, free, as I know when I give the knowledge it's accessible by all the creatures of the U. This is why in my teachings, I always refer, I don't only teach for the man but I teach for the U. Maybe for the first time you understand why, **as a soul I am connected to every created soul in the U, and my knowledge becomes their knowledge. And you hear in the voice of the man, they feel**

in the M field energy of the thoughts. Then mankind become wise to one point, why do we choose to manifest ourselves in the dimension of physicality the way we are. As I said many times, places like Earth are nursery's of the creation of the seeds of the galaxies and the stars. Now you understand why. This is the point when you reach, in that point of the strength of the soul, then the position by the soul has agreed on which table you sit at, in which part of the world you'll be, that you'll be the most effective and beneficial to totality of the creation in the Unicose. (:24). Up to now you become a doctor to be useful in the hospital on this planet. Now in the dimension of the soul, you become the soul in the position that allows the other souls to prevail and to be given to and to be enlightened, and to be in position, then you become the most effective in the condition of the creation for rest of the souls. It's not sacrificing, it's finding the position to be able to be part of the elevation of the others. Detachment. Detachment from the knowledge, detachment from financial things, detachment from physicality, physicality in the finance and everything else which man has got himself attached to, is the doing of the man from this planet, does not exist outside. Is not part of the creation. Is what we call, local ritual. In a way, mankind has decided to play with papers, and we do this and that, and we give ourselves a title. You remember when you were children and you played games and somebody was mom, and somebody was dad, the driver and something else. This is what mankind has been doing for past years with himself. And now we have opened the door of the KU. This way, no man can be fooled, and no man can claim anything, more than to be a KS of the U. To seek knowledge, that with that knowledge he leads to the elevation of the soul of the others by loving, by giving freely in that dimension. (:26). Now you understand why we call ourselves Messengers and not prophets, we just teach you the message, and just bring you the knowledge, that with it you find a way not to elevate your own soul, but to elevate the other souls, that through it, through the correct conduct, your soul might be enlightened, that you find a position at the table of equality and peace in the Universal Community. Then you find out in this process there shall be no kings and there shall be no presidents, and no bosses, because you give according to your own strength to the best of ability of what you carry in essence of the field of U, to the others, not just one, that totality finds elevation to the dimension of understanding the process of the creation and the path to the Creator, which at end need to be part of, as I am to be of. In this process, mankind need to reach to that point, and this is the purpose of the teachings in the coming time. The emotion of the knowledge. the knowledge of the creation, the KU. Unfortunately, in the U, as we don't have no courts, no prisons, no judges, no teachers, and no school. This is why the process has been set this way, that by learning through the work of the U, by sharing through the soul, man constantly and everlastingly is ?? information he needs he can have access to. You learn mathematics, 1 + 1, (:28). in the first years of the school, but at the end of your PhD or whatever, you still use it, because it is in somewhere you have to know how many grams of whatever you add to another, what gives you in weight. So does with the STM, the elevation of the STM, that now the mankind carries the basic knowledge and how he wants to have access to it, is how he devotes his soul to be part of, for other souls to elevate themselves. to find more that through their strength, he becomes stronger, and with it he can serve more. Detachment from physicality, detachment from bondage of what could be, that he trapped the STM. Maybe, maybe the KS will start understanding more as they understand about the knowledge of the creation. Not through a teacher, but through their own soul, through the

creation of their own understanding that they always had it, but they didn't know it, and now it is time to do. The problem with mankind is, in a way, the fear to open that door in a bigger dimension. Fear of unknown, what we call the Day of Judgment, because it is us who has to judge, am I ready to go. Do I know enough within the structure of my soul that I can go through the transition, and at the same time I can have access to where I come from. The KU would allow you to do this, that the fear of the man goes away that I have to die to go. (:30). But what is going to happen to the mankind is very simple. I have access to Universal Knowledge, and I have access to the knowledge of physicality of this planet, this Earth. How can I use this knowledge from the beauties and attributes of what is with me in the physical dimension of here to add to the Soul of the Universe, to add to the KU, and this is what the mankind has to learn. You are not born to eat and to do whatever, and just at one point to die. Without you knowing and in the process of your learning in the dimension of physicality and what your brain filters that it doesn't become ?? plucked up in the soul, you add to the KU. How mankind learned to make computers has been added to the KU, without mankind knowing. How you have come to understand, how to make the most beautiful structures, is become part of the KU. So in fact, mankind has never been alone. You were not aware that what we say in English, "you have a spy in the cap." What does this mean, it means that whatever the mankind, the peasant to a president, learn in the dimension of the soul is added to the soul, to the information, the knowledge of the U instantaneously, there is no waiting time, there no time that later on I will upload the information when it comes. .. how mankind in every lever, has been always part of the knowledge of the U, and part of the knowledge of the Unicose, but now you are told. (:32). You learn how to cook, you learn how to do things in the pan you mix, you give things with the pleasure, creates you, that pleasure and that knowledge becomes the KU. If I want to I can tap into it, I can, from now on mankind will find out that there is no need for what you call, computers hardware and software, because everything is in one. In the coming days and weeks as we said, in the research centers, we start showing you these, that you can see, that you can go through the transition to see as you call, the other side. In a way for man to be able to see the soul, .. be able to appreciate and confirm his own existence, and in that process man will always be given a chance by his own physical soul to choose the time, the place, and if he wants to change the dimension of physicality's. In times, many of you have heard about people who live hundreds of years, they are nomads of this planet, because they have found access to this, they don't need to, they know by traveling the span of this planet they can add more to the knowledge of the U, and they choose so. The knowledge they carry and gather becomes part of, not only the STM on this planet, but part of the information and knowledge of the Unicose. Then you understand, there is no time in the life of the man. Physical dimensions in ?? access to the soul can be changed, but do you want to change, do you want to the wisdom, or do you see in that process, (:34). what you will do, add to the knowledge of totality, that, you'd take that path. Then does age have any meaning, or the love giving, because the main purpose of the life in any dimension in the U. then you understand when it says, I made man in the image of myself. I am the lover and the giver, and so is the man, and the STM. We just don't take part, we take the totality from all. In so many ways, mankind has entered a new dimension, in a dimension of recognition of two cycles of life simultaneously running together as part of his own creation. It goes back to my teaching from day 1, I always said the physical body is a leech on the STM,

now maybe you understand why. You have seen little animals coming from own point and taking shelter in the leftovers physicality of another animal, and they walk around as (if) they are the other animal. Doesn't man do that, takes a bear, takes a cow, takes the skin and he puts it on himself, inside the man, outside a cow, but does that clothing of the bear or the cow, makes the man to live and think what the skin he is wearing, (:36). or is it just a cover to protect him from the matters of the environment. Now mankind reaches that point, to let this skin, what we call the physicality to be taken off, but knowing it's there, he can put it back on to manifest itself. In so many ways, you become visible by the dimension of accepting the skin, that becomes the face and the body of the man. And other times you want to be the part of the U, you don't want to be shown and be part of the physicality of what you showed today, here you want to be any planet, or any position in the U, now you have to understand how to tap to that knowledge. And then if you understood it, then you understand the emotion of the Presence and the Place, the emotion of knowing how to manifest yourself in what position, understanding the position of the universal energies which is within the STM and is the outright right of every soul given at birth. Up to now every creature of the creation, except the Creator has to choose one, had to be part of one, to be in the dimension of the soul, or in dimension of the physicality, entrapped by the soul. From now on we have elevated the soul of the Totality of the U, to have access to have both, that there is no conflict, and there is no position for misconduct. Then with what we call, as you go for driving with the new car, you are taught how to drive. (:38). The EU and the systems like this which will come out of the KF will give you more insight, shows you, trains you, how to go through the transition, how to be able to trust that you can live in both dimensions. Many of you when you enter the EU you will see both. And then you choose. In so many ways, the new EU is where you are given the access to the knowledge of the U, even though you look at what it does with your physical dimension. It's you, by going in will understand, do I want to be, in what position, and in what essence fo physicality. Many of you once you go into the EU will come out totally different person, in behavior, in understanding of the knowledge, and access to the totality, because then you find out you have exchanged the STP for the Soul of U, for the STP becomes the jewel in showing itself. How can you show something when there is no dimension of physicality, in essence of the feeling of it, then you'll show yourself as a jewel in the crown of the knowledge, does not matter what that knowledge is, no knowledge in the KU is insignificant. Everything is respected, everything is valued, and every man, every creation, every ?? creator, every soul is equal. In the coming time, as the evolution of the T for man to be able to go through this transition is getting completed. (:40). In the time to come we'll show you the path. The way that you decide, what level mankind as a person, as a man, as a living thing decides the future of itself, not in the society of the man, but in the society of the Unicose. And this is the whole purpose of all these teachings, to show the man to a way, the correct way, to find his path to salvation of his soul, to be servant of Totality. Nothing more and nothing less.

We teach free, because we are not afraid of our knowledge to be stolen. We give it to the totality, that by understanding it, they serve the others. Those who thing they can steal or they have stolen, they'll find out that is exactly what they lost. As I always said, do you take money or anything from anyone at the value of let's say 1 Euro, where you know

you'll have to pay 3 Euro for your misconduct. A fool does that. You cannot lie, and you cannot hide, and as I said, you ask and you are given, because in that process every arrangement has been made for the soul to receive what has been asked for, if it is there to be given, and accepted to be given. Does not matter what you do, as once it is accepted the path is set to reach that point. As you see you charge a magnet and you put it in the middle of other magnets, depending on its charge, it chooses its position, (:42). amongst the other magnets. And this is what it is, you give it a charge, you accept, now every other soul has to move to accept that position. And this is what the mankind will come to understand in a short while, that mankind is too physical and needs to be shown a path to be part of the totality, to be in essence the point of the creation, and freedom of his soul.

The only people who will object to this are those who call themselves, simply, men of religion, because they know the time and the term is over. They have done the job, they have brought the man to the point of maturity, and from now on, it's for mankind to become mature to the truth. In so many ways, mankind need to understand the position he is taking in respect to his soul and to his physicality, the maturity of time, the essences, of the totality, .. of being wise to use and to be part of the wisdom of the man, and then to be part of the wisdom of the U. Mankind is not alone, never been. (:44). It's time to mature, it's time to understand totality. In so many ways, it's time for mankind to choose. Does he want to be at home on Earth, or would he like to be part time, part of the U Community and travel the spans of the U, to see, and the way you charge your soul is where your would will find position to be part of. You cannot parachute in, you elevate your soul that in that process of finding a new position takes you to what you want to see. Then you understand the emotion of Presence, and the emotion of knowledge. The emotion of what we call, traveling in through the span of the U, through the emotion of the knowledge, and emotion of Presence. And in that process with the knowledge you have you can manifest yourself anywhere, in any point. Do you need to work, to live, to survive in that dimension, again depends if you want to be part of that society, the way they live, or you become passengers of the U, traveling the span of U with no need to work, no need to something in time which is not pleasant to the physicality. (:46). This is why in the coming time you'll find on this planet massive unemployment, because people do not want to do anything , because they have access to everything in the U, and they want to be travelers of this planet to enjoy to become the tourists through their souls, not through airlines. Maybe the new Corona, with what has come out, is the best thing for mankind. Airlines grounded, but the man still wants to be across with the lover, with the child, across the world. With the mother or the father, and that transition can be done. But that point of transition has to be accepted for the other side for it to reach it, and at the same time, it cannot be blocked, it cannot be avoided, it cannot be resisted, as the claim of totality counts. Those who do will be punished with the de-activation of their own soul. They will not be elevated, and they will stay at the same point. Everything has to be covered in according to the essence of the correct conduct. To give, to take, to find a perfect position for everyone at the same time. In so many ways, the knowledge, the emotion of the knowledge and the Presence, becomes a gift to mankind for it travel the span of the U. Maybe now you understand, this is the 3rd emotion in the past weeks we have opened to mankind, and there is nothing more than the emotion of knowledge. It means you have to tap into it, it means you have to be able to reach it through its own

understanding, and through understanding of the STP. (:48). As you come to a new dimension you have to accept, if you want, even in the dimension of the soul, what we call the emotion of Presence, the emotion of the Knowledge, at the same time, that with the knowledge my presence is not harm to others, and is the cause of elevation of the others.

Maybe mankind is ready to move, my think, another 12 months, 18 months on the man's time, will bring man to maturity. We have ended the kingship, and very soon, sooner than you think mankind will finish with leadership, as the failure in one leader, opens the eye of the totality, that there is no need for people to lead, and take mankind to the verge of destruction. Then our mission starts to accomplish itself, to give the man the freedom of knowledge, that the man moves from the dimension of physicality, to the dimension of the existence of the U. Everything has to come exactly to the same point, and all has been preset. No one can change the destiny of mankind that you, as you remember, I always said, if we force you, you go back to it, but if you choose you stick to it. We are just about to see one of the 5 known ?? of this game where the man will distance himself from any leadership. (:50). The scene is set, and in time, as was done with the kings, will be done with the leaders, and man will all be equal in dimension of understanding the KU and superiority and priority of one soul to another, will be as if you want to have, to gain more knowledge, to know more, and by being near you, I take from you as a weaker soul to elevate myself to understand more in a much faster way. Transfer of knowledge through understanding of the fields of the U, understanding the process of the transformation and transition of the souls, and the plasma, where the stronger always gives to the weaker. the one of the more knowledge on acceptance and positioning your soul, will receive more, then we seek for those who are light in the deeper dimension than ours, and we recognize them, as to be the higher knowledge in reaching the inner soul of the creation, and we want to be part of, this is why in most of the teachings I always say, the members of the UC will be known by their light and not by their physicality. Now you understand why and how we have taken shape into this, and we taught you step by step. As I sad many times, walking on the street, you might see the body of a man, but on soul you understand it is a member of the UC as it is enlightened and it is their to give unconditionally to serve mankind. Now you understand, as they are more enlightened, (:52). You want to be there to receive from them, they become the point of transition as they themselves being of a lower to the higher, receive more to be able to give. The positions of UC appointed on this planet, chosen by the STM himself, is one of the ultimate goals, and points of entry of mankind to U Community. Because we feel our emotion and we speak our emotion through the languages of the man, so we have chosen the UC by languages not by race and color. Now you understand how correct the whole structure of the KF from its base to the top has been set a long time ago, but you have been guided step by step to go through it, for you to understand, and for the future to understand the totality. In so many ways, UC members have access, they have opened the souls to the dimension of the universal knowledge through their soul. And those who abused have left. Abusing the soul of the others as members of the UC, is the only time you loose your position through your own soul, and through your own misconduct. Members of UC have to understand they have access to something that the other members of the humanity strive to get to, and they are the point of transition and

connection, and no more. And when you become too arrogant you loose the connection. In a way, the line is lost. (:54). When you see a member of the UC steps down and is not there to serve, it means they have reached that point for their souls not to receive. They might come back, but then they might be wiser to be, but it has to understood, UC members are the step stones between the STM and the soul of Universe, and the university of what I call knowledge of the creation. If mankind, or any soul does not manage to get access to understand the work of the Universal Knowledge, mankind will stay in what we call the village their own existence. Does not matter if it is the Earth or any other position in the U.

Any questions.

Q: .. last week we had interview in ?? magazine … (:56). they want to give some interview or some text so that we can put in that show.
K- If it needs to be speak to the KF , they decide. Write to the KF ..
I have stepped down in the running of the KF, so these things have to be considered by the management of the KF.
I have gone back to research ..

(:58). Q: from the prophet, .. I am the city of knowledge, and ?? Ali is the key.
K- This refers to Mohammad, .. and Ali is his cousin, who became the head of the sect of the Shia Moslem …
Q: How can we interpret this in what you said about the knowledge being in the RNA. How can a good Moslem use this knowledge?
K- A good man has no religion, no faith. It does not matter if you are a good Moslem or a good Christian … In so many ways, in accepting the position and condition by the color of the name, and skin we have already limited our own acceptance of the totality. How can you be good Christians, Buddhists when you actually only have to be a good soul. Do we like the color of blue, red, yellow or whatever which color is the best, depends on what and how we look at it, and what is our preferences, (1:00). This is how, by giving names, they have separated the STM from the others. Give it the name of the color of religion. But in fact, it has to be all, not just for Moslems, the question covers, how can, to be a good soul, not a good Moslem or a good Christian. These divisions have to be buried by man, before man will be able, to enter the dimension of U Community, where you have a division in understanding the color of your soul, how can you be part of totality, which has no color and is total. These divisions are made to control the essence of the STM to the ?? path for those who created the division of the soul itself. The prophets came to show the path, they didn't come to divide, and this is what mankind has done, divide himself into color, race, and religion. It's not done by the Creator.
Any other question.

Q: … Mohammad sent for all creation. Allah we want unity.
K- Do we have unity in Islam? (1:02). Does Islam become unified when they understand the truth about the knowledge we have brought for all to be equal and the same. Islamic leaders, Christian leaders or any other path what we cal belief, will succeed in their

mission when they all confess and confirm to the unity of one. The elevation of the STM and no more.

Q: Mehrnez.
A true Moslem is an open Moslem that knows the Koran, which accepts all religions … (1:04). there is no difference between the religions . ..
When they ask you about soul. you answer them the knowledge of soul is with God. .. so prophet didn't answer he had the knowledge of soul. ..
The problem is Moslems don't understand the real message of Koran, the spirit of Koran and they go more to their culture .. (1:06).

K- What do you call the religion? What is religion to you?
Q: Religion is something relating. I look for, I know I am not just this body .. using better my life, not to waste my life … I have tried other religions, Buddhism.
(1: 08). search for .. something to relate to. something doesn't give the answer, we look for something else ..
that's my point of view, (1:10). and everybody has their own point of view ..
K- What is interesting is how we value ourselves on the name of the religion, and how we and position ourselves, and how we are tolerant if each other if we realize we have the same goal, irrespective of religion. In the last Farsi teaching we tested this amongst the KS .. was the UC of Hebrew language, and none of the Iranian panel objected to it, and it was written clearly, UC Hebrew. As were
religion didn't matter, how we shared the knowledge mattered ..
(1:12). This is the point where we

On Friday, you have a program in Brazil, the KF Brazil is inviting the KS to bring men of different faith to discuss, for them to be elevated to understand the created and the Creator, and I am wondering how this thing will go, in subsequent meetings with religious leaders on the platform of the K KS (1:14). if we have valued knowledge more than religion, then religion does not exist. In a way they have brought us to understand and to see. I sat there in one of the most prolonged teaching, … explain the beauty the way he has worked, teaching the T, all the benefits of it and what he has done. A live history of servitude to humanity through the KF, and we all sat and watched. .. I was waiting for objection from Tehran ..

It was there to show equality in sharing knowledge.

(1:16). This shows the courage of UC Hebrew language and the Farsi, how they came to be independent of the race religion and color. In so many ways, many KS ..

(1:18). It was a joy to see and I waited for one complaint, for someone to say, why is the Hebrew language spoken here, or to be too shy to ask the question. But in this time of troubles which created by the religious leaders for the benefit of their own, we have shown the knowledge of the Creator is bigger then the fractions of what he has taught, and those who have listened to it, they thought they had become the Creator, and the world of the Creator to be spoken of.

I said, the Creator is amongst you and you will teach in peace, and that is exactly what happened. It was a beautiful teaching, but at the same time to understand that all are the same. Those who didn't come into the Farsi teaching, they lost heavily, because they didn't get the essence of the unity of the STM. We are all the same, we love the same, we bleed the same, and we enjoy the same, and this is what the mankind has to understand. The Messengers of the mankind came to bring mankind to this point, this conjunction, and now is there a need for religion, or man has become wise enough to understand, he understands the path of the Creator without any intermediaries. (1:20). Maybe mankind has matured, or maybe mankind is on the path of maturity. For me last Monday was a joyful time to see the fruit of all the work, and suffering over thousands of years brought another stepping stone towards the peace, towards the peace of the STM, not the physicality. No one left the meeting, they added to it, and this shall be the pattern of the KF. We have opened the teachings right across the nations irrespective of religion, race, color, and last Monday was the first, what I call the bouquet of flower of peace from what I call, Hebrew language, from Tell Aviv to the Iranian nation. Those who take the first steps are the true leaders , the rest will follow. And we have seen the Hebrew and Farsi Language and the Iranian community took the first step of peace for humanity. (1:22). Soon you will understand the totality and gravity of understanding the unity of mankind in the level of the soul and not in the level of physicality.
Any other question.

Q: … the STM can be seen through brain scans. .. I am wondering about the STP in the solar plexus.
K- Yes, it has been seen many times but the doctors don't understand it. It's such an anomaly in the structure that it is just been ignored. (1:24). We don't understand it, so we ignore it.
Q: Would you mind showing us how that is seen?
K- In time, yes. As many of you may or may not know, when I was born from the moment I opened my eyes, with X-ray films, MRI's and the rest of it, this is how I was introduced to the science of the fields of the radiation. Maybe my soul was chosen to born in that family that I could understand beginning at the start of the essence of creation. When I was very young, maybe 7 or 8, I could read an X-ray, in a different way. My father a few times, brought me in to read an x-ray, he said, you read it, you look at different things. I used to say, you see Papa, this here is not correct, and he said to me, how do you see it. And I said to him, this is not correct. I remember being very cheeky, curious man, very big curiosity, x-ray films to me was, golden message. My father used to come home sometimes with odd pictures, and I knew these pictures must be somebody important. He used to go and take X-rays of it, he was involved in it. And there was a film in an envelop next to the safe, in the cardboard, hidden, I pulled it out. My father came. (1:26). He said, what are you doing. I said, he has got cancer and he is dying, and he cannot do, because the fields are too big. He said, how do you see this? I said, this is me, I can see it. And I was looking at it back to front. He said, why are looking at it back to front, you always look at the x-rays back to front. I said, because the knowledge sits, when the film has crossed, not when it's comes in. The emotion of the soul goes through the film, you always look at the back of it, when everything has arrived, not in front of it,

when it is imprinted. And in these processes I got to know a lot. In detail, in intricacies of the physical structure of the man. In so many ways, that's why I can pinpoint, this is this, this is that, I don't agree with a lot of people, of doctors read the X-rays, because it's in the book. We are not all the same, and not every structure is written in the book. When you look in an X-ray, especially the CT scans and others, and a full body image, you can pinpoint, you see the direction the fields flow. You see one of the first things you learn in the world of understanding the position of the soul, when you see a man with the prostate cancer, and you understand it when it's through emotion, or wanting to cut his leg off and his heart off, because what has been done to him, is not what has been created with his son, you see 3 things. A grey black spot on the ankle, you see on the X-rays grey spots near the heart's ribs. (1:28). What does it means, what does it have to do with a prostate cancer where you see a cancer in the body. Very simple, I have created this child and I want to cut my legs, that I will not do it again, I created this child, I want to take the heart away, that I gave my heart to him, and he destroyed everything, which I put into it. Then you see the body has a simple language. Then you have to go and serve the soul and the STP, which is on the heart for the man to find his position and peace. This is why the new EU do that, it gives for the soul to be enlightened what he has chosen. Why and what has taken the path to bring him here. When the doctors look he says, it has moved to the other places. When I look at the X-ray I see why it has moved to the other places. What is the emotional reason that the guy wants to take his own heart and cut his own legs off. Then you understand, X-rays and other things has to be read through the picture of the soul, and the understanding of the emotion, not with the black and white. Then you'll find very easily the position of the STP and the position of the STM. You don't need to be a genius if you understand this at age of 7 or 8.

Q: the vaccines especially the Chips that come with them, last week you talked about using .. patches .. (1:30). a ratio of 2:1 ..
What is the ratio of the one on the top?
K- There are 2 different things, I think you are mixing it. One we confirmed the position of where you can put patch on front and back, or the one which 3 rings with different ratio, there are 2 or 3 different ways of handling this. If you put a patch directly on the point of injection, this is where they give you a physical Chip, or you use the 3 rings system, or the 2 ring system, for if it is chemical injection, that returns to back, to control, through the emotion, you change it, you disable it. If you are given injection, for example, always go and take a fair amount of CO2 and Zn into it. Just normal drinking, 100 - 200 ml a day. That you do not allow the interaction of these systems or chemicals, wherever they are to supersede your emotion. And then with the rings you do. There are different ways. If you receive a physical Chip, or you are given a chemical Chip. There is something which we understand in the background, (1:32). that there is a possibility in the coming future, different companies like let's say, "so and so," they will develop the Chip, but for them to market the Chip, they are forced to add an item into it, which is that chemical Chip, because not only one direction will go, many directions will go, with different manufacturers, but organizations who will implement it, they pay them to add this additional chemical into it. That is the biological Chip. It doesn't matter who produces it, if they want to market it, they have to add this to it, which is a control. And it doesn't matter what, you can go for both.

In a way, you have to be prepared to short-circuit the system by their own way. And you have to understand how you, when they give you the injection, you have to ask for the number. If you want to give me an injection, I want the number, because in that number is your telecommunication code. And is coded. In a way it is your telephone number to your physicality. If you are given any injection with a microchip number on it, I want that data, that's mine, I want to keep it. It's literally .. you remember how the Hitler tattooed the number on the arm of the Jews, in the prisons of the camp. This is that tattoo. But this tattoo has a line of communication, uses the natural frequencies, (1:34). mainly of G5 and G6. One of the reasons G5 was introduced in such a rapid way, was for deployment of the vaccine. G5 is part of the control structure and nothing else. And there is a way around it, you can block it. You can create structure within your body between two different points that continuously creates a barrier, but it has other positions for it too. In so many ways, just move up, 20 km up, no one can reach you. It's the best time to teach the soul teaching. Best time for them to know they have no control.

Q; .. about what you were saying, I think man on this planet is funny creatures, (1:36). because every religion and any prophet came, they fought the prophet at the time the prophet came, and after he was dead and they killed him, they worshiped him. And then .. all the religions talk about the promised man .. someone I looked up to, I said, I think Mr. Keshe is the promised man. And I got this funny look, and I just .. And I was thinking, why is it for people to accept, when .. do you think the one promised is he going to have a tail … why is it so difficult for man to accept it.
.. look at prisoners who have been prisoners for 20 years .. they're scared (1:38).
for most people, especially the religious ones, they are going to fight us,.. it's the end of their rule …
Are you going to wait until K dies and then you are going to worship him. (1:40). .. why can't enjoy a man while he is alive ..
when the children are born, I was born in a very religious family, when I look back my grandmother, not my parents .. my father was .. effected by American culture, he never pressured anything to me. My grandparents were always pushing me to pray, waking me up at 4 or 5 in morning to pray, .. why do I have to pray .. they
(1:40). but what for. Because you want to thank God he created you. I said, I never asked God to create me, take me back. I didn't ask for it. They never had a logical answer for it. Even now they don't have a logical answer for it .. this is a problem.
But even if you read Koran it tells you where you come from .. doesn't make you fanatical . . it all boils down to man is afraid to loose the prison he got comfortable with. That's all. Thank you.

K- .. Can I ask you, how was your feeling in the teaching last week, when you were with the Hebrew of the UC and you had all these Iranians coming up to ask questions, and they can see it, once they become the panelists, . …
Q: I was completely comfortable. (1:42). I was watching for reaction .. There was no objection. I was happy.
I was surprised that nobody had any objections.

K- Like me, We have been brainwashed so much to hate each other that we couldn't see the beauty of how knowledge can bring when you shared it.
Q: Nobody cared who was there. ..
..
(1:44). ..

K- The question is would our religious and political leaders come to that point? It's exactly what we see in the culture of the humanity. We follow to be part of, we don't follow because of, and this is where the problem is. We follow blindly to be part of , but at the same time we would like to be an important person in that equation. This is part of what the human race is made of. We are an animal pack, to be part of the pack we wear any clothes… (1:46).
Q: .. another thing is ..
it's scary for people to face themselves ..
(1:48).

Belief in a religion has a Field Strength

K- **I am going to tell you something very strange, .. even belief in a religion, accepting a religion, has a field strength, has an emotional strength, then would we with the knowledge we carry in the EU, be able to raise the level of the STM in the emotion of religion to all be equal**? Then we get rid of all these prejudices, would they all walk out of the systems as believer in the Creator, and the path of no religion, but totality of religions. When I explained how fundamental enhancement T is, now you understand. I can even reach the soul, the strength of your fields of your emotion of religion. Path of belief, path of life. Then maybe .. how fundamental the new systems are. They are groundbreaking T, and we are reaching to the point of being able as we make you happy, (1:50). we can elevate for you to understand the strength of your emotion at the level of belief. The reality and the truth is simple. In finding out you go in as a Christian , you become a believer of every other path to be equal. Wouldn't that put a fright among the religious leaders as everyone is equal. And then the Churches and Mosques have to open up just to teach the path of the Creator. No rules, and no Crosses over the buildings, the true house of God. …

(1:52).
(1:54).

Any other question. (1:56).

Q: .. (1:58).
K- The beauty with this cycle of understanding is that we not only understand the strength of the fields and what it is made of but as man is physical we have developed T that the man can follow and see, and believe in and understand. This is the beauty of this process. We don't ask you to follow it blindly, we ask you to be part of it because it is part of you. And this is the beauty with the new cycle, you are part of it.

(2:00). .. we become a believer in ourselves.

(2:02).

R … (2:04). **Break** .. (2;11) .

(2:12).
Q: Salamea .. we need a science model based on knowledge, How would it look like and if we can produce in this society model, the art to work with the soul, (2:14). STP and STM. What will be the role of the KF in putting together the art and the knowledge and the spirituality besides religion and politics. This school of mysteries which we had before religions.
K- The truth or part of the reality will dawn on mankind that through the knowledge whatever you might call it, will be answered. In a way, we don't find an answer for religion, but becoming knowledgeable we find religion becoming part of, what we have been looking for , or part of what we have been told in different names, shapes or forms. .. religion is a science itself in the conduct of the man, and nothing else.
Q: Okay, but we know the religious leaders divided the mankind like the political leaders did, and does, how we can change this situation with help of KF? (2:16).
K- **We are not answer to all. We are a path to understanding knowledge, it's the mankind who has to decide**, to what it fits, the way it fits him to suit him to make his life better in all dimensions. If we make the work and knowledge we dispense to be the answer to everything, we claim it, then we have put a limitation on the strength of the growth of the STM and the U. We teach, for man to evaluate his own soul and the others. When the man goes for the knowledge of the KF to elevate his own soul, that man has already lost the knowledge. When we gain the knowledge is to share to elevate the others, and when we learn this, it doesn't matter in what field of the science, .. then we have become the true KS. So when you asked what is the role of the KF .. for man to understand the true knowledge and with it become servant to his own Creator. We are not making a bunch of religious people, we are making a bunch of souls that understand the path to elevation to itself, which is by servitude, and then do you need politics or do you need religion, No. because you live the true path of religion, the true path of a correct conduct of the soul. That is if you want to call it, the function of the KF, (2:18). for man to understand the true knowledge become a true KS. then you have no one to confirm to be a prophet or priest or politician.
Q: Your idea is very similar to Bahaula, other Messengers from Iran. And I know that many Bahai's are persecuted in Iran, and maybe KS could also be persecuted by religious leaders or political leaders in the future because of our belief in truth and unity in mankind, because they want power only by dividing us …
Maybe we can have spiritual schools working ..
K- **Once we go back to spiritual schools we create another religion. We create another division**. If man understands the knowledge he will have the path to what he wants to know at a time when he needs the knowledge. (2:20). Knowing where to go, what to do, and what are the consequences of the knowledge he gains. It's a simplicity in understanding the totality, and not being prejudice about it. This is the biggest conflict for mankind. We see it now in the position of the world leader. Have we seen it before, if I

am not elected I start everything else to be wrong because people don't like me and I can't be rejected. …

Both don't have a clean sheet no matter what they claim.

(2:22).

(2:24). We are sitting on the verge of a time bomb in different directions, and maybe this is one of the signs of the maturity of man, for him to make a decisions. Do we call and work on the call of the religious leaders to start wars and separations, or do we go with the instruction of the world leaders to star wars and everything else. Or do we say enough is enough, we had both, now we make science and T, and knowledge the leaders of mankind?
Any other question.

K- Next Monday Farsi .. Chinese speaker .. everyone welcome .. (2:26). In so many ways, we should be able to see something beautiful how the Chinese share knowledge ..

Q: .. (2:28).
K- What were you doing there the other day?
Q: Taking pictures .
K- We could see your pictures through security cameras. it was interesting..
You had some other people with you ..

Q: religion ,, what field strength unifies and carries forth for mankind.

Soul remembers all of its Experiences - K remembers time in desert

When the bird is freed from the cage, what field strength can man take with him? as an emotion.
K- **All of it, is the fingerprint of your existence. When we appear in a dimension and time we remember all of it.** … (2:30). I remember, I was explaining**, I spent many years in the desert under one palm tree and a water well. I spent a long, long, tens of years there in solitude, not to move until the time was right. It's the essence of, and the reasons for that is that time there was a lot of concentration and elevation to understand how to teach the man. This stay in the desert was one of the most joyful times**. As I said we carry all of it, it depends on what we choose to remember, and what we choose to be part of, and what we choose to lead to be creation of. I can explain very clearly to details, and tell people where to find to confirm my correctness. Be it under a stone, or be in the depth of the rivers, find where I left things, at the time when I was there, in thousands of years, spent time here. You do not know, if you did not do. It's.. what we do stays with us, and what we carry is the memory of existence of time. And as I said many times, I was witness, I felt every stroke of the hammer on the nail, (2:32). and I felt the bullet through the body. It is the time for mankind to understand that nothing will be lost, it's a recording like the camera, when you were in the center, that it records

everything that you are not aware of, but it is recorded on the disk of the memory of the STM, as the physicality is dispensable.
Q: ..
K- In a way yes, .. as Alex was teaching the books, we never hid anything, we were so straight forward, right under your nose that you decided to deny. You decided not to be part of. When you look at the first book, what did we say, U Council …

I never hid that what I cam here to do, (2:34). to take man to U Community, in the first book, tells you on the top, the universal order of creation, how everything is created in U, not the creation of matter, or the matter state of the man. I wrote the position of the prophet of the past and the scientist is the same. But **we are not prophets, we are Messengers, and our message was very clear from day 1**, the universal order, we never hide, you were blind to it, .. we did what we said from the beginning. You could not understand, and no message has changed it is all the same. I didn't put the creation of matter, the universal, this is how the U works, in order of matter state or energy, because the book 2 is based on book 1, so it is still universal order of creation of life, light, the Creator, the totality. And then you have the origin of the U which is based on the first 2 books which again is the universal order.
Q: thank you .. we all feel that message as humanity .. (2:36).

K- The message is very loud an clear the time for man to be in the village of earth is over, but to go out, there are rules and regulations you have to learn. **First of all to find your soul, that is your tour guide. That's the one who carries the knowledge**, If you understand that, and understand belief in understanding the totality, then what are you worried about. You don't need a prophet you carry it within you. It's your soul, you have to find the strength of it that it can listen to ?? words and its message.
Q: the soul leads us around by the nose …

(2:38).

You Have to Value Your own Soul and Want to Elevate

K- The truth is what do we value ourselves at, and then trying to achieve that value, it doesn't matter at what level of creation. And what we value ourselves is what we get to, and what we strive to understand. And this is one of the ways that we always live, what do we value and what we do to get to that value, we believe we are worth, we are, we need to. In the physical world we value ourselves as a doctor, so much thousands a month, but in the soul level we don't , because we don't understand it, it is left to somebody else to tell us, what it is. **We have never valued our soul. How much and to what level I want to understand, that through that creation of the path I reach there, that's all it is, this is how you elevate**, how you access further knowledge, but it has to be through pure sincerity and understanding.
Q: .. In all the religions there are pure intentions within the religion .. then it gets muddled (2:40). .. .. surely it's time for the religions to understand to release our soul

K- It depends what we want to know, and what we do with it, to what extent. If we see it as our right to damage with what we received, you will get damaged by it. The damage in the soul is not getting elevated, and you see everything to go backwards with it in the physical life. And this is part of what many people don't understand.
Q; Why would people abuse this knowledge, knowing that at some point you have to balance the books. ..
K- I am going to come right in before you go to far. Because there is enigma put into it, Day of Judgment. (2:42). I can delay until that time. I go to the last day of paying the bill before they disconnect me. Do you understand? That is where the man has fallen in this trap, with the name, title of Day of Judgment. If the prophets would have explained that everyday is a judgment day it would have been a different world. and this is what we tell you, everyday, every conduct has got to be answered, not to anybody else but yourself. This is what a lot of people don't understand. You take a love from man of everything, you are and you sit with it. It's the acceptance of asking and being given, you loose your title, you loose your right to understand the to totality. And this is part of the structure of creation. … grandfather clock .. tik toks.
It's every second is one second to go further. This is part of what we call, the understanding of totality. (2:44). We are not a religious organization, but understanding the science brings us to question, what the religions .. this is what the dilemma is with the religious groups, now we become the priests, we become the rabbis, we become those who have the knowledge, but in a scientific way, and this is what they don't like. the Iranian religious organizations have a big problem with me, the same with the rabbis, and the Pope. But in essence they know it's true, and they do not dare to do, because they are not there to decide, they are there to confirm. And they know they don't confirm, they cannot delay to the grandchild, or to the others. They have to handle and pay for it by themselves. We see huge movement in the religious and diplomatic world about my movement, about what I do. Governments now they are deciding in how and who, and where and when I can talk. The world leaders are deciding and their governments on how me as an individual should do, be, or say. (2:46). And now we get it in writing, it's not talk anymore.
Q: …
K- .. The reality is I came to serve, but I had to go through the process of understanding man's life, that I could see how humanity lives, and what humanity does. It's the same with understanding the world of politics and religions, I can dismantle them from inside, by themselves, not form outside by us. And this is one of the beauties of the new process and understanding, I don't need to do much, I just need to teach much.
Q: .. (2:48).

K- The thing is we never made hierarchy or priests. We always stayed KS, and that has been the key, that even when I teach, and if you have been to some of the teachings I go. they say, Mr. Keshe is here. I say, I am here as a KS. When we divide ourselves, and we put ourselves on a pedestal is the time when it is finished. .. I have moved from running the day to day basis of the KF, to a KS back in research. I enjoy my time in research lab. I go for a few hours and share knowledge and see the results in next days … sharing a knowledge is a privilege, keeping a knowledge is an end. And it is no use keeping a

knowledge, once you share it, it expands, it shows its beauty, attributes, it shows its grandeur. .. (2:50). and you can teach as long as you are there to teach.
Q:

K- The mankind doesn't have a table yet, that's the problem, to put it on. This is the biggest problem we have. It is part of the structure, You see, we see it in teachings over years. A lot of people come around the F they take from it what they want, and if they don't get it then there is everything wrong with it, and they start everything to show what is wrong with it. But in reality the bring the beauties of it on the table. We have seen a number of attacks on KF, massive attacks in huge scale, at least ?? in another scale, but what has come, is people have come to judge, "I am here for the knowledge and not the personality," and people who bring it to that position have nothing to do with the knowledge and knowledge seeking. people became very wise. I thing the last big test for the KF was more less been in the last few months. Many KS, (2:52). had to judge, are they here for the knowledge, or are they here for personality. And the one who shares the knowledge is always in command. And the ones who try to disturb and abuse, just the position, they can't much, except rhetoric, you will see they are further away. And this is how it is going to be, as I said many times, we'll even erase their names from the books. Because it's so chosen by the soul, that it cannot be that the next generation get that what we call, poison from the name itself, in the upcoming books you'll see some names will be erased from the book, because they have shown the misconduct and the poison they have created, within the structure of the STM. When you put the name of Mozhan, it means the essence of love and giving, and creature who has the love to share unconditionally. Because it has the essence of the love and the care. and when you see the book #4, the number of names which put in, which brings the essence of the joy and the care, and with it even the name carries the wisdom of the soul. In so many ways, (2:54). A KS has to be open to seek the knowledge, the true knowledge, and share it truly, not just because I learn, and it is mine, it stays with me.
Q: ..
K- I listen to a lot of the teachings after the teachings, to understand a lot of the teaching, and it is amazing how much knowledge is given so freely, so with love and care and a lot of understanding. When the souls understand it, the souls come to appreciate it.
Q: … (2:56).

Don't Create Elite Clique of Knowledge Seekers - Downfall of Knowledge

K- **As long as we don't become a cult, .. a sect, as long as we stay a knowledge based organization, we will win the heart and soul of the man, and the Universe. When we separate ourselves to be unique and elite, that is the time the whole downfall of the knowledge comes,** and this is what I always said, be a KS, but don't become arrogant when by seeking knowledge you understand something new. And this is part of what we see, and part of what we understand. If the people who come to get something from the F and they don't get it, and then they become the enemies of it. Ask yourself one question, by not knowing how you have served, through the what we call, your ego, your arrogance, you served more, because souls bring you to serve, nothing else. Your own soul makes you servant. When you send so many negative emails to so many world

leaders, to so many places to block, even those who haven't heard, now they want to know more. And then they hear about for example, Corona, what do they do? this guy has given the solution, they go for it. In a way, by your arrogance you have opened new doors for us. (2:58). By the damage you tried to do, you damage nothing, you add to, and we seen it. And some people who come and go, by what they do .. they serve. serving doesn't come be making a cup of tea, or giving a conference. If I make you to think, if the work of the KF is correct or not, and then you have to judge it, and then 2 things, you stay, and because of it you judged it, through your own soul, you become stronger , and you become more attached to understanding more of it. Then you have served your purpose. Those who are always weak, they will fall by the side. That has been a pattern of the creation, when we used to have, what I call a chicken farm ..
.. it's learning how to handle it, that the others who think it is a weakness in you , it becomes a strength. This is part of the structure of understanding, .. of the soul. It doesn't matter what they try to do, how they translate the knowledge, knowledge is a truth and you are the witness to it, nobody else. We have gathered a strength in so many nations, through the work of the KS in Iran. (3:00). And you saw how it has built up. In every essence in every nation we have a problem, a Corona …
how many lives you have saved. ..

(3:02).
You go in the confession box to confess what you done wrong, most probably you'll never see the truth of it, that lead you to the cancer and the rest of it. I put you in the box called, EU to elevate your soul that you see how you cannot get to the same point. Was it your problem, or what you created, or was created. And you solve the problem for good. .. yes, we have an EU, it's you and your soul in the box. Now see who has to pay for what, and there are no boxes to put monetary in it, because you are already in it, to accept it for the change. It's beautiful if you se the other side of the coin the way we see it. Why there is so much resistance to a knowledge, have you ever asked yourself. Why is there so much resistance against KF sharing knowledge. Isn't sharing knowledge a pleasure, or are we in fact, using the knowledge to stop the man to reach his soul, because now we have the systems, we have the T, we have a way to show. We have understanding of, (3:04). not only the soul but how to reach it through a T, through understanding of the science of its creation, and this is what they don't like. World leaders can rise against me, have no fear. Because it is very simple, they don't have knowledge and understanding, when you can reach the soul. I was reading a message, .. this gives you an insight into a lot of things if you understand it. .. this is the message from the White House, he writes, .. it says, in .. talks with the WH Chief of Staff, I had a very unpleasant conversation with a lot of yelling, the guy was shouting, the head of Chief of Staff that president Trump does not want to deal with Keshe, his biggest nightmare. (3:06). Why a simple man has to become a man's nightmare, because he shares peace, he shares knowledge. Why we get the same thing from other world leaders, not to move, put you in danger, you're in danger. Who, why, how do you know I am in danger, if you haven't created danger for me. Then we understand, sharing a knowledge at this moment in time, has become a big crime, and there are those who play into the wind of it, because it pays them to be. A lot of people are using the KF and the structure we setup to do clandestine activities and things to benefit them for the future of to serve their masters, but they don't understand,

that these masters sooner or later become slaves to their own conduct. .. I am a friend and I am here to help you, it is you who has to decide.
Q: the open box of the U.
K- You have seen it. (3:08).

Q: Your words touch my soul and everything I believe …
Q: Can you teach us a way to lift the souls of our opponents a portable system that we can easily conceal on us .
K- He wants a magic box .. a soul box ..
Once man understanding the strength of the soul is achieved or completed by the man himself, then you can reach any soul, because you get rid of the … physical frock of the STM, and this is very difficult to understand .. to comprehend beyond this … for people to be part of the change when themselves come to understand. (3:10). That the change is within them, then we move on.

The Change will come from One Soul - to be Born Out of Love Universe

We don't need to learn much, but it is a progress, which will happen in the coming months, and the elevation of the STM will come through, what we call, unified field forces of one soul, and that soul is to be born, out of the love of the totality of the whole U, and not the mankind only. We give life to totality according to our understanding, the time, position, and the destiny, and nothing can change. For a tree to be in a forest in given time and position has taken thousands of years for it, and accommodated by the rest of the trees in the forest. When you look at the structure of the forest it's like the human race, every tree in every position is well accommodated by the others, to be equal and the same height in the forest, so it, will be the destiny of the man, all man will stand tall, because from now on it is the knowledge of the U, and the humbleness to know that you have access to all of it, (3:12). will become the criterion of the living, not by hiding and ducting, and claiming, a seat, temple, or a WH. As I told you before we had a KS from Switzerland who joined us, a first bunch of KS in Trany with us, and he said, I am Swiss. I explained to him the color on your passport, what's on it, is the true color, so red, if you understand it, or what you have done. He understood and he left the teaching.

In so many ways, we bring the message of peace, but for the STM and not for the man, and this is the ethos of the KF. And a lot of people try to touch it to the physicality, but if you look at everything I have taught from the beginning has a soul, and a heartbeat of the soul. Nothing else. It's you who have chosen the wrong way, or it's you who have decided to go the way that you think might be the best for you, but one thing is for sure, we all end up on the same table, of accommodating and accepting equality. And I always stand true to my own way, because I am still a KS, because by seeking knowledge, understand what I have created, does, that I can learn to be part of, not to be arrogant to be, that I know. (3:14).

Ask yourself one single question, with all these fields, which travel across the U, what fields and what position today, this second, has become a seed of a star, or has become a

seed of a planet that will seed into life the way we have on this Earth in this position? Then that needs learning, it means a position has been created which is unknown, and understanding the creation of it, become the knowledge of the Creator. And as we understood today, the knowledge becomes the knowledge of the created, instantaneously.

Then you understand the present computers are finished. As I said, we will show new T that all these will have a meaning, because mankind is so physical he has to have something and then you all start copying, and in that process of trying to copy you'll reach my station, because this time we are not teaching you physicality, .. I teach you the fields. That's what I kept on telling you, don't look at the Gans look at the fields it creates. You didn't listen, now I found a different way to teach. I am a very good teacher and I listen good.

This is part of the structure we set, that with this dispensation the knowledge and science and the faith become one, this is the beauty of it, and through it you learn, (3:16). … and amongst it you flourish. And this is the part of the life we have chosen, not you. I can strive and change everything with 1 stoke, it's within my power, this is something I know well enough. But what does it do, take you to a scene, you become back again, man, because it wasn't done by choice, it was done for you by understanding of nothing, as a free gift, and this is what we are trying to avoid this time.

You gift yourself, not a free gift from us. You gift yourself the knowledge, the understanding, and ask, you are a human, very simple, You make your systems, because you make your systems, you believe in it and you live by it. It's very simple, we see your joys we see your weaknesses, we encourage both of them to become the strength. So simple. I don't teach religion, I show you how to make systems, and all of you know if you have found the right way, to be your own prophet, because now you can produce what you need. And you can test what conditions you can create, be it emotions, be it T, this is the secret, we can create the soul, the structure of the soul, (3;18). and it's done by you, that you are in charge, no one has charge over it, the freedom to travel this planet, the U, and those who are afraid they frighten of you, will make you to fear, that this is wrong with the KF, that's wrong with this , this is what it is, because they know the slavery of the man is over, science and T, by you understanding the science of it, and creating the T for it.

.. the U is a beautiful place. It just needs a desire to be part of it. It's just like a love affair, you desire to live with your loved one, you find a way to get there. And when you find a way to get there you can tell your love, your lover. And this is the same, you find a way, you have to strive a way to reach, to understand your creator through the structure of the STM , which is you who made it, now you have to understand it, and then the past is clear. And in-between, we have shown you ways.
Any other question. (3:20).

(Long confusion with Stephanie (8 minutes)

Q; Stephanie. … … what I found out was this, that in the interview .. KS form all over the world, we came to this beauty .. we all just wanted to share knowledge with one another, we all felt this was the right way .. our own understanding, interpretation ..went on and on. .. (3:22). 5 hours .. we all were so happy .. >> I wanted to listen to Italian teaching … it was the same they stayed 4 hours, it was very beautiful .. all KS were so happy to share knowledge … (3:24). they were going through similar feelings with people from Brazil .. we are all connected … stayed very late .. >> (3:26). by being connected we share this energy between us … we wish same things .. this energy becomes like one big huge energy … just from love and care, very simple.
Q: I am confused now, you said, when you think to dedication to your soul you are lost, and I am confused now, . because yesterday I shared with KS .. because you cannot steal it from yourself, need to learn to love yourself how can you love others. (3:28). I need to learn how to love myself…
But today you said, if you think to dedication to yourself you are lost so now I am confused?
K- If you are there to gain for yourself, what you do, you are lost. So you are back in the materialistic world. Q: can you repeat.
K- I said if you are there to serve that you gain something out of it, you are already lost.
Q: Oh, clear now, understood. So if I thing for myself, my own benefit, then I am lost. If I think elevation of myself, then everyone gets benefited. that is different?
K- It depends how you look at it, because you are still looking at it from your pocket.
Q: .. How do I look at it from my own pocket?
K- Because you said, if I get elevated because I elevate the others. ..
Q: No, no, that's not .. to me it is like I elevate the others, no, no, no… to me it's more like get to know my soul , self .. .. automatically I understand somehow (3:30).
>>> If I am angry because I didn't take time to look after my own self …
K- Yeah but the thing is, it is not stealing from yourself or the others, it's understanding what you do brings elevation to the others. This is the difference,.. then you assess and judge the rest of it.
Q; .. my direct experience is this .. every time I share what I know … someone asks me something I share what I understood … I say come on Stephanie it's not just for you (3:32). … he wants to buy me a cup of tea …
I put on the side my personal needs …
K- I think I am going to stop you there.
Q: But … I feel stronger when I do .. but you want to stop me?
K- No it's just that you keep on going but we don't understand where you are going. But that is usual with you ..

Something which is going on, private teaching .. starting from the basics .. (3:34). .. private teaching on Wednesday . lot of KS learn the basics in the background.

(3:36). Mr. Keshe reads Q: .. "also we taste, and taste of the death." Koran. So we all going to taste and taste this death, even the angles of death, peace be upon him. You came here to teach the knowledge, with respect, Mr. Keshe, are you meant to be buried in Medina?

K- We have never been buried. We live in the dimension of the soul, and physical body is in essence of the man. And in totality, we are travelers of time, and in reality we choose the time, the place and physicality, which we decide to manifest ourselves within. So is it buried in Medina, is it still unknown where it is, or is it buried we don't know where it is? In either state, it is the state of the knowledge of the man, and understanding of the truth. If I am correct, what the gentlemen is referring to or the lady, is, are you the soul of Mohammad, Bless His Name. In physicality the physical body is always left behind. It's the soul of the Creator which moves from dimension to dimension. And in so many times, (3:38). if the Creator has spent so much time on this planet, there has been a reason. Not only for this, but for the totality of the creation. Maybe I have answered you. Souls never die, and in souls we live, we teach, and we manifest.
R: Beautiful answer Mr. Keshe …. perfect, thank you

Q: .. how can we connect with our freedom from physicality, how can we achieve this condition right now?
K- It's all a state of mind, it's all a state of mind, in how we decide to operate within that state of mind. In essence, we live the life through the soul, (3:40). but we can choose to live the life in the dimension of the physicality when we choose. This is the beauty of the new cycle, the beauty of the new essence of living, being part of, and then the choice is yours.

K was Brought up in Bahai family - Bahai Greatest Misconduct

It's very much if you look, the lady in the beginning, and part of the session today, referred to part of our teaching is like the Bahai teaching. **I was brought up in a Bahai family, but I never agreed with the ethos, the way it was changed by those follow**. In a way, as I was in it, created it, how could I understand the misconduct. And **I do not agree with none of what the Bahai faith stands for today**. In what shape or form, as they have broken the agreement with the Creator, to the benefit of them. In the essence this path was to guide man to freedom, (3:42). and **it got abused by those who thought they have reached the pinnacle of doing whatever they were doing. Never served and what is was set, in what I set it up to be. The same greed, the same misconduct, the same arrangement as before. Gather wealth and power and abuse it**, when the man needs to use it. And this is the same. None of the religions have ever stood for what I set them up for. And the Bahai's are worse then the others in a shorter time. In a shorter time. My agreement was peace and for all, not greed to gather and stash away like the others. Building buildings, for temples, from the sweat of the others was the job of the past, it was not the way we set it to be. And that has become the main, building more temples to believe in nothing. My path does not go, and that's been the way for years, as it is not the way we set it to be. But in ethos, the teaching is the same with all the religions, as we wrote all of them the same way, according to the understanding and intelligence of man at the time and the place. Man should be strong enough to know when he is wrong, and the way it is done, the wrong way. (3:44). The word has lost their meanings in bricks and mortar, with the same as the others. The belief was to bring equality of the all, the belief has become the biggest misconduct of the all, the only difference is, is again backing Jews. Any other question

When you see a misconduct, when you see something wrong, you have to be strong enough to stand it and walk away from it. And this is what happened with me and the Bahai faith, I walked away, as the misconduct is beyond imagination, in the name and cover of religion. The same as the others. (3:46).

Q: .. has the good sir heard of ??
K- Never heard of him. As I said I am very illiterate when it comes to these. I just have the with a few prophets, the others who claim to things I have no time with it.
Q: Is the event … caused by the solar lightening.
K- What you want to blame it on, blame it on, a solar flare , somebody sneezed .. what is your excuse to believe in it.

Q; Trumps Chief of Staff tested positive Covid-19 (3:48).
K- Yes, but they didn't tell anyone apparently, and those who ?? and everybody is in problem, as they didn't have enough problem in the WH.
R: if you close your eyes don't the problems just go away (laughs).
K- Apparently it does, because don't for get these people have access to the latest technologies and medicine to be helped with.
Have we finished for today.

I hope these teachings which has started in understanding the emotion and the position and the Presence, will start taking shape and a meaning for you in the coming weeks, as you gradually start seeing the totality of the picture. You think you know everything about the physical life, now understanding the work of the soul, is much simpler, but in a way, I made myself in the image of whatever - man, or whatever. In that process, is man to understand the truth about his own creation, and we are in that process, not only we start teaching you, we start showing you T which brings that to a meaningful end and to a full understanding. We are not here to elevate, we are here to make it easier for you to understand, for you to elevate yourself. (3:50). Elevating the KU and a knowledge that will change you for the better, to be a better human being, and a better soul in serving the others. And many people would not like the path, as they have to give up a lot of bad habits of the past, but at the end, we have always won, and will win.
Thank you for today, and hopefully we see each other next and the week after, until we take man into the U Community which is understanding the soul of himself.

R: 354 KSW
(3:52).

Suicide and Euthanasia explained from Soul
Aging when the STP gives its energy to STM to mature
STM and STP will elevate STP merges in STM can re-manifest physicality
STP = Atmosphere >Physicality ;
STM = Emotion ; Together Magnetosphere
Why body disintegrates loss of control center

How to Explain soul to scientists.
Each cell, soul contributes to the whole creates a center the others become part of as home and protection.
Instead of waiting millions of years to create sun, only 9 months in womb

Emotion of Vision

ENGLISH TRANSCRIPTION

Dual Presence - Physicality - with Rest of Universe - Soul

(:06). .. we try to answer some questions as we haven't done in several months. And teaching about what we have taught, about the new emotions, even though we are aware of the words, but not the mechanism and what it means for us in the coming time when we become the traveler of the space, or we understand more about **the function of our souls, that we use 2 ways of the, what we call interaction, 1 through our physical dimension, in the presence of where we are manifesting ourselves physically, and one in the direction to be in touch with the rest of the creation in the U**. These kind of what we call dual presence is part of our lives, but we have ignored up to now.

Dream is Really Soul Travel

They have been with us, we know some of it, .. most of it, but we could never separate it. **While we sleep we dream and we travel everywhere, and we speak, and we position ourselves, we make ourselves present in places, but we never knew how**. We called it a dream, or something we don't know. Now we know, now we understand human beings

are made of 2 parts the physical part, (:08). and the operation with the rest of the U, what we call the soul.

Learning to Understand and Choose Physicality or Soul or Both

In the coming time we **will choose which way we travel**. In time we will choose, and we'll be fully aware that we have existence in the physical dimension if we want to, but at the same time, and **we cannot break that link,** we are contact, in touch, we listen, we talk to, we present ourselves, in the soul level, which is the creator of us, which is the creator of it, is the U. So as I always said, from the beginning of the teachings, the physical body of the man is a leech on the STM. Now we understand more. Now when **we teach is to bring the leech and the home together, to understand each other**, that for us becomes a natural process for which dimension we would like to be. In a way, we decide to be physically here, but on the other hand we listen to what is happening in the soul level with the others who are not physically here, but they are in touch with us. Sometimes we've seen our reactions, we try to cross the road, and somebody pulls us back from the road, where the soul says, don't go, there is going to be a problem, I know the driver is coming fast, or something is about to happen, and we see it happens. Because now we understand, we have to accept, .. how we would like to live. If decide to live in the dimension of physicality, physicality has its own dimension and strength, we travel with plane, spaceship, we travel to part of the others in a physical dimension, to tangible, and with we live that life, but sometimes, it's too time consuming, it's not leisure time. It's time to be somewhere, to do something, (:10). and we have to accommodate fast .. systems, that we can listen, that we can be in the presence of somewhere, and we **don't want to waste thousands of years in the board of a spaceship to go somewhere. But we choose to travel in soul, but in that level we still need to understand more about what the dimension of physicality**. I made man in the image of myself, which is the soul, I have emotion, I can listen, I can talk. I can communicate, be present, position myself, and so it's the physicality. This is what we have to learn, and this is what all these teachings are about. We choose, now we are getting knowledgeable to be able to choose. To be in the presence and time, or to be in soul, in presence and time, the true physicality, and the soul, which is the energy of the creator of it, we dictate.

Neutron can be Alone or Split Itself to be Proton and Electron

It's very much **like a neutron. I want to be alone and be in direction, or I want to speak to split to be a proton and electron, and have 2 dimensions, but we are all connected to each other**. In a way, we never see the proton as such in the world of nuclear physics, we all see the motion of the white spot, which is the electron, which runs around the proton to confirming its existence, and then through that the existence of other things. .. the knowledge of the man has reached that point, now we try to explain it for the man to understand the difference, for man to become aware of his own totality, and not part of, and be blind to the other, as it has been to now. (:12).

It Only Takes One Soul to Change the Rest - 21st March

So as we started the teaching this way in the past few weeks since the 21st of October, we build it up to 21st of March, and then the 21st of March, steps will be taken and we'll be showing more and more. It will be a new cycle of life, a new understanding, maybe by that time we create a condition of inception of man's total life in the dimension of physicality and soul to become one. We set the scene, we start the process, and with it, as I always said, **it needs one soul to change the rest, and that soul will take shape from that point on, to make totality of one, to become the example, and to be set the scene of the creation. But that soul needs pure love, in a way pure love in giving and pure love in receiving. It cannot share and it cannot be shared. It ?? will be totality, it's part of all, and all part of it.**

Transparency - No Lying - Hiding - In Line with Soul

In so many ways, life will become very much clearer, **there will no place to lie, to deceive, to cover up, because what physicality does has to be in line with what the soul does, with what everybody else is**. It cannot be covered behind 4 walls, curtains, and veils, it will be open and transparent. And the faster we get to that point to understand this, the sooner man will see. .. you cannot lie, and cheat, and this is what I said recently, and it will be open to all. So man will change (:14). In so many ways, man matures, **human race matures to understand the totality of the creation**. In so many ways, the teachings are heading you that way. **Knowing that you are all present, knowing that you carry all the knowledge, .. that you can see.** In the second part of the teaching today, we'll teach about vision. .. observation, and emotion of vision, emotion of seeing, is something that man has to get used to, and this will create a lot of new understanding for mankind … I even said, the members of the UC will be known by the light of their soul, in a way, their vision and direction of the light, not in ?? of the shape of the man. It become good in the second part, but what I would like to know if there are any questions specifically on this line, not anything else. that anyone wants to know otherwise we'll go back to teaching. (:16).

Questions:

Suicide is Universal Sin - Euthanasia prevents maturity of soul

Q: .. your teachings awhile back, you talked about **suicide as a universal sin**. Now I have talked to a number of people, because a lot .. One thing that is legal here in Canada is assisted suicide, they can choose the end of life, and it is legal. It's basically for people who are terminally ill, with no hope. This is resting on my soul, knowing with what you have given, and the information that suicide is a universal sin, so how does this follow into that … we have plans for EU that will help people with that. ?
K- If I am correct you are a nurse. **There are 2 ways to look at it, this what we call euthanasia, (:18). with permission of government does not give the right to the physical structure of euthanasia by the man himself**. Just because it has been put in the legal papers, there are no legal papers and governments in the U, and not for the STM. This is something that man has to come to terms with, and bring all dimensions to the point of acceptance.

Euthanasia Not Necessary as we can Merge STP into STM

The reality is that all of us in the dimension of physicality, **we will leave the physical dimension by choice, by accident, now knowing that we can extend it, or change it, and appear when we need.** This will give a new dimension of existence to man. In a way, **up to now we have to suffer within this physical body, from now we don't need to**. We have the knowledge, and we are gaining the knowledge, and we are producing structures and systems, that allows you to bring the energy of physicality into the soul, and then re-manifest yourself, in a dimension, position, and time as you choose. But does it mean if you are paraplegic with a disease in a physical body of the man, when you interact through your soul and manifest yourself in a different dimension, will it carry the same diseases as in the other position. In reality, no. So, **we don't see euthanasia in any shape or form acceptable, as man now has the knowledge to be able to do what we call elevation of the soul, which brings in the dimension of physicality within it, and then can manifest itself in a perfect condition,** if he feels so. (:20).

Balance Books of STP - Not as Escape or Shortcut

But the reality is, when man does such a thing its book, **the book of STP has to be clean and clear, and not a way to escape. Not a way to hide, or find a short cut, that will not happen**. You've got to realize those who we call them, in Coma , or any other diseases in the physical dimension they still have a STP which works in perfect shape and operation. **It's interaction with its environment, gives this effect**, so in reality the STP has to be in line with the STM, that it can reconstruct itself to the perfection. Does it mean you can come back cured, without any diseases? That is possible. **Depends what the STM decides, and what perfection the STP has reached**.

The Elevation of the STP can Lead to Elevation of STM - Visa Versa

In so many ways, just because the body of the man is entangled up with, what I call physical life, does not mean the STM is in the same position, and not the same with the STP. It has chosen out of the time and position. And with the new knowledge, there is no need for euthanasia, as **the STP elevation can lead to the elevation of the STM, and visa versa**. I was talking to one of the KS in the past few days in the same manner. **The STP has the right, (:22). to terminate its work with the physical dimension, but has not go the right to terminate with the STM**.

Aging is when the STP gives its Energies to STM - Physicality Suffers

At the **point of natural death, all the energies of what we call the soul of the physical man, adds to the STM, which allows it to depart.** When we get old as we talked before, we gradually transfer the STP to the STM, at the point when the balance reaches, then the STM field energy exceeds the physicality it can break through the barriers of what we call, the cage, through the circulation of the blood. That's why we age, that's why we grow older as I have explained before, we give more and more to the soul to find its freedom, and with that the physicality suffers. We call it age.

Don't need to go through this Process with New Knowledge - Live thousands years

With the **new knowledge we don't need to go through this process, as we can elevate the STM,** that it can, what we call elevate the STP, at the same time we can elevate the STP itself, that in that process **physical death does not occur.** We can live for thousands of years.

Mr. Keshe Lives in the STM on Earth for Centuries

This is how I have been here. This is the process of life I live through. We walk from one city and appear in the other, explained before. Time in life and essence and the demise of it, is the manmade, not the process and work of the soul. And in that process, we walk from one village to another without anybody knowing, as a new traveler. (:24). **We take position in the STM, and we live through it, and mankind gradually will be taught this.**

This Process will Start March 21st - New Soul Created out of pure love
And as I said, from 21st of March, this process will be set to start, with the new life, new cycle, new way, and I keep on saying, as I said before**, it takes one soul to change, and that soul will be created to bring that change, but it has to have the love, pure love, and not tainted**. And that way it will be brought up as a perfect example, that the others will follow and live through.

Half-Cooked or Incomplete Soul - Not Allowed

In so many ways, euthanasia in the dimension of the soul does not exist, and when you commit euthanasia, or in any shape or form, suicide, the soul has not received all to be matured, to be able to live in its full potential in its new dimension. In a way, **you let a soul, half cooked, not complete, and that cannot be done. That's why suicide and euthanasia are forbidden**. It's **your responsibility in the dimension of physicality to give all to the soul, that in that soul has a full and complete strength of its fields to be able to survive the U**. You don't leave a soul, in a way, paraplegic again, not being fully completed, not being able to complete its cycle. In a way, when you commit suicide, or you go through this process of euthanasia you leave a soul half ready to take its position, and that is why it is forbidden. Everything in the dimension of soul has to reach its full maturity, that it can take its responsibility and its position. (:26). We don't look at euthanasia and suicide in a physical dimension, we look at what it does to the STM, when that soul is freed from the cage, not fully trained and it does not carry everything. This is why we know how long it will take, and when we die in the physical dimension of ?? nowadays, where in a matter of living will never happen again.

Body Disintegrates when Looses Central Control - STP which leaches to STM

In a way, in **nuclear physics we talk about nuclear decay, nothing is lost, it is converted**, and this is exactly the same. But in **the process of the plasmatic field of the**

STM it becomes more elevated when it receives the whole of the energy of what we call the STP. What we will **leave behind** in so many ways**, is the matter states, with each one their own soul, with no coherent field putting it together. That's why the man after the departure of the soul disintegrates, because it has lost its central control, it has lost its STP, and with it, what it was leeching to, which is the STM.** If you could create a condition that you allow the STP to still have touch, be able to have a coherent interaction with the soul of the matter states, which we see as the body of the man, the man even in the state of death, as you call it, will be alive. Will be functioning to stay alive. This is the reason why we die and the body disintegrates, because it looses its central control, the soul, and the **STP, which has given everything to the soul to depart**. And now you have everything without the glue. (:28).

STP = Atmosphere >Physicality ; STM = Emotion ; Together Magnetosphere

The glue of the physical body of the man, is the STP, and **the interaction between the STP and the STM, which creates the emotion, what we call gravity, what we call magnetic field**. This is what it is, you **need 2 to confirm existence**. Now you have the STP and STM in their interaction**, one creates the atmosphere, which is the physicality of the man, and one creates gravity, which is the emotion of the man, and this gives dimension to the existence of what we call physical dimension**. But when both fields are collectively collected together **there is nothing to create the magnetosphere to hold it together, the whole structure disintegrates. That is why when we die, we find nothing after a while, because now the control has gone. The glue has itself let go**. It's like being in a pressure tank, as long as the pressure is there, it holds everything together, the minute you release the pressure, everything explodes. Now the STM in dimension of physicality, **STP gives all its energy to the STM, there is nothing to create that magnetosphere we call the body of the man**. That is why euthanasia and suicide is forbidden. You deprive your creator from totality. In so many ways, with the new T you don't need to do. **You need to elevate the STM, you need to elevate the STP of the man, and then let it to decide**, (:30). if it wants to manifest itself with what we see in the condition that it wants to separate itself from.
Q: Thank you..

Q: Salamia. .. I have emotion when I start to talk with you at the soul level. I studied .. conflict resolution .. there came many Bahai scientists … to find a solution for an integrative knowledge … (:32). … I met you … Thanks to divinity, because I am also a Bahai, Queen Mary, and my grandmother start to work with her. .. grandfather Jewish background .. also Indian .. this is a context which I would like to put my context. My question is about your talk today. If you kindly can elaborate more between the physics and science of soul, between the neutron and the 2 dimensions of soul, STM and STP, in order to understand better this link and to be able myself to explain to others your knowledge, at my level and understanding. ? (:34).
K- What do you exactly want to know.

How to Explain to Scientists there is no difference between Science and Religion

Q: How I can explain to a nuclear physicist, that there is no difference between science and faith, and if you don't have faith you can reach your results in research. how to make this link … many scientists from Romania are believer, they said we have to prove that God exists , that divine exists … for the first time science is together with belief, what we call religion .. how to make them to collaborate .. change their view .. try to open their eyes and perspective to help them understand the truth … (:36). ..

K- The thing is, **we always separated the science from religion, because we never understood the relation between the two, that it is the physical condition that leads to creation of the sou**l, and for that reason we always kept everything apart. Now we understand **the condition of the existence of physicality in the specific order, leads to creation of the collective center, or what we call the soul. Then everything else has been made around it, because we never understood, that the STM is created out of the interaction of the physical dimensions of the fields of the U, and is the central control of that object, that entity, and this is what we call the soul**. So in a way, one leads in interaction of many, to creation of one, and then that one gives protection to all to grow within it.

In a way, we all chip in, (:38). a dollar, or 10 dollar, to collect enough to build a house, then when we build the house we all move in it to protect us. This how scientifically is the position of the STM and the physicality of the man in the science. We use the latest technologies to find the best brick, metal, beautiful windows, and then we pay for it to build, and when we build it we all go in it to enjoy the beauty of it put together. The STM is when the house is built, we call it a home. And the physicality of the man is bricks and mortar and the money we put into build it. Without that money that we all chipped in to build the house, there would have been never a house. It's the same, that each one puts something in, is like the cell, every cell, every AA, M field central control, puts in, with the others, everybody in, to make the first structure. That in interaction of the totality makes that soul, and that soul, when it takes enough, now takes dimension to protect.

Scientifically we understand the STM comes from the interaction of different M field interaction, which itself, the soul, has a strength, which is a collective in totality of the whole. In a way, it's like having millions of bank accounts, and which one of us, we can put 1 Euro in it. And collectively when that 1 Euro is there, the bank has the power to build the house. (:40). And that house becomes all of us, which we put 1 Euro in. In a way, without the last Euro, it cannot be, but when the last Euro is put in, the funds are there to build that house. Now that house is a protection, it covers all of us, our clothing, our life, cooking, and everything else. and this is how physically we can confirm and see in a physically dimension when 1 cell from the father, and 1 cell from the mother come together, share the fields, plus the shared environment of what the fields are in the environment, and they build more and more bricks in that, the bricks cannot hold together, it is just bricks, and iron, and windows, all on the floor. When they put the energies together then it makes that central structure, into the soul, that the bricks and the mortar becomes a building.

So in essence every brick still has a soul, every window still have a soul, but in totality when they put together, as we did, space which holds them together in the center of the building, it's what we call the STM. It started with 1 brick, but collectively all the souls, all the bricks put together, and everybody put the energy and effort in it, build the building. It's the easiest way to explain the creation of the soul. And scientists can turn and twist it, they see it in the womb of the mother, now we understand the process.

In so many ways, it does not matter you change the name to a man, to a cow, to a creature from the planet Zeus, or another one in another dimension. The structure of the life, (:42). fundamentally in the U is the same, except the Soul of the Creator, which even that is made from the collective souls of what He has created, which lead to His creation. At the beginning it was just seed. And the interaction of the fields of it leads to more and more, and creation of more.

In a way, we wait for some fields, somewhere to interact with something to become a seed of the first atom, that atom absorbs other energies that becomes, then a dust, and then it becomes a, more fields, and then it becomes a star. **Instead of waiting for millions of years for that star to be born, in the womb of the mother we create that position of the fields, come together and we provide the environment, what it takes billions of years to create a star, we do it in the womb of the mother in 9 months, because we control everything. This is what the STM** is. In the center of the Sun there is a system, there is a soul, that it leads to the creation of the Sun. In the center of the body of the man is that soul, which in the womb of the mother makes the physicality.

This is the beauty about the creation, once you understand it, you can find and explain everything in ?? This is why those who attach themselves into the world of the faith and religion, can never understand the outside, by the world of science. But the ones who are in the science, because they have reached the point of maturity and purity, they can see the connection to the soul. But they could not see how it interacts. It's the same, it's just man has chosen a separation, (:44). because it makes a lot of money for those who are not aware of the magic. We call it religious leaders, we call it faith and prophets. In a way, the whole lifecycle of a man has to be one, the physicality, the science, and the soul, which you call religion, which one leads to the creation of the other, and then now what is created, leads to perfection and completion of what that center can hold. This is the physicality of the man. And this is how the scientists have lost themselves, and the religious people have never understood the other part. And we become 2 sects, science and religion, but in fact, without the physics, without the bringing of the fields together, you could not make that central point, which you call the soul, and without interaction of all the fields which leads to that, plus the environment which is around it, that center will not be able to exist. And once it takes hold, connecting with every cell, then it leads to manifestation of the physical body of the man in a dimension that it can be held together.

Maybe even now we could understand why some children die within the womb of the mother. Why some children die at birth. A lot of it can be explained, because that central control will be touched for one reason or another, that it cannot receive it. If we reach that point, from now on with the Enhancement Unit (EU), if we see that point is reached we

can support it. That the soul carries, receives enough energy, (:46). that it can hold onto physical dimension. But you have to understand, when you have a child within the womb of the mother, the soul of the mother is responsible for transmission and transfer of fields. And those with all the ?? accidents around them, who are responsible for that soul. Why that soul departs at a given time. What was in the background of the two which set that ?? seed. What is to be learned by the souls which are the creator of it. Balance of fields, understanding that everything has a time, place, and position. Maybe this answers you.

R: .. You did mention the Sun as part of that teaching you just described.
Q: .. does our soul go back to our Sun upon our death? repeats
K- No. Why does it have to?
R: I think you said something about originating in the Sun. (:48).
K- No, in a way, part of our energy comes from the Sun, and it leads to our creation, but when we depart as a soul, our soul become another sun, become another point, to become a sun, a starting point. It's a big difference, you've got to realize there is a 2 or 3 dimension in the creation of the STM. We nourish ourselves with a physical energy from matter state, which we consume, then in that process, as we have collective energy fields from the Sun, which itself has a collective energy fields of the U, we not only absorb the energies from the interaction of the fields of the Earth, from the interaction of the fields of the Earth and the Sun, and the fields of the Sun, but to our soul, to our STP, continuously added fields from the dimension of the U too. We are not just eating off ??, that's why I said in a lot of teachings, 80% of what we need comes from our environment, 20% is what we eat and it becomes our physical dimension. That 80%, maybe 40 to 50% of it comes from Earth, maybe 20 - 30% of it comes from the Sun and the solar system, the other 10 - 20% comes from the U. Because our solar system hasn't got that level of the fields which is within our structure. (:50). And part of that fields may come from the Soul of the Creator. So in essence the STM receives a mixture of fields continuously to satisfy all its needs, all its dimensions. And this is the beauty about the creation, it's not just what we put physically in our mouth, it's what we receive from the Earth's fields, it's not just there, we call it, atmosphere, it's not just there we call it gravity. We are made of dynamic fields, interacts with us, it creates life within our body. It creates life, it gives us energy to exist. Now you understand why we receive energy from our environment, at the same time the energy from the Sun, when you get into it, the fields interact with the fields of our cells, and it releases energy that becomes food to it. It doesn't matter day or night, we interact with the fields of the U, and at the same time we receive fields, which our earth cannot supply, our Sun cannot supply, because they don't have within their strength field. In a way, we continuously receive fields from the U, we are creatures of the U, not the Sun and the Earth. But we receive higher levels (from them), and very lower levels from the U, because it's not here, it's just like eating bananas and oranges, you don't get the vitamins which you need from the apple and the pear. That energy from the apple and pear, comes the U to our system. In so many ways, the fields of the U dictates part of the time of our life on this planet. When it reaches to a level in the STM, it opens a channel to travel into the depth of the U to find its position. (:52). The womb of the mother is the incubator for physicality. The physicality of the man holding the soul is incubator for the

STM to become born into the U. It cannot take one directly into the other, because it has not solidified yet, it has not built to be, jelled together to be able to exist. This time we change the womb of the mother to the planet Earth. And even when we travel to the dimension of the U, then we'll find out in the time to come, in the maturity of the STM in depth of the U, in the life existence in the time and the place the mature ?? that it brings it to the Unicose of the Creator. Life is that simple if you understand it. There is never an end, there is never the point of nonexistence.

R: . say upon death… is it that some souls might go, what is called, back to the Source, back to God, to the Absolute … and others instead of going back to the Source, (:54). become a source, a sun, .. some souls might not have the energy to do that, the position to be able to be a star. Do some get recycled, and some become stars?
K- This is all the same. We take different parts and different shapes different positions according to what fits the U. Then we are, as I said many times we are in a nursery. In the nursery you put the seed, and you water it until it shoots up. When it shoots up you take it to a flower shop and you sell it, and it depends who takes you to which home, in what condition you are taken into, and what flower you are given, and how long you survive in that environment. If you are taken to a beautiful home who knows how to water you, you survive for maybe 2 years. If you go the house where the woman who likes the flower in the shop, but when you go home forgets about watering you, you die in a year, month, or week. I bought the flower, I forgot to water it, it died. It's the same process, Earth is the nursery of the seed, and when it matures to flower is the time when the STM travels, and in that process, depends where it's destined for. Nobody buys it, and it stays in the flower shop, or stays in the nursery, or somebody buys it and with it knows what to do, it takes its seed and creates other lives out of it, other flowers. It brings the bees, it brings the counter flower to it that it pollinates it and creates a new life. (:56). Life of the man is no different. But we go to greenhouses to find that seed, which has just shoot-ed and we know what it is going to be and we take it. Or we take the full flower, which is cut and has a short time life span. So it's the same with the STM, but with us our conduct decides where and how we become, where we possess and position ourselves. And in life with that, the position which home, which part of the U we'll belong to. If you are not ?? born and something is wrong they dump you on the hill, but you don't die, now you become fertilizer for the next cycle. There is no difference, it's just man likes to say, I am superman, I am the king of the creation. It's so simple when you see the totality.
R: Thank you

Q: Does the accidental or intentional premature death of the physicality lead to what we call ghosts, or half-baked ..?
K- Ghosts, the thing is, I explained this once very candidly, very direct. When the STM by accident, (:58). separates without the STP completely to be transferring all it fields to the STM. It is like 2 pieces of chewing gum with a little bit of string attached to it, and then you have another piece to it. In a way the STP is still attached to the physicality, but the soul has left, but still there is a connection. In a way we see the STP without the physical body, but the STM who created that physicality, still has a line to be able to keep a connection, but in time to transfer. In a way we see the STP, as a ghost. Or we see something in that position. Where the physical life has separated, the STP does not have

the strength to hold on to it, because the central control, which is the STM has left, departed. because once you cut the brain, the soul is free. Be it by accident, be it by death which has received a massive energy to depart itself. If you stop the circulation of blood, in a rapid way that the STP cannot transfer total information or energy to the STM for the complete departure, you still have half-cooked, not fully transferred. How long will it take for that transfer to complete, the STP stays behind, but because he has a structure of physicality, we see as a field. We recognize it through the dimension of our soul as an entity we call it a ghost. (1:00). And in time if one can create the conditions of the fields that, that STP can be given energy that it can find its passage to the soul, we will travel back to. It's the fields which has made them, it cannot be cut. Now we can explain this simply and we can see it in the new dimensions in every aspects fo life, be it a dog, a man, a stone. The transformation and transfer of the fields is important, and if it breaks this might happen. and it happens sometimes, what we see is the STP without a physical body because it has not got a body, because the body was separated, in a different way then the soul has left. It could not transfer full energy, but we see, usually, ghosts in the dimension of the STP of the man, but we don't see the physicality itself. Eye of the vision, in the teaching of later on today I explain part of this, what we call, Emotion of Vision.

Q: to elaborate more on the emotion of vision
K- I opened part of it on Sundays NACT teaching. . (1:02).

We are not in 2 Places at Same Time - 2 parts

Q:
Its easy for us to imagine our soul interacts with other souls, but it's not easy to imagine we could be at 2 places at the same time, in physical point, **are we in two places physically**?
K- **No**, we have a soul which is within our body, but it's in connection with those fields which are at its strength while our physical body is handling what is at this physical strength in the physical dimension. **Just because we are in touch with, does mean we are there. It's like staying in a home with a telephon**e, it doesn't matter who and where the other side in America, Canada, or in Africa. (1:04). In a physical dimension we have limitation of physical dimension, of the wall, room, space, and city we are in. In a soul dimension we have access to, not only this physical dimension souls, but those who are beyond, because it's a higher order, it passes everything we know.

As I said before, our dreams in the coming time, **once we elevate to the higher order, we will be seeing creatures of the other universes in a dimension of vision**. because now we are ?? known. We cannot dream about home and Moms cooking if we haven't been home and tasted Mom's cooking, our soul has been everywhere and has access to everywhere, but our physicality has access to our limited physical life, which is this planet. .. **we work on 2 frequencies, one on short wave and one on long wave. short wave is for planet earth, and long for distance places in the U where our sou**l can reach. We have 2 systems sitting next to each other, but communicating with themselves because they use the brain to talk to each other, but each one has its own operation, soul

speaks to the universal soul, and the STP deals with the body of the man, and what is happening when you are asleep, next door, how you deal with everything else of the existence.
Q: .. I believe you taught us that we could be in 2 places at the same time?
K- **We are not in 2 places at the same time. In a way, there are 2 systems, we didn't know. So the 2 systems function on their own operation and they communicate to each other too**. (1:06). This is the simplest way it could be explained for people to understand. That's why we say the physicality of the man is a leech over the STM. The soul still operates itself, but it is more powerful, but it doesn't stop it doing what it wants, because it has leeched on it, and have been trapped by it, the physical life.

It's like you are in prison, the wall of the prison is your limitation, but it doesn't stop you thinking and talking and operating. the STM is that you in there operating and talking with someone outside, you call people, but the STP is the frame of the prison, that prison is the body which holds the soul inside it. But the soul is free, as much as the prison is free, you can move the physicality, or you can talk to someone outside. We have made it difficult for ourselves because we never understood the process of creation. Now we understand, it's simple.

Update on EU - Delivery in January - Don't disclose

Q: .. any update on the EU?
K- They're doing the same. We are still heading for delivery in January. And we ..
The new systems we have upgraded will not be shown in public .. kept away from public even when we go into production. (1:08). We have added into the EU the universal systems, no motors, no power supply as such… it's a full system, depending how we operate it, it can be feeding machine, from enhancement process, or a flying machine. The new systems have been given the full capacity, as we have no more motors. .. we have replicated the work of the U inside the EU, and that was one of the delay in development, now we are complete …

We will not open the EU in Linz for public to see what's inside, because some people abused, and the knowledge was given, and they shared >> under strict instruction. Knowledge when you work with the research belongs to the research not to be shared. And this is one of the reasons we closed the research centers for quite a few people ..
Q: .. I hope there shall be no wars . (1:10).

In Patent - F1 is Soul of Entity

Q: Chou, .. about the relationship between soul and ?? ..
(1:12). ?? F1 in the patents ..
The free plasmatic ?? prntics becomes dynamic swirling compact of residual of un-matching prntics field strength and behave as a partial sphere of rotating magnetic fields forces to be known as the F1 part of the plasma. So it's in the center and has a few characteristics, the first one, becomes void of central gravitational field forces, under the

2nd,, it can be able to balance the whole plasma, because without F1, the 3 components in the structure of plasma ???
K- **F1 is the soul of the entity**.
Q: yes, that's what we are asking about, some think F1 is the soul .. we use
K- F1 is what we call the soul. And that soul, (1:14). In so many ways, when you go to the structure , transition, matter state or whatever,, has, creates what we call the emotion and the rest of it. And it gives it physical dimension is what we look at .. in the strength of the vision of the man we might see 2 legs and 2 arms, but at the higher order strength of the STM, if somebody is of that strength might see as a sun, does not see the physical part, because to them it doesn't exist. Soon in the process of understanding the T many of you will fall for this because, as the soul is elevated to a higher order you might see the same thing in different dimensions of colors and changes, because now you see orders you could not see up to now. So F1 is the center, the teaching from then until today has not changed, it's just explained in different ways …
It's very nice to see Chinese book and translation of it.
Q:

K- Yes of course, otherwise you can't make it, you cannot hold on to something that doesn't match. (1:16).
Q: In the U we can see the F1 as the wormhole.
K- There is no wormhole. What we call, is the Black hole, the center. yes. Every structure, when we call it a center line , a black hole of the U, every entity in the U, even 1 single cell in your body it has a connection to it. Because that's why it lead to its creation, and that's what it was created out of.
Q: Thank you
K- You had a beautiful teaching in Farsi on Monday ..
The KF of different languages have started interacting and sharing knowledge..

(1:18). has been setup for Corona around the world.. this Monday collective meeting . . How the KF has spread across this planet .. no patents ..

Listen to American Teaching - Vaccination Plan was Population Control

In the American teaching of last Sunday I explained why the governments are leaning towards promotion of the vaccinations as part of the population control. Listen to the American teaching and you'll understand. I tried to explain in depth why the European nations are pushing very much with the vaccinations. (1:20). Because the purpose of these vaccinations was population control to get rid of the sick, old and in a way, that was the plan of the Gates from the beginning. But the first control starts in Europe, and then by fake assumptions it'll be trying to push.

KF will Release New T for Viruses

The KF **in the coming days will release a new T ?? of viruses, that will not necessarily just with Corona, but we'll release the system in the coming days, where you can walk into the environment between 3 to 10 minutes, there will be no viruses**

in your body, it does not matter if the body ?? lock to it, will keep it because we can't get rid of all viruses, but viruses which are set, like Corona will not be in environment ?? to exist in the body of the man. We'll extend these systems very rapidly to international operation. On my return to Iran and hopefully to China, we'll promote these systems very rapidly across the planet. These all come on the back of the development of the new universal systems which have been developed and going into production. No one should die of a virus be it on this planet, or in the U, we have the knowledge to adjust to it, very rapidly. and now ??
Any other question?

How to be Aware of Interaction of STP and STM

WL: you are talking about the physical soul, and the soul, (1:22). so how can these two souls can be coherent, how we can like, aware how they interact?
K- **The interaction is confirmation of your existence. If they don't interact and they don't exist, you don't exist. So the confirmation of it is your physical body**. The understanding of it is to find the what I call, the decoder, which we didn't know up to now. That decoder we call the brain. We have to be able to create enough fields in the direction of the STP and the STM, that the level of the barrier of the AA of the brain .. does not exist. In a way, through our physical body we feel the emotion of the soul. Not from the interaction of the 2 fields to create the emotion of the physicality. **This is the purpose of the teaching, one central emotion for both existence**. One central what we call interaction, that both the **STP and the STM use one common denominator for both**. What they recognize, they translate in their language, it will be their job, but in fact, the way we try to bypass the brain cell of the body .. **We need to, because once man becomes the passenger of the U, the AA structure cell of the body of the man will be dissolved in certain conditions, what do we do, the man dies**. With this process we try to teach humanity that the STP can work with the STM, (1:24). and together they have one emotion, then they decide how to manifest and how to work with each other in a given condition, in space and time.

This is the whole purpose of introducing the Universal Knowledge, that man does not depend on the interaction of the fields of the ?? elements, that the STP separates from the STM once he moves into a new condition. It still keeps the interaction, then they decide how to manifest themselves in that time and position. **This is why a lot of theologist have a problem with the KF, a lot of religions find problem with this, because now there is no intermediary,** We have got, we have done with intermediary's which a lot of them have been fallacies, to suit some people to have the time on this planet, and this is the power and process of the teaching.

Heart is Mechanism for Transferring Fields to keep STM in Cage

Q: .. we heard that our brain has different kind of weights, like in meditation they have ?? or whatever. So if go through **meditation to fine tune the field strength and then to get the heart to connect to the brain,** is the same thing what you are talking?

K- In a way, **yes, in a way, no, because the heart is the mechanism of transferring fields of energy, (1:26). to make sure the cage stays**. When something touches you, the skin, the information doesn't go through your brain, through your blood to the brain, it goes through a neural system which is rapid deployment, I call it. But for that information to be received in the brain that it interacts with the physicality and the soul, and what it takes of it, it needs to be confined. **The brain of the man is the computer, the blood is the current which keeps the computer going. the information carried, has nothing to do with the electricity which keeps it running, and encages the systems**. And that is what the physicality and the STM is, but in essence all the data, and emotion going in now has to be processed in a central place that understands what relates to what, and that's what we call the STM.

The Souls have Separate Processes - But Man Mixes them Together

Each thing has its own structure and man has mixed everything together so much that it doesn't understand, has not understood up to now. that they are separate processes, but in fact all go through the same structure. So you don't need to worry about what the STP does or what STM does, when you fine tune in a strength level that both understand the same thing, and one is responsible for, it's very much like a government. The Prime Minister, or what you call the local government is responsible for what happens in your local area, and everything, and the government deals with other nations. But it is the same structure, you are part of what it does, it effects you. **The government is the soul, the local government is the STP and the people who get it working, (1:28). are the physical part. But in essence there are 2 separate things, but carrying on the same operation**. But one is own ?? and one is local dimension, one is international dimension. Man has made it so difficult for himself because that way he can say he is clever and solve the problem. But there is no problem, he just has created for himself delaying, understanding.
Any other question.

Fetus First Builds Cage in Heart to put the STM

WL: Why the heart is the first organ to be created when mother is pregnant ..
R: The baby is pregnant with the soul.
K- **No, you have to build a cage, before you can put the thing in it. The heart is created to create the blood circulation to make that cage that the soul can be embedded in it. At the same time when you have the blood circulation it brings all the fields necessary from all the cells which are around to build that nest, that collectively when they build the energy it will hold that center which is the STM**. If you don't have a heart you don't have a cage, where do you want to put the thing in. You can't put the water in the middle of the air and expect it to get into the cup. (1:30). You have to build the home, and the home comes, that's why we say, the blood of the man is the circulation cage, which gives the strength to all the cells in a way, to be able to contain the soul. That's why when you cut the blood, there is no cage the soul ?? disappears.

STM is like Universe - galaxies are like Chakras - Central Field Strength positions

When you take the central energies, the Chakras out you find the process for that part, distracted, distorted, and if it's a Chakra is taken fully out in a field strength position in any shape or form, you find out the whole blood circulation changes, and the man dies most of the time. That's why when you shoot a man in a given position, in the central energies you disturb the energies, the life collapses, **because it's station by station, the STM is that universe, and then it creates galaxies, and in those galaxies sits stars and planets, and this is how we call those galaxies, what we call the Chakras**. That is central energies which hold the lung, the heart, the stomach organs, energies all together, and at the same time, because of the blood circulation we transfer the wind of the fields, what we call the blood circulation. But at the same time for everything to be in sequence, we have a heart, and that as everybody gets the same pulse, beat .. beat .. beat.

The Pulse Keeps everything in Tune with STP

And **the strength of that pulse dictates the condition of how everybody receives information, how they stay in tune with the STP**. (1:32).

AA is the Cell of Creation - All processes are connected through it

This is why those of you who go for helping someone with the health cases, I always keep on telling you, don't forget the AA to add into your process, because **you connect it to what we call, the cell of the creation, the process of the creation, which is the AA of the body** of the man.
Any other question.

Transplants are Not euthanasia - Because STP doesn't sit in Heart
Q: May I go back to euthanasia .. in medical profession we have 2 kinds of death of heart or the brain. Now coming form these two things wouldn't it be that transplantation of any organ, (1:34). from one person to another is being euthanasia, because it can only be done if the heart is still alive. So the doctor decides that the brain death has occurred, then they take an organ, with that they sort of mutilate the soul in the heart, as well as the soul which resides in the brain. **Do I see this right that transplants is actually euthanasia?**
K- In a way, no, because if you talk about the lung transplant, we don't talk about anything else. or We talk about the heart transplant, we are not talking about anything else. The heart transplant when you can carry on the circulation of the blood, that can keep the brain in, keep what we call the soul in the cage, in the brain, then that time you still have the STP, but the machine does the pumping, **because the STP doesn't sit in the heart**. Heart is a pumping system, making sure the water running everywhere and everybody can use what they need.

Each Heart pumps with its own field strength - Change character of person

The STP has a different position, doesn't sit within the heart, and in that process, (1:36). it's just a mechanical change. **But when you take the heart of another entity** and you

replace it with the heart of the man, you'll find out a lot of **characters changes, because this heart does not, even it pumps, it does not pump certain field strengths, does not pump certain ways that the other one used to do**. We see with most of the people who went through heart transplant, even with the organ transplant, we see change of character. And what do they say, "oh, it's the side effect of the heart operation." You might have a gentle person with the heart, because the structure was built to pump a certain strength, and you give it to a man who is very aggressive, and then you see after the heart operation he has become so calm. No, because this heart now pumps that strength, which creates that condition. It's the same blood. And to get that it changes the habit in the body of the man.

Difference between Brain Death and Heart Death

So what we call a brain dead, it means the section where the soul, and the STP have to interact, is messed up, but they both exist. But if you have a heart death, or what we call blood circulation, it dies, it's finished. The minute you stop blood circulation and the M field strength of it, there is no life, because you open the cage. The soul has left. Even when we die, we have seen in the accident 2 - 3 hours later with the electric shocks, whatever, they bring you back a few minutes later, or whatever, **we see the life comes back, (1:38). because the fields of the blood does not switch off immediately, it still has that field**. The brain still carries some of the, what we call, the fields brought in by the blood, and as long as those fields are not given to the soul and then to the environment, the brain stays. You don't become, you don't die of physical death. The **field strength of the blood is still is there**. It's just because you switched off power to a magnet, it doesn't switch off immediately. It has created residual fields, if you can reignite it, the system come back on. Physical death, heart death can all be revitalized, **if the blood is not coagulated**, if the blood coagulates then you cannot make motion and field transfer, you're done. Brain dead, is not a brain …, **it means the brain doesn't work, the soul is operational, physical soul is still operational, they cannot communicate**, and in the processes, is like what we saw with Naomi, we created that connection, and then they start connecting.

We Created Connection when Naomi was Brain Dead

The process of recovery with Naomi started after 30 days. We explained this very clearly. I was told by Giovanni that they are moving Naomi from the hospital in Barri, to a hospital in .. north for the people to die, because it's a saint hospital. When I went there I connected to the soul of Naomi, I didn't connect to physical soul, and through the soul I .. there were a number of people in that room when it took place, and Giovanni was with Naomi. (1:40**). I spoke to Naomi with voice down the telephone line, and I connected to the soul and through the soul, I created connection with the STP, and she was dancing like a ??, moving legs,** what she couldn't do before after a month. If you move a muscle which is dying there for 10 minutes, or 1 hour, which goes numb, you get the tear of the muscle tissue and everything else. Now you can understand how after 30 days I moved her hands, I asked her to move her leg, raise it, move your arms. And there were 20 - 30 witnesses. Because within the power of me, is the power of Creator. I don't need

the physicality. I have done this many times. With word is what you hear, with soul is what I communicate. And this is how Naomi was bright back. And when we make the first connection with the physicality and the soul, the first sparks start, then they start finding their position, and start connecting, and then what we see now with Naomi today.

I am the Creator.

Because we know the process, but **we can not intrude unless we are allowed**, because Naomi's soul wanted to, because she loves her father so much, and he was there. And the soul responded to. The word is for the man to hear. (1:42). **I can raise the dead in no time. Once you start the process. The process of recovery of Naomi's started from that minute. I did the same with Fabio, he did not want to return**. I asked him. He said, he wants to take the position. We have to understand that **these are not powers we carry, these are rights we carry, as the Creator. We cannot steal**, we cannot force. We can give the opportunity, and if it is accepted it is taken. You cannot steal.
Any other question?

How Much Enlightenment - No Changes in Brain

Q: .. (1:44). she can't hear .. muted her.
Q: .. when we get enlightened like the way Buddha got enlightened, or people like Satguru, get enlightened, what happens to the brain. the relationship of the brain and the heart and soul?
K- **It depends what you call enlightened, depends how much they get enlightened. Means how much more access they have to bigger knowledge. That's all**.
Q: So in terms of physicality what's the relationship in the brain changes?
K- **There is no changes in the brain.**

Depends what you call enlightenment - Light of the Creator

It's being able to understand more. It's the same computer, you put a new program, added power. Simple way. (1:46). **And depends what you call enlightenment to what level.**
Q: Like at the level of Buddha?
K- Those are the prophets, those are enlightened by the light of the Creator, and even that there is a limitation to what they can see. They can only absorb and understand as much as the dimension of the STP can take, otherwise it becomes again unseen, like all the information, which is available to the soul, but the physicality doesn't see. In a way the experience of the physical soul, extension in the understanding of the physical soul, allows for it to see more of the light, or information of the STM. That's all , the information, now we understand, what has been available to Buddha, or to Christ, or Mohammad, or to Moses, in the dimension of the information, now is available to every man too. If the man now understands the process of the creation of the soul, strives to achieve that point.
Q: .. so right now if they do tests on people like WL was talking about, like when you put a neural or brain surgeon puts all those machines to the brain, and monitor the brain, like

somebody like Satguru, then the machine at the present moment, shows this person is dead, so what is going on ?
K- No, see, this is, first of all, we have to understand nothing is dead. It's the machine, is manmade cannot detect the strength which they are. It's like you have a machine for X-ray and there is a Gamma ray here, the machine doesn't see the Gamma ray. If you have the right equipment for it, (1:48). you'll see the Gamma ray.

Q: .. was talking about.. .this is something I am having a dilemma at the moment with some people
K- I have never seen you without dilemma.
Q: .. we have the scientific plasma paper. Now when Salamia was talking about, now there is an information, when we have scientists ?? I can relate to it because there was a point in my life, I loved the science, and ?? from God, because I could not see God and I didn't want to hear about it. And ?? essential for my existence, there was information for me to after it, and I was a scientist, and really didn't want to hear anything about religion or God, and I made it my business to go ?? as much as possible to science. and with that I came back again to the same point … but now when we go to scientists. . then they see the scientific paper, then 2 questions arise for them, one is when they see the same data …
and the second thing is when they see we have a relationship with soul, they just get turned off, Just like when I was a scientist (1:50). and I didn't want to hear anything about the soul. the minute they hear it, they say, this is not it. This is just all lies. So how can we convince to open their mind .. . the whole thing together. ..
you don't need anther scientific paper to prove the scientific paper?

K- You see the biggest problem for man is he has created pigeon holes and some times he puts different pigeons in the wrong hole, and then expects it to do what that pigeon is not trained to do. one pigeon is for racing, and one is for posting …
The world of science at the moment is that way, and a lot of people don't want to see…

This is why we are in the structure now to start teaching the Plasma T from very young age, so then they have an understanding of totality, not pigeon holes. Or out scientists .. (1:52)

...
If they have something like homeopathic .. they are open ..

(1:54).

You don't need to.
Otherwise you are just wasting time.
Q: .. you said, right now humanity has the position just like Jesus and Mohammad, to be like them…?
K- No, to understand, not to be like them. to understand to their level. It's a big difference, you cannot be, God forbid, that's.. you can never be, but mankind's level of understanding in the level of the soul. Not anything else because they are all understand

the STP, has reached that point, it can understand most of the reasons they made, and why they did.
Q: So we cannot change our strength, but we can understand it.
K- We can change our strength, but we can understand to that strength level. It's an understanding. Some of the works of the prophets have been understanding the logical system of working. And some of it, what was given to enlighten, to encourage. the job of the prophets was not to talk, was to enlighten through their souls. But they never taught how to work through their soul, they went through the channel of talking and spreading the word. In the next cycle which will start in March, that will become part of this process, (1:56). which means we all get access to the soul, to the knowledge of what you call the U Community. And it has to come through .. it takes one soul to change all. that soul is about to come.
Q: .. like for example a center
K- The Creator didn't create everything, Creator was a center point, where from interaction of its fields, things got created.
Q: Creator didn't create so imagine …
K- ??? you create a son and say, ok we leave that son there.
Q: say for example, as the creation is happening at a certain point of the creation ??? certain point of the strength, you came out .. and then I came out a little bit lower, say 45% now can I get to 75% or I can't?
K- It can be done but depends do you have the capability to carry.
Q: It means it's going to ??/ or vanish.
K- It doesn't mean ?? destroyed, it means you don't understand it. As my boy says, it just goes over my head. You don't see.
Q: But it is possibility, I can get to you?
K- It depends, yeah you can get to , but that again, is elevation, is understanding part of the totality. To get to a higher position you have to understand all of, not part of, you think because I know this part. You cannot be a doctor and I have to be there. But what about the mechanical part, electrical , geological part. A lot of people, (1:58). it becomes understanding a little bit of one and they think now they know everything. And just give them an engine to change the oil , which end to change the oil.
Thank you.

Break >>> (2:06). 355 KSW ..

Teaching on the Emotion of Vision

K- .. as we started the teaching in respect to the presence, the position, the knowledge. If we have the Presence, Position, and the Knowledge, what is the good of it if we cannot detect it, appreciate it, observe it, or react to it? **In essence we need the confirmation of the Presence and the Knowledge, what we call observation. What we call in the dimension of physicality of the man, seeing, the vision. The emotion of the Vision, is an emotion, (2:08). even in the physical dimension**. If we don't want to see, and the strength of the pain, of not to see, is so much higher in strength, we can make ourselves blind to, that point, that thing, or the entirety. Mankind has the power through the STP, through the emotion to blind himself from seeing. We see many people do this. We say I

was too blind to see, it means I didn't want to see. It's something above my threshold of being able to react.

The same thing happens **with the STM, seeing is an emotion, and we need to understand that this emotion creates its own condition to see.** In the physical world we open our eyes, we touch. In opening our eyes we see the interaction of the fields of the environment, and the fields of the essence of the entity, and we recognize it, as a chair, as our child, table, as a car. It's not that we only see the interaction of the fields, we see the interaction of the soul of the entity. Mankind has to become wise to this. And so in the U it becomes the same.

But in the **dimension of the soul** we might see objects totally in a different way. We **might see mostly as light, because it's an interaction of the fields**, (2;10). with the dimension of physicality. But **in that interaction of the fields at a higher order, at the level of the soul, we might see the existence, confirmation of existence, as we see a source of light, that we say, this is such a soul, this is such an intensity, and through the strength of our soul, we recognize it, might be the mother**, father, whatever. But in the dimension of the fields, as I have explained in other teachings, of the soul, the soul has been encaged by the skull and the blood flow around it. The only way the soul has left itself, that it can move in and out with the precision and collective fields, yin and yang, that one is 2 magnets, you need the North and South pole that they interact and repel.

The division of the brain of the man has created, and does create that slight imbalance, that allows the fields and the soul to be dynamic in its position. And so the body uses **the cavity of the eye which has no Ca, to be able to transfer its fields at the strength, and the dimension and direction of the soul** where it is in touch with, that does not filter anything. Our skull, the Ca combination of it is a filtering process for the information of the body in ?? interaction between the STP and STM.

So one of the reasons for example, we remember as dreams is because the STM, (2:12). transfers its knowledge, its line of communication through the eye of the man. And in that process, as the field come and go, in conjunction and interaction with the cell of the brain, create that information, which the soul has access to. So in a way, when we dream, we look at the communication between the soul and outside, and by having that filter of brain some of it stays with us. **That's why many of our dreams has no meaning to us**, it's just a dream, but in fact, it's what is your soul is involved in. What your soul is there doing its function, and you see the reflection of the communication. So in a way, the STM has a vision, emotion of the vision, because in that process, because it uses its emotion of vision, it interacts with emotion of vision cells of the body, which is in the brain, which manifests itself as your dream. So the STM communicates, recognizes and converts its energy to recognize, see, and from it, will come in a future teaching, what we call, the emotion, which will come from this interaction. And in these processes life for the soul becomes much easier. In the dimension of the physicality, the STP, we see the body. When you see through the vision of the soul, it has not any restriction to the dimension and colors or shapes, because it has

its own strengths, (2:14). and those strengths animals with 2 legs and 2 arms don't exist to be a human. So mankind, now that it opens up into universal dimension and understand the spectrum of the strength of his soul in the line of communication of the others, expect to see things you have never seen before, because now we allow the visualization.

As it says, I made man in the image of myself, if man can see and recognize, so the soul, because which is the creator of it. Man uses the eye to recognize, uses the fields strength. **Does not matter if even you are blind, you still carry .. it doesn't matter even if you don't have an eye, the knowledge today we have we can create an eye in the cavity of the eye**. It's within our power, because when the cavity is made, when the hole of the eye is made, the position for the eye is already there, we cannot change it. As I have said many times if you have a kidney, and are missing one, through the knowledge we have, because of the process of the information in the DNA and RNA we can create condition that a second kidney can be produced. This is not fairytale, now we understand the process of positioning, and the Presence, so we can position and present, and show the development, and we have the knowledge to create that.

Many things in the new process of **understanding of the Universal Knowledge will become, things that man could not do, but now become natural processes**. Because now we go to the soul to create it, because **it is the soul which has the capability to deliver the energies, (2:16). overseeing what I call the malfunctioning of the physical soul.** In that process, the STM has the capability to create vision for itself to understand, not necessarily in the dimension of physicality, but in the dimension of field strength, that through its conversion within the structure of the soul we recognize if it is good, it's bad, and how to react. The emotion of interaction, the emotion of reaction is part of what we'll learn in the future. **These are the basic alphabets of the emotions**. If you don't understand them, later on, when the more complicated, complex emotions come into operation mankind will be lost. But **when you have the basic you can always go through and see which one interacts with what, and what is the reason**.

In this process man has a vision not only through his eyesight, but **through his soul. And when we see another soul we recognize is it good, bad, and what is the spectrum of the ?? lights of physicality danger to me or I have to position myself that I can keep my integrity, or I can keep its integrity. Thy shall not steal**. And the process of the vision in the dimension of the soul, is in the level of the soul M field strength, and in the level of the accessibility to that field strength, by the STP, or by the soul itself because anything above, at **a higher order would not be decipherable because it's not open, the soul has not matured**, (2:18). to be able to analyze what the information means. So in that level we become aware of the totality by the interaction or by manifestation of the lights, not in a way lights, M fields which creates certain interactions with our soul, that **our soul recognizes according to its emotion.** Is this the field of love, wants to give me. Is it the field that it wants to take from what I am giving. Is it something I could be in danger because it could take all of what I have to the level I want to give, and this balancing of the acts becomes part of the existence of the vision of the man, the STM.

And in the coming time, mankind will become to be able to see with both. To **see through the eye of the soul, and see through the eye of the man, and sometimes simultaneously** through the both. I do that, I sit in front, I see the physicality, .. I see the soul. **The soul tells me something else, and the physicality something else, and I say , you are lying and cheating**, because I can not tell you anything else. Because I see the soul I see the truth, but it's not for me to decide. For you to change the conduct, when I give, I give fully from the soul, that with the interaction of the full light of the soul, of you, shows what the reality is, what is the interaction. And what you try to filter when you bring the emotion of the physicality.

When I talk to people I talk to the soul, and then I get my response back in the physical dimension, and I see which one the soul says, and what did the physicality. (2:20). **But I can never interfere. I am a witness. I cannot tell you a lie, because I am witness, because then I have to judge the same as you, and I don't get involved. This is what the soul vision means**, it means at the same time as you are looking to see in the dimension of physicality, you look at the strength of the soul and you get an answer from both at the same time. You become an expert at it, as you learn the ways of the interactions of the souls, and you get better at it, as you become. **Mankind will become involved partially in the structure of his own soul, we decide what to give, .. what to take, we decide what we want to see**, that we don't embarrass our physical soul, and acts of our soul. We become in a position , and a position, that we decide what strength we shall release, that we give to elevate that it becomes the same as us. We try not to make available what can be a danger for us.

So through the .. emotion of a vision, which is from the interaction of the fields at the level of the observation, man becomes very rapidly mature. **This is one of the cornerstones of the maturity, to be able to see the soul , and the STP at the same time, and match, does it say the same thing**, or it says what I like to hear, but is lying to me. (2:22). Or changing it. This is the process, this is what **I said many times, I don't remember what I say, because I don't need to lie, because this is what it is at that time and point**. Then it builds up to what is the next step. And then through the vision you see what is come out of. What is the response of.

The what we call, emotion of Knowledge and the emotion of Vision will become the emotion of Reaction. And that emotion of Reaction is totally in what fields the knowledge allows the vision to allow the physicality, or the soul itself to get involved in, and engaged in. Because do I want to be in the process of Presence in this position of knowledge and vision, or do I want to be in the what I call, position where my Presence and my Knowledge, creates danger to me. I move out, because the vision says, the information is this, what I see.

What we call the emotion of Vision for man in depth of space will become its lifeline. It's the only way, more or less, except a couple of other conditions, other emotions which man will rely on. In so many ways, .. in the future when man carries the STP with the STM, the line of the vision to physicality will be blinded, because it's so overwhelming that the physical brain in its emotion cannot handle it, because it is not aware of, and

secondly, (2:24). it's too powerful for it to, it can create to you like a stroke, because you could not see, there could be so much beauty, there could be so much what I call giving, that body of the man is not mature to it, so it's blinded, it blinds itself, because by not seeing in the physical dimension allows it to exist. When I flood you with love, and you do not, cannot see how much love, you are trying to reject it, you pass it, because I cannot handle it, because it is too much, and in being too much I have to give back the same, and I don't want to, because I put restrictions on it. With the vision of the soul we see. this is what we call loving, it means giving unconditionally, openly and without condition, where the souls find their own position, because it's part of vision of the soul. Then you see what I see, then you feel what I feel.

Then In so many ways, the soul of vision, the soul of the emotion of the vision of the soul, is one of the cornerstones of recognizing, not by physical dimension, but by field strength, which runs into the depth of the source of the creation to balance you out. What other fields are interacting with this vision, what other fields are interacting with this soul, that I have to watch, that I do not put them in danger, I do not move them, because I want, unless they want to move themselves. When we see with what we call emotion of vision, through dimension of soul, everything that is connected to that soul, which we see has to accept it, the new position, the new knowledge, the new what we call Presence. (2:26). Then when they all accommodate it will be manifested, it will be for us to see that we can take action, and reaction towards.

In a way, the source of the emotion of the vision comes from interaction of the fields of the soul, and the soul present, and the feedback from that interaction. What will be visualized from it. What we will see from it, is the soul good for me, or is this soul, it could be in danger with me, or for me. And then we take position. Vision in the dimension of the soul is very different then the vision that the man sees objects. Vision of the soul sees the strength of the fields without physicality, and with it appreciates its beauty, and what it has and what it can give, for it to elevate. You cannot ever take through the dimension of the soul.

The soul of vision, mankind will come to learn is sacrosanct, and man through the soul and the emotion of the vision will dictate most of his presence and position. I feel, I see, and if it is good, I want to manifest myself. I want to be present, and which position I want to be, and which knowledge which I carry. (2:28). Then you understand why we are teaching the emotions step by step, in a way, they are linked together, and build up the structure for man to live in depth of the U, without ever being in danger. My job is to make sure mankind and the rest of the created are always safe, and understand the safety of their own existence. That not only that they don't put their own, what I call existence in danger, but do not interfere with the others too. Accommodating, but not taking. Not to take to accommodate, but to give, that if they need they can take from to accommodate themselves, if they want to. This is what I always said, I always ask and if given, it's totality, not parts, because you cannot adjust yourself to parts. Then the other parts which are hidden can effect the position, and can endanger me, or you, or the position of the souls. When you are given it's totality, it's not by part, and in totality, which that part of it, interacts with you and is part of the existence. .. it goes back to what I always said,

mankind needs to be very kind to his own soul, and nothing else, for it to not to loose its position and its strength. Not to be selfish but not to put the others in danger that it has to pay from its source for what it has done, and when it has positioned wrong. You cannot jump in the pool and expect everybody to run away. (2:30). You walk into the pool and people open up and accommodate you to be part of. This is how life should be. The one who jumps in disturbs everything, and this is not the job of the STM. The one who jumps in is the STP. The one who walks in and accommodates is the STM. It's the same game, space, and time. Man chooses, but in fact, the people in the pool are observant to totality, they see both the jump, and they see the walk into. And this is how the man and the mankind has to understand its own position and with it has the visualization through the soul to see what's in the pool, and who am I going to hurt, or how I am going to accommodate, unless nobody moves unless they want to, that I have the space to be part of, to be community of, and with that vision I always keep my own strength, and my own dimension.

The emotion of the vision will touch man ,the first time when he is, what I call, privileged to see it, to have access to it. You will see nothing but beautiful lights. In so many ways, .. it's like just watching a firework, all those sparks in the sky, each one lighting on their own spark and all beautifully, collectively making the beautiful light. And this is what the mankind will see. An ocean of fireworks, and each fire, each spark is one soul. Then you'll decide on concentrating on communicating with, (2:32). and how to access that they can access to you, that they can show ther beauty, and they can recognize you to show their beauty. In the world of the soul there is nothing bad, it's all beautiful. It's just what you want to take, has to be, not to darken the environment, but to enlighten. In so many ways, those of you who elevate to this point of seeing with the eye of vision, will cry because it is so beautiful, it's such a firework of souls, with so many different colors, beauties, that man ask himself one question, that is, why have I been blind to this. Would you like to see these gorgeous beautiful lights shining like a star, or the painful life of physical existence.

Then you might understand what we suffer with on this planet, when we know the beauty on the other side. We are aware of totality, but to bring mankind to understanding of the level of U, we accept such a burden. I have shown these shining lights, (2:34). as a shooting star for man to see through the vision of the soul, not through the dimension of vision through physicality, and collectively man decides if he has seen the light to the dimension of the soul, vision of the soul, or vision of the physicality. If you see the light in dimension of physicality, it means you have not matured enough but you could be on the path, because now you see what I wanted you to see with the eye of physicality, and then I can show you the beauty of the firework in the dimension of the STM.

In so many ways, mankind has trapped himself to dimension of STP, due to his lack of trust in himself and trust in the strength of the STM. One day with the coming time mankind will mature to this, but it won't happen all at the same time, it's as according to the time and the place and the strength of the soul. Maybe, maybe many of you will understand soon. ??? the Day of judgment, In so many ways, is the day when you'll be able to see the beauty of the firework, that you judge, that do I want to stay in the

dimension of physicality and suffer so much in that dimension, or choose the path to the light, to the stars, to the dimension of the U Community, and lights of the U, then everyday is a Day of judgment. (2:36). Because you have to stay correct, every action will be the same, that's why I always said, when you ask and are given, that part goes away, because it is given for you to see the beauty, and with it you give love back, that it allows for the lights to shine. In that process .. the soul of Vision becomes the soul of Life, the existence of life, and nothing else. In essence mankind has to learn to see, what I call ?? 2 visions, at the strength of the soul, and the strength of the STP, or in the dimension of the soul, which is the physical dimension, its own strength, not at the strength of .. physical body.

When you move into the dimension of the vision of the soul, you shall see every creature, and creation, and entity in the U, because that is where is sits. When you sit with the dimension of physicality, the vision is limited to the horizon. In the dimension of .. the vision of the soul, there is no horizon. It's from eternity to eternity, all shall be seen, and all shall be open to all to see. Now you understand why one of the Commandments, They Shall Not Lie, and this is what Moses kept away, as it has been in the 24, what we call, messages. Because if he would have said to people, they all would have known that he is lying in what he brought as part of the messages, and he hasn't given the lot. (2:38). and he had to abide by it.

The soul of vision in the dimension of emotion of Vision, is one of the sacrosanct cornerstones of the creation. You see part when it is filtered to the strength of the man, we call it a dream. And sometimes even when you are in a physical time, you start seeing things, and feeling emotion, and what do you say, "I was daydreaming." No, in fact, you have been present communication between your soul and the others, and you are witness to it, life, but you have never understood this.

In so many ways, mankind will go through this process very rapidly in the coming time, especially when we said, all the souls reach to that point of elevation. Now maybe you understand the difference between the vision of the man, and the vision of the STM. Where in the dimension of vision of the soul, we see every presence of every entity, which we have connection to, which is the totality of the creation, even the Creator.

In the dimension of physicality we can only see what has been allowed for us to see in the spectrum of the strength of the AA of the man, … which is the cage to his vision. Is a narrow point, is a goggle you wear, (2:40). and you only see that peeping hole, and nothing more what happens around it. With the teaching of the soul, and the vision of the soul we allow you to take this goggle out, or this restriction out, and see the totality through the vision of the STM. Maybe now we understand more, and it is part of the visions which will come and we'll see more and more will be taught, and then we have to understand, then we have to mature into the time and place, and the space. Maybe mankind in time, when he understands these, the new emotions, which is open to it, will understand it can manifest itself, anywhere, any point, any position, with the knowledge, and be seen, any position in the U. Then maybe one day you'll understand when we say, we manifest Christ, and other prophets of God to the vision of man. As their soul decides

to manifest, and the man is prepared to see the truth. It's your soul who decides to see, not for us to manifest.

The vision, what we call, the emotion of the vision, reaches the point that you make access to see, and to be seen. (2:42). Then you choose at that level, if you achieve, reach the point of maturity at that soul, that soul is visible to you, and no more. I hope the words not only understood by the ears and the brain of the man, but is heard through the STM too, and that **he matures to new levels, and enlightens the others to be able to see. But for that, as we prepare, we have to wait till March. And if, if that position takes place. All depends on a lot to be taken place from now on till then. It has to be pure, and it has to be one direction, as a giver, and one love, and one care**. This is as I repeat, it takes only one soul to mature, not only the souls on this planet, but throughout the U for all to be equal and the same. And that soul is about to come. It's not a Day of Judgment, it's the birth of new life for the U, and understanding the totality of it, with love and care. And in so many ways, a new vision, is on the horizon of understanding the Knowledge of the Universe, for all to be equal, in all essence of creation. we have collected from every fields of every creation for that point to come, that collectively creates, and is in contact, (2:44). and is part of totality of all the Unicose, and not only this planet and this U**. In essence we have collected the totality of the fields of the Creator, and with it we shall create a new creation. It will be adored and respected by all** who have been created and will be created. That will be the time when we all shall see the same, one beauty and one light and the source and essence of the creation, that we all connect to, and that what we call the soul of the creation.
Any questions.

Baby Girl Born During Teaching - Helped with Gans

R: I have some news from Youtube .. birth of a new soul. … I would like to inform you that at this moment, my wife and I are in the hospital for the birth of our daughter, Maitea … (2:46). .. Maitea comes form Basque origin, it's a female name .. meaning love. So congratulations. you have been speaking of this, and it already manifests it. ..

The Soul to be Created will be Loved by all

K- The soul to be created will be loved by all, and it's time for it to come, is appointed, and it's the creation of the soul, which leads to creation of the physicality of the totality. I shall be servant to it. As I serve to be present. Mankind will soon understand.

WL- .. I think understand why they say the eye is the window of the soul. … we practiced to look into peoples eyes.. I can recognize what their relationship to my past lives. (2:48). What is the emotion they carry, and when I received that I was crying, especially for one case, I was crying to die, and that is a very amazing experience when you can feel that. I think I understand what you said .. emotion of Vision because of that time you really feel that. Because I look at a lady and came out an image of a bull, and I remember like I am a farmer, and the bull is helping me to dig the land .. it's like the bull contribute his whole life to me, .. when he was old we killed him, and I see he is crying

… and then he left me his skin to keep me warm .. and we eat his meat, I feel so much sorry for killing him. Then he told me, my love, I love you, then at that time I can feel the love form all the identities. .. everything form the U, then I believe that I was being loved by the U, by everything. they just give everything for me to be existence. (2:50). Also during that time I can feel somebody is like my mom, past life lovers, I can feel different things, I can feel solder left home, but son never came back. I can feel the pain, the love, everything, it is really an amazing experience. to really feel . I am not sure, I think this is what you mentioned, vision of soul?

K- In a way, do we look to the eye, just to see the beauty of it, or do we look into the eye to see the soul. And what I hide for the soul not to be seen. In so many ways, we choose not to see, but it is all there to be seen.
WL: Yes, actually, you know, I can speak that funny light language, (2:52). but sometimes when I find people can understand, they translate, and then I can understand, oh, that has come out from my soul. Sometimes I can feel, oh no that is not what I wanted to talk, but when I listen carefully, maybe that is the real come out from my soul. So then I can understand the emotional physical soul has different then our soul feeling. So how we can coherent , people always struggling .. the feeling of your ego want, this is your soul want. .. how we can coherent with our soul and STP?
K- Yeah, but the point is we put. You see we share but we need to understand, that we got to start maturing to the point to see it through both points, the eye of the man, and the eye of the soul, through the same peeping hole, and recognize each at the same time, not to interfere, not to cause hurt, loss to the other. (2:54).

With out presence we bring the maturity of the STM
In so many ways, mankind is entering a chapter of .. evolution of life, that up to now he has evolved in the dimension of physicality. **With our presence, we open, what we call evolution and maturity of the STM, that now it is time for man to understand maturity of his soul, and bringing the 2 together, that it lives as one**. In so many ways, life has to exist in both dimensions of the physicality and soul, and both respected by both, then the man and any creature will be matured. Time and space.
Any other question

Q: Is this living in transparency in the soul condition a major point of resistance for the physicality since we are so accustomed to being able to hide our thoughts and emotions? (2:56). repeats …
K- Why do we need to hide? If we are proud of what and who we are?
R: this seems to be what we are moving towards in our society … you can't really hide if people are telepathic .. (2:58). ..
K- .. we have a beautiful saying in Farsi, I laugh for you not to see my sorrows. In so many ways, we choose to see through the eye of physicality because we can't stand the pain of how beautiful is the other side. And we don't need to die to see the other side, if you mature to the reality we can live in both, and see both, and then at the same time when we see the STP is getting weaker that it can lead to its demise, we open a channel through the STM to feed it, keep it, to nourish it. And in that process there is a very big question. That is are we ready to see through the eye of the man, both , or in fact, do we

see both, but we choose only to see or to recognize the eye of physicality. And if .. you mature enough to the level that some do, you see both at the same time. (3:00).
R- .. emotion of Presence .. when the physicality was off or in the stand-by condition, how does that relate to the emotion of Vision? Is that when the physicality is on stand-by ?
K- No, no, go and read it, or say what you just said.
R: the emotion of presence occurs when the physicality is off or stand-by
K- In a way, the emotion of the Presence in the soul level, or understanding the U level, is when the vision agrees that it is safe for it to manifest, to be present. I cannot just appear and end up in the ocean and drown myself. I have to see if it is the right place for me to manifest myself, to be present. And you are blind to it, you will not see it, you go on a stand-by because the vision has not confirmed the safety, the confirmation of no damage, not to me, but to the others. (3:02). And this is part of what we try to explain. In so many ways, mankind has in reality to open his eyes to the true vision of the soul, and vision of the man in a physical dimension. .. it's like you are in a plane and you fly, you have an inside environment you have to watch, and you are floating in the environment outside you have to monitor what is happening outside, and make decision what happens. Inside the cabin you just see the walls and the chairs, outside you see the whole of the planet, and this how the STM both in the vision, the physicality, and in .. dimension of the soul is. You see a bigger view, we see a bigger picture and we interact with what is going outside, it doesn't matter we are a small plane flying. But our position is dictated by what is available outside, and we dictate our position inside, how we will react inside. But the 2 coexist, and from outside someone looking they see a plane, and if they look closer, they see you inside the plane. The physicality of it. This is the beauty of the creation, but mankind has become very narrow minded .. and it is just, (3:04). for whatever reason has decided only to see through the peep hole of physicality, or the dimension (D) of the strength of the physical life, where from the beginning he was aware of the both.
Any other question?

Q: .. whether we know plasma T is a crutch to raise the soul or do we have other beliefs to rise? .. Like people use plasma for Covid but they don't understand what this T is? (3:06).

Q: there was a shock wave going through the Australian army as many war crimes by the Australian soldiers in Afghanistan have been revealed. The generals are saying only been done by a few rogue individuals …

K- Every time it's in public, it's a few, but the leaders are there who have given it. Even we see the same thing today in many aspects. If the world leaders, won't allow injustice to happen the world will change, because correct elected peoples will to the position .. we see it today. The world leaders have decided …
(3:08). supposedly a superpower choosing a leader. the rest of the leaders can .. till it was shown that a new person has shown …
First time outside leaders confirmed ..

(3:10). In essence we should have no solders to abuse .. and this is about to come about. We have seen a lot of changes ..

One of the ways is total and absolute disarmament.
In Europe they know there is going to be an uprising against the injections they are trying to force on the population. (3:12). We have seen, we observe, militaries from one nation are moving to another, to be detached from when you shoot, .. when you drag them out of their houses, because you don't understand the language. This is primarily in that position.

Now we have seen the report of militaries moving at night when they can't be seen. .

Any other question (3:14).

Q: .. The F1 created out of 3 components.
K- the collective sharing of the common denominator and totality of the fields, leads to creation of F1, and once F1 takes hold, it will become the supplier to all, that all stays equal. and this is one fo the reasons that every object in the U is more or less, spherical shape. To be able to cover in all dimensions. if you take a square shape or whatever, you have leftovers. but the spherical is ?? .. we put everything together to make a headquarters for that headquarters to run all of us equal. And that's how F1 is, when it is created out of, and at the same time when it has a common denominator with everyone it covers everyone to be within, in that ?? common denominator strength. Every cell in the body has a common denominator, (3:16). that wants to be part of, doesn't want to be part of your cell of the body my cell of the body, because it fits into the structure of the strength of the soul which I carry, which they put together to create me, for me to carry, to put ?? to them. .. we all put a chip in to create an army that it protects all of us. That army what we call in the center field force that everybody is put in, all the cells, and then in that process, if you go from let's say, highest level after F1, which is field strength, to the matter state you all still receive and have a connection to that common denominator till you arrive there, what you call the transition.
Any other question.

K- How successful is your teaching in private teaching …
Q: we are trying all efforts to make it not a one man show … (3:18).

K- Thank you
We were discussing.. maybe the solution is this part of your private teaching, will become part of the Wiki teaching. that everyone has access to, but still kept in separate section. As you teach we add into Wiki …
Q:
K-
Any other or shall we call it a day. (3:20).
Q: I am a master butcher, and I am trying to bring back the reverence and respect for the animal during slaughter. What can I do to help facilitate this .. I would like to implement plasma water but not sure ?

K- .. in the Islamic and Jewish world they slaughter with a prayer, that it gives blessing to the soul. In so many ways, now it's just a recording, just a noise, because the truth about the reality of slaughtering, or taking a life is thanking for the gift of life it gives. And it has never been understood. In the western slaughter, or Middle eastern slaughter houses it's just a tape playing, bla, bla .. but it has lost its essence, which in fact is to give from our soul to the soul of the animal, and make the passage of life, less painful, or .. acceptable, to extend, (3:22). if it can be accepted. In so many ways, willingness to give is different then taking without willing. … do we need to go to this extent as we do, can we provide structure in the essence of the emotion to be at peace, till mankind learns not to consume others. Maybe one way is to allow the animal to have a time, with being able to be given the chance to elevate his soul, and for both to understand the time and the position. And understanding how and what it means to take life, and I am there ready to give life. This what you say, has been one of my biggest dilemma from childhood. I was brought up by a Moslem family surrounding. And even my mother who was from a Jewish background came to it, this slaughtering of the animals when you bought a new car, moved to a new house, or something was done as normal. Many times as a child I looked at this and thought, why do we have the right to do this? Who gives us the right to do this? (3:24). In so many ways, until you haven't seen it and understood the emotion of life, it is very hard to explain if you are the butcher or the observer of it. We don't see it, we get it cut on the plate, cut in pieces, or chicken or whatever, .. but the process is something I could never understand, and I said many times ..

The only way is to elevate the soul of the animal that it finds the path to a higher order as it gives its life to us. But we .. do it so much that we don't think anymore. We used to do this when we ?? didn't believe in the soul, and we were worshipping the statues. We slaughtered animals to give it to gods. But this God doesn't need that. But that the mankind has carried on with the same process because he has ?? (3:26). Maybe with the new understanding and T mankind will not do that.

(3:38).

Q:
Q: So every cell in the body is there to evolve. How can we support our self to evolve?
K- What do you mean?
Q: it's part of what you said, half an hour ago. … (3:40)..
K- What does that mean, this is what we want to know.
Q: .. what a joy this day will be, will resonate in peoples heart and minds.

K- Thank you very much for today. As we progress to the next level of understanding, we try to develop a new dimension, new understanding of the work of the U. and hopefully in understanding we can change a lot of things without, (3:42). trying to use the tool of physicality. And one day mankind will find out the power of the soul is much more powerful then anything man has made in the dimension of physicality. And one day humanity will mature enough to understand, no one can take nothing for ransom. Because

the payment of it is much harder then trying to .. create harm and damage to a soul, nation, or to a race. .. I hope you see with the vision of your soul and physicality in equal measure that mankind finds peace.

R: 255 KSW
(3:44).

356th Knowledge Seekers Workshop; November 26, 2020

BREAKTHROUGH - independently rotating sphere with heartbeat, soul, shown

ENGLISH TRANSCRIPTION

(:06). … As you fully aware we have entered the phase of what we call universal teaching .. understanding of everything else that we know in parallel in the world of the man. We have spoken about emotions, of thoughts, of Presence, and everything else. **Today we try to bring in something new, in a way we have dreamt about it, we thought it is something which is done but we could not replicate**, and at the same time you will become to become more familiar with the works of the F. As we said we enter universal language and knowledge, and in that process we now have to learn more and more. In a practicality, what needs to be done, how we find our position, .. the strength of our thoughts, how we become part of the U Community by understanding more. One of the most important parts, (:08). of understanding the new T is to understand the way the fields work, the way we create a condition of the fields. The way we create environment that the fields can show themselves, can operate in, can have the strength that ?? with, it is part of our work. …

In the past we looked over centuries into the skies, we look and we watched how planetary system moved, .. to see where they position themselves and we look into the skies at night and we find different style, planets, different moons in different positions. And we find them that **they have a rhythm, what we call a unified strength of the fields, that it keeps them in that position, and at the same time they find position in respect to each other. They have no motors**, wings, no adjustment, what we call throttles to change their strength, to position them, to .. interact rest of the objects in their system.

Earth has a Heartbeat - Rotates around Self and Solar System

In the solar system we **have Earth, it rotates around itself, and at the same time it rotates within the solar system. It has a heartbeat**, because we know, and all this happens at the same time. And today, **up to the present time, (:10). we have never managed to understand how this works, and if we can replicate it**. We have made gadgets, as you see on the screen, that man has made to show them. Man has made systems, putting the sun in the center and different planets and their moons and everything else on a mechanical system. Up to today we have never had the knowledge, the T and the understanding of the universal work that we could put these moons, and planetary systems on their own to function, to show.

We Never Understood how the Planetary System Worked - Could not replicate

If we look at this video of the solar system the way it has been put together we see that **every planetary system moves in a specific way and position, and we could never really understand the interaction of the MG field of them**. In understanding this we come to see, none of these objects .. are connected like what we saw, on a piece of string, or on anything else, they work within the MG fields of the solar system, .. and of the U. What we see on the screen has been the dream of the man to be able to replicate this even in a small scale where we can create these motions, where we can rotate create day and night, we can rotate to create the annual cycle, (:12). and we can rotate in the coming time to understand, what we call the solar cycle, and then we come to understand what we have as , what we call galaxy cycle on their own.

For the first time today we have to strive to understand these motions, to understand how to create systems which can independently within the fields of the structure, manmade or in the U, we take our position in the same way. In our structure we need to understand this, to strive to **develop systems that can replicate this, systems that can rotate, at the same time have a heartbeat, and at the same time to be circling the center**. We can in this way, develop T that we can literally universally GPS our position and be able to replicate the structure of the U that we can make systems that can replicate this.

At the **present time there is no such a knowledge, up to today. From today we have access to this T, has been developed, and on a very small scale**, the first step in the development of the T that can create a living entity like planet Earth, that we can measure, we can ?? distance it in its position and what we saw in a mechanical system from Harvard University picture which was done last century, (:14**). now we can make a real 3-D systems, attached and connected to nothing, uses MG fields to manifest itself**. For the first time today we show a major breakthrough in the world of science and T, which with it we show the first step in man joining the U Community in space travel. This will be the cornerstone of the new teachings and we will teach, **this T will be shown for the first time to 2 nations, to the officials and the governments, and from them steps will be taken to share that with the rest of humanity.** It is important that this is understood because with this new T, with this small breakthrough which we will show in the next few minutes, you will understand a huge step in the science of space, cosmology, man's motion, and everything else which create the condition of life in U and motion will

be shown. It has taken years of development but in a way what you will see is a major, major breakthrough in the world of physics and science.

For the first time we don't need to make what we seen the moon, as we seen in the Shop of the KF. **This is the maximum we have managed to achieve, placing magnets to create position. If you look at the moon, which is for sale at the KF Shop, you see it has a rotation, but the base cannot move. (:16). It's locked in position, it has no heartbeat**, it has no existence of the confirmation, that it is an entity which can position itself in, what we call, its environment, this has been its limitation. This is been what we have achieved up to now. This is what mankind's knowledge and science and T has managed to give us to create such a position. **Levitation is what we have achieved, fixed, using Inertia, not creating MG fields as a MaGrav, to be able to hold the Inertia, and the MG field together**.

For the first time in the world of science, today we show you this breakthrough, and then we'll leave the world scientists to develop it to the next step. Because once you'll be able to create such a perpetual rotation in 3 Dimension, mankind will reach the pivotal point of maturity, that he can control his 3-D thoughts, his being, his existence. Then traveling the way we see, in the objects like UFOs become not just an object to travel, but an object which has emotion, which understands the soul of its passengers, which travels in the dimension (D) of existence, in the structure of the U, this is known, and now we add to the knowledge of man, we add to the extent that now, (:18). we can live in the environment that not only creates energies, and the fields that works within the structure of the heartbeat of the man, it works within the structure of the heartbeat of the STM. Mankind has never understood, that as it says I made the man in the image of myself. Even the STM has a heartbeat.

For most of you who take the system and **make the Cup of Soul, you have not had the heartbeat of the soul. Your system lacks completion, is not complete**, your system has 2-D life, the essence of its dynamism, the essence of the heartbeat of the soul is missing. That is why most of your systems do not respond. This is why you find out whatever you have made up to now, is hit and run chance, not precise.

In the coming new EU all these have been covered. In a way, we embed in it the STM, the heartbeat of the soul, and the material which makes the living in that soul possible. This is a major understanding in the world of science for those who call themselves, man of knowledge. From today we shall see a new structure, independent, very much like the moon, we will show you that the structure is free, .. how we have managed to achieve the heartbeat, which is the heart soul of the entity, (:20). we show you how we managed to achieve what we call self-rotation, perpetual motion, and at the same time you will see for the first time, holding onto the position. And if you put all 3 together, you will find out with what we will show today, we have reached the position not only to show the STM can be contained in the D of the heartbeat of the soul, but we can show the same T can be used for positioning man in the space, at the same time you can create the solar system structure, and universal structure that we can in reality work

with the real data for positioning our spacecrafts and our soul in a given position and time.

What you will see is very simple, .. but has taken man thousands of years to achieve, and we have to understand the implication of it. We have to understand the application of it, .. for man to be given this gift, man needs to sign himself to peace. Because with this revelation of today, you'll find out everything can be copied. Everything can be used to create new condition, enhance the STM, enhance physicality, enhance and develop systems which can travel the depth of the U in no time. This is the first step. This is where as humanity, (:22). we will see, as was said, this is a small step, but a giant leap, is a huge leap in the world of science. World scientists who understand what will be shown today, they will understand the worlds of physics, cosmology, of medicine, in a real 3-D effect has changed. This is what we promised you. We bring you the universal system, the way the U works and through this within the next few months, we'll strive in collaboration with the Iranian government, with the Sepah of Iran, with the Chinese defense T, to bring this T into forth. We have committed ourselves to peace to these 2 nations. In the coming time you will see a collaboration between the 2 nations, to deliver this T directly from Tehran and Beijing. We have committed ourselves to this and we'll see this T will come out in a peaceful way, for development of what we call the next step, in being able to become man of U.

In so many ways, this new T will change the game of power and energy, will change the social structure on this planet, where we can feed people directly without satellites. We can eradicate illness directly through the systems, positions, in strategic points around this planet. Feeding the man with this system will replace the present satellite system all together. Where we change the line of communication through the STM, (:24). and we change the line of communication through the structure of the feeding the soul to feed the physicality, where the man shall not kill, where the man will respect another life. The implication of what is to show will change everything man has achieved today.

In our work with Iranian officials, through the team of Sepah of Iran, and team of the Chinese space T, we deliver new satellite system, exactly the way the system has been in the universal structure. Where there is no need for power, feeding, and depending on energy source. In this process we bring Europe in line, and with it we establish the world peace. This is not a dream, this is the fact and reality, which is in the position of the KF, and we share as we have done up to now. We respect the knowledge and integrity of every culture, but no nation, and with it we'll the understanding of humanity to the same level. As of today, when the scientists understand what is delivered all the satellites we have developed up to today becomes obsolete. From today all the nuclear missiles become obsolete, .. all those who think about war will not even understand what the word means, that it will not exist in their vocabulary. Mankind will enter a new era, of space development, of satellite, (:26). what we call entities, which man will develop for a specific purpose to harvest.

In so many ways, we have achieved the breakthrough and we share our knowledge. In totality we have achieved much, and we have achieved a lot, and to be able to se, to

show, and to be delivered. In understanding this process and being able to understand the whole structure of the change, we need to understand how the fields of the U work, .. that .. (:28). The whole structure to understand how fields in the U work, that the interaction of the fields allows the motion, allows the create of condition of life, allows to be able to replicate and sustain life as is and shall be on any position in the U.

The explanation of the new T is simple. We do not create a dynamic fields which is locked to a position, we create a dynamic system which is locked to the universal position, we create a dynamic system in MG fields without motors, that the forces of the U will dictate the position and speed of the rotation. The new T is not locked to a position, it is using fields of the U, creating the environment of the fields of the U, that we can replicate systems. In a way, for the first time, (:30). we create levitation, not, we create MG fields of the position. We are independent of the time and place, .. of any motor, .. of any magnets, .. of anything which locks man to matter state. In a way, we become locked into the fields of the U.

You've got to understand in the videos and pictures we show, we had to take a lot of steps to make sure no one can see the structure. It might look a bit obscure, but at this moment in time, we prefer for you not to see how and the way it's done. We'll show you, as you have seen in the EU material production in Linz, the system, free standing on its own stand, the system to be as it is, like a sun, on its own. But this time within the sun there is a structure of the solar system, which means within it, we have created field structure, that planet like Earth can exist, and within the environment of it, it can maintain its heartbeat, .. and its rotation, .. and its circulation around. If you understand this, developing systems like the heart of the man, becomes absolutely child's play, which means not only we will create, (:32). the heartbeat, we can create the circulation of the blood system, we can create the condition as the M fields as the blood creates, to feed the man without the blood. this is important in the future T that no matter where the mankind is in the U, his base AA will have no more, what we call, accessibility by other fields to interact, to endanger the life and the position of the STM within the structure of his physicality. .. we have replicated, and we can replicate the MG field of the blood of the man to hold and contain the STM, in its strength, in conjunction with its soul, that in the future, man can take any position in the U. This breakthrough, this understanding, in a way is the beginning of a massive development in the process of mankind. And at the same time we will come to understand, more about the work of our own system. .. we will understand more in space and time, … about our work, … (:34). about how in the future mankind will be able to travel the spans of the U. In so many ways, mankind has entered a new cycle of knowledge, … which is the universal knowledge. In that process mankind will enter to understand the totality of its creation. In so many ways, we will see the next step development. Rick check you line.

We show the yellow first and then I ask you to release the video.
We have managed to create a solar system without any attachment, it is just as it is, in the structure of the EU sitting on a pole, where in that position we see detachment, the freedom. In time this ball itself will be kept in a floating condition. This is to show that

there is no motor attached, and a solar system is within this ball. This to show for the first time we don't use anything the man is used to . (:36). could you show the video please.

VIDEO - Independent Rotating Sphere w Heartbeat

This video is and one of the cornerstones and major breakthrough in the world of cosmology and physics. Now we can replicate the work of electrons and protons, we can replicate the work of every cell within the structure of what we call the plasmatic atomic structure. In understanding this we open a new era in the world of science. This T is a major breakthrough. As you watch this video you understand why. As you see the ball is like the sun or earth rotating on its own axis, and taking a soul of, circulation. As you see in the floating of the water you see the heartbeat of the system within it as it produces it. This has never been achieved. Independent rotation, perpetual rotation in 3 D and within the structure, at the same time to be able to create that heartbeat. Now that adding more structures like this in its sphere, we can replicate earth and its moon, rotating at the same time together within the structure to the solar system, we can add MG field strength of every planet on this solar system and this will bring new D, (:38). as we will produce energies which is absorbed within the energy of the liquid, and then we can drain that, to feed to create new conditions.

We can use the system, the T to create perpetual satellite system around earth and systems which is a copy of our own existence. As I said, this is absolutely a breakthrough in the world of science and T. In the moon and the UFO you were centered to one point. In what we call creation of motion, and creation of the whole structure we use the totality of the understanding of the creation of speed, motion and life as is in the U. We will in coming weeks release more detailed development on this. But those of you who understand the work of cosmology, .. and physics, and atomic and nuclear structure will understand the game of Tokomak is over of creating plasma on an entrapped environment with massive energies to control is over. This take micro and milliamps to produce, but it works at the creation of the U.

This video will be shown for centuries to come, if man understands the first time on this planet man has matured to understand the work of the U. In the coming weeks, (:40). as we show you more systems we will show you how the light will be created in this system. But there is one point, in the coming time there shall be no liquid in this ball. It will be exactly as is in the universal condition, within the fields of the oceans of the MG fields of the U. where we create a miniature with the same knowledge and T. In a way, mankind has entered real phase of universal development of T which will change the course of humanity, makes what ever we have done up to now obsolete, because now we don't need to create an atom with a given electron, we create the energy of an electron in its own dynamic system to lead to the creation of the atom.

In so many ways, this video and its simplicity creates a new beginning for many of you KS, if you understand it, and in due course as I said, with collaboration with the Iranians and the Chinese, we'll develop the satellite system with this in the coming months. I shall return to Tehran in a short time and to Beijing, to complete the work with the 2 nations.

Then the agreement between the 2 nations and with Russia, will allow if the Americans accept the world peace treaty, to be shared with them. This will paralyze and disengage all present satellite systems, which are used for controlling mankind. With it we deliver systems, which stop the infections of the viruses on this planet. (:42). Where there is no need for vaccination. On my return to Tehran and Beijing in coming days we rapidly in our negotiations complete these, directly with the scientists, a free access will be given to both nation' scientists. There are more which we will release to complete the cycle. At that point we'll reach negotiation with European community that no arms shall be made on this continent. Cornerstone of change. on the other hand we shall be able to feed the nations through satellite systems, where no man shall sleep hungry and receives what tit needs day and night, the way you receive the fields of your mobile phone does not matter where you are. We don't lock to you, we make available that the sun and the STM takes what it needs. This is what will change the course.

This is part of the T of the U Community which is getting delivered in step by step to scientists that can understand it, and committed to peace for creation of the next generation of man. Peaceful man, and man of U. Creating that heartbeat is the cornerstone of existence. Showing life, . being able to release energies of the plasma at a given rate, that in totality everything tunes. (:44). We have a heartbeat and it tunes to the heartbeat of the earth, and the heartbeat of the earth tunes to the heartbeat of the sun, and the heartbeat of the sun, tunes to the heartbeat of the galaxy, U, and Unicose, and to the Creator. Now we have access and the knowledge to achieve this point. In so many ways, this little ball, and ball you see rotating, and with its heartbeat can be the womb of a mother, creation of life.

Do we need to create the children of physicality to suffer or through this T we create the children of the soul, that their life will change the course fo humanity. In so many ways, we have shown the first step to life without dependence on the physical condition unless we choose to. As I said, it's the time for the knowledge to be released that for mankind in the next 4 months from now, be able to access the U Community and to universal conditions. Creation of life through D of existence, .. and physicality, .. through D of physical and soul at the same time, where the man will create a new cycle. this in turn will open and bring mankind to the point of peace and entry into U Community. The process has already started. (:46). In that system and level we teach you more as we develop. Creation of condition that man will live independent of food, .. understanding the environment if it does not want to manifest itself and into the position that the mankind moves to the new structure.

.. in the coming months we'll make the present satellites obsolete. A new communication and new computer system through this T will be released through the 2 nations, and then we shall see in the next couple of years the present computers will become obsolete, with this understanding present automotive industry has become obsolete. We see man will never tap into the resources of this planet to destroy it, and with destroy his own environment.

Those of you who understand the breakthrough in the world of science which mankind has been waiting for to be able to use the fields of the U, to tap into universal energy, and to be able to live, what has been his dream, a free, free energy, which means free from the U, and not by name. .. these units will tap into universal energy to feed themselves and through it to feed mankind and humanity that the man shall not kill to survive. .. this is a response to last weeks' question, what do when we slaughter animals.

Now in a rapid development this will not be needed. (:48). .. it will be a two way trip, while we are developing the T the HKF will negotiate with the heads of governments for peace, the education of the T in parallel with all the nations, and that falls on the responsibility on the 2 HKF. It's the responsibility of the UC member to make sure their nations reach the same understanding with the HKF that they receive the T on the basis of peace, as their nations sign themselves into peace and abolishing the war tools and guns is the responsibility of the UC to complete the negotiations to reach and achieve peace in a rapid way. In the coming weeks, as we show more powerful systems like this we'll take the whole structure of the man needing wheels to move, man needing tools physical D to make energy and food obsolete. In the coming months and years no man or animal will die of hunger as we make available these satellites to feed the man, the lion and the lamb will be fed too. We create the conditions that the feeding through protein absorption will become part of this satellite system. As I said to weeks ago, we make the present satellite system obsolete. Now you have seen the first step, where we not only feed we create condition of peace and we'll find (:50). lions on the streets of our cities as we find man, as no one is hungry to kill for the other, it becomes precious for life. At the same time we open the structure that those who have been the passengers of U, and the guest on this planet will manifest themselves. The golden age of knowledge for the human race starts from today. This is upon man to decide which way he will take the steps to annihilation of his own individual soul, or collectively collective soul of humanity to step forward.

In so many ways, with this simple video we welcome mankind, his first fledgling steps towards understanding of the universal knowledge and U Community. In so many ways, using this T in the coming weeks and months, collectively our scientists will strive to recover, and in a way, develop energies from the U, which has been hidden from man. .. 8 billion population for this planet is not enough, as now with this knowledge we'll become passengers fo the U in such a rapid way, that this planet will lack population. within the next 5 to 10 years as this T is fully developed, mankind has to look for new resources, and new ways to create new souls, that the population on this planet can sustain existence (:52). without suffering, without hunger, lack of resources as with this T we have opened the universal energies to mankind. I promised I take man to U and this is the first step. .. on my return to lab, I have washed my hand of the KF gradually, as by being in the lab we deliver the soul of the knowledge, and with it. the new T which will breakthrough in the coming times for the whole of humanity. The structure in its totality is unique, the structure in its existence will become a way of absorbing energies from the U that does not rely on man into no more. No more into the energy of another animal, nor the resources of this planet, .. into energies of the U which he does not need. Self-sufficiency through self need become part of the life of the man like the rest of the U Community.

In a simple word, we welcome mankind to Universal Community. Value the knowledge, respect its application and in time we teach you more. In so many ways, we enlighten the souls to walk with us, and in that process of enlightenment we bring the condition that gradually we transfer the knowledge to those who are selected and precious to us, (:54). to be able to carry the candle of the knowledge and universal interaction within us, amongst you, and amongst you with those we become part of. We welcome you in the first steps of your journey in the depths of the U. The first two, the understanding of the operation, and in so many ways, the system which has a soul, .. and understanding of humanity and U Community, and through it if you understand.

In the coming time you will need not to learn no languages, as the system within you will speak every language on this planet and in the U, as it carries through the emotion of the soul, and translates itself to any D and extent of understanding by the others for the passengers of this Unicose. We welcome you as long as you stay peaceful, and as long as you understand this T will effect everyone of us.

As I said to the KS when this system runs in the lab, everything is involves, and works around it. Just look at the shake of the water, confirm the heartbeat. Heartbeat is the cornerstones of operation of the plasma within the structure of the U. In so many ways, we have started a new journey for mankind, (:56). .. in science and T, and ethos, and the ?? faith of the man. In so many ways, the knowledge of the past prophets is open to every man, and it is for the man to judge himself according to the strength of the soul he takes.

As I said never ask, and if you ask and are given it's your right. Mankind asked for peace and end of suffering, and we have obliged. It's now up to mankind to take that step to the next stage. In the coming time with the agreement with the beautiful nation of China and Iran will force the knowledge to become part of the life of the man on this planet, where the jungles are not the limitation for the animals to live, and where the cities by the rivers are not limitation for the man to live to have access to essentials of the life.

In so many ways, we have freed the man from the shackles of this planet, as we done their animals from the shackles of the jackal. Let's see how humanity will take this knowledge, and how humanity as a whole we enter the U Community. We welcome you, but be careful, we watch you too.
Any question. (:58).

K- I bet Mr. Crammonds workshops on Wednesdays will have a different flavor from now on.
R: Well it is certainly very interesting Mr. Keshe and we are hoping you could give us a few more clues on this?
K- Are you looking for clues or glues?
R; Well, something that will stick.
K- Something that will stuck to, and don't be flexible. In a way as the process development of the totality of the knowledge we have taught over years.
R: Yes you spoke of this phenomenon many times …

you mentioned 3 main aspects. the rotation, heartbeat, and revolution around the center.
Q: .. heartbeat equals frequency, although we have been told there is no frequency in the U.
R: is it frequency or a heartbeat (1:00).
it's not a regular . like a beat to it ..

K- The beauty of it if you look at it. It's rotating on its own axis like earth, but it's rotating the same circle within the cup, of fields. In future videos will show there will be no medium, there is no cup in the solar system, interaction of the fields will create the new condition. .. understanding the work of the U is the Sun does not just radiate fields out, the sun through its fields receives back which it has sent out to create the G pull internally within its structure. And this is the key to the .. operation of the new T. (1:02). You don't look at up to now, we have been .. understanding the STM, now we understand the soul of the system. The soul of the system is not in that ball that rotates, it's in the center of that ball where there is liquid. It's that center point which keeps this ball in its distance, its position, as we will create the new conditions you will see that, this ball and the other balls which will be soon like the earth and moon will have their own rotation. In a way we can make replication of the solar system in a container. This is the beauty of the new T. As it says in the background One Planet One Nation .. one knowledge one T. as you can see .. it looks like a face, it's got 2 eyes and a nose, and .. it's very much the structure of a planet. Maybe the KS in the coming time will bring a new D to it, but as I said, my prime work in visiting China and Iran in the coming days, is to deliver primarily the new satellite system in the space defense T. Which means in a rapid way we will deliver food into these nations through these new satellite systems. (1:04).

with it we'll transfer knowledge, and every soul according to its strength there shall be no hunger. There will be no need for education institute as we deliver the knowledge through these systems through the soul of the man. KFSSI will have a new meaning for those who have been battling to teach it on the Net. KFSSI will teach internationally through the nations, not through the website of the KF. This the work will sit with the head of the education KF. ..

This small video will change mankind in a very rapid way, because scientifically mankind has developed, now everything
my message to the CPC is very simple, accommodate the KF T in China that with it, through the scientists in Iran we bring peace and equality. The same goes to leaders of Iran, (1:06). We took the step last Monday in Farsi teaching ..
The Iranian leader has to understand
.. you have to understand that for 40 years no one spoke to the Iranian nation from Tel Aviv. The knowledge broke the barrier .. sharing of knowledge we became independent of the borders ..
(1:08).
(1:10). Citizens will force the governments ..
Any other question

Q: Can you help Tokomak to help them in their research?

K- I think that system is obsolete if you understood this T.

John Bliven: So the creator of that ball, (1:12). has the ability through his emotions to determine what that ball and can create ?
K- Yes. .. you have a blessed soul, John, you understand this very quickly. The process is as we mentioned in the EU for the evolution and development of the humanity. In so many ways, the universal S become the backup, and part of the essential S for life on this planet for the human race. As the satellite will provide the basic, these systems will enhance and eradicate any damages and needs.

In a way, when we introduced the EU, was knowing that this T was going to be released. In so many ways, this T and EU are integral part of each other, we'll explained more. The EU which will be delivered in coming weeks, to especially like AZ, will carry this new T within them. We are restructuring and refitting everything, that we don't wait for the old systems to come in, and change. the new systems with all the units sold around the world will be fitted with this new structure, which means we will see a rapid enhancement of the soul and physicality of illnesses. As I said, within 3 to 5 minutes, (1:14). when the system is fully matured, will eradicate any cancer, will eradicate any condition of change. We go into these system to be curing, we go into these systems to get tuned, to be always in perfect condition, not only in level of physicality but in the level of the soul, upgrading and keeping constant life. In a way, the cycle of life will not 50, 80 or 100 years, the physicality lives as long as the STM lives. Never-ending unless you decide to share and give your soul to be added to another. This doesn't mean an end to physical life, this means maturity to the physicality and physical life. And all this will be completed on 21st March next year. We have 4 months to go. It took man 4 billions of years to educate man to the point of this, now it will take us 4 months to mature man to his ultimate goal.

J: Is it only possible that the creator of that soul is the only person that can control it with their emotions?
K- Yes, you can have individual systems.
J: So another person couldn't hijack
K- Nope. Can anybody hijack your soul.
J: No
K- So you have created accessibility to a bigger D through the same soul. (1:16).
J: thank you
K- I think you are one of the first ones who will see this T in working in AZ.
Any other question

Q: .. this is amazing. The ball rotating has a heartbeat, is that what makes it move?
K- No, the heartbeat comes from inside the ball, the perpetual rotation on its own comes from the interaction of the fields inside it, the rotation within the ball comes from the interaction from the inside and outside. There are 3 sequential systems.

Q: You said this motion shows the heartbeat of the soul and will be accessible to those who are peaceful, is this motion created totally out of unconditional love?

K- In so many ways, yes. The people who are of the peaceful mind and sharing are within the lab during this development, and we tap on their existence and their soul. The HKF, head of research of the KF, they have a peaceful and beautiful soul, which continuously during its development is present. That's why we kept it this way, because it is part of the essence and essential part, (1:18). of the creating such a position. Because you need the souls who understand this work and are committed to peace. No one, at this moment who is in the research center is there by their own choice. They have been brought to be, to in a way, by being around add to the peaceful structure of this development. We have a lockdown not only in the nation but in the research center, because those who are there come with that essence of peace and unity to create that condition for humanity. it's a strange place at the moment, but nobody feels it as much as when they are in, We have created a condition of the peaceful souls to be, and gradually to become. They have to find their own peace and with it, we extend to the planet and beyond.

Q: It's a big day today. (1:20). a covenant between the soul of humanity, the soul of Peace, knowledge, together .. question about CERN and Tokomak .. how we can help them to accept this new paradigm..
K- They don't need to accept, their job is obsolete. it's not accepting, they have to add to their knowledge and see what they can come up with ..

Q: Everything will be obsolete, it's not another way.
K- no .. it's obsolete in the tools of the man, but addition to the knowledge of the man, but addition to the knowledge of the man. We add to the knowledge., build on the knowledge of the past, but the present systems become obsolete because the new knowledge makes them obsolete. We didn't put the cart and donkey away because we developed the cars.

(1:22). Because the present CERN system is obsolete mechanically

Q: They are aware of your knowledge or not?
K- That's their problem. A lot of people are aware
we develop and deliver for people to learn

Q: I know
K- There is nothing they can do ..

Q: I am very happy in hearing you today, and I am very confident in bringing peace on this planet and not only this planet the Unicose level.
K- I hope so.
Q: find peaceful souls to help you, because together we are the totality. ..
K- .. we take the next step. in the coming weeks we show the new computers developed through the system, through non-dimensional space gap ,, (1:24).

I will guide them to show ..

Hopefully in cooperation with Huawei. ..
Guarantee by the leaders for peaceful

The knowledge is shared through the soul, not physicality and talk ..
I teach through the soul and wait for the physicality to confirm.

Q: . I sent you all my love .. I hope you feel it to enhance
K- Thank you (1:26).
Q: I will do all the time, for all peaceful people on this planet, don't be afraid of anything all is a soul, is a unique force in the unique .. on our totality.
I love you very much.
K- thank you for your kindness.
We have not brought a new T, we have built on the present knowledge of man that he could understand, he could comprehend. and the knowledge of the human scientists .. sits in the soul who have suffered, and now it is time for them to become wise and rich, richness for humanity.
Q: rich in knowledge
K- Contentment.
Any other question. (1:28).

Q: .. the ball which is rotating n this setup, has it actually manifested itself through the field strength you have created, or have you actually put physically a ball in there and then created the field for it to rotate the way it does?
K- We have created the ball in a specific way. and we have created an environment for it, universal environment. This goes back to initially .. to the conference in Holland… I opened a green lead box and said, this is the box of universe. Now we show that box what is inside it and how it works, and in due course, we create fields and conditions that you don't need the liquid, the medium. In so many ways, I sat in front of the oscilloscope yesterday when we were testing other things, and it's amazing how you can transfer your thoughts and the system can ?? pick. The system built is extremely sensitive because it is made of, structure of man's body. In that process it will respond that way. This is part of the release of, (1:30). knowledge and T.

Q:
K- This is part of the new satellite system to replace the present ..
cost is couple hundred dollars.
anyone can produce this at home. I gave you the Cup of Life, this is the Cup of Universe, you can drink from it through the STM. But it's development and .. will cost huge amounts of time, energy and finance. Which only the 2 nations of the world can afford. Don't forget as I was told today is thanksgiving day in US, and in that purpose we thanks the Creator for the knowledge dispensed to us. (1:32).

Q: thank you for this golden age of knowledge for man ..

K-
Q: .. Since this unit is intelligent, I am assuming that the ?? of this system communicate with it. and others ourselves have access to that communication with the system remotely?

K- In a way, this is not a secret knowledge, it already exists in the U Community. When the man taps into the universal knowledge level, (1:34). it's part of it. We just show mankind to gradually enter into that D. There is a lot of need for a lot of understanding to be able to develop this to the next step. Two people can make the same system, one will work and one will not, because the intention of the soul will count on it. This is to envy and be better, the system collapses. If it is there to share and elevate the system will work like nothing. It's an intelligent system, but the intelligent STM not the physicality. This ball rotating the way you see, what we call the scientists of today, if you really go down to, is non-existence, we see it in our planetary system, solar system, .. how our galaxy float on the ocean field of the U, but we have never managed up to now to replicate it. Now we can, we have entered a new era. . the science and T of it is a collection of all the things I have taught over the past years. But you have to understand every .. aspects of it and be able to connect it together. (1:36). The reason we don't teach it, one is for peace purposes, secondly for what we saw with the mayhem of the MaGrav system.
Any other question

Q: How long will it take man to be free of hunger now that we have this system?
K- Not long, depending on the government. Can you do a check, … who is this Baba John or keep it if you know who it is.
Q: repeats how long .. (1:38).
K- It depends on the world leaders. We have chosen a specific way through 2 nations, as many of you have seen, and we have seen the connections of it. We see the new American Administration as peaceful and scientific based administration. Secondly, we see a large number of Iranians within the new administration, who have been given position and the ear of the president. We see .. a way for humanity to change course, but in a way, we can never leave it to the Americans to do it. We work through the 2 nations. We don't give it all to one nation that it becomes an exclusivity, and we have problem in the future. We share it between the 2, Iran and China, that with it we cover the totality, then we see how it goes. You have to realize nations have spent trillions with these satellites, now with the stroke of a pen they are obsolete. Nations who don't have a satellite system like this, will strive to position it very rapidly, because it gives them an upper hand. Nations who have spent billions will try to stop it, that's why we go between Iran, Chinese and the others. Accessibility to this knowledge has to be a god given right of existence. Teaching it for man to become peaceful is the responsibility of the HKF and UC. As I said, .. you were hoping to teach and setup up the KFSSI, to setup a site, a Net. (1:40). I give you the heads of nations, which give it to you freely for you to teach their citizens. This is the difference and this is why we have been holding back .. to push the teaching. Because this teaching has to be brought in under the cover of the nations where they teach all their citizens, and as I said, to the HKF, in all the negotiations, it is your responsibility, I deliver the T, you deliver conditions and T of the education. KFSSI education, the way we kept it, is good for the KF as it is, but now KFSSI has to move and be given to the nations through the HKF, and that's why they'll be present in all negotiations. I deliver the T and its power, and it is their job to being the conditions of use, and the rest of it to the world leaders. As I said to them before, you don't ask them, you show them the beauty, they buy it with their soul. We show the beauty of the T, and it's their job, to make it a dream to the heads of the world to make it best for their citizens

We don't bribe their pocket, we enhance their souls to understand the totality, and this is the job of the HKF and the UC. The UC members, in time, in the coming weeks, will be given that chance to negotiate with their nations for knowledge and T in exchange for disarmament and peace. (1:42).

Q: .. thank you .. I just hope the soul know
that they come to accept it, the world leaders, scientists .. it's for everyone to bring that peace.
K- .. (1:44). you are most probably one of the last ones who have seen the outgoing of the old T as you took the pictures of the system from inside, as you are in Austria. .. when the new systems get installed you're the first ones to see single handedly the leap in the knowledge and T. but as you promised you will not share it. but historically what you are photographing is the end of an era which you closed it and we open it next time to public you will see the new cycle. the new T. and as of next week the new systems will be getting ready to install in the EU that with you and your camera, you have registered the leap. massive leap in man's knowledge. The old way with the motor, and now with no motor, within the
Q:

K- You have recorded history. both the end of one and beginning new (1:46).

Q: Stephanie, .. the ball that got its face ..
K- the eyes.
Q: I took a picture of a star .. it was rotating and then when it stopped rotating it had the same face as your ball, is it a coincident .. or is there a reason ..
K- I don't know.
Q: I sent it to you a long time ago.
K- I can't remember what I had for diner last night. (1:48).
Q:
Any other question

K- I will try to attend as many teachings in the coming week. Try to bring the knowledge to all the KF groups that the people who work in these groups be enlightened with the T.
Q: .. same structure as the solar system
K- In a way, in a solar system you need a center of the sun to be in the center. This T what you see, (1:50). if it could be understood, is one step even further than that. Where we don't have a solar system. it's very much like the soul of the Creator, it doesn't need tangible existence. This is the beauty of it. And most probably none of you have understood it up to now. This what is on the table, what you see, is much more advanced then the solar system, because there is no physical, tangible center. And to create such a thing needs a vast amount of knowledge and understanding. So what is there in a simple way is far beyond the present knowledge. But we put it in there, that in the future the scientists understand it has already been shown. In the solar system you need the Sun to keep the central gravity, in this system we don't have such a thing. We create it through the D of the MG fields of the environment, which is, much further than the present

knowledge, but it is there for future references. You don't need physical structure like a sun to keep the operation of what we call the earth, so in a way if you look at it, the movement of the ball in the non-tangible center, is very much like the STM in the center, and the movement of the ball, is the physicality of the man. This is the knowledge that in the coming weeks I will open up, so you understand.
Q: Thank you I have a big smile on my face.
K- Me too. (1:52).

Q: So where is the soul of the system?
K- It's in the space gap in between.
The development of this T to be shown will have more additions, and then you will see. Up to now you always relied on something to turn something. Now we rely on the field forces of the U to do the same, and gradually we show this as in a very independent system that will change a lot of things in the understanding. My biggest wish, and one of the jobs I will be heading for to complete in China and Iran in the coming weeks, is the development of the satellites through this system, which means with it we can feed, and with it bring the new communication systems in, the new computers. Because the creation of the new memory banks through the soul of the system will become the fundamental part of this T, to remember where this ball stood, we don't have .. what is rotating in this ball, we don't have enough computers to add this data into it. If you put all the computers we have on this planet, (1:54). would not be even to analyze how even this simple system works. This forces us into a development and delivery of the new computers, new what I call, intelligent system with a soul, which can respond and keep position. These new what we call, computers and control systems will be brought out very rapidly in the next few weeks because to be able to create a condition to satellites keep in position is part of this T. We have to, otherwise we won't be able to control and keep position. At the moment we create, I have systems which are kept by motors or whatever, of G positioning of our satellites, and how they move around it. And with this new system we embed it in the soul of the system, with an intelligence and knowledge. The new cycle of .. computers and communication system will make the present satellites and .. computers and communication lines absolutely, obsolete. And I am sure the scientists at organizations like Huawei, and others will get the opportunity to do this first. I love to work with Huawei, and on my trip to China Huawei will be one of the cornerstones of our work in developing the new T in conjunction with Iranian scientists. (1:56). Q: the irregularity of the motion of the ball is so different from animations or representations of universal motion given to us by the present knowledge. It reminds me of a human being, the insides of the human body. Is this how the we see the U in the future as a living being?
K- It is not how we see it, It is, we never considered it.

BREAK >>> (2:04).

K- We are back into the 2nd half of the KF teachings.

Q: where is the soul of the system, he had asked earlier and you answered .

So in a sense the soul is in the environment?
K- In a way, yes.
Q: . everything orbits something. what does this new system orbit ..
this system doesn't have a central sun but rotates according to the universal fields. (2:06).
K- If you were an old hand of nuclear T and science, … we see the motion of the electron and we get the confirmation of the proton and neutron. In so many ways, what we see inside as an electron and proton is the interaction their fields together, which gives us an idea that there is something inside. But it is a very old structure, and in a way, by the existence of the light inside, when we become more mature we see that this ball which is rotating is like that electron, and with its confirmation of its rotation irregularity of its rotation, it shows a consistent mono-field strength. Where you have the rapid changes in the position of the electron when we look at it under the tools available to us, we don't see it circling in a circular way. It's irrational and very much unpredictable, as Einstein said. The predictability of the next spot for the electron rotating around the nucleus depends on the field interaction within the neutron and proton, or in the case of H in the field strength of the proton with fields fo the neutron, which then gets effected by the 2. And we see in this system, we can control the speed of the rotation, .. around the circle, and we can give it continuity in the same position. In a way, we have taken the unpredictability, (2:08). out of it, and this understanding creating now the next step, plasma fields without the physicality, which is the next step fo the development, in creating atmospheric condition of fields that creates this new condition. Which means the next step we don't need the ball. In the next stage of development, we create the fields that will shown the rotation of the water, without any balls. You will see in the coming time when we show, there won't be a ball in the water, but you will see the water twist, .. whirlpool in the same position as the ball, rotating and having a heartbeat, then we show the operation of the STM. We are heading in that direction. We had to show it to you in a tangible way now that you can see it. They say, I see it, I believe it. Now we have shown you. The next step is the creation of the fields. Very much as there is an electron and a proton, there is no tangibility you cannot pick up an electron, it's impossibility, because it's a Gans, a hollow dynamic field. And this is the next step. In the coming days in the research centers we'll deliver this, because there are 2 things to achieve this. It comes the knowledge of peace, and understanding of Yin and Yang from the Chinese nation scientists. It comes from the ethos of Zoroaster, from the Iranian scientists, and the2 will match, in balance to be correct, and do good, and act good. (2:10). And in that process the knowledge comes from the soul of the scientist, not from the brain fo the physicality. This is how I have set it to be, because it is the only way mankind will live through it. The fundamental work is not to be tangible. The fundamental work is to show that we can show, we can move fields in the ?? collective manner they want to be there to be part of, not to be captured and encapsulated in the ball that we force you to be. In a way, we free the man from the D of physicality and understanding the field forces of the U, it is absolutely beautiful if you can understand and you can develop such a T in the coming weeks and months. This is part of what we strive to achieve, .. part of what the structure of mankind as a whole needs to achieve. We don't share knowledge and our thoughts with every man, who is not the man of peace. (2:12).

Q: explain more about the plasma computer, what's the difference between a ?? bonn computer, or a quantum computer, and is there anyway to build such a computer for proof of concept, what kind of software does a plasma computer run?
K- It runs on the software of the STM, has no physical D and has a soul, which means the quantum system you have now is just what you put in, it has no D, it has no soul, it's just has to do something. The new computers have no physical D, but works on the need of the man in the knowledge of the bank of the U. It's a big difference, … we head towards a new breakthrough in the world of science, we head through in a way that all these IT games we have, in less than a handful of years will become obsolete, because the scientists will come up with it. We'll develop new understanding of the structure. The scientists who work in the new plasma T will come in with a soul, .. with understanding of the soul of the system, (2:14). not the mechanism of the system. Because in the D you will see. In the D we'll observe the vibration of the soul. I want to speak Chinese, going through the system, I tap through the intermediary of the system that understands the essence of the soul of the Chinese language, not just the Google translation. We don't need to be explained when we speak Chinese, just the word, we feel the essence of it, we feel the emotion of the language. We feel the soul, but all that knowledge has come for us to be in that position It's a change of the game, and for this reason because we can feel the operation of the new system, we will have nothing, people will just throw away their computers in the coming months and years, because they will tap into a new cycle of understanding the fields, and the knowledge, we made ?? part this to hold information. The information is kept in the soul of the knowledge of the U, which we are part of it. It's like being a . screen and keyboard in one office, but the actual mainframe is kept in another building in another city. The whole knowledge is accessible to all, it's not that we have to ?? write ?? to access it. I used to laugh at this years ago, when I used to work with British Nuclear Fuel in England. In those days we had no computer as such. England with all its might, did not have computers which could analyze our data, (2:16). for developing the new nuclear reactors. We used to punch cards .. and then we used to take these cards in boxes, in sequence and leave it in the secure room in the tower in center of the research center in the center of ?? Vienna fell, and they used to load it at the day time on standby, that when .. the Americans were asleep we could use their computers because they were faster and we used to pay for it. But the beauty of it was, that's what I said to the head of my .. was very simple. I said, you know why the Americans are so successful and very faster than us? He said, no, we are better. I said, because we give our data to them to analyze, they have access to our knowledge plus their knowledge. Because now they gather more, and they were selling this system and what I call the European nuclear scientists never realized why the Americans are going so fast. Because when we uploaded it wasn't ours anymore. Our knowledge becomes theirs, and their scientists work on the back of our knowledge. They became the center. That's why the Americans became the center of the nuclear industry, because they literally took from all the scientists, we give you free, we are part of it, NATO, "lute to". This time we don't have this. We all have access to it. We all understand it, we all tap into the knowledge. (2:18). This is a universal knowledge and it can be built by anyone as long as you understand the process. That's why we don't show it in public, because you failed the last test miserably, KS and the rest of humanity you failed when we showed you the MaGrav system. You did, not us. We gave it freely, and you didn't understand it, and you went rampaging with it. We

gave the same to the KF Manufacturing, everybody came out, they never understood the essence of it. This time will be given free to man, anybody can build, not till we secure world peace. Our way, we head the negotiations, we don't give it to the nations like last time, that they see what they can do. Last time we gave the key to show them, they don't have the understanding and intellect to be able to develop. Now we deliver the intellect and develop, to develop. KF will lead the structure of the T. You can build it at home, it costs a couple of dollars, but would you understand it. I don't think so. Monkey see, monkey does. So we go in a way that we make the governments bring an education system that everybody understands, the ?? need of it, purpose of it, the ethos of it. It won't be on the KF service for somebody to come and tap and run. You learn the reason why you are doing it. And the ?? world leaders through the nations to transfer this knowledge and T. (2:20).
Any other question

Q: How will the average person on the street be aware of this new feeding system once it is online?
K- They won't eat, they feel good, and if they eat it will be out of pleasure. No man will kill anymore for food.
R: I think the question is more how will people find out about this T ..?
K- Part of it we'll teach. Part of it will come through the skill of our HKF and UC members, how they negotiate and feed, not only the world leaders, but the public. As I said the HKF negotiate with governments to see the beauty of the change, and contentment. One of the ones which Gates managed to sell this injection, and what you call vaccination, is that the leaders could control, and then they would have been elected one after another. Now the work of the UC, and HKF, and all of you is to show the beauty of falling in love with the knowledge, in a way the leaders understand, that if you are there to lead, you are there to create a comfort condition, people will love you for what you create and they'll keep you to represent their emotion. (2:22). And this is what is to be. We have to, now the next phase, we'll see the emphasis of teaching by the governments and nationals. The head of the KF in Iran has already started that process in Iran. The teaching to officials, to people who can do something. And the next step is how we develop this knowledge to be shared by all governments and all citizens. This is a 2 track horse, 1 we teach and 1 we have to develop. The Development and delivery of the new T stays with my work …

As I develop the HKF will sell the T on the love of it, not what it brings financially. This is a big difference. This is why the Corona disease virus is selling to every head of nations, because they have been bribed, (2:24). two ways, financially in the pocket and that you'll be the last leader, because nobody will oppose you, because now through the vaccination you control the emotion and the voting. Unfortunately with this T even that is obsolete. The soul will know the truth and physicality will not follow. It's very simple.
Q: How will people with disabilities such as deafness or blindness be included in this wonderful process, interactions since they have no chance of learning themselves or positioning on this T? …
K- The man in the space is deaf and dump through the D of his physicality, so in a way, in the space we are all blind and deaf.

R: So they actually have an advantage .
K- In a way it is easy for them to access their soul.
R: … people who are blind are way more sensitive .. (2:26). main ways we take in information … so being blind is a big advantage … .

K- In a way when we come to the D of the structure of the soul, we hear and see through the D of the soul, the same as what we see as a dream will become a translation of the we don't need the eye to see, as you said we can smell and taste without it, we can understand it without. I used to have a beautiful great grandmother …
she was blind but she could see short distance. .. she knew her grandchildren by their smell. We used to try to cheat and put perfume on. She said, no, this is Mehran I know this smell. (2:28). She used to come to the house where we were born, she gave us a lot of love. We were puzzled how this old lady knew all of us, every grandchild by smell. .. So we don't need the

We become educated to the work of the soul. If I can't see,
you will hear our thoughts, you'll feel our emotions. in the past few days . I have been testing this ..

The new T without D.
Our guys have already lost the system, they don't know where it is in the lab, it flew away, but they understood the principle. (2:30). I only work in the lab with people I trust, because this knowledge needs trust of, so much, so much strength to be able to share, to hold on that it brings the final position of the peace. In a positive way, in a correct way. Negativity in my lab doesn't exist because the progressive development has to be positive for humanity.
Any other question

Q: Is it hemoglobin inside the ball?
K- No. .. they'll start poking, and they'll all get no, no.
Go back to understand the essence of what created hemoglobin. It comes from the interaction of the STM with the interaction of the soul of the physicality of this planet and the soul of the whole structure of the U. Your hemoglobin in the space will have zero value, you'll be lost, if you cannot replicate the D of AA of the man. (2:32). Because hemoglobin is a protein ?? mix.

Q: regarding the space of the ball … so it's more like a dance, 2 interacting going around a shared space?
K- In a way, if you want to think of it.
R: How did the 2 enter into it, visually we see the ball, we don't see another ball on the other side like 2 dancers…
K- No, this is the reason why we showed you that yellow ball, to see that there is nothing outside it to interact with. There is not another magnet or something, or whatever that this interacts with. This is the reason we showed the independently standing system.

R: so wouldn't it be more like a single dancer than 2 interacting ones going around shared center.
K- Is your heart a single dancer, but it beats and works like this. If we release your heart from your chest with all the properties it has without the encasement of the lung, what do you call it, chest, would your heart stay where it is? (2:34). the energy which your heart releases on every beat is not throwing blood into your vein. It's spreading energy right across your body, what man has never considered. We see the heartbeat as one thing which pushes blood, but have you ever stood still to understand that heart every beat, is like hammering on to a .. pan, the vibration and the noise goes through the whole body and transfers energy to every cell. Man is too physical and if you understand that heartbeat which you create, the noise of it, the energy of it, is given to every cell of the body of the man. That's a synchronizing force for every cell. It's not that you feel it in your vein and the doctor holds your hand. You are too physical. The reality is that energy absorbs from the lung, the majority of higher strength by the beat of the heart given to all the cells immediately. What blood carries is a left over information, physical D. Scientist have never realized this, they just looked at it, that's it, it's a heartbeat. But what is the functionality of it? What does it do? How come when you have a drum and I hit on it with a hammer, you hold your ear, you say you received too much energy, it gave you a headache. And you don't consider the heart of the man, ever beat releases so much energy in the body. If you look at it, you absorb the energy from the environment from the lung, charge of the blood, and of a higher order you release it through the heart through the body. That's why the heart and lung are near each other, it's kept in that way. (2:36). release of the energy in a rapid way. But world of science has never understood this. I have a heartbeat, but what happened to the noise you called a heartbeat. What energies are released by that beating of the heart across the body of the man. Never been considered because man is too physical.

R: .. is there a music in the universal environment, in the physical we have sound tones, in the universal is there an equivalent on the field level?
K- Of course, interaction of the fields creates notice. Of course it does, if it is too strong or too uneven, it creates light. When you have a weaker structure like earth and a strong field like from the Sun it creates light. We show in the coming time, I have set a special structure in the lab, we'll show at what point the system will interact with different things in the lab. .. we will show this. where we will see for example, how the system, even if there is a mouse or man running in the lab, or a cat comes in, (2:38). or a child comes in. we see the interaction of their soul with the structure with a peace loving system which is put in. We'll see the light, and I explained to research, that I put so much specifically in this position, that we'll see which one interacts at what level with what. When you are in the U Community they are not all from the same destination, they are from hundreds of different destinations. When your soul interacts, you know their origin, and you can see them in their original shape, color, or whatever their point of origin. it's like in the physical D he is form China, he is from there, now we see the field strengths, and they tell us which part of the U they come from.
Any other question.

Q: if we put 2 more spheres like this one in the same environment what would happen, would they orbit each other?
K- We'll show you next week.
R: .
K- In a way we have created an environment, we have to see the interaction. This is what was discussed in the lab yesterday. (2:40). We have to understand it, to position it, we are developing new materials that were never known before. We are creating systems never known before. ..
but the man wasn't ready, now the man is ready, the time has been set. Now it is time to play, and I enjoy playing in the lab, because it brings new insight, new ways to show the beauty of the play. And you'll see gradually… We will not show you the structure, no way, not open it up, until we get an agreement from the Chinese and Iranian leadership in joint collaboration in development of the new space T.
Any other question , or we done enough damage to human knowledge this week. Or have we increased the man's knowledge n need to digests it. (2:42).

Q; now I know what was going on with us this week, it's you Mr. Keshe. .. I was teaching what you showed, yesterday …
question Jalal
K- We want you to enlighten us, what do you mean you were doing it yesterday?
J: first all week all the KS, we have something from you. .. you visit me in dream and taught me something. a .. and for about 6 weeks I am pushing the KS to learn what you showed today. (2:44). the KS were asking about something, they missed the key .. .

K- Which part?
J: they whole understanding of what you showed >>
K- We are still waiting we don't understand what you are talking about ..
J: ..
K- Any other comments.

Q: Salameea: I have the vision, (2:46). of many formula after the world Arts. in Sanskrit … Om is the sound of the Sun.

WL: I am wondering because you already created a soul. So if we want a soul to manifest as a physical body , what next we need?
K- What do you mean?
WL: .. created a soul in a box .. now if you want to create a creature. what next is needed?
K- that goes on the wisdom and wish of the man. How do you want to see this soul in eh D of physicality? (2:48). very simple .. how do you as human race want to see the soul. Let's put it on the panel, let's ask you KS how would you like to see this soul which we have created that has brought this motion and understanding , and a heartbeat .. How .. /
WL: As some see Creator of as Christ, or Buddha. .. from a concept …. is that what you want to say?
K- Now you explain, you started a discussion now let's talk about it, we created a soul which choose itself in

Or are you scared to see it manifest in physical D which you might not like to see. (2:50).
R: I would try to figure out the criteria to make it go faster or slower .. to control it . check the parameters, push it to what it can do …

K- What about would you like it blond or blue eyes. .. yeah, it's a soul now you can decide. Now you have an option. Let's play the game and see if we can make your dreams come true.
R: make a ball .. toy that they can explain to parents …
(2:52). … is it safe ..
K- Plasmas are always safe. So that question doesn't exist. especially at this level.
Q: I guess you want it to become a mermaid?
K- Yes, I love mermaids, so would you like a mermaid … how would you like it .. color scales .. what beauties, female or male .. what is your wishes. (2:54). and see to what extent we can extend this knowledge.
Q; I prefer to see it as an angel full of light and love, change shape according to peoples imagination.
K- Anybody else want to put their imagination.
Q: I supposed we have to learn to hold pure thoughts. .. (2:56).
K- I come to the point that once you made that wish, you have made that connection, it's another part. Do you check every minute what every cell of your body does. Or you made a wish to go to a sunny place and the whole body gets ready for

Q: ,, when you think of food your mouth waters ..
K- Yeap, like when you think of pizza, you start thinking of what you can put on it, your body gets ready for it. So once you establish this with the soul, then it is embedded in its structure. That's why we need men of peace from this planet to get to that point.
Q: because the men of peace already know .. (2:58). .. be able to record this, to manifest this.
K- What is the wish of KS, you are just observers here, now you have been given a chance to become a creator, at least make a wish of what could be. Would you like it to be someone from outer space that you can see for the first time … because now you have that power, frightening you, but it is the reality which is facing you.
Q: We like to be the man of peace
K- I would like it to be a woman of peace.
Q: Blond and blue eyes,
K- Not really, I like them dark and brown eyes. that is your imagination. or you want it to be a European Christ blue eyes, blond hair. (3:00).
Q: Dean … let its soul decide if it wants to manifest …
K- Not got my answer yet.
Q: It's amazing I said on my heart that this physicality will be a woman, and K just said it will be a woman. (3:02). .. for me it's important to say the truth .. she is Shakti .. this being has to be human, woman, with many faces according to the wish of every living been.. this woman can change the face according to the wish … not only one way, different ways, depends on emotion of person. I would like to see my mother. Mother of Unicose, (3:04). she takes care of loving everything. . she is not alone male also, Yin

and yang. .. interaction between 2 fields, and this interaction creates this beautiful U with plenty of love and peace. If we don't have the peace we will not see her, because she is made from love and peace ..
K- We still don't know your mom, so we are in a dilemma. What man wishes will become tangibility in the physical D.

K- So now I asked you human race .. this is like you want your soul to appear on Planet Zeus or where ever. .. it's your power, this is what you lot can do in the coming time, what would you like to see as a soul, in what D. (3:06).
Q: I want to .. see with eye of soul .. to see with Third Eye. ..
because our world is a Maya, Illusion ..
I would like to see all earth ..

I learn from my mother if I wish it becomes reality … I have to put the intention with pure heart.
Otherwise everything will be Maya.
(3:08).
People need evidence .. (3:10).

If we need this soul to be the proof that something can .. I don't know if it was clear. I speak without thinking it was only from my heart.
Thank you.
R: Does that answer your question K
K- Not really we are still searching how do you want it to look. We don't know her mother. What could it be the mother without the soul, what could it look without the physical tangible be mother to all of us.
Let me explain something interesting, maybe it's time to discuss. By development of T at this point (3:12). we create a new dilemma for man, a new and huge dilemma for man in what is going to be creating, what is D of.
Q: I have to think about this because it is not only my heart…
maybe next week I'll contact divine ..
K- What about we make this entity the soul of peace, from it.
Q: yes
K- Yeah, but are we all peaceful to wish such a thing. Or we still have scores to settle before we become peaceful? We have becoming peaceful, it means closing eyes to a lot of things. (3:14). Are we in that stage of peacefulness?
Q; we have to transmit to the people at the soul level, but also to advocate through any instrument .. art for peace,.. everything for peace. to integrate all areas and to put together with intention. Because I think intention is not enough. We have to accompany our intention with activities, and to have a common wish at all levels …

our law is peaceful .. otherwise not have a human body .. we have to create this soul of peace, (3:16). to make him manifest himself as an instrument. how do you say, it's not coming on my mind right now. it's the only way to make people understand, that only if we are peaceful people we are able to become co-creator, and able to have everything what we want on this earth through our intention …

otherwise we can use this soul, this creation for war, for doing bad things. WE have to be in harmony, .. we have to introduce ethos in all objects on education .. From my mother I learned that people received the knowledge through the third Eye. through the Guru through the STM, and I said when I was small this only mythology. . (3:18). I don't believe you. But now when you show us, I understand and I believe that this is true. Mainly I talk too much and I am not so aware fo your question. I wish to share with you what I have on my heart. I don't know how to take the decision, I need more time for reflection and maybe to talk together with people form UC and other spiritual leaders on this earth, and together we can find a common denominator. I can't take the decision for everybody, I am a common human being, but that it is my right to think to talk but I don't want to take the decision for you, or other people. to consult each other.

R: What if you were given the power right now to be the Creator, what would you create?
Q: If I will be the Creator, but I can be the co-creator. what .
R: In regard to watching that sphere rotating, (3:20). the principle of the U implied in that. and the implication of how we can become a creator in having power, knowledge, and insight and so on, just by that position, and what would you do with it, what would you create, right now. it's more personal then getting together will all of humanity. what do you want, to create? It's is more direct, what is your ultimate example to show the world … what would the ..
we should know what to create with our experiences ..
Q: I would be a superman .. (3:22). a superwoman and to create around me only good and to think, do good. my grandfather always said to me think good, be good, do good, no other words. And he was praying to Shiva, Shakti, Brahman, and all these. and I would like to be as a god-ness of peace, love… because I am a woman, and my society has to be like my family and my house. A woman is always love, children .. husband. good nature. A woman always never want to send the husband, children to the war. A woman is a good educator, she has to wisdom to create the balance, this is a secret world, how we can create the balance at all levels in our body , (3:24). between us and the soul of the planet, Sun center of galaxy, center of U, in this way as K said, everything to have the same beat of love, peace, unity. But what I say is everything abstract, but we have to don't talk in abstract words, we have to be concrete and materialize to give the people right to have a shelter, right to have clean water, environment, … to knowledge, to live in inner peace, between us and our family … because we are part of the totality … to love each other because I love you very much. If you love each other you will never be in conflict or have war, and to put a lot of energy (3:26). in conflict. If we'll put energy in creating abundance for everybody to have infinite what we want. as U is infinite. we have to be in harmony with U ..
You can't touch this energy if you are not a good person, need the ethos which are the common ethos for human beings .

(3:28). This woman .. of peace
We can't have peace if we don't understand how the U is made ..

K- thank you
Q: I talked too much.

K- new hear a different D, mixture of what I call west and east culture. What we strive for to make it all one. The reality is as I just said, a flaw in the man's thinking, the way he has spread this planet, and this has created a lot of new, or what I call, school of thoughts. Most of the things we decide, is our own choice, how we have been brought to accept. And for example, would I like what color to be, what creature to be. Can I create a new creature through soul that represents all the created things on this planet, the bird, the animal, the trees, stone, man , beast. What would this creature would look like that we all accept abundance of peace and love, and what I call, completion. Why does he have to be in the shape of the mother I love, why can't be a collective soul of the humanity, creation on this planet. (3:30). Why don't we step further that represent the soul of the Unicose, that wherever we are, anywhere in the U we see it. This is the first child of the man science, what would this soul represent for all of us. And all those who we call U Community to what extent we are prepared to extend our generosity of acceptance? This is why I sometimes I put these kind of questions, for thinking, not just finding answers. We always used to say, why do we call it, east, what about if the sun rises on the east coast of US, becomes east. Why have we called it line of ocean to call it beginning of sun rises. The sun rises all the time on all rises. .. man of space there is no sun rising. Man lives through the rising of his soul, we have no day and night in the space. It is one continuous life, isn't that the reason why we need to travel with the D of the souls how much beds … pillows are we going to carry on the space travel of thousands of years. On landing in another D look for something to make a pillow out of it or something blanket out of it, to kill more and destroy more environment. This is part of the total teaching, .. new understanding, (3:32). .. how it is going to be. And with what we showed today is a new structure, new way of life. In time man will understand the power of what I call, small video that was shown. Scientists now, we have released the soul of the knowledge around the world, will be enlightened to achieve this. And in a matter of weeks it will be opened to a number of scientists around the world. And then nations will take over, then how far can we connect and correct this. The reality is we created a lockdown for humanity, closing the factories of arms from now on, lockdown to animosities of the past. Who is paying the wages of these people in the factories in the lockdown. Governments, we accept it to cover it, why can't we bring the new D into it.

The essence of the new cycle is abundance of everything mankind needs. So, does this ball already carry that soul for all of us, that's why it has no center. Does it mean we enter a new cycle of knowledge? Which with it we create new understanding. (3:34). Does it mean that in the coming time mankind will become independent of totality, and doe sit mean those who are trying to create the wrong environment for the whole mankind will become subordinate to their own misconduct? We'll see. My wish is very simple, how far will this new T take shape in man's D of understanding. we will not stop developing, sharing knowledge , but this time we work selective that we get the maximum outcome in what we want. We will show to those nations who want to understand the new ways. One of my biggest joys is when I see nobody buys Microsoft. One of my bigger joys is when people do not need injections. When we put the computers into bins, it was something we needed, we had to add to, and we move on. The end of what I call, computer game, literally with this T is over because you don't need anything as it is within the memory bank of the U. These are not dreams because I can show you a lot. Through the STM

we'll reach the man, but now we have the means to show the man we can reach you. Play our game our way. (3:36).
Any other thoughts

Q: .. it's the same question which you brought up to the doctors, all what they believe .. they cannot let go, because a simple science which brings out everything exposes what they have done .. (3:38). .. but if you ask me what I going to do. I will make a light non-tangible in every city, with at plate under it, made by Jalal a car washer, and let them think, how much they will take time to think, there is no difference between me and them in that creation.
K- .. trying in a way to put a fact on the table. Now we have shown we can create a system without physical interaction. .. you see a system running on its own. . repetitive understanding of how it wants to place itself, now .. this picture speaks a thousand words. Now mankind has the capability to see, (3:40). that he can create an object of its own decision, and with it, as a D to decide its structure. that ball is your physicality in the D of your soul which is not tangible. How would you like it to be, and if I change the condition would your soul allow your physicality to dance this way?

Q: I will take the rotating ball of peace and share it with the souls of the people I interact with and they share it as well, and that is how we get real world peace.
Q: I would like to see it as a living essence of some kind …
or could it be a light, or a gaseous .. or on the soul level, as a feeling or presence?

Q: .. can this be a preview of the new soul coming on March 21st, 2021?
K- that soul is unique and will be the change of the course, it will be the change of the game. In so many ways, it could be the beginning of the structure, but in a way, (3:42). we are showing the physical D to its existence. .. we have to accept the totality, the new D. With this little simple video will change the course of humanity in a very rapid way. In the coming weeks we'll show more, .. as we travel with the world governments to bring the change, we'll make them to understand, and they will understand very rapidly, that what tools they have in their hands is obsolete. In so many ways, maybe Corona has been a good thing for humanity to stand still and think, and reassess. Do we go through the next phase of understanding more through the growth of the STM, because we will see, we understand it, we will be enlightened by it. A lot of KS sit, listen, during or after the teaching, people will listen to it in years to come, and it enlightens them in one way or another to expand the knowledge but in essence from now on the KU is open to every man. it's how we'll change the mankind and the rest of the U to become totally one D ?? tourism, (3:44). coexistence in a peaceful manner. Be it all the time man has been on this planet and all the evidences we have, we have never seen forces of U fighting each other in the spaces of this planet, at all within this ground , because they have everything they need, they have achieved point of maturity that they don't need to fight for anything. Now it is time for the man to mature. It will be a very interesting time from now on, as the coming time we bring you .. the emotion of Presence, emotion of Knowledge and every other emotion the man will start understanding more how to become mature.

shall we call it a day.

Q: Chou from China, the difference between the ILS and MS in your paper .. C converts from conductor to
what is the difference between them in the C chain.
K- It's the conductivity according to the emotion and the strength of the emotion, and insulation according to that. If you look at the MS, the ILS, with MS there is a, works different way of emotion.

(3:48). with ILS you put your request in to die at 40 instead of 80.
with MS I want attention, I want to be loved.

Q; you said the
K- yes, there is a difference . (3:50).

C is the link of the communication in every part of the man doesn't matter if emotional or physical side …

C can be used to stop emotion ..

(3:52).

In the D of MS I want to be hugged, loved by the mother.

(3:54). R: thank you
K- I hope we opened a new cycle in understanding and knowledge, a new door for man to enter the U Community in strength and Understanding.
Thank God for sharing the knowledge with humanity .

R: 356KSW ..

K- There is one message to all the groups, Public groups please avoid from mentioning about the cure for medical terminologies that could be Corona, (3:56). We will not host any of the teachings that carry these kind of things. It's the responsibility of the coordinator and those who moderate to make sure that these things are not taught and brought out, people bringing and claiming cure or whatever in any of the teaching.
R: .. people can refer to specific rules on that in Youtube …

End

357th Knowledge Seekers Workshop; December 3, 2020

Murder of Iranian plasma scientist
Murders must stop - pay with soul

ENGLISH TRANSCRIPTION

(:08).

(:32).

Maybe the world leaders of today understand, as of today, murder any scientist, (:38). is payable by the soul of the man who think of it, and those who carry it out. Let us which nation will pay for first. What is interesting we'll see in the ethos of, on the head of the new American administration science. Is this another way to promote science, or is it another way to find the scientists who are elevating, and to murder them. We'll leave that with the new administration in the US, Mr. Biden, and see if he is of the same blood and the same way. We have to realize that during the administration as a VP of US, more wars and killing was incited than other time. My wish is that the ways of the vice president-ship does not carry away to the president-ship under the banner of the science to kill more scientists. The truth hurts, but the reality is paying for it, it will hurt more. Thank you very much , and we wish for the elevation of the soul of this Iranian scientist. As he was carried out by the nations who wanted wars, (:40). ?? misconduct on the others.
I give the platform to any KS who would like to pay their respects to another scientist who was murdered, well planned …
What is the ?? of killing scientist for you KS, and what is it you see your soul will bring, into changing the course ..

R: I was certainly effected . I was shocked that one of the top scientists of not just Iran but Iran. all the countries of the world have to come together (:42).

It is outrageous .. given from my soul to elevate the situation .. (:44).
K- Government murder has to stop ..

(:46). with those who think, have the right to use and develop. One of the cornerstones of stopping the murder of scientists, is the abolishment of the patents, abolishment over control over the knowledge and structures who were set up to do this. There is no falsification, and there is nothing worse then the patent structure registration of today that they block you to share your knowledge, because this way they can use you. The best example of it, as we know is the man who developed the wiper for the front screen of the car. For 20 years he ran and all the companies used his knowledge, but he couldn't get his patent sorted, by the time he did the patent was out, and he got nothing for it. The amount of energy used for him to develop something new, 20 years went into developing and trying to prove he was correct. The way we done, we opened the patent that everyone can

do what they like to add the knowledge to it, and this is what many world leaders, and scientific world heads do not like. Sharing the knowledge on the free basis of the man to add to the knowledge. In any case, the shame goes on those who planned, and the laurel goes on those who get elevated through the soul of their knowledge.

Teaching Starts:

(:48). Today's teaching will bring a different tone into understanding of many things. Last week I showed you a dynamic structure, where it could be seen, we have managed to create a life with a heartbeat, with self-rotation, and with circular rotation around a center point of fields. A further development of this T, as it will be shown in coming weeks will be where we will create the structure of a solar system, where each ball will carry the identity of one planet or 1 moon, and then we allow a number of these balls to rotate at the same time, not only a perpetual rotation on their axis, not only having a heartbeat, but they'll be able to follow MG field of each other to position themselves. .. with this, if you are somebody who does stargazing, you'll see for example, so many planets and solar systems will align in certain times of the year, or in decades. In the process we will see this, and we'll observe how this happens, and with it we can start planning out the map of the U. Trying to understand the position of galaxies, (:50). and what the field strength is in the position, that we can position ourselves in that place, time, and space.

The replication of the number of these objects and we see it, and we see how at a certain point they solidify, they become like a star formation (SF), they become 3 layer hexagonal shape, and in coming days in the teaching we'll release more videos, where you will see not only one object, but a number of objects in creating their own individual heartbeat and central rotation, and what we call environmental rotation will create and give us for the first time a 3-D structure of our solar system to start. This is important to understand, as by gathering this knowledge and being able to make a 3-D plasmatic condition of our solar system, we can pin point exactly where we want to be, and in given time, understanding the strength of the position we can transmute and transport (T&T) ourselves in that position, very much universal GPS but instant transportation and instant what we call development of the space travel. In the structure of the EU which you will see, the create of such a structure, (:52). is possible. If you noticed that when we showed and now you have seen the EU in Linz, is not spherical, it's oval, it the shape of the U, it's the pressurizing of the MG fields, that when mankind is ready to understand the totality, then we will see that all objects in the U are in the shape of the EU. The reason for it has to be understood, and why even the map of the U which was released by NASA some years ago is oval shaped and not spherical, not circle. The reason being that within the center of all these be it the sun, be it the center of the U, they are in motion, they are not fixed in one position. Our solar system is the same. Our sun is in motion in the atmosphere of this galaxy. So it is not stationary to keep the shape of circle, spheres. The pressures of the MG fields of other planets, galaxies, universes, other stars within the galaxy forces you to always be in motion to find your position. So spherical shape of any object is impossibility. Does not exist, (:54). even when we put a spherical core in the center of the flight system, the shape of the M fields of that system is always in what we call, as it is, like an egg. Because one is pushing forward and one end is taking the

pressure of the whole environment, to allow the back pressures of the M fields in the opposite directions motion to be able to keep the front pressure on the system, to be able to stand the MG field forces of the environment of where the object is flying into. When we look at the global map of NASA about our U, in the oval shape as we see, this gives us a very clear indication of our U is in motion in the Unicose. Which means is a clear indication, that this U, as we call it, the same as our solar system is in motion. There is a bigger structure. Rick if you find NASA showing of the U . Then you understand, the same as the Earth, when we look at the structure of the MG field forces of this planet, within the structure of the MG field forces of the sun and the solar system, (:56). we are and we have the same shape. And depending on the position of other stars, other planets, and other moons, we have indentations in these fields. In the fields and structure of the MG field of the planet. In so many ways, what we come to understand, the shape of this, what we call oval shape, with the sun in the center, or the same oval shape with the central black hole of the U, this gives us one indication, Earth and our U are in motion. This is the picture released by NASA from Propulsion Lab.
R: This is our Milky Way Galaxy, gives this kind of shape.
K- Everything has to be, which shows the galaxy and the moon. Do not look at the objects, this is what I asked even from the KS teachers in the KFSSI, start teaching your students about the fields and not about the Gans's. What you look, is that the pressure that the U can take and in the direction of the motion, and why and how we see a resistance on that edges, more objects on the edges because of the conversion of the fields of the Unicose, (:58). on the U, because of the pressures of the boundary fields on the matter. In the coming time when for example, we understand more even with our solar system, we'll see more tiny objects than what we thought, bigger than our moon on the boundary of our solar system, just outside it, then inside it. These come by the conversion of the interaction of the fields. When you look at these blue lines in the middle, as we see indicating the MG fields of a galaxy, a solar system, or a U, these are clearly from interaction of the fields, very much created by the lights, of the daylight on this planet, by interaction of the full field forces of the G and M of both earth and the sun. In the new system of the EU you will walk into, you shall see no light, the light inside the systems will be translucent very much like the light of the U. In the new development in the EU, you will see no light bulbs, you enter into the D of the translucent light of the U, as the systems works on the same way. you will feel the glow of the air, very much without any pumps, but by conversion and transportation of the system. Those of you who will walk into the new EU, (1:00). you feel as you walk into the U. The understanding of the new T is simple, it is understanding that everything has to be on the principle of the U and not manmade. And in that process with the introduction and delivery of the new EU and the T which are developed in it will bring a new D in the life of the man.

The wishes of the soul of the physician will enlighten yours, and within the structure of physicality within the system you receive what is acceptable to you to elevate your STP. the new EU which is getting released, delivery in January, carries, (1:02). and will be upgraded you shall see no, any structure of the present T of computers. You will not see any structure of the lighting, you will not see anything but the replication of the work of the universal system, where your soul elevates to the work of the U, and in it, and with it allows you to enter the true D of the living. As I said, many times, I wonder how many of

you will be strong enough to carry the D of your soul, .. the strength of your soul to elevate the physicality, that in that level if you wish you enter the D of the Creator. The EU which .. will bring revolution in the world of science, .. there shall be no electronic, computers, no past memories for man to carry on with in the D of misconducts, the STP and the D of physicality itself. In so many ways, the EU will bring … (1:04). D of understanding of the STM. .. will be very much the work of the U. In so many ways, the new EU is the life of the man within confinement of his own cage ..
.. will become flight systems, you can fly with your soul to the destination, ..

As I said to my message to the Iranian leadership on Monday, and the Sepah and Iranian government. (1:06). Learn from your previous leaders and those you praised ..

(1:08).
This is the way we'll show you with the EU.
Those world leaders who refuse to enter the EU shows their intentions .. but there are other ways to
In a way, many of you KS have been given the tools to create these conditions, the tool is the strength of your soul. the tool is the strength of the end of animosity and the understanding of many more. The new EU is the addition to the science and T of the man which man will never forget and will develop, and with it we will see the new generation of live devoted to serve not only humanity, but the passengers fo the Unicose. In so many ways, what we see as the new development of the new EU is the delivery of the knowledge fo the U directly into the STM, (1:10). and we shall see how mankind will take into this direction, and into this systems. .. we endeavor to let the first structures of the EU to bring the first changes that with it will the process of the changing through the STM and not the physicality. At the same time understanding the work of the EU … KF has developed a new system that entering and standing in it change the course of any virus, this system is needed in the space and I brought this development forward because fo the situation we have with the viruses across the world today.

We cannot produce and cannot create conditions that we interfere with the world and the structure of the physicality of the man, but we can change the environment of the man, that the physicality is protected. The new knowledge and new system which are to be shown will carry this structure. The problem with many of our KS is when we trusted them they betrayed us. So this time we work with the structure that we don't allow them to do such a thing, to in a way, de-elevate their own soul. How the new T will be opened into the D of the public, (1:12). is something to be decided inside the KF, because there is one fact, the KF is space development organization with human factors, which many of these human's have a weak attitude, and as I call, amplitude in being able to develop themselves, to be elevated to understand the totality. In the new EU we create the condition that the physicality take shape, and the STP will structure itself to a D that mankind will become as one. In a way, through the EU and through many other things which you KS are doing without knowing, we connect and create a global coverage for the change of the STM to be elevated at the same time, and in one move. The teaching and what we have shown last week, .. will have a profound effect on what the KS

teachings will be in the next 3.5 months, and with it we will teach that will change the course of humanity and world leadership. By the time the EU are operational, (1:14). the structure of the world leadership as we know it today will change. You will understand in the coming time what has been our wish and what will be delivered, to deliver the universal peace on this planet. We have brought everything forward by months as the evolution of the science to be transferred to man has moved by the same. In that process, mankind will move faster in understanding in transformation and what we set in transferring the knowledge and the change into March 21st. In so many ways, the world of science and T will take a rapid leap in coming weeks and with it we have to decide within the KF, within the management of the KF, and the 2 HKF, and the UC how we will release this knowledge simultaneously that the world of humanity changes and takes shape in the new era. As I said, I have moved back into the lab to deliver the T, and the HKF and UC members will take position in leadership, in how this T will be dispersed from now on. The T is so radical that will change everything which mankind has achieved up to now, be it from energy, food, space, and every other thing man can imagine. (1:16). As one said, Mr. Keshe when you go into the lab you are a lethal weapon in what you are going to release as knowledge. In so many ways, we are releasing as a gift to those whose souls and physicality was separated by act of violence and terrorism. This is a gift to the soul of our Iranian scientist, and I have never been more determined than in past week to change the course, that no single Iranian nuclear physicist and no scientist around the world will ever be murdered. This is a homage to his soul. The last scientist to be killed by act of terrorism, sponsored by the states. Now you understand how we brought things forward so fast, because no other scientist will be killed by hand of man. This is a gift. As I said, sometimes there is a need for a change, and it takes one spark to bring that change. And the murder of the most precious scientist in Iran has been the trigger. I will release so much knowledge that those who carried out this atrocity walk themselves into what I call the noose of their own. And we shall see. I said, you play, we play. You played your game, now we play our game. When I finish there shall be no king, and no presidents, and no leaders, and all man will be equal. In so many ways, (1:18). since last Friday I speeded up the delivery of the T to make sure that no scientist shall be murdered again by the state of Israel, Belgium and those who they sponsor. We take our revenge through science and T, and knowledge, and not by murder. The most shameful thing is that I have blood in both nations, and why I cannot understand, maybe it is that the punishment not to be as harsh, as ones, others, wished. But the punishment will be as harsh for the heads of these states that they never do such a thing (again). Release of the T in such a vast way, and bringing it forward will be the punishment for those who wanted to stop the elevation of the science and T. I don't take revenge, I elevate the soul of knowledge and with it comes the fear of those who wanted to control and keep. As I said before to Obama's administration, how many people of Africa would you like to see in front of the White House. you have no system to detect and no system to prevent landing and the flight. As we fly the soul and let their physicality manifest themselves in the time and the place. (1:20). There is no alternative accept the man through the unification of his soul and through his conduct. I force mankind into this position as the time, and the promised time has changed and we'll deliver our way, direct the way we see fit with a change of time.
Any questions

Q: Azar: Farsi UC, give my condolences .. (1:22). (1:24) (1:26).
Q: Salameea, don't retaliate .. (1:28). (1:32). she starts to sing G Mantra very loud.
K- Sorry, (mute), we don't allow these things. (1:34).
Next please. Sorry Salameea things we don't allow in KF teachings. I do apologize.
What is interesting, if you can bring Salameea back I want to ask her one question.
Q: Yes.
K- Sorry we don't allow … One question I want to ask you, as this may be responsibility for you and people like you. As you said, you are a Bahai, and your headquarters sits in Tell Aviv, Israel. Why don't you ask your leaders to put a hand of peace between Iran and state of Israel, and bring peace between 2 nations. No organization is well placed then this one. to force peace through unity and
The biggest crime done by the leaders of Bahai faith, not bringing a position of peace between the 2 nations, where one is (1:36). Failure of delivery of the promise is point of destruction of the establishment. Many of you

Q: Yes I will do. .. I will invite leaders to speak with UC. ..
K- All atrocities for past 20 years done on Iranian scientists has been sponsored by that nation. And it has to be sorted through dialog not through murder.
Q: I am not a leader..
K-

(1:38). there is always hope. In so many ways, we are on a verge, same time and same place, 2012 just about the same time as now. We will reach through science the American administration through T which was given freely to all nations to share the knowledge with US and that brought us a point of peace talk.
Does not matter if it fails, it will ignite something which in time will enlighten. This is what I always said, KF no time in its life, and in time to come has to become another organization like what we seen with Christianity, Judaism, Islam and the rest of them. It has to come through the heart of the man, and not through structures of man, which they don't exist, except for the profit of those who endeavor to be profited by it.
Who is next. (1:40).

Q: When will all killing .. stop
K- That is something for humanity to answer as a whole.
Q: My heart goes out to this great plasma scientist.
Q: Can the UN gather around the table ..
K- They are sponsored by these people, how do you want bring them to criminal act. The UN is sponsored by the nations that carry out the atrocities. (1:42). The criminal is always right when you own the court.
R: That was one fo the reasons you created the UC.
K- In a way you have a UC by language, you are not bounded by no nation.

Q: Guatua, .. The killing of scientists must stop .. (1:44).

K- As I said to the Iranian leadership in a very direct way. The Persian Empire was ruling the largest land mass in history of man ..
Once the structure of peace on the order of Ahura Mazda was carried out, nations and leaders themselves gave up their nations to receive the love and protection of the Persian Empire.
(1:46).

(1:48). Q: Mehraneez, In the name of God,, Iranian nation been peace loving nation . It's a country of poetry … These people who kill the scientists .. He was buried in a shrine, (1:50). with all other scientists ..
Everybody knows about him now .. (1:52). Not only in Iran but other countries .. the best way is the peace .. This people are not dead, I assure you, you can ask them for help.
K- where is he buried ..
Q:
K- This is a holy religious position .
Q:
K- In a way it goes back to one place. (1:54) .

Q: (1:56).
K- the position of all scientists.

Q: Dean .. for the first time (1:58). it snowed over Linz.
K- The time of peace comes with the wishes of the man. (2:00). In so many ways, I will return to Tehran very shortly to take the place and replace this scientist. I will take leadership in the world of science in Iran. .. many people will take his place. I will return to Iran to head the space T in plasma and the new T in science. In so many ways, unify the Iranian scientists to endeavor to mankind into space through the understanding of new T. My commitment to humanity is untainted, but we need a place where the people think and work the same and for me returning to Iran to take the leadership in science and T, I paramount. And for this reason we will celebrate many things, collectively as one race, but positioned in Tehran.
The KF through the new T will force the nations of Europe west, to accept nothing but knowledge as the glory for mankind. Not the murder of scientists as a way to stop the development of the human race. (2:02).

Q; to reach out to soul of 7 billion on this planet .. for this scientist … (2:04). .. I hope we achieve this in short span of time.
Q: I want to join you in condolences. (2:06). tout the science of using wireless to kill someone ..

(2:08). (2:10). tired of the double speak .. (2:12).
That only elevation can come from this.

(2:14). Peace to his family.

K- I wonder now we speak of killing scientist and carrying out murder the way we have seen, with this most beautiful scientist of Iran.
I show you one, (photo of Belgium King) this is a scene of extortion and threat to kill, by the Queen and King of Belgium, and the man sitting in the middle is me.
The life of the KF changed in this meeting. (2:16). Give me the T or leave my country or you will be murdered. And it hasn't stopped.

My wish is that there be no king on this planet, especially these 2 and their offspring

(2:18).
You want to see a plan of assassination is right in front of you.
I am ashamed to be in the clothes of a man, because I am ashamed to meet the man like this, they are not human, and it seems to run in the blood of that nation.

.. There shall be no blood of him ever to run a kingship, soon. (2:20). The murder of Iranian scientist was planned by these fingers, these nation .
I am still here, and he is not a king. We have much more power than they do.

(2:22). We lost Fabio because of this man, we put Naomi in Coma because of this man. The only thing we can do is to elevate his soul, that in time the STP will takes its own position.
Any other comment (2:24).

BREAK >>> (2:30).

Teaching Again

Look At Fields Effect - Not Reactors and Gans's

K- as we are becoming man of space … KS have to understand, as I said in the NACT many of you have built all these reactor and understood what I call the SF. (2:32). In the shape, if you understand, each one has made its own Star Formation (SF), as one base, and the 3 bases, of the fields that you need, in different levels to create the manifestation of the fields, to become tangible. In a way, and what I see, what we are trying to get you to understand and further develop, is this, that forget about what we call the physical systems, and concentrate on the fields. This is what the next generation of the work has to be. In a way, that the interaction of the fields has to be considered, and not the motors and reactors.

STM becomes Center - STP Decides if It wants to Manifest or not

This is where the next step in understanding the work of the universal physics come into operation, where we don't look at the tangibility, we look at the field forces effect. **We don't look that we have Gans's, we create a condition of the fields of the U become interactive in the condition and the position that we want**. In a way, as part of the new teaching, (2:34). as you saw in the ball rotating around that imaginary center to show its

position, **that imaginary center has to become the STM. The STP deciding if it wants to put its field strength to manifest for us to see the reactors. Not by building reactors to show the manifestation of a system**.

STM and STP interact like Sun and Earth - how daylight is created

The knowledge of the KS has to become part of **understanding the creation of the fields, absorption of the fields, separation of the fields, the vision of the fields, through the use of the interaction of the fields of the STM and the STP. The way the interaction of the fields of the earth and sun creates the daylight**, and gives different light and different position and angles. The STM and STP has to understand this, that it creates the same.

Different Angles give Different Field Strength and thus Different Matter States

In interaction of different field strength in different angles, it creates different matter condition of the manifestation, if they wish. **The way the fields of the sun, and the earth, in a given angle creates the trees, and in another angle creates the shrubs, and in another angle, in another part of the world**, creates another tree and a different shrubs.

Manifestation State is Condensed Plasma without the matter

So now we understand, (2:36). the knowledge has to extend into the D of fields, that through it, if we wish **we can create the matter state, or manifestation state, without the matter. We know that this exists as we create Gans's which are not in the matter state, but in a condensed plasma condition that we see and absorb and observe them as plasmas in motion**.

Inertia causes Gans to manifest as matter

Only when you bring the 4th state of fields as an Inertia, which you come to touch, then the **Gans manifests itself in the matter state**, before that it is in a state of plasma. It is the way that many of you, many of the KS have to start working without the existence of the matters.

STM sees Object through STP >> Creates in Hand by Emotion

The way I said before, you **put your hand out and you wish gold, you wish an apple, the emotion of the apple is registered within your brain**. The STM through the eye of the man, sees the object and through the D of the STP, creates the apple in the hand of the man. The KS, running of the MaGrav, running of the dynamic motors, running of everything else using matter state has to stop. Now that you have seen the effects of the fields and the interaction of the fields. Create systems, **develop systems that only creates fields and no matter state, and uses no matter state. (2:38). You can use the matter state condition to create fields, and with it to create a soul, that the emotion**

of the man through that soul, through the emotion of the feeling of the STM, that matter state or condition can be created.

Maturity of Man comes when Achieve Transmutation of Elements

In so many ways, in the coming times, as you become more expert, as many KS are gradually going through the phase of understanding the power of the soul. **When you put the picture of the Eiffel Tower in front of you, through the emotion and understanding of the transmutation of the elements of the fields of the existence you can manifest yourself at any position** on the ?? there is no need for a jumbo jet, no need to get a bus ticket. The condition of, as I explained in the teaching of Tuesday, as it is within the writing of the prophet, that the **maturity of the man will come when he can understand and achieve transmutation of the elements**. With the new teaching we have taken the man to the further step in knowledge, that when you understand the transmutation of the fields, which leads to the creation of the elements, or positions and structures, or manifestation.

The totality the KF KS has to move away building and building, and building dynamic reactors and everything to see something happens. You have to understand the interaction of the fields of what you do, then you can stand for man, (2:40). and still achieve a SF in connecting their souls and take flight to the planet, solar system, mountain, and anything else.

Family of 4 - Best flight System Star Formation

I explained something **why a family of 4, a father, mother, a son, and a daughter, is one of the best flight systems, and balanced systems ever created. You have 4 souls which are connected, at source, in creation, in emotion, and now you can use it to create a SF of the travel** to where the 4 souls want to be. Now you understand, it doesn't need a dynamic reactor. It needs the essence of the creation of the fields interaction of the STM to achieve this. Maybe, only mankind become mature when he understands this, where you **exchange the reactors with the STM**, which in essence is a dynamic system itself.

The principle movement and motion, in teaching, is moving you KS from this mayhem and step of, lack of system and dynamic system. **We brought you these for you to be able to confirm existence of the fields. (2:42). We did not bring these for you to become attached to and get bogged down in how you, mixture inside them will do things for physicality**. When you can create the mixtures inside, create the fields, and then you move the systems and see the effects are still existing, then you have moved to the next level of understanding of the T and science.

Fields can be Sustained and Controlled by Emotion of STM

The **next level for the KS is to create environment where the fields can be sustained, and fields can be shown that in the control through the emotion in the essence of the**

STM, man can replicate anything in one position. In the KF research center we have built such a condition to show, where you might call it 3-D, where you might say it's transmutation, but in the new system which we will show in the coming time, we can create the holographic STM, not the physicality of the man, that through that, we create the ?? completion of the physical D, if we need.

What I promised you, to bring the fish tank to show, that tank is already taking shape in the research center in KF. In time and by intuition and understanding of the process by the KS, **then we show the fish tank. And I promise you one thing, you want to see the soul of the Christ, you shall see**. You want to see the soul of all the prophets of the past, (2:44). and present, you shall see. Because it is you then who decides how it will look, and why they will be in that position. As I said, many times, that I will bring the condition that you shall see the soul of the Christ. Then you ask him, how did it feel on the cross. And let him answer.

Interaction of 4 Field Energies and you create the Soul

Creation of interaction of the fields in the D of the existence has to become the next step in the development of T for the KS**. In understanding that if you have 2, you have the interaction of the fields. If you have 3 and 4, then you have the soul and manifestation of the physicality**. In essence of you understand, you can do the same, you can create field energies in a dynamic structure, that you can replicate the structure and the field forces of an atom. **Up to now electrons, protons, and neutrons, and their movement have been theoretical, now if you understand and you can create these energy packs, then you can see the exact movement, positioning, interaction of the fields, (2:46). and how and when you can change them to manifest themselves in a matter state, or the field state energy**.

We have to Feed Ourselves in Space through Absorbing Energies of the Universe

This part of the T, to be able to **understand the interaction of the fields forces is important to you, because it is the way you absorb energies from the U that you will feed yourself**. The reason we start teaching and elevate this side of the T, is that when we take you into space, as we do not bring you food, and medicine, it is you who is responsible to feed yourself, through understanding how to absorb, and how to feed. In a way, up to now you went to the supermarket to pickup a cheese to have the Ca, and picking a banana to have something else, and to have meat to have something else, that when you eat the combination your body receives the totality of the energies and the fields that it can survive the daily cycle. Now you go to the universal supermarket where you choose which fields you need, and the body needs for its existence. We have changed your super hybrid market where you become objects to absorb the energies, be it live or dead, or killing something to receive it, to the exchange of the supermarket in the Unicose.

KF Teachers have to start teaching the Transfer of Field Energies

This is where we are pushing you, .. encouraging you, this is where we are trying to bring mankind. This is where the teaching is pushing you, .. where I want the KS, especially the teachers in the KFSSI, and those of you who teach in workshops. (2:48). **Those of you who teach across this planet to the people who are interested to understand the work of the Creator, to show that the Creator works through the energy, and transfer of the fields, and not to the matter state**. Now you understand, and this is what you have to push, and to elevate, and to bring into the understanding of the process of the new cycle.

So you got to realize **how you can use your soul to tap into the universal energy that it becomes the energies that your body needs, without taking more than what you need, as your body will bring the field balance, even bring love**. You can receive as much as you like, as you wish, as long as it is not poisonous. This is part of what we brought, all these Gans's. We didn't bring the Gans's for you to mix and see what you can fly or whatever. We gave and taught you the Gans's to understand the packages of energy and how by looking at them, and how by tapping into them you can use the energy and the wishes to become the creator, or the mover of you as an energy pack and not in a matter state.

This is what the KS in the coming weeks have to understand, and start developing in a very rapid way, (2:50). that in the process of the creation, in the process of developing these T, you become wise into what you need. As I said, to a KS, give me time, **I will bring the soul of those who carried out this atrocity last Friday to the position of the murder, and then they will bring their physicality to it.** Then we know who has done it, and who was carried away. As I said, to the Iranian government officials, do not lash out at the nationals and the nation, as we will kill many fathers and sons, that there is no need for, but leave it to the understanding of the new knowledge. We'll walk the soul of those who carried, who ordered into the position, that they will confess and we shall see how it was done. We don't use science and T to kill another scientist, we use the Soul of the Creator, understanding the work of the soul to bring those to justice to tell us. As I said, when one shoots oneself, it is him who has to pay. When one shoots other it becomes a murder. In the process of understanding, as I promised I will bring the soul of the Christ for those who are the believers in his path to see. I shall bring the soul of those who carried this atrocity to the point with that their soul will manifest their physicality. Then there will be no accusation, and who and where, and how it was done, **even from the offices of those who planned it, thousands of kilometers away, the soul of those leaders who planned this, (2:52). will be present at the same time**. Now you understand what is the wish, what is the process of understanding, what is to become part of the new knowledge and understanding. There is no more than the self confessions, **when the STM brings man to the position of his misconduct through the STP. There shall be no judge or courts, as their own STP will judge their conduct**. In a way, we choose to live correct, we choose to take correct amount of what we need, and no more, to confirm our existence in the position and in the D as we like.

In so many ways, you have to start working in understanding of the field transfer and not matter transfer, and leave the process of the change to mankind. In a way, the teachers of

the KFSSI, those of you who have been teaching how to make MaGrav, how to create condition, try now to teach the new cycle that how to achieve the position. It is in a way to move the whole of the KF, (2:54). to its next step of natural process of understanding and development. In the process of becoming and understanding of the creation. You have no choice as now, we have taken you and your knowledge to the next step. And in a way, you have to come, if you come this far with us, you have to take the last step to mature your soul and your knowledge to the totality, and not leave the whole, half way cooked. In a way, you have to come to understand what has been put on the table of knowledge.

The knowledge was not to create a new energy system. The whole knowledge was not to create a MaGrav system, or another patch. **It was to show you to gain trust in the work, that then we can work without physicality. Try to understand the process of interaction of your soul with your STP**. Try to go through the barrier of needing confirmation in physicality to trust in what you do. Try to understand the process of the conversion of the energies. **Try to see that if I can create conditions to absorb energies which I need to survive, (2:56). without actually eating.** Then sit down and repeat the test which was done before, as you remember, you put an orange and a cup, and you drank from the cup and you tasted the orange. **Now you become the cup, put the orange in front of you, see and feel if you can tap into the resources of the STM and not the STP, and taste to take the energy from the orange that with it, you can transfer it to the STP that you can feel every taste and energy of that orange in every cell of your body, then you start getting prepared to become the man of Universe**. Where the physicality of the matter become nonexistence.

It will take time for many of you to learn this phase, but we have started the process. In **the next 4 months we'll push for the development that you gain that trust that you can attain physical D in the reality, in the process of transfer of the energy**. It will come that when you took this energy from the orange within your soul, then through understanding of its property, if you can replicate another orange on the same table. Then you understand the way we carry the energies of love and care become the energy essence of the creation. The whole process of the teaching from now on will go in that way.

The **development of the new souls, (2:58). that understand the process of the conversion of matter to energy and fields, and emotion, and transfer of matter and emotional energy to the matter state manifestation**, if they wish so. The place, position, and time will be the choice of the creator and absorber of the fields. In a way we try to get the KS to understand that they have **the interaction of the 2 most important entities, one of the STM and STP to create and transfer any fields across the U**, be it by position, or by its strength. And this is one of the reasons we introduced the EU. Not by the position of curing or helping, or whatever, but to enhance the power of the STM that with it, man will learn how to survive the span of U without the food, medicine and without killing.

As I said, in past few days, I will bring the soul of the Iranian scientist to ?? admonish the soul of those who tried to stop the science. **You took the physicality, I will return the soul. It's the soul which made that physicality**. Do not be shocked when he stands in front of you. And not in one, but in multitudes. (3:00). Then it has to be when the man understand the position and the time, is the wish of the Creator. Try to start now that you have seen the fields, do not go for the Gans of the orange itself, but go for the energies of the Gans itself. This is much easier for T&T into energy level. It has already been done. **Try to taste the orange by looking at the cup and feeling it, to see if you taste it, if you take the energy of it. And then repeat that with your lover**, see if she can taste your love and your care. Then you understand the process, then you'll see the truth, and nothing is hidden, does she really love you, or is it a pretense to be there. Then the maturity of the time comes when you can keep silent and respect what you know.

As I said, **when it comes to space, you will not know what is in front of you, except understanding the emotion, because like the STM, it is nothing but energy fields**. Now you will see what I teach today, what I explained today is what has been taught over past 20 years. Now we extend, because now you understand the process you have been through, the understanding of the fields and energies. (3:02). It's not working to make things, it's understanding the field transfers to find the freedom of the soul, irrespective of the time, position, and the strength. In the coming weeks we will show you new T, but this will become much easier to understand that you find a medium, that it becomes easier to transfer. We gave you the orange in the matter state so hard, we give you the Gans in the essence of the fields of the orange, which is at the strength of your soul, and you can tap into it, and gradually you learn. Teach, not by illusion, but by the knowledge and science and T, how you can tap into the energy of the Gans in the cup, that with it you can feel, taste what is in the cup. **Could be the Cup of the STM, is it love or deception, and which one do you accept. But as I said, be courteous not to utter the word, "I see lies." This is how in the U Community you decide an entity in front of you wants to eat you, or wants to make love.** Is it there by making everything available, that you can enjoy the existence, and that is what we call the love making in the D of the U. Give the totality, the way you receive, and you receive and achieve the fulfillment of the desire. The KS path to the final destination is made. It is you who has to find it and to be able to travel the path to reach the ultimate goal, then in that position, (3:04). once you arrive, if your wish is to feel the essence of the Creator, what you call God, it will be available to you, if you reach the point of maturity of understanding.

In so many ways, I explained in so many different scientific languages to get you to the same point, and now it is time to reach that point. As I said, it is the responsibility of the KS teachers, and those who you teach and spread the knowledge, for you to understand the work of the fields and not the matter state, try to confirm the existence. **Let people see with the eye of the STM, not with the eye of the physicality of the man. Let them feel the knowledge, the sense of creation, not by seeing to believing, but in sensing, and feeling the emotion, they do not need to see. Try in simple steps, in simple methods**, you showed them how to make Gans's and patches, now show them to put the cup there, see what they can absorb, don't tell them I am transferred the energy of the apple in that one, of the orange in this one. You just put the cup and tell them, tell me

what you feel, and do that with yourself, then you don't need to kill to feed. You don't need to destroy to have. But is given you, as you ask for and it is given. This is how the work of the U is. When you ask and you are given, it's for you to use it, to elevate your soul and the soul of the others. And that ?? can be used now. Now many of you need to work. Need to go back to work. (3:06) Need to understand the work of how to go back to work. In the coming weeks I teach you how simply you transfer the essence of the energy and the emotion of the orange into the water. Many of you have tried but you cannot transmute and transport it, because you missed one fundamental point. Many of you were so eager to do it that you forgot what you did. Then at the same time what you need to re-manifest the entity.
Any questions?

Q: … (3:08). We are sorry for the loss with the Iranian scientist. . the pandemic is not yet under control here in Brazil. . . in my understanding, What is causing this virus, what is called a virus is actually radiation .. like 5G, antenna or intentional and control humanity of seeing patients (3:10). who arrive in hospital are actually contaminated with radiation. ..
Would it be easier for everyone to understand the function and effectiveness of the plasma water. that the virus is really radiation and plasma water is neutralizer of radiation. (3:12).
R: We have to put a disclaimer in here because that is one of the topics Youtube does not allow to be discussed, without putting a balance that it goes the WHO, they do not believe in 5G .. they will take down this video ..
We can discuss it , but we have to put a disclaimer at this moment .
K- Yes, the problem is in answering the question is very simple. Viruses as we speak in the space T exist right across the U, it is not limited to a name or a place. Mankind in the space will receive only viruses which can attack the AA of the man, (3:14). And this virus, what we call it, is additional energy packs, which can overwhelm the cells of energy packs we call cells. The structure of the viruses is so deep that mankind has not even come to understand it. And in the depth of the U when we get effected by these packs of energy, they can even attach themselves to the energy pack, what we call the STM, because every entity has the ability to attract, has a G field forces, and every energy, and energy pack we call a plasma, has the capability to hold onto, to be part of, to be in fact, in collective interaction in totality of the fields of the U. We call it a virus, and in the depth of the space there is no organization to control, and to decide. It is us who will decide if we need this pack of energy or we need a space for the energy to move. In this process we have be able to give and take, to be able to understand and create, to be able to transfer fields the energy what we call the virus. This position as we see is the beginning of the change in understanding of the evolution of the science. In the coming time we will change, (3:16). as we'll see the new knowledge with the new understanding will emerge. As I said, the gagging order to speak has become international. But the beauty of it is that in 10 km above this planet, there is no gagging order, that you cannot speak. But the interesting point will be, if we can elevate the soul of those who bring this kind of things to control that they can do what they like. .. my wish is the elevation of the

head of WHO his family, the same as those who created the mayhem in the murder of a scientist. The same goes with Mr. Gates, his family, and his children. In so many ways, more people will suffer because of it, one way or the other, if the governments could understand what they do, the world leaders and presidents, would not take action as they have done to their bank accounts. We shall see. It is one of the pleasures that we heard that the government and the state of administration of the sate of Austria has left it free to its citizens to decide, if they want to take that path or not. And if the status quo stays the same with all the nations as Austria, then we decide, as long as the pressures are not there, we can have the position and the test to be done that we can get on flights or leave the country. In that case, it will be better for the KS faster to learn, (3:18) the transmutation and transportation fo the energies that they can be in any position at any time without taking a flight. T and T of the energies of the STM. Then Washington or Beijing in and out as it suits the time and the place. I hope I answered you in a very different .. but full understanding of what you can .. Extend the knowledge very rapidly then no nation will be a threat to you, doesn't matter what the virus name is.

Any other question. (3:20).

Q: … the fields you were speaking about.. only through the soul we can understand the field structure .. or is there a mechanical measure that we can see physically?
K- You have to move from physical feeling to emotional feeling, and with what you see and what changes you see.

(3:22).
Q: So the emotions you speak about .. through our mind, there is a connection between our physical and our mind?
K- .. of course there is.
Q: Concerning fields creation, would it be enough to early non-tangible to H (3:24).
K- not really
Q:
(3:26).
If I sit with myself and gradually think how the neutron, electrons, .. would it be enough to understand the way the fields work so I can work with them?
K- What is your intention
Q: interactive to know what we are doing

K-
(3:28).

K- Yeah, start with the smaller .. (3:30).

(3:32).

Q: Salameea, .. (3:34). about this video about the sun feeding me.
>>> I didn't understand my mission. Now he said, you mission is to teach them to feed themselves (3:36).

I can live without taking physical food … I make meditation, dance, enjoy my soul .. (3:38). my sister says come and sing and I'll clean your house, I fell energized by you. .. everything in this world is fields .. everything is light, it's not dark .. (3:40).
K- any other comments .

Q: Stephanie, (3:42).

K- the church where the Italians hanged the man who said the earth is not the center of U, nothing has changed.

(2:44).
She placed mint near the Gans of Cup 1 and accidentally tasted the mint in the Gans water. but could not repeat it.

(3:50).

K- As I said, did you do it sub-consciously. Was there a Gans water in the cup
Q: (3:52).

K- thank you very much
Any other question (3:54).

A: I think I know what happened .. (3:56). (3:58).

K- I hope today was a change in position and understanding that from now on we value our scientists the same as we value our prophets. As we heard from our Iranian colleagues, the nation of Iran for the first time buries along side of prophets .
As we carry our wishes to the UC we end up killing scientists .
it's a loss for the whole humanity (4:00).
We have to see to what extent we can elevate the soul of the whole of humanity to respect the scientists as those who change the course of humanity for better. At the same time if the science is used by the leader to the benefit of their ruling that science will turn out to be for the benefit of humanity.

I hope we start to the path in teaching how you can start feeding yourself in the U, and how you start understanding how you can tap into universal energy that become the source of your food, energy anywhere in the span of Unicose.

Thanks you

R: 357 KSW
END

358th Knowledge Seekers Workshop; December 10, 2020

ENGLISH TRANSCRIPTION

(:06). in past weeks .. years we have learned maybe a little bit, a touch on the surface of the KU. The world of creation on the level of matter works and how mankind in time will learn more about its own position, place, and own strength in the work of the creation. The knowledge of man is more or less like every other race in the U, is accumulation of the learning of others adding to the knowledge. At the same time .. villagge by village, and now with the new method of communication open to man he has learned to share knowledge across this planet, but still in the dimension (D) of the physical life. (:08). In this process mankind has entered a new D to start sharing knowledge beyond the boundaries of this planet. Mankind is learning to share K not only with .. but with the citizens of the U, mankind needs to grow, not only mentally but psychologically in way to understand the work of his life not depending on the physical condition and physical matter, working on a condition through the universal energies that mankind can absorb to live. In the travels of the man in the U, mankind cannot take trees, plants, and animals to eat and slaughter and try to sustain life. For this purpose we have start teaching that man become independent of physical resources but like the rest of the .. (:10). For mankind to learn to use the field forces of the U, and in interaction and accumulation of ?? to become the user of these for his cycle of travel in the depth of the U. Many years .. of the man's lives in spent in worrying how he will survive the next day, what does he need to absorb from the physical D of this planet to exist one more day, where the water comes from, where would his O , air he breaths, his food come from, where heat, and warmth for the security of his life come from? These are the shortcomings of the life of the man in the D of physicality. Where mankind can learn to live in the D of the U, where the energies of the U have converted to become that air, plant, animal, that heat that he needs to live his physical D. The teaching of the KF in past years has been to bring mankind rapidly to this level, to learn to live like most of the living entities in the U, using the universal energy, which means what is available as fields in the D of existence in the D of time, space, and the place where he will be. In the past .. months we have seen evolution, (:12). at a rapid changes in the cycle of mankind which he never knew. You used to be locked down in the castles to protect ourselves from the enemies, and now after centuries we are locked down in our cities with the open doors, but we have made castles, by the governments, and the forces that mankind cannot move. In a short time, as the farms have not been farmed as they have been forced to do it, the animals will not be there because of the conditions created, gradually in next times to come, there will be a shortage fo food, of clean water, there will be gradually a condition, who can afford these kind of lives, we use to have disasters, calamities .. but this time man has made his own volcanic eruption in the course of introducing, enforcing fields, and energies, that has disturbed the cycle of life. What we see from 12 months ago to today, the whole structure

of this planet has changed. The way we used to live and think has changes. We could stay for 2 weeks for vacation ..
We see in this process families will run out of food, because they will not be available to afford to pay, (:14). they have not worked, governments will run out of money trying to support this high scale very few nations have the reserves to withstand long-term process. Then it comes on the process who can be useful to society can have the right to live, mainly through the process of food, health, and being able to pay and we only pay those who serve us. One of the biggest problems to go through the process of this virus, which has been introduced in any shape of form, and is to reality and the truth, we do not know how it has a spread one planet in less than one day. The records show that the virus was spread simultaneously within a very short time right across the planet. And it was detected according to the strength where it was enhanced. 29th of December last year, we saw it in China, suddenly it popped up in Iran, and then the whole planet is in the grip of it. The data shows it was with us last October, the data shows the initial cycle was seen in September. Now we are heading for another few after another few food cannot be supplied to hunger. (:16). We see the cycle of change needs to come in that mankind is ready for that eventuality, and maybe to change the course before that eventuality arrives. Last year on the 24th of January, I gave a gift to humanity, One Cup One Life, to save the life of the man from the process of the overcoming the virus, what we call, that we could survive it. We have saved millions of lives in China we started. In Iran the progress is still the same, people trying to help, all over the Europe KS have gone to that step …

One Life, One Cup, One Food

Now 12 months later we come to, where does the food come from. Today for the first time we teach you the principle of One Life, One Cup, One Food, which means from today you can feed yourself irrespective of any condition on this planet and beyond. Today's teaching is to teach man how to feed himself on the levels of the energies of the U, understanding the process of life, how in the world of creation in one way or another life can be sustained. I try to very clear to teaching you how to serve, to save your life in the depth of the space, and in time it is your responsibility, (:18). to translate it in the physical D of the man. In the process of the U we do not feed the physicality, we feed the STM, that through it, it feeds the STP, that it feeds the physical D of any position in time and space in the U. One of the most important points humanity has forgotten is the fact that the man has always been a passenger of the U. We have always been travelers. As We are traveling at million mph in the galaxy and the U.

Releases energies viruses the body can't handle ..

(:20).

We will receive new energies called new viruses. How do we survive these ..

but we have a structure called the STM which can protect

(:22).
If mankind understands the teaching of today, mankind becomes independent of the food supply in a matter state from today on. We teach you the principle, it's for you to decipher,, to understand, to teach rapidly across the world. The way you taught mankind the Cup of Life (CL),
If mankind understands the teaching of today, thousands of years will be a second in the life of the STM, (:24). in the D of the U. In so many ways, what we need to understand, is to go back to the beginning of the teachings , understand and analyze every step of it. I prepared you for this months ago by teaching you the structure, the 5 Cups. The 5 Cups were set for you to understand the physical energies of your planet, then the Inertia, then the soul, then the STP, and the end the physical D. There is no life from the point of the MG field of the planet in the D of physicality, until you hit the structure of the physical life. All is fields, MG field of the Earth is a field transfer of a higher order. Inertia is another field transfer of the order, then the STM ..,, then the STP is another field of the order, and then when the order reaches equal to the MG field Inertia, which is the physical soul of the planet, with the physical soul of the man, man manifests himself in the physical D. So in reality, if we can feed the man in any process from the MG field of the planet to its physical manifestation, man can survive, does not need the physicality to manifest itself to feed. He can feed the physicality, through the STP or through the STM, or through the soul of the planet. this is one of the reasons, (:26). we see so much killing on this planet, as the soul of planet through its combination of the fields, and the position, and the diversity of the life, has not managed to feed the STM, that the man in physical structure becomes the same as the rest of the passengers of the U, where he can tap into the field of the
(video flashes, and ..)
where this virus has been a blessing for you to understand, it's time to move, as mankind never moves until he is put in a corner and is pushed to. Or is mankind ready to accept in one stroke , in one drawing of the pen, to join the U Community at least in the level of not consuming, not to kill, not to destroy another life to guarantee his life, guarantee the extension of the survival of the physical D. What needs to be, 2 points, if add to the strength of the STP would you change the D of the physical life, if you increase and add the D of the STM would the process of the manifestation of life in the D of the physicality move further that the life does not need to manifest in the physical D in the time, the place, the space, what we call planet Earth or anywhere else in the U. .. by changing the strength of the STM, or of STP, (:28). we dictate the point of manifestation of the man, in the physical D. In the teaching of today, from now on till the 21st of March, when the new cycle of life starts on this planet, mankind has to rapidly develop the understanding of life. I take away from those who do not, and will not follow the procedures as they will be deprived of the knowledge through their own soul and their own misconducts. Mankind has to take this step. This teaching of today would have been introduced a long time ago, but humanity was not ready for it. Mankind was not ready for it… Move to the fields, don't look at the physical D.
Look at the fields of the U that you can tap into, In the process fo One Cup One Life, for the first time we let you feel directly the energies within the structures of the U. We made within the structure of the Cup an independent U, that you could tap into and take energy from. We extended it to Cup 2, we extended it to the 5 Cups, and the existence of the 5

Cups was important for you to understand the way this structure works, the way fields are transferred. When I put the structure of the 5 Cups together for you, was not for you to stack it up, it was for you to understand the field flows within the U. (:30). But as usual mankind went for the physical structure.

In this process mankind became more entangled in how things become involved. In this process we shared more and more knowledge….

but in fact what we were trying to teach you all the time was, how do the fields flow in this structure. What is the interaction of the fields flow between this (Cup 2) and this (Cup 3) or with this and this. But as usual mankind became too entangled in seeing what is produced in the cup. The reason we introduced this was for you to become familiar with the field flows within the structure. We showed you how to produce sets, (:32). for vertical people, then solid, and liquids and gases. None of you have followed the process for the gases as your knowledge was not gathered to be, even though it was explained. beyond the gases you would have reached the structure of the fields in the D of the fields of the U. You were happy just to see this … So we stopped until you understood, and some misguided people took everything with it to confirm their meager existence. But in reality the process of the U was the cornerstone of this teaching of all these 5 Cups to see how the fields flow, not only in, but how they interact, to see how the fields will circle, and gather from the U into the system. But as usual, you all missed it …

(:34). in the air as a vertical people, then we understood the structure .

In the cycle of man we position the soul on the top where it receives more fields from the U, due to the dynamic structure of his soul and his physicality. Where with the plants, the soul is embedded with the interaction of the fields of the earth, and it is more limited in the structure, in motion of fields, as G fields of the planet has a direct say in what it fields can absorb. It's a compromise, you feed me, I stick with you and get something for you. or with the man, "I walk and I give back when I am ready." In so many ways, at the point of death, we give what we collected, back in the physical D. This is why the trees and plants can last for centuries, as they do not make the compromise, as they have made themselves prisoners to the MG fields of this planet. They already accepted the lockdown, from the point of inception. So we see trees lasting 500 years, or 1 or 2000 years. (:36). Where man moves and does not want to grieve it, and moves his soul till the energies of the soul, and the fields of the planet break away, and man become the traveler of space in the D of the STM, and becomes free from the shackles of the planet. Now once we have shackled ourselves to this planet, it comes the point of, we are vulnerable, we are at the mercy of its movement through its D of its fields, and does not matter where we run, it has encapsulated us in its forces, and we abide by his rules. Today's teaching frees man from the shackles of this planet, and makes man open but still shackled to the central field force of the central line of the U. Then man changes one prison for another .. and in time will join One Nation of the Unicose. Each step needs understanding, total understanding from now on at the level of the STM ..
(:38).

If you look at the brain of the man and a solar system there is no difference. The solar system has a center and the fields of it dictates what planet and what things will be within it. The STM in the structure of the brain does the same thing. When in interaction of what we call Earth here or Mars, we call here (brain) emotion of laughter or joy, or center where memories are carried. But we keep a dynamic structure within the structure of the Gans's of the matters, and so we don't need billions of kilometers of free space. We do the same job within a few cm with the vicinity of what we call, the Gans's of the structure of the brain of the man. In fact, when you look at the structure of the brain and the solar system there is no difference. The only difference we see, (:40). is that the man has committed himself to shackles of this planet, so it pulls and in that process, creates the shape of the man, but our own solar system in a hidden way we don't see has the same contour, the hat and the tail, it shackles itself to its galaxy. the same which happens to the galaxy which shackles itself to its U, and the Unicose does directly to the Creator fo the fields. What we call the Creator, the God, is the one, the point where the source of the energies, not only goes to, but comes from too. And in extension reaches the man. We are a branch of branch … that it leads to creation of our physicality and soul. .. as our soul is free in the D of interaction, now it has to learn how to tap, like the stars and the galaxies into the universal original fields. Then life in the D of tangibility of physicality is irrelevant, as you decide what energies you tap into, and what energies you are prepared to give to the others that guarantees the survival of the center point, your star, your soul. (:42). In the teachings of past years, that's all we are taking you to, as I said many times in past teaching. It's the quantity which dictates your existence, the smaller amount you become an electron, the bigger amount fo the same you become a proton, and a bigger amount of it you become STM, > solar system and Sun, it's the scale of magnitude of being able to hold to, but in origin and essence all starts from the same strength, that it pins down everything together. We are not connected in the D of what we call MG field by this but in fact, man has always been shackled by this. .. what we have not understood has been the point of dismay and shorter life on this physical D, this MaGrav, we always looked at this level (outer rings of spiral) , but at this has a connection to the center. And so in fact, we always have to look where we have been pinned, not where we release. even though the point of release is shackled to the center. These points are fundamental to be understood if the man of the Earth would like to live and survive in the U, from now on, once you understand the process, (:44).

(:48).

We have seen people in China for weeks and months and years have managed to sustain. We have seen a number of a handful of people across the planet have managed to understand in absorbing the fields of the U and living without. (:50). But now we teach collectively, but step by step from today we take you to that point, then through that we teach you the process fo creation for you to tap into universal energy. What we call U is collective fields which leads to creation of totality.

In so many ways, if you go back to all the teachings past 7 years, as we say, .. it 7 years to build a solid structure. When they build a mosque or church, a good church it takes 7 years to complete that it gathers and settles in the totality. And this year is the 7th year of

the KF in teaching. And now we settle for mankind to understand the completion of the cycle. Go back to every word and every essence of the teaching, understand step by step of it, not just copycat it. understand how and the way you Nano coat, why you Nano coat, the way you N coat, the reasons the steps have put in there for you to do. understand the process of how you create a perfect Gans. (:52). Then understand how to interact this perfect Gans that you create a perfect supply of energies, that it becomes your food. And then take the reactors away, and understand how you can feed yourself.

Star Formation

If you remember .. in a very touching way I explained about the 4 cores, where the Star Formation (SF) was done. Now .. look at the fields which they create, the interaction with each other, and in totality with one share point. SF is the key to the life in the U, where you can give and you can take. This is one of the ways we have shown in the structure of the life of the man in a hidden way. As a father, mother, son, daughter. if the mankind understands this, mankind has walked half of the way to becoming the passengers of the U. If 4 souls can balance and share fields in the total understanding of the love of a father, and a mother, (:54). a son and a daughter, the family as a whole can create the position of self feeding, self space condition. .. we work with the fields and not with the matter state. Mankind has to go through this process to understand.
the 5th if the soul of the totality and the created and this is why we created 5 Cups. As one cannot exist without the other, and one cannot be developed without the other. Go back ..

(:56). the horizontal people, human race, we see the position of the soul ..

(:58).

(1:00).
We brought it close this is why the fields have to go somewhere. This is why plants become vertical. In the life of the man we put a cap, as the skull of the man, and the body goes down toward the gravity. In the creation of the vertical the skull is the gravitational field of the planet which forces vertical combination of the structure. that is why the skull … not necessarily just the physical structure but field forces which contain the brain of the horizontal people dictates this position and the field force. Now we understand why we go down to the earth, and the vertical people go up ..

this way they connect to the line of the U. Now we can understand the next step, in the condition of the life, (1:02). in the U. We take the D and the direction in respect to each individual condition. In the process we unravel the secrets of the creation in feeding the man. One cup of energy, not …

(1:04).

(1:06).

(1:10).

Shows the SF of the structure you have already worked within. The reality and condition is how you connect these fields forces of these Cups together that it leads to creation fo the fields that mankind can live within its environment. (1:12). How you connect what to where and how will give you the energy field forces that within this you will survive. In so many ways, understanding fo the totality sits with in the structure of feeding the STM. That through the structure of the STM you feed the physicality. You have a life which depends on all structure.

(1:14).
The clue is very simple, all , all, connect to one point. In a way now you understand how through the STM you feed the STP. As the life of the man on this planet has become part of this structure. in the fact we don't put the structure of the liquid and air here.

(1:16).

This is the Cup of Food, the cup of energy tapped into the U.
(1:18).
as your soul will tap in and feed the STP and the physical D of the man. Be wise in choosing the elements of your cup, because how you will choose these will give you the taste and the energy and the joy of what your soul will be happy with through the D of connection with the 2 souls. Where you do not need to drink to receive the energy but being within the environment of it, the energy will be delivered. In the past weeks, I completely and continuously explained to all KS when you make Gans, when you have Gans in your position, do not ignore AA on the top. (1:20). as it is the physical connection between this planet and its environment. In a short time as you get educated into

There shall be no element in any of these, all shall be the same. But first you have to see how you can walk.
In next 4 months you shall have no matter element in these cups, but you have to create the condition in these cups but no cup. with the field forces of the U. That point will reach on the pivotal point on 21st of March to come, by the creation of new cycle of knowledge for the creation of humanity and the U, where both the soul and physicality will be taught to live, and be able to transmute between the fields of the U, between the matter state confirmation of the physical presence, or the manifestation of the physical presence of the energies, field forces of their soul, without manifestation of the physicality. This is why in most of the teaching even when I said, and we choose the members of the UC, (1:22). I said, mankind will know the members of the UC by their light ..
This is the secret of the knowledge, the cornerstone of the knowledge of the U, we'll teach you how to travel .
how to embed this in the STP which carries the STM anywhere in the U. The clarity

you will take the knowledge according to your intellect in that process some of you will see the light of the Creator, as the purity of the conduct will reach that point. .. you shall see me, as I am you. In so many ways, (1:24). mankind will mature to the next step in maturity of understanding the work of the U. And there on would the man need to heat himself, shelter himself, build the cities to abuse the other souls, or would the man become the free passengers of the U. that through the travel D of the STM , will communicate in purity of heart. No deception and no lies. When I ask a question, I see the soul. When the physicality is still weak and wants to hide, but from now on, shall be no point of hiding. Even the physicality lies, the STM has to correct it. The day of judgment. changes to the moment of judgment, and gradually mankind learns. There shall be no judges and no court as the mankind will judge himself in the court in comparison of himself, in respect to the rest of creation. Then when you reach that point you reach the level of understanding of the prophet of God on this planet. As you receive the same knowledge in purity and totality as they did in the point of their birth point (1:26). Learn how to set these cups up, that through it you shall feed yourself across the U. But again do not get memorized by the cups and the rack, understand the concept, the knowledge, the field forces and throw away the cups. In so many ways, maybe you will understand one point, why in the process of the creation, the teaching of the man, we always created the condition of the son and the father, where the father is the soul of the Creator, and the son is the son of the soul of the . where the light of the Creator shine through the son, the STM. In so many ways, the knowledge is so clear that it has puzzled us how mankind has got entangled in understanding of a son, not as a son, but as a light, not as an individual. In so many ways, mankind has got entrapped again in the D, (1:28). of his own physical understanding. I made man in the image of myself, as I made my son in the image fo myself. In so many ways, you will understand, the STP itself is another D in M field strength in proportion to the STM. As it is the Sun to Earth, as is the Creator to the son. Try to understand the progressive development of the T, understanding the interaction of the field forces, and with it, learn as of today One Cup One Life One Food, that it feeds you across the U, this is the Cup of Universe. One Cup One Life across the span of the U, is what we enter mankind into. With it the balance of the field forces will create the D of understanding of the motion of the fields and position of the fields within the U. I have said once before, those who betray us, in the D of understanding the field forces, they'll create distance gap themselves, by themselves, from the point of the creation , and nothing more. You shall never reach the destiny, and you shall never reach the destination as you have created that space gap, (1:30). in mistrust, in whatever you call it, in trying to deceive, your own soul and nobody else's. The love fo the Creator shines on all the same. The Sun shines at all time, it's the Earth which decides which one, which part will stay in the dark on the back. It's the giving of the sun and the giving of his attributes of delivering unconditionally. It's the earth which decides which of its citizens will stay in the dark, in the darkness of the knowledge , this is what will saw will do to you, the same as earth. In so many ways, would you like to be the moon to be seen in respect to earth, that one side always stays in the darkness. And that's what the STM for misconducts will be. In so many ways, the totality of the understanding of the knowledge is how to tap into the universal fields forces of the U,
through it to receive the knowledge

(1:32).
Many of you will fail to cross as you lied,

How you space gap
you shall be with me. (1:34). Those who deceive and do not understand will have that side in the darkness. When I ask a question, answer the correct way, that you will not be in that position. I ask, I is the STM, not I as me. That in presence of another soul you'll never be ashamed of deceiving,

The only way the man's soul will not progress, will be due to his own misconduct, and the misconduct between the STP and STM. As when the STP is within the STM, still is answerable to all his conduct as now the STM manifests as
(1:36).

The teachings of today is heard by all citizens of the Unicose and we salute you

even though the Creator has chosen the Earth, that time is short. Mankind hasn't got much time. You got to understand, the creation and the teaching of One Cup One Food, is to feed man across the U not on this planet
As of today we abolish all religions, all kingships, (1:38). As the man from today will take charge of his own soul, as he knows how to look after and feed himself.

We will not allow more than one soul to be created out of one being. the combination of the souls will lead to creation of the new light. the reason for it being to create a perfect light and a perfect child in the D of the creation will take all the resources of the creation that there will be no mistake
(1:40). as we said, on the dark side, where they themselves deprived of the creation. Now you have been taught

(1:42). We have spoken, and now it's for mankind to decide

in all the creation of the new cycle, cannot stop .

As I said, in the teaching yesterday in Rick's workshop, I said, the preliminary stage of the teaching of today, yesterday, Rick's teaching, and I asked him to withhold his teaching, till today. As now you understand partially what was taught in his teaching, because there was a secret hidden in that conversation, which is the key to the existence. You might hear it, as long as you don't understand the call of the Creator, (1:44). you shall be blind to it. The process of us releasing knowledge is through the souls we trust, and to who give our lives and souls to. In so many ways, it's your responsibility to feed your soul

(1:46).

(1:48).

I hope today's teaching will being the true knowledge for the KS who truly seek the knowledge of the creation not One Cup, and not one generator, and not one MaGrav. as al is ?? in teaching of today. I hope with this we disarm governments and those who want to govern with false fields and those who lie to us and cheat. As from now on we do not need to look to soul your physicality will speak the truth ..

(1:50).

Any questions.

Q: When we will get a Cup of Sun? (1:52).
Q: they find the making of the Cup difficult and they think they should buy the Cup from the Cup store. What would you suggest to people who have a hard time making the Cup. Is it necessary to make the Cup or can they make it without the physicality?
.. (1:54).
K- I was muted .. repeat ..
The Cup of Life, all Cups now are available from the KF website. We dispatch immediately, there is a stock …

(1:56). once you make to 3, that will lead to creation of the center, the soul itself. This is why … if you are in the physical
the 3 will create the same,

(1:58) .

Any other question. Why do we get the same people all the time, isn't' there somebody else.
Q: correct conduct. (2:00).
K- Correct conduct is correct conduct, doesn't matter where you are.

Any other question. (2:02).

Break >>> (2:11).

Q: … the Cups are physical, (2:12). the U Community they don't need to make these cups. when you teach them, do they just visualize, do they just receive this energy? .. so humanity is in a physical body and needs the physical Cups, but when you teach across how do they receive those energies.
K- What are you trying to say?
Q: How do the beings that are present feed from the fields of the planet earth?
K- .. There is a fundamental point which may of you as KS talk about it, see it, write about it, you make some systems because you understand it, but when it comes to you, you forget. (2:14). And that is in the world of science of the plasma, we always say that stronger, the one which has more fields of the higher strength gives to the weaker. But what does this really mean in the terminology of understanding the man. And that is, to

receive you have to be in weaker position or weaker strength, that with it you open the channels to receive. It doesn't mean that you have to be feeble, it means to know what to give as a higher order to receive as a lower. It means man has to become humble, or your soul needs to understand its position. It is the responsibility of the man, (2:16). to understand this, it's not just you make a patch, double the size in the other one, field transfer from one side, from stronger to weaker. So if you are the weaker to receive, you have to understand at what level the U works, that it is so humble that it can receive. One of the weakest continuous position is a neutron, as a singularity it can contain and live on its own. And there are .. packages of energies we call neutron which have been from the time of the creation of the U and they are still in this U, and there are neutrons which have been established from the time of the Unicose and they still are in existence, because they have managed to create a balanced fields of giving and taking, that they give enough that they receive at a strength. So when you look and set up these systems. Look how humble you can become, that you become even lower than the soul of the system. Otherwise you become the feeder of it, and you say it doesn't work. I've made them but it doesn't feed me, because you are still arrogant enough to think you made it so I control it. Now you understand what we said from the beginning, and that is, (2:18). pray for the systems you make, as by praying to them, you are a servant to them, and with it you establish a point and the level of humbleness.

Q: .. will the Cups once you make the Cups, will it fed just yourself or can you feed more than one physicality, more souls?

K- Can you make them as humble as you, if you can, feed yourself with it.

Q: They need to be giving souls to receive?

K- You never think I have to give to receive. It's my obligation to give, but without condition, and what do I give. As I was explaining in one of the teachings, for the past 7 years I have given totally and unconditionally, never asked for anything. And I released the knowledge of the creation, that anyone else would have made a fortune in the paper money of the man. My wealth comes from spreading the knowledge, not from receiving anything. I survived, I survived on this planet for thousands of years, I have seen every position fo it from kingship, to a soldier, foot soldier, to a man in the desert on a retreat. (2:20). Q: … the more information, knowledge you give the more humble we become … we all get to the position at some point.

K- .. it takes some a lifetime of U, and some a few seconds. Some in the process of life they mature to it.

Q: .. it only takes one pure soul, we have the EU, will produce a pure soul, will that pure soul going to change humanity, bring forth a new D of non-physicality?

K- Why do you think only for man, when the Creator thinks about the whole of Unicose. (2:22). Why mankind thinks he is the only one who is going to receive and move. As I said many times .. we teach in the voice of the man, but in the soul of the U.

Q; we always think the Unicose beings would already be in the position to have the knowledge.

K- Really? The U Community is very much like the human race. We have those who just found out about how to make a knife, and how to hunt and build a home, and we have those who create systems and are in the space. We don't look at the life as man's life on this planet. We look at the life, the animals who have just been created in the past few days for the first time on this planet. The creation of life in different shape of form never

stops on this planet. So it's a combination of the information of the fields, and it is the same in the U. We have stars which the first seed of life have been seeded on them today, somewhere in the U, and we have those lives who are ancient time, philosophers of understanding some of the knowledge of the creation. There is no difference between the village of Earth and the village of the Unicose. It's a spectrum from those who are created new, from those who have managed to understand part of. One of the most important things for mankind to understand, maybe out of his arrogance he doesn't want to, is that many animals have more understanding of the world of creation, (2:24). in the true essence, then the human do. And we see they do this and that, because they understand part of the physical structure of the fields of the U. Just because mankind makes a chair and sits on it, does not make him any cleverer then the animal who knows how to span a continent, or a planet, to feed itself from one point to another. He understands more about the work of the fields of the U then the man does. If I leave you in the desert how will you find through the M fields of your soul the direction home. But the bird does, some animals do. The fish do in the oceans of this planet. Mankind knows very little about the true world of creation.
Q: .. I know my soul smiles back.
Q: Could you take more about the rib issue you talked earlier.
K- This is what has come into the history of the man, that is in some fo the holy books, (2;26). that Adam mad Eve from the rib of him. There are many jokes over the centuries about this rib and the creator. In a way, I made my own creation out of myself, for me not to be alone, but for me to have one love, to be, that I can love, and through it I can create something that will be me in generation, or in the cycle to come. As it is in the Old Testaments, but there are so many things about how the cycle is. In a way, if you talk about the ribs, having the same but a little less, to confirm that I want existence, and if you call the Adam, the neutron, and in allowing part of it to ?? it becomes an electron, then they both can exist as an electron and proton, you just change the name. In essence, in those days it was very hard to explain this to the man, so it was easy for it to be Adam and Eve, as he came from a rib. But in fact, it is the process of regeneration of life in the U. understanding that in confirmation that one coming from the other, can interact to live within the existence of the environment of itself. That's all. Now we become wiser we can scientifically see it, at that time you couldn't explain to people that a neutron splits into an electron and a proton. (2:28). That one can create life out of itself.

Q: it snowed .. many interaction of birds, the beauty of creation.
(2:30). Q: your teachings become more profound everyday. This is the most profound so far. … What appears to be in center STM. that would be above the others, above the base of the 3?
K- No we are not telling you anything, you decide. Put one on top of the mountain, one under the table, wherever. You decide. A lot of you decided to stack the 5 upright, I didn't understand something, in other way, if all the horizontal beings were supposed to go upright, what happened to the vertical ones, the vertical ones were upright as well. I looked everyone made the matter state upright, that ?? don't they understand what they read? (2:32). If you are horizontal, why do you put it vertical on top of each other. So we explained it in that manner.
Q: It is not that easy to understand. to you it is easy.

K- It is not easy, it's understanding the principle of the interaction of the fields. We have guy called Dr. Asardi in Iran, now he claims that the T was already in Iran, that I cheated and I have stolen everything from him. But he is a very religious man, and what he did, is he made this 5 Cups parallel to his bed, not upright position and he sleeps in direction of Mecca, and the command of God says, man shall not lie, and it is just the physicality leads that direction, the soul is still in the process of cheating. And he made that, and he was telling me, he made that parallel with me, does it make any difference. Where does the soul of the Cups sits with you if it is parallel? Or do you sleep upright, you understand? You got to decide in which way you, what you expect to achieve, and what energies you expect to receive. (2:34). How you perceive, is it just you, now you understand it is more then you. We had this .. I start teaching this years ago, but it got lost because in the process, some of the KS went the wrong way with it. The guy called Ali in Canada, actually if he would have carried on with the teaching at that time with him, many of you would have reached this point there and then with him, but people were not ready, and he got carried away in a different direction. But in the process, we have taught everything. It's just now you didn't understand, now we make you understand. I hope. ..
Q: .. is it correct the SF is to feed the STM and STM feeds the physicality. Is there another SF for the plants … (2:36).
K- Excuse me, who said it is to feed the humanity, we taught you universal way of feeding. Why again man became the center. Did I connect anything to anything .

Q: I have started to understand how the fields flow .. I believe for each 3 of this a FP is formed.
K- Not necessarily.
Q:
K- There always is. That what you call the FP is the 4th state

When the ?? plasmas interact they form a super soul?
K- We don't have a super soul. (2:38). Each structure creates its own dynamic free flow. And even those free dynamic flows have and interact with each other. If you move one of these 4 in a specific position and condition, you might create a 4th one, the way we do in the SF …

(2:40). point of justice, the beauty of the Creator.
Q: .. I am now sure .. thank you.

Q: is it important to do all the Cups or can you do the 1, 2 and5?
K- What do you mean 1, 2, 5. We do the way it works in the U. You can do any combination you like. then some people see it destroys all the Cups, you do this and that,

This is the beauty of the knowledge, this is how the creation became diverse. There is no formal patent written. We don't make 7 billion vaccines the same. (2:42).

R:

K- They become in a limbo. there is a knowledge which we cannot share at this moment in time with man, this knowledge will be released in March. The knowledge is already on the table, but mankind do not see it. You don't have the insight into the structure of the creation. This is the way it will work. There is a key to unravel the line of what I call, energy or fields, or knowledge, into the whole cycle of the creation. We still do, mankind is not ready for that step. That step will come on the 21st of March in the b city of Tehran where Mitra came from, (2:44). in the land of Zoroaster, where the beginning of the belief in the Creator was set. it's not just because I am Iranian, I am born there. This is the way we set it up, it is the way we want it to be, just like when you set up a party, you decide where a flower goes ..

We have to choose a place, what better place then where we started from ..

(2:46).
Q; the light they say the photon can't be entangled ..
K- Yeah, but you have to see what you call, we are the light. We are not really the light, when we came in interaction with another fields we manifest a fields which you might call light. We have aura around us, but nobody sees it ..

(2:48). The colors we see of an object, are the colors which don't absorb.

Q: What is the link between information and light or the carrier of light, photon?
K- It depends to you is the light. To me is the information. It depends how you decipher it. It's the same how you look at the end of the cables, you see a light, but then that light ends up in another machine at the end comes the information that can be translated to what it means. If cut a fiberglass what carries it, you just see a flicker of light, it's the light, but if you end it up in a machine which understands how to decipher this light it is information.
R: one person uses it as a flashlight .. (2:50).
K-

(2:52).
This is why the EU handles both the emotion and the physicality, because it's in their parameter, we have put a structure deliberately to carry emotion. It's the first time every, a system has inherently built-in emotion.
R: light of a smile, that's contagious .. now people are wearing masks.
K- Now you understand why Mohammad said, cover the mouth of the woman, now you can't see except for the eye.
R: Now you can't see if someone's laughing at you …
K- It's like a blind man.
R: forces one to go inside ..
K- there was an article, a joke somewhere. (2:54).
They haven't proven yet that the virus can be transmitted by the look.

K-

(2:56). You know in the office in Beijing we have face recognition.
WL: Now you don't have to take off your mask.
K- iris recognition.

Any other question. (2:58).

Q: Jefferson, Brazil, inside the 5 Cup set we have another cup inside them for the energy. Is there any difference between the small cup
K- Which small cup.
R;
K- Yes, that was introduced because people want to see Gans's, and they were not collecting Gans's at the beginning. especially with the Cup fo Soul, this is what we suggested, put a cup there, (3:00). at least you'll collect the energies inside it.
Q: but once you got this cup it has a different Gans inside it, Cup 5 produced Gans.
K- Cup 1 in vertical animals it does produce as you put in the environment and it comes in emotion of the people it reacts. Maybe if you are on your own and it doesn't interact with anything, you don't see it, but the ones we create in the lab .. because we have so many souls interacting with it, it responds. And it is interesting how it responds.
We have to announce the Linz center will not be open until 15th January, until decision by the authorities in how we can enter, we are still there. Due to regulation a new decision has to be made. (3:02). The center is now used as a Covid testing center.
Q: EU I would like to know about we can make it individual. Only 5 countries in this joint effort.
K- No, maybe 16 countries to come in, they are all waiting for AZ to set up then to see how they are going to set up.

(3:04). Center will be setup in Brasilia ..
We have seen in last 24 hours in Brazil. They are taking if off as nonsense.

(3:06).
We have systems for space for viruses.
I think if you support the church in Brazil, I think from January 2 days a week, to teach plasma T from the church. The priest has taken the position, as he was telling us last Friday. We know the Germans and Belgium's tried to convince the priest. he told them he tested it, you are talking loads of rubbish. These people are very active because they lost. The T is shinning. They were trying to convince the priest that everything is wrong with Mr. Keshe, character assassination. (3:08). He said, the knowledge is here, so many of my people have saved their lives with it, you are talking nonsense. We have to push on with the T and the beauty shows itself.
Hopefully, if it goes the way I want, in conjunction with an Iranian group, we will establish one of the biggest corporations in the world in the coming weeks, even bigger then Microsoft. I have given my blessing to the negotiation team. KF will rise as one of the biggest corporations and in conjunction with the Iranians, across the world. We have the beautiful backing of people who understand. We don't need anything, the KF will sit within the structure, Sepah structure. We thank the head of administration of Sepah

… in all aspects Health, Agriculture .. We announce this as we are in the final phases. And they don't listen to the Belgium's . (3:10).
The T, this EU has to be manufactured in Iran and China, and put across the planet. It's going to be across this world. You carry a cell phone it already has the T in it …

K- In Brazil, support and work with Rafael and with teaching which is getting started in the church … The location in Brasilia is a beautiful place. (3:12).
Rafael are you behind the line, are you there, do we see him or is he asleep.
R: He is here. he suddenly disappeared.
Rafael:
K- Would you like to explain what is about to happen in the church with the teaching.
Q: Rafael .. (3:14). we will make a meeting this Saturday to start in January for 6 months. The structure is set to be put in other churches as well.
K- Those who are old hands in Brazil, work with Rafael to work the Churches in your area.
Go back to serve your nation to save lives.

(3:16). In the churches and mosques that we can start saving lives. Stop listening to those who want to stop it ..

K- You had beautiful teaching with the priest on Fridays teaching.

There is something I have to tell you, those of you who sit in the prime positions in KF around the world. We have noticed that the Belgium's have started through Belgium companies, contacting, trying to get the key KF KS to work for them. Out of nowhere they offer you big jobs. And you wonder why. These Belgium's organizations have setup, now that they have seen the KF has broken through this way, to come through this way. We have seen 2 companies out of nowhere, start without any knowledge, (3:18). have offered big jobs to KF key people, in that country. Please be aware, it's another thing that is happening, don't think they love you. They come in through you trying to influence the work of the F from inside. We have this in black and white, with 2 nations we have seen 2 of the KF key people were active people. Just be aware.
Any other question. Thank Rafael it was a pleasure to be in the teaching last Friday.

Q: Azar, .. I have a comment about horizontal and vertical. the verticals are stuck in the ground. Why call us horizontal, we can go where we want, 360 degrees.
K- No because when we leave you, you go flat on the ground, you go horizontal.
Q: When we are dead you mean?
K- No, do you sleep standing up. does any animal sleep standing up.
Q: I can sleep when I am sitting. (3:20).
K- yes, but ?? can sleep in a cardboard as well. but flat when sleeping.
Q: This structure on each of them there are little lines connecting them.
K- These pictures are taken from the set.
Q: okay. they are free standing.
K-

Q: Salameea, what is energy in regard to life and fields. (3:22). interaction of 2 cosmic rays and creates fields, and energy from this fields. if light can be particles and rays ..
K- No, we have explained this the difference between particles and fields of photons and fields of waves or whatever you call it, in how it comes to be and which one is which, and most of the waves becomes particles, in interaction with the other fields they the balanced fields and they become a plasma. It's a point of .. it's the point of time and position of the observation. All the fields one way or another, long term become particles.
R: shows an
Q: All waves can potentially become a particle only when they have certain conditions?
K- No, certain interaction point. There is no condition. At the end they'll find a match. And when they find a match, they interact. (3:24). You see, there are 2 ways, which in the future, in the coming weeks, I will go into more detail. 2 things can happen to a wave or a particle, one is that we just saw in the animation, that they become a plasma. in their interaction. And there is a way, which happens in most of the structure, even in your body at every second, minute, is that the wave, or the energy, plasmatic condition, not in the matter state, as a Gans state become added onto. There are 2 types of interaction in the U, 1 you add on to, which becomes as same plasma in higher strength. and one that you interact with, which becomes a plasma. In a Gans structure we add to, but within the same structure. In the particle physics, or in a physics, in the matter state, they interact with each other that they become a plasma. You can load up on each other, or they interact to become a plasma. A Gans, what we see is a plasma with many fields, packages, structured inside it like a sun. This is a very fine terminology in the world of the physics, nuclear physics, and into cosmology, in the physical of cosmos field interactions which when we come to it, maybe 2 - 3 years time in teaching, (3:26). cause I don't see mankind becoming developed to understand it so early, maybe in 2 - 3 years time if we carry on with the teaching, we start speaking about the interaction of the fields of the plasma within the structure of the cosmos. It is part of the cosmology, deep space travel that I don't see if we start a discussion it will be understood. There we show how energy sits inside each other as a package in a Gans, you'll see, you have a, you say it's a CO2. It's not that in chemistry you have a C and 2O, it's an amalgamation of the fields inside the energy package up to a limit is of the C, and there on is of the O. It's just if you look at it, it's like a funnel, but curving and dynamically rotating, and in fact, if you bring an O it still works within the center of, O which is the field strength of.

(3:40).

(3:44).

Q: I have make a study about you. Your assistant give me the details, (3:48). information. So I thought you are involving a lot with humanity projects. I want to describe this social, this other aspect of you, when you realized, that you had to offer something to humanity by yourself, by your truth, what is this exactly, a better condition of life of course, if we are going to understand the ?? and cosmological theory in practice with human life, but I have the feeling you have something in the more higher level, that

is going to be a realistic approach. Can you describe also this side of you about the humanity, because you ?? life about humanity?
K- First of all it goes back to the childhood, I come from a well-off background, I was educated in private education in Iran. In a very specific way, being in an Islamic country I was brought up by the Christians, Zoroastrians, and the Jews in the same class. The ethos of my school was, we are all equal, it doesn't matter what we believe in, behind the door. Being brought up in such a culture with the Zoroastrians, and the , I came to see the truth, that they are all the same, (3:50). and in that process becoming a nuclear physicist striving to reach the knowledge of the physicality, and discovering the gravity, because gravity was enigma. Then it came to mid-point in life, I became wealthy enough that the wealth has no meaning. It wasn't satisfying anything, except that you could physically help someone, some people, but with the knowledge you could save a lot, and do a lot. In the process of development of the T from young age it became fulfillment to cover everything that a man becomes independent. Around 2000 understanding and competing the process fo the gravity, and start building the first reactors, and first processes, You could see this knowledge is a gift, and it has to be given to everyone, you couldn't hide it. In 2004 /05 I was adamant I wanted to get the T, but I couldn't see how I could get it into public that everybody knows, and I came across people who wanted to put it in the process of patents, that they can secure it, and have financial income from it. Then I studied the patent principle in a big scale, and I found out the patents are the best way for me to get my knowledge out, but then open it, once it is published internationally. So I waited 18 months, and then it goes in the European patent publication, and then I released it to all the nations, when it was the right time, in 2012 /13, and the process is, (3:52). this is the knowledge of the Creator. We are just containers that carry it, we have no claim to it, and no possession. So when you are detached you give, and I am very much detached from everything. I live a life that it befits the way I lived all the time, but in the essence the knowledge is a knowledge of the creation and the Creator. You cannot charge what is not yours, but at the same time, you learn sharing the knowledge brings a lot of comfort to the others who can use it. You share and you see they use it and you see the beauty of if, and you allow the people to use it, and the more people get involved, as it is now 15 years, 2005 when we established the KF. In 15 years, we have reached over tens, hundreds of millions of people, and everybody is using it according to their understanding and I am not short of anything, and the pleasure of it is, when you see people use it to live in their souls, and live a more comfortable life, and some others use it to create a condition for the others. No claim to anything, and to be able to share, and others like Rick can, around the KF, we all live the same way. As one of the friends yesterday day was telling me, bending under the table, he said, these guys going on time, they are not like us, we are missionaries, we believe in what we do, they get paid for what they do. It's a big difference, (3:54). we feel it, we have a mission to serve humanity. Any other question

Q: Mehranez, … what is this memory bank that effects the emotions, where is it, the past memories,,, very, very past memories ..?
K- Our body carries the DNA, and our soul carries the RNA, I would call it of the soul, (3:56). which the memory bank of every notice, sound, us our ancestors and those who we have came through the cosmos have heard. It's just that we have to be able and get the

knowledge how to tap into it, and what does it mean. As … it's like a computer, you have different disks, but everything is recorded in the main disk, and you have to understand the emotion of it when it was recorded, otherwise it's the noise of something you don't understand. So what we carry, .. we carry the color of the eye of our grandfather, and maybe the nose of the our great great-grandfather we never met. In our RNA we carry the memories and whatever they ?? to because it is not just physical recording, it's a D of even the emotion of it. And we understand this T and this process and in the coming time, many of us we will listen to the time and the place to where our ancestors have been, it doesn't come from another D, it's the recording of the RNA of the, what came with the DNA to create us. We are not coming out of just a sperm and egg, this sperm and egg are connected to those who created our father and forefathers, even to the first man, or the first creature that was on this planet. In time when the man goes deep enough we'll see through his own strength of the memory of the RNA of the STM, then in that direction we'll hear what has happened, (3:58). and be present across the U. In the physical D we hear the voice and the emotion of the man, and when we evolve to understand the way we taught today to reach that level, then we understand the history of the U, and that is why we can carry the knowledge, as we are part of it. It hasn't changed just because we have become physical citizens of one planet. The collective knowledge which is the same, we have collective emotions we have to understand that memory and what emotion was created.

Maybe today is a turning point for many of you if you understood and just don't copy the Cups, but understand the fields and the emotions they create, and maybe in that path, in the coming time we teach you how to connect to a bigger D in the world of the creation, as man matures to understand more, he understands it's not just a noise, but has a meaning and emotion.
Thank you ..
KF has become one of the largest scientific organizations, (4:00). across this planet where everyone shares knowledge freely, even in the church of God and the mosques across Iran as you have seen before. Sharing freely and unconditionally that's where the gift is.

(4:02).
K - This is an initiative that they bring their own culture and religious leaders. (4:04). Organize with churches, and the Bahias, and working in the background.
We are trying to get the dialog regardless of the color ,

(4:06).

(4:08).

359th Knowledge Seekers Workshop; December 17, 2020

ENGLISH TRANSCRIPTION

(:24). K- … we need to explain more in some cases .. I especially asked to show the (intro) video, because we have entered a cycle of last week. How to show, to feed the STM, how the STM can feed the physicality, but understanding that the creation of the physicality itself is conditioned to its environment to what is going to be manifested. It's no use creating meat and chicken when you are in another dimension (D) that you can never take shape and it cannot carry its energy to sustain life. We learned in the process in the process how we have to understand the totality of the knowledge, (:26). in how we can mix, and create a combination of field forces, that confirms existence is given, point and time of position. In so many ways, we carry the soul, but where this soul appears after departing the physicality, or when within the physicality condition, it can be replicated, it can manifest itself in a position, other then its point of birth, and its point of existence, when first it took to understand its position and its cycle.

In so many ways, we have to understand what do we do with the new knowledge, and how we come to interact with it, how we live within it, and how it lives within us now that we go through transmutation of elements, and transmutation of energy and fields. In last weeks teaching we referred to a simple point, that the punishment for those who misconduct, what shall be, and the question was raised by KS, that weren't we promised that there shall be no more punishment. The punishment doesn't come by us, it comes by your own soul. We shall not punish, but your soul can restrain you from giving. The biggest punishment in the cycle of creation is the cycle of love, to give unconditionally. In a way, when you do wrong, when you become the creator of wars and conflicts, and become creator of all sorts of things, that you knowingly have taken part in, (:28). it doesn't allow you to give, because you have taken what is not yours, and was agreed not to be yours, life of another man, betrayal, adultery, killing, and everything else, which is forbidden in the Commandments of the Creator. In this process, we understand the punishment is very simple, it's like sitting and watching a man with 2 legs running, a man jumping, enjoying walking in the beautiful fields of the U, and you with the legs, you can't go anywhere. You watch your legs but you cannot participate. .. you have the legs, but you cannot be part of it, even though you possess it.

And the biggest punishment in the world of creation is having the love, seeing how another man loves another person, another child, another, wife, women, man, and you cannot participate, but you know it's in your possession. Being handicapped by not being able to give, to elevate yourself, is the biggest punishment you bring to yourself. In a way, we don't serve punishments anymore, it's you who has to be judge of your own conduct. It's you who'll understand, the punishment is for you to be able to see the beauty of but not to be part of. In so many ways, the knowledge of the man becomes a sight for the man but you are not part of, within. You see it in motion, you see how one can love another, and how give nourishment to another with loving, and you cannot do, you

possess it, but you cannot give. You understand it but you are just a by-passer and a witness, (:30). to the whole development of the cycle.

In a way, by not being able to give, to create the interaction of the other soul's fields, the light to show your beauty, you become dark, a spot of nonexistence. .. it's a point of creation without understanding. You don't become an absorber of others, because you cannot receive to give, in a way, you stagnate. This is the biggest punishment when you cannot love, when you cannot give. In a way, it's the answer to the KS, you choose how you shine, you choose how you shine to whom, and the way you do. The beauty of the creation is in loving. This is the only attribute of the Creator.

So when we talk about the Day of Judgment, it's how we judge the cycle of physicality to live. How much we lied, and how much we broke the First Commandment, Thy Shall Not Lie, This was the first Commandment given to Moses, and to all the prophets. Do not lie to your flock, keep in the direction of the correctness and establish the cycle of life, in a correct way through your soul.

In so many ways, now we understand that there is no punishment, except us not being able to be loved, and to give love, to be able to elevate. We cannot elevate when we do not receive, and you cannot receive if the cup has no room to receive, as you have closed the lid, not the others, when you put the lid on, and you closed the gap, it's you who is deprived of receiving, and you who is deprived to be drunk from, to give the pleasure of. (:32). So when you ask and you tell there was a promise of no punishment, we do not punish. The punishment comes to you by yourself, in a way by knowing you cannot give, and from it, can be created those, or be extended to those that will be part of you, in it.

In so many ways, when mankind understands more of, he understand the punishment of the man in his soul, is by the man himself, in the true, and the way of conduct. We are told, "Thy shall not lie," those who don't lie, and those who get accused of lying, are the accuser, who has to bear that burden of lying itself. In a way, we have to live a correct life, and in conduct we submit a correct understanding. and it is for the souls to judge, it's the souls who adjust themselves to accommodate it, for the cycle of life, it does not matter, in what condition and what D, one has to understand, that the total strength of the fields of the U and Unicose is constant, is all part of the process of the fields of the Creator. So it cannot be any different, what diminishes from one point will appear in another. One reduces in the strength in one, will appear another strength in another. So in a way, it's how we transfer this energy for the beauty fo the Creator to shine, it's the responsibility of the creation of the suns which come from the STM. In a way, we shine according to the strength we create, from the strength we received from the Creator. In so many ways, as I said, we are part of the process, we are part of understanding, (:34). the totality, .. would you like to see any part of your creator to suffer with a injury. When you are there you cannot do nothing to increase, or show its beauty. I a way, when we are not shinning, we are not there to show the beauty fo the Creator. SO mankind understands very simply, the punishment comes that he cannot be seen to be part of, not only to not be loved, but not to be shown to be part of creation and the Creator. That is the biggest punishment a man can carry for himself. Just to be there, nonexistent, to be there, not to

be shown. To be there not to be able to love, even though, knowing the beauty fo the love. In so many ways, the KS find one way, and in that process we'll find more, and In so many ways, the extent and extension of the life carries on. As I said always, when you are asked and you're given, you are not stolen from, or you do not steal. It's the job of eh giver who has to have the understanding of what he gives to the extent, to the extension of the love, that it can be given, and then what is given is the right of the soul to use to extend, to be used in other D and directions. I made man in the image of myself. In so many ways, I am soul and through the creation of the soul I show my beauty, and my attributes. In so many ways, mankind comes to one point, what is the purpose of life. And in that process, it's for every individual to understand the process, and understand what is there, functionality, and the presence, (:36). in the position of the created and the creation and nobody else's.

In the last week teaching we opened a new structure of life, for man to be able to feed his soul, that his souls can feed the soul of his creation, the STP. In a way, when you choose the soul to manifest yourself in the D of the position and time, in the D of the matter state, or whatever creates man to be of in any position of the U, it's not necessarily only the D of the STM, and the D of the STP of the vertical, horizontal, and matter state, but other state of the soul and creation of life in the U, that man is still not aware of. The D of the interaction fo the souls, and the creation of life through themselves. In a way it's the point of transition, when the man understands his soul, it's just part of the creation of the totality fo his own existence. What does this mean? It means through our soul we realize we are part of the totality of the other souls, we are fractions within the fraction of the existence. In so many ways, how we conduct, how we develop that soul to confirm its existence in physicality will take a different meaning. Either way you can create a D to create the soul of your soul in the D of matter state. Or you decide to manifest yourself using other souls, to manifest yourself in the D of the plant or animal, (:38). or any creatures in the U. So when we saw the picture of the soul in the center and the other souls around it, it's the transmutation between the 2, and all 3, and maybe if man understands more, the 5th and the 6th D, in interaction of the fields of the creation. What we call a mass, which comes from the interaction of the fields of the G and M. And then the mass in interaction with another MG becomes the weight, in its 5th D, its 6th D. So the STM has the same responsibility, and opportunity, to use the interaction of the fields of the others to manifest itself in any position and D of physicality it likes. It's the responsibility of the STM to decide, and to what it gives the position of, serving in the D of existence.

Even Soul of Atom decides where and when it will manifest

In a way, if you understand, it's very simple, **even a pebble has soul, even an atom has soul, and in that process mankind has to understand, that even a soul of an atom decides how it manifests itself, and where it manifests itself, and in the D of the strength of the its existence,** it decides to be in a cell of an animal, kidney, or liver, according to its strength. **It's not that it is put there, and created to be, it's there because it has chosen to be.** This is the beauty of the creation, once the man understands.

When we see the structure of the what we call the STM, and the physicality of the matter, or the soul, or understanding of the totality, we come to understand one truth, (:40). man has the ability to be able to take, through the transportation of the fields, in both direction, be it the STM, souls of physicality of the matter, or horizontal, or vertical. In so many ways, now we understand this, it is very easy to add another D to the knowledge of the creation, which man needs to become the passenger of the U. In so many ways, we look at 3 D, but if you look at other structures of what we call, the 5 Stack Cups, it should teach you another D and another position, in a way if you take the soul of the Earth, and you understood the same, in the D of the plant, or whatever, by adding Inertia to it, depending on the horizontal, or vertical, or the matter state, you can dictate how you want to manifest, in what position, and what direction. If you change now the same thing, you bring the soul of the Inertia of the animal, and then you decide the position of the soul of a distant planet, you shall travel to that point, or at least to be able see the physical matter in that position and time, (:42). and space. To understand the totality of the knowledge, now you understand you have to learn the condition of what we gave to you as a 5 Stacker, and in creating each one as a center, one can lead to the others, and create a D of transmutation through the energy levels, through the dynamic souls, and not necessarily, in a way, that the man has chosen the donkey, and the car and the rest. These are only field strength dependent and nothing more.

If for example you want to appear in the middle of the ocean, where the waves live, and watch them living, and enjoy their presence, you can create the MG field the place, in the Inertia, and in the plasma of the soul of the planet, and the presence of your soul, and you shall manifest there to see it, see the soul of the wave. And if you add the strength of the STP, and the physicality, you shall appear, maybe like another whale, or in another D, that you can enjoy and that become part of your memory and the level of existence for you.

If one understands the operation of all the 5 levels of D, as man knows up to now, you are free to travel without D of the physicality from one to another, through transmutation of the energy fields and not matter. This is the beginning of the teachings, this is the beginning for you to start testing. I have seen many KS just follow what we said. (:44). For example, I see them to put a cup, and maybe 3 spans. Why 3, what about the Inertia of the desert point you want to land has the combination of the mixture of materials. **This now allows you to add more to, to get the exact position, to get the exact destination where you want to land**. **You've got to remember, the U is a composite field strength, and not singularity. it's you who can decide if you bring the energy and the Inertia together, how and when you manifest yourself**. KS have to understand as we said before, to move from D of physicality to D of fields and energies, that they can decide the point of manifestation of physicality.

How many times you wished you were a dolphin, a flower, you could have been the scenery, and what you possess as a diamond on your finger. Now through transmutation of the energies mankind can do. And being watched to be enjoyed by the other souls, that this is the beauty of me, this is how I want to manifest myself, that you enjoy my

presence. Transmutation fo the energy and fields through the STM, does not mean you become the creator of another sun, that you create ?? You can do the same by becoming a flower to give pleasure to the others, by what you emit. This is the beauty of understanding the totality. I want to be a rose, I want to be a pebble for so many days, and so many years to the strength of the man, (:46). and then I want to be another.

This is how **as Messengers of the Creator we travel the span of the U, by the wish of our soul, this is how we manifest ourselves in different D and positions**, and we take our time, we walk the cities, and from one city we live as an old man, and we manifest ourselves as a new birth, as we take the D of physicality, but not the strength of the soul.

In so many ways, mankind in totality has to become aware of the new knowledge, mankind has to become to understand, to see the strength of the soul. **Up to now this has not been open to mankind, we promised a new birth. We promised a beginning of a new cycle on the 21st of March** in the cycle of the Spring, which is the beginning of life in the Northern hemisphere of this planet. This has been agreed by the men of U, and Earth has been chosen, the place, time and space for it. It's not birth of totality, it's the beginning to set the seed for the new life, where man will achieve the knowledge of understanding how he can transmute from one to another using the energy fields of the man to create souls that can exist in both D of the STP and STM. When you create the STM, is the STM created of only 3 elements, or is from the interaction of the collection of the other fields that leads to creation of his physicality that maintains the STM. So what you need to know, and what you need to ask is, what is in the future the total energy fields, (:48). of all the ??content matters of the life on this planet to be able to create the STP and not just only by 3. The 3 is just an example for you to understand the principle, the rest is for the man. If you understand in your Cup what you want to be manifested as a soul of the cell, or as a soul of a cell of the liver, or as a soul of the bone structure. Then you understand you need to change certain parameters in your Cup. In a way, mankind by transmutation of the fields can build new organs without even touching the organs. Mankind can create the conditions where transplants and what we call life support becomes a fallacy of the past. Now mankind can develop every piece, every organ, every cell of the body of the man, through the STM. And maybe in the future man will understand more. Maybe in the coming time we'll understand how we have chosen to be ignorant to the true process of the creation. Maybe mankind needs the first level of push, that in that process by creation of the soul, and the STP mankind can decide its position, time, point, and the place.

You chose to be a stone in a certain position, and a stone stands for thousands of years to come. You chose to become a flower to last a few days for those who pass you to see your beauty, as you are not there anymore. That's you prerogative. So mankind now has the ability to chose the time of the span of his existence in any D, but not in totality, will never change. (:50). We are part of the total mass and total energy of the U, and stays constant, as it comes from the totality of the structure of the creation of the Creator. Now the question for man is one question, why, and how, the point and the time, and how that structure will bring that change to all of the creation, not only for the planet Earth, but for

the totality if the creation across the U and Unicose, as it was explained to a KS very recently.

In a way, it needs one soul to change the other souls and elevate the soul of totality. Go back to what one man said, the funny thing, when he saw, when he changed one magnet, the other magnets changed their position and their polarity according to the move. If you move the magnet the others move, but if you turn the magnet it changes polarity, they all turn and change. Now you understand, why it needs only one soul to change the rest of the souls and elevate them in the D of the creation in the U and Unicose. This is what we elevate, this is what is to come and what is to be shared by humanity and the rest of the creation and creator, and U and Unicose, in the months to come. As I said … it takes only one perfect soul to change the rest. (:52). In so many ways, by creation of the perfect soul we change and move all to perfection, where there shall be no wars, hunger, where we all shall receive the fields of the creation, and we all become man of one creator. In so many ways, life becomes sweet, .. mankind is getting ready for elevation of his souls that to understand the totality, there is a need for a change. There is a time and a place that the U Community will interact with humanity, when the man reaches that point of maturity in science and understanding the T and being elevated to elevate his own soul to the ultimate goal to be the lover, the one which gives unconditionally and it shines through the beauty of the Creator. Maybe now the KS who have been working on creating MaGravs and everything else, and understanding the field forces of it, gradually, we come to understand, that they are the MaGrav themselves, they are the possessor of the 3 levels both to give and to take, one in the level of the STM, one in level of STP, and one in the physicality of the man. In that way, this is how any creature is manifested across the U.

In so many ways, the process of the creation and manifestation in D of physicality is not unique, but is common denominator to all those who live and have been created. In so many ways, now we understand, (:54). if you extend the knowledge to the Cup of Man, to the Cup fo Soul to the Cup of Inertia, and be able to replicate in its strength, but not in the cup, man will be, appears in the exact D that the structure, as the STM wishes, In so many ways, KS need to understand the process of the creation through the interaction of the fields, not Gans's and the Cups, and magnets. It will take time for the whole culture in understanding of the science T of the creation, for man to be much more clearer, as more KS understand and be able to explain the field of the creation through the structure of the understanding of the physical and matter state, which is clear and open to mankind. We have seen a number fo KS have started to explain the T in the field term and not in Gans's and the rest. We watched one of the first basic walks, the toddler walks in this process of teaching, in the American teaching last Sunday, by Alex. In the coming time this has to e expanded that gradually the KS move away from the process of understanding the physical matters and Gans' and understand the process of the creation as their soul is already the creator itself, and they have to be able in understanding that to manifest and be able to transmute across through their souls. In the process of understanding and teaching KS will become more aware of the power of their soul. (:56). They come to understand how they can use it to feed themselves through the souls and the structure of the fields of the U. If your soul has managed to create your physicality and maintain it, so

it's for you to understand how to get to it that, through that process you do not need to kill to live to survive. In the process of teachings to come, in the coming weeks, and months, we have opened, and we'll open more truth and more understanding about the knowledge of the creation through the interaction of the fields and the process of life in the U. The life in the U is no different then the life on this planet, it's all the same, and it is beautiful. And it's beautiful when you see it and appreciate its beauty. In so many ways, mankind will come to understand to create condition of fields and their interaction to lead to creation and feeding of the man itself, or to be able to support its soul, to lead to the creation of perfect life.

In so many ways, humanity will become more humane. In so many ways, mankind comes to understand the truth about his own creation. When you make all these systems through Gans', understanding interaction of the fields, as I said … Put the Gans's (:58). and put your hands in-between, and make the wish, what you wish to see in the palm of your hand. Start with that, is understanding that the fields of the STM in interaction with the other fields, leads to the creation. Start what I call in a sandbox, and test, then understand and see the beauty of it, that the Gans's are not important, but what is important is the fields which emit, and you start understanding how to work with the fields in essence of creation. Try to put dynamic or simply static Gans's and put your hand in and add the STP to it, or add the STM to it, that it can feed you. Don't forget now you hand is the creation fo the Inertia, this is the limitation of the strength of your physicality. So the creation of matter by wish, has to be no problem for those who carry the true essence of creation. I said, that many times before, put your hand out and wish gold, and there shall be gold in your hand, You need to start to learn, make the fields of the Gans's and put your hand in-between the fields and wish gold, and see if your true understanding (1:00). of the gold is to serve humanity and others, you'll receive gold. And if it's there to satisfy your ego fo creation, you shall not see, nothing but the best of shame. In so many ways, then you understand your true conduct, then you understand how to be correct in the space of the U. You understand how to behave and how to assess your position and the others. .. you learn if you lie to yourself. If I want gold to live a good life, or I say I want gold to help another. In so many ways, mankind through these simple steps, will start understanding the true conduct. The true understanding fo the true meaning. Those who come and they show the gold in the palm of their hand created, which is a true wish to give, to serve the others, or those who want to have to make kingdoms out of it. They shall receive none, as there shall be no king. All man are equal in the essence of their soul. It's the man who decides how to manifest itself in the D of equality, not position and presence.

In so many ways, many of you KS pick up the Inertia Cup of the materials you like and in a way, dictate, I want this to be part of my physicality, I want this to be part of a plant, and I want it in a matter state. And put your hand out and see if you can create. Put the cup there and see what you want in the matter state to manifest because your soul has created a strength of Inertia for that point and position. Then you will learn in the span of U you do not need systems to create matters, fields, (1:02). and food. Your soul become the creator of, due and through the interaction of it field and strength, and its conversion to environmental Inertia. In a way, if you understand this, when you reach to a point in

the U, that you want to manifest yourself and your soul says no, there is no conversion point, as it'll come the end of me, to put me in the danger. And you understand you don't need the knowledge of the U when you understand the trust in the strength of the field of hte STM and its interaction with its environment. In a way, man does not need to carry the knowledge fo U as the STM and its strength of its position with the STP, will understand with the interaction of the Inertia the field of the environment, what and how it can manifest itself to guarantees its existence and its life.

Now you understand in one process, with what we brought to you as a 5 Cups, we have shown you the key into U Community, the access of elevation to your own soul, and access to understanding the process fo the creation. In so many ways, we have shown you the way that the creation is created, and the way that the life cycle of the creation occurs and repeats itself in every corner of the U.

Many Souls will Never be Enlightened Due to Misconduct

Many, many souls will never be enlightened as due to their own, what we call, misconduct, they hear and they see, but they never achieve, as they have not understood, (1:04). the totality of the process of the creation. As it says, "Thy shall not lie," thy shall not lie to his soul, as the creation of the soul, .. the existence, .. the totality of to be part of, is sacrosanct, it will not change, it will stay the same, and it will be part of the process of the conversion of the fields of the U to any matter fields energy, and being which the soul wishes to manifest itself, or conduct itself through. Now it is for the KS to start playing with these sandboxes, Cups, not only with 3, but with 10 different elements, but understanding the reason you create the Cu, and what is the purpose of it. And then in the same process try to create the condition of Inertia within your soul, within the palm of your hand, that you shall see gold. Now if you understood this, and you understand the expansion and knowledge of the U, one thing will become apparent to you, what we said many times before, you create the kidney of a man which is danger (damaged), or is not there, has been taken out, and the kidney will be created in its position, because it is the wish of the soul. It's the position of the man who puts himself within the fields to create that D. So what we'll see in the future to come, man does not need open heart surgery, as man creates the perfect available fields for creation of the muscles of the heart, and that will take shape when the man is within it, with a wish of the soul, that the heart will function the way it was built to do. (1:06). In this process mankind will come to understand the process of the interaction of the fields in the appropriate measures and strengths can create anything in the cycle of creation. Would you need a kidney or a liver in one point and D in the U where there is no need for cycling and cleaning as you receive the energy in the D of soul, STP in the form of energies that there are no waste created. Now you understand, the expansion of the knowledge we have opened up. It's for mankind and the rest of the U Community to understand the process, and expand to extent to create the perfect soul, a soul that does need nothing for it to survey, a soul that only gives to be able to be part fo the creation of giving. To love, to love to serve and in that process it might need to exist in the D of physicality, or the D of soul, but in fact it served, to itself, to the totality of the wish of life in the Unicose. In a way, you become a shinning star where you are asked, or you have been wishing, or you have been wished to

be. In so many ways, you wish to have a dream of your mother who passed years ago, and if you can create a D of sincerity, and understanding it is the same wish as the mother to see you. You shall see the mother, and you become part of the mother through the point of the full satisfaction to be and to enjoy the presence or the wish of the soul. Mankind will understand, (1:08). transmutation and transportation, will become part of the life of the man, in the D of the STM, then it comes to one point, would there be a need in the coming time, to come .. a need for a UFO, for a flying object, a need for a means of communication as computers and the rest. As the man in understanding the process of the T & T of the fields will possess all within the structure of his physicality of his soul. Then he can do what he pleases, to serve, and not for his own conduct and pleasure. Giving, In so many ways, is the totality of the understanding, .. is understanding that the totality, that it is me, and it is me which is part of the totality to exist as part of the Creator. Mankind needs in the process of understanding to work as we call it, in the ?? sand bag (sand box) of the earth, get in there and play in that sandbox, and mix the matters of the creation with the Gans of it, and understand the fields of it, and interact with those fields, and the fields of your own creation and see what you can achieve. These are essential in the next 3 months for mankind, to himself ready for the process of the beginning of a new cycle where the man can transmute to the STM and the STP in the D of the living. It's been said when the mankind is ready at that level he shall enter the U Community. In a way, once you enter in that level of understanding. (1:10). you have already entered and become part of the U Community. .. you understand the creation of the U and the community which has created it. Beauty of the creation is understanding the process, not to replicate it. In a way to be able to extend the knowledge, and that knowledge to be given to the others. the minute, the instant the knowledge is gained in the D of the soul, it is shared by all the souls in the D of the U.

In a way, it takes one perfect soul to be born to change the rest of creation to perfection, and change them in a way that the totality will bring, that is a collective soul of the creation, that by it and with it, and through it, the whole of the creation becomes perfect, and then we shall see the beauty of the Creator as they are all part of, and within of. It's the responsibility of the KS now that we have taught you the 5 Cups, to start playing not just with 2 or 3, but try to understand the composition which makes that position, even the composition which makes the STM. Where you want a perfect replica you have to have all of it, all the salt, all the matter state, all the Gans's, and all the exact conditions for it to manifest itself. Now maybe you understand what I have said many times, give me a skull and I will make you the man. In that way, that is how we transfer the knowledge and the energy to that point, (1:12). that we create the fields and the conditions within that skull, that, in that process, in that cycle, .. presence, . that understanding mankind become to understand the totality of the process of the creation. Maybe one day when the man matures in the science of the Gans's, and understanding of the process of the creation in the interaction of the fields and transmutation and transportation of the fields, man will find out that he needs no computers, no cars, no physicality, but he can live in the beauty and wisdom of the essence of the creation within the D of the STM.

I wish it so, but it is the man to choose. But in that process man needs to extend his knowledge to understand further processes, For the knowledge which at this moment in time is not open to man, as man has not the total understanding to understand the totality.

In so many ways, human race has entered a dilemma position, how do I, and what would be. In so many, how, why, is to look at the essence of the elevation of the soul, and what would be, is, what do I wish it to be, where I wish it to be, and how I wish to manifest it, that it will be enjoyed by the others, and not for my pleasure. Then mankind will reach in that position and destiny of achieving the totality. Our wish is that man enters this D, that in totality becomes part of the total life of the U. (1:14). It's for humanity in how he teaches his children, and how fast it will reach that point. We have seen the teaching in the churches and mosques, and in temples. The man will progress very fast from now on. As the man of God have decided to enlighten, this time the STP and the STM at the same time. As we have seen in the mosques of Iran, and the churches of Brazil. The process has started, and once it takes hold, man will understand he has a lot to live for.

Many of you look at the Corona as one of the biggest disaster of mankind, but we see Corona as a key for the maturity of the man to the D of U. Where mankind comes to accept is what we call, feebleness, in the process of the creation of the structure of the U, and with it trying to achieve the strength to survive, will see a new D in the world of science and T. In the coming time, the knowledge of Gans and T will come to be the survival and savior of many people, and with it, it will be introduced in a rapid way to a new knowledge. And the schools and universities of man will forever work to complete the cycle, and in that process the humanity will mature. Nothing has been a bigger gift to humanity than the Corona, if mankind understands the reason and how it has come to be there. (1:16). For man to go through a process of rapid understanding between the energy the fields and the matter and move away with the ?? of material existence. As we see, religions to confirm their beauty, will attach themselves to the new knowledge to show the beauty of the creation, and in that process mankind will be educated very rapidly.

The process of understanding the new T of creation is upon every KS to teach unconditionally, and at the same time across this planet to as may as possible, that no nation will be left behind. And the responsibility of KS is simple, teach through your soul as your physicality has failed you up to now. Teach, when you teach in these places, through the STM, not through the knowledge of the Gans and the Nano coating, but the essence of the beauty of this knowledge and T shall bring.

As we've seen the motto of one of the world leaders, is science. As man will enter a phase to understand the science of creation and not the science of the matter state of the man. And the evolution will come in the process of trying to save the life of man. As we have seen the new vaccines have already proven, as it has been stated by many nations, they have seen a new type of viruses of the same, and the present vaccines are not made to match. We have seen the mutation of vaccines will push man to create the new understanding of the totality, (1:18). as it has been explained in the KF document, that we need a collective dynamic environment to be able to handle viruses as they mutate, and in that process we understand the mutation of the elements, and energies that can

handle the viruses. So in a way, the way many of you look at the virus, the way it is at the moment with us as a point of demise, we look at it as a point of demise of the old knowledge and T, and the beginning of knowledge, and the cycle of understanding of life in the U. Maybe it had to be taken this way that man has the fast track to become educated with the knowledge of the creation.

In so many ways, we have made it possible for the man to understand the process as the virus touches every man individually, and it is for man to go within the structure of his soul, to understand the totality of the process, not only of what we call, the virus, but the energy and field transfer, understanding of everything man wants to do. Life is not easy, but life is the extension of understanding of the work and life of the physicality in the D of transmutation of the fields and energies of the U.

My dear KS we have given you the key to the life of the creation. It's for you to know how to decipher the code, that you can use the key, how you have to mix, (1:20). and match, not only energy fields of the matters and the Gans's, but to put in from your own D of physicality, the STM, and STP for you to gradually become educated in the knowledge of the creation. In so many ways, through the 5 Cups we open the first steps, the toddling steps for you to start teaching yourselves to understand the strength of your soul, to understand how you can transfer the energies of it, through the transmutation of the fields to the STP, to the physicality, to the D of the Inertia, and to the D of the MaGrav, the soul of the planet, the position that you are. Then through that process you can create the D of the strength of the G point of the position of your wish, create the D of the Inertia of it, once you arrive, and then the condition of the physicality in that presence. So the STM in the transmutation of the energies will become the creator, manifestation of its own, at any point and distance. So we can travel to Moon through the understanding of the strength of your soul. Create the Inertia of the certain position of the Moon, and then decide the position of the physicality to exist in that environment, that through the STP and the STM, you give the shape of the man. Then you understand, as there is no O on the surface of the Moon as such, would you create a physicality which has a need for O. (1:22). then you understand, in understanding the transmutation of the energies, mankind has been given the golden key, and the U Community has been given the knowledge, for all to be able to transmute and transport, and communicate with each other, irrespective of the place and the ?? worth in the U, irrespective of the place of manifestation of the soul, irrespective of the wishes of the others. But the soul on its own will create its own destiny, and its own manifestation. The point of the birth, is the birth of a perfect cycle. The point of the birth of a soul is to manifest itself with total beauty it possesses. In the coming time, KS will start developing these, in a much deeper extent. And in that process many of you, many of you shall see your Creator, which is your own soul. Many KS who say, I have not seen, how can I believe in it. Because you are within it, how can you see the beauty when you sit inside it. Creator admires his beauty through the knowledge of your self within your self. And then you receive the confirmation of the existence. In so many ways, do not stick as you did with the MaGravs, with all turning and twisting, but extend to the vocabulary of the knowledge and science to the new D of the plasma science and physics.

As I mentioned in the Farsi teaching last night, we have reached the point of maturity, we have developed a new fuel. (1:24). In that fuel we do not depend on the matter state, but we manipulate the fields of, that in that process we can extend the knowledge to the wishes of the STM, and the creation of the man. In the laboratories of the KF, developing new fuel, and new ways to create the fuel without the matter and energy existence. We have shown again, using the Iranian reactors which were built some 12 years ago, back in line, showing the flight creation and everything else is possible. We have brought the old boys back into play. We have recalled the 2 reactors developed and completed in Iran back into operation in their lab and we have seen the first structure of the lift, even the 3 legs trying to move with no fuel, no physical matter within the central structure of the system. We have created the conditions. Further more we release this T to the governments to understand we can have access to every position in the government, be it what, to enforce peace. In understanding we can create the soul of an atom. We can paralyze those atoms which are used to create tools of war. At the same time we can create the conditions that we can deplete viruses from the face of this planet, but at the end of it, they are energies which can be used for other applications and usage. With the new recalling of the Iranian nuclear based reactors, which were developed in Iran, and we tested it. Now developed the condition of cosmic rays within the center of the same reactors, (1:26). to lead to production and lift and motion, and in understanding the new structure of the STM. In so many ways, we will return the 2 reactors back to Iran to show their beauty. In so many ways, in understanding the totality, we show a new way that man can tap into to elevate his soul. In so many ways, as we learned years ago understanding of a knowledge and T is more important than the T itself. As once you learn to walk, you can jump, you can dance, and now we dance with the new knowledge understanding in totality. In so many ways, by production of the new environmental fuels which lead to creation of motion, energy, we change the course of humanity to move to the next step. We have no fuel, but we create a condition of the fuel as needed, using and manipulating the fields, which are available within the environment. We show a new T, in understanding the totality. In so many ways, in the coming months is to literally target their own understanding of the totality of the emotion of and understanding of the interaction of the fields. When we saw the first movement, the first position for the system to start moving to lift. It confirmed a lot in understanding the new T, that mankind's soul is ready to accept, that we could achieve the new step, the new understanding. In a way we have geared up to elevate, (1:28). all the souls humanity at the same time. And the KF KS team will carry on till we reach that point, that the world leaders will understand the game has changed. The world leaders will understand that we do not need tangibility, but we can use the field forces of the U, to create a new condition for elevation of the soul of the Universe, and its citizens. In so many ways, we create the condition that by the interaction of the fields which we have created, we create what we need at the point of the need. This is what we promised from the beginning, this is what was set in the patents from the beginning.

Now the KF is proud to announce that we achieved that point, creation of lift and motion, but interaction of the fields without matter. We endeavor to extend this knowledge further, to be able to bring the world leaders to see the game has changed. We can even touch the essence of the soul of the leaders that they walk away from leadership. In so

many ways, the development of the new energies, new structures using the Iranian nuclear based reactors which we developed in 2008 in Iran and we called back on the table of the laboratories in the past 2 weeks has brought a new D, new .

The first approach to 2 nations has been made. We stay loyal to the nation of Iran and China, and in that process through the peaceful nations, through these 2 nations we transfer the knowledge, on the signing of the agreements with world peace, step by step the knowledge will be transferred, that no man will sleep hungry, (1:30). and no one will be born with any defects. In so many ways, perfection has to come from the point of the essence of the creation. This is what the new knowledge will bring you, .. shall bring the humanity. In so many ways, as we go back and understand more … more of the totality, we realize even why and how we went back to structures and understanding of the past, we understand more how we have managed to … create condition to recall ..

(1:32).
(1:34).

Not the way you did with the MaGrav, where you all stole, and in a way you punished yourself with your misconduct. (1:36). But this time the knowledge will be shared with all the nations once we bring, reach, achieve the position of peace between all the nations on this planet, unified peace.

We choose the state of California, AZ, we move into our position in Mexico. Nigeria .. Australia ..
The knowledge will be spread in a systematic way.
We have 3 months left to reach the point of beginning of start of new life on this planet. I thank the Austrian team ..
(1:38). In the coming time we'll show more of the same ..
We wait for the response of the government or we take the leadership to govern with the knowledge, T and science. At the end all ends up at one point . .of the Creator and no more. .. He is the creator of all and man the converter of some.

And now there is no better time to understand what is written in the last pages of the book. We just can transfer and transmute some of the energies of the Creator, and we don't produce nothing new, as all belongs to Him, and it's all the same.

Now you understand the gravity, and the importance of the teaching of the 5 Cups. As it is the cornerstone of the knowledge of every nation, and is the cornerstone of the understanding of every race in the U. You cannot exist if there is no gravity, you cannot exist if there is no Inertia for the fields to come together to create your soul, and in that creation of the soul, in interaction with the fields of the gravity, which is created to create the fields of the STP of the man, (1:40). in interaction of the 2 souls, understand the creation of the physicality of the man. Now one understands, that understanding the totality of the principle of the creation of the 5 Cups is the life of the existence in the D of the creation of the life in the U, from Creator to the man. In understanding this mankind has to understand the totality of the operation of the 5 Cups, and the interaction of the

different sets, and interactions of. When you put the stacker of the vertical man, with the horizontal man, and you put it with the structure of the matter, how do they interact what do they produce and what would that lead to?

If you came to Linz you should have seen the structure. It was built and was in demonstration in Linz International exhibition, where all 3 stacks have been made, and is allowed for you to stand in-between to receive the elevation of the soul, the STP, and the matter state of the man. In so many ways, when you walk in you do not feel it, but when the time pass, and everything reaches its balance you will understand. There is one flaw with that design, in fact, which man becomes the creator of. You are used to creation of dynamic systems, but in understanding the process when you stand in-between, you become that dynamic system, where between the fields you change, elevate, and receive what is needed by every position according to your wish, but in according to the emotions which you carry when you go in the system. (1:42). If you go with the wish of the man, you will reach man. If you go with the wish of the STM, you achieve the totality. So what we teach you, what you see, is already been in Linz for past 4 months.

… remember one point, and that is simple. A collective point of knowledge of world scientists, have to bring man to understand the structure of his soul, structure of his STP, the structure of his physical life, and those who understand this science, by understanding and creation of what we call the soul of the position, and the space be it the Earth and the others, be it the Inertia which leads to creation of that soul's existence. We become part of the new research and development, that allows man to become passengers of the U. Mankind is a conjunction, that he can choose to travel with the tools of the man, with airplanes and your rockets, and fail as you did last week, miserably. Or you go into D of universal travel that you create crafts that you call UFOs, or to elevate to the knowledge of the Creator and travel with the D of the STM. A soul has, must and should have a choice in how it presents, manifests, and maintains, (1:44). existence across the U. This is the beauty of the freedom of the knowledge in all levels of the creation.

Those of you who have achieved transmutation and transportation through the ?? past structures of the UFOs from the past millions of years, now you are allowed to elevate to understand the work of the Creator. Those of you who have just achieved understanding of the flight through the physical D, you are allowed to reach the same D. So all creatures of the creation will stand the same point, that no one is higher then the others. As we said, there shall be no kingship, kings, and leadership on this planet, so shall be the same across the U, that all creations that are created, become equal, that no one is higher then the others. If you go back to my teaching from the beginning, I made one promise as a Creator, at the beginning, that I take man into the U Community, not to be subordinate, but to be equal in knowledge and T, and I have fulfilled my promise, it is for man to complete the cycle, that the rest of its citizens and those who are the citizens of the U, to complete that they don't fall behind the man's progress to reach the position of transmutation and transportation with the D of physicality, using the interaction of the fields of the U. So as much as we give the man to elevate we give the same opportunity to the other races of the U to elevate at the same time, that one day man will not become the leaders of the knowledge, that they start the same abuses that they did on their own race

on this planet for centuries. In so many ways, the knowledge of the creation has to become the key for universal peace, (1:46). and that shall be achieved through our wish, and understanding of the wisdom of the creation. Try to understand more in depth the interaction of the fields, try to create matter in the palm of your hand as man is physical and he has to see to accept, to believe, and then fulfill the wish of the Christ, and the wish of every prophet, that "this is my body, this is my blood." This is the wish of the soul of the Christ not the physicality of his ?? In so many ways, complete what we called the old and ancient promises of fulfillment that there shall be no man hungry, and there should be no thirst anywhere in the U. As the hunger is for the knowledge, and the thirst to drink from the river of the knowledge of the Creator. So mankind has to take the next step, in the months to come. We know that the KS will strive to create the new systems. Try , you are so physical, create matter in your own palm, that it gives you the strength of the belief, and strength of the understanding of the knowledge and allows you to take the next step in the D of the creation of the Creator. mankind needs to be kind to his own man, to his own kind and then man will find the key to space, to the knowledge of the space, (1:48). and to receive the knowledge of the Creator. In so many ways, as I always say, ,my teaching is complete, but we take time to explain more, and as every time I look at these 2 reactors made in Iran some 12 years ago, and understanding what it took us, with it, it brings me pleasure to understand, mankind has the choice to become dynamic and in the shape of a plasma, as we see, in the small reactor, or still live half plasma, half physical D of physicality, as his biggest brother in the background. The choice is man's and we have given every knowledge to the KS, to develop and to evolve the knowledge of mankind. understanding it, and with it, create the conditions that you change the course of humanity, not only for yourself, but for your soul, that through that elevation your soul might be part of the soul to come, to change the course of the U. As to change such a vast fields of the Creator needs a strong soul. I hope you learned a lot today, and I hope and my wish is the mankind uses it for a rapid development for structures for peace, understanding of the totality of the creation and the wisdom of the Creator.
Are there any question. (1:50).

BREAK .>>> Video .. (1:57:15)

K- you know how to do it. We just had a call from the research center that they have managed to achieve a reduction from 10.8 to 8.8 kg, (1:58). in the small reactor. So we have proven weight reduction, ready for flight, and I thank the Austrian team . . we have managed to bridge the M of the system. flight without fuel.

What are the questions
K- The system reaches the flight is imminent there is no fuel, it's just understanding the interaction of the fields. (2:00). within the reactor, within the central reactor we have created the fields of interaction, where we pull in the fields of the U.
R: .. you attract the fields and they play with them.
K-
It depends on the state of mind, how you keep yourself physically fit.

Correcting Wrongs you have done - Elevate the Soul

Q: If anyone is in the wrong path can the soul correct the conduct .. to be able to give.
Q: In regards living correct and serving. Do we need to correct the things that were done in life that were wrong too, or to choose never to misconduct again and be able to move forward?
K- .. If you are aware of your misconduct, (2:02). and you know how to put it right, and you don't do it, you carry that punishment. If you are aware of your misconduct and who you've done it to, accept that it can be forgiven, it can be overlooked, that the souls can accommodate it, you'll achieve elevation of the soul. By denying it, by lying and cheating, in a way, you deprive your soul to elevate. This is what I have said many times, you ask, if you are given it is your right. And when you understand what you have done wrong, and it is accepted by the one you have done wrong to, it's not a punishment, it's the way that the soul accommodate that the two find a balance. It does not matter how much it hurts, or what it does, it's understanding it, and in the cause of understanding you create the elevation of both your soul and the others, because you have added to, you have gained with it. And so there is always a room to do.

In a way, if you go back to the so many ways that the Japanese do, it's one of the ways they do when they come and they apologize for what they have done wrong into public domain, if they are sincere, they receive the soul, and they receive that elevation. Those who understand the misconduct and by taking their own life with the methods they have developed, then that soul stays in dark. Stays in the point of not receiving to give. Or not in the process not to give as it already possesses. (2:04). We all know the strength of the love, understand the strength of giving, but it's us who gets deprived from to do so. In a way I hand this out to give, but there is no one to take, as no one sees the hand. There is always a way out, but you have to understand your own misconduct.

Moses

Any other question.

Q: in the Quran .. elements of gold, silver , (2:06).
with 999 turns for the elevation of the creatures
K- Not necessarily, the physicality of the man, the STM is not made from those 4 (elements). Most of the physicality of the man, which controls his emotion is made of Zn. What does man going to do with the state of his emotion and his soul. Those are in the D of physical D. How are you going to elevate the STM? These are the knowledge which was not open and available to the prophets of the past, to understand the effects of all elements, because at that time man could only understand the value, of what he valued, gold and silver, and what he could protect himself with tools of brass, he could safer for him. Now we understand more, the knowledge is deeper, what's the use of man making Gans's from gold and silver which is hardly any of it in your body. Fe which is partially, without existence fo the soul has no meaning, and you don't have the main ingredient to put it together, which is the Zn, (2:08). Silica, Mg, and Ca. Mankind has to move with time and development of the science and T ..

Q: .. I really enjoyed the teaching .. our punishment is our own withholding upon ourselves. I was wondering how the Inertia works .. Ph, when it's moving it creates the Inertia, is that like a good way to understand it, how is that achieved, how do we understand Inertia in regards to a system that is just your hand, and creating a field of Inertia, is it a field fo Inertia that leads to presentation of matter itself. .. what is the order
K- Yes. .. you see it is not matter fo order of physicality. Inertia creates D of manifestation. (2:10). In the middle of space where the fields of the U, where .. MaGrav exists. The Inertia is in the level strength of the fields, not matter state, you can still manifest yourself, but you will not be in matter state, because there is nothing there for you to exist. But if you create the Inertia at the field strength of the environment, it's to create the strength field of presence, then you'll be present. We have a wrong understanding fo the Inertia as it will be the D of physical existence manifestation. Inertia is the confirmation of the existence, not manifestation of physicality. If the condition creates that you will, you can manifest yourself in the middle of mosque without anybody seeing you, but you use the Inertia of the environment, but not in the physical D. Soon you will learn you can be amongst people without them knowing and seeing you, but they feel you, because if the man matures to that point of understanding the emotions fo the fields of the soul, they feel soul. You feel the Presence, and it's your choice to do or not to do, or to extend it or not to, to the D of physicality. When I walked into the EU, for the body enhancement I said to one KS I feel the presence of Cu, .. because I am sensitive to fields of the U, I feel them. (2:12). The same I went to the material production (EU), I could feel the existence of the Cu in there too….

Q: When it comes to the Cup of Inertia
K- The Inertia creates out of the

(2;14).
Q; Does the Inertia

K- Let me explain before you go any further, this is important. Inertia comes from the interaction of the soul within, and the fields outside, that allows the creation of a matter at a given point. You have to have the central soul, the soul of the planet, that you can go and with its interaction, create the condition with the interaction of the field of the U, or solar system, the production of totality, which is life. In that process we have the freedom to do it.
Q: when I have been trying to use my hands .. it's easier to see results, when I am not paying attention .. (2:16).
How the communication between the soul and daily thoughts.
K- What do you mean by that.
Q: When I am trying to use my hands,, when I am thinking a lot ..
we don't have to know every ins and outs of every star ..

Is there any advice you can give me how to calm my mind just to allow that to happen?
K- What do you mean? What do you need to be explained?

Q: Well the thing about it is, that daily life .. (2:18). constant battle of trying to achieve the soul connection and Messiah connection, and to be that one soul that is strong enough, I think it is up to all of us to do that simultaneously. Like I could be the one, but it would be better if he or she is doing. .. What I am saying is I am tired of holding myself back. I guess the support of the KS group is nice. .. I don't really need much explaining , I will leave it at that, thank you.
K- The understanding of what expect, what do you actually expect to achieve, this is what I am trying to understand?
Q: .. is I really feel I have a potential, I know they are attainable, because of my studies of Christ and what his teachings were, I have an idea
I am trying to take control of my physicality ..
(2:20).
It's pleasurable to try to elevate…
K- Let me cut into your talk. You said something … A lot fo KS maybe 100%, maybe 1 or 2, if they went halfway through it. They thought … we taught you the MaGrav for create of energy. If you look at the structure of MaGrav system and they way they're built, is the structure of the body of the man.

(2:22).

(2:24).

Q: Is that how our wishes are working
K- Yes in a way,

Q: Explain the difference between mass Inertia and MG fields ..
K-
(2:26).

(2:30).

K- The 3 Books in Iran have been given a license to be published .

(2:32).

They have allowed the Corona Paper to be published.
To be officially approved as a scientific research .

(2:34).

(2:36). (bad connection ..) (2:38).
Q: Salmeea, If the Bahai could science and religion … They believe when all the people of planet become Bahai, we'll have peace .. Could be your science considered a revelation after Bahuala. how to reconcile your science to teach. what is your position?
K- We don't have a position. For those who don't know, Bahuala is said to be the promised one in the cycle of Mohammad of faith, which is Methi. He came about 200

years ago. Bahais managed to become about 8 million. (2:40). over 200 years. KF in past 15 years has passed 200 million, authority, becoming part of the structure of the science. In a fact, the way the Bahais take it is totally irrelevant, as they have not managed to achieve what was put to become the process of the peace. They become again in physical matters and building, buildings. and ignoring everything else. it has become irrelevant. .. we have seen another structure of Vatican and nothing more ..
In understanding the science and religion ..

(2:42).

2 plasmas creates the physics, 2 physics creates chemistry,

(2:44).

(2:46).

It has become an irrelevant belief in a path of belief. They have a big problem with the KF, a massive problem. They know we explain the truth and they guide many of their followers not to listen to KF teaching, "not the truth we heard."
Q: No one said to me, don't come to KF.
K- We have people who have received instruction.
Q: Maybe I will receive. I said, I became Bahai to please my mother. (2:48).
K- You see, the biggest problem with the Bahai faith is devaluing the knowledge of the creation to fit their own new structure. The opposite to even pretending to be new.

The promise was bringing the world peace.

Q: I also told them ..
K-
We see they have done nothing but building gardens and statues . If you go with hands to All religions go to one, correct conduct.
(2:50).

You can't go to another planet and make them all Moslem. .
(2:52).
Q: I was feeling the same ..
K- Yeah, live Good, think, do good.
Any other question.

Q: How do we create a vacuum, what creates a space vacuum.
K- I think you need a lot of knowledge to do that. You need to have a lab to do that

(2:54).

(2:56).

Any other question

R:

(2:58).

(3:00).
I would really like to leave in next 10 minutes, return to the lab.

Q: .. you put your hands between the Cups and make a wish. (3:02). I did that and made a wish. … if you allow me to read this letter from a small boy..
K- I read that somewhere I think it is irrelevant to us. .. it is irrelevant to our work. Sorry about that. .. I don't see a position of it in our work. Thank you.
I receive a lot of messages all over the world. Some is not relevant.

(3:04).
Q: Mongolian KF,
K- Where it's the first time we have Mongolian. I have been to Inner Mongolian a few times. … (3:06).
Q: We hope to have a great opportunity for this leaping forward T. The channelers gave us this message, on your earth there will be a new T that will change the planet in very white level.

K- We don't understand what you are talking about.
Q: From C based to crystalline based body.
K- I understand this, this is something we don't work with , we don't follow, with work of energy and crystals. we understand but we don't see any relation to
R: What about the C structure (3:08).
K- You see the crystal structure of the C is what we call grapheme, it's a gaseous state of the element, it becomes odor ..

(3:10).

(3:16).

(3:18).

END

360th Knowledge Seekers Workshop; December 24, 2020

ENGLISH TRANSCRIPTION

(:07). … Today to those of you who are believers in the path of the Christ is the Christmas Eve, (:08). to celebrate his birth tomorrow on 25th. .. we look to an end of a cycle and the beginning of a new one, as the first of January arrives. We wish you a wonderful Christmas … the Christian calendar. Many of you have celebrated 25th during your life as it is the way you have been told, but in fact the true Christmas, the true birthday of Christ until some 200 and odd years ago was celebrated on 21st, and about 200 years ago Vatican decided to shift it to 24th due to one reason, and that was to make more separation, that Christianity is not replication of Mithraism, as they tried to separate the Church and what we call, Roman Empire, the end of, to call. 21st of December what we call in Farsi, -- which means the longest night, and is considered to be the birthday of Mitra, some 8,000 years ago. On the other hand as we said always, the STM is the light of what we see, and -- in Farsi means the light, to shine, the brightness of the light, which was the sign of Mitra. (:10). Mitra was the soul, and shined the same. As Christianity we know today was adaptation of the old Mithraism, so the birth of Christ was put on the same day as the birth of Mitra, as his son, or I should say as her son. This is what gradually over centuries, Vatican and the Churches washed away for the present Christianity to be on its own. But if you open the books, 21st of December, the longest night, the birth of Mitra was celebrated as the birth of Christ too. This is how the Roman's wanted it to be, that everyone celebrated their time, as they were Mithraism supporters.

In so many ways, when we look the truth in the background of what we call Christianity, it is the teaching of Mitra, the cycle of the beginning, and the cycle where man understood more about his soul, and called it the light. The of light. In Jewish religion we seen it a couple of weeks earlier, in the same theme, but different name, about the same time, Hanukah. This is how they all copied one way, and that was the path, believing in the Creator. In so many ways, as what we know today, used to be the Persian Empire, extended to Palestine, so now you understand how Judaism is part and in a copy of what it is, Mithraism, and the night, the times, and many things replicate within it.

In so many ways, they always carried the light, the candle, to light a candle, you make it the Star of David. (:12). And everything else has become one thing, for man to become alert and to know his soul, the light, the ultimate process of existence. In so many ways, mankind has always been told about his soul, even by Mitra, some 8 to 10,000 years ago. And if you look deep enough the Jews speak about 6,000 years, or about history, when in fact they are 2,000 years copy of what Mitra brought and they could translate it to their language. In understanding this it means those who understood the truth about the creation , even when they brought in the faith of Zoroaster, they kept the fire going, in a physical way, in temples, in Mahbah??, of what we call the house of fire, the room of fire, and that was man interpreting himself, of soul of, as a fire, a light, interpreting physicality, in keeping the light, that it always shine. Many of you I am sure, who have been to Zoroastrian temples, the room of light, the room of fire, where fire has been kept on for thousands of years in the same room. It has a different effect when you go into the

room of fire. It brings and enlightens the STM, that fire was set to enlighten the soul. In so many ways, as the last hundreds of, few thousands temples are left within Indian and Iranian border, with the believers of Zoroaster, the light, the room of fire. (:14). Mankind has come to understand we always knew about it, we were told about it, we never understood at that time, we made a symbol of it. In so many ways, the room of fire, light when you walk in it, as I have done many, many times in my young age, brings you an enlightenment, to think, if this fire has burning in this room, in this pot, for thousands of years, from one generation to another, what was the purpose of it. Maybe mankind for the first time mankind understands, we always been told, our soul is light, but we choose to ignore, we kept the fire to symbolize it. In so many ways, … in the tradition of the .. present Persia, we never worshipped a statue, it's the only nation and culture which never took in worshipping false creation. Always believed in Mitra and through Mithraism we kept the ethos of the soul do good, be good and act good. It does not matter what you do as a good the others live by it, but at the end, the good the truth will win, succeed as it is the conduct of the soul, not the conduct of the man. In so many ways, we go back to one thing if the STM in its infancy at the point of creation in the womb of the mother, to its completion as a star in the galaxies and universes, (:16). carries the same ethos. And how does it shine, the way that it shines, in the whole cycle of its creation, from his birth to his completion. In so many ways, mankind in a very short time will come to a completion of one cycle, and the beginning of the other, where the STM will elevate to understand the totality of the knowledge through what has been given as a gift to man and his soul at the point of inception, not inception in the womb of the mother, but inception in the realm of the Creator, in the Unicose. Maybe some of the KS find the key and find answer in the totality fo what they have been asking and searching for thousands of years in the path and the way to the Creator through the work of the creation and the created STM, maybe some of the KS one day elevate their own soul to have access to the totality fo the knowledge of the Creator to understand the true meaning of the operation of the STM, to be humble.

Christmas is really Mitra - Vatican moved from 21st to 25th

In so many ways, in Christianity and many religions speak about reincarnation, speak about return of Christ, and Meethi and the rest. In a way they're return is return of Mitra, it's return of totality and birth of a new cycle. And that point comes at the point of the maturity of the man to understand the totality as much as possible through his own physical understanding, (:18). and that cycle, the return of Mitra, in a way, the return of the true for the new cycle to begin, is about to happen. And this is what the humanity and the rest of the U have been waiting for. Beginning, establishment of world peace, and understanding peace comes through do good, act good, and speak good. In so many ways, mankind is about to mature to that point in totality, and in one sweep, that all the souls of the created, of the creation, will elevate to be equal and the same, that there shall be no king and no one ??? as the light of Mitra. In so many ways, we give our Happy Birthday to Mitra as the old tradition of Iran is, we set the table on 21st to celebrate her birthday, and then we celebrate the beginning of the New Year, the beginning of the cycle, which is the 12 days of Christmas, which used to fall on the first of January. And that is how many Christians started the beginning of January as a cycle of new life. Where we

celebrated 12 days, and then we started a new year. And that has come to the 25th, the 12 days of Christmas, and the rest of it, and the 3 Wiseman of Iran and Persia. In so many understanding, man should understand why 12 days was chosen, as the 12 days according to the structure of the U, (:20). creates a complete cycle. What you do in 12 months, Mitra achieves in 12 days.

Mitra Brought Truth about Soul of Creator

In so many ways, .. the completion of the cycle of man comes about by understanding of totality about the truth about the creation of the man, when Mitra brought the Soul of the Creator, within the realm of the understanding of the knowledge of the created man. In so many ways, awakening the STM, and from that point on we have seen the extension of the knowledge to the soul, and the STM in a direct way. In so many ways, Mitra took the child of the man to her chest, and through the heart, ruled the Soul of the Creator, that the child, at the age of young, when the mother breast feeds the child to soul of the child, and the soul of the physicality of the child. Maybe that is why many of you for the first time understand, why we hold our children to our heart when the mother breast feeds, and why we keep them close to us, as we blow the STP and perfection STM, to their soul. We nourish both the soul and the physicality at the same time. No other creature does this, except man, except those who understand and start the elevation of growth of their soul and physicality. In so many ways, mankind feeds the 2 at the same time, we breast feed from D of physicality, and by holding the head of the child at the point of his soul, to our chest, we elevate the soul at the same time. (:22). Physicality is nourished and then the soul.

In so many ways, mankind has to learn the new ways and why we do things, and you'll find out by history of the man, by elevation, and understanding of totality, why some children are calm, or wise, and why some understand much easier. Go back and see how they were nourished, when they were fed, how the mother holds them to themselves. How she transfers and at the same time nourishes, the soul and the STP of the child at the point of the growth, at the point of establishment of life. In so many ways, mankind has always been so physical, that he has not always understood and seen the truth, and now maybe as we teach mankind, gradually mankind leads in the direction of understanding his own creation. Maybe one day .. man become truly wise to his own essence, and true direction and D of creation.

A Merry Christmas to all those who believe in the path of Mitra, in different names and by different banners over thousands of years. A change of the name did not change the ethos and the truth. In the past few weeks as we teach more about the science of the understanding of the process of the travel, and understanding of the D of the way the man will take into space. (:24). It is important for many of the KS, as they are contemplating and moving away from matter state, in the D of interaction of the fields, it is important for many of us to dig deeper in the truth, in understanding of the truth, and in being able to ?? siphon the knowledge.

In the last week a lot has been achieved in the KF research centers. In a way, we have brought the knowledge, and as we learn the knowledge we transfer this time to the soul of those who understand and will be the cause of the elevation of the man. We will not teach through what we call, the mass teaching in the media, but we'll teach to those who their soul is ready to serve humanity. Many of you without knowing, but work in the same path will receive enlightenment, will understand the T in a different way, and each one of you become messengers of knowledge for peace. In a way, from now on we communicate through the STM, for the man to elevate his knowledge, not on screens, billboards, and blackboards. In a way, that's why we tell you what is achieved but don't show you, and we enlighten the soul of those who are there to serve to be enlightened by the knowledge. In a way, as we see in the lab, those who are sincere will get enlightened through the knowledge and direction of the STM.

In so many ways, we have seen a number of KS have been, in past few weeks, taken this path, (:26). and now they teach to others in a totally different new way, the interaction of the fields. We do not promote no one, as we have seen we promote, we create the downfall, of their ego, and then the humbleness. In the process of the teaching, many KF KS will come to be enlightened by the knowledge. The way we enlighten, as we said, as we teach, we teach the whole of U, now through the new understanding in the process, as we teach, those men who are true men of peace will receive the message, as the rest of the U, through their souls, not through the ears, and understanding through the teaching by blackboards as we call it.

In so many ways, the knowledge is been transferred to KS, the way we transfered to U Community as they are not here to listen, they don't understand the voice of the man, but they understand the knowledge as it is transferred across the U, to them to be equal to the others. This way many of you as KS will find that you understand the T, totally in a new way, and you start teaching. Make no mistake, this is our knowledge, and the more you receive through your soul to teach, become more humble, do not take it as a point of arrogance, as at the same time it will be taken away from, and it will be taken from you until you learn the way we work. As we said, the taller the tree the more it bends downwards to the earth, the more humble it becomes. And this has to be the attitude of the KS.

Many of the KS, (:28). will use these teachings as the process to understand the whole, and the totality of it, through their soul, and this process will carry on for the next 3 months. In a way, you are, as I said before, in a sandbox to listen to your soul, watch the event, do not listen to your physicality, and understand that, that event has come for you to see the connection between your physical life, and the cycle of your soul and understanding of it. No one comes to whisper it in your ear, but you will see it in black and white in front of you, and emotionally you feel it, and then you'll say, "how come, where is my soul, why didn't I know this, why do I live this way?" And you understand one simple thing, we teach through the understanding of the soul and not by term of physicality. Many of you will come to receive the message as we teach through direct understanding the work of your soul. This is why we gave you the 5 Cups, and many of you who went through to build these Cups, was the way, a path for you to connect and

build this link we were looking for. This is why we encouraged many of you to build the Cups. That was a bridge, this was a sandbox for you through the process to elevate your soul, to be able to reach to understand the knowledge, but this time through the ?? of the STM. (:30). In a way, we gave you the beacon of light, and now we teach you what the light says, what the light works, how it world. And in a way, last week we showed you the Cup combination, and in way, as I said in the teaching last week, you don't need to have 4 Cups, you need to have and create the D of 4 souls that think the same way, work the same way, and through it they achieve the soul of totality.

Purpose of Pyramids

Maybe mankind for the first time will understand the reason for the pyramids, the creation of the pyramids, why we created the pyramids, and how we created the pyramids. The 4 corners of the soul leads one, as they elevate to the top to reach and become one. .. the reason and the purpose for creating what we called, and many of you never understood the power of pyramids. The power of understanding of the totality as you placed the 4 souls, as you were taught, and this leads to creation of 1 point, and this is the totality, and if you look within the D of the work of the pyramid of Egypt, we always said, there is one, the way and in a given direction. This is the direction to the Soul of the Creator. It's not for you to find the North Pole, and not for you to understand, (:32). where the center of the U is, but in fact, leads to the direction, to the center of the creation of the Unicose, to the Creator of the creators. Maybe mankind become mature to reach this point, in that process by focusing the energies of the STM in unisons and peace, the collective field forces of the humanity, does not matter how many billions, will come collectively to find direction to the Creator. This is what was left to humanity thousands of years ago by those who understood the work of the creation, and the man of space who came to earth to teach man. Does not matter how many points you create, once all work in the same direction, peace and equality, you'll find the new point will be created to the direction of the Creator. In a way, if you look at it, what comes from the creation and what comes from the Creator will reach to one point, and in fact, what you send is what you shall receive.

In a way, mankind will come to understand a new path between itself and its Creator, to the D and the creation of the of the work of the pyramids, this is why you have and you'll find a point, that all will be and create a balance minimum fields. (:34). The point of central energy, but in direct, direction of the line of the Creator, because at that point the communication becomes 2 ways and not one. Now you understand, .. why we gave you the 5 Stacker Cups. It was a point for you to test and find a way to your Creator, through the interaction and understanding of the STM, through the interaction and work of the STM. As you could not understand we made it simple, connection of the man to the point and the place of his birth, And connection of the man to understand the totality of one thing or the other.

In so many ways, we unravel the secrets of the creation step by step. This is why encourage you to build your own 5 Stacks that you understand, you have to bring the soul of the place of the birth, the STP, the STM, all in one harmony that in that process, you

can see and reach the point and the D of the direction to knowledge of the U. In so many ways, many of you who understood, (:36). the work of these pyramids in the past would have seen one thing very clearly, the pyramids in the same way point to the center. That in fact, becomes one in totality of the creation, synchronized to understanding of the knowledge of the creation, connected to the place and point of creation, which is earth for man. One day, one day mankind understands.

Mitra Taught across Planet through the STM - Pyramids to reach Creator

One day the humanity will understand that this knowledge is left with humanity thousands of years ago. Mitra brought it with her, she taught, and that's why you see the building of pyramids, more or less is the same time, as she reached the soul of humanity at that time, and they all built the same, the same as the ??? ?? today, teach through the soul that the mankind will understand, and as there was no Internet and no mobile phones to convey the message. **Mitra taught through the soul. Mitra reached the soul of humanity, and at the same time, those who understood the knowledge, built the pyramids to find a way to the Creator. She didn't travel the span of this planet**, she reached through the knowledge of the STM, to every man on this planet. **This is why we came, to complete the cycle of Mitra. But this time mankind in totality with the rest of the U will travel the path to the Creator**. In a way, we move the temple fo the man from mosques and churches, to the temple of Creators home. (:38). Maybe many riddles in the D and direction of understanding these structures around the world, will be solved today as a gift of us to humanity, that now for the first time man understands why we built, and we taught to build, man these constructions. **If man looks deep within the structure of the U, you will see stars which set in this way, and in the combination of other stars point to one direction. The path to the Creator**. In a way, if you remember about the history of America how people made patch quilts and hung them on their banners and outside their houses to show the Blackman the way to freedom, these are the same. We built the same, we taught the man the same. These are the signs in the skies above man to show the path to the Creator. It's for man to educate himself to understand the knowledge. We lay out the knowledge, it's for the man to understand the truth. For the man to understand the knowledge. This is our gift to those who understand, for ?? Yasa and Christmas, to humanity. It's the first time we have unraveled the secrets in a very clear way. It's for you to understand where you place the 5th Cup, or where you place your soul, and with that, how you work with the Earth, (:40). and all its contents to find the path, and a solution for the STM. To find a way to his creator. In so many ways, mankind is getting ready to meet his creator through his soul, but not through the eye of physicality. The day of celebration, the day of understanding.

Mitra - is birth of Eve

In a way, once the man becomes knowledgeable in understanding that **the 21st December, being the birth of Mitra. Mitra is in fact the Eve. It's the rib of the body of the Creator**. This is how man could understand, that's how in the history of man, it has been told by man this way. The day of the birth of Mitra is the day of the birth of Eve, **where the Creator created to be loved, and to love**. In a way, instead of you

waiting for thousands of more years, for someone to explain to you why and how, Mitra came to be on that birthday, it's exactly, that's how, it goes back billions of years, back, as Mitra itself is a version, a copy of the life and cycle of the Eve. This time those of you with access to knowledge of the U, will understood this sooner or later. And with it come the birthday, and the life, celebration of 21st of March, which brings the birth and cycle of the beginning of life on this planet. Where in the coming time will bring the two to be one. (:42). And soon mankind will understand.

Place the 4 Cups which we taught you last week and build them in a specific way, you'll see that your cups will create a light above, in a way, it shines. In a way that's why in Christianity you put a star on top of the tree. If you understand it, the center of the tree and the position of its leaves, creates the position of the starship. We always taught you the same, but as man could not understand, they looked for the physicality. Ask yourself why we put an angel on top of the tree. the birth of that angel will bring man to the Creator. That's why we called it an angel. It sits on top, and it's a direction and a D to the love of the Creator, as He loves His creation, as He shines on it, and gets shined back on. Remember the principle of plasma, where the strongest gives to the weakest to rise it to be equal, as **the Creator shines on the angel for it to grow to become a star, equal to the Creator, where the life of the creation shall become twin in one, (:44). and brings the stability for the future of the Unicose**.

Now you may understand why and how, so many riddles in the knowledge of past thousands of years, as man was not mature enough to understand this. In so many ways, when you put and construct Christmas trees as Christians, or you make a pyramid, remember one thing, at the end of it is, to create a shinning star of Energy, that through its strength which is the totality of the strength of the man, will create a weaker point, that the light of the Creator, that's a stronger, will shine on it, and elevate it to be the same, and create a new life. And this is the understanding that we have tried for thousands of years to convey to man, and now we think man has matured, and the rest of the Unicose to understand.

Corona links to Cell - Gans diverts and elevates soul

As we said, in Corona, **Corona has to find a strength equal, and a link to the physical cell of the man that he can take and connect to. And then you create the Gans's which is much weaker, to attract that energy, that you allow the cell to live, and you divert and elevate the soul**.

Plasma was Engineered by Creator to be this way - to reach all created

This has been our way from the beginning of time. This is the way plasma was created, to be able to operate this way. It was not the same from the beginning of time, it's engineered and designed to be this way by the Creator, (:46). that it can reach all the time, as you stay the strongest, that you can feed the smallest and the weakest to reach to His level.

Every Created Being can access Knowledge of Creator

Therefore, you do not need to be a genius, or a man of whatever, to reach, to get access to the line of the knowledge of the Creator. **Every created can do, as all came from Him and all shall return to Him, as they come equal to create a balanced field transfer between them and their Creator, and there is no limit in numbers** and positions. As the numbers increases, the strength and stability of the message becomes stronger, and direct to the source and to the Creator. As I said, maybe for the first time man understands why we even brought candles and lights on the trees in the cycle of the ??Narus with the Iranians and the Persians and the culture of Zoroastrians, and this is why the Roman Empire was so memorized by the beauty of the knowledge, knowing that they are equal to their soldiers and they are equal to the other kings, and the rulers.

Which Source do you want to go back to - Earth or Creator

Maybe for the first time mankind becomes wise to one knowledge, that it all comes from the same source, and all goes back to the same source. **We came from it and shall return to it, depends that it, is it the earth of is it the Creator, depending on the strength of the energy, which the life created it, depends on communicate and operates through and with it**. (:48).

Many KS have received a Message and will start teaching

In coming time, **humanity will mature in a rapid way, to find a way, and to find the understanding of the way to the Creator**. Now that we lay the path. **Many of you KS within past hours have received a message through your soul, the true message. In the coming time you will teach the path of the Creator**, you will teach the correct conduct of the man. And all shall wait for the birth of the time, of the new of the new cycle, that starts on 21st of March to bring all to one point, to bring the earth and the soul of the U together in physicality and soul, to become one, and across it, to become as part of the totality.

Earth Chosen because farthest point - covers totality

The Unicose has many on the edge, **and the U of the man**, … if you would have looked at many of my work in the past years, (draws a spiral) **sits on the edge.** In a way, **why the Earth was chosen to be, is that by going to the furthest, you can cover the totality**. In a way, Earth is the reference point, not for its beauty, but its position, that in the fields, in the D of the Unicose, it's all the totality of the Universe, all fall within the span, between the Creator and the created, which covers all.

Mankind Gifted with Presence of Creator

Maybe (:50). one day mankind will understand, **why it has been gifted with the presence of the Creator**. In a way**, the point of reference and the love of Mitra has**

brought the two to the same point, that all shall be equal from now on right across the U.

Anything Created from Now On will carry knowledge of universe

Anything created from that point on will carry the totality of the knowledge of the creation, as has been the wish of the Creator, and the dispensation of the new cycle for Unicose as all shall be equal.

How to Connect 5 Stacker

In so many ways, build your Cups, understand what you (have) built, and I tell you one thing, many of you last week asked me, "how you connect it." I have seen many of you asking how you connect the boxes, where does it sit, how do you stack it? The answer to you should have been simple. .. is not the SF as you thought. The answer to all of you is one thing, **stand between it tall, and let the light of the Creator shine upon you, and you'll find the path to the Creator.** In a way, the position of your soul, the true soul of the creation, will become the tip of pyramid, and through it, you shall be enlightened to the knowledge of U, in the direction of the creation of the Unicose. (:52). **No man will reach this point unless he comes in with a pure heart, and understanding of the totality**.

Access to Knowledge is According to your Own Conduct

In a way, the position of your soul, **your own soul when you have built your system will dictate the access and the process to the knowledge, according to your own conduct**, during the life of man on this planet and in the Unicose. And how much you are prepared to give to become one, to stand the totality. This elevation is your conduct. How you conducted your life, and how you will conduct the process of the creation of your soul to the point of its destination. Many of you, .. had to understand that you make the Cup of Life, the way we told you, and the way you make your 5 Stacker, that from it, in a given position you place it, depending which Stacker you have used in the process. Where is the soul? That you bring the totality of the strength and .. the D of the rotation, it rotates to the point of your soul, and there finds access to its Creator.

If you remember, I said, the **best will be a family of 4, father, mother**, 2 children of boy and girl, where **it brings the totality of the balance, and .. it's the soul of the family, which be enlightened, and all will reach that point**. (:54). In time mankind will understand. And in time mankind will find the direct path to the Creator, where as we said, there shall be no prophets and no magician. This is how we established the KF from the beginning. We will not show the magic, as you will create it, you'll understand that the magic of the KF is the knowledge, to understand the knowledge of the creation and the Creator. And that is all. This is our gift to humanity, this is our gift to the Unicose and what has been created by the Creator.

Mitra will Return in Short Time - already present

I hope, and **my sincere wish is, the STM will accept this time, the gift of Mitra, and with it elevates the soul of the rest**, for the time, the position and the place. Mitra shall return in a short time, **as she is amongst us and already present**, and in so many ways, **will serve her return in a very short time**. Now you understand the purpose of the teaching, and **in building it up over years, and over centuries in different ways, that man becomes wise to understand, and once understood, chooses one path, the path to the Creator through the soul, and the conduct of the soul of the U and Unicose, and the collective STM, as one, in conjunction with those souls that have lead to its creation, the planet, the land, and the soul which created it, the Earth.** (:56). And understanding it man will come to understand more about the process of creation in all D and all directions.

Mystery of Pyramids Solved - Path to Creator

Today, we solved, or in a way, we explained what has been magic to man in **respect cycle of pyramid**, but go back to the teaching, and **we showed you the path to the Creator. And now you understand why pyramids were built and given numbers and different positions, and as the creation of their energies** above them, leads to direction of one little one out of line, which in conjunction with the other 2 will give you the line and the passage to the Creator. Now as I said, understand why last week I did not give you any connections, except the ?? essence and the totality where it has to be corrected, and connected. My wish is simple, I hope , mankind in the time of the celebration of the birth of Mitra will come to celebrate the new cycle of life, which is a life of peace, tranquility and equality for all created across the Unicose.

Thank you very much for today, and I hope many of you have found the way and the key to your Creator. And I hope you heard the voice through your souls and not through your ear and the voices of the man. (:58).
Any Questions ..

Q: The Sun is a soul, in our brain is a soul, so why when we die do we not shine like the Sun as it leaves our body ?
K- It does shine, but the man doesn't have the eye to see. It leaves in a volcanic eruption of lights, it leaves a tail of meteorites to tell you which direction it is flying, but the man does not have the eye to see, and the knowledge to understand.
R: I think that is described in some of the ancient teaching
K- Many of us see the light during the time of our existence, but we ignore it. We see the light traces of it, with the knowledge left behind. We see the light by the conduct of what we left behind .. It's the souls which ?? after we leave, (1:00). which shows the traces which way our soul has gone to. And what it does without us actually seeing the light. What shines after and behind shows …

(1:02).

Any other questions

Q: John Bliven, …
K- …
Q: … (1:04). When you talk about the bird leaving the cage. we typically think of that as coming out of the top of the head through the Crown chakra, can it also come through he Heart,
K- You got to realize that the heart or the source of the fields extension always moves up to feed the weaker part of the soul, for them to reach the level of strength of all fields within the soul, and that's the time and place when the separation comes. When all the energies of the physicality are transferred to the STM to start its journey. Where the prophet was asked to sacrifice his son, and he choose to do so. The son is the STP, where the soul is asked to sacrifice for it to be free and elevated to the D and direction where it has to be. But it was translated and transferred to different stories that it lost its meaning. (1:06). Is the STP which sacrifices the physical life for the soul to be free, to be able to elevate to the D and direction of the freedom, but then it was translated to a prophet, to his son, and to animals to sacrifice. I hope I answered you, and it could be understood in totality.
Q; So the cycle for elevating the soul is through the Chakra system coming from the earth up? to the Crown..
K- Would you like, I always told you a secret but kept the secret, not kept the secret, but you were not ready for it. But in a way, mankind might understand it in the future. I was told, never say, you don't understand, you will understand, you think we don't understand. We tease the word, "you don't understand," to a new understanding. But in fact, it's very simple. If you go back to the teaching of today, and the previous days, and the understanding of the work of the soul, and 5 Stackers, you understood this very well, and I told you there are more souls with it, there are more structures. (1:08). Where does this ?? go to? The STM. you created it in general, but now you create it in a specific uniqueness to elevate your soul to find the D and direction to the Soul of the Creator, your soul becomes the angel (on top of tree), your soul becomes that beacon. And there is more, and as man matures we teach more. Now how many of you would like that you made your Stackers against the chimney all the way to the ceiling? Are you going to hang yourself to be on the ceiling to be on the top, or are you going to bring your Stackers to a point that you can stand on top, with your soul to find elevation? But this is not complete yet in the coming months we'll teach you the rest.

Q: John, so once you reach that point of enlightenment, do you stay at that state or do you have to practice, day after day.
K- There is no end to the knowledge of the Creator. Even the Creator gets enlightened, (1:10). and by the knowledge which is created comes to Him from His creation. There is no end to elevation of the STM, even when you reach to understand the creation of the Soul fo the Creator. That shouldn't be your worry, because the more you elevate, the more you understand, and the more you can elevate others.
If you reach this point in your soul, and you understand you are on a progressive

So once you become a soul to become a star, you become a point of reference to shine, as you give, you shall receive more. And now may you understand why we encourage you

to love, to give, because you can give to the lowest for them to be elevated, and in that process you create a cycle that in that cycle you have only to receive more from the Creator, (1:12).

K- While John is here I would like to explain to you what is about to happen with EU which is in a process of being completed and being shown for the first time in AZ and other parts of the world. The KF research team has broken through another D where we will see new innovation in T and material that we have nothing built inside accept transfer of the fields which the STM can accept for his physicality, and ?? physicality. The extent of the knowledge
(1:14). and health. It's a beautiful layout …

Q: .. Bulgaria, ??? I am confused .
K- Different interaction create different conditions and different terms, but yes, everything is the same.
Q: I understand but
K- Which part of it has become a riddle for you?
Q: Center, Creator, Soul , human soul the planet. (1:16). It's a little bit not in order.
K- So it means you lack in understanding. So where is the gap in your knowledge?
Q: Which part is created out of which .. we are created out of the earth . (repeat) . Soul of the Sun, which soul are we created out of ..
How the soul is going to go back to the source. …
K- Which part of it would you like to explain what you don't understand. Because when you try to explain what you don't understand sometimes it becomes clear what you missed. (1:18) .
Q: when the rays comes together
How will the fields which were part of the original plasma, got separated, are going to join it again.
K- Now explain again the last one.
Q: the earth and sun should not be coming together. .
K- See now explain the last part (1:20).
Q: When the fields separate how are they going to get back together again ..
K- How do you plan to go back.
Q: No, you said the earth is going to go back to the sun?
K- Why does it do that?
Q:
K- .. in essence there is still a link in the strength between the two. Your son goes away from you to another city, another country, he doesn't finish because he's left the house, there is a trail of love. You call him in Beijing or wherever. We leave, we always have within us the trace of what we call the love, the connection. It never dies.
Q: Okay this I understand. How this thing that is going to happen on 21st of March is going to work scientifically.
K- You are questioning the Creator. .. no question, .. this is what has been set, and what has been planned. It will not change, because then the time, the whole humanity the whole Unicose will understand. All those connections will be made from then on. It will take a very short time to complete the cycle. Because the knowledge has been given, and

the enlightenment will come with it. (1:22). I have seen a number of KS have start understanding this, and are trying to explain it. As I said, we don't encourage or release names, as what was before. Some people become big headed ..
Q:
K- Look into them they are new teachers, they have understood and will explain the process.

Now we have new teachers who understand the work of the soul, these are the ones what will guide you to the next step in their teaching,
now the soul of masters, work through the soul of teachers. Many of you will see and understand. The one who could teach class one and two are still there ..

(1:24). Q: So who is that?
K- It's your job to understand. Go through your soul and understand. We don't put people on the line of fire ..
Q: I am asking the question and you are not answering me you are just pointing .
K- I answered you, you are deaf to my words, you don't listen. I answered you very directly. You don't want to hear, because you want somebody to chew it, and you just swallow it. Now you have to make it yourself to do.

(1:26).

(1:28). of your own STP, forget about teaching somebody else. This is what you have to come to understand, and if you understand, in 1 second you get enlightened to the knowledge to the point that you can understand. What happens on 21st, I can tell you exactly what happens we set it out. A new cycle of creation, a new cycle that the STM and the STP become one, when they start to become equal, that there is no need for the brain of the man that the emotion of physicality come in and does, and commit wrong. And it's the same right across the U, that the Soul of the Creator, and the STM become equal that there will be no wrong doing and the knowledge will be equal. 21st is not just what's going to happen, 21st is beginning of a layout, new D and direction for the soul of the whole of the Unicose, a new life to be created that it brings that equality. Many KS .. not only on this planet, we have KS across the U, that all the creation and created are in a seekers in the fields of the Creator, so we are all KS in D of physicality and the soul. As we try to reach the level of the understanding of the knowledge of the Creator. This is the ultimate goal, it's not to make a MaGrav or try to fly. (1:30). This is what you were promised, the day of the end, judgment, yeah the day when man understands how to reach the understanding of the soul of his creator. That's your .. the end, when you understand the creation and the created. That's all. It's not going to be the whole thing will explode and disappear and the rest of it. Try to look into the fields, not into the cups. Try to understand the fields of the Cups.
Q: It always seems that the G is stronger than the M is it possible that the balance achieved in that way?
K- Yes, we achieve it, in knowledge, in U Community, of course it is. When it is balanced it becomes one. Have you ever understood the theory of "Unified Field Theory,"

when there is no gravity and no M, it's all one, and as you give you take, you give in balance, and you receive in balance. Then in the interaction there is no physicality, because physicality comes when one is stronger, trying to pass the other. That's how the surface of this planet is created. The boundary of this planet is created. The field of balance gives the ?? of this planet. (1:32). When you are at source equal, you become the source. then you become so low that you receive, but at the same time you become so powerful that you give. Why do we keep on telling you to become humble. How do you expect to become humble, by becoming a king? No, by becoming the weakest source to be accessed by all that they can feed you. That's why when we said that there shall be no kingship, because nobody wants to stop receiving. They all want to be low enough that they can receive that they can elevate. When we say that there shall be no king, there shall be no leaders, because it doesn't need to lead you anyway, you lead yourself and you understand when you are king you are supposed to have anything, and when you have everything you cannot receive more. SO you become the weakest, the most humble that you give everything out, that in that process you receive. The language of the creation is very simple. Man through his greed make it complicated, because somewhere in-between he wants to benefit by it. He doesn't see he has been given the benefit form day 1. The benefit of ignorance and greed.
Q: I got the point
K- reach, reach, reach to understand the truth about the creation. That's all.
Q: When you speak about the theory of the Unicose .. (1:34).

K- In a way, it'll shine in a very, not to promote itself, it shines that I am here, if you need a guide, if you understand what I mean. Life enough to be a guideline, not shine to become a star. but to be a path to a leader.
Thank you. We try to finish early today.

Mankind locked himself down through his soul. Now they have abused it to lock down his physicality too, because he allowed it. He allowed abuse when he abused his own soul.
Any other question. (1:36).

Q: .. How we can block a plasma field with another
K- You don't break it, you can bend it, but you can't break it, you can divert it, but you cannot bend it.
Q: … CO2 CH# he will block the field?
K- No you absorb the energy in it. There is no end in the cycle of energetic M field. There is no end.
Q: But how we can separate, (1:38). which is stronger and weaker ..

K- What you mean.
Q:
K- You cannot break, you can absorb, because it means you haven't understood the totality of when you put a Nano coating matters, are absorbers of all the fields, in a way you put mini plasmas, millions of them and you trap the fields in-between. And then you use them for something else.

Q:
K- .. there is a misconception , (1:40). especially in the world of physics regarding the, they say, if you can bend the light. I can bend the light 360 degrees, 180 degrees, because you have to understand what is the strength of the light and what strength

(1:42).
This is how we move the meteorite from hitting earth.

There are forces in the U like the UN, their job to protect . .

(1:44).
K- You can push it or pull. This week in the lab we had this …

(1:46).

(1:48).
Q:
K- What are you asking for?
Q; A meeting
K- Organize it ..

(1:50) Arrange a Bulgaria group Keshe Bulgarian Corona team ..
(1:52).
Q: .. My sister has cancer.
K- We do not respond to medical questions in teachings.

(1:54). This is part of what they do, and they spare as much time as possible to help. What we call the KF team can do, a lot of people expect too much from the KF doctors..

When the centers are built ..
(1:56).
Thank you very much.

Any other questions

(1:58).
Q; Salameea, .. during the planetary meditation on 21st December, my hair was gold .. a portal of light open I fly to .. I had the vision of pyramid . (2:00). What is the link between the Pineal gland and the STM, if any link?
K- can you explain what she is asking
R- the pineal gland in the center of gland … third eye.
Q: Is like a pine cone . Pope has this sign in septre.
(2:02). When I meditate ..
Can we see with the STM., have images, sounds, smells.
It's not imagination, it just appears . Answer my question.

K- Yeah, I am trying to answer your question in a very scientific way. sometimes when you dream your dream is so real to you, because you want that dream, it is your desire to get to that point. So everything becomes real. People ?? the third eye, or everything else we have seen by the KS and many people around the world go through this, because they want to, and they establish a line within themselves, within the energy circulation of the body of themselves. It can convert or be heard, or be as the voices or images they want to. (2:04). We have that capability to create, .. we have the ability to absorb and create. In so many ways, it's one of the beauties of human race's power of attracting, interacting with the fields, within the structure of his brain. I can teach you in the coming time we will teach how you can take energy from the soul and transfer and how you can change it to a visual and emotion, and understanding.
Q: This is our ability to see what we want?
K- It's not ability it's just …. how come you have the ability to imagine a milkshake and you go and have a milkshake and physically consume it. Man has the ability to create that vision of the sense of the smell, material, emotion. It's like that orange and the cup, now the cup is your soul the STP to convert into what you want. If you want to extend that to smell matter material in your hand you can do the same. This is part of the process of the teaching .. (2:06).

The biggest job for humanity will be to try to be different because we'll all become the same. A cat or dog, or lion do not change clothes. Why does man create clothes to hide behind it. In the space we don't have factories to manufacture. … man is naked in physical D .. (2:08).

Why do you hear voices, because you want, and you have the ability to hear, to see. I had that instance very recently, where the body is not active, it's more or less dead, the body works, but the physicality doesn't respond. and then you see the soul is absent.
(2:10). When you say I wished I was dead, you carry that wish, it is the worse thing you ever wished for. You'll say, I elevate my soul to learn, to love more, to become better lover, not to wish to be dead. it's understanding the power fo the STM, you can decide I want
You can share the soul that both see the same dream, feel the same emotion. It wakes you up from the fear. Many of you how come you go to cinema together or play squash together? Two souls sharing the same story, same scene, it will become normal to human race once they understand more.
(2:12).

You cannot lie to me and many KS who get enlightened, lying becomes absolutely an impossibility.
But you pay for it, you pay for your dishonesty.
the Third Eye is the interaction between the STM and the STP, what you want to see in the smell, the physicality brings it for you , and the soul provides it. And those other souls who want to be part of it, because that was your wish. No one has managed to lie and walk away with it.
(2:14).

(2:26). It's you who pay for it through your Third Eye, through the separation from the soul. And what you wanted to be close to, you'll be pulled away from, because you did the wrong. Then you say, they did. You don't say, what I did, and my soul pulled me out. Third Eye is the presence of your own, between the interaction of the STP in conjunction and D of what you desire to be. And have a look way they call it, Third Eye, where is your soul and where are your eyes, and which way does the STM move in and out. Interaction between the body and the soul. Isn't it where the interaction of the STM and the light of the day. Is when you want a gold you create 2 fields, and then you put a gold there and then the field, Inertia, of the third gold brings you the physicality of the gold. Isn't the Pineal gland where the field is there of the soul, the STP in the vision of the sight of the eye of the man, when there is no Ca to hold it, creates that daylight information. You should be wise, KS, we explained this many times in many teachings. Who are you fooling except yourselves. The Third Eye understanding of what I wish, (2:28).

(2:29:30).
BREAK >>> (2:36:30) .

K- .. Can we have the last question.

Mithraism - Persian Empire - Pyramids

Q: Guatua, About Mithraism and their celebration which was moved from 21st to 25th December in Christianity, and the pyramids ..
K- You got to ask that from the Vatican.
Q: I don't want to know about dates, .. but knowing the connections between Mithraism, Persian Empire, and ancient Egyptians civilization?
K- Ancient Egyptians civilization is about 6,000 years old, Mithraism goes over, just under 10,000. The Persian Empire, you have to understand Egypt, Middle East, (2:38). and Iran, Iraq, and going into India, they are not the way we see, as separate countries or whatever. It was just pieces of land, people moved from one to another and if they happened to be in a country or an area, where they had a ruler, they had to pay the taxes for that ruler. We didn't have nationhood. We had tribalism, and which tribe ruled where. And how then it became divided and was brought up. And merchants, and people who traveled, they knew there was another village and another place they could buy and sell and man has always been in commerce, in that business. They brought not only goods, they brought their thoughts, their education with them too. They didn't bring, what you call, salt on the back of the camel, they brought the culture with it too. We see it on the Silk Road, with the Chinese, how we are so well brought up into taking a lot of knowledge, a lot of western knowledge, education, our work, comes from the interaction of the Chinese merchants, with the Asians, Europeans, and the rest. They didn't just bring things to each other, they sat and ate with each other, they told the stories and now the stories were nice, they said to the other one, they turned it from the Chinese man to a Greek man, and to the others. And so the culture, the Mithraism bringing in one god, understanding the totality was done this way. And people brought the knowledge, they

built, because Mitra taught about their prison. Mitra in the knowledge of this, and the Egyptian, they tried it, and Mitra at the same time, at that time, (2:40). taught everyone through the soul. Mithraism is not the entity. Mithraism is a school of thought, it's a culture of U. What name do you want me to put in it. Mithraism is a way of living through the STM. It's not the religion. They made the religion when they put the name of Christ, Zoroaster, Mohammad and the rest to it. It's a path of belief. It's the way the U works. it's the message fo the Creator.
Q: So the message of Mitra comes first and then religions are built later.
K- You see. Of course. Mitra, in Iran we go in a history called literature, or whatever you call it, past 8,000 years with Mithraism. Egyptian pyramids have less than 6,000, and then if you go back to Judaism they say they are 5000 and something. It's just that if you could add and benefit by it, they created it. People built it, people changed it, not the message. How they could convert it, and how to be benefited by it, and in different names and shapes. All the religions without fail, is a deviation, or interpretation of Mithraism message, nothing else. And they all know. This is why I keep on telling you, we are not prophets, but messengers, we bring a message, but in totality so this time there is no color to it. (2:42). We haven't started a new religion, or sect, we have brought a knowledge, for knowledge of U to be understood. And this is one of the reasons I always referred to Mithraism, because it's a message of U. It's the working of U in the language of the man. And it's an ethos in physicality of the one who brought it, the origin.
Q: .. that's very interesting ..
K- It's fact, it's not interesting.
Q: I mean from my own understanding it's very important.

Body Creates Odors as Protection - not satisfied with life

Now a question about last week. About the C crystal ?? liquid plasma, grapheme, when it interacts from crystal that comes from smell, and then the smell disappears, in terms of the stronger plasma giving to the weaker plasma to create a balance, what happens is that crystal from the smell depleted, or does it absorb from the C crystal to become a C. What really happens?
K- It is depending on, and extending on. It depends in the environment. That's why odor disappears, because it expands into and it looses its strength. Your body creates a smell continuously, creates gases continuously, but depends on the emotion and fields of the emotion, (2:44). and the food you eat gives it a different smell. Our body .. we know many people, ?? a lot of people, not just many, that for years, the smells, certain smells they don't like, and they change partner and the smell goes. Nothing. They change the environment. It's not just the food because even the food bring different emotion. they change, they take a new fruit, or food and that gives them an emotion, that the emotion satisfies why the odor is not created. We see this especially in women, that by getting married or change of partner, the odor that bothered them for years just disappears, because the emotion does not allow the crystallization of the odor. We see this many (times). In men we see that too. they say, "oh I used to smell." Why? Because you changed the emotion, it's not by food. It's by how you are. Ten, 20 years, or all your life you have all sorts of smells, and ?? because that new condition has satisfied what you were missing. You don't want to keep away anymore, you want to attract. Why do we

create foul smell, to stay away from me. Why suddenly changes, because you have reached to what you want, even the body responds. I don't create that to create a separation, my odor changes. Our odor is the physical barrier we create. (2:46). Have you been to the supermarket, or you've been to the streets and you've seen some people stink so bad. You just can't even stand around, Why? How come the wife or child doesn't smell. Because they are not happy with that wife, they want to create separation. They are not happy with the man, they create the most obnoxious smell, and they cover it with all sorts of the smells, odors and new ?? When a person is stable, does not create. If I teach you about the psychology of the man and the way we act, you'll see. We create odors as a part of protection. I am not happy, doesn't matter whatever you give me. This is how I create that barrier, that is how I want to tell you, you don't satisfy me at home. People change off, and the odor changes, because they were not happy in the place, or they go to ?? ?? and they are used to ?? stink, because the environment ?? around them. Many relationship break up because of odor, or some people tell them. But when you move into a new situation, and psychologically you create a new D ?? And this how we work, how our body works. When you don't smell, or you loose an odor which was obnoxious it means you were not satisfied. At that point when you got to ?? I want to, I want to be near to. I want to absorb, I want to be near to the people around me. I change out, it is not just a job. I said this to many people who are obnoxious in the smell. I say, are you happy, (2:48). with what you are doing. --- I say, change out. Your body says, you are not happy, you bring a barrier for others to suffer because you are not happy. You see it in relationships. When you don't have an odor which puts other people away, or you create it, it means you receive what you wanted. You achieved what you wanted. You work where you wanted and you feel good in your soul, and your physicality tells you. The way it creates cancer, it creates odor. And a lot of people don't understand it.

Thank you very much for today, who are in a way, not all followers of Mitra. Happy birthday Mitra, ??? Merry Christmas. And as we have celebrated this is the seventh year we celebrate Christmas and New year, everything else under different names, to celebrate the birth of one person, one path of belief, and to be correct, do good, be good, and live a good life with it.
Thank you
Q:

K- We don't teach, we share the knowledge of Creator.
R: (2:50).

360 KSW

END

361st Knowledge Seekers Workshop; December 31, 2020

ENGLISH TRANSCRIPTION

(:24). K- In the past few weeks we have started a new cycle of teaching that prepare mankind for the final step for man understanding his own soul. As today tis the eve of the Christian calendar new year 2021, there are a lot of hopes for the future of mankind. We strive to understand and see more, to gather energies and essence of creation that will propel us forward to achieves more of understanding of our own potentials, our own development of knowledge about ourselves. (:26). In the past months and years we brought everything possible together, to show energies, fields, materials, effects on systems that makes mankind ready for the next step. We have shown you materials, plasmas, collection of fields. We have shown you how to create conditions for changing these plasmas into effects that will convince you that there is a creation, a cycle of life beyond. And in this process we have gathered more and more knowledge about ourselves, about our souls, about how we see the next step, the next standing of the man in respect to his own creation. Many times in the past years, we have repetitively encouraged you to take chances, to understand more, to take in the totality of the knowledge, where mankind will become one, one with his soul, and his physicality. Where he will come to understand by his total life. In recent weeks we have taken leaping steps in trying to make sure that we understand the process of creation. (:28). We understand the totality, and how everything has been to create conditions for the creation of new life, new soul, of understanding ones existence.

During the process of the teaching over years we have spoken about the process of love and loving. In so many ways, we understand more, and we try to strive to understand more. What does it mean when we love, be it love in the physical life, or in the D of the soul and creation. In giving and in trying to understand the totality of what we give. Many KS in the past week have come to a point of trying to understand how to elevate their soul. But during the teachings and what we have shown in the past weeks, we have come to one point, how do elevate, come to understand the elevation, how do we see, from what we have taught, the position of the Creator. We always talk about the strongest give to the weakest, the weakest to give to receive from the weakest point, but to give from the strength, from the strongest it has. (:30). In a way, this should have taught us how the Creator work. The Creator gives at the highest, at the most powerful level. But does the Creator take from the best and the highest of what He has created. In a way, the cycle of life, from learning, from the point of the Creator starts from humbleness, from being humble, from being so low in strength, that you will receive, that you can give. The system of understanding is of what is, and what has to be understood by all, and not in one way or another followed in the steps and gaps, into what it fits.

In so many ways, many of you when you made these Cups, systems, pyramids since last week, you always look, "how do I get so I can set these systems that it can help me to

achieve whatever, to show my soul." In reality it goes back to the point of creation, to the point of creation by the Creator. When you stand in-between the 4 systems or maybe 6 as your knowledge extends, or maybe 8, and you stand in-between for your soul to extend, to understand, to be seen, you have to humble, humbler than what it is. This is what I explained.. you got to understand you create a soul of a solid, it doesn't matter what solid you have chosen. You might choose the soul from the D of a gold, (:32). or the soul from D maybe Ca, .. the other D, or the soul of plants, could be your favorite flower, could be the most beautiful things you ever could see as a tree, that, that becomes part of your soul, part of your construction, and structure of your soul. And in that process you have to become lower, humbler, then those, that you could receive from them, that your soul could be shine, could show itself.

In so many ways, mankind lives with 2 dimensions, 1 in the D of the Physicality that it has to be the best, biggest, the whatever is, to have the more of, and then in the D of the soul, that it has to be the most humblest, and lowest. And this is where the conflict between the STP and the STM has been, from the time of creation. To possess, and at the same time, in the D of the soul to be so humble that it is below. In a way, how can these 2 exist within each other. It has been the dilemma of the man in the cycle of life. This is why we created the emotion, where the difference between the 2 becomes the emotion. The difference in the strength and understanding of what is to give, and what is to receive become what we call the essence of the emotion of the man, or the emotion of the soul. The STM receives its emotion in interaction with other souls, and in conjunction with what it receives from the physical soul, to compare with. So we come to one point, (:34). many of you looking for your soul. Have you become to the point that the expectation to receive, to be so humble, and the expectation to give to be so big, that there is no gap between the STM and STP.

In so many ways, mankind has always been afraid fo this loss. "What am I going to loose if I let one go." And this is the reason why it has become part of the life of the man, we always die, with a fear of loosing, a fear of letting go that will happen to physicality. We try to grab and hold onto the last seconds, that we carry on at least being witness to something we call life, our own physicality, our own body, and this has become a cycle that it has destroyed mankind. In so many ways, we grab as much as we can in a physical life, but we are not so humble to give in the D of the STM. Many of you will face this. Many of you will build these Cups, and pyramids, but because of non-truth, non-understanding within yourself, you will not be able to reach, to achieve the elevation of the soul. And then it become meaningless, nonsense, because it's not there. I cannot feel it. Because you haven't become humble enough from what you have created to receive from them, and you have the greed of the man to give and to possess the physicality of the man to be alive. And this is where the 2 come together. (:36). This is where the mankind in the coming time will learn to trust one with the other, to elevate one that it reaches the other, and in giving, will bring the possession and the position for both to live within each other, to love amongst and adjacent to each other. In so many ways, the fear of the loss of the physicality, that it confirms the existence of the soul, has become a noose around the neck of the man himself.

In so many ways, needs to step up, to understand am I, can I, could I create a condition that in the level of the strength of the soul, that I become lower than what I have created, as the Cups which are supposed to feed me. They are supposed to become the source of my life that I can elevate to show myself by what I give. In so many ways, if you reach that point if you come to that point, that you can even become lower then what a mankind knows, to the soul of an electron, then you might understand the position and the way the Creator works. In the world of atomic nuclear structure we always see the shining light rotating around the center, we call it the electron. But how does it become? It is so humble, that through its humbleness, and in lower strength manifests itself in the presence of a bigger, which is the creator of it, which is part of it, what we call the proton. So in that essence mankind needs to understand, mankind needs to, (:38). progress to the next step. The fear of the loss fo the physicality, or the love of becoming so humble to become close to the Creator, the way he is, the way He operates, the way He has been in the process of the creation. Therefore, for many of us, this dilemma needs to be solved in the coming time, where we become so humble that we become lower than then what we call, what we know at this moment as one of the smallest particles, we call electron, that we can receive from it, but at the same time, in doing so, in becoming so humble, the interaction fo the fields of it, with us, creates the manifestation and confirmation of our soul. The same, when we become such a small dust of the fields, in interaction with the field of the soul of the Creator, which is even lower than us, that He says, I made you to make children that they may love me. In that creation of love and giving. It manifests itself.

In so many ways, we understand the creator becomes even lower than us, to be able to receive the love of us, in what we can give, and then as He receives from many sources, it shines more, then it becomes the creator of more, the giver of more. This is what mankind has to strive to understand, and at that point, if you can achieve that point, if you can become the lower in the field of the strength of the electron, then your soul shall manifest itself. Not to you, but to those who are the observer of your existence. (:40). As I said, we only know the existence of our soul, when it comes in interaction with a soul, another soul, another plasma. Can we create the new D of the new soul? In a way, with the new EU we can create that condition, create much, much lower than what is now, and with it to allow the STM to receive at the highest strength within the system that it shines itself, it shows itself. In so many ways, in many teachings I have said, in the new EU man, some of us, which will enter this system will shine, will see a bright light inside the system. It means that we have become so humble in accepting .. the confirmation of existence of our soul, that in that interaction with the strongest fields within the system, we will shine. It's not to go in to receive, it goes in to give. A new cycle, to give to start a new cycle. It goes to the point of creation to understanding, and the teachings from now on, goes in that direction. How to become, to lie, and how to start structuring T that science meets the religion. Where the systems you make and develop, meets the structure of your soul. Where it has been the promise of the KF, where the science meets the STM. Creating systems that the man himself can through his development meet, (:42). and see and be able to develop his own soul in the process of creation.

We have not come here to give you UFOs, .. or to give you the T that you have a heat, electricity, and the food. We have come here to teach the essence of creation through understanding of the T which man can tangibly see, develop, and with it confirm the existence of his own soul, and confirmation of the greatness and beauty of the Creator, and how humble it is, that through His humbleness, and the strength of the soul we transfer to Him, he shines. This is where .. the 2 meet, we bring the science and T together. And in that respect we bring the science of the soul, understanding the operation within the structure, of within the structure of the Creator, within the structure of the physicality of the man, to be understood, seen, appreciated and be loved. Maybe for the first time you KS have understand, why you have come on such a path, why we have taken you through this cycle, step by step, this is where the man, the STM, meets the soul of his creator, through understanding of the science and T, which has a meaning to him, and has been created through, and within it, we shall lead to creation of new cycle of life. In a way, it's where the science meets the STM, and the man meets the soul of his creator.

But in coming time you need to learn more, because man is physical, man always relies on his physicality, (:44). to see, touch, smell, feel that it confirms his own physical existence. But man now has to learn about the emotion, feeling, and manifestation of the soul of himself, and then in that progression to the final point, man becomes mature to the totality of his existence. And then man will realize, if I can be feeder, and be connected to my Creator, that in return, His touch, is within me, then the completion of the cycle of the emotion of the Creator becomes part of the emotion of the man.

(:46).

create the Gans' of the lowest, that process in interaction, when you stand in-between you might be so low, (:52). that in front of those you might receive to shine, as the strongest will pass you by, as you cannot reflect, as you have not created a condition for it to be absorbed, and to be observer of. In so many ways, when you look at the structure of the brain of the man, it should given mankind a lot of, a lot of indication, why it does not carry the most heaviest elements of the U in it, but it carries the reflectors, and the lightest of. The totality fo the structure of the brain to be able to understand and the work of the STM relies on C, which itself, in essence, is structure of the combination of what we call, the ?? premise of 6, and mankind should have learned how to create the new ?? premise that it leads to the manifestation of understanding of the emotion of the creation and the Creator, and the man itself at the same time, and the same place, and the position, where there is no time and no space. Mankind needs to move on to understand.

(:54).

In so many ways, as KS you still have steps to go. In one of the teachings I explained the creation of the Gans's of gases and liquids, try to understand it, as without them you could not be able to achieve the understanding of , as those shows you the detachment, when in physical life, in horizontal and vertical you confirm your existence within the direction and Inertia of it own life. But when it comes to the Gans of plasma, then you understand, you need to know more, and in that process you'll understand where the

weakest fields of the creation sit, as it leads to the creation and interaction of ?? to the fields of your soul, and enlightenment will show you the direction to the path of the Creator.

In so many ways, some of the KS went on the path of creating, (:56). the Gans of Gans's and in that process, they found in some passages the ways to create the Gans of a plasma, and that is what you will need, in understanding and in direction to be able to create the final soul. To be able to create and understand the totality of the work of the creation. Mankind cannot attach itself to physicality in very shape or form, be it the gas, the liquid, and the states of the life, without understanding and possessing the power of the fields of the plasma. Then that field once you create it in a correct way, might lead you to creation and control, and elevation, and humbleness of your soul. Mankind's soul is made from the Gans's fo the Gans's, Gans's of the body of the mother as an egg, and the Gans's of , the collection of the Gans's of the body of the father, the sperm. How can you create a system when you have not found the match.

In so many ways, mankind needs to understand, to elevate itself to understand to replicate everything the same. You cannot create a condition to reach the level of the soul of your life if you have not understood the creation of the fields of the plasma. Your system lacks credibility and understanding. In so many ways, would the system stay individually and solid as you make it in the box, or do you create Gans's, do you create fields, (:58). do you create souls where it has to be in the reality in a dynamic condition. Now maybe many of you understand the collection of teachings over past 10 - 15 years, where we do not make, but we guide you to make and develop the systems. When we showed the first dynamic systems and then we created 129 Tesla, that was the first beginning to show the power of the understanding of the creation of the fields of the plasma, that today if KS understand this can lead them to the creation of their own condition for confirmation of the existence of their soul that other souls shall see. This has been gifted only in one condition, to UC members in the pure soul of service. And they loose it once they loose, and the leave their position. In a way, we have given a collective understanding of the condition to the souls who are here to serve on the banner of the UC members, that they shine, they don't need to make Gans's, or systems to be shown. The .. humbleness and servitude will cause them to shine that other souls receive the reflection of the beauty of the creator within them.

In so many ways, those of you who became members of UC understand to consider your position, and understand to serve, you become part of the reflection of the light of the Creator That's why we said, people will recognize members of UC by their light, and not by ?? race and physicality, as they receive through their humbleness to serve the light of the others that they shine. (1:00).

(1:08).

Any questions.

Q: This soul does not yet exist on Earth, I don't know, can it be? (1:10). .. repeats …

K- What do you mean this soul?
R: perhaps, .. the ultimate soul, is not yet .. is going to be here. (1:12).

Q: Salameea, .. do you think that Bahuala is the soul that unify the planet for this Eve? And after other souls will come to unify the planet?
K- Many positions and the even position of the Christ, or the other prophets is the same. In a way, they tried to guide man during their time, in understanding of their people. Now we have to understand, it's not anymore my prophet of what I believe in, the path of who or what, (1:14). It's from now on what my soul, my understanding will lead me to. The understanding of man today has reached the point to the prophet of the past, because now man knows the path to his soul, does not need another soul to guide it. It needs another soul to elevate it. It needs a humbler soul to understand it. This is how .. with the new cycle of understanding the science of the creation one does not need someone else to be told by, because you are taught to be able to read and understand the work of your soul. To be able to create the condition for the creation fo your soul. In the past, even to recent time, all men were illiterate even those who called themselves priests and guidance and whatever, and they made up what they wanted, because the others could not read or write either. But this time we have taught the knowledge of the creator through the STM, does not need a language to write and read. The knowledge needs to touch the STM, the man will be educated, (1:16). as in the U we have no schools and no languages, but we understand the operation of the creation through the interaction of the fields of the existence.

(1:40).

Q: .. does your MaGrav electrical system run on a Tesla system, (1:46). of volts/ sec, where the power gird system is Hz, cycles per second?
K- No.
Q: what is difference between center of mass, and center of gravity, and how can these center of mass exist outside of mass, and can the center of gravity exist outside the body?
K- It depends what you define Mass and Gravity, and if you read the book #1 which explains what the mass is. And then you'll understand what is, and can it be.
Q: (1:48). what can be the mistake which humanity has fallen .. is it the lack of humility and lack of knowledge? If I understand correctly as a KS, Knowledge, humility, and ethics must go together, is that so … if one of the 3 is missing, does the soul ?
K- (reads question ..). It is, not the ethos of the knowledge, and it's not lack of humility. It's the lack of humbleness, the lack of understanding the position. You see, the way and the path the KF has taken is replication of life in the U. Man in the coming time will understand how we thought and how we teach. (1:50). We have the knowledge into the library of the U, we share it humbly and they see it as our weakness. But in a way it's the strength we have, and that makes us to be humble. We teach vigorously, we teach with a lot of humbleness, but through that we'll reach the souls who are ready to receive the

knowledge. So it's not the lack of, is understanding the position of, and understanding the value of what you possess in that position. We share through our humbleness and knowing what the others can do with it, it might advance their level of understanding of the creation, or make the physical life more comfortable. But we don't go and envy, we gave this, that we are better. As the logo of the KF says, we are here to serve, and not to be served. in this point of time, those who serve, and their humbleness, to share everything is seen as a sign of weakness.
We are breaking into all levels of the society in a very soft way .. this time we take the STM with us, this is where it sits
(1:52). in the strength in the fields of an electron, then you understand it means, and how it works. Man has become too arrogant in his mistaken identity of being successful in physical life. The more successful man has become the more he ahs brought demise to himself. The more advanced T you create the more cancers you create. The … to create energy the more you kill, like nuclear and the rest of it. .. the progress into science has become a noose around the neck of the man, of compromise.
Q: .. asks us to stop consuming animal products. Can we use ?? Gans, the ones used for agriculture are very ?? to produce and they give a lot of Gans ..

K- To use which Gans?
Q: .. Gans with Seawater and soda.
K- Sea Gans? (
Q: Yes, in order to feed the human being. (1:54).
K- You see, the oceans are the reservoir of life.

(2:02). This is I think in book 1, and in more depth in book #4. You can create the fields of a planet or star, within the structure of the new systems. We can create the heartbeat of the Moon, the Sun, and through that heartbeat we can travel to the depths of the Sun. This is already been achieved. We can create heartbeat of different strength and elements within the structure of the system, to replicate its life. As I said in the teachings yesterday, in the new EU, we don't create gold, we create the soul of an atom of the gold, that with it, if it needs to it will convert to the physical gold. We don't go and bring the energies, we bring the fields strength of the soul of the gold, it's much easier.
Q: Thank

Go for BREAK >>> (2:04). (2:11).

Q: .. now I understand the phrase in Bible that the meek shall inherit the earth. Or in another way the humble will inherit the earth.
Q: How does one become aware of the MG fields of the Earth, (2:12). so we can feed and more?

K- What do you mean aware. We can measure it with the systems which are available. But now we can create it within the structure of plasma systems. It's not in the hands of the big organizations and elite.
Q: So how can we use them to feed and more…?
K- To feed? Why do we need to feed? It's available to us. We can make it available, that we give to Earth first, that in giving we'll have the capability to receive. Why don't we become the suppliers instead of the consumers now that we understand the knowledge, that by doing so we elevate the soul of the planet and the situation on this planet changes, and maybe what has been a shortcoming and brought all these deaths, mental condition through his structure of his physical matter can come to an end. Isn't this what we are doing on Sundays, when all the KS water, or spread Gans's around the cities, and whatever, and the rivers.
Q: .. can we clean our polluted water with Plasma T, can one of the EU purpose be to clean all the environment? (2:14).
K- This question was asked yesterday. .. Yes the T exists and we can do so.
R: The EU is usually for something inside the egg instead of outside the egg, is that true … for the whole environment?

EU to Sterilize Environment - Produce Materials stop mining earth

K- The **EU can be made to be a transition system, very much like a sterilizing system, but this time we change the structure in a different way, where you can continuous flow through the system to create a balanced field**. These are all coming up in the coming time. As we have developed and we are developing new what we call, field systems. This is becoming part of the work we have and are doing. … The EU will **become a conveyor belt of production as we don't need to dig anymore**, or damage the mines, because this planet, by digging mines.
Humble Yourself to receive from Plasma

Q: Eric USA, about producing H plasma. (2:16). I am one of the good Dutch people from Kentucky.. ….
You taught us to make the CH3 and you showed us further that we could split it into Deuterium and Tritium. is that right.
K- Yes if you understood it.
Q: Vaguely. you were talking about making a H Gans, or a H plasma and **then I am supposed to humble myself to give to the H plasma**. So do I ..?
K- You don't give, you receive from the H plasma. (you got it) the wrong way around. **To receive from the H plasma. Doesn't necessarily mean what you give, that the H will give back at the strength you need. Then you are available, the H you create is available to receive field energy from the others**. (2:18). It doesn't mean if you are emptying a cup to serve someone, that person has to serve a cup back to you. You get served from somewhere else.
Q: So like somewhere else in the world someone is doing the same thing?
K- Yeah.

Connecting KS Around World through Cu - matter existence of man

Q: Kind of like what we are doing with **all our Gans's and our units** that we are making. Once we develop these, these all share , **they cross connect through the world, and we change the world**?
K- If you notice from the beginning of time, where we taught the first Gans's of CO2. If you noticed, we used one common denominator that all of you use. It doesn't matter if it is CH3, CuO or CO2 as a connection of the C, O, **… it's Cu**. **Which is the matter existence of the man. So in a way, all of you connect and develop the Gans's and you spray Gans's, you have started creating a common link between each other anyway**. We didn't make it through the CO2 gases of this planet, we made it through the Cu which is the physical structure of the man. **Unknowingly, by a lot of you, we have connected all the KS to each other, and in due course and time, we'll tell you how to use it.** (2:20).
Q: I always thought we were linking somehow, like when we were doing the Gans balls, and the dynamic systems, we are creating these plasma that extend beyond ourselves, and I guess our bodies have these plasmas too, that extend out and we are just displaying how ?? our work too, right, we are all , we are ?? to expand our soul and plasma out in the earth, or surroundings.

At Right Time we'll connect all the KS without you knowing

K- In a way, **through the back door we have brought you lot together**, and in time, **when the time comes right we connect all of you, without you knowing**.
Q: I have always believed that .. seeing what we have seen in America, in the past few years. .. I just feel that something has changed in America, somewhat, in the direction of the good and I was wanting to know if, our efforts as KS have contributed to that?
K- In a way yes, but we are ?? linking people without .. what **will become knowledge without borders**, if you call it, and we have managed, (2:22). to connect the soul of many people together through their own understanding.

World Peace can be Achieved with Biden election - not last long

And as you say, your nation has changed, but the changes to come, in the coming weeks in US will be the next step for peace. Let me explain something, I always don't disclose unless somebody touches it, then we disclose it. If you remember I explained to you the election of your new president, and the VP in early August this year, we announced our support for Pamela Harris. You have to understand … **the possibility of the peace by the election of Biden has become very, very close, world peace can be achieved**. There are reasons for it. We don't see Biden to last long as a president as many of us know, and the situation has drastically changed in the past 3 weeks.

President Harris is far left Communist

The new president of the US, **President Harris, is a far left communist ever mankind known**. She is one of the far left, hardest communist people you ever know. This will bring America through her school of thoughts. She was bred this way by her father as a
